large chamber is one hundred and seventy-nine feet in length, eighty feet in width, and from forty-five to fifty feet in height, with light and ventilation from three sides, and unsurpassed acoustic properties.

"Should a larger room or different dimensions be required, we hold ourselves in readiness to make the alterations, with a view to meeting the reasonable views of the directory and members. Full and complete arrangements have been made for the purchase and possession of the ground, and ample guaranty will be given for the completion of the building, which will be on an elegant scale of architectural beauty, on or before the 25th of November, 1872, the time of the expiration of your present lease. We propose a lease to the Exchange for twenty-five years on the following terms: For a term of five years, \$12,000 per annum; for a second term of five years, \$15,000 per annum; for a third term of five years, \$18,000 per annum; for a fourth term of five years, \$21,000 per annum; and for the fifth term of five years, \$24,000 per annum.

"We may here repeat, from a former statement laid before you, that the location proposed is perhaps the most central that can be found, relative to the custom-house, post-office, court-house, banking and insurance institutions, leading hotels, the preponderance of the business houses of our city, and the centre of our river commerce."

(Signed)

GEORGE KNAPP, representing James H. Lucas, George Knapp & Co., Ann L. Hunt, Thomas Allen, Adolphus Meier, George R. Taylor, Henry Blaksley, Joseph Weil, James J. O'Fallon, William C. Taylor, William Keiler, John H. Gay, William T. Gay, J. G. Weld, B. W. Alexander, Erastus Wells, Joseph Brown, Franklin O. Day, R. J. Lackland, J. H. McLean, John Finn, Elois P. Kayser, R. W. Mitchell, Frederick Hill, Edward J. Gay, J. R. Pullis & Brother, Z. E. Wetzell & Co., who had agreed to form a company with ample capital for the purpose of erecting an Exchange building, conformably to the above proposition.

Third and Locust Plan.—P. B. Gerhart, for himself and associates, reiterated his former proposition, with the additional statement that they proposed to have the building ready for occupation in eighteen months after the acceptance of the proposition and after Third Street had been widened as proposed for the bridge approaches.

Sixth and Washington Avenue Proposition.—Messrs. John A. and W. H. Scudder and Mrs. Ames submitted the same proposition as before for the erection of a building on this location, with the stipulation that it should be completed by November, 1872. This contemplated the erection of a building one hundred and eighty-two feet on Washington Avenue by one hundred feet on Sixth Street, leaving twenty-five feet on the north side for an open court. The rent proposed was, for the first five years, \$5500 per annum; the next ten years, \$20,000 per annum; the next five years, \$25,000 per annum.

The board did not discuss the merits or demerits of the propositions, but merely considered the mode of submitting the question to the members of the Exchange. The directors decided that a vote of the members be taken on the 6th, 7th, and 8th of July,

polls open from 10 A.M. to 2 P.M. each day. They further decided that any plan to be considered adopted must have a majority of all the votes cast, and that in the event of there not being a majority for either of the propositions, the one receiving the lowest number be considered rejected, and a new ballot ordered upon the other two. If a majority of the votes were cast for any one proposition, the board would understand that they were instructed to enter into a contract according to the proposition approved.

The proposition of the Messrs. Scudder and Mrs. Ames was, however, withdrawn, as appears from the following letter:

"OFFICE OF HENRY AMES & Co.

"St. Louis, June 27, 1871.

"To G. B. ALLEN, *President of the Union Merchants' Exchange, St. Louis:*

"DEAR SIR,—We desire to withdraw the proposition now before you, of the undersigned, for building a new Exchange building on Sixth and Washington Avenue, believing that in so doing you will the more readily arrive at a selection which will be agreeable to a larger number of your members than if a greater number of proposals were before you. As the selection of this site seems to be opposed by many of your members, we are unwilling to be the instruments of any discord or disagreement among you. In conclusion, we will say that we will cordially support any location which may be the selection of a majority of your members.

"Yours, respectfully,

"JOHN A. SCUDDER.

"CATHERINE AMES.

"WILLIAM H. SCUDDER."

The withdrawal of the Scudder proposition left but two sites to be considered and voted upon by the members of the Exchange, viz.: Third and Locust Streets, and Third Street between Chestnut and Pine. "We maintain," said the *Republican* at the time, "that the latter is the more suitable, being nearer the centre of trade and more accessible to the great body of our merchants. As has heretofore been stated, there are seven hundred and seventy-three business houses represented on 'Change located south of Olive Street, while there are only four hundred and ninety-two located north of that street. This shows at a glance that a large majority of our mercantile community would be better accommodated by the location of the Exchange between Chestnut and Pine Streets than between Locust and Vine. We believe that the question has already been decided with emphasis by the common voice of those most interested, and it only remains to record that decision at the election to be held on the 6th, 7th, and 8th of next month."

The proposition of Mr. Knapp and his associates was finally accepted by the board, and a special committee, composed of Gerard B. Allen, George Bain,

John Wall, W. M. Samuel, Miles Sells, and D. P. Rowland, was appointed to prepare articles of association for a company to be known as the St. Louis Chamber of Commerce Association. At that time the officers of the Exchange were Gerard B. Allen, president; R. P. Tansey, first vice-president; George Bain, second vice-president; and George P. Plant, John F. Mauntel, William H. Scudder, Philip C. Taylor, D. P. Rowland, William J. Lewis, Web M. Samuel, John A. Scudder, John Wahl, and Miles Sells, directors. This committee reported a series of articles of association to a meeting held on the 22d of November, 1871, and after they had been read, the following preamble and resolutions were adopted:

"WHEREAS, A petition signed by nearly seven hundred members of this Exchange, being a majority thereof, has been presented to this directory requesting them to locate the new Exchange building on the block bounded by Third and Fourth and Chestnut and Pine Streets, and to take steps to form a stock company to purchase or lease the property designated and build a suitable building thereon; therefore be it

"Resolved, That the directory of the Union Merchants' Exchange cordially indorse the location so designated and the articles of association reported to them by the special committee appointed for this purpose.

"Resolved, That committees of three each be appointed by the president to canvass the members of the Exchange and others interested and secure subscriptions to the capital stock of the proposed association."

The articles of association which were adopted at the same meeting read as follows:

"CERTIFICATE OF ASSOCIATION OF THE ST. LOUIS CHAMBER OF COMMERCE ASSOCIATION.

"The undersigned hereby certify that, by virtue of the provisions of chapter sixty-nine of the general statutes of the State of Missouri, entitled 'Manufacturing and Business Companies,' and authorizing the formation of corporations 'to erect hotels, halls, market-houses, warehouses, exchange and other buildings, and for any other purpose intended for mutual profit or benefit, not otherwise especially provided for and not inconsistent with the Constitution and laws of this State,' they have associated, and by these presents do associate together, to form a corporation in manner and form, and for the objects and purposes hereinafter set forth, as follows:

"ART. I. The corporate name of this company shall be 'THE ST. LOUIS CHAMBER OF COMMERCE ASSOCIATION.'

"ART. II. The objects for which this company is formed are the erection of an Exchange and other buildings on Block 86, bounded by Chestnut, Pine, Third, and Fourth Streets, in the city of St. Louis, State of Missouri; the lease or purchase, in fee-simple or otherwise, of the land on which said Exchange buildings are designed to be erected, and the use or renting out of said buildings for a Merchants' or other Exchange, for offices, banks, stores, or any other lawful use or purpose whatever approved by this company.

"ART. III. The amount of the capital stock of this company shall be one million dollars, and consist of ten thousand shares of one hundred dollars each. But the company shall be regarded as established and organized by the subscriptions of stock made by the signers of this certificate, and the board of

directors hereinafter named shall make rules or by-laws in reference to any further subscriptions to said capital stock.

"ART. IV. The affairs of this company shall be managed by a board of thirteen directors,—Rufus J. Lackland, B. W. Alexander, Henry T. Blow, Gerard B. Allen, Geo. Knapp, John A. Scudder, W. M. Samuel, George Bain, George P. Plant, Henry L. Patterson, E. O. Stanard, W. J. Lewis, and D. P. Rowland shall form said board for the first year.

"ART. V. The business operations of this company shall be carried on in the city of St. Louis, and its office shall be at such place in said city as may from time to time be selected by said board of directors.

"ART. VI. The period of the corporate existence of this company shall be fifty years.

"ART. VII. The board of directors shall, as soon as practicable, call a general meeting of the stockholders of this company to make by-laws for the same, as provided by law, for the management of its property, the regulation of its affairs, the transfer of its stock, and especially for the declaration of the powers and duties of said board of directors."

On the 12th of December the directors met and elected Rufus J. Lackland president, Gerard B. Allen and George Knapp vice-presidents, and George H. Morgan secretary *pro tem*. At the same meeting they adopted and issued the following address:

"The undersigned, directors of the St. Louis Chamber of Commerce Association, desire, in asking for your subscriptions to the capital stock of that association, to present some of the reasons which have impelled them to assume the responsibility of providing St. Louis with a suitable Exchange building.

"It must be apparent to all of our citizens that it is full time that St. Louis should evince the same faith in its future progress that is exhibited by the great majority of the people of the whole country. No greater evidence of this faith and of a determination to command success can be given than the erection of a Merchants' Exchange, a grand central mart, in which will be combined the commerce of a dozen States, and around which must of necessity gather the controllers of the capital which will aid, encourage, and extend that commerce. Nor is it unimportant that such a building should combine architectural strength and elegance. The present requirements of our commerce cannot be served in a small edifice, and it is not open to doubt that the requirements of ten years hence will demand greatly extended accommodations; that with the increase of our population, the extension of our trade, the cultivation of a higher taste in art, the erection of a structure of imposing dimensions will alone satisfy the conditions of the progress of the city and assure that progress.

"The plan proposed, and which has received the approval of the members of the Merchants' Exchange, is to devote the entire block bounded by Fourth, Chestnut, Third, and Pine Streets to the erection of buildings for commercial, banking, insurance, legal, and exchange purposes, the structure to be suitable in architectural design to the metropolis of the West, commensurate in extent and adaptation to the present and prospective commercial interests of the city, and which shall present facilities for the immediate co-operation of the varied interests represented in the Produce Exchange, the Board of Trade, the Mechanics' and Manufacturers' Exchange, the Tobacco Association, the Pork-Packers' Association, the Real Estate Exchange, the Board of Underwriters, etc. The entire cost of such a structure, including the fee-simple of the ground, will exceed two million dollars, but it is not probable that the entire cost will be borne by the association. The building of

the whole block in the same style of architecture is imperative, but it is now proposed that the association shall purchase only the eastern two-thirds of the block, leaving Mr. Lucas and Mrs. Hunt to build up the western third, a division that will reduce the amount to be raised by this association some seven or eight hundred thousand dollars, while the interests of the public will lose nothing. The work is not to be commenced upon the structure until the entire amount necessary to construct it has been provided for by stock subscriptions or otherwise, nor will the architect be selected until that time, when perfect plans, with specifications, shall be submitted, and the cost clearly known before any expenditure upon construction account is made.

"We are thus explicit in stating details that we may more directly enlist your aid. It seems to us clear that in this task of developing the commercial interests of St. Louis and placing its future progress beyond question, we are justly entitled to call upon the moneyed institutions of the city for liberal stock subscriptions. We advance no labored argument to prove that the enterprise must of necessity be a paying one. In a building of the character designated a large amount of room will be devoted to banking rooms, insurance offices, etc., and as they will be by the location brought in direct proximity with the interests that form the basis of their transactions, there will be no lack of desirable tenants. There is scarcely more need to present reasons that should determine you to make subscriptions to the capital stock. The banks and insurance companies of the city represent a capital of nearly fifty millions of dollars, capital that belongs to St. Louis, is a representative of the accumulated wealth of the city, and has been largely drawn here by the operations of merchants. Beyond this the banks alone hold an average of over thirty millions of dollars, deposited by merchants and business men, each of whom is interested in, and will be served by the erection of, the proposed structure. The merchants themselves of necessity are unable to withdraw large amounts of their capital from their active business for stock subscriptions, even to an enterprise of this character; nor would it be to the interest of the banks to have them do so. The latter, however, as the custodians of the deposits of the merchants, are required to hold a certain portion of their resources in trust, and we submit to them that the fiduciary trust thus imposed can be most wisely used in such an investment as we propose, as by this means they employ most directly a portion of the gathered capital of the merchants to aid and extend the commercial operations and profits of the depositor.

"We are gratified to announce that the subscriptions already made and tendered foot up four hundred thousand dollars, of which two hundred and fifty thousand dollars is from individuals, and the remainder from the Bank of the State, the Boatmen's Saving Institution, and Third National Bank, each of which institutions will subscribe fifty thousand dollars, and propose to occupy portions of the building. We may add that the subscriptions will be called for only as the work progresses, thus extending the payments over a period of eighteen months or two years.

"In conclusion, we suggest that, although at the moment there may be a doubt as to whether some of our banks, under their charters, can make such subscriptions, that this objection may be obviated by the passage by the Legislature of a general law enabling corporations as such to take stock in other corporations.

(Signed)

"Rufus J. Lackland, B. W. Alexander, Henry T. Blow, Gerard B. Allen, George Knapp, John A. Scudder, W. M. Samuel, George Bain, George P. Plant, Henry L. Patterson, E. O. Stanard, William J. Lewis, D. P. Rowland."

On the 19th of December the association was chartered by the Legislature, the incorporators being Erastus Wells, John N. Bofinger, R. J. Lackland, and others. Immediately after its organization the board effected the purchase of the ground for five hundred and sixty-one thousand seven hundred dollars and eighty-six cents, and applied itself to the work of obtaining subscriptions, which on the 6th of July, 1873, amounted to six hundred and fifty thousand dollars.¹

In May, 1873, the work of tearing down the old buildings was commenced, and in July the first excavation was made for the foundations. On August 25th following the first stone of the foundation was laid, and on the 6th of June, 1874, the corner-stone was laid with Masonic ceremonies under the direction of Rufus E. Anderson, Grand Master of the Grand Lodge of Missouri.² On Friday, June 5th, the reception-stone was set in place at the northeast corner of the building, a large copper box having been fitted in place in its centre. The immense corner-stone proper was placed at a point a short distance away, to serve as a speaker's stand. On Saturday afternoon, June 6th, the members of the different Masonic lodges, including the Grand Lodge of Missouri, and Knight Templar commanderies of the city assembled in uniform at Seventh and Market Streets, where they were joined by Company A, National Guards, Capt. John B. Gray. The members of the Chamber of Commerce Association and Merchants' Exchange and a large number of other prominent citizens also joined the procession. At five o'clock the march was begun. First came a body of mounted policemen, then the military headed by the New Orleans Band, then the Knights Templar commanderies, then the Chamber of Commerce Association and Merchants' Exchange, and lastly the Grand Lodge, headed by the Arsenal Band. On Fourth Street, in front of the Planters' House, the procession halted and opened out, and the Grand Lodge passed through, receiving the salutes of the command-

¹ Among the most earnest promoters of the enterprise was James H. Lucas, who consented to conform the building to be erected on the Fourth Street front of the Exchange Square to the Exchange building. After the five hundred thousand dollars of stock had been subscribed, Mr. Lucas subscribed twenty thousand dollars, and made a deed for the property, yielding to the company the additional advantage of allowing the Exchange property to extend back so as to leave him a depth for his Fourth Street property of only ninety-five instead of ninety-six and a half feet. Ill health, however, prevented Mr. Lucas from taking an active part in the work, and from giving written pledges to build up the Fourth Street front in conformity to the Exchange plan.—*Republican*, Nov. 18, 1873.

² At this time the subscriptions to the stock amounted to eight hundred and fifty thousand dollars.

eries and military. Passing around by Chestnut Street, the body proceeded to the scene of ceremony. Arrived there, the officers of the Grand Lodge took their station on the platform, and the brethren formed in a hollow square about the corner-stone. The officers of the Grand Lodge at this time were R. E. Anderson, G. M.; John W. Luke, D. G. M.; J. E. Cadle, S. G. W.; Allen McDowell (acting), J. G. W.; William N. Loker, G. Treas.; Geo. Frank Gouley, G. Sec.; Rev. R. A. Holland, G. Chap.; D. N. Burgoyne, Bearer Great Light; J. R. Friend, S. G. Deacon; Morris Jacks, J. G. Deacon; W. R. Stubblefield, G. Marshal; Nicholas Wall, Grand Marshal; G. B. Dameron, G. Sword-Bearer; John G. Gilfillan, Grand Steward; Isaiah Forbes, Grand Steward; J. X. Allen, Grand Tiler. After music by the Arsenal Band, R. J. Lackland, president of the Chamber of Commerce Association, introduced to the immense concourse who blocked the streets on every side Web M. Samuel, president of the Merchants' Exchange, who delivered an interesting and forcible address. Rufus E. Anderson, Grand Master of the Grand Lodge, then addressed the assemblage, and when he had finished, the ceremony of laying the corner-stone was commenced. A box was placed in the stone, containing a Bible, the records, constitution and by-laws of the Chamber of Commerce Association and of the Merchants' Exchange, copies of newspapers, coins, and other relics, and the stone, weighing nine tons, was then lifted into place, after which the usual Masonic ceremonies were performed.

The officers of the Chamber of Commerce Association at this time were Rufus J. Lackland, president; George Knapp, first vice-president; B. W. Alexander, second vice-president; George H. Morgan, secretary and treasurer; Directors, Rufus J. Lackland, B. W. Alexander, George Knapp, W. M. Samuel, George Bain, George P. Plant, D. P. Rowland, J. H. Britton, John R. Lionberger, John H. Beach, Adolphus Meier, Charles L. Hunt, J. B. C. Lucas. Building Committee, George Knapp, chairman; R. J. Lackland, J. R. Lionberger, Adolphus Meier, Charles L. Hunt.

In 1875 the name of the Exchange, which had continued to be the Union Merchants' Exchange, was changed to the Merchants' Exchange of St. Louis, and in the preamble to their rules and by-laws the members declared the object of the association to be "to advance the commercial character and promote the manufacturing interests of the city of St. Louis," to "inculcate just and equitable principles of trade, establish and maintain uniformity in the commercial usages of the city, acquire, preserve, and disseminate

valuable business information," and to "avoid and adjust, as far as practicable, the controversies and misunderstandings which may arise between individuals engaged in trade." The erection of the new Exchange building was pressed forward with great energy, and the splendid structure was completed and formally opened on the 21st of December, 1875, with ceremonies of an elaborate and imposing character. At ten o'clock the members of the Exchange assembled at the old Exchange building to say "good-by" to their former home. At eleven o'clock Company A, National Guards, commanded by Capt. C. E. Pearce, filed into the hall, headed by Postlethwaite's Band, and after music by the Arsenal Band, D. P. Rowland, president of the Exchange, called the assemblage to order, and announced that Mr. Wayman Crow, the oldest living member and the second president of the Exchange, had been selected to deliver the farewell address. Mr. Crow then addressed the meeting, giving an historical sketch of the organization and relating many interesting reminiscences.¹

¹ In the course of his address Mr. Crow said,—

"Our organization, gentlemen, has witnessed in this city a growth and development almost unparalleled in modern times. Since the day of our incorporation a population of ten thousand has increased to nearly half a million. In a little more than half a century St. Louis has passed from a border trading-post, scarcely yet Americanized, to a metropolis which is already contending for a foremost rank among American cities. I can scarcely help feeling surprised when I look around me to find myself almost, if not quite, the oldest 'business man' of St. Louis, although in some communities I might claim to be a young man yet. But having been in business here more than forty years, I cannot recall to mind an individual now in commercial life who was engaged in mercantile pursuits at the time of my coming. You will pardon me; then, I am sure—seeing that I belong to the past more than to the present—if my thoughts revert to those early days and rest for a moment with the men who were my trusted co-laborers, and with those who immediately preceded us in our work. At least you will permit me to bear witness to the high character, the commercial honor, the personal faithfulness of those who were the early founders of our prosperity, and who gave the tone and standard—not yet lost, and never, as we confidently hope, to be lost—to the daily business life of St. Louis. Those old-time workers may have been a little too conservative, sometimes timid,—'old fogies' you would call them nowadays,—but they were scrupulously honest in their dealings, strict constructionists in their regard for contracts, men of untarnished integrity in meeting their engagements, and it is to their practice and example that the present high commercial credit of St. Louis, both at home and abroad, is greatly due. However strong and promising the present may be, I cannot, as your oldest member, say a better word than this,—that we should hold fast to the early traditions of the Chamber of Commerce, and maintain that high regard for honorable dealing which has characterized the past, so that to be a recognized member of the St. Louis Merchants' Exchange may always and everywhere be a passport to respect and confidence. Consider through what trials and difficulties we have thus far advanced. No city has suffered

At the close of Mr. Crow's address the band struck up "Auld Lang Syne," and the air was sung by the entire Exchange. A procession was then formed under direction of William Hamilton, grand marshal, which marched up Main Street to Washington Avenue, up Washington Avenue to Fourth Street, down Fourth Street to Chestnut Street, and along Chestnut Street to the new Exchange building. A squad of mounted police formed the head of the procession. Next came Postlethwaite's Band, followed by Company A, National Guard Rifle Association, Capt. Charles E. Pearce in command. The president and directors of the St. Louis Chamber of Commerce Association came next, and after them the architects, builders, and contractors of the new building, ex-presidents of the Exchange, vice-presidents and directors, various committees and members. Along the line of march the streets were lined with people, and at the new building there was scarcely room enough for the column to pass along comfortably. Although there was a goodly number of ladies and gentlemen present as spectators, the vastness of the hall and the galleries made the many appear but few. When the procession filed into the hall, the officers, ex-officers, and distinguished guests mounted to the platform, while the other members of the procession filled all the standing-room on the floor of the hall. The Arsenal Band took position at the left of the platform and opened the ceremonies with music. Among those on the platform were the following:

D. P. Rowland, president of the Merchants' Exchange, Mayor Britton, Rev. Dr. W. G. Eliot, Wayman Crow, Capt. James B. Eads, Samuel M. Edgell, George Knapp, Charles Hunt, Adolphus Meier, ex-Governor E. O. Stanard, John Beach, Web. M. Samuel, Maj. Francis D. Lee, George Partridge, D. A. January, William H. Scudder, George H. Morgan, Capt. Nanson, Craig Alexander, John B. Maude, Michael McEnnis, William M. Senter, R. P. Tansey, Capt. Davidson, and John Booth.

Hon. E. O. Stanard called the meeting to order,

greater reverses by fire, pestilence, and flood, by financial crises, by internal dissensions and civil war; and yet we have passed through all, chiefly by the sturdy strength and steadfastness of our business men. At the present time, notwithstanding many disturbing influences and more 'exceptions' to the course of strict honesty than are necessary to 'establish the rule,' the prevailing tendencies are in the right direction. The future is clear and bright before us. To your hands, gentlemen, upon whom the burden and heat of the day must fall, the commercial destinies of our city are committed. Let the future be better than the past by as much as the magnificent building to which we go is better than that from which, almost reluctantly, we must now depart."

and stated that as the hall was so very large, and its acoustic properties had never been tried, it would be necessary to preserve the strictest silence to secure a hearing of the speakers. He then introduced Maj. Francis D. Lee, chief architect of the building, who delivered possession to R. J. Lackland, president of the Chamber of Commerce Association, accompanying the formal transfer of the structure with a brief address. Mr. Lackland then delivered the building in turn to D. P. Rowland, president of the Merchants' Exchange. In the course of his remarks, Mr. Lackland complimented Col. George Knapp, chairman of the building committee, for the untiring energy which he had displayed in overcoming all obstacles to the completion of the edifice. "To his (Col. Knapp's) far-sighted public spirit and indomitable energy," added Mr. Lackland, "we are mainly indebted for this beautiful structure."

On behalf of the Merchants' Exchange, Mr. Rowland accepted the trust from Mr. Lackland, to whose remarks he responded in a brief and eloquent address. Prayer was then offered by Rev. Dr. W. G. Eliot, after which Capt. James B. Eads, orator of the day, was introduced, and delivered an elaborate and able address. A poem on commerce was then recited by Solon N. Sapp, which was followed by addresses by Web M. Samuel, Hon. E. O. Stanard, and George H. Morgan. Mr. Morgan then read a communication from Thomas A. Buckland, a member of the first board of directors of the Merchants' Exchange, congratulating the association on the grand results which had been achieved, and referring to the great changes which had taken place since thirty years before, when the pulpit of the First Baptist Church stood almost in the spot occupied by the president's desk in the new hall. Capt. Frank B. Davidson being called on made a few remarks, after which President Rowland declared the meeting adjourned, and the vast assemblage dispersed. In the evening the hall was illuminated and a concert was given, which was repeated on the following night.

The building is one of the most spacious, attractive, and conveniently arranged structures of its class in the world, and its total cost (including the site) was about \$1,800,000.

It occupies the eastern and principal portion of the block bounded by Third, Fourth, Chestnut, and Pine Streets, having a main frontage of two hundred and thirty-five feet on Third Street, and secondary fronts of one hundred and eighty-seven feet each on Chestnut and Pine Streets.

Externally the edifice is of cut Warrensburg sandstone, and is apparently but three stories high, although

it is in reality five, exclusive of the basement. The basement is treated with quoined piers, with red granite plinths and boldly moulded caps, and the first story with piers supported by moulded bases and caps, carrying a bold cornice enriched with triglyphs. The second and third stories are of the composite order, the pilasters coupled and supported with pedestals, with balusters between the same. The centre of the Third Street front is enriched with detached columns in the several stories, surmounted by a bold pediment. A rich crowning entablature, carrying a balustrade, surmounts the entire building. In all parts of the design the reliefs are bold, producing the fullest effect of light and shade; and although the separate parts of the building are almost colossal, the general effect of the whole is light and airy. The style of the architecture is something of a mixture, but may properly be classed of the *renaissance* order.

The principal façade is recessed twenty-one feet from the original building line of Third Street, thus giving room for a broad sidewalk and spacious area along that entire front. It is also recessed on Chestnut and Pine Streets, so that the sidewalks there are increased to a width of fourteen feet.

Although the structure appears to be a unit, in reality there are two distinct buildings, separated internally by a large area for light and ventilation, but connected by a grand central stair hall and by arcades on Chestnut and Pine Streets. In that portion of the structure west of the internal area is situated the grand Exchange Hall, the clear dimensions of which are two hundred and thirty-five feet by ninety-eight feet in area, with a height of sixty-nine feet. It is lighted on every side with great windows filled with plate-glass in two tiers, separated by a light gallery extending around the hall. The door and hall casings are of massive walnut highly varnished and polished, with panel-work of French walnut. The bases of the pilasters and all the wainscotings are of the same material.

The president's desk with accessories on a raised platform ornaments the west side of the hall, and is the most elegant piece of work of the kind in the West. It is of walnut, carved and moulded in the most tasteful manner. The desks of the members, the grain tables, and, in short, all the other fittings are likewise of walnut. The grain tables are all covered with thick slabs of highly-polished white marble.

The ceiling, including the cornice and cone, is ninety-nine by two hundred and fifteen feet, and exclusive of them is fifty by one hundred and seventy-nine, and is divided into three compartments, each containing a grand medallion.

The central figure of the ceiling is emblematic of St. Louis, and is surrounded by groups typical of the agricultural, mineral, and industrial products of the Mississippi valley. The group of figures to the north represents the four quarters of the world bringing their various offerings to the West, which, with outstretched arms, offers its products in exchange. The two figures at the bottom complete the representation of the West with the Mississippi River.

The two end compartments are composed of geometrical divisions, ornamented in imitation of stucco, containing each four panels, with emblematic representations of the industries of the State of Missouri

CHAMBER OF COMMERCE.

in *basso-relievo*. The centres of these two compartments form each a medallion of twenty-six by twenty-six feet. The one on the north end represents characteristic types of European nations,—England, Germany, Italy, France, Scotland, and Ireland forming a central group, surrounded by Russia, Switzerland, Spain, Slavonia, European Turkey, and Greece. The south medallion represents characteristic types of Asia and Africa,—Arabia, Egypt, Judea, China, and Japan forming the principal group, surrounded by Ethiopia, Caucasia, India, Persia, Abyssinia, and Mongolia.

The cornice surrounding the ceiling, with the spandrels and lunettes over the windows, forms a border twenty feet wide, containing the names of all the States of the Union, and representations of the merchant flags of the world in panel-work, enriched with ornaments in imitation of stucco.

The style of this decoration is of the classic Venetian school of the sixteenth century, of which it is a magnificent illustration. The ceiling, as a whole, presents a scene of gorgeous beauty, which is only intensified by an examination of the various groups and figures in detail. The coloring is of a florid tone, the harmony of which is preserved in the minutest particular, the contrasts and shades being so arranged as not in any instance to attract the eye from the general effect.

The artists were Messrs. Becker & Sciepevich, fresco and decorative painters of St. Louis.

The building fronting on Third Street is entirely devoted to banks and offices, and has a basement and five stories. The first story contains six rooms of ample dimensions, arranged with fire- and burglar-proof safes and every accommodation for first-class moneyed institutions. The upper four stories are divided into sixty commodious and well-lighted offices, furnished like the first with fire-proof safes and every modern convenience. The basement contains a number of large rooms suitable for brokers' or exchange offices and various other kinds of business.

The first story of that portion of the structure under the ground hall is devoted to banks, offices, or any business purpose for which it may be required.

A noticeable feature of the interior consists of six immense doors opening into the grand hall, each one nine feet wide and eighteen feet high. They fold back into the thickness of the wall so as to afford no obstruction when opened, and are composed of dark hard wood of several hues, paneled, moulded, enriched, and highly polished. They are finished with bold architraves, entablatures, and pediments.

The grand staircase, which cost twenty-five thousand dollars, leads from the basement to the grand hall, and is accessible from every face of the building. It is of imposing proportions, and is composed of hard woods, and the newels and balusters are massive, and of elegant designs of carving, moulding, and paneling. Some idea of its dimensions may be obtained from the fact that it occupies an area of twenty-seven by sixty-one feet.

There are six broad entrances to the building,—three on Third Street, one on Pine, one on Chestnut, and one on the court west of the structure. The principal or central entrance on Third Street is very beautiful and strictly classical, of the Doric order. The frieze of the portico bears the name and purpose of the building in raised letters carved from the stone. The stairway from this entrance leads directly to the grand hall. The other entrance on Third Street, as well as those on Pine and Chest-

nut, communicate with the main stairway, and also with the steam elevators, which extend through the entire height of the building, giving easy and ready access to every part of the building.

During the National Democratic Convention which nominated Samuel J. Tilden for President there were five thousand two hundred chairs on the floor of the hall, and at the formal opening of the hall it contained over ten thousand people. In the centre of the hall, and directly in front of the rostrum, stands a large handsome fountain, throwing out jets of water in all directions, adding not only to the beauty of the surroundings but also to the comfort of all present, particularly on hot summer days. This was the gift of John A. Scudder, an ex-president of the Exchange and one of its most enterprising members. The fountain is on rollers, and can be moved in and out of the hall with very little trouble. The architects of the building were Lee & Annan.

The officers of the Chamber of Commerce from its formation up to 1862 were:

1836 to 1840.—Edward Tracy, president; Henry Von Phul, vice-president; John Ford, secretary.

1841 to October, 1849.—Wayman Crow, president; George K. McGunnege, vice-president.

1836 to 1849.—John Ford, Daniel Hough, and F. L. Ridgely, secretaries.

From October to December, 1849.—George K. McGunnege, president; Edward Briggs, vice-president; Edward Barry, secretary.

1850.—George K. McGunnege, president; Edward Brooks, vice-president; Edward Barry, secretary.

1851, to March 4.—George K. McGunnege, president; Edward Brooks, vice-president.

1851, from March 4.—William M. Morrison, president; Alfred Vinton and David Tatum, vice-presidents; Edward Barry, secretary.

1852.—William M. Morrison, president; Alfred Vinton and Henry Von Phul, vice-presidents; Edward Barry, secretary.

1853.—Alfred Vinton, president; James E. Yeatman and Henry Von Phul, vice-presidents; Edward Barry, secretary.

1854.—Alfred Vinton, president; R. M. Henning and Henry Von Phul, vice-presidents; Edward Barry, secretary.

1855.—R. M. Henning, president; Rufus J. Lackland and Henry T. Blow, vice-presidents; Edward Barry, secretary.

1856, to May 31.—R. M. Henning, president; J. A. Brownlee and William T. Hazard, vice-presidents; W. B. Baker, secretary.

From June 9, 1856, and 1857.—Henry Ames, president; D. A. January and John J. Roe, vice-presidents; W. B. Baker, secretary.

1858.—E. M. Ryland, president; R. M. Funkhouser and T. A. Buckland, vice-presidents; W. B. Baker, secretary.

1859.—R. M. Funkhouser, president; John T. Douglass and Charles L. Tucker, vice-presidents; W. B. Baker, secretary.

1860.—D. A. January, president; M. L. Pottle and J. H. Oglesby, vice-presidents; W. B. Baker, secretary.

1861.—D. A. January, president; William Matthews and M. L. Pottle, vice-presidents; W. B. Baker, secretary.

1862.—William Matthews, president; James Mackoy and George Bayha, vice-presidents; R. H. Davis, secretary.

In 1862 the organization went out of existence, but, as we have seen, the Chamber of Commerce Association was formed in the autumn of 1871, and Rufus J. Lackland was elected president and still continues to serve as such. At the time of the completion of the building the officers were Rufus J. Lackland, president; George Knapp, first vice-president, and B. W. Alexander, second vice-president, who with Web M. Samuel, George Bain, Charles Green, D. P. Rowland, J. H. Britton, J. R. Lionberger, J. H. Beach, Adolphus Meier, Charles L. Hunt, and Levi L. Ashbrook were the directors. George H. Morgan was secretary and treasurer.

The present board of directors is composed of the same persons, with the exception of J. H. Britton (deceased). The officers of the Merchants' Exchange (which succeeded the old Chamber of Commerce organization in 1862) have been,—

Year.	President.	Vice-Presidents.	No. of Members.

Secretary and Treasurer, 1862, Clinton B. Fisk; 1863-64, J. H. Alexander; 1865-83, George H. Morgan.

Officers for the Year 1883.—President, J. C. Ewald; Vice-Presidents, D. R. Francis, D. P. Grier; Directors: 1883, Michael McEnnis, J. C. MacGinnitie, Charles W. Barstow, John P. Keiser, Charles S. Freeborn; 1883-84, Charles E. Slayback, D. P. Slattery, A. O. Grubb, L. C. A. Koenig, Ewing Hill; Secretary and Treasurer, George H. Morgan; Assistants, D. R. Whitmore, Lovell W. Stebbins; Caller, Joseph P. Carr; Assistant Caller, John D. Bell; Committee of Appeals, Stephen G. Price, J. D. Houseman, Jr., L. Methudy, Hugh Ferguson, Breedlove Smith, H. G. Bohn, D. L. Wing, E. F. Hoppe, John H. Evil, William Stobie, H. B. Eggers, Charles L. Thompson; Committee of Arbitration: First six months, Henry S. Platt, R. H. Allen, Jr., A. Weyl, D. H. Bartlett, Delos R. Haynes; Second six months, James M. Carpenter, F. W. Rockwell, A. F. Donk, C. Bernet, Joseph Lloyd; Door-Keeper, James P. Newell; Registry Clerk, Frank L. Stobie; Telegraph Clerk, Frederick L. Stobie; Messenger, Edward M. Pottle.

The merchants of St. Louis, and in fact the community generally, have just reason to be proud of their Exchange, which is universally recognized as being one of the most honorable and influential bodies in the country. It is not exaggeration to say that it is felt in the commerce of nearly every important

nation on the globe, commanding as it does the trade of the far-famed valley of the Mississippi, with its vast stores of produce and its busy hives of industry and thrift. Among its members have been not only many of the representative business men of St. Louis, but individuals who have been and now are conspicuous in national affairs. In its organization the Exchange is comprehensive and essentially democratic, its doors being open to the members of all honorable trades, professions, businesses, or callings. Among them are commission merchants, insurance men, millers, dealers in feed, grocers, flour dealers, produce merchants, brewers, teamsters, provision merchants, pork-packers, cotton buyers, fast freight transportation men, real estate men, manufacturers of paints, oils, and white lead, brokers, hide and wool merchants, maltsters, coal dealers, builders, blacksmiths, civil engineers, confectioners, coopers, cracker manufacturers, distillers, cider and vinegar manufacturers, druggists, farmers, foundrymen, hatters, hotel-keepers, ice dealers, iron manufacturers, lawyers, livery-stable keepers, lumbermen, manufacturers of macaroni, paper dealers, painters, printers, railroad men, rope manufacturers, salt dealers, manufacturers of soap and candles, street sprinklers, stove dealers, stockmen, tanners, tobacco dealers, wire manufacturers, undertakers, in short, the Exchange is thoroughly representative of the commercial and industrial activity of St. Louis, and embraces the great bulk of those who contribute most to the wealth and prosperity of the community at large. It has always maintained a high and rigid standard of commercial ethics, and has contributed immensely to secure for the business men of St. Louis that reputation for strictly honorable dealing which they enjoy throughout the commercial world.

The Cotton Exchange.—The first meeting of the organization now known as the St. Louis Cotton Exchange was held in the directors' room of the old Merchants' Exchange building, on Main Street, on Oct. 17, 1873. The officers of the Cotton Association (for so it was then called) were Theodore G. Meier, president; William M. Senter, vice-president; Myron Colony, secretary; and Messrs. William P. Shyrook, Henry Drucker, Miles Sells, S. A. Bemis, Harlow J. Phelps, D. W. Marmaduke, and John T. Watson, members of the directory. There had previously been held an informal gathering at the office of Theodore G. Meier, at which were present the gentlemen named above, together with Messrs. Ladd and Rowland. The association so established and subsequently incorporated (in August, 1874) comprised eighty-one members, who paid five dollars initiation fee each, and were assessed twenty dollars each for annual dues. At the

first formal meeting the question of a suitable location was discussed, and it was

"Ordered, That the room fronting on Main Street, third floor of building joining the Merchants' Exchange building, be rented for the use of this association at a rate of not more than twenty-five dollars per month."

At a subsequent meeting the president was authorized to procure "a telegraphic machine" for the "rooms," by which appellation the single apartment was officially dignified. Cotton warehousemen were made to feel the power of the association by being notified that "weighers *must* plainly state the condition of cotton upon their certificates, and the gross weight, tare, and net of the same."

At the fifth regular meeting was conceived the plan of offering large cash premiums on cotton at the approaching St. Louis Fair (1874), and it was "resolved that not less than ten thousand dollars be offered as premiums on cotton next fall." The Fair Association met this tender in a reciprocally liberal spirit, and the cotton men increased the sum to eleven thousand dollars. This relation existed up to 1881, and the premiums annually offered were an important factor in building up the cotton interest in St. Louis. On the ratifica-

tion of the articles of incorporation the Association changed its name to the Cotton Exchange, by which it is now known, raised its dues and initiation fee to fifty dollars each, and elected the following officers on Sept. 16, 1874: Theo. G. Meier, president; William M. Senter, vice-president; Myron Coloney, secretary; and Messrs. William P. Shyrock, Henry Drucker, Miles Sells, S. A. Bemis, Harlon J. Phelps, John T. Watson, and L. C. Norvell, directors.

In 1875 the Exchange removed to new quarters on Main and Chestnut Streets, where its membership increased to three hundred in 1880, although during the five years preceding the membership fee had been

successively advanced to two hundred and fifty dollars, then five hundred dollars, and finally to the present figure, one thousand dollars, the annual dues remaining, however, at fifty dollars. At the first regular meeting of the directory of 1875 the present secretary, C. W. Simmons, was chosen, and he bids fair to serve efficiently many more terms. The presidency since that period has been occupied successively by William M. Senter, W. P. Shyrock, M. C. Humphrey, J. H. Dowell (who died during his term, Mr. Senter filling the unexpired portion), D. P. Rowland, and James L. Sloss.

The present officers are William M. Senter, president; William L. Black, vice-president; C. W. Simmons, secretary and treasurer; Henry W. Young, assistant secretary; Directors, William M. Senter, Wm. L. Black, James L. Sloss, J. B. Fisher, Theo. G. Meier, D. P. Rowland, W. V. Johnson, M. C. Humphrey, and T. H. West.

The new Exchange building was erected by the Cotton Exchange Building Company, composed of Vice-President William L. Black, Silas B. Jones, William T. Wilkins, and Leonard Mathews. Its erection was necessitated by the marvelous growth of the cotton interest and the inadequacy of the old quarters to the demands

of the trade, and was determined on at a meeting of the directors of the Exchange in the month of November, 1879, at which D. P. Rowland, W. M. Senter, J. L. Sloss, and W. L. Black were appointed a committee to select a suitable location. The site chosen, southwest corner of Main and Walnut Streets, though "down town," has the desired advantage of being near the river, the base of cotton supplies, and is also the centre of the district almost exclusively occupied by cotton factors and others in the trade. The building, which was designed by H. W. Kirchner, architect, is five stories in height (eighty feet in all), and fronts eighty-five feet on Main

UNIVERSITY OF ILLINOIS

and one hundred and thirty-five on Walnut Street. There is ample accommodation for offices. The Exchange hall proper, seventy-six by fifty feet, is on the second floor, and is reached by a beautiful and capacious corridor and staircase. Architecturally, the building, designed after the *renaissance* school, is of stock brick, trimmed with stone and galvanized iron, the first story being of iron. The value of the ground and structure is about one hundred and twenty-five thousand dollars. Its construction occupied a year. The grand hall is a model in its natural wood finish, the elegance of its furnishing, and in the good taste displayed in the fresco decorations. The latter comprise scenes from life in the cotton-picking season, and panels with representations of an overflowing basket of the fleecy staple, a ship loaded with cotton, and a Mississippi River steamboat "baled" all over. The painting on twenty piers is emblematic of the manufactured cotton in its several stages, and on the west wall is an arrangement of State seals, those of Missouri, Tennessee, Arkansas, Texas, and Mississippi. The building is supplied with reading-rooms, electric clocks, bells, elevators, telegraph-offices, telephones, and other modern conveniences and business necessities. Upon the occasion of the dedication of the new building, May 4, 1882, speeches were made by present and past officers, and by ex-Governor Hubbard, of Texas, ex-Governor Stanard, of Missouri, and others. A silver service was presented to Vice-President Black, a collation was served, and a promenade concert was given in the evening.

William Marshall Senter, the able and energetic president of the Cotton Exchange, was born at Lexington, Tenn., April 11, 1831, the son of a prosperous farmer in that section. His mother was a native of North Carolina, and was of Scotch lineage. Up to the age of about eighteen young Senter assisted his father on the farm, and obtained a good common school education. He then engaged as a clerk in the dry-goods business at Trenton, Tenn., and after a suitable apprenticeship went into business for himself at that place. While residing in Trenton he married his present wife, Lucy Jane Wilkins. In 1863 he removed to Columbus, Ky., and remained in business there about a year. His success at both places caused him to seek a larger field for his operations, and in 1864 he removed to St. Louis, where he established himself as a commission merchant. His attention was soon directed to the cotton trade of St. Louis. Owing to the war the city was then handling considerable cotton, and Mr. Senter became impressed with the idea that this traffic could be retained. The receipt of fifty-six thousand bales in 1865-66 seemed

to justify this confidence, but in the years immediately following only an average of some twenty-eight thousand bales were handled. Nevertheless, Mr. Senter, who had become thoroughly identified with the cotton trade, maintained the correctness of his belief, and labored incessantly through years of discouragement to make his prediction good. He was an influential member of the Cotton Association, which was organized in 1870, and when, as we have seen, the present Cotton Exchange was established in 1873, he was the first vice-president, and is now in his third term as president.

As a result of the labors of Mr. Senter and others the cotton trade of St. Louis began ultimately to assume a shape that promised permanent success. In 1870-71 the receipts were only twenty thousand two hundred and seventy bales, but in 1871-72 no less than thirty-six thousand four hundred and twenty-one bales were handled in St. Louis. The completion of the Iron Mountain Railroad into the rich cotton-fields of Arkansas and Texas gave the trade a great stimulus; and when in 1873, Col. Paramore settled in St. Louis and laid before the cotton merchants his scheme for a gigantic cotton compress that should afford proper facilities for handling cotton on a large scale and with the utmost economy, in order to attract and provide for the growing trade of the Southwest, he found a willing co-laborer in Mr. Senter. The result of their joint efforts was the organization of the St. Louis Cotton Compress Company, which now has a paid-up capital of one million dollars, and manages the largest cotton compress and warehouse in the world. It is a fine monument to the wise forethought and liberal commercial spirit of its projectors. When Col. Paramore retired from the presidency of this corporation in 1881, Mr. Senter, who had been vice-president and one of the directors from the organization, succeeded to the vacancy.

When the Iron Mountain Railroad was about to pass out of Thomas Allen's hands into those of persons having no special interest in St. Louis, Mr. Senter was one of those who at once responded and took stock, to keep the control of the road at St. Louis. He also became a director of the road, and took an active part in the management, a connection which lasted until Jay Gould finally purchased the property.

Mr. Senter has also been an earnest and efficient promoter of Col. Paramore's Texas and St. Louis Railway (the "Cotton Belt Line"), and is the vice-president of the organization.

When the new Cotton Exchange was being erected, the builder became embarrassed and was unable to go

on with the work, whereupon Mr. Senter stepped to the front and organized a building company and tided the enterprise over the difficulty.

When St. Louis took her place as one of the assured cotton marts of the country, many American and foreign buyers with large capital made the city their headquarters, but the veteran house of Senter & Co. led them all, and has retained its acknowledged supremacy, having handled of late years over sixty thousand bales annually, representing a value of over five million dollars. Associated in the house of Senter & Co. is Mr. Senter's brother-in-law, W. T. Wilkins, who brought to the concern rare energy and ability.

As a business man of ripe judgment, Mr. Senter is in great request, but outside of the cotton interests his business connections are few. He has, however, been vice-president of the Merchants' Exchange, and is a director in the American Central Fire Insurance Company of St. Louis.

Personally, Mr. Senter is one of the most modest and unassuming of men, but in action he is energetic and intrepid. He is a member of the Baptist Church, and strives to leaven his business with his religious principles. The result is that no house in St. Louis enjoys a higher reputation as an honest, capable, and sound establishment.

Mr. Senter has had four children, three of whom are now living. One, a daughter, is the wife of A. B. Jones, a well-known lawyer of St. Louis.

The **St. Louis Board of Trade** was organized in the autumn of 1867, and its formal inauguration took place at the Polytechnic building on the evening of October 17th of that year, the address on that occasion being delivered by Hon. Henry T. Blow. The board held a meeting at the same place on the 1st of November, 1867, which was called to order by the president, Adolphus Meier, who laid before it the report of Messrs. Wayman Crow, Henry T. Blow, and Isidor Busch, "a special committee appointed to consider and report upon a communication from the Birmingham, England, Chamber of Commerce, recommending the adoption of an international law." The Board of Trade has continued in active and successful operation since then down to this writing, its officers (1882) being C. I. Filley, president; Joseph A. Wherry, first vice-president; C. L. Thompson, secretary and treasurer; E. C. Simmons, Joseph O'Neil, E. K. Holton, J. E. Shorb, John Cantwell, E. A. Hitchcock, N. C. Chapman, I. M. Mason, and S. H. Lafin, directors.

Mechanics' Exchange.—In 1839 the leading mechanics of the city, in order that there might be unity

in their efforts, and that co-operation might be secured among them, called a meeting for the purpose of forming a Mechanics' Exchange. At this meeting Capt. David H. Hill presided, and Louis Dubreuil was appointed secretary. Five persons were chosen to select a committee from the different departments of business, one to be selected from each branch, to draft a constitution, by-laws, etc. The five gentlemen thus chosen were R. N. Moore, J. M. Paulding, Asa Wilgus, William A. Lynch, and John H. Ferguson, who after consultation submitted the following names: Joseph C. Laveille, carpenter; Daniel D. Page, baker; Asa Wilgus, painter; Isaac Chadwick, plasterer; Samuel Gaty, founder; Thomas Andrews, copper-smith; George Trask, cabinet-maker; John M. Paulding, hatter; James Barry, Chandler; James Love, blacksmith; Joseph Laiden, chair-maker; Wooster Goodyear, cordwainer; William Shipp, silversmith; John Young, saddler; B. Townsend, wire and sieve manufacturer; J. Todd, burr millstone manufacturer; Thomas Gambal, cooper; Francis Raborg, tanner; S. C. Coleman, turner; N. Paschall, printer; John G. Shelton, tailor; B. L. Turnbull, bookbinder; Charles Coates, stone-cutter; Anthony Bennett, stone-mason; David Shepard, bricklayer; I. A. Letcher, brick-maker; William Thomas, ship-builder; Samuel Hawkins, gunsmith; Samuel Shawk, locksmith; A. Oakford, comb-maker; N. Tiernan, wheelwright; J. B. Gerard, carriage-maker; Moses Stout, plane-maker; James Robinson, upholsterer; and J. Bemis, machinist. From this meeting resulted the organization of the mechanics, and ultimately the formation of a Mechanics' Exchange.¹

In 1852 a new Exchange was organized, a meeting for that purpose being held at the Criminal Court room on the 23d of February. At this meeting Col. Thornton Grimsley was called to the chair, and Rufus Kayser was appointed secretary, after which Mr. Goodin, chairman of a committee appointed at a previous meeting, reported as follows:

"Your committee, appointed at a primary meeting of the master-mechanics of St. Louis, held on Thursday evening, the 12th instant, to prepare a plan of organization, would report recommendatory, as follows:

1st. That we proceed at once to an organization, under the name and style of the Mechanics' and Manufacturers' Exchange and Library Association of St. Louis, by the election of the following officers: president, vice-president, corresponding secretary, recording secretary, treasurer, and a board of seven directors, the president of the association to be *ex officio* chairman of the board of directors.

2d. That any mechanic or manufacturer residing in the county of St. Louis shall, upon the payment of ten dollars, the amount

¹ Edwards' Great West, p. 365.

of annual subscription, be entitled to the full privileges of membership for one year.

"3d. That the board of directors, as soon as elected, shall be instructed to report to the association for the government of the same a constitution and by-laws.

"THORNTON GRIMSLEY,

"CHARLES H. PECK,

"P. WONDERLY,

"J. C. EDGAR,

"R. KEYSER,

"JOHN GOODIN,

"Committee."

The report was unanimously adopted, and the following resolutions were afterwards offered and adopted:

"Resolved, That at the first meeting of the subscribers to the association it be made the special order of business to elect the following: president, vice-president, corresponding secretary, recording secretary, treasurer, and a board of seven directors.

"Resolved, That a committee of three be appointed in each ward of the city to obtain subscriptions of members."

The following committees were afterwards appointed, in accordance with the resolution: First Ward, J. Dunn, F. Saler, L. W. Peck; Second Ward, Richard Ivers, Morris Pawley, S. E. Selleck; Third Ward, J. P. Camp, C. H. Peck, James Luthey; Fourth Ward, Rufus Keyser, Frank Weston, Mahlon Weber; Fifth Ward, J. C. Edgar, W. F. Stacy, P. Kingsland; Sixth Ward, J. C. Cochran, Linus Jackson, Archibald Carr.

The present Mechanics' Exchange was organized in 1856 by A. Ittner, Thomas Rich, A. Cook, W. Stamps, James Garvin, C. Lynch, J. Locke, James Luthy, and others. The first president (elected in 1856) was N. M. Ludlow. In 1857-58 the rooms of the association, which was then known as the Mechanics' and Manufacturers' Exchange, were located at No. 63 Chestnut Street, between Third and Fourth Streets. The objects of the association, as stated at the time, were "the encouragement, development, and promotion of the mechanical and manufacturing interests of the city, and the arbitration of all errors and misunderstandings between its members and those of the community having business with them." The rooms were kept open on business days from seven o'clock A.M. until six o'clock P.M., the general assembling hour being from eleven to twelve o'clock. Each member was entitled to a "communication box," the use of the reading-room, library, stationery, etc., without extra charge. The terms of membership were ten dollars per annum, payable half-yearly in advance.

The officers in 1858 were W. Stamps, president; N. M. Ludlow, first vice-president; E. N. Leeds, second vice-president; R. M. Parks, treasurer; Henry Weissenfels, secretary. Committee of Arbitration,

John Andrews, William Barron, Philip Wilson, James L. Gage, P. Gregory, John B. Gibson, P. Harvey, Andrew Middleton; Committee of Appeal, Charles H. Peck, Samuel Robbins, W. F. Cozzens, John Evill, W. G. Clark, L. D. Baker, W. H. Markham.

The avocations of the members at this time were: architects, superintendents, and builders, 110; hatters and fur dealers, 4; bricklayers, 60; wire manufacturers, 1; boot and shoe dealers, 3; paper-hanging establishments, 2; stationers and booksellers, 3; carriage- and wagon-makers, 5; stone-masons, 9; lumber dealers, 13; stone-cutters, 8; tin and stove dealers, 9; hardware dealers, 3; wood-turners, 2; galvanized iron-work, 7; saw-milling, 15; stone-pavers, 4; varnish manufacturers, 1; terra-cotta work, 9; painters, 8; lime-burners, 6; cement dealers, 2; gas-fitters, 5; plumbers, 10; planing-mills, 5; mastic work, 2; wrought- and cast-iron-work, 17; brick-makers, 20; plasterers, 11; marble dealers, 8; composition-, metal-, and slate-roofers, 14; sundry other kinds of business, 24; total, 401.

Persons, not members, residing in or out of the city, who desired to exhibit models, works of art, etc., had the privilege of using the large hall for that purpose, if acceded to by the secretary or any other officer of the institution.

The present Exchange was chartered in 1875, with an authorized capital stock of two thousand five hundred dollars.

On the 12th of February, 1879, the Exchange entered upon the occupation of its new quarters, comprehending the entire fifth floor of the then recently completed Hunt building, No. 106 North Fourth Street, which had been leased to the organization by Mr. Hunt. The president of the Exchange, W. W. Polk, and the vice-presidents, Thomas F. Hayden and Francis Hawkins, welcomed the members.

At the present time the membership numbers several hundred. The present board of officers is composed of Anthony Ittner, president; T. P. McKelleget, first vice-president; W. J. Thorn, second vice-president; William Stamps, treasurer; and W. R. Dalton, secretary. Directors, J. Green, P. Mulcahy, H. Gundaker, J. Methudy, M. Hudson, and W. Adams.

Among the most active and energetic members of the Mechanics' Exchange was Joseph K. Bent, on the occasion of whose death the Exchange adopted resolutions expressive of regret at the loss of an esteemed member, a valued friend, and one of the foremost builders of the city. Mr. Bent was born in Wendell, Mass., Nov. 16, 1816. His

parents were descended from the old settlers of Massachusetts, and the family was widely and favorably known. His uncle, Joseph Kilbourn, was a wealthy cotton broker in Augusta, Ga., and one of his two brothers was a prosperous cotton broker in New Orleans. Joseph K. received a good common-school education, and then learned the trade of a carpenter and builder. His parents went West in the "'30's" for their health, and settled at Liberty, Clay Co., Mo., where, July 3, 1839, Mr. Bent was married to Miss Sabrina Phelps, daughter of William W. Phelps, a well-known and influential gentleman of that region, and a descendant of the famous Phelps family of Western New York, after whom the village of Phelpstown was named. At Liberty, Mr. Bent attempted to practice the profession of an architect, but the field being very limited, he removed to St. Louis, Oct. 25, 1839, and was soon actively engaged in building. During the forty years that followed he transacted a large and flourishing business as contractor. Up to the year 1868 he conducted the business alone, but in that year he admitted his son, William E. Bent, as a partner, the firm-name being Joseph K. Bent & Son. Mr. Bent's name is indelibly associated with some of the largest and most costly buildings erected in St. Louis. He did the carpenter-work for the new Merchants' Exchange, the immense Barr building at Sixth and Olive Streets, and the First Presbyterian Church on Lucas Place, and had the entire contract for building the Third National Bank, and many large stores on Fourth and Fifth Streets, in the business portion of the town, as well as numerous handsome and costly private residences in various parts of the city. In his day he was one of the largest, as well as one of the best, builders St. Louis possessed. In addition to his building enterprises he for several years managed a planing-mill, manufacturing work for his own buildings as well as for others.

Mr. Bent died on the 21st of March, 1880, leaving a comfortable estate to his widow and children. He was a faithful member of the First Presbyterian Church, and bore his last illness with Christian fortitude. He was a member of no secret or other society except the Mechanics' Exchange, in which he took a deep interest. He was thoroughly devoted to his profession, and in the management of his large and exacting business made numerous friends, being eminently of a social nature. He was a man of unusual decision of character, and enjoyed the implicit confidence and respect of all who knew him.

The **St. Louis Real Estate Exchange** is located at 212 North Sixth Street, and its officers (1882) are

Charles Green, president; M. A. Wolff, vice-president; Leon L. Hall, secretary and treasurer; Charles Green, Theophile Papin, J. S. Farrar, F. L. Haydel, J. L. January, William C. Wilson, and John Maguire, directors.

St. Louis Mining and Stock Exchange.—In 1874 the St. Louis Mining Exchange was established at the southeast corner of Fourth and Elm Streets, by M. S. Mephram & Co., as a headquarters for persons engaged in mining or the sale of mineral lands. A large number of persons interested in minerals rented offices in the building, all being located at convenient distances apart on the first floor, and separated from each other by neat railings. Cases were fitted up for the display of Missouri minerals, and a complete and handsome collection was secured, together with specimens of fossils, Indian curiosities, and relics of the civil war, the latter presented by Gen. John B. Gray.

The St. Louis Mining and Stock Exchange was organized in the fall of 1880, and held its first meeting at its rooms on Third Street, between Olive and Locust, Dec. 2, 1880, on which occasion the Exchange was formally opened for business at eleven o'clock. The officers at the time were: President, James Baker; Vice-President, Thomas Richeson; Treasurer, Francis T. Iglehart; Secretary, Theodore W. Heman; Directors, G. W. Chadbourne, Charles F. Orthwein, Francis T. Iglehart, J. W. Paramore, John W. Noble, D. P. Rowland, Thomas Richeson, E. S. Chester, T. W. Beman, W. R. Allen, D. R. Francis, James Baker, John E. Ennis.

The **St. Louis Coal Exchange** was organized June 1, 1879, for the purpose of developing the coal trade of the city, and for the mutual protection of dealers and shippers of coal.

The officers of the Exchange are Alexander Hamilton, president; C. E. Gartside, treasurer; and William Lackman, secretary. The Exchange is located at No. 108 North Fourth Street.

Boatmen's Exchange.—In 1868, Charles P. Chouteau erected a handsome building on the Levee at the corner of Vine Street, for the purposes of a Boatmen's Exchange. The building presented quite a striking appearance, having a front of about sixty feet and a height of ninety feet. The material used in its erection was principally brick, but the front was of Chicago stone from the Lemont quarries. The rear faced on Commercial Street, and had also a handsome exterior. The style of architecture was Italian. The architects were Messrs. Barnard & Piquenard. The cost of the building was about eighty thousand dollars.

St. Louis Furniture Exchange.—In October,

Joseph K. Bent

LIBRARY
OF THE
UNIVERSITY OF WISCONSIN

1879, there was quite a formidable strike among the furniture-workers of the city, and at the suggestion of George A. Rubelmann, a prominent dealer in cabinet hardware, a meeting of the furniture manufacturers was held, at which the desirability of union in the existing emergency was conceded and the organization of a Furniture Exchange determined. On the 26th of October, 1879, the following officers were elected: President, Daniel Aude; Vice-President, D. S. Horne; Treasurer, J. H. Koppelman.

The strike soon collapsed, but the organization continued, and now embraces about fifty of the leading manufacturers of the city. The Exchange meets at Sixth and Morgan Streets, where it has convenient rooms and supports a monthly paper, *The St. Louis Furniture Manufacturer*. The present officers of the Furniture Exchange are: President, Charles Spier; Vice-President, Frank Prange; Secretary, F. Hanpeter; Treasurer, J. H. Koppelman.

The **St. Louis Manufacturers' Association** was organized on the 27th of March, 1874. The meeting for the purpose, which was held in the directors' room of the Merchants' Exchange, was called to order by Adolphus Meier, who announced that it was an adjourned meeting, G. B. Allen having been chairman of the previous meeting. At this meeting Mr. Allen had been appointed to draft a constitution, by-laws, and rules of order for the prospective association.

Mr. Allen read the document prepared by him, which, on motion of Giles F. Filley, was adopted as a whole.

The election of officers was then proceeded with by ballot, Gerard B. Allen being elected president, and Thomas Richeson vice-president.

The constitution provided that the secretary and treasurer, which offices should be united in one person, should be appointed by the executive committee, which should be appointed by the president.

The **Bureau of Labor Statistics** was instituted under an act of the General Assembly of Missouri in March, 1879. The second section of the act establishing the bureau defines its objects. It is "to collect, assort, systematize, and present in annual reports statistical details relating to all departments of labor in the State, especially in relation to the commercial, industrial, social, educational, and sanitary condition of the laboring classes, and to the permanent prosperity of the productive industries of the State." The general offices are located in St. Louis. The expense of the bureau up to Dec. 31, 1880, was one thousand four hundred and forty-six dollars and thirty cents. H. J. Spaunhorst is the commissioner.

The **Missouri State Board of Immigration** was

created by an act of the Legislature of Missouri in March, 1879, its object being to advertise the resources of the State and invite immigration. The officers appointed when the board was created were Andrew McKinley, of St. Louis, president; A. Steinaecker, of St. Joseph, auditor; and John M. Richardson, of Carthage, Mo., secretary. The commissioners were to serve for a term of four years. An appropriation was made by the State for the first two years of eight thousand dollars, and for the next two years of twenty thousand dollars. The board has issued several papers relating to the agricultural, mining, and manufacturing capabilities of the State, sixty thousand copies of the "Hand-Book of Missouri," and fifty thousand copies of a smaller pamphlet and map, which have been distributed in other States and in Europe. The board has conducted in the past and continues to conduct an extensive correspondence with intending immigrants and capitalists. The invitation extended to immigrants does not come from great land proprietors and speculators, with specious and exaggerated statements, to induce them to take their property at fancy prices, but from the whole people, through their representatives in the Legislature of the State. They are invited because it is believed that the undeveloped resources, once understood and put in process of development, will enhance the value of every property in the State; because every acre put under cultivation, every mine opened and worked, every mill and factory built, and every new industrial enterprise started will benefit the already existing industries, create new markets, and increase the commerce and material wealth of Missouri.

CHAPTER XXXII.

BANKS, AND OTHER FINANCIAL INSTITUTIONS, AND BANKERS.

WHEN the white settlers first occupied the site of St. Louis, the currency in use among the Indians was mainly wampum, or peag, or wampumpeag, as it was variously called. It consisted of dark purple and white beads, made out of shells or stone, and pierced for stringing. The purple beads had twice the value of the white, and when arranged in strings or belts were used as articles of jewelry. As currency, wampum was used in strings and valued according to measure, a fathom, or belt, consisting of three hundred and sixty beads. At an early period the settlers, in trading with the Indians for furs and peltries, some-

times used wampum, but as it was liable to deterioration by wear and use, and became overabundant, besides not being of a character to satisfy foreign debts, it soon ceased to be current and was abolished as a nuisance.

When the early settlers received gold and silver, they hoarded it up to pay for foreign commodities, and to supply its place for making "change" began to use a "barter currency."¹ Beaver-, otter-, raccoon-, pechon-, muskrat-, mink-, gray-squirrel, buffalo-, and deer-skins, beef-hides, bacon, beeswax, country-made sugar, whiskey, and lead constituted the first currency of St. Louis.²

¹ Writing on this subject, Mr. Billon says, "The French word *livre* signifies in English a book, a pound-weight, and down to the date of the French Constitution of 1792 was the name of a coin of the value of eighteen and one-half cents of our currency, which for long centuries back, under the ancient monarchy of France, was established as the unit of that nation, in which all their money calculations were figured up and their account-books kept.

"The French Revolutionists, in their zeal to do away with everything that savored in the slightest of the *ancien régime*, abolished the *livre* and substituted therefor their new coin, the *franc*, which they made one mill, or the one-tenth of a cent, heavier than the *livre*, otherwise it would have been merely the same old thing with a new name, since which day the word *livre*, as applied to a money coin, has become obsolete, and is known but to few of the present age. The par value of five *livres*, by act of Congress, was ninety-two and one-half cents, United States currency, and that of five *frances*, ninety-three cents.

"As this term *livre* occurs in every French document on record in the archives relating to money matters, the persons who were employed to translate these papers into English some years back, being doubtless ignorant that there ever had been a coin of that designation, have almost invariably translated it into 'pound,' thereby making the document translated meaningless in its most essential particular, the consideration.

"Let it be understood that the above remarks in relation to the *livre* apply solely to the mode of keeping their accounts, there being but little of any coin seen in the country, the circulating medium being furs and peltries at a fixed price per pound, —forty cents for finest, thirty for medium, and twenty cents inferior. Whether established by law or custom does not appear, but, unless otherwise stipulated by contract, all transactions were understood to be in the above medium. After the transfer to Spain the coin of that kingdom began to appear, but in very limited amounts, as we find a few transactions for 'hard dollars,' in contradistinction of the soft, or 'fur dollars.'

"As to paper money, none had ever been seen in the country at that early day, and even had there been any, but few could have made out the denomination.

"Even after the transfer to the United States transactions were made in peltries, as we find that Judge John B. C. Lucas made his first purchase of a house for his residence from Pierre Duchouquette and wife, Dec. 14, 1807, for six hundred dollars in peltries."

² The following advertisements, taken from the files of the old *Missouri Republican*, show that barter currency was very generally in use in St. Louis at a late period :

Jan. 4, 1809.—"Have just received and offer for sale an assortment of dry-goods, consisting of the following, viz.: Cont-

In many instances taxes were collected in kind, and fees were established in barter.

It was long before the tide of immigration brought to the people a small supply of silver coin. This

ings, flannels, blankets, velvets, cassimeres, linens, muslins, checks, sannas, baftas, gingham, cambrics, hose, handkerchiefs, threads, sewing-cotton, sewing-silk, buttons, shoes, hats, paper, blank-books, pins, needles, etc.

"Also a small assortment of groceries, viz.:

"Young Hyson and Hyson skin teas, best green coffee at sixty-two cents, loaf and lump sugar at fifty cents, Muscovado sugar at fifty cents, black pepper, Spanish segars per box, hundred, or dozen, indigo, etc., with a general assortment of queen's penciled and enameled ware.

"The above goods were purchased in New York for cash, and will be sold as low as any in the Territory for cash, or lead at six dollars per hundred, delivered at Ste. Genevieve or Herculaneum.

"Ste. Genevieve."

"H. AUSTIN & Co.

Jan. 11, 1809.—"Just received and opened at the store of Bernard Pratte a complete assortment of dry-goods, groceries, liquors, iron, and steel, which will be disposed of at a moderate advance either for cash or pork."

Oct. 19, 1809.—"The subscriber respectfully informs the citizens of Ste. Genevieve that he has just opened at the new store, opposite the billiard-room, a handsome and general assortment of hardware and groceries, which he will sell wholesale on the most advantageous terms for cash, lead, or approved notes.

"JOHN GORDON."

Dec. 21, 1809.—"I wish to purchase a quantity of beef-hides of a good quality. A generous price will be given in cash or goods from those indebted to the subscriber. Hides will be taken in payment.

"GEORGE DALE."

April 26, 1810.—"The subscriber has just opened a quantity of bleached country linen, cotton cloth, cotton- and wool-cards, iron, German steel, smoothing-irons, ladies' silk bonnets, artificial flowers, etc. Also a handsome new gig, with plated harness, cable and cordelle rope, with a number of articles that suit this country. He will take in payment fur, hides, whiskey, country-made sugar, bacon, and beeswax.

"JOHN ARTHUR."

"P.S.—A negro girl eighteen years of age, a good house-servant, for sale."

May 2, 1811.—"The copartnership of Audubon & Rozier is this day dissolved by mutual consent. Those indebted are requested to make immediate payment to Ferdinand Rozier, who is duly authorized to settle all the business of said firm.

"JOHN AUDUBON."

"FERDINAND ROZIER."

"The subscriber begs leave to inform his friends and the public that he has purchased that valuable stock of goods formerly owned by Audubon & Rozier, on such terms as to enable him to dispose of them by wholesale or retail unusually low for cash, or to punctual customers on short dates. The best market price will be given for lead in exchange for goods.

"FERDINAND ROZIER."

"Ste. Genevieve, April 6, 1811."

Jan. 4, 1812.—"Look here! The subscriber has removed to the house adjoining Mr. Dongan's silversmith-shop, on Main

was usually in the shape of Spanish milled dollars, and did not satisfy the demand for small change. For the purpose of making change the people cut the dollars into pieces worth twenty-five cents and twelve and a half cents each, which were nicknamed "sharp-shins." This class of currency soon became very redundant and, of course, very unpopular, and in time ceased to pass except at a great reduction, or as old silver. Smaller sums than twelve and a half cents were given out by store-keepers in pins, needles, writing-paper, etc.

In framing the Constitution (1789), the right to coin money and regulate its value was given to Congress, the States being prohibited from making anything but gold and silver coin a legal tender, with the avowed purpose of establishing a specie currency as the national standard of value. But the States each claimed the right to incorporate banks, and Pennsylvania had taken a leading step in this direction by chartering, in 1781, the Bank of North America. This was the first bank which issued convertible notes. On Sept. 2, 1789, the Treasury Department was established, and Alexander Hamilton was appointed secretary. He proposed the scheme of the first national bank of the United States, which was chartered by Congress in 1791. Its charter was for twenty years, and it issued no notes under ten dollars. Questions of coinage were taken up by Congress as early as 1781, but it was not until July 6, 1785, that the "dollar" was adopted. On Aug. 8, 1786, a mint law was passed, but after being modified Oct. 16, 1786, it was not approved until Sept. 2, 1792. Silver was first coined in 1794, and gold in 1795.

Banks at this time were political engines, and the charter of the Bank of the United States having expired, its renewal was refused, and it went into liquidation in 1811. A large number of State banks at once sprang up, and a wild inflation of paper money prepared the way for a sad condition of financial affairs. Immediately on the declaration of war with Great Britain in 1812, all the banks in the Middle and Southern States except New York suspended payment, and the New York banks had to succumb in 1814, amid the closing scenes of the war. The

New Orleans banks suspended in April, 1814, the banks of Philadelphia Aug. 30, 1814, and those of the Middle and Southern States within a fortnight later. Those of Ohio and Kentucky had specie until Jan. 1, 1815, and while a few in Maine ceased payment early in 1814, the banks in the rest of New England did not suspend at all.

Banks now multiplied faster than ever, and the old ones increased their issues. The notes required elaborate quotations, and brokers had a rich harvest in negotiating them. The war with Great Britain had very little effect upon St. Louis, but at its close immigration from the old States poured rapidly into the town. The new settlers brought more or less money and property with them, and introduced some changes in the customs and modes of living. About this period began that era of prosperity which has continued ever since, and which has been a conspicuous feature of the city's history. Enterprising traders took up their abode in the town and commenced successful business. The new buildings that were erected were more tasteful in appearance than the old; a new vitality appeared to quicken the sluggish channels of business, and an atmosphere of thrift and comfort was created. The money which the new inhabitants now brought in, and which had been paid by the United States to the militia during the war, and to the regulars stationed in or passing through the town, turned the heads of all the people, and gave them new ideas and aspirations, so that by 1819 the whole country was affected with a mania for speculating in lands and town lots.¹

St. Louis boasted in 1816 of having a business capital of nearly one million dollars, but complained that it did not enjoy the advantages of a bank, although the Territorial Legislature granted a charter for one as early as Aug. 21, 1813.² All the leading

¹ On the 9th of January, 1818, the following notice appeared: "St. Louis Exchange and Land Office. The undersigned having opened an office as broker for the Missouri and Illinois Territory, informs the public that he is now ready for the purchase and sale (on commission only) of houses and lands, United States stock, etc.

"S. R. WIGGINS."

² The *Missouri Gazette* of July 13, 1816, says,—

"The opulent town of St. Louis may boast of a capital of nearly one million, and has few manufactories, no respectable seminary, no place of worship for dissenters, no public edifices, no steam mill or boat, no bank, and (I was going to say) no effective police. Mr. Philipson has lately established an excellent brewery, where excellent beer and porter are made. Mr. Wilt erected a red and white lead manufactory, and threw into the market several tons of that useful article; his red lead has been admired as superior to that imported. Mr. Hunt's tanning establishment is of primary importance. Mr. Henderson's soap

Street, St. Louis. He has on hand a heap of whiskey, plenty of peach-brandy, linsey, country linen, shoes, cut and hammered nails, cotton and cotton cloth, bed-cords, etc., which he will sell low for cash or beef-hides, delivered at the store or at Squire Moorehead's slaughter-yard.

"FRED. YIEZER.

"N.B.—No credit may be expected, as the subscriber has (unfortunately) never learned to write."

citizens of the town felt that a bank was a necessity, and they made great efforts to establish one. They did not succeed, however, until September, 1816, when the Bank of St. Louis was first opened for business, as will be seen elsewhere.

The State banks in other sections of the Union had by this time flooded the country with their issues, and the result was a succession of speculations, revulsions, panics, and general depression in business. The year 1817 was considered "a period of gloom and agony; no money, either gold or silver; no paper convertible into specie; no measure or standard of value left remaining; no price for property or produce; no sales but those of the sheriff and the marshal." It was upon this troubled sea that the fortunes of the Bank of St. Louis were cast. It conducted its business after the prevailing fashion. Instead of restraining speculation, it joined in the race for wealth and flooded the country with its issues. As a consequence it ceased to exist within three years.

Shortly after the Bank of St. Louis began business the Bank of Missouri was organized, and incorporated Feb. 1, 1817. The commissioners appointed to receive subscriptions to its capital stock of two hundred and fifty thousand dollars were Charles Gratiot, William Smith, John McKnight, Jean B. Cabanné, and Matthew Kerr. The first president was Auguste Chouteau, and the first cashier Lilburn W. Boggs. The institution being a depository of the public moneys, it entered upon its career with the confidence of the public, but, like most banks of the day, it followed the course marked out by the Bank of St. Louis, and failed like its predecessor with great loss to many deserving and industrious citizens.

and candle manufactory would be of great utility if it only received that patronage the proprietor so richly merits.

"I have no doubt but that brickmakers and bricklayers, carpenters who could be satisfied with a moderate compensation for their labor, black- and whitesmiths, silversmiths, woolen- and cotton-carding and spinning-machines and managers, tobaccoists, nailers, gunsmiths, coopers, pump-makers, stocking-weavers, wagon-makers, stone-cutters, boat-, barge-, and ship-builders, rope-makers, cutlers and tool-makers, skin-dressers, and many other employments would do well here. A man of capital and enterprise would soon accumulate a large fortune by erecting a steam flour- and saw-mill in this place; wheat sells here at one dollar per bushel (abundance raised in the country), and good merchantable flour is sure to command from eight to ten dollars per barrel. Corn generally rates at from twenty-five to fifty cents, and will bring in meal from fifty to eighty-seven and one-half cents per bushel. Pine boards sell at four dollars, and oak and ash at two and three dollars per hundred feet. Saw-logs could be brought to town at one dollar each. Five thousand barrels of whiskey are annually received here from the Ohio, and sold at seventy-five cents per gallon, while thousands of bushels of grain are offered at a low price to any enterprising man who will commence a distillery."

Governor Ford, in his "History of Illinois," says emigrants brought money into the State at this period in great abundance. "The owners," he adds,

"had to use it some way, and as it could not be used in legitimate commerce in a State where the material for commerce did not exist, the most of it was used to build houses in towns which the limited business of the country did not require, and to purchase land which the labor of the country was not sufficient to cultivate. The United States government was then selling land at two dollars per acre, eighty dollars on the quarter-section to be paid down on the purchase, with a credit of five years for the residue. For nearly every sum of eighty dollars there was in the country a quarter-section of land was purchased, for in those days there was no specie circulation to restrain unwarrantable speculation; but, on the contrary, the notes of most of the numerous banks in existence were good in the public land offices. The amount of land thus purchased was increased by the general expectation that the rapid settlement of the country would enable the speculator to sell it for a high price before the expiration of the credit. This great abundance of money also, about this time, made a vast increase in the amount of merchandise brought into the State. When money is plenty every man's credit is good. The people dealt largely with the stores on credit, and drew upon a certain fortune in prospect for payment. Every one was to get rich out of the future emigrant. The speculator was to sell him houses and lands, and the farmer was to sell him everything he wanted to begin with and to live upon until he could supply himself. Towns were laid out all over the country, and lots were purchased by every one on credit; the town-maker received no money for his lots, but he received notes of hand, which he considered to be as good as cash; and he lived and embarked in other ventures as if they had been cash in truth. In this mode, by the year 1820, nearly the whole people were irrecoverably involved in debt. The banks in Ohio and Kentucky broke one after another, leaving the people of these States covered with indebtedness and without the means of extrication. The banks at home and in St. Louis (as we have seen) ceased business. The great tide of immigrants from abroad, which had been looked for by every one, failed to come. Real estate was unsalable; the lands purchased of the United States were unpaid for and likely to be forfeited. Bank notes had driven out specie, and when these notes became worthless there was no money of any description left in the country."¹

In 1822 there was a pressing scarcity of money; in 1825, 1826, 1827, and 1828 convulsions and bankruptcy among the banks. Kentucky, Tennessee, Illinois, and Missouri tried stay laws, tender laws, and paper issues in every form. Kentucky tested the experiment most thoroughly; the others desisted sooner. In 1829 and 1830 the gloom which had brooded so long over the country was dispelled and a brighter prospect was unfolded. For the first time for eight years the natural course of trade had brought a balance of specie of eight and a half millions of dollars into the country. In 1828, in the election of Gen. Jackson to the Presidency, the people began to evince hostility to every form of paper money, and in his first message to Congress President Jackson charged

¹ Page 43.

the United States Bank, which had been chartered in 1816, and which had established a branch in St. Louis with Col. John O'Fallon as president, with having "failed in the great end of establishing a uniform and sound currency." The friends of the bank defended it, and the leading political parties took sides, one for, the other against, the bank. The citizens of St. Louis who favored the bank gave expression to their feelings at a public meeting held in the town hall on the afternoon of July 24, 1832. Dr. William Carr Lane presided at the meeting, and James L. Murray was appointed secretary. A committee consisting of Messrs. Edward Bates, Pierre Chouteau, Jr., George Collier, Thornton Grimsley, Henry S. Geyer, and Nathan Ranney presented the following resolutions, which were adopted:

"Resolved, That we view with deep mortification and regret the President's veto of the bill which recently passed both houses of Congress to continue for a limited time the charter of the Bank of the United States.

"Resolved, That, in our opinion, the Bank of the United States is greatly useful and convenient to the government as a fiscal agent, highly beneficial to the nation at large, and indispensably necessary to the commercial prosperity and individual comfort of the Western people, and its existence is as strictly accordant with the principles laid down in the Constitution as its operations are with the welfare of the community.

"Resolved, That in the present condition of the commercial and pecuniary affairs of this section of the Union, if the bank should be driven, by fear of the consequences of the President's veto, to curtail the discounts and withdraw its paper from circulation, one universal scene of distress and ruin will pervade the whole Western country.

"Resolved, That a committee be appointed to draft an address to the people on the subject of the re-charter of the Bank of the United States, and on the principles and doctrines of the veto message."

The chair appointed Dr. George W. Call and Messrs. Frederick Hyatt, Matthew Kerr, Asa Wilgus, Thomas Cohen, and James L. Murray to compose the committee under the last resolution.

Gen. Jackson had also a great many friends and admirers in St. Louis, and on the evening of the same day they held a meeting in the town hall, at which Dr. Samuel Merry and Absalom Link presided, and William Milburn acted as secretary. Col. George F. Strother made an address, after which Messrs. E. Dobyns, John Shade, James C. Lynch, L. Brown, B. W. Ayres, J. H. Baldwin, and P. Taylor were appointed to draft resolutions. Subsequently the veto message was read, and the following resolutions were adopted:

"Resolved, That this meeting view all banks and banking institutions possessing exclusive privileges and powers of monopoly as of dangerous tendency in a government of the people, calculated in their nature to draw distinctions in society and build up family nobilities.

"Resolved, That this meeting do concur with Gen. Jackson in the view which he has taken of the United States Bank, with its privileges, powers, and unconstitutionality.

"Resolved, That this meeting view the stand which Gen. Jackson has taken against the moneyed powers of Europe and America as a mark of firmness and patriotism not surpassed by any patriot or statesman since the light of liberty first dawned upon our country.

"Resolved, That he is entitled to the fullest confidence of this meeting and of the American people for his undiminished firmness.

"Resolved, That this meeting will, by all honorable and proper means, contribute all in their power to sustain him in his position against the bank."

During the time that the Branch Bank of the United States was in operation in St. Louis it had the confidence of the community, and was of great advantage to its business interests. It closed its career with great credit to its managers, for when the accounts were settled it was found that the government had sustained a loss of only one hundred and twenty-five dollars. On July 10, 1832, President Jackson vetoed a recharter for the parent bank, and in 1836, its twenty years' charter from the Federal government having expired, it was rechartered by the State of Pennsylvania. In 1837 and 1839 it suspended specie payments, and Feb. 4, 1840, it suspended finally, the stockholders losing everything.

Upon the abolition of the Branch Bank of the United States the Cincinnati Commercial Agency established a branch in St. Louis, and by means of its ample capital and liberal dealing gained the confidence of the public. The general government deputed the agency as its fiscal agent, and the new bank assumed the business of the Branch Bank of the United States, and imparted new vigor to business, which had begun to languish for the want of pecuniary support. With the aid of government deposits the agency made considerable money, and its success excited the jealousy of the merchants, who had long wished for a bank of their own, and who for several years had been trying to effect that object, but who had been opposed by others who dreaded the great influx of paper and a repetition of the disasters which had overtaken the banks that had previously been established in the city. The merchants, however, determined to make another effort, and the first bill presented to the Legislature in 1837 was one to charter "The Union Bank of Missouri." The bill was amended and changed, and on Feb. 1, 1837, the charter of "The Bank of the State of Missouri," which had been passed, was signed by the Governor and became a law. Hugh O'Neill, Henry Walton, John B. Sarpy, George K. McGunnege, and John O'Fallon were appointed to receive subscriptions in

St. Louis, and a sufficient amount having been subscribed the bank went into operation on the 15th of April, 1837. After the establishment of the new bank the general government, in accordance with an act of Congress, was compelled to transact its business with it, and in June, 1837, a transfer was also made by the Commercial Agency to the Missouri Bank "of the local debt of our citizens," "the amount to be paid in installments at stated periods running through two years, bearing an interest of five per cent."

About the time of the agitation for the establishment of a local bank, a bill passed the Missouri House of Representatives for the expulsion of all agencies of foreign banking institutions from the State. Immediately a town-meeting was called at the City Hall, on Dec. 17, 1836, "for the purpose of taking into consideration the propriety of continuing bank agencies in the city, and for other purposes." The meeting was organized with Dr. Hardage Lane as chairman, and Charles D. Drake as secretary. John F. Darby addressed the meeting at some length, and Dr. William Carr Lane offered the following resolutions, which were adopted:

"That in the opinion of this meeting it will be highly inexpedient in the General Assembly to remove or lessen the banking facilities now possessed by the manufacturing and commercial community by removing the bank agencies now located amongst us, and that we deprecate any presentation in the General Assembly on the subject as tending inevitably to the great injury of every class of our citizens.

"Resolved, That a committee of five persons be appointed to respectfully memorialize the General Assembly upon the subject of these agencies."

The chair then appointed the following committee in accordance with the resolution: George Morton, Henry S. Geyer, John D. Dagget, James T. Swearingen, and Samuel S. Rebyburn.

George Morton then offered the following resolutions, which were severally adopted:

"Resolved, That this meeting has heard with regret that there is a disposition in the General Assembly to expel from the State agencies of foreign insurance companies; for the reason that they are evidently an accommodation and benefit to this city, affording to the owners of insurable property facilities of protection which without them could not be had, and operating only for the advantage of the community.

"Resolved, Therefore, that our senators and representatives be respectfully requested to use their influence to induce the General Assembly to permit insurance agencies to continue their beneficial operations amongst us.

"Resolved, That a committee of three be appointed by the chair to select five gentlemen to repair as a delegation to the city of Jefferson, and co-operate with our senators and representatives in respectfully laying before the General Assembly the wants and wishes of the people of this city upon such subjects of general interest as to them shall seem proper."

The chair appointed Messrs. George Morton, Henry Von Phul, and Edward Tracy that committee.

In 1830 the banks in the United States were estimated to number three hundred and twenty-nine, with a capital of one hundred and ten millions of dollars. In 1837 their number, including branches, was seven hundred and eighty-eight, with two hundred and ninety million dollars capital. The consequences of their multiplication were speculation in property and commodities, increasing prices, strikes of working-people for increase of wages, the abandonment of agricultural pursuits, and the crowding of people into cities or large towns for the purpose of speculation, chiefly in city and village lots. Industry was no longer thought of by the multitudes of people who found themselves rich from the high prices obtained for farming lands bought for new villages or cities that were to grow up to enrich their owners. At length (1836-37) the United States began to import food from other countries, and hungry mobs attacked the flour-stores in New York, the great speculation culminating in panics in all the cities. Early in March, 1837, Herman Briggs and Co., of New Orleans, failed on account of the decline in cotton. Their New York agents failed as soon as the news reached that city. This was the beginning. At New York one failure followed another among those who held Southern funds. In April news came that the leading English merchants granting American credits had become dependent on the Bank of England, and were being carried on a guarantee from the city. The panic then recommenced, and continued increasing until May 8th, when the Dry-Dock Bank of New York suspended. The other banks were forced to suspend on the 9th and 10th. The Philadelphia, Baltimore, St. Louis, and other banks followed as the news spread. Each city professed that it could have held out, but was forced to yield in the general interest. St. Louis suffered greatly from the panic that swept over the country. Many of the leading firms of the city were prostrated, and business, which a few weeks before was moving smoothly along in its accustomed channels, was checked with fearful suddenness, and became almost extinct.

Of course the state of the country was a prominent topic in political discussions. Hon. Thomas H. Benton, then the leader of the Democratic party in Missouri, was an advocate of a specie currency, and his party declared in favor of a monetary system composed exclusively of the precious metals. The Whig party was in favor of re-establishing a controlling power, like the United States Bank. In August, 1837, notwithstanding the denunciations of Col. Ben-

ton and his adherents, a petition to Congress "for the establishment of a National Bank" was adopted by the Chamber of Commerce of St. Louis, and was signed by nearly every leading business man in the city.

An extra session of Congress was called by President Van Buren; the banks expanded still more their issues of depreciated paper, and Congress did nothing but permit the issue of United States Treasury notes bearing a small interest to meet the pressing wants of the general government. On May 10, 1838, the New York and New England banks resumed, but the Philadelphia banks delayed until the Governor forced them to resume, Aug. 13, 1838. The banks in the other States followed in due time. In October, 1839, the paper of the United States Bank went to protest, and on the 9th the Philadelphia banks suspended payment. They were followed by all the banks South and West, and by those of Rhode Island. The New York and other New England banks did not suspend. In consequence of the suspension of the Eastern banks, the Bank of the State of Missouri, on the 12th of November, 1839, passed a resolution "that the bank will in future receive from and pay only to individuals her own notes and specie on the notes of specie-paying banks." This decision, on becoming generally known, aroused the intense indignation of the mercantile community of St. Louis.

The *Missouri Republican* of the following day says,—

"The bank excitement continued very high during yesterday. In fact, it is the only subject matter of conversation or consideration. The merchants, it might literally be said, have forsaken their counting-rooms, and mechanics their shops. Wherever two or three meet, the action of the bank was the theme of conversation, and in every circle that we have fallen in with, whatever might be the politics of those composing it, the resolution of the directors was condemned without measure or reserve. In truth, there never has been in this community so universal and unanimous a condemnation of any measure as this. Exclamations loud and deep are freely uttered in every quarter, and by men of all parties."

The notes of banks of other States formed the principal currency of the State, and by this act of the Bank of the State of Missouri all the notes of banks which had suspended specie payment lost their character as representing funds for the payment even of existing contracts. The merchants were in a most distressing situation. They had their commercial honor to preserve, and to do this it was all important that their notes should not go to protest. There were not, however, sufficient specie and bankable funds in circulation to redeem their paper.¹ In this crisis a meeting was held at the court-house at noon on Nov.

13, 1839, "to take into consideration the recent movement by the Bank of the State of Missouri in refusing to receive anything except specie and its own paper in payment of debts due it."

Edward Tracy was chosen president, J. C. Laveille and J. Clemens, Jr., vice-presidents, and G. G. Foster and Samuel Gaty, secretaries. It was

"Resolved, That, as the sense of this meeting, it will be no discredit to any individual having paper maturing this day at the Bank of Missouri to allow said paper to go to protest if a tender is made at bank or to the notary of currency hitherto bankable and is refused."

The president announced the following gentlemen as a committee on resolutions: Messrs. N. Paschall, George Morton, Joseph Foster, A. Carr, J. P. Doane, J. B. Sarpy, Asa Wilgus, John Whitehill, Wayman Crow, George K. Budd, A. G. Farwell, H. Von Phul, and Felix Coonce.

A proposition was made to John Brady Smith, president of the bank, that the collection paper discounted by the bank up to that time should be paid in the same description of funds as that previously received by the bank, and that the business paper discounted by the bank up to that time should, as far as possible, be placed on the footing of accommodation paper, the curtailment and discount being paid in specie or the notes of specie-paying banks.

The president promised to confer with the board of directors, and after due deliberation by that body objection to the proposition was raised on the ground that there would be necessarily some depreciation of the funds, which loss the bank was unwilling to sustain. So great was the emergency at this particular juncture in financial affairs, that this objection was met on the part of the most wealthy of the citizens by an offer to legally bind themselves to indemnify the bank against any loss it might sustain by a depreciation of the notes of the banks "heretofore received."²

The directors of the bank held a consultation, but determined to adhere to their original resolution.

The merchants had fully expected that the bank would accept the noble proposition made it by the responsible gentlemen mentioned, but when the refusal of the board of directors was made known, another indignation meeting was called, which strongly condemned the conduct of the bank, and resolutions were adopted recommending those doing business with it to withdraw their deposits and patronize some other

² The gentlemen who obligated themselves to be thus responsible were George Collier, E. Tracy, Pierre Chouteau, John Walsh, William Glasgow, John Perry, Henry Von Phul, John Kerr, G. K. McGunnege, Joseph C. Laveille, and John O'Fallon.—*Edwards' Great West*, p. 368.

¹ *Edwards' Great West*.

institution. As a consequence many of the largest depositors withdrew their funds and deposited them in the insurance offices, and with the St. Louis Gas-Light Company, which was then doing a banking business.¹

The bank, notwithstanding it was thus deprived of the support of many of its most influential patrons, still pursued the policy it had adopted, and weathered the financial storm which had threatened it.

On Jan. 15, 1841, all the banks of the country resumed specie payments, but they all suspended again on the 4th of February of the same year. The Philadelphia banks resumed in March, 1842, but complete resumption of specie payments throughout all the States was not accomplished until 1843, when prices were at the lowest point. Bankruptcy, ruin, and distress had done their work. At least two thousand millions of dollars, it has been estimated, represented the shrinkage in prices or values, six hundred millions of dollars of debts being wiped out by actual bankruptcies.²

In 1846 the Democratic party succeeded in establishing the independent treasury, the general government becoming its own banker, and receiving and paying only coined money. The measure was highly beneficial in promoting the use of coined money. In

¹ The *Missouri Republican* about this time discourses thus upon the financial situation:

“*The Divorce, the Bank and the People.*—A third and probably last notice from the State Bank of Missouri appears in to-day’s paper. The first notice was the famous resolution of the 12th, contemplating a specie-paying business altogether, and another restricting the curtailment of renewable paper to five per cent. instead of ten, as had been the case. Under the first resolution specie was demanded in all cases, as well as upon collection, as discounted business and accommodation paper. The next day brought forth another set of resolutions requiring depositors of paper for collection, whether owned in the city or out of it, to withdraw the same from bank, and giving notice that no paper will be received hereafter for collection unless specie is expressed on the face. The third and last notice is that to which we have requested attention, and which is a free confession on the part of the bank that the measure which it contemplated on the 12th would operate harshly and oppressively, and its repeal is compassed in another way. By the last notice, for the next sixty days discounted business paper is made to assume the character of renewable paper, the drawer paying up one-tenth of the amount with interest, and although the arrangement is restricted to sixty days, we venture to prophesy that its character will not be changed, and that it will thereafter be renewed.”

² The first bankruptcy law in this country was passed April 4, 1800, but was repealed Dec. 19, 1803. Another bankruptcy act was passed Aug. 19, 1841, and repealed Feb. 25, 1843. This was the period of “scrip,” or “shinplaster” currency. The kinds of currency in use in the West were known as “bank scrip,” “canal” and “railroad scrip,” “white dog,” “blue dog,” “blue pup,” etc.

the same year and in 1847 the potato famine in Ireland sent to the United States thousands of emigrants, and in 1848 the revolution on the continent sent thousands more. The potato famine also gave the United States a market for grain, and saved them from a share in the financial troubles of 1847. The repeal of the Corn Laws in 1846 and the more liberal tariff adopted by Congress in that year gave wider scope to industry. Railroads had already been extended both in the United States and Europe sufficiently to affect production and exchange. The telegraph was just coming into general use, and ocean steam navigation was rapidly extending. Following close upon this conjunction of circumstances came the discovery of gold in California in 1848. At once began a great emigration of adventurous men to the Pacific slope, and also great speculation in exports thither. The whole industrial world gained by this new supply of the medium of exchange, which came just when it was needed to sustain the new development of industry and commerce. The first exchange of the metal was for food and manufactured articles, and its discovery caused a new and sharp demand for agricultural and manufactured products in St. Louis and elsewhere. New fields were opened, new factories built, not in the United States only, but in all the commercial countries. The new and enlarged industries brought richer returns than before, both of wages and profits, not on account of the money, but on account of the whole industrial expansion, which the new supply of real money facilitated.

After two or three years of low discount rate and cheap food, there followed in 1853 rumors of war and a bad crop in England. This caused high prices for wheat and a renewed speculation in Western lands and railroads, which resulted in 1854 in a crisis and panic in Wall Street, New York. Some California traders also found their affairs to be in a critical condition, but generally the mercantile community held firm.³ Suddenly, on the 13th of January, 1855, the failure of Page & Bacon, of St. Louis, an old and highly-esteemed banking-house, with liabilities estimated at several millions of dollars, was announced. The firm transacted the largest banking business in the West, and at this time stood towards the city and county of St. Louis in the relation of public benefactors.⁴

³ Professor William G. Sumner.

⁴ The head of the firm was Daniel D. Page, of whom a biographical sketch is given in the municipal chapter. Henry D. Bacon, his partner, was born May 3, 1813, at East Granville, Mass. He entered early in life into commercial pursuits at Hartford, Conn., and in 1835 removed to the city of St.

The announcement of the suspension of the banking-house of Page & Bacon created a wide-spread sensation in the community, which was not diminished, but rather increased, by the fact that Messrs. Loker,

Louis, where he soon engaged as partner in one of the leading dry-goods firms of the city. He then entered the iron trade, which he pursued with good results until his marriage in 1844 with Miss Julia Page, daughter of Daniel D. Page, when he became associated with him in the flour business. He was a very active and enterprising young man, and at his suggestion his father-in-law in 1848 consented to open a banking-house under the firm-name of Page & Bacon, leaving its management to the more experienced Bacon. The property of D. D. Page provided a strong backing to the concern, and the house prospered from the start. The known ability of Henry D. Bacon increased the confidence of the public, and as both were leading Democrats, they profited through the opportunity offered by the Mexican war, under the Democratic administration of President Polk, which made St. Louis the disbursing centre of large sums of money for the army. In 1850 they established a branch in California, and in 1854 their exchanges amounted to the immense sum of eighty millions of dollars.

Everything went on well with the firm, and as Duncan, Sherman & Co. were their New York agents, both firms made large gains. In 1849 and 1850, St. Louis took a sudden leap forward. An immense emigration from Europe, especially from Germany, forced across the ocean by the collapse of the revolution of 1848, settled either in St. Louis or in its vicinity. Most of them were people of means, and with the traditional desire of Germans to own land, they purchased real estate. The trade in building lots assumed enormous proportions, and values rose rapidly. Page & Bacon saw heavy profits in the movement, and at once started with building up the extensive property of Mr. Page, selling houses and lots with small cash payments and on long mortgages at great advantage, and using the funds of the bank in buying more land. But in 1854 this upward tendency came to a sudden stop; sales of land gradually ceased, and Page & Bacon found themselves unexpectedly in difficulty to meet all the demands upon them. Early in the fall of that year the great sugar-refinery of Belcher Brothers in St. Louis, the largest establishment of its kind then in the country, suspended payment, and Page & Bacon held a large amount of their discredited paper. Distrust began to creep upon the commercial community of the city. Bacon saw the storm coming and hurried to New York. He opened negotiations with Duncan, Sherman & Co., with whom he had been doing a lucrative business for seven years. The conference came to a conclusion on the third day at midnight in Bacon's room in the New York Hotel, and he was promised that his firm should have a credit of two hundred and fifty thousand dollars on the strength of the securities Bacon had to offer, valid mortgages on improved property in St. Louis. Henry Bacon returned home in bright spirits, but he was greatly alarmed a few days later when a telegram informed him that Duncan, Sherman & Co. could not help them, as they must first look out to protect themselves. "For God's sake," he telegraphed back, "do not desert us; if you do we are ruined, and half of St. Louis with us!" But the New York house was inexorable, and sent word that a banking-house had no right to risk its money in real estate or other speculations. Thereupon Page & Bacon closed their doors.

The banking-house of Messrs. Duncan, Sherman & Co. failed in New York in August, 1875, and, singular to note, their fate was precisely the same as that which overtook their St. Louis

Renick & Co., another banking firm, did not open their doors. Ordinary business in the city was left unattended to by the citizens, and the public mind seemed absorbed at first in the public calamity of the stoppage of Page & Bacon, and afterwards in the run which commenced on the other banking-houses of the city. Indeed, Saturday, the 13th of January, 1855, was a day long to be remembered in the financial annals of St. Louis. As soon as the banking-houses were opened in the morning a run on the deposits commenced, and continued without intermission until evening. During this time the firm of Lucas & Simonds paid out upwards of two hundred and sixty thousand dollars, Louis A. Benoist & Co.¹ more than

correspondents twenty years before. As in the case of Page & Bacon, Duncan, Sherman & Co., not six weeks before their failure, were told by their London correspondents that their credit would be protected and their paper honored. But on the 27th of July, 1875, they were told that they could not be accommodated, as a banking-house had no right to tie up its funds in cotton and railroad speculations. Like Page & Bacon, they were also forced to stop business.

Besides many public evidences of the liberality of the firm, Mr. Bacon showed his generosity personally in many ways. To his efforts in part is to be attributed the establishment of the Mercantile Library, which has proved to be of the greatest use to St. Louis. He contributed forty thousand dollars towards the erection and furnishing of the Union Presbyterian Church, and the Webster College and the Home of the Friendless were also beneficiaries of his bounty. He was among the first of the enterprising merchants of St. Louis who stepped forward prominently to aid in the construction of the Missouri Pacific Railroad when that magnificent enterprise was presented to the public. His first subscription was the liberal sum of thirty-three thousand dollars, and afterwards he made advances for the prosecution of the work to the amount of from one to two hundred thousand dollars. The Belleville and St. Louis Railroad was another evidence of the same liberality. He also assisted very materially in pushing forward to its destination the North Missouri Railroad. In advancing to the city and county of St. Louis large amounts of money to meet their bonds the firm of Page & Bacon at the time were regarded as public benefactors. In 1853, knowing the advantage a direct line through the rich bottom-land of Illinois would prove to St. Louis, they advanced the necessary sum for the completion of the greater portion of the Ohio and Mississippi Railroad. This diverted an immense sum of money from their business, and a pressure shortly after taking place in the money market, as we have stated, the firm was compelled on Jan. 13, 1855, to suspend payment.

¹ Louis A. Benoist was born in St. Louis, Aug. 13, 1803. His father, François M. Benoist, was a native of Montreal, Can., and his mother was the daughter of Charles Sanguinette, an early settler. François M. Benoist was an Indian-trader, and removed to St. Louis in 1790. His son Louis A. attended early in life the school of Judge Tompkins, and at the age of fourteen went to St. Thomas' College, Kentucky, where he remained for two years. Returning to St. Louis, he commenced reading medicine with Dr. Todson. After a trial of two years he relinquished medicine and began the study of law in the office of Horatio Cozens. Soon after this he entered the office of Pierre

one hundred thousand dollars, and the Boatmen's Saving Institution one hundred and seven thousand dollars.

Though the run was apparently upon these institutions alone, yet the other banking-houses by no means escaped the visitation. J. J. Anderson & Co. and E. W. Clark & Brothers, bankers, paid out on that day larger sums, in proportion to their deposits, than any other houses in the city, although no crowds were collected around their doors, as was the case with other financial institutions. The same was true of other firms to a smaller extent. It was calculated by good judges that between seven and eight hundred thousand dollars of deposits were drawn from the banking-houses on this eventful day.

To check the panic which was spreading over the community, and to restore public confidence in the monetary institutions of the city, on Monday morning, January 15th, the following guarantee notice was issued, in which it will be seen that ten of the wealthiest citizens of St. Louis, believing in the entire ability of these banking-houses to pay every demand which might be made upon them, pledged their private property (estimated to be worth over eight million dollars) to secure the deposits:

"TO THE PUBLIC.

"The undersigned, *knowing and relying on the ample ability of the following banking-houses in the city of St. Louis, and with a view of quieting the public mind in regard to the safety of deposits made with them, hereby pledge themselves, and offer as a guarantee their property, to make good all deposits with either of said banking-houses, to wit: Messrs. Lucas & Simonds, Bogy, Miltenberger & Co., Tesson and Danjen, L. A.*

Provençère, conveyancer, where he continued his studies. In 1823 he visited Europe to look after some family property, and on his return was wrecked in the Bay of Biscay, but reached St. Louis in safety, and opened a broker's office for the sale of property, loaning money, etc. He pursued this business for a short time, and in 1832 opened an exchange and lottery office. This, it is said, was the first banking-office established in St. Louis. In 1838 his business increased to such an extent that he established a branch in New Orleans under the firm-name of Benoist & Hackney, which was afterwards, in 1855, known as Benoist, Shaw & Co. In July, 1847, the St. Louis house of Benoist & Co. suspended payment, together with the Perpetual Savings Institution, owing to the tightness of the money market, and their "inability to convert their debts or funds into such currency as their depositors could use." Messrs. Benoist & Co., however, resumed payment thirty days afterwards. Mr. Benoist's banking career was a long one, and he amassed a very large estate, estimated in value at about three millions of dollars. He was thrice married, his first wife being Miss Barton, of Kaskaskia, Ill., his second Miss Hackney, of Pennsylvania, and the third Miss Sarah E. Wilson, daughter of John Wilson, of New Jersey. Mr. Benoist had twenty children, of whom thirteen survived him. He died in Havana on the 15th of January, 1869.

Benoist & Co., John J. Anderson & Co., Darby & Barksdale, and Boatmen's Savings Institution.

"J. O'Fallon, Ed. Walsh, Louis A. Labeaume, J. B. Brant, L. M. Kennett, D. A. January, John How, James Harrison, Andrew Christy, Charles P. Chouteau.

"St. Louis, Jan. 15, 1855."

The generous manner in which these patriotic and self-sacrificing citizens stepped forward to sustain the credit of their city, with no motive save the city's good, showed plainly the broad basis on which the prosperity of St. Louis was founded and restored confidence completely. Indeed, no more pleasing event has ever happened in the commercial history of the country. These noble men volunteered their private fortunes for the purpose of protecting the character and standing of their city, both as to her commercial credit and the quiet of the community, and no one could require stronger evidence of the entire safety of his or her funds in the threatened banks. The guarantee provided, together with the prompt payment by the bankers of every deposit called for on January 16th, restored confidence completely, and for the remainder of the week, though money was very scarce, every one seemed comparatively cheerful and energetic. The crisis, though it seemed for a time about to result in a fearful public calamity, was in reality productive of much good, for it developed resources in St. Louis which before were latent and not suspected by many of the citizens. It showed also that the finances of the city were founded on a substantial basis, and that they were fully able to withstand a storm. But, above all, it exhibited the noble character of the wealthy citizens in a clear and brilliant light, and as the news of the crisis, and of its issue, spread over the country, St. Louis assumed a prouder and loftier position than she had ever attained in the eyes of the commercial world.

The houses which had survived the "run" proceeded to business with renewed vigor and added stability and strength, and the two firms which had suspended made immediate preparations to resume at an early day. Messrs. Page & Bacon paid all their drafts, after the 15th of January, at the Bank of America, in New York, with interest and cost of protest, and on February 17th announced that they would "resume the regular business" of their office on the 19th. At the time named the banking-house fully resumed business operations, but in consequence of the failure of their branch bank in San Francisco, and their drafts going to protest in New York, the partners of the parent bank in St. Louis determined to suspend operations, which they did finally on April 4th.

On the 24th of August, 1857, the failure of the Ohio Life and Trust Company, of Cincinnati, an old and highly-esteemed institution, with liabilities for seven million dollars, was announced. This incident passed without causing any general alarm, but the banks well knew what it meant. They reduced their loans in New York City from August 22d to October 17th nearly one-half, and this produced a crisis. A large number of failures of banks and firms, especially brokers, produce dealers, and persons depending on Western collections, took place in September. Bills on the seaboard were hardly obtainable in the interior at ten and fifteen per cent. premium. On the 12th and 13th of September the banks of Philadelphia, Washington, Baltimore, and many interior towns suspended. Stocks fell forty or fifty per cent., and twenty thousand persons were thrown out of work in New York City within a fortnight. On the 13th of October the New York banks (with one exception) suspended; the New England banks followed immediately.

The crisis in St. Louis was perhaps more intense than in any other city of the country. The news from Philadelphia and Baltimore of the suspension of the banks in those cities was announced in the newspapers on September 28th, and was not without its effect on the money market. Immediately after the banks opened for business the "run" on them for specie payments began. The consequence was that the house of Darby & Barksdale closed about ten o'clock, and very soon thereafter that of J. J. Anderson & Co. suspended payments. There were unusual demands upon the other banking-houses of the city, but they were promptly met. An excessive "run" also occurred upon the banking-house of James H. Lucas & Co., which was then doing the largest banking business of any house in the West. The senior member of the firm was one of the wealthiest men in the city, and as his failure would have proven a public calamity at this time, eighteen generous gentlemen of large means, and of the highest character for honesty and integrity, without solicitation from any quarter, pledged their private property to secure the depositors of the banking-house against all loss. The guarantee was as follows:

"The undersigned, believing that there is nothing in the condition of affairs to justify a want of confidence on the part of the community in the solvency of the several banking-houses of St. Louis, do hereby, in order to allay the apprehensions of depositors and to prevent the inconveniences which might result from a run on their depositories (without intending by their action to intimate a distrust of any other house), guarantee and assure to all persons having accounts with the banking-house of James H. Lucas & Co. the safety of their respective deposits.

"Witness the hands and seals of the undersigned this 28th of September, 1857, at St. Louis, Mo.

"James E. Yeatman, James Harrison, John How, R. J. Lockwood, Edward J. Gay & Co., Ed. Walsh, J. O'Fallon, John H. Gay, M. Brotherton, W. Renshaw, Jr., J. S. McCune, D. A. January & Co., D. H. Armstrong, Chas. K. Dickson, Thomas T. Gantt, Wm. M. McPherson, James B. Eads, Chas. Tillman."

Another paper of the same character, guaranteeing the safety of all deposits in the banking-house of Renick & Peterson, was also issued and signed by Samuel Gaty, R. Campbell, Edward Walsh, John How, Charles K. Dickson, Thos. T. Gantt, J. J. Murdoch, O. D. Filley, G. F. Filley, J. B. Sickles, Livermore, Cooley & Co., W. Renshaw, Jr., W. H. Benton, and H. Crittenden. These gentlemen were known to be men of wealth; at the same time they were prudent and were able to carry out their pledge, and would have done so if it had been required of them.

After what had transpired on Monday, the 28th of September, there was great anxiety to see what would be the result of the panic on Tuesday. The *Republican* of the 30th thus details the financial proceedings of the day:

"It was apprehended that a run would be made on the bankers and savings institutions, notwithstanding the guarantees given to two of the banking-houses by some of the leading capitalists of the city and the acknowledged solvency of the whole of them. At the hour of opening an unusual number of persons was observed upon Main Street and on the cross streets leading to it. The first thing that attracted attention was a notice at the door of the banking-house of Bogy, Miltenberger & Co. that the house had temporarily suspended business, and that it would not be opened.

"The seekers after gold were early on the street in front of the banking-house of James H. Lucas & Co., where they were soon joined by a number of idlers and curiosity-mongers. Those who had deposits in this house were not overmodest in making demands for specie, and from nine to nearly eleven o'clock the tellers were busily employed in paying checks.

"Another class of depositors was not slow in paying their respects to the gentlemen who managed the German Savings Institution, in the Merchants' Exchange block. There was quite a rush upon them, and this was kept up for an hour or two, when all demands for specie from affrighted depositors ceased. While these things were going on in Main Street, another set of depositors were paying their respects to the Boatmen's Savings Institution, at the corner of Pine and Second Streets. For a time, say an hour or two, the young gentlemen whose province it is to honor drafts upon this institution were a good deal exercised, and the coin passed out pretty freely; but by the time they had fairly got their hands in the demand was exhausted, and they had nothing unusual to do for the balance of the day. Passing up Main Street, a few stragglers were noticed in the banking-house of L. A. Benoist & Co., but the serenity of the gentleman who manages that concern was not disturbed, and he rarely took his hands out of his pockets.

"Still farther up the street, the State Savings had no calls for specie from importunate or suspicious depositors, and discounts were made and the usual business carried on as if they had no knowledge of any undue excitement in the city."

Mercantile failures now commenced and followed each other day by day, the panic increasing with renewed force as each suspension was announced, and as money was locked up by any one who could get and keep it, the pressure for money in the city was very great. There was an abundance of "currency," but this had ceased to be available in the payment of debts where specie funds were required, and for this reason, on October 3d, Messrs. Chouteau, Harrison & Vallé, one of the largest and most important business houses, temporarily suspended payment. This was an event that was not expected, and it added fuel to the panic. As a consequence, many of the leading houses in St. Louis were compelled to suspend business, and thousands of persons were thrown out of employment. On the following day the banking-house of E. W. Clark & Brothers was compelled to temporarily suspend cash payments. This was followed on the 5th by the suspension of the great banking-house of James H. Lucas & Co., which had been struggling for several weeks to withstand the unexampled monetary pressure. The *Republican* in announcing this failure said,—

"It needed only the stoppage of this banking-house of James H. Lucas & Co. to wind up the financial horrors with which this city has been overwhelmed within the past three weeks. Business houses have suspended to the surprise of everybody, banking-houses supposed to be equally sound with that of Lucas & Co. have gone down, and confusion has been increased; but when the house of James H. Lucas & Co. was forced to suspend yesterday by the continual run upon it, as regular as the rain which fell throughout the day, men were amazed and scarcely knew what to think. The case is an extraordinary one. For at least thirty days the house had endured a regular, ceaseless draft upon it for coin. There was not a man, in all probability, who did not believe that his money was perfectly safe with them, but the great majority of depositors, either to answer the importunities of friends or to be sure that the gold was in their clutches, resolved to check it out, and it was done. We assume that a million of dollars of current deposits were thus extracted by little and little, and yesterday, between one and two P.M., the doors were closed. We need not say that we regret this suspension. There is hardly a man in the community who will not do it. To nearly all it was a matter of surprise that such an event should occur at all, even in such inauspicious times. But when it is considered that the house was doing an immense business, that it had daily transactions over the country, that in the sudden and extraordinary pecuniary panic through which we are now passing losses must necessarily be incurred, and with a run upon all banking-houses, indicating a general want of confidence, however ungenerous that feeling may have been, it is not surprising that even this strong house should have been forced to yield to the storm. The members of the firm have, it is certain, the warmest sympathies of the people of St. Louis."

On October 6th an unexampled run was made on the Boatmen's Savings Institution, which was continued until night. The capacity of the bank was

not impaired by this demonstration, as the amount paid out hardly made an impression on the funds then in its vaults, and specie funds were offered it by other banks, but declined by the managers of the institution. In consequence of rumors that were circulated in the city, the bank in the afternoon issued the following "card":

"BOATMEN'S SAVINGS INSTITUTION,
"Oct. 6, 1857.

"Whereas, there are rumors injurious to this institution, that a portion of its cash funds are on deposit in other institutions of this city, the board deem it proper to state that all the cash funds belonging to it are in its own vaults.

"By order of the board of directors.

"S. BLOOD, President."

On the same day the "Mutual Savings Institution," located under the Planters' Hotel, at the corner of Fourth and Pine Streets, suspended. At the State Bank a steady run was made on it all day. The German Savings and the Franklin Savings Institutions, situated in the Exchange building, suffered a similar run, but it created no impression on their funds. Tesson & Danjen, Benoist & Co., Franciscus & Co., Renick & Peterson, and other banking-houses were not much troubled with specie demands.

Thus the panic continued until October 6th, when a second meeting was held by the leading merchants of the city at the Exchange room, for the purpose of receiving the report of Messrs. Ranney, Garnier, Hogan, January, Crow, Wall, Gay, Oglesby, King, Funkhouser, and Tucker, a committee appointed at a previous meeting "to advise upon the currency question." The committee reported the following resolution, which was adopted:

"Resolved, That the committee are unanimously of opinion that memorials should be generally signed petitioning the Legislature of this State, which convenes on the third Monday in the month, not to issue any State bonds, except such as previous legislation makes imperative to be issued, and to pass such a revenue law as will give to the world the most perfect assurance that, under any and all circumstances, Missouri will pay her interest and protect her obligations."

On motion of Mr. Ranney, the following resolution was also unanimously adopted:

"Resolved, That the business men of St. Louis will continue to receive for the present the good currency (meaning Illinois bank-notes, which were thought to be better secured than any other) afloat in the country in all transactions at par."

In consequence of the action of the merchants, the following day passed off without any excitement whatever. "There was quite a cheerful feeling, and people seemed to feel that they had reached the turning point, when financial affairs must improve and greater activity be infused into every description of business."

On October 19th the banking-house of Messrs. Tesson & Danjen suspended, which was followed on the 24th by the closing of the Bank of the State of Missouri. On the 26th the State Bank opened as usual, but did not pay specie, and with this exception business was transacted through the day. The Merchants' Bank suspended specie payments as soon as it opened on Monday morning, the 26th, but the Southern Bank suffered the run to be made upon it for an hour, and then the suspension of specie payments was announced. The Mechanics' Bank sustained the run all day, but, like the others, was forced in time to succumb to the unexampled monetary pressure.

This crisis was short, sharp, and severe, but the recovery was rapid, and the reaction healthful. The losses were very great, but it was only a bad stumble in a career of great prosperity, and it simply taught sobriety and care. The number of bankruptcies in the United States and Canada was 5123, with \$299,800,000 liabilities. Fourteen railroads suspended payment on \$189,800,000, and cotton manufacturers suffered severely by the fall of cotton (sixteen cents to eight and a half cents) and by the depreciation of stock.

The Northern and Eastern banks resumed in December, 1857, and were followed shortly afterwards by all the other banks in the country. Things went on until the civil war very much in the old way. The next panic was in November, 1860. Prosperity and abundance prevailed everywhere in all the States. Business of every kind appeared to be conducted with profit; the crops had been abundant, and the banking and currency systems rested upon a solid foundation. But the election of President Lincoln was followed by movements towards secession and by political agitation and excitement. Later in November several States were found to be drifting in the wake of South Carolina, which was considered the leader in a movement aiming at secession. A dark cloud arose to mar the fair prospects of a great nation engaged in profitable occupations, and there ensued a shrinkage of business, a contraction of credit, the reduction of enterprise, and some hoarding of gold. Prices were lowered, the foreign exchanges fell, and gold began to be imported. Southern collections became difficult, and then ceased.

The panic set in about the middle of November at New York with sudden violence. Some of the banks were speedily embarrassed, and the suspension of all, or nearly all, was considered inevitable if the panic continued to the close of Thursday, the 22d of November. But on Monday, the 19th, a plan for allay-

ing the panic was devised, and was submitted on that day and the next for the consideration of the bank officers, who adopted it in general meeting on Wednesday, the 21st. It was at once carried into effect, with wonderful success. People who had drawn out specie at once returned it to the banks, and the day that was expected to bring on general bankruptcy only witnessed universal rejoicing. Not so, however, in St. Louis, where all the banks, with the exception of the Exchange Bank, suspended payment on November 26th. They resumed shortly after, but during the winter the Southern States seceded and the political excitement increased. In April, 1861, the progress of the secession movement caused great uneasiness in financial circles, but on the 24th of that month the bank officers again united as before and prevented any panic worthy of note.¹

On October 14th the banks of St. Louis created quite a stir in the community by deciding not to receive or pay out the notes of the Union Bank of Missouri. The initiative was taken by the State Bank, which was followed by the others. On the following day a meeting of the bank presidents was called at the instance of the Merchants' Bank, "to determine on a line of policy to be pursued by these institutions towards each other." The State Bank, Merchants', Southern, Mechanics', and St. Louis were represented at the meeting. A resolution was adopted for a settlement of balances each day, the notes of each bank being received and paid out indiscriminately. This resolution was agreed to by all the banks represented except the Bank of St. Louis, which, in consequence of the seizure of some one hundred and thirty-four thousand dollars of its coin by the military authorities, did not feel itself warranted in abiding by the resolution.²

¹ On the 20th of September, 1861, the following notice was published:

"Subscriptions Invited to the National Loan.—Pursuant to instructions from the Secretary of the Treasury, a book will be opened on the 24th day of September, 1861, at the office of the assistant treasurer in St. Louis, for subscriptions, under my superintendence, for treasury notes, to be issued under the act of July 17, 1861.

BEN. FARRAR,

"Assistant Treasurer United States, St. Louis, Mo."

² The coin referred to was taken possession of by an officer of the army in the branch bank at Boonville, Ill., and was transferred by him into the hands of the United States Express Company, with instructions to deposit it with the sub-treasurer in St. Louis. The sub-treasurer refused to receive it, and the express officer then made a special deposit of it in the Mechanics' Bank, where it remained for some time, as none of the army officers were willing to take the responsibility of restoring it at this time to the bank. In a short time, however, the specie was returned to the owners.

In consequence of this action on the part of the St. Louis Bank, its paper on the 16th was rejected at the several banks. This proceeding was followed on the next day by similar action on the part of several of the other banks. The State Bank received and paid out Southern and Mechanics' Bank bills, while the Merchants' refused the Mechanics', but took the Southern Bank notes, as they had agreed to do. The Mechanics' then retaliated on the Merchants' by throwing out its paper. This state of affairs continued until the 19th, when the misunderstanding between the Merchants' and Mechanics' Banks was removed, and they received each other's paper as formerly. The paper of the State, Mechanics', Merchants', and Southern Banks constituted at this time the only circulating medium in the city.¹

The final panic at New York preceding the suspension of specie payments on Dec. 30, 1861, was very slight, the banks having suspended before the public had become aware of there being any pressing necessity for it. In the interior, where State banks were issuing notes on security of stocks of the seceding States, many banks failed, and there was much distress among the people. The year 1862 consequently opened with a general suspension of specie payments by the banks in all parts of the country, and on Feb. 25, 1862, Congress authorized the issue of one hundred and fifty millions of "greenback" legal tender notes. The first issue of legal tenders was in April. As they were issued gold rose, and all specie disappeared. On July 11th one hundred and fifty million dollars more legal tenders were voted, and the provision of the act of February 25th for funding them in six per cent. bonds was omitted.²

¹ On the 31st of July, 1861, the assistant finance commissioner of the State made an official report on the condition of the State bank-note circulation, from which it appears that the entire outstanding circulation of all the banks in the State was \$8,021,000. Of this account the discredited or partially discredited banks had a circulation of \$4,609,405, divided as follows: St. Louis, \$472,110; Mechanics', \$831,635; Western, \$597,045; Southern, \$715,070; Union, \$1,067,510; Farmers', \$926,035. This would leave for the circulation of the remaining banks, Exchange, Merchants', and State Banks, \$3,411,595, which was the local capital upon which the business of the city and State was conducted. The savings institutions (leaving out the brokers) had a deposit account of over \$3,000,000.

² In consequence of the discovery of extensive gold deposits at Pike's Peak, in Colorado, and the Salmon River regions, a meeting was held on May 26, 1862, at the Union Merchants' Exchange, "to take into consideration measures for establishing in St. Louis a United States Branch Mint." Mr. Partridge called the meeting to order, when Clinton B. Fisk read a preamble and resolution, and the following memorial to Congress, which were adopted. The memorial was circulated throughout the city and State for signatures, and was afterwards submitted to Congress:

In January, 1862, the highest price of gold was three and three-quarters premium, and when a second issue of legal tender notes was authorized (July 11th), it sold at a premium of twenty per cent. In January, 1863, another issue of one hundred million dollars of the notes was authorized, when gold rose to fifty per cent. premium. June 20, 1864, gold trading was forbidden. Gold rose from 199, on the 21st, to 230 on the 23d, and fell to 207 again. The act was repealed July 2d. Gold reached its highest point, 285, in July, 1864, the paper dollar being worth a little more than thirty-five cents in coined money. One week after the Confederate forces east of the Mississippi, on May 11, 1865, had surrendered, the premium on gold was as low as twenty-eight and a half per cent.

The act of July 17, 1862, provided for the issue of stamps to be used as "change," but they were inconvenient, and the act of March 3, 1863, provided for fifty million dollars of fractional notes.³

"To the President and Members of the Senate and House of Representatives, in Congress of the United States:

"Your memorialists would represent that since the recent discovery and partial development of the rich gold deposits at Pike's Peak and Colorado, and the Salmon River regions, St. Louis has become the depository of much of the crude products of these mines. Several organizations, with abundant supplies for the further exploration and development of said mines, are now en route for the northwest from this city and vicinity.

"The Missouri and Yellowstone Rivers afford accessible communication by steambot to within one hundred and twenty miles of the richest mines of the Rocky Mountains. The Pacific Railroad, the early completion of which we now hope for, will open to St. Louis direct communication with the rich gold districts of the Sierra Nevada and Pike's Peak. The rich treasures of these mines will naturally flow back by these routes into the lap of St. Louis. Our great city, being situated in the geographical centre of this continent, reaching out her arms by her rivers and railroads to every extremity of the nation, makes her, by her providential location, not only the great centre of the commerce of the Mississippi valley, but of the United States.

"In view, therefore, of these considerations, and in order to the speedy convertibility of the crude products of these mines into coin, your memorialists pray your honorable body to establish a branch mint in the city of St. Louis, Mo., and, as in duty bound, your petitioners will ever pray."

³ The following general order was issued in St. Louis in September, 1862:

"OFFICE OF THE PROVOST-MARSHAL-GENERAL,
"DISTRICT OF MISSOURI AND IOWA.
"St. Louis, Sept. 15, 1862.

"GENERAL ORDER No. 1.

"All banks, bankers, banking institutions, brokers, and all persons, natural or politic, doing a banking business, or any branch thereof, wholly or partially within this district, are hereby notified and warned that all transfers and assignments of stock, certificates in the nature of stock, certificates of deposit, money, or currency used as money, or any other credits or effects, made by the following persons, that is to say:

On the 25th of February, 1863, the National Bank Act was passed, authorizing \$300,000,000 of bank capital to be distributed, half of it according to banking capital, and half of it according to population. An act approved July 12, 1870, added \$54,000,000, and provided for withdrawing and redistributing an excess above the quota held in New York and the East. This last was found impracticable. The act of Jan. 14, 1875, removed all restrictions. On Oct. 5, 1865, there were sixty-six national banks in operation. The system rapidly absorbed nearly all the banks. The law required that country banks should hold fifteen per cent. of their circulation and deposits in greenbacks, and that the banks in the large redemption cities should hold twenty-five per cent. The banks were afterwards allowed to count their reserves with their redemption agents as part of this reserve up to three-fifths of the required amount. The act of June 20, 1874, did away with this reserve, as far as circulation was concerned, and substituted a five per cent. reserve to be kept at Washington, where the redemption takes place.

The act of June 30, 1864, limited the amount of greenbacks to \$400,000,000, and such part of \$50,000,000 more as might be needed to redeem temporary loans. A general resolution in favor of contraction and resumption passed Dec. 18, 1865, and a measure allowing the Secretary of the Treasury to withdraw \$10,000,000 in six months, and thereafter \$4,000,000 per month, was adopted April 14, 1866. The crisis in England in the spring of 1866, and the war on the continent in the summer of that year, caused some stringency in the United States, and set the gold premium in activity. In February, 1868, McCulloch's contraction was suspended by order of Congress. He had reduced the greenbacks to \$356,000,000, at which

point they stood until October, 1872, when Mr. Boutwell, who affirmed that the \$44,000,000 so withdrawn were under his control, issued \$5,000,000 of them to correct a stringency in Wall Street. These were withdrawn during the winter, and the sum remained \$356,000,000 until the crisis of 1873, when it was raised to \$382,000,000. The act of Jan. 14, 1875, made that sum the limit, allowed national banks to be formed to any extent, and authorized them to issue notes for ninety per cent. of the bonds deposited. Greenbacks to the amount of eighty per cent. on the additional notes issued were to be withdrawn until greenbacks were reduced to \$300,000,000.¹

The phenomena of excessive issues of paper money during the years 1863, 1864, and 1865 were peculiarly impressive. Prices frequently rose and fell from rapid fluctuations in the volume of the issues as well as from the vicissitudes of war.²

¹ The case of *Hepburn vs. Griswold*, involving the constitutionality of the Legal Tender Act as to contracts made before its passage, was decided by the United States Supreme Court in conference Nov. 27, 1869, by the chief justice and seven associates. One of these, Judge Grier, resigned Feb. 1, 1870, and the decision *against* the constitutionality of the act as applied to the contracts mentioned was announced February 7th. Judge Strong was appointed Feb. 18, 1870, and Judge Bradley March 21, 1870. The re-argument of *Knox vs. Lee*, involving the decision just mentioned, took place in December, 1870. Judge Miller read the decision of the majority *affirming* the constitutionality of the law, Chase, Nelson, Clifford, and Field dissenting.—Professor William G. Sumner, "First Century of the Republic," p. 258; 8 Wallace, United States Reports, p. 626; 12 Wall. 457, and note, p. 528.

² The following is a copy of an act passed by the Legislature of Missouri, entitled "An Act relative to railroad directors or other officers, bank directors or other officers, and directors or other officers or trustees of any incorporated company or institution," approved March 23, 1863:

"Be it enacted by the General Assembly of the State of Missouri as follows:

"SECTION 1. That all railroad directors and officers, bank directors and officers, and all officers of all incorporated companies, or of any incorporated institutions in this State, before entering upon their duties as such officers or directors, shall take and subscribe an oath in form as follows:

"I, A. B., do on oath (or affirmation) declare that I have not at any time since the 17th day of December, A.D. 1861, willfully taken up arms or levied war against the United States, nor against the provisional government of the State of Missouri, nor have willfully adhered to the enemies of either, whether domestic or foreign, by giving aid and comfort or countenance thereto, but have always in good faith opposed the same; and, further, I will support, protect, and defend the Constitution of the United States, and of the State of Missouri, against all enemies and opposers, whether domestic or foreign, any ordinance, laws, or resolutions of any State Convention or Legislature, or of any order or organization, secret or otherwise, to the contrary notwithstanding; and that I do this with an honest purpose, pledge, and determination faithfully to perform the same without any mental reservation or evasion whatever, and

"1st. Persons holding any office, civil or military, under the government called the government of the Confederate States of America.

"2d. Persons holding any office, civil or military, under the government of any of said Confederate States.

"3d. Persons who have in any manner assisted or given aid and comfort to the said Confederate States, or any of them, during the present rebellion against the authority of the United States, are all absolutely null and void; and all banks, bankers, banking institutions, brokers, and all persons, natural or politic, doing a banking business, or any branch thereof, wholly or partially within this district, are forbidden to recognize or give effect to any such transfer or assignment, or to pay any money, or transfer any credit, by reason of any check, draft, bill of exchange, or order drawn or made by any person claiming to be the proprietor, owner, or assignee of any such stock, money, credits, certificates or effects, or the proceeds thereof.

"By order of Brig. Gen. SCHOFIELD.

(Signed)

*"THOMAS T. GANTT,
"Provost-Marshal-General."*

Suffering and distress prevailed among the poor and all who were dependent on fixed incomes. There were stupendous speculations in gold, in stocks and commodities and property, and sudden acquisitions of wealth from these speculations, as well as from government contracts, with heavy losses and depressions in many branches of trade and industry. Since the close of the war, the panic of 1869, from a great speculation in gold,¹ and that of 1873, from the breaking down of new railroad enterprises, have been the most notable.

The stringency which had occurred in the fall of 1871 and 1872 was significant of the approaching absorption by expanding credit of the legally limited amount of paper currency. In the summer of 1873 the granger agitation in the West frightened investors from railroad bonds and crippled the enterprises which depended on the continuance of these investments for funds. The rebuilding of Chicago and Boston had also caused a great absorption of circulating capital. On the 8th of September the New York Warehouse and Security Company failed, and its suspension was followed by that of one or two firms involved by railroad construction. Confidence in persons known to be burdened in this way was impaired, and a run on them for deposits began. On the 18th of September, Jay Cooke & Co. succumbed to this demand, and a panic followed. The country depositors began a

that I will faithfully demean myself while in office,' which said oath or affirmation shall be filed in the office of the clerk of the county court for the county where the said directors or other officers or trustees reside within ten days after taking said oath or affirmation.

"Sec. 2. All railroad directors and officers, bank directors and officers, all officers of all incorporated companies, or of any incorporated institution, who shall fail to take and subscribe to the foregoing oath or affirmation on or before the 1st day of April, A.D. 1863, shall vacate their office as said directors or officers, and the vacancy occasioned shall be filled by appointment or election under existing laws.

"Sec. 3. Any person who shall falsely take, or having taken, shall thereupon willfully violate the oath prescribed in the first section of this act, shall, upon conviction thereof by any court of competent jurisdiction, be adjudged guilty of the crime of perjury, and shall be punished therefor in accordance with existing laws. And it shall be the duty of the judges of all courts having criminal jurisdiction under the laws of this State specially to charge the grand juries in the counties in which said courts shall be held respectively, and of all grand juries, in the performance of their duties under the laws of this State, specially to inquire concerning the commission of any act of perjury mentioned in the first section of this act. This act to take effect from and after its passage."

¹ In September, 1869, a corner in gold was made, which terminated in the panic of September 23d, known in history as "Black Friday," when the Secretary of the Treasury intervened by a sale of gold to put a stop to the proceedings of a clique of speculators.

"run" on their banks, the country banks called for their balances, and the city banks called their funds in from the brokers. On the 20th the Union Trust Company of New York suspended, and two or three other banks and trust companies followed in quick succession. The panic on the New York Exchange was so great that it was closed, and remained so for ten days. The Gold Exchange closed on Monday, the 22d, with gold at 112.

The financial storm did not break upon St. Louis until late in September. To prevent a panic and business failures a meeting of bank presidents and other members of the Clearing House Association was called at the rooms of the association on September 25th, and the following resolutions were unanimously adopted:

"Resolved, 1st, That, for the protection of our commercial interests and for the purpose of preventing a drain of currency from the banks of this city, we do hereby agree to adopt substantially the plan adopted in New York, viz.: we will not pay out currency or checks except for small sums, to be optional with the banks upon which they are drawn, but we will certify checks drawn on balances in our banks payable through the Clearing-House only.

"2d, That the committee of management of the St. Louis Clearing-House Association are hereby authorized and directed to issue immediately Clearing-House certificates in sums of five hundred dollars each to an amount not exceeding two million dollars. Said certificates shall be used for the purpose of settling balances between the banks composing the Clearing-House Association, and each bank should be entitled to an amount of said certificates equal to its *pro rata* of clearings during the past quarter; such certificates so issued to be secured by a deposit of ample collateral with a special committee of five bank officers to be selected by the president of the Clearing-House Association.²

"3d, That the deposit of collateral with said committee shall consist of United States bonds, bonds of this city and county, such commercial paper and such other securities as the committee in their judgment consider proper and satisfactory, and the committee shall fix the valuation at which the securities shall be taken.

"4th, That these resolutions shall remain in force only until the 1st of November next."

The leading merchants of the city considered this movement of the banks as being commendable and prudent in the highest degree, and as having a direct tendency to prevent a panic and business failures. Immediately after the adjournment of the meeting a general suspension of the St. Louis banks and banking-houses took place, and a run upon them

² The committee appointed in accordance with the second resolution was as follows: John R. Lionberger, president Third National Bank; William H. Scudder, vice-president State Savings Institution; James H. Britton, president National Bank of Missouri; Robert Barth, of Angelrodt & Barth; C. D. Block, president Fourth National Bank; and R. J. Lackland, president Boatmen's Savings-Bank.

was thus prevented. As a consequence currency became very scarce, and Mayor Brown in a message to the City Council recommended that the city issue its warrants as a measure of relief for existing financial embarrassments. The City Council entertained the proposition favorably, and with curious unanimity on September 29th passed an ordinance providing for an issue of three hundred thousand dollars in municipal "shinplasters." The new scrip was immediately prepared, and on November 6th the first installment of one hundred and five thousand dollars was put into circulation. The notes were of three denominations, one dollar, two dollars, and three dollars, and the engraving and printing were finely executed. They were printed on a superior quality of bank-note paper, in four colors. The back of the notes was brown in color, from which circumstance they came to be known as "brown-backs." In general appearance they were similar, but each was embellished with a different design. They read:

"STATE OF MISSOURI,
"St. Louis, Nov. 1, 1873.

"The city of St. Louis hereby promises to pay to bearer at the city treasury one (two or three) dollar. This note is receivable for all city taxes, licenses, and other municipal dues.

"JOSEPH BROWN, *Mayor*,
"SAMUEL PEPPER, *Comptroller*,
"A. GEISEL, *Treasurer*." ¹

The panic of 1873 was allayed in New York by the union of the banks, as in 1860 and 1861, although not without serious disasters incident to a shrinkage in values estimated at three hundred millions of dollars within four weeks, principally in the obligations of railroad enterprises, which had been placed upon the market to an extent far exceeding the immediately available financial resources of the country. The revulsion was precipitated by a falling off in the demand for American railway securities in other countries. Happily, the course pursued by the bank officers in New York and other cities was effectual in preserving the industry, trade, and commerce of the country from a catastrophe that threatened at one time to overwhelm the economical interests of the people. The suspension of paper payments by the banks continued until Nov. 22, 1873.

In the summer of 1877 considerable depression was felt in commercial circles in St. Louis, which seriously affected the banking institutions of the city.

¹ In 1861 the city issued similar warrants, but it would have been better if they had never been issued. Seven years afterwards frauds connected with the issue were discovered, but the full extent of them was never completely developed. Some officials estimate that the city lost by the first transaction about one hundred thousand dollars.

With the decrease of business the banks became crippled in their resources, and in consequence of failing securities a considerable amount of depreciated real estate came into their possession. The banks could not realize upon this class of assets in time to meet the demands of their clamorous depositors, and when the crisis came a number of the small savings institutions were forced to suspend business.

The German Bank, then located at the corner of Fifth and Market Streets, was the first to suspend, on July 10, 1877. The announcement of the failure of this institution, though not altogether unexpected among the well informed in the community, was a surprise to the public at large. On the 14th, soon after the beginning of banking hours, crowds began to gather at the numerous small banking-houses, and a run was made on them by frightened depositors, who were determined to withdraw their money. As a consequence the Butchers' and Drovers' Bank, at the corner of Fifth and Morgan Streets, soon went into liquidation, and its suspension was followed on the 16th by the closing of the North St. Louis Savings Association, situated at the southeast corner of Fourth and Morgan Streets, and of the Bank of St. Louis. The suspension of the Bank of St. Louis appears to have been directly the result of the failure of the North St. Louis Savings Association. At the same time a slight run was made on the Boatmen's, but the withdrawals amounted to scarcely more than a trifle for that wealthy institution. A number of the most substantial citizens offered this bank liberal assistance if it needed it, one gentleman making a proffer of one hundred and seventy-five thousand dollars cash; but the Boatmen's Bank declined these kind offers, as it felt fully able to satisfy all the demands that might be made upon it. The Provident Savings Association, the Union Savings, the German Savings, the Broadway Savings, the Biddle Market Bank, and a number of other banks sustained something of a "run," but cheerfully paid all deposits on demand.

At the close of business on the 16th of July the run had about ceased, and although quiet prevailed in banking circles, on the 17th another moneyed institution closed its doors. The Bremen Savings-Bank opened as usual on that day, but in the face of a pressing demand for more money than it had at hand, it suspended about ten o'clock.

The failure of this bank ended the financial crash of 1877. The suspensions fell like a thunderbolt upon a great number of small depositors, frugal, trustful, hard-working men and women, whose little all, representing years of toil at the market-stall or the wash-tub, was swept away.

The act of Congress of Jan. 14, 1875, specified Jan. 1, 1879, as the day for the resumption of specie payments by the national banks, and at the time named all the banks resumed, and to-day the country is enjoying unexampled prosperity.

The extent of the commercial interests of St. Louis is plainly indicated by the strength and proportions of her banking business. A larger capital is employed in banking in St. Louis than in any other city in the country of approximate size. Notwithstanding the enormous capital invested the business has been uniformly profitable, and while the number and strength of the banks have increased year by year, the wonderful development of the commercial and manufacturing interests of the city has kept the money employed.

At one time St. Louis received calls from some of the Southern States for large amounts of money. This demand was sufficient to absorb all the money that the banks could spare during the entire season of moving the cotton crop. It was a profitable business, as the margins were liberal and the borrowers were able to offer the very highest grade of commercial paper. Since the war, with the opening up of new channels of trade, this class of banking business has changed somewhat. Then, again, the commerce of certain of these States is so disturbed that St. Louis bankers noted for conservatism refuse to accept any paper offered from them unless it is well secured.

Therefore this old channel for the employment of banking capital is temporarily closed. Yet the grain trade, the flour interest, the cotton traffic, and other elements of St. Louis commerce have increased so largely that the bankers have been able to employ their immense resources safely and profitably. In view of this success under conditions somewhat unfavorable, the banks properly feel assured of the future. There is no other section of country in the world that is recuperating and advancing commercially so rapidly as the South. The influence that the prosperity of Texas and Arkansas has had upon St. Louis is well known. There is not a branch of trade in the city that has not been benefited by it, and the banking business has had its share. With the further progress of prosperity in the South, and with continued commercial activity, there will be a greater demand for the employment of banking capital than has ever been known in St. Louis, and this will no doubt necessitate an increase on even the enormous resources now in the hands of existing banks, if it does not call for the establishment of other banking institutions. For a generation past St. Louis has been renowned for the strength of her banks.

The leading institutions of this class have long held a high rank among the very best banks of the United States, and the representative bankers of St. Louis have enjoyed a wide reputation as enterprising, sagacious, and prudent financiers.

The Bank of St. Louis, or “the Old Bank of St. Louis,” as it is distinctively known, was chartered by the Territorial Legislature on Aug. 21, 1813, the commissioners being Auguste Chouteau, John B. C. Lucas, Clement B. Penrose, Moses Austin, Bernard

Pratte, Manuel Lisa, Thomas Brady, Bartholomew Berthold, Samuel Hammond, Rufus Easton, Robert Simpson, Christian Wilt, and Risdon H. Price.

On the 2d of October, 1813, subscription books were opened under the supervision of the board of

commissioners, Christian Wilt secretary, as follows: At St. Louis, by Robert Simpson; at St. Charles, by Uriah J. Devore; at Ste. Genevieve, by Thomas Oliver; at Mine à Breton, by Moses Austin; at Cape Girardeau, by Joseph McFerron; at New Madrid, by John La Vallee.

In December, 1814, Thomas F. Riddick, Risdon H. Price, and John Cromwell, on the part of the commissioners, gave the public notice that

"on the 15th of December instant subscription books will be opened at St. Louis, St. Charles, Herculeum, Mine à Breton, and Ste. Genevieve, in the Missouri Territory, and at Kaskaskia and Cahokia, in the Illinois Territory, under the direction of William Smith, Theodore Hunt, and Edward Hempstead, at St. Louis; Nathaniel Simonds and Jesse Morrison, at St. Charles; John W. Honey and Elias Bates, at Herculeum; Moses Austin and William H. Ashley, at Mine à Breton; Joseph Pratte and William Shannon, at Ste. Genevieve; Pierre Menard and William Morrison, at Kaskaskia; Nicholas Jarrot and John Hay, at Cahokia, for the purpose of receiving subscriptions for stock in the Bank of St. Louis. A copy of the articles of the association will be found in the hands of each of the commissioners above named, the books to continue open for three months; shares at one hundred dollars each."

It was the first bank established in Missouri, and was organized on Sept. 2, 1816, with the following directors: Samuel Hammond, William Rector, Bernard Pratte, Risdon H. Price, Moses Austin, Theodore Hunt, E. B. Clemson, Justus Post, Robert Simpson, Charles N. Hunter, Walter Wilkinson, Theophilus W. Smith, and Elias Bates. On the 20th of September, Col. Samuel Hammond was elected president, and John B. N. Smith cashier. The capital stock was one hundred thousand dollars.

For over a year the bank was a most popular institution. It created an extraordinary impetus in business circles, encouraged the public mind, and was everywhere regarded as a most excellent enterprise. Early in 1818, however, there was a reaction, caused, it is said, by speculative and unsafe investments on the part of the management, and the stockholders and directors became divided. The antagonism finally culminated in a rupture in the board, and the seizure of the bank property by what was known as the Thomas H. Benton faction among the stockholders. These proceedings are fully set forth in the subjoined protest in the interest of the ousted officials, bearing date Feb. 13, 1818:

"TERRITORY OF MISSOURI, } ss.
COUNTY OF ST. LOUIS. }

"I, Joseph V. Garnier, a notary public in and for the county of St. Louis, in the Territory aforesaid, duly commissioned, at the request of the president and directors of the Bank of St. Louis, stating among other things that on Wednesday, the 11th day of February inst., a meeting of the board of directors of said bank being held at the banking-house of said bank (being discount day) after the business of the day had been gone

through, a certain resolution was offered by Joshua Pilcher, a director, supported and seconded by Elias Rector, also a director, having for object the removal from office of cashier of said bank of John B. N. Smith, which being carried in the affirmative by a majority of two (ten of the directors being present), a motion was made by the said Joshua Pilcher that the board proceed to the appointment or election of a cashier, which being also carried, the board proceeded to the election of a cashier, when, after two ballots without effect, on the third ballot Theophilus W. Smith was declared duly elected the cashier of the said Bank of St. Louis by a majority of four votes, three votes being in the negative and seven in favor of the said Theophilus W. Smith. That upon the result of the election being made known, three of the directors then present, to wit, the said Joshua Pilcher, Elias Rector, and Robert Simpson, tendered their resignation as directors of the said bank, which being recorded, their seats as directors of the said bank were declared vacated, and an entry of the same was made on the minutes of the proceedings of the said board of directors. That shortly after a tumultuous assemblage of persons was seen in and about the banking-house of said bank, instigated, it is supposed by the said Joshua Pilcher and Elias Rector, in consequence of the said election and appointment of the cashier as aforesaid, and for no other cause as is verily believed. That the said Joshua Pilcher, Elias Rector, Thomas H. Benton, Lieut. James McGunnele (of the army of the United States), Thompson Douglass, Stephen Rector, Thomas Handy, John Little, Jeremiah Connor, Taylor Berry, and Col. Daniel Bissel, also in the army of the United States, with others, at present unknown, did, as they also believe, enter the banking-house of the said bank with an intent forcibly to wrest from the president, directors, and officers of the said bank the possession thereof; and did actually then and there pass a resolution to possess themselves of the keys of the outer doors of the said bank, and did accordingly, or one of them for the whole and in the name of the whole, actually take possession of the same, and, having ordered out the subordinate officers of the bank, did lock up the doors thereof. The said president and directors further state that the aforesaid Joshua Pilcher and others did afterwards assemble near the said banking-house at the counting-room of the said Joshua Pilcher, and then and there demanded of the president the delivery by him of the keys of the vault of the same, which being refused, they did afterwards, on the evening of the same day, again assemble together, when the following resolution was adopted, to wit: 'Resolved, That a committee of five persons be appointed to take charge of the keys of the bank and to have the custody of the banking-house, and deny admittance to the said governing directors and their officers, and will assist in putting them out if they gain admittance by any means,' a copy of which was left by the said Joshua Pilcher and Jeremiah Connor with Eli B. Clemson, the president *pro tem.*, legally appointed by the president, who was prevented from attending by indisposition. They, the said Pilcher and Connor, in conjunction with Thomas H. Benton, having previously declared to the said Theophilus W. Smith, the cashier of the said bank, that it was their determined intention to carry the said resolution into effect should an attempt be made to regain the possession of the said bank and banking-house, which said declaration and threats thus made by the said Pilcher, Connor, and Benton, for themselves and on behalf of the aforementioned Elias Rector, James McGunnele, Thompson Douglass, Stephen Rector, Thomas Hanly, John Little, Taylor Berry, and Daniel Bissel, the said parties thus protesting had no doubt and verily believed would be carried into execution should an attempt be made at regaining the possession of the said bank and banking-house, whereby and wherefor all attempts at the same have by the said protesting

parties been thought useless and even dangerous. Afterwards, to wit, on the 12th day of the same month, Theophilus W. Smith, the cashier of the said bank, made of the said Joshua Pilcher, Thomas H. Benton, and Jeremiah Connor a demand of the keys of the said bank, which were denied him; Col. Eli B. Clemson, the president *pro tem.*, also made a demand of the keys aforesaid of the said Joshua Pilcher, and the same were refused and denied him; whereby the said president and directors and the suhaltern officers of the said bank have been prevented from attending to the duties of their respective appointments, to the great damage, prejudice, and detriment of the said Bank of St. Louis, the stockholders thereof and all others concerned, either directly or indirectly, with the same.

"Whereupon I, the said notary, at the request aforesaid, have and do hereby protest against the said Joshua Pilcher, Elias Rector, Thomas H. Benton, James McGunnege, Thompson Douglass, Stephen Rector, Thomas Hanly, John Little, Jeremiah Connor, Taylor Berry, and Daniel Bissel, and all others concerned, for all the damages, losses, interests, and costs suffered or to be suffered by the said president and directors of the Bank of St. Louis, the stockholders in the said bank, whether collectively or in their individual capacity, and all others concerned in business with the said bank of whatever nature soever, in consequence of or resulting from the taking possession by the said Joshua Pilcher, Elias Rector, Thomas H. Benton, James McGunnege, Thompson Douglass, Stephen Rector, Thomas Hanly, John Little, Jeremiah Connor, Taylor Berry, and Daniel Bissel of the said Bank of St. Louis and the hanking-house thereof, and the keeping out of the same the said president and directors, and thereby putting a stop to and preventing the carrying on of the business of the same and exposing it to disorder."

Legal proceedings were instituted against those who took forcible possession of the bank, and on February 20th following it was announced that "the banking-house of the Bank of St. Louis having been restored to the possession of the board of directors by the individuals in whose possession it has unlawfully been, the public are hereby notified that the bank will be open for business as usual on Monday, the 23d day of February inst., at ten A.M. By order of the board. S. HAMMOND, *President.*"

On March 3d following the opposition party published the following protest:

"TO THE PUBLIC: Whereas, a notice was given by the president and directors of the Bank of St. Louis to the public that the Bank of St. Louis would open on Monday, the 23d inst., for the transaction of business; and whereas that period has passed without his notification having been complied with, but another advertisement has been published, notifying the public that the Bank of St. Louis would remain closed until the 10th March next, stating among other reasons for such a measure that 'it is believed' (by the president and directors) 'that a combination has been formed for the purpose of embarrassing the proceedings of said bank, which combination still exists,' the undersigned, stockholders in the said bank, being fully satisfied that no such combination has ever existed, and that this is only a pretext of the said president and directors to shield themselves from the imputation such a proceeding was calculated to draw upon them from the public, and also to give an additional coloring to the proceedings of the 11th and 12th inst., and being also convinced that no substantial cause exists

for the adoption of such a measure by the said president and directors, we do therefore most solemnly protest against such a proceeding on the part of the said president and directors as calculated materially to injure the interests of the stockholders in said bank; we do also further protest against the manner in which the business of the said bank is at present conducted, by keeping the doors closed and refusing the payment of their paper, at the same time receiving payments from many individuals who are obliged to enter the hanking-house by a private door for that purpose.

"Stephen Rector, Thompson Douglass, Joshua Pilcher, Elias Rector (agent for William Rector), Thompson Douglass (attorney for Risdon H. Price), J. McGunnege, J. McGunnege (attorney for Daniel Bissel), Taylor Berry, T. H. Benton (for self and Thomas Wright), John Little, Thomas Hanly.

"St. Louis, Feb. 26, 1818."

On March 12, 1818, the board of directors, through S. Hammond, president, issued a notice that "the public mind having become tranquillized, the Bank of St. Louis opened for business on Tuesday last, redeemed its paper in specie, and the public are hereby notified that it will continue to redeem its paper in specie on its presentation."¹

After the disagreement of February, 1818, the bank continued to decline until July, 1819, when it finally collapsed, to the serious disadvantage of its stockholders. On July 12, 1819, the following notice declared the suspension of the first bank established in St. Louis:

"The directors of the Bank of St. Louis, finding that the operation of the bank cannot be continued either with profit to the stockholders or advantage to the community, have determined to suspend the business of the bank. A general meeting of the stockholders has therefore been called to take into consideration the propriety of continuing or closing finally its concerns; and in the mean time, to save the creditors of the bank from losses or unnecessary delay in the liquidation of their demands, the directors have made specific assignments of the effects of the bank, appropriating them so as to discharge the debts due by the bank as promptly as possible.

"The Bank of St. Louis, after a suspension of business for

¹The directors of the Bank of St. Louis prior to the 8th of December, 1817, for that year were Samuel Hammond, Robert Simpson, Thompson Douglass, Justus Post, Thomas Wright, Risdon H. Price, Moses Austin, William Rector, Eli B. Clemson, J. B. N. Smith (cashier), Joshua Pilcher, Samuel Perry, Theodore Hunt, Elias Bates; after Dec. 8, 1817, until Feb. 11, 1818, Samuel Hammond, Justus Post, Joshua Pilcher, Walter Wilkinson, James Mason, Moses Austin, Elias Rector, Eli B. Clemson, Nathaniel B. Tucker, J. B. N. Smith (cashier), J. J. Wilkinson, Robert Collet, Elias Bates, Robert Simpson; after Feb. 11, 1818, to Dec. 14, 1818, Samuel Hammond, Walter Wilkinson, Justus Post, Nathaniel B. Tucker, Eli B. Clemson, Theophilus W. Smith, James Mason, Rufus Easton (two vacancies), J. J. Wilkinson, Stephen F. Austin, Elias Bates, Theophilus W. Smith (cashier); from Dec. 14, 1818, Risdon H. Price (president), Stephen F. Austin, Rufus Easton, Frederick Dent, Jesse G. Lindell, Samuel Hammond, John Nivin, Samuel Perry, John Hall, Robert Simpson, Eli B. Clemson, James Clemens, Jr., Paul Anderson.

about twelve months, resumed operation on the 3d of March last, under the expectation on the part of the directors of being able, if not to continue the operation of the bank successfully, at least to collect the debts due the bank, and pay the claims against it more promptly than while in a state of suspension. The first object of the directors, therefore, was to acquire a fund on which to commence temporarily until the bank could collect the debts due to it.

“By order of the board of directors.

“RISDON H. PRICE, *President.*”

Branch Bank of the United States.—In the year 1829 a branch of the Bank of the United States at Philadelphia, chartered by Congress in 1816, was established in St. Louis with the following officers: John O'Fallon, president, William Clark, Thomas Biddle, Peter Lindell, William H. Ashley, John Mullanphy, George Collier, James Clemens, Jr., Matthew Kerr, Pierre Chouteau, Jr., and Edward Tracy, of St. Louis, Samuel Perry, of Potosi, and Peter Bass, of Boone, directors; Henry S. Coxe, cashier; George K. McGunnege, clerk; and Thomas O. Duncan, teller. John O'Fallon was re-elected in 1830, 1831, 1832, and 1833, and after the latter date we find no account of the institution, which succumbed about that time to the embarrassments growing out of the determined hostility of President Jackson's administration to the parent bank at Philadelphia.

The directors during these years were as follows: 1830, John O'Fallon, William Clark, Thomas Biddle, William H. Ashley, John Mullanphy, George Collier, James Clemens, Jr., Pierre Chouteau, Jr., Edward Tracy, Jesse G. Lindell, John Kerr, Louis Vallé, of Ste. Genevieve, John Bull, of Chariton; 1831, John O'Fallon, John Mullanphy, George Collier, Jesse G. Lindell, Bernard Pratte, John W. Johnson, Thomas Biddle, William H. Ashley, John Kerr, Daniel D. Page, Charles Wahrendorff; 1832, John O'Fallon, John Kerr, Jesse G. Lindell, Daniel D. Page, Bernard Pratte, John W. Johnson, John H. Gay, James Clemens, Jr., Henry Von Phul, Peter Powell, Edward Tracy; 1833, J. O'Fallon, D. D. Page, B. Pratte, Sr., J. H. Gay, J. Clemens, Jr., H. Von Phul, E. Tracy, G. Collier, J. Mullanphy, A. Kerr, A. Gamble. On the 12th of March, John O'Fallon was unanimously re-elected president.

The affairs of the branch bank in St. Louis were conducted with the strictest integrity, and the directors never forfeited the confidence reposed in them by the public.

The Bank of the State of Missouri¹ was chartered in 1837, the act of incorporation being signed February 1st of that year. On that day, in the evening,

the election for president and directors took place, with the following result: John Brady Smith, of St. Louis, president of the parent bank; Hugh O'Neill, Samuel S. Reyburn, Edward Walsh, Edward Dobyns, William L. Sublette, John O'Fallon, directors of the parent board.

Branch at Fayette: J. J. Lowry, president; W. H. Duncan, J. Viley, Wade M. Jackson, James Earckson, directors. On the 20th of February a subscription was opened for the \$50,000 capital stock required to authorize the subscription on the part of the State, and \$108,000 was realized. The capital stock was \$5,000,000, and the State held one-third of the amount. The bank purchased the house of Pierre Chouteau, on Main Street near Vine, shortly afterward, and on April 15th began operations.

In June, 1837, the board of directors was completed by the appointment by Governor Boggs of C. C. Detchemendy, of Ste. Genevieve, and Carty Wells, of Warren, as directors on the part of the State. The organization of the bank was then as follows: President, John Brady Smith; Directors, Hugh O'Neil, Edward Walsh, Samuel S. Reyburn, William L. Sublette, Edward Dobyns, John O'Fallon, D. C. M. Parsons, Thomas West, C. C. Detchemendy, Carty Wells (on the part of the State), George K. McGunnege, Theodore L. McGill (elected by the stockholders); Cashier, Henry Shields.

John Brady Smith was one of the most efficient officers the bank ever had. He remained at its head for many years, and died March 17, 1864.

Mr. Smith accompanied his father to St. Louis at an early period, and was at one time one of the most extensive and liberal merchants in St. Louis. As the first president of the bank, he administered its affairs with safety and liberality during several trying periods of financial disaster. He was collector of the county of St. Louis for several years, and at all times enjoyed the fullest confidence of his fellow-citizens.

On the 31st of July, 1837, the bank began issuing its own paper, the lowest denomination of notes being twenty dollars. In 1839 it suffered a serious loss in the abstraction of one hundred and twenty thousand dollars in foreign coin stored in its vaults, and although an arrest and prosecution followed, and every effort was made to recover the money, it was without result. In 1857 the institution was reorganized under the general law of the State of that year, and with its branches then had a cash capital of three million two hundred thousand dollars. There were eight branches, one at each of the following places: Cape Girardeau, Palmyra, Canton, Fayette, Springfield, Arrow Rock, Louisiana, and Chillicothe.

¹ The old Bank of Missouri was incorporated Feb. 1, 1817, as heretofore stated, but had only a brief existence.

In 1866 the stock held by the State was sold, and the bank was reorganized under the National Banking Act. Its title was changed to "The National Bank of the State of Missouri," the stock of all of the branches was consolidated with that of the parent bank, and the institution began operations as a national bank Nov. 1, 1866. The aggregate capital at the date of this movement was \$3,410,300. Col. James H. Britton, formerly of the Third National Bank of St. Louis, was elected president, Judge Barton Bates vice-president, E. P. Curtis cashier. Under this management the bank purchased all the water loan of five million dollars in 1868. In June, 1876, it having been found that the existing capital was too great to be profitable, it was deemed expedient to reduce it to two million five hundred thousand dollars.

Up to 1877 the National Bank of the State of Missouri was believed to be the strongest, as it was the oldest, institution of its kind in St. Louis. The bank had been uniformly successful and prosperous, its business had been most extended, yet it had always been conducted upon sound banking principles. It had never made money fast, but had paid its semi-annual dividends regularly. Of it it was said at this time, "In the long course of years during which the National Bank of the State of Missouri has been a leader in the banking business of the West, it has maintained its position in public confidence and esteem. It has survived panics and crises without being disturbed, and when banks were tumbling down in ruins on all sides this old and stanch institution stood as solid as a mountain."

Among the early officials of the bank were some of the most prominent men in the State. Its other presidents besides Mr. Smith, before its organization under the National Act, were Ferdinand Kennett, Bernard Pratte, Joseph Charless, Edward Walsh, Robert Campbell, James M. Hughes, and Robert A. Barnes.

Mr. Barnes was born in Washington, D. C., Nov. 29, 1808. His father was Jesse Barnes, of Charles County, Md., whose ancestor emigrated in 1662 from the county of Norfolk, England, to the southern part of Maryland, settling near the site of the present town of Port Tobacco. His mother was Mary Evans, of Prince George County, Md.

When thirteen years old he was placed in charge of an uncle, Richard Barnes, of Louisville, Ky., from whom he obtained his business education. Having determined to make St. Louis his home, he removed thither, arriving on the 17th of May, 1830, and has resided there ever since.

In December, 1840, Mr. Barnes became a director in the Bank of the State of Missouri, and was

continued as such until November, 1866, a period of nearly twenty-six years, during the last eight of which he was its president. In November, 1866, as we have seen, the institution became a national bank, when its management passed into other hands. He was also a director in various other corporations. Mr. Barnes has never had any political aspirations, and has led the quiet life of a private citizen. On the 28th of January, 1845, he married Louise de Mun, third daughter of Jules de Mun and Isabelle Gratiot. There is no living issue of this marriage.

A large proportion of the subordinates of the old Bank of Missouri were in its service for a long term of years. Up to the year 1877 it had had only three cashiers,—Henry Shields, A. S. Robinson, and E. P. Curtis.

Early in 1877 rumors became current to the effect that the bank was embarrassed by reason of shrinkage in the value of its securities. This led to an investigation by the comptroller of the currency, which resulted in an order for the election of a new board of directors. At this election in May, 1877, four new members were chosen, consisting of Hon. John B. Henderson, N. S. Chouteau, Web M. Samuel, and H. S. Mills. At the next meeting of the board after the election it ordered an examination of the affairs of the bank, appointing for that purpose the gentlemen named above in conjunction with J. H. Britton, president, and Barton Bates, vice-president of the bank. The result was a unanimous vote to wind up the business, either by securing the appointment of a receiver, or by placing the bank in voluntary liquidation.

The failure of the bank created the greatest surprise, as there were few persons in the West who doubted its strength and solvency, and so strong was the confidence placed in it that the city and State funds were deposited in it. Its suspension was ascribed to the following causes:

In 1873, when the panic came, the bank found itself in possession of many securities, real and personal, which at the time were fully up to the values for which they were pledged. Subsequently the shrinkage in values was so great that the assets could not be kept up to the standard. This depreciation was all the more severely felt because of the general depression in trade during the previous three years, which had prevented all the banks of the country from making the profits of former years. The bank had a good record as a promoter of public enterprises. It took corporation loans, it aided the building of railroads within the State borders, it subscribed liberally to the stock of the new Merchants' Exchange, and it assisted the tunnel and bridge enterprises and the Eads

jetties. No city or county or State loan was offered in the market but that the bank made bids. At the time of the failure its board of directors was composed of J. H. Britton, president; Barton Bates, vice-president; James B. Eads, John B. Henderson, N. S. Chouteau, J. S. Walsh, C. F. Burns, Web M. Samuel, and H. S. Mills.

The Exchange Bank was chartered in 1856, with a capital of five hundred thousand dollars, and was one of the few institutions of its kind that did not reorganize under the national banking laws. Books for subscriptions to the stock were opened on the 21st of March, 1857, at the office of Bogy, Miltenberger & Co., and the advance notice of the fact was signed by the following corporators and commissioners: Lewis V. Bogy, Andrew Christy, Edward Cabot, Joseph S. Pease, Samuel B. Wiggus, M. L. Jackson, L. Dorsheimer, Bartholomew Rice.

On the 9th of October, 1857, the stockholders elected as directors Lewis V. Bogy, Louis Dorsheimer, Joseph S. Pease, M. W. Warne, E. Schneider, J. W. Spalding, John D. Perry, John T. Douglass, Louis C. Herschberg, A. Berthold, A. M. Waterman, Stephen Hoyt, J. B. Osborn. On the 11th of the same month Lewis V. Bogy was elected president. In 1869 the bank erected a building at 217 North Third Street, and removed from its old location opposite the custom-house. In 1874, Joseph Bogy was elected president. The Exchange Bank, and its New York correspondent, the Chemical Bank, were the only banks which did not suspend specie payment in their circulation. This bank always paid coin in redeeming its bank notes.

The Merchants' National Bank was organized as a State bank in 1857, the notice of the opening of books for subscriptions, issued in March of that year, reading as follows:

"**MERCHANTS' BANK.**—Books for subscription to the capital stock of this bank will be opened on Wednesday, the 18th of March, 1857, at the office of the Millers' and Manufacturers' Insurance Company, on the corner of Main and Pine Streets, and will remain open from 9 o'clock A.M. until 4 o'clock P.M. of each day, until Tuesday, the 31st inst.

"Parties subscribing will be obliged to pay to the committee of corporators ten per cent. in gold and silver coin at the time of subscribing, and the residue at such times as may be required by the directors during the ensuing twelve months.

"**Corporators.**—James E. Yeatman, William G. Clark, Thornton Grimsley, B. M. Runyan, R. M. Parks, William T. Christy, Robert Campbell, John A. Brownlee, John G. McCune, D. A. January, Joseph Charles, William M. Morrison, Henry T. Blow."

In April, 1857, the organization was effected by the election of the following directors: John A. Brownlee, Joseph Charles, William M. Morrison, William L.

Ewing, Thomas T. Day, P. R. McCreery, D. A. January, James E. Yeatman, E. C. Sloan, B. M. Runyan, L. Levering, R. Campbell, J. W. Luke. John A. Brownlee was chosen president, and R. F. Barry cashier. Five months later, on the 1st of September, the bank went into operation. On April 23, 1861, the directors passed a resolution tendering to the State authorities a loan, for the purpose of enabling the State to take measures for a more efficient organization of the militia and to provide arms for defense.

On July 31, 1863, Robert K. Woods was elected cashier to succeed R. F. Barry, resigned.

In 1865 the institution was reorganized under the national banking law as a national bank. W. L. Ewing was elected president, and James E. Yeatman cashier. The presidents since the reorganization have been as follows: W. L. Ewing, elected in 1865 and served until 1866, when he was succeeded by Robert Campbell, who served one year, when Mr. Ewing was again elected and served for a similar term, being succeeded by George L. Stansbury in 1869. Mr. Stansbury served until 1872, when he retired and C. B. Parsons was chosen in his place. In 1874, James E. Yeatman was elected president, and still retains the position. The cashiers have been James E. Yeatman, elected in 1865 and served until 1874; Robert Eagle, elected in 1874 and served until 1878; James C. Moore, the present incumbent, chosen in 1878. The bank is now located on the corner of Locust and Third Streets. The present capital stock is \$700,000; surplus and dividend profits, \$157,254.

The present officers are James E. Yeatman, president; L. Levering, vice-president; James C. Moore, cashier; Directors, James E. Yeatman, A. F. Shapleigh, E. C. Sterling, L. Levering, J. L. Sloss, Thomas Rankin, Jr., John O'Fallon, David Rankin, H. T. Simon, E. A. Hitchcock, John A. Walsh, and H. L. Newman.

The Bank of Commerce was organized March 28, 1857, by John F. Darby, Lawrason Riggs, Carlos S. Greeley, Felix Coste, Marshall Brotherton, Henry Hassinger, and William H. Maurice. It was incorporated under an act of the General Assembly of Missouri as a State bank, Feb. 14, 1857, the incorporators being Asa Wilgus, A. P. Ladew, George M. Moore, W. H. Morris, Clark J. Morton, William Hassinger, John F. Darby, and Josiah G. McClellan. The bank was opened for business July 6, 1857, having for its board of officers Marshall Brotherton, president; R. M. Funkhouser, vice-president; and A. P. Ladew, secretary and treasurer. The different presidents of the bank were elected in the following order: Marshall Brotherton, elected March 28, 1857;

Felix Coste, elected Nov. 11, 1857; Henry J. Reed, elected Jan. 14, 1874; and C. B. Burnham, elected Jan. 13, 1875. Mr. Burnham still retains the position. The bank was originally located at No. 202 North Second Street, and was removed in 1872 to the corner of Fourth and Olive Streets. The institution was organized originally as a building and savings association, under the title of the "St. Louis Building and Savings Association," with an authorized capital of \$500,000, and a liberal charter, which also gave it banking privileges. On Jan. 1, 1869, the name was changed to that of the "Bank of Commerce." The original capital was paid in at the rate of \$2.50 per month per share, and at the end of the first six months amounted to \$15,105.50 in cash. On Jan. 1, 1864, the capital was \$200,000, which was afterwards increased to \$300,000 on July 1, 1864. In 1866 the stockholders voted to discontinue the payment of dividends and allow the profits to remain in the reserve fund of the association for five years, and in 1871 again voted to continue the non-dividend policy indefinitely. On July 1, 1878, the payment of dividends was, at the request of the stockholders, resumed; the accumulated earnings to the credit of the reserve fund at that date amounted to \$775,000, which with the capital of \$300,000 gave the bank \$1,075,000 of its own funds in the business.

On July 1, 1882, the reserve fund amounted to \$900,000, and the bank sold the remaining two thousand shares of stock to its shareholders at \$100 per share, making its capital stock July 1, 1882, \$500,000, and the reserve fund \$1,500,000, being a total capital of \$2,000,000.

The present officers are C. B. Burnham, president; Nathan Cole, vice-president; and J. C. Van Blarcom, cashier. The directors are James W. Bell, C. B. Burnham, G. W. Chadbourne, Nathan Cole, Samuel M. Dodd, George J. Plant, W. H. Pulsifer, W. H. Thompson, and John Whittaker.

The **Mechanics' Bank of St. Louis** was incorporated under the general laws of Missouri in 1857, and in March of that year notice was given that on Thursday, March 19, 1857, books for the subscription to the capital stock would be opened at the room of the Mechanics' and Manufacturers' Exchange, on Chestnut Street, between Third and Fourth Streets, and would remain open from nine in the morning until three o'clock in the afternoon of each day until Monday, the 30th day of March.

The notice was signed by Charles H. Peck, B. W. Alexander, Bernard Bryan, John C. Evans, N. M. Ludlow, D. K. Ferguson, J. W. Thornburgh, S. C. Hunt, L. D. Baker, R. M. Parks, Oliver A. Hart,

John Evill, William S. Cuddy, G. I. Barnett, John M. Wimer, incorporators.

The bank was opened for business in November, 1857, being then located on the corner of Third and Chestnut Streets. Joseph Charless was elected the first president in 1857, and his successors in order were J. W. Wills, Oliver Garrison, and D. K. Ferguson. The first cashier was J. W. Wills, his successors being Charles Everts, George T. Hulse, and R. R. Hutchinson, the present incumbent.

The institution has always transacted business under a charter from the State of Missouri. This bank is now located on the corner of Second and Pine Streets.

The last annual statement of Dec. 15, 1882, makes the following exhibit:

<i>Resources.</i>	
Loans and discounts.....	\$1,891,603.85
Real estate.....	9,513.29
Sight exchange.....	360,074.74
Cash.....	621,560.17
	\$2,882,752.05
<i>Liabilities.</i>	
Capital stock.....	\$600,000.00
Undivided earnings.....	129,871.39
Unclaimed dividends.....	1,971.00
Deposits { Individual, \$1,955,425.33 } ..	2,150,909.66
{ Banks, 195,484.33 } ..	
	\$2,882,752.05

The officers during 1882 were D. K. Ferguson, president; J. W. Branch, vice-president; R. R. Hutchinson, cashier; Directors, Oliver Garrison, R. M. Parks, John G. Wells, E. N. Leeds, D. R. Garrison, R. Sellew, D. K. Ferguson, Joseph W. Branch, John N. Booth, R. B. Whitmore, Benj. B. Graham, and W. L. Wickham.

Joseph Charless was born in Lexington, Ky., Jan. 17, 1804. His father, Joseph Charless, was a native of Westmeath, Ireland, where he was born July 16, 1772. The family was originally of Wales, from which principality John Charles emigrated to Ireland in 1663. Joseph Charles the elder was implicated, with Emmet, Lord Edward Fitzgerald, and other noble spirits, in the Irish rebellion of 1795, upon the failure of which he fled to France, whence he soon emigrated to the United States, landing in New York in 1796. To maintain the familiar European dissyllabic pronunciation of his name he added a final s to its spelling, and thus Charles became Charless.

Joseph Charless the elder was a printer by trade, made his home in Philadelphia, and found employment with Matthew Carey, the publisher, himself an Irish patriot and refugee, a man of warm heart and generous impulses, a creator of public opinion, a friend

OF THE
UNIVERSITY OF ILLINOIS.

of Franklin, Lafayette, Washington, and Henry Clay, and a hater of everything English, from William Cobbett to Manchester cottons. Carey was a great favorer of "the American system" of protection to American industries (he was the father of Henry C. Carey), and it was probably through his acquaintance with Clay that the senior Charless was induced to remove to Kentucky. In 1798 he had married Mrs. Sarah McCloud, a widow with one child,—her maiden name being Jordan, born Jan. 28, 1771, at Wilmington, Del. He moved to Lexington in 1800, and to Louisville in 1806, coming finally to St. Louis in 1808, where he founded the *Missouri Gazette*, the first newspaper published in St. Louis and west of the Mississippi, a journal which still flourishes in vigorous usefulness and widespread influence as the *Republican* of St. Louis.

Joseph Charless the elder was a man full of all good qualities, honored and respected by all who knew him; simple in manner and habit, an impulsive, warm-hearted, generous Irish gentleman, hospitable to a degree, and brimful of cheery humor. He lived to be sixty-two years old, while his widow died at the age of eighty-one, outliving all her children but one, Joseph, the subject of this sketch, and all her grandchildren except two.

Joseph Charless the second, the fourth child of his parents, was very early put to "the case" and taught the rudiments of the printer's trade in his father's office. Then, an academy having been started in St. Louis, he was sent there to complete his education; began the study of law under Francis Spalding, a leading member of the bar of St. Louis, and finished his studies in the law school of Transylvania University, Lexington, Ky.

A profession, however, was not to his taste, and his father having sold out his interest in the *Missouri Gazette* and gone into the wholesale drug business, Joseph became his partner in 1828, and from that time was a prominent man among the merchants of St. Louis. Joseph Charless, Sr., died in 1834, his son persuading him on his death-bed to alter his will and make an equal partition of the estate, which he intended bequeathing all to his favorite son, Joseph. This act was characteristic of the whole life of Mr. Charless, in whom the spirit of justice was instinctive. The tender and beautiful little "Memorial" of his domestic life, prepared for her grandchildren by his widow, unconsciously reflects this trait in his character on every page. This venerable lady, still surviving, is Charlotte, daughter of Capt. Peter Blow, a veteran of the war of 1812. Her mother was formerly a Miss Taylor, and both her parents were Virginians of the

old stock. They had emigrated from Virginia, and, after farming in Alabama and elsewhere, came to St. Louis in May, 1830. Miss Blow became the wife of Joseph Charless, Nov. 8, 1831.

Joseph Charless was closely attentive to business all his life, not content merely to maintain his house at a paying level, but striving always to extend its connections and *clientèle*, and increase the number and scope of its operations, going from jobbing to importing, and from importing to manufacturing. But he was a public man at the same time in the truest sense, not as a politician and office-holder, but as a representative and promoter of public business interests. He had little to do with politics, though always an earnest Old-Line Whig; but he took a leading part in municipal councils, just as he made himself prominent in church and Sunday-school,—he was a Presbyterian and an elder,—as a matter of public duty; he took his place in the board of aldermen, among the directors of the public schools, and was a railroad director and bank president. The State appointed him president of the Bank of the State of Missouri, and he was president of the Mechanics' Bank, and director of the Pacific Railroad at the time of his sudden death, besides being one of the most active men in the city in encouraging the founding of the City University. Mr. Charless was loved and cherished by a very large circle of business friends, acquired in the domestic sphere in which he shone, in the church, the school board, the bank, and the business connections of the extensive house of Charless, Blow & Co., of which he was the head. His personal integrity and worth, his high business standing, his skill and probity in all sorts of affairs earned him the respect and confidence of the entire community; they looked to him as a leader, and he never hesitated to take the lead in every creditable and honorable enterprise for advancing the interests of St. Louis. He contributed his money freely to all these, and he was quick to see the advantages of every solid scheme of public improvement. He gave liberally and wisely in benevolence; in charity, in ministering to the sick, the suffering, and the needy his purse was always open, and his personal services always employed.

Mr. Charless was a man of deep, unaffected piety in all the walks of life, a consistent and active Christian at church, at home, in society, and business alike. His conformity was steadfast and consistent, without making him strait-laced or austere. His manners were gentle, polite, and all that the winning benevolence and generous nobility of his face and bearing promised; he was kindness and courtesy personified, and he had no enemies. He never made

any enemies except one, the man whose dastard malignity turned him into an assassin. This man, Joseph W. Thornton, was hanged Nov. 11, 1859, and Joseph Charless forgave his deed, though his fellow-citizens and the law could not do so. Thornton had been defendant in a criminal action, in which it became Mr. Charless' duty to bear witness against him. Charless told only what he knew, what the law compelled him to reveal, and it must have been an ungrateful task to a man of his gentle disposition; but Thornton never forgave him, always declaring that Charless' testimony had ruined his prospects and deprived him of his livelihood, which indeed was the consequence of his own act, not what Charless bore witness to. He brooded over it, and at last waylaid him on June 3, 1859, and fired two shots at him. This was on Market Street, between Third and Fourth Streets. The first shot prostrated the victim, and as he fell the assassin fired another shot at him, all without a word of warning. Such a feeling of intense indignation was aroused at this wretched deed that the military had to be called out to preserve order and save Thornton from lynching. Mr. Charless died, after twenty-four hours' great suffering, with the peace and composure of the Christian always ready for any summons, no matter how sudden.

The painful tragedy of Mr. Charless' death and the great love and esteem in which he was held by all his fellow-citizens led to a more than usually solemn and imposing funeral. An immense concourse of people was present in and around the Second Presbyterian Church, in which he had worshiped, and all there were mourners and filled with feelings of profound sympathy for his bereaved family. The pall-bearers, headed by John O'Fallon, consisted of James H. Lucas, Edward Bates, H. R. Gamble, Robert Campbell, John Simonds, Wm. W. Greene, Thornton Grimsley, Geo. K. McGunnegle, Edward Walsh, N. Paschall, Charles Keemle, B. F. Edwards, Wm. Nisbet, I. W. Willis, and Chas. S. Rannels. The banks, churches, railroad companies, and all the other financial, benevolent, and religious associations with which Mr. Charless had so long and intimately been connected passed resolutions of condolence and sympathy, and the whole community, roused to its depths by such a sad and untimely taking off, did not stint to express its consciousness of the great loss it had sustained in the death of so honored, trusted, and useful a citizen.

The **St. Louis National Bank** was established in the spring of 1857, under the name of the Bank of St. Louis. The original notice of the opening of the subscription books read as follows:

"Notice is hereby given that on Wednesday, the 18th day of March, 1857, we will open books for the subscription to the capital stock of the Bank of St. Louis, at the office of John J. Anderson & Co., corner of Main and Olive Streets, in the city of St. Louis, and they will remain open from nine in the morning until three o'clock in the afternoon of each day until Saturday, the 26th day of March.

"All persons subscribing will be required to pay ten per cent. in gold and silver, and the balance at such time and in such amounts as may be required by the directors; it being provided, however, according to the charter, that the whole amount shall be paid within one year from the date of subscription.

"*Corporators.*—John J. Anderson, John G. Priest, George Knapp, A. P. Ladew, D. S. Senter, Madison Miller, Joseph Widen, Stephen Haskel, James Harrison, Taylor Blow.

"*Sr. Louis, March 3, 1857.*"

The original directors were John Simonds, A. G. Switzer, Frederick Meyer, George B. Sanderson, George S. McClure, Henry T. Mudd, George R. Robinson, Morris Collins, William Lucas, L. M. Kennett, J. B. S. Lemoine, S. B. Wiggins, T. A. Buckland. John J. Anderson was elected president, and John Brown cashier. The bank began operations Dec. 15, 1857.

Towards the close of 1860, R. P. Hanenkamp, afterwards city comptroller of St. Louis, was elected president, and held the position for three years, at the end of which William E. Burr was chosen his successor. Mr. Burr has continued in the management of the bank ever since.

In 1865 the institution was changed to a national bank, and became known as the St. Louis National Bank. Its incorporators as a national bank were William E. Burr, James H. Wear, R. P. Hanenkamp, John F. Tolle, Benjamin Stickney, Thomas Ferguson, Joseph Garneau, and N. Schaeffer. The officers at this time were William E. Burr, president; James H. Wear, Benjamin Stickney, Thomas Ferguson, R. P. Hanenkamp, Joseph Garneau, William Ballentine, N. Schaeffer, John F. Tolle, directors; and Louis C. Billon, cashier.

The bank, as originally operated, was located on Chestnut Street, between Main and Second Streets, and was well patronized from the beginning. When changed to the St. Louis National Bank in 1865 it was removed to the building on Olive Street, opposite the post-office. Having sold that building, it moved in 1875 to its present commodious quarters in the Chamber of Commerce building. The government funds collected in the city and in a large extent of surrounding country are all deposited in this bank, together with all the collections of the internal revenue office, as well as those of the post-office and the bankrupt courts.

The annual statement of the bank, Dec. 31, 1881, showed its resources to be \$3,143,876.82; capital

stock paid in, \$500,000; surplus fund, \$56,335.44; undivided profits, \$36,902.80; deposits, \$581,305.39; United States deposits, \$110,913.63.

The officers for 1882 were William E. Burr, president; J. G. Chapman, Nathan Cole, S. H. Lafin, H. McKittrick, F. Mitchell, James M. Nelson, S. A. Bemis, James H. Wear, directors; and John Nickerson, cashier.

The First National Bank of St. Louis was organized in October, 1863, and began operations on the 10th of that month in its new building at the junction of Fifth Street and Carondelet Avenue, with the following officers: President, F. W. Cronenbold; Vice-President, Christian Staehlin; Cashier, Peter Weiss; Directors, F. W. Cronenbold, Christian Staehlin, James Harrison, Bernhard Heidacker, Henry Kalbfleisch, William Lemp, Francis A. Lorenz, George Gehrke, and Henry Steinmeyer. The amount of stock subscribed at this time was over one hundred thousand dollars. In 1871 some of the officers became involved and the bank changed its name to the Empire Bank. Mr. Kalbfleisch was elected president. It continued under the same directors until 1876, when the business was turned over to the Lafayette Bank. A handsome building was erected at the junction of Fifth and Merchant Streets for the First National Bank.

The Lafayette Bank was organized in 1876, with a paid in capital of one hundred thousand dollars. The incorporators were F. Arendes, H. Ziegenhein, Charles B. Stuever, William Hahn, and Philip W. Schneider. F. Arendes was the first president, H. Ziegenhein vice-president, and F. Lesser cashier. The first directors were the incorporators. The original location was the corner of Carroll Street and Carondelet Avenue. From here it was removed to its present location, at the junction of Fifth and Merchant Streets. The present officers are F. Arendes, president; H. Ziegenhein, vice-president; and P. J. Doerr, cashier; Directors, F. Arendes, H. Ziegenhein, Charles B. Stuever, W. Hahn, and Philip W. Schneider.

The Second National Bank was organized in December, 1863, with a capital of \$200,000, with the privilege of increasing it to \$1,000,000. The first board of directors was composed of T. B. Edgar, George H. Rea, S. Rich, George P. Plant, Morris Taussig, J. O. Pierce, E. O. Stanard, Charles Holmes, and Wm. Smith. T. B. Edgar was chosen president, and E. D. Jones, of the Exchange Bank, cashier. The bank began business in January, 1864. It immediately became conspicuous in its services in placing the popular loans of 7-30's, 5-20's, and 10-40's, and handled

a larger amount of these securities than any other bank in St. Louis. The bank declared its first dividend May, 1864, and in July, 1868, gave to its stockholders a fifty per cent. dividend in stock, making the capital \$300,000.

During a period of ten years its dividends amounted in the aggregate to \$370,175, ranging from five to six per cent. semi-annually, up to July, 1873, at which time it suspended the payment of dividends, preferring to let the accumulations remain for the benefit of increasing business.

The Third National Bank of St. Louis was originally chartered by the General Assembly of Missouri for 1856-57 as the Southern Bank of St. Louis, with a capital of \$1,000,000. The incorporators were James S. Watson, James H. Britton, Abner Hood, Wm. J. McElhinney, and Wm. T. Wood. On the 6th of April, 1857, the following persons were elected directors:

Robert M. Funkhouser, John J. Roe, Samuel K. Wilson, Abner Hood, E. B. Kimball, Charles Miller, Wm. H. Barksdale, John J. Mudd, E. F. Pittman, John R. Lionberger, Wm. J. McElhinney, James S. Watson, James H. Britton. This board subsequently elected as officers James S. Watson, president; James H. Britton, cashier; George O. Atherton, teller; B. W. Dudley, general book-keeper; Thomas A. Stodart, individual book-keeper.

The bank began operations June 16, 1857, on Pine Street, near Main, with \$110,600 of paid in stock. In February, 1859, President Watson died, and on March 14th following, E. B. Kimball was elected his successor.

James S. Watson was born at Jackson, Tenn., Sept. 17, 1815. Of his early career little is recorded. He is understood to have lived some years in Kentucky; and about 1839 removed to St. Louis, where he was employed for some time as clerk. He then went to St. Charles, Mo., where he was similarly occupied, and where, March 25, 1841, he was married to Miss Alby A. Easton. In November, 1842, he was elected chief clerk of the lower house of the Legislature. Under the firm-name of Watson & Yosti, he for some time transacted business at Boonville, Mo., where he made an excellent record as an honorable and successful business man. In December, 1849, he entered into partnership in the wholesale boot and shoe business with Thomas E. Tutt at St. Louis. This partnership continued five years, the firm transacting a large and profitable business.

Mr. Watson was one of the passengers on the train that met with the fearful casualty at the Gasconade bridge, whereby many persons lost their lives, and he

was so badly injured that his life was despaired of. Having a fine constitution he rallied sufficiently to be able to engage in business again, but, while traveling eastward and when near Philadelphia, he was again almost killed by a collision. For the second time he apparently recovered, and resumed business with his usual energy and perseverance, but he never fully regained his strength, and his death, which occurred at New Orleans, Feb. 25, 1859, was doubtless hastened by the injuries which he sustained in these two accidents.

Mr. Watson's business career in Missouri appears to have been uniformly successful, and in St. Louis he was a leader in whatever he undertook. He was public-spirited, and took a deep interest in politics. His sympathies were with the Democratic party, and he enjoyed the friendship and confidence of its leading men in Missouri and the West. He had great faith in the future of St. Louis, and erected the first dwelling south of Lafayette Park.

There are not many of Mr. Watson's contemporaries living, but those who remain testify most cheerfully to his many noble traits. He was a true friend, an obliging neighbor, an accurate business man, a kind husband, and an affectionate father.

Mr. Watson was a brother-in-law of Hon. Thomas L. Anderson, Samuel L. South, Archibald Gamble, and Gen. L. C. Easton, gentlemen of character and prominence then and for many years subsequently. At his death he left a wife and two children.

On the 2d of January, 1864, the Southern Bank having been changed into a national bank, with a cash capital of one million dollars, was reorganized, and began operations as the Third National Bank of St. Louis.

The directory under the reorganization consisted of E. B. Kimball, president; James H. Britton, cashier; and E. B. Kimball, Charles K. Dickson, John R. Lionberger, James B. Eads, William N. Switzer, Eugene Jaccard, Samuel R. Filley, John Jackson, and James H. Britton, directors.

On March 14, 1864, Mr. Kimball resigned the presidency, and James H. Britton was elected his successor. On the same day Thomas A. Stoddart was elected cashier. Mr. Britton served as president until Nov. 1, 1866, when he resigned to accept the presidency of the National Bank of the State of Missouri. John R. Lionberger, his successor, resigned Nov. 8, 1876, and was succeeded by Thomas E. Tutt, the present chief executive of the bank.

The bank was removed from its original location on Pine Street to Second Street near Pine, and on Nov. 25, 1874, occupied its new building, No. 417 Olive Street, where it still remains. This building is six stories in height, with a stone front, and basement and first floors fire-proof.

During its existence this bank has paid to shareholders

in dividends \$1,902,540, of which \$1,512,400 was declared and paid in its character of the Third National Bank.

The present officers are Thomas E. Tutt, president; John R. Lionberger, vice-president; T. A. Stoddart, cashier; Directors, John Jackson, Oliver B. Filley, John R. Lionberger, Thomas E. Tutt, Leonard Matthews, James W. Paramore, W. T. Wilkins, J. S. Walsh, J. M. Franciscus.

The Fourth National Bank of St. Louis was organized Feb. 1, 1864. It was chartered Feb. 26, 1864, under the general National Bank Act, and was

JAMES S. WATSON.

first opened for business on March 22, 1864, with a capital stock paid in of \$500,000. The incorporators were John C. H. D. Block, Joseph J. Mersman, C. L. Holthaus, John C. Nulsen, F. E. Schmieding, Francis Cornett, John H. Kaiser, Arnold Hussmann, C. L. Buschmann, and Christian Peper. The first board of officers was composed of Joseph J. Mersman, president; John C. H. D. Block, vice-president; and Frederick W. Biebinger, cashier, the last of whom still holds the position. In 1866, John C. H. D. Block succeeded to the presidency of the bank, and has retained it ever since. When the bank was first organized it was located on the northwest corner of Third and Washington Streets, where it remained until it was removed to the present location on the northeast corner of Fourth and Washington Streets. It has a capital paid in of \$500,000; surplus fund, \$200,000; contingent fund, \$41,969.21; and undivided profits of \$91,607.41. The assets, consisting of United States bonds, Missouri State bonds, real estate, and other good securities, amount to \$4,693,013.91.

The present board of officers is composed of John C. H. D. Block, president; A. Hussmann, vice-president; and F. W. Biebinger, cashier. The directors are John C. H. D. Block, F. E. Schmieding, Francis Cornett, John H. Kaiser, Arnold Hussmann, C. L. Buschmann, Christian Peper, Henry Grove, and Louis J. Holthaus.

The Fifth National Bank was first organized in 1860 under the name of the Tenth Ward Savings Association. The incorporators and first directors were Henry Overstolz, Thomas L. Sturgeon, Philip Stremmel, Gustavus Hoffman, Thomas M. Speer, James Stoltebinn, John H. Marquard, Nicholas Hatch, and N. F. W. Brentzen. The bank was first located on Broadway and Exchange Street. In 1881 it was again incorporated under the name of the Tenth Ward Savings-Bank, the directors being Louis Espenschied, James Green, John H. Marquard, Albert Schroder, Theodore Koch, Henry Overstolz, and C. C. Crecelius. Henry Overstolz was the first president, and Theodore Koch was the first cashier. In January, 1883, it was organized under the National Banking Act as the Fifth National Bank, and on January 10th opened for business on the northeast corner of Fifth Street and Christy Avenue. Henry Overstolz was chosen president, Louis Espenschied vice-president, and C. C. Crecelius cashier. The present directors are Henry Overstolz, James Green, Louis Espenschied, Otto D. Amour, Conrad Stauff, Charles Wunderlich, and G. A. Rubelmann. The capital stock is two hundred thousand dollars.

The bank is one of the most flourishing of the

financial institutions of St. Louis, and much of its success is due to the energy, sound judgment, and business tact of its chief executive, Hon. Henry Overstolz, who has long been prominent among the business men of St. Louis for the rare combination of enterprise, sagacity, and prudence which he brings to the administration of affairs whether public or private.

The Continental Bank of St. Louis was chartered as the National Loan Bank of St. Louis in February, 1865, and was organized and went into operation as such in March, 1866. The incorporators were Thomas O'Reilly, William McKee, Chauncey I. Filley, and Stephen Ridgely. The institution was for several years conducted as the "National Loan Bank," but its name was changed to that of the Continental Bank, under which name it now transacts a general banking business. The capital stock is one hundred thousand dollars; surplus, fifty thousand dollars. The first president was T. B. Edgar, who was succeeded by George A. Baker, the present incumbent. W. H. Maurice was first chosen cashier in 1866, and was succeeded by E. Karst, who held the position for a term of years, and was followed by W. P. Keating, who still retains the position. The bank is located at No. 411 North Third Street. The officers for 1882 were George A. Baker, president; J. M. Thompson, vice-president; W. P. Keating, cashier; Directors, H. A. Crawford, C. W. Rogers, E. C. Meacham, Oscar Bradford, J. A. Bartlett, I. G. Baker, C. S. Freeborn, J. W. Larimore, and G. W. Parker.

The International Bank of St. Louis is a State bank, and was chartered Feb. 28, 1865, the incorporators being Isidor Bush, F. S. Behrens, William C. Lange, August Lisse, C. T. Uhlmann. It was first opened for business Nov. 12, 1866, with a capital of one hundred and fifty thousand dollars, at 226 Market Street, and was subsequently removed to its present location, southeast corner Fifth and Market Streets. The resources of the bank, according to a statement made Dec. 31, 1881, were \$517,542.07; capital stock paid in, \$100,000; surplus funds on hand, \$1358.93; deposits, \$395,212.44. The first president was William C. Lange, who has served ever since. The directory for 1882 consisted of William C. Lange, president; and Louis Gottschalk, Hugo Krebs, P. A. Schroth, G. J. Helmerichs, William C. Lange, John P. Heinrich, C. F. Hermann, August Lisse, A. W. Straub, directors; John P. Heinrich, secretary.

The Commercial Bank of St. Louis was incorporated under the general corporation laws of Missouri, March 19, 1866, and the bank was opened for busi-

ness during the same month. The incorporators were Edward M. Samuel, William J. Lewis, John M. Platt, John F. Baker, Isaac S. Warren, J. A. J. Aderton, George W. Rucker, James Richardson, and Charles W. Keiser. The first officers were Edward M. Samuel, president; John M. Platt, vice-president; and J. W. Donaldson, assistant cashier. Mr. Samuel continued to act as president of the bank until his death, Sept. 22, 1869, when he was succeeded by William J. Lewis, who was followed by William Nichols, the present incumbent.

Edward Madison Samuel belonged to a family of Welsh and English descent, the Welsh branch of which settled in Virginia about the year 1700. From thence they emigrated westward, and Edward M. Samuel was born in Henry County, Ky., Oct. 12, 1807. In 1815 the family moved to Missouri, where the father became quite prominent, serving for many years as the county clerk of Randolph County. When about eighteen young Samuel was placed in business in Old Franklin, Clay Co., and in 1829 removed to Liberty, Clay Co., where he engaged in mercantile pursuits for nearly twenty-five years, and where he lived for nearly forty years. He soon became one of the leading business men of Northwest Missouri, and established a reputation for integrity and ability that was recognized throughout the State.

In 1829, Mr. Samuel was appointed receiver of public moneys at the land office at Plattsburgh, a position which entailed peculiar responsibilities. The "Platte purchase" was included in the district, having then recently become subject to pre-emption and settlement. But before the survey had been made settlers had flocked in, improvements had been made, and the result was an immense number of conflicting claims, which it was the province of the register and receiver to adjust. As a member of this court, Mr. Samuel distinguished himself as a clear-headed business man as well as an able and impartial judge.

In June, 1853, he was appointed a justice of the Clay County court, and served as such for somewhat over a year. In this important position his financial and administrative talents were conspicuously demonstrated.

In 1857, upon the organization of the Liberty Branch of the Farmers' Bank of Missouri, he was elected its first president, and was continuously re-elected until his removal to St. Louis in 1865.

On settling in the metropolis he established the commission house of E. M. Samuel & Sons, his sons entering the house with him. Soon after he interested himself in the organization of the Commercial Bank of St.

Louis, and, as we have before stated, became its first president, retaining that position until his death. As a business man he enjoyed to an unusual degree the confidence and respect of his associates, and came to be regarded as a public-spirited and useful citizen. Although of delicate health, he was a man of great mental activity and endurance, and filled a large space in the community. During his long residence in Clay County he contributed largely to every public and religious movement. His gifts were marked by a large-minded catholicity. Thus, while for many years a devoted member of the Presbyterian Church, some of his largest contributions were in behalf of William Jewell College, a Baptist institution. His own lack of adequate school privileges when a boy made him regard education with peculiar favor, and he was a generous and steadfast friend of all worthy enterprises in this direction. He was also an earnest and judicious adviser of young men, and there are many yet living who remember with gratitude his encouraging and kindly counsel. Extensive and varied reading enabled him to supply the education he was unable to obtain when a boy, and he was a well-informed man on matters of general information, while few were better instructed on economical and political questions. Practice made him a clear and logical speaker and writer, and he was a frequent contributor to the public journals, his communications often giving a decided impulse to popular thought.

In politics Mr. Samuel was an earnest Whig. He enjoyed the acquaintance of Henry Clay, and corresponded with both Clay and Webster for many years. He was also the personal friend of many of the great men of his period, especially those who represented Missouri in the national councils. He was twice nominated by his party for Congress, but, although his canvass was spirited and able, it was impossible to overcome the adverse majority.

In social life and in his family, Mr. Samuel's warm-hearted and genial nature shone with peculiar lustre. His domestic relations were particularly happy, and by the community at Liberty, where he so long lived, he was regarded with the highest respect and affection as a citizen above reproach. He was twice married, and two daughters and three sons survive him. The latter succeeded to his large and profitable business, and constitute one of the best known of the commission houses of the present day.

The Commercial Bank has a capital of \$200,000, and a surplus fund amounting to \$293,592.92. The bank was located originally at the corner of Second and Olive Streets, but subsequently removed to 217 Olive Street. Its present quarters are situated in the

Chamber of Commerce building, and the officers in 1882 were W. Nichols, president; Erastus Wells, vice-president; E. C. Breck, cashier; and William Nichols, Erastus Wells, E. C. Breck, Isaac M. Warren, B. W. Lewis, M. M. Buck, Miles Sells, William Spear, Thomas Howard, John M. Gilkerson, A. A. Talmage, W. M. Samuel, and John H. Maxon, directors.

The Franklin Bank was chartered in 1867, under the laws of Missouri, as the Franklin Avenue German Savings Institution, with a paid up capital of sixty thousand dollars. The incorporators were John H. Conrades, James H. Forbes, F. H. Krenning, J. G. Kaiser, Henry Meier, Adolph Moll, H. Mohriman, H. S. Platt, F. W. Reipschlaeger, E. F. Rethwilm, Ad. Wippern, and J. B. Woestman. The bank began business in 1867, and until Jan. 1, 1882, was conducted as the Franklin Avenue German Savings Institution. Then the title was changed to that of the Franklin Bank, and the institution was removed to the present location, at the southeast corner of Fourth and Morgan Streets, the directors having purchased the bank building of the late North St. Louis Savings Association. The capital and surplus of the Franklin Bank at present is three hundred thousand dollars. The bank is under the same management as when originally organized, having for its chief executive officer H. Meier, with Ad. Wippern as vice-president, and G. W. Garrels as cashier. The present board of directors is composed of James H. Forbes, F. H. Krenning, Henry Meier, Adolph Moll, H. S. Platt, F. W. Reipschlaeger, Ad. Wippern, and J. B. Woestman.

The Laclede Bank was established in 1867 by Bartholow, Lewis & Co., and was operated as a private bank until 1872, when it was incorporated as the Laclede Bank by Thomas J. Bartholow, Benjamin W. Lewis, Jr., W. H. Chick, James A. Jackson, Theodore D. Meier, William J. Lewis, P. B. Leech, Carlos S. Greeley, Edward Fenton, Joseph P. Card, and George M. Edgerton. Thomas J. Bartholow was the first president, and Francis T. Iglehart cashier. The bank was originally located at Third and Locust Streets, but subsequently removed to 217 North Third Street, and on the 27th of February, 1883, to its present location at the corner of Third and Pine Streets. The original chartered capital of the bank was two hundred thousand dollars, but upon the reorganization of the institution, in November, 1882, it was increased to five hundred thousand dollars. The officers for 1883 are John D. Perry, president; James A. Gregory, vice-president; H. B. Schuler, cashier; and the following directors: John

D. Perry, James A. Gregory, H. B. Schuler, Theodore Meier, William McMillan, L. C. Nelson, D. C. Grier, James W. Lewis, Turner T. Lewis, Howard Blossom, Charles Filley, D. R. Francis, and W. S. Hume.

The State Savings Association is one of the prominent financial institutions of St. Louis, and may justly rank as one of the strongest and most prudently managed banks in the country. It was organized under an act of the Legislature of Missouri, on the 29th of December, 1855. While the charter was granted for a savings-bank, yet it has never been in any respect a savings association, but has always done a regular commercial business as a bank of discount and deposit. The incorporators were John How, R. M. Henning, Eugene Miltenberger, Isaac Rosenfeld, Jr., Lewis V. Bogy, Neree Vallé, William L. Ewing, R. J. Lockwood, and B. W. Hill. The bank went into active operation immediately after its organization, and was located at first at the corner of Vine and Main Streets, where it remained until 1876, when it was removed to its present quarters at the corner of Vine and Third Streets. The first president of the institution was R. M. Henning, and his successors were John How, John J. Roe, and Charles Parsons, the present incumbent. The first cashier was Isaac Rosenfeld, Jr., who was succeeded by Charles Parsons, who was followed by J. H. McCluney, the present cashier. The capital stock of the institution is six hundred and fifty thousand dollars, and a surplus has been accumulated, after making regular and liberal dividends since its organization, which now amounts to over seven hundred and fifty thousand dollars. The officers during 1882 were Charles Parsons, president; William H. Scudder, vice-president; and John H. McCluney, cashier. Directors, Charles Parsons, John A. Scudder, Daniel Catlin, A. F. Shapleigh, C. C. Moffitt, Joseph Franklin, and John T. Davis.¹

¹ In 1859 there was inaugurated a war on the part of the State Bank of Missouri against the currency of neighboring States, which, being less easy to be presented for redemption, usurped the purposes of circulation and prevented the Bank of Missouri from getting its former advantage in this respect. A law was passed to prevent any chartered banking institution from carrying on the business of receiving and paying out foreign currency. In consequence of this the State Savings Institution gave up its charter, and the stockholders associated themselves as joint partners, and so continued doing business until Jan. 26, 1864, when a new charter was obtained, with all the privileges denied by the former Legislature, under which charter the bank is now doing business.

During its early history, in October, 1859, an attempt was made to rob the institution. A local account of the affair says, "For three or four days past it has been known in certain quarters that an attempt has been made to enter the State Savings

Charles Parsons, president of this bank, was born in Homer, Cortland Co., N. Y., on the 24th of January, 1824, and is the son of Lewis B. Parsons, late of Buffalo, N. Y., and grandson of Capt. Charles Parsons, of the New York line in the Revolutionary war. He commenced business, after receiving a thorough academical education, as a clerk in his father's store, and soon after attaining his majority was employed, first as clerk and after as partner, in a commission and transportation house in Buffalo from 1846 to 1850, when he entered the Bank of Attica, in Buffalo, and remained some months, solely for the purpose of learning the business of banking under its very able financier, Gains B. Rich. At the close of 1850 he removed to St. Louis with the view of selecting a point at which to commence the business of banking, and finally, at the instance of H. D. Bacon, of the then well-known firm of Page & Bacon, located at Keokuk, Iowa, where he was very successful in business, and remained until January, 1862, when he tendered his services to the government and was placed in charge of the army transportation at St. Louis, receiving soon after the rank of captain and assistant quartermaster. The duties of his position were very extensive and onerous, embracing employment of hundreds of steamers on the rivers and railroad trains on land, to transport the troops, horses, cannon, provisions for men and animals, and all the various articles required to provision, feed, and render efficient great armies operating over the extended theatre of war in the West and South. Besides these duties he was required to audit and settle the accounts of all other army quartermasters pertaining to transportation from Wisconsin in the North to the line of actual war in the South. These various and arduous duties he fulfilled and discharged to the great satisfaction of Gen. Robert Allen, the chief of the Quartermaster's Department in the West, as is shown by his report to the War Department, in which he speaks in the highest terms of Capt. Parsons, and also to the satisfaction of Gen. M. C. Meigs, quartermaster-general himself, as is shown by the order of Gen. Meigs, June, 1864, calling him to Washington to take control of the bureau of railroad transportation for the United States, under the management of the War Department. This order, however, he persuaded the quartermaster-general to rescind. Mr. Parsons continued in the service of the government until July 13, 1864. Having been

elected, in the previous February, cashier of the State Savings Association, and being satisfied that the success of the government was assured, he resigned his commission in the army. As a further recognition of his services he received the brevets of major and lieutenant-colonel. In August, 1864, he assumed the discharge of his duties as cashier of the State Savings Association, and served as such with remarkable fidelity and success until February, 1870, when he was elected president of the association. Mr. Parsons was one of the organizers of the Keokuk and Des Moines Railroad Company, and continued on the directory for some years. He was at one time a director of the Ohio and Mississippi Railroad Company, has been president of the St. Louis Clearing-House for the past ten years, is president of the Hannibal Gas Company, vice-president of the Bellefontaine Street Railroad Company, and director of the Missouri Street Railway Company, both of St. Louis, and is a director in the water-works companies of Atchison, Kan., and Hannibal, Mo.

On the 11th of June, 1857, Mr. Parsons was married to Miss Martha A. Pettus, of St. Louis.

In the various positions which he has been called on to fill, Mr. Parsons has never failed to exhibit rare business abilities and administrative talents of the highest order.

The Valley National Bank was organized July 25, 1871, and was chartered under the National Banking Act Aug. 9, 1871. The incorporators were Dwight Durkee, George D. Hall, James Richardson, H. H. Curtiss, N. C. Chapman, O. G. Proctor, W. N. Stone, A. W. Mitchell, J. M. Brawner, Preston Roberts, Augustus Kountz, N. S. Penfield, J. C. Culbertson, A. B. Safford, J. L. Stephens, A. D. Jaynes, T. H. Waugh, David Auld, Josiah Hunt, John Williams, and others. The bank opened its doors for business Aug. 23, 1871, at which time its president was Dwight Durkee, who was elected at a regular meeting of the board of directors July 27, 1871. The cashier at that time was James T. Howenstein. When the bank began business the board of directors consisted of Dwight Durkee, George D. Hall, James Richardson, H. H. Curtiss, N. C. Chapman, O. G. Proctor, W. N. Stone, A. W. Mitchell, J. M. Brawner, Preston Roberts, Augustus Kountz, N. S. Penfield, J. C. Culbertson, A. B. Safford, J. L. Stephens, A. D. Jaynes, J. H. Waugh, David Auld, Josiah Hunt, and John Williams. On Jan. 29, 1873, J. A. J. Aderton was elected president of the bank, and served until Oct. 24, 1878, when he was succeeded by S. E. Hoffman, who has since retained the position. The first location of the bank was No. 320 North Third Street, whence it was re-

Institution, corner of Vine and Main Streets, by an entrance through the Vine Street sewer, and an effort to tunnel through the rock that forms the foundation of the building."

The officers for 1882 were S. E. Hoffman, president; M. J. Lippman, vice-president; G. H. Goddard, cashier; M. J. Lippman, John B. Noland, Charles P. Burr, H. H. Curtis, Joel Wood, G. H. Goddard, R. J. McElhaney, Walter H. Trask, and S. E. Hoffman, directors.

The German-American Bank was incorporated by Martin Lammert, August Gehner, John J. Menges, Ernest Witte, B. F. Horn, George Tinker, Hugh L. Fox, and E. A. Mysenburg, Nov. 3, 1872, and was opened at the northeast corner of Tenth and Franklin Streets. John J. Menges was elected president; Martin Lammert, vice-president; and E. A. Mysenburg, cashier. The first directors were Hugh Brennon, G. Mysenburg, Ernest Witte, William Nieman, Martin Lammert, John J. Menges, B. Weber, B. F. Horn, George Tinker, William Trauernicht, Hugh L. Fox, August Gehner, and E. A. Mysenburg. The capital stock paid up is \$150,000. The bank is now located at the northwest corner of Fourth and Franklin Streets. The official statement of the officers Dec. 31, 1882, showed gross earnings for six months of \$36,730.11; surplus fund, \$56,684.21; resources, \$1,174,605.95. The present officers are August Gehner, president; Martin Lammert, vice-president; John Dierberger, cashier; Directors, Thomas Ferrenbach, H. H. Schulze, August Gehner, Casper Stolle, C. H. Grote; William Trauernicht, George Holtgrewe, Claus Vieths, Martin Lammert, Ernest Witte, F. H. Logemann, John H. Yandell, J. C. Lullman.

SAVINGS-BANKS.

As early as 1839 an effort was made to establish a savings-bank in St. Louis, a meeting of "mer-

chants, traders, and mechanics" being held at the Merchants' Exchange rooms for that purpose on the 7th of February. On motion of Col. Charles Keemle, George K. McGunnegele was called to the chair, and N. E. Janney appointed secretary. The object of the meeting having been stated by the chairman, J. Smith Homans made an address in favor of the project, presenting many statistics showing the success and utility of similar institutions in other cities, and concluding by offering the following preamble and resolutions:

"WHEREAS, This meeting is fully impressed with the belief that there is a large number of persons in this city who have no profitable mode of investment for their surplus earnings, and

"WHEREAS, The want of a depository for the active, beneficial, and profitable investment of the surplus means of many of our fellow-citizens is the cause of the extravagant waste of such funds; therefore,

"Resolved, That a committee of five persons be appointed by the chairman, whose duty it shall be to report within forty days a plan for the formation of a savings association in the city of St. Louis.

"Resolved, That when this meeting adjourns, it adjourn to meet again on the 20th of March next, to receive the report of the committee."

The resolutions were unanimously adopted, and on motion of A. Wilgus, it was unanimously

"Resolved, That the committee under the first resolution be authorized to procure the written opinions of Josiah Spalding, H. R. Gamble, and Beverly Allen as to the authority which the citizens have to establish such an institution without a charter from the Legislature, and whether the same is contrary to the Constitution of the State."

On motion of D. L. Holbrook, it was unanimously

"Resolved, That the same committee be directed to report upon the expediency of connecting a joint-stock association for the proposed savings institution, similar to the Mechanics' and Traders' Bank of Cincinnati and other institutions of the same character."

The chairman then announced the following as composing the committee under the first resolution:

J. Smith Homans, Asa Wilgus, J. W. Paulding, Wayman Crow.

On motion of Mr. Wilgus, the chairman was added to the committee.

The Boatmen's Savings-Bank was originally organized in 1846, was chartered in 1847 as the St. Louis Boatmen's Savings Institution, and was opened for business during the same year. The bank was incorporated as a savings institution (without capital, on the savings-bank plan, "where boatmen and other industrious classes can safely deposit at interest their earnings," etc.), with a twenty years' charter, the profits to be divided *pro rata* among "original six-month depositors," viz., those who deposited one hundred dollars and upwards during the first six months, and allowed the same to remain undisturbed.

The incorporators were George W. Sparhawk, Sullivan Blood, Edward Dobyms, L. M. Kennett, Daniel D. Page, B. W. Alexander, Samuel C. Davis, Adam L. Mills, Amedee Vallé, George K. Budd, Thomas Andrews, Henry D. Bacon, Lawrason Riggs, James G. Barry, John M. Wimer.

These gentlemen were subsequently continued as trustees, and Adam L. Mills was elected president.

At a meeting of the board of trustees, held at the office of the *Missouri Republican* on the 30th of August, 1847, there were present George W. Sparhawk, Sullivan Blood, A. Vallé, John M. Wimer, Thomas Andrews, Samuel C. Davis, A. L. Mills, and James G. Barry.

On motion the meeting was called to order, and George W. Sparhawk was called to the chair, and A. Vallé appointed secretary.

The object of the meeting having been explained by the chairman, and the act of incorporation read, the latter, on motion of James G. Barry, was accepted.

On motion of John M. Wimer, a committee of three was appointed by the chairman to draft by-laws and regulations for the government of the institution, whereupon A. Vallé, S. Blood, and S. C. Davis were chosen.

On Sept. 14, 1847, John F. Darby and E. Haren were elected trustees to fill vacancies. On the 21st, Dr. Robert Simpson was elected treasurer, and B. B. Chamberlain secretary.

On Oct. 16, 1847, the trustees gave notice to the public that on Monday, the 18th inst., its doors would be opened for business, stating that "the Boatmen's Savings Institution will henceforward be opened daily from 10 A.M. to 4 P.M., and on Saturdays till 6 P.M., until further ordered. On Fridays no males will be admitted, this day being expressly set apart by the trustees for the female community. The institution for the present is located at No. 16 Locust Street, one door west of Main, and those who become its patrons are respectfully requested to circulate among their friends and neighbors its charter and by-laws."

In April, 1854, the bank was robbed of eighteen thousand dollars in notes of the bank and over one thousand dollars in gold. The thief or thieves obtained access to the safe before the bank was opened in the morning, but left behind four thousand dollars in gold and several checks which were also in the safe. Upon the discovery of this loss the officers offered a reward of one thousand dollars for the detection of the thief and four thousand dollars for the return of the money. In anticipation of a run on the bank, the banking-houses of Page & Bacon, Lucas & Simonds, Loker, Renick & Co., E. W. Clark & Brothers, and

J. J. Anderson & Co. offered advances to unlimited amounts, but assistance of this character was not required, as the ordinary routine of the bank was not disturbed. During the financial panic of 1855 the Boatmen's was one of the institutions for which the leading merchants pledged their property.

On the 1st of January, 1856, the bank abandoned its original charter and began business under a second—twenty years'—charter, with a capital of four hundred thousand dollars. On the 1st of October, 1873, three years prior to the expiration of the second charter, the bank reorganized under the general banking laws of Missouri as The Boatmen's Savings-Bank, with an authorized and paid up capital of two million dollars. A peculiarity of the second charter was the section which provided that "at the expiration of every five years from the first day of January, 1856, if the board of directors deem it expedient, they may make, in such manner and on such terms as to them shall appear equitable, a dividend among the stockholders not exceeding one-fourth of the net profits of the preceding five years, and the remainder of said profits shall, at the discretion of the board, be reserved for the better security of depositors and for future operations, until the winding up of the affairs of this corporation, or converted into stock of the corporation and apportioned equitably among the stockholders, notwithstanding such conversion and apportionment should increase stock beyond the sum limited in the first section of this act. Otherwise than is in this section provided no dividend shall be made by this board."

In accordance with the above section, the board of directors did not declare any dividend until April 1, 1871, more than fifteen years after commencing the banking business, but carried their net earnings to the credit of profit and loss account, until at that time the earnings had amounted to \$2,293,442.83, and on the first of April, 1872, a further dividend of \$300,000 was declared, and on July 1, 1873, the surplus was \$2,456,742.

At the first election for directors under the second charter, held in 1856, the following were elected: Sullivan Blood,¹ Carlos S. Greeley, George K. Budd, Rufus

¹ Sullivan Blood was born in the town of Windsor, Vt., April 24, 1795. His parents were natives of Massachusetts, but emigrated to Vermont, then a newly-admitted State, in 1793. They lived upon a farm, and both died about 1813, whereupon young Blood resolved to seek a home in the far West. About two years after their death he made his way to Olean, on the head-waters of the Allegheny, in Western New York, where a number of persons were awaiting the opening of navigation to descend in boats to the Ohio. On arriving at the Seneca reservation, Mr. Blood engaged for a year among the Indians in the lumber business, and having realized a small sum of

J. Lackland, William D'Oench, Louis A. Labeaume, Robert Holmes, Luther M. Kennett, John M. Wimer, Asa Wilgus, Adam L. Mills, and Adolphus Meier. Sullivan Blood was elected president, and Alton R. Easton cashier. Charles Hodgeman succeeded Mr. Easton as cashier in 1857, and occupied that post until his death, which occurred in April, 1870, when the present cashier, William H. Thomson, was elected.

On Oct. 26, 1857, at a called meeting of the directors of the institution, the following resolutions were adopted:

"1. *Resolved*, That all deposits in this institution up to this date will be paid in gold and silver, and it will continue to receive deposits in the same, and pay out the same to said depositors.

"2. *Resolved*, That this institution will also receive on deposit bank-notes of all the chartered banks in this State, together with their branches, and will pay out the same to said depositors indiscriminately in the bank-notes aforesaid.

3. *Resolved*, That this institution will receive in payment of all discounted paper or other debts due the Boatmen's Saving

money there, he descended the Allegheny, a distance of three hundred miles, to Pittsburgh. He then engaged on a flat-boat and worked his passage down the Ohio until he reached Cincinnati. From there he went to Cairo, where there was not a house, and from thence ascended the Mississippi in a keel-boat to St. Louis. He was greatly pleased with the activity of the place, and in 1817 took up his residence in the town, where he remained until his death. St. Louis was at that time just in the transition state between a village and a town, and in that year the first movement was made to protect the citizens by a regular force of watchmen. In 1818, Mr. Blood was appointed a member of the force, and before long was promoted to the position of captain, to which he was re-elected several consecutive years. In 1823, Capt. Blood revisited his native State, and during his visit was married to Miss Sophia Hall. After holding the position of captain of the watch for ten years, he became deputy sheriff. In 1833 he was elected and served as alderman from the then Second Ward for one term, at the end of which his political life ended, as he afterwards always declined to become a candidate for public office. It was at this period that he turned his attention to river matters, and became engaged as a steamboat captain in the St. Louis and New Orleans trade, in which he was quite successful. His boats, which were built under his own supervision and which he personally commanded, became extremely popular, and Capt. Blood during his period of service was one of the most skillful and successful pilots on the Mississippi. In the early part of 1847, when the Boatmen's Savings Institution was incorporated, Capt. Blood was appointed one of the directors. His executive abilities soon gave him such prominence in the board of directors that he was chosen president, a position which he filled with credit to himself and advantage to the institution until 1870, when he resigned for the purpose of allowing some younger and more active man to assume the laborious duties of the office. He still continued a director, and up to the time of his death, which occurred Nov. 27, 1875, notwithstanding his advanced age, made a daily visit to the institution and took an active part in its affairs. Capt. Blood left a wife, one son, Henry Blood, a merchant in Iowa, a married daughter, wife of James L. Sloss, of the firm of Gilkeson & Sloss, of St. Louis, and a daughter, Miss Anna Louisa Blood.

Institution the paper of all the chartered banks in the State of Missouri and the branches thereof.

"4. *Resolved*, That the Boatmen's Savings Institution will receive in payment for all collection-paper gold and silver only, unless otherwise notified in writing.

"S. BLOOD,
"President."

In 1870, Capt. Sullivan Blood resigned the presidency of the bank, and was succeeded by Rufus J. Lackland, although he still retained his place in the board of directors.

Rufus James Lackland is a member of one of those Maryland families which removed to Missouri at an early day, and which, as frequently noted elsewhere in this work, have contributed so much to the growth and prosperity of St. Louis. Among these enterprising spirits, Peter and Jesse Lindell, Michael McEnnis, Robert A. Barnes, Edward Bredell, John Kennard, Thomas T. Gantt, and R. J. Lackland attained to special prominence in the affairs of the city. The Lacklands, or Lachlans, as they originally spelled their name, were influential people in Montgomery County, Md., and closely allied with the Edmonstones and other leading families of that State. Archibald Edmonstone, who came from Scotland at an early day, is stated by George Lynn Lachlan Davis, a well-known Maryland antiquarian and writer, in his "Day Star of American Freedom," to have been the ancestor "of the Lachlans of Montgomery, but now in the State of Missouri, and of the wife and children of Governor Hempstead, of Iowa." In Scotland, where it originated, the Lachlan family enjoyed considerable prominence, and in this country it has always maintained a leading position. James Lackland was a member of the Levy Court and county commissioner of Montgomery County from 1799 to 1801, and Dennis Lackland was a merchant of the same county in 1820.

Rufus J. Lackland is directly descended from the "Lachlans of Montgomery" mentioned in the "Day Star," and is a cousin of the author of that book. He was born in Poolesville, Montgomery Co., Md., his father being Dennis Lackland, and his mother Eliza Appleby, a native of Berkeley County, Va., whose mother was Mrs. Margaret Moore Appleby, of Baltimore.

In 1835, Mr. Lackland removed with his parents to Missouri, and during the same year entered the store of Mullikin & Pratte, at the corner of Market Street and the Levee. Upon the dissolution of this firm in 1837 he obtained a position as clerk of the steamer "Clyde," plying between St. Louis and New Orleans, and subsequently of the steamers "Chester," "Oregon," "Caroline," and "Eclipse." In 1847 he

withdrew from the steamboat business and established himself in the wholesale grocery and commission trade as a member of the firm of William M. Morrison & Co., which continued to transact a flourishing business until 1861, when it dissolved, each partner having secured a competence. Mr. Lackland continued the business in his own name, and later admitted his two elder sons to partnership, the style of the firm being R. J. Lackland & Sons. In 1871 he finally retired from business.

For many years Mr. Lackland had been a director and one of the largest stockholders in the Boatmen's Savings-Bank, and in 1871 he was elected president, a position he has held ever since. The excellent judgment which had characterized his management of his private business and had contributed so materially to its success has been conspicuously displayed in the conduct of this institution, which is one of the strongest and most prosperous banks in the West.

Numerous other public enterprises have enjoyed the benefit of Mr. Lackland's wise counsel and assistance. In 1855 he was elected vice-president of the Merchants' Exchange, and in the autumn of 1871 was chosen president of the Chamber of Commerce Association, organized for the purpose of erecting a new Exchange building. Mr. Lackland is still president of this association, having been continuously re-elected to the position. He was one of the most zealous and efficient spirits in promoting the construction of the new Chamber of Commerce, and has always been foremost among his fellow business men in aid of all important public enterprises. For many years he has been a director in the Iron Mountain Railroad, and also in the Oakdale Iron-Works and the Scotia Iron Company. For twenty years he has been a director in the Belchers Sugar-Refining Company, and is now president of the St. Louis Gas Company. Some of these are among the most important industrial concerns in the city, employing large capital and a vast number of hands, and are justly regarded as representative institutions of St. Louis.

Mr. Lackland was married in St. Louis, Aug. 23, 1840, to Miss Mary Susannah Cable, a native of New York, who died in December, 1866, having borne ten children, eight of whom are living. Mrs. Lackland was loved and respected for her many virtues. Some years later Mr. Lackland married his present wife, Mrs. Caroline Eliot Kasson, the youngest sister of the Rev. Dr. William G. Eliot, chancellor of Washington University, St. Louis, and a lady of fine literary attainments.

In religion Mr. Lackland is a Unitarian, and in politics a Democrat. In all the relations of life,

whether public or private, he enjoys in the highest degree the esteem and respect of all who know him.

His present position in the community is due entirely to his own exertions. Forced at an early age to rely upon himself, he put forth all his energies, and soon made a decidedly favorable impression as a young man of exceptional industry and zeal. As a merchant, his career was marked by great energy and steadfastness of purpose, a clear, quick judgment, unsullied integrity, and exceptional ability in the management of enterprises of great magnitude. As the result, he now enjoys an influence and consideration among his fellow business men which gives him a peculiar and special pre-eminence in the mercantile world of St. Louis. Personally, Mr. Lackland is a gentleman of pleasant and genial address, and kind and amiable towards all with whom he is thrown in contact. By the community in which he has resided for more than forty years he is justly regarded as a far-sighted, liberal-minded, and noble-hearted citizen.

In 1873, as previously stated, the Boatmen's Savings Institution was transformed into the Boatmen's Savings-Bank. In addition to the original capital of \$400,000 there was a surplus fund of \$2,400,000, and the capital of the bank was fixed at \$2,000,000, the \$800,000 remaining being divided among the stockholders. The following were designated as the board of directors in the articles of association: Rufus J. Lackland, Carlos S. Greeley, Adolphus Meier, James Smith, Sullivan Blood, William A. Hargadine, Edward J. Glasgow, William P. Howard, John B. C. Lucas, George S. Drake, and William H. Thomson.

The Boatmen's Bank was first located on the southwest corner of Second and Pine Streets, but was afterwards moved to the north side of Chestnut, between Main and Second Streets, and thence to the present location on the northeast corner of Second and Pine Streets.

The officers of the bank for 1882 were Rufus J. Lackland, president; George S. Drake, vice-president; William H. Thomson, cashier; Directors, Lawrence L. Butler, Samuel Cupples, George S. Drake, Theodore Forster, Carlos S. Greeley, William A. Hargadine, Rufus J. Lackland, Adolphus Meier, E. C. Simmons, William H. Thomson, Edwards Whitaker.

The semi-annual statement rendered Dec. 31, 1881, showed the condition of the bank to be as follows:

<i>Resources.</i>		
Cash.....	\$1,147,735.31	
Exchange matured.....	149,795.05	\$1,297,530.36

The Germans' Savings Institution of St. Louis was incorporated Feb. 25, 1853, with an authorized capital of twenty-five thousand dollars, and authority to increase the same from time to time at the will of the directors to any amount not exceeding two hundred and fifty thousand dollars, divided into shares of fifty dollars each. The incorporators were Edward Haren, John Kern, William Palm, Francis Saler, Robert Barth, Joseph Degenhardt, George Busch, Charles Wetzel, Adolphe Abeles, Frederick Bergesch, Lewis Bach, John Wolff, Edward Eggers, Louis Hirschberg, Ernest C. Angelrodt. The institution opened for the reception of deposits on Monday, May 23, 1853, the office being located at No. 35 Main Street, between Chestnut and Pine Streets. It transacts a general banking business, and solicits the accounts of corporations, firms, and individuals. The present capital stock paid up is \$250,000, and there is a surplus fund on hand amounting to \$95,707.67.

The board of directors for 1882 was composed of F. W. Meister, president; Charles F. Orthwein, George H. Braun, John Wahl, Louis Fusz, William Koenig, J. G. Greer, Adolphus Boeckeler, and A. Nedderhut. Richard Hospes is the cashier. The bank is located in the Chamber of Commerce building.

The Provident Savings Institution was organized and incorporated in February, 1864, and was originally intended to supply the need of a public pawn-office, such as those which exist in Europe. The project did not, however, receive the support of the public, and the institution was changed to a savings-bank, and continued as such until 1877, when it was again changed to a commercial bank. Its charter authorized a capital of two hundred and fifty thousand dollars. The paid up capital is now one hundred thousand dollars, and it is the intention of the management to increase it to two hundred thousand dollars.

The incorporators of the savings-bank were Henry Hitchcock, Carlos S. Greeley, Robert Holmes, William M. Morrison, George Partridge, George P. Plant, S. A. Ranlett, and Levin H. Baker. The bank was opened for business in January, 1865, having for its

president J. P. Doan, who served in that capacity until 1872. He was succeeded by William Gresham, who occupied the position until 1877, and was followed by C. S. Greeley, who still retains the position. The cashiers have been S. A. Ranlett, from 1865 to 1877, and the present incumbent, Almon B. Thomson. This institution was first located at the corner of Main and Locust Streets, but removed to its present location, No. 513 Olive Street, in 1867. The official statement shows that it has a cash paid up capital of \$100,000, and a surplus fund of \$4666.51.

The officers for 1882 were C. S. Greeley, president; William H. Thomson, vice-president; and Almon B. Thomson, cashier; Directors, William H. Thomson, D. F. Kaime, Thomas H. Swain, James S. Garland, Carlos S. Greeley, Lucien Eaton, S. A. Ranlett, and A. B. Thomson.

The Union Savings Association was incorporated and organized Feb. 19, 1864, having for its incorporators Gustavus W. Dreyer, T. B. Edgar, E. O. Stanard, Henry Overstolz, Réné Beanois, John W. Woerner, Alexander B. Moreau, Edward Wider, T. M. Ellis, Thomas E. Souper, Ferdinand Meyer, James M. Corbett, and John T. Tell. Thomas S. Rutherford was elected president of the association, and was succeeded by W. A. McMurray, who was followed by Peter Nicholson, the present incumbent. The association has a paid up capital of one hundred thousand dollars, and a surplus of twenty-three thousand seven hundred and sixty-one dollars. The officers for 1882 were Peter Nicholson, president; William A. McMurray, vice-president; and Horace Ghiselin, cashier; Directors, Peter Nicholson, G. W. Updyke, W. A. McMurray, S. G. Niedinghaus, John Scullin, H. C. Wilson, J. W. Mortimer, A. Mansur, J. B. C. Lucas, Charles H. Turner, D. A. Marks, G. A. Madill, and Horace Ghiselin. The present location of this institution is at No. 322 North Third Street.

The Safe Deposit Company of St. Louis was established in 1870, under a charter from the General Assembly of the State of Missouri, for the safe-keeping of money, bonds, valuable packages, plate, etc., and for the execution of trusts, absolute security and privacy being guaranteed. The incorporators were J. B. S. Lemoine, Eugene Jaccard, Robert K. Woods, G. A. Hayward, John R. Lionberger, J. H. Britton, James Harrison, John Byrne, Jr., Thomas Howard, and Logan Hunter. In 1870 the safe deposit building, No. 513 Locust Street, now occupied by the company was erected. The building is supplied with the latest and most improved fire- and burglar-proof vaults, safes, etc., and everything pertaining to the establishment is furnished with a view to safety

and durability. J. B. S. Lemoine was chosen president in 1870, and continued as such for some years, being succeeded by John R. Lionberger, the present incumbent. The officers for 1882 were John R. Lionberger, president; Edwin Harrison, vice-president; and G. A. Hayward, secretary. The board of directors remains the same as at the incorporation of the company in 1870.

The Bremen Savings-Bank was incorporated Aug. 16, 1868, and began business Oct. 1, 1868. The incorporators were M. Brotherton, L. L. Ashbrook, Horace Fox, Hermann Obrock, Christopher Crone, August F. Reller, F. W. Prange, Henry Bakewell, Henry Leder, John Maguire, Joseph W. Crooks, Reiner Bueter, Samuel Stannard, and James Green. M. Brotherton, president; Horace Fox, vice-president; and C. D. Affleck, cashier, were the first officers. The original directors were Christopher Crone, James Green, Jacob Bitner, Henry Bakewell, Joseph W. Crooks, Horace Fox, M. Brotherton, F. W. Prange, August F. Reller, Henry Hahne, L. L. Ashbrook, Samuel Stannard, and Nicholas Hatch. The capital stock was originally \$100,000; of this only \$30,000 was paid in, which grew to \$125,000. In 1877 the bank suspended for fifteen days, and reopened on the 1st of August with a capital of \$35,000. The present capital is \$70,000, with a surplus of \$12,000. F. W. Prange is president, and C. E. Kircher is cashier. The directors are Samuel Marx, Charles Naber, Anthony Nacke, Hermann Obrock, F. W. Prange, C. H. Spencer, and T. T. Wurm. The bank occupies the original location, 3618 Broadway.

The Citizens' Savings-Bank was incorporated in September, 1868. The incorporators and first directors were Joseph O'Neil, John Ring, David Nicholson, R. W. Powell, M. H. Phelan, J. B. Ghio, and P. P. Connors. Joseph O'Neil became president; R. W. Powell, vice-president; and John Schenk, cashier. The bank was first opened one door from its present location, on the corner of Locust and Third Streets. The capital stock is two hundred thousand dollars. Joseph O'Neill and R. W. Powell have continued as president and vice-president, and P. Gleeson is the present cashier. M. H. Phelan, William Dooly, Daniel Cahill, Joseph O'Neil, P. P. Connors, R. W. Powell, and J. B. Ghio are the directors.

The Mullanphy Savings-Bank was incorporated Jan. 16, 1873, by A. S. Allen, F. W. Buschmann, G. H. Elbrecht, James Garnett, F. Heman, H. Klages, George Lanitz, John P. Mullally, F. G. Niedringhaus, J. H. Rottmann, F. A. Schulenburg, A. Schulherr, and Frederick Schwartz, and was organized with a

paid up capital of one hundred thousand dollars. The incorporators comprised the original board of directors, and the officers were A. Schulherr, president; Frederick Leser, cashier. The bank has always been located at the corner of Broadway and Mullanphy Street. The last annual statement, Dec. 1, 1882, showed: Assets, \$675,276.72; surplus fund, \$38,089.54. The present officers are John H. Rottman, president; G. H. Elbrecht, vice-president; L. G. Kammerer, cashier; Directors, H. C. Benning, G. H. Elbrecht, C. Kellersmann, William Kerksieck, E. C. Little, Joseph Marks, John P. Mullally, Louis Nolte, James W. Roscbrough, J. H. Rottmann, Charles Schumacher, F. Schwartz, H. Klages.

The Northwestern Savings-Bank, corner of Fourteenth and North Market Streets, was incorporated May 15, 1873. The incorporators were Charles G. Stifel, J. H. Evers, A. Peck, A. Bohn, John J. Hilger, J. F. Heidbreder, B. Israel, H. Kobusch, William Leffmann, Henry Pius, R. W. Remmelkamp, Fred. Steinkamper, Charles Schuler, and P. Obernier. The original and present officers are Charles G. Stifel, president; J. H. Evers, vice-president; and P. Obernier, cashier. The original and present directors are the incorporators. The capital stock is fifty thousand dollars, and the surplus is forty-seven thousand dollars. The bank has always been at the corner of Fourteenth and North Market Streets.

Miscellaneous Notes.—In addition to the banks and savings institutions whose history has been narrated, many other financial institutions have been established in St. Louis from time to time. Among these are the following:

Mutual Savings Institution, chartered in 1863, commenced operations Feb. 6, 1854, with a capital of \$50,000. Deposits as small as five cents were received. On time deposits six per cent. interest was paid. From the 6th of February up to the 20th of December, 1854, the institution had opened seven hundred and sixty-nine accounts, with deposits aggregating \$66,484.59.

Central Savings-Bank, organized in 1857 with a capital stock of \$50,000, subject to increase not exceeding \$750,000. When the Central commenced its career it was managed by the following officers: Henry L. Patterson, president; John H. Tracy, cashier; Directors, Henry J. Spaunhorst, John Byrne, Jr., Peter J. Hurck, John F. Slevin, Francis Lepere, Thomas Ferguson, Hugh Boyle, Henry B. Berning, Redmond Cleary.

Owing to imprudent investments the institution collapsed, and on the 17th of July, 1876, the direc-

tors executed an assignment for the benefit of the creditors to E. T. Farish, attorney, and Charles Green, real estate agent. Subsequently a committee was appointed, consisting of Timothy Cavanaugh, Daniel Cavanaugh, J. Dalton, Fusz & Backer, and Thomas McEvilly. Subsequently M. H. Phelan was appointed assignee by the United States Court. When the estate passed into the bankruptcy court the following statement of assets was submitted :

ASSETS.	
Notes discounted.....	\$338,381.55
Insurance debts and notes in suit...	276,969.11
Bonds and stocks.....	56,900.00
Notes discounted No. 2.....	151,573.39
Overdrafts.....	12,595.55
Due from banks and bankers.....	6,075.00
Cash on hand July 6, 1876.....	12,683.45
Real estate.....	213,488.27
Total.....	\$1,066,666.32

There were 1228 creditors, representing a total indebtedness of \$844,673.07. The deposits consisted of small amounts, chiefly ranging from \$200 to \$1000. Assignee Phelan succeeded in six years in paying off twenty per cent. of this indebtedness in three dividends, ten, five, and five per cent. each, which exhausted the collected assets of the bank, amounting to \$160,000. The value of the assets shrunk to insignificant figures, owing to the worthless nature of some of the real estate securities.

The City Bank of St. Louis; books for subscription to stock opened at the counting-room of Lucas & Simonds, March 18, 1857; incorporators, D. A. January, William M. Morrison, Henry L. Patterson, Charles D. Drake, John Simonds.

People's Savings Institution; subscribers notified that ten per cent. of the amount subscribed was to be paid on or before Tuesday, March 10, 1857, to Isidor Bush, corner of Park and Carondelet Avenues, or to Emil Ulrici, No. 53 Carondelet Avenue, between Barry and Marion Streets; commissioners to receive the first installments, John How, Waldemar Fischer, Isidor Bush, Matthias Steitz, John Hogan, Henry Pilkington, Emil Ulrici, Charles Taussig.

First Ward Savings Association; books for subscriptions opened March 14, 1857, at the office of Thomas Allen, Decatur Street, and at J. P. Mack's drug store; Commissioners, Thomas Allen, John C. Rust, Stephen D. Barlow, Benjamin A. Souldard, René Bouvais, James G. Stewart, Heber Livermore, E. A. Burt, Patrick E. Burke.

St. Louis Building and Savings Association; subscription-books opened at the rooms of the Mechanics' and Manufacturers' Exchange, on Chestnut Street between Third and Fourth, March 9, 1857; incorporators and commissioners, Asa Wilgus, Clark J.

Morton, Peter A. Ladue, John F. Darby, William Hassinger, George H. Moore, William M. Maurice, Josiah G. McClellan.

United States Savings Association, organized in 1857, went out of business in June, 1879. The directors of the institution, which was then located at Second and Market Streets, decided in that month to close up the affairs of the bank, and to transfer its accounts to the Mechanics' Bank, southwest corner of Second and Pine Streets. This decision was caused by the fact that the business was no longer profitable. The officers at the time were Jacob Tamm, president; Theodore Sessinghaus, vice-president; Charles Kern, cashier. The directors were Jacob Tamm, Theodore Sessinghaus, G. Wetzel, Charles Hegel, Charles Kern, Henry Wiebusch, August Eichele, H. D. Meyer, Herman Morell, Nicholas Guerdan, and Otto Lademann.¹

Accommodation Bank, organized about 1864, was located at first on Chestnut Street near Fourth, but afterwards removed to the northeast corner of Chestnut and Third Streets. For some years the bank transacted a flourishing business both as a savings and discount association. Its president was Hon. Erastus Wells, and the cashier William D. Henry. The board of directors in 1867 was composed of Erastus Wells, G. W. Dreyer, Col. Cavender, John E. Liggett, of Liggett & Dausman, and Thomas V. Strude, of Strude, Ruby & Co.

Real Estate Saving Institution, organized in April, 1867, was located at 72 North Third Street, above Olive. Seven per cent. interest was paid on deposits, and sums as low as one dollar were received. The officers were: President, George K. Budd; Treasurer, Francis Whitney; Legal Counselor, John M. Krum; Trustees, William M. Morrison, John S. McCune, John M. Krum, Thomas E. Tutt, Henry Whitmore, Morris Collins, Charles A. Pope, Oliver A. Hart, R. M. Funkhouser, George K. Budd, Edward Haren, Sr., John B. Johnson.

Home Savings-Bank, established in May, 1867, "for the accommodation of citizens at the northern end of the city." The officers were E. D. Jones, president; James Hodgman, vice-president; H. C. Pierce, cashier, and E. D. Jones, James Hodgman, D. P. Green, E. G. Obear, A. C. Osborn, A. H. Weber, J. O. Coding, G. W. Alexander, H. L. Parker, J. P. Colby, John Crangle, W. L. Barker, and T. Sessing-

¹ Augustus Beneke, cashier of the United States Savings Institution, died suddenly in March, 1871. He had been a resident of St. Louis for twenty-two years, and was widely and favorably known.

haus, directors. The building was located at the corner of Broadway and Jefferson Street.

Butchers' and Drovers' Bank, organized in June, 1867, with B. M. Chambers as president, and P. S. Langton, cashier, was located at the corner of Fifth and Morgan Streets, opposite the Union Market. Its business grew to enormous proportions, and during the great panic of 1873 it paid all checks as presented, but on the 14th of July, 1877, it ceased operations. "The only reason," says a newspaper announcement of the action of the bank officers, "as given to us for the close was the imperative provision of the new statute, which takes effect at the end of the month, and which provides 'that when the capital stock shall have become impaired to the extent of twenty-five per cent. thereof by reason of bad loans or otherwise, such corporation shall cease to do business unless the stock shall have been made good by assessment within sixty days.'

"The stock of the bank as subscribed is two hundred and sixty-one thousand dollars, of which one hundred and thirty thousand five hundred dollars is paid in. Interpreting that the capital stock paid in must be treated as the sum by which must be tested the solvency of the bank, Mr. Chambers saw but two alternatives for compliance with the law, either to cease to do business or to call on stockholders, which last within sixty days would not be possible.

"The Butchers' and Drovers' Bank was organized in 1867 with a nominal capital of two hundred and fifty thousand dollars, of which thirty per cent. was paid in. From time to time dividends were declared, and were credited to stock on the books until fifty per cent. was paid up, making a working capital of one hundred and twenty-five thousand dollars. The bank did a flourishing business from the start, and, in addition to a heavy list of large depositors, became popular with small depositors, of which it had a host. This gave the bank such a prestige that two years ago, when only forty per cent. of the stock was paid up, shares were selling at from seventy to seventy-two per cent., or a little over seventy-five per cent. premium."

American Bank, established in November, 1867; officers: President, E. Miltenberger; Cashier, Wash Barrow; Assistant Cashier, F. Siebenmann; Directors, E. Miltenberger, Wash Barrow, Henry B. Berning, William Druhe, J. F. Schiefer, John F. Tolle, Joseph Uhrig, Jacob Blattner, Clingan Scott, C. F. Orthwein, L. W. Burris, J. O. Banks, R. D. Lancaster.

German Bank, organized in 1869, was located on Market Street, between Second and Third, but removed to Fifth and Market Streets. It transacted a

large business, having at one time deposits amounting to one million six hundred thousand dollars, and in December, 1869, established a branch office in "Hiemenz's new building, at the northeast corner of Carondelet Avenue and Carroll Street." On the 10th of July, 1877, the directors made an assignment of all the assets of the bank to Charles G. Stifel for the benefit of the creditors.

Broadway Savings Bank, established March 4, 1869. Officers: L. S. Bargaen, president; J. P. Krieger, Sr., vice-president; J. P. Krieger, Jr., cashier. For some years the bank transacted a flourishing business, but on the 21st of May, 1879, it was compelled to suspend, owing to the sudden crippling of its resources. Less than two years later (Jan. 17, 1881) its founder, J. Phil. Krieger, Jr., committed suicide at the Western Hotel, corner of Carr Street and Broadway. The cause of the act is indicated by the *Republican* as follows:

"The bank had a good run of business and did fairly well, although it is said to have experienced at least two financial storms, both of which it weathered under the guidance of Krieger, Jr., its cashier. On the afternoon of May 21, 1879, the bank closed its doors. The directors had discovered a slight impairment, and decided it was the wiser plan to suspend, though Krieger, Jr., was in favor of making efforts to tide over the difficulty. At this date the liabilities of the bank were about seven hundred thousand dollars, and its assets were then figured at two hundred and fifty thousand dollars. Mr. John Dierberger first, and afterwards Mr. John Lionberger became assignee. Public feeling over the matter of the failure ran very high, especially as there was a widespread opinion that Krieger, Jr., and one Mayer Goldsoll had conspired together to help themselves in their own speculations by using the money of the bank. The grand jury after a grand jurial investigation indicted Krieger, Sr., the president of the bank, Krieger, Jr., its cashier, and Mayer Goldsoll, a beneficiary of the institution."

North St. Louis Savings Association, established April 2, 1860, the directors being A. E. Erfurt, François Cornet, H. W. Winmann, John F. Wittee, Caspar Stolle, C. L. Holthous, Julius Thamer, and John C. Vogel. In 1864 the association reorganized under a new charter, and commenced operations on the 1st of February of the same year. Louis Espenschied was elected president, and John G. Hermann secretary. In 1866 the real estate at the southeast corner of Fourth and Morgan Streets, part of which was occupied by the building where the association transacted its business, was sold at auction, and the association having a fair surplus of profits, concluded to purchase it, with a view to building a banking-house on one of the two lots. The corner-stone of the building was laid on the 3d of June, 1869. On the 16th of July, 1877, the bank was compelled to suspend and go into liquidation. At the time of the suspension the officers were A. C. Erfurt, president;

E. F. W. Meier, vice-president; H. H. Wernse, cashier; J. H. Dickmann, assistant cashier; Directors, F. Barklage, Theodore Becker, Henry Cornet, A. C. Erfurt, Joseph Kilpatrick, E. F. W. Meier, Frederick Schiereck, J. W. Schloemann, A. W. Schulenberg, William Hake, F. A. Witte.

The cause of the suspension was the depression in the real estate market.

Traders' and Mechanics' Bank, established in October, 1872, suspended in February, 1876. C. L. Kraft was president at the time, and was subsequently appointed assignee.

S. B. Bullock, for twenty-seven years a resident of St. Louis, and for fifteen years a banker, died Aug. 7, 1863.

Among the prominent bankers of St. Louis was Capt. Mark Leavenworth, who died on Feb. 17, 1866, aged forty-one years. He was for a number of years widely known as a river commander and pilot, and for several years prior to his death was a member of the banking firm of Gaylord, Leavenworth & Co., of Olive Street.

The house of Donaldson & Fraley, brokers and bankers, was established in 1868, at the corner of Third and Olive Streets, where the firm has conducted a general brokerage and exchange business ever since. The house was established by John W. Donaldson and Moses Fraley, both of whom are active members of the firm. A branch house in New York is composed of Moses Fraley and Philip J. Goodhart, and transacts business under the firm-name of Fraley & Goodhart.

The Old Banking-House of James H. Lucas & Co.—In 1851, James H. Lucas established a banking-house in St. Louis, and in the following year associated with him John Simonds, the firm-name being Lucas & Simonds. Mr. Simonds was born on the 13th of March, 1800, in Windsor County, Vt. His father removed to St. Louis in 1817, and for several years filled the post of harbor-master, dying in 1839. John Simonds received a common school education, and in 1819 was appointed deputy constable. Two years later he was made deputy sheriff, and in 1825 was appointed United States marshal, but owing to his opposition to Gen. Jackson was removed in 1828. He then became a steamboat captain, and between the years 1828 and 1835 acted as commander of various steamers on the Mississippi. In 1835 he established a large commission house in St. Louis, and successfully pursued this business until 1852, when he entered the banking-house of James H. Lucas as a partner. In 1857 he retired from the firm and established the banking-house of Simonds & Taylor. Capt. Simonds'

first wife was Miss Teresa Geyer, sister of Hon. Henry S. Geyer, whom he married March 4, 1824, and his second wife was Miss Susan M. Kennett, whom he married May 5, 1852. For many years Capt. Simonds was president of the Citizens' Insurance Company, and for a considerable period president of the Board of Underwriters.

In the autumn of 1852 the firm determined to establish a branch banking-house in San Francisco, and for that purpose selected as their agent on the Pacific slope Maj. Henry S. Turner, assistant treasurer of the United States at St. Louis, the name determined upon for the branch establishment being that of Lucas, Turner & Co. A short time previous to this decision, Capt. William T. Sherman, who afterwards became so famous as a general in the Union army, had been stationed at St. Louis as commissary of subsistence, but in September of that year was transferred to New Orleans. About Christmas of the same year Maj. Turner laid before him the details of the plan for the establishment of the branch house in San Francisco, and proposed that he should become a partner in the firm.¹

¹ Henry S. Turner was born on the 1st of April, 1811, in King George's County, Va. In 1830 he was admitted as a cadet at West Point, and in June, 1834, graduated from that institution. He was at once appointed brevet second lieutenant in the First Regiment of Dragoons, then a new arm in the United States service. He served with his regiment on the frontier, his quarters being at Fort Des Moines, Iowa. He became second lieutenant in August, 1835, and was appointed adjutant at the regimental headquarters in July, 1836. He served in this capacity until November, 1838 (he became first lieutenant on the 3d of March, 1837), when he was appointed as aide-de-camp to Gen. Atkinson, and served as such until July, 1839, when he was sent by the War Department with two colleagues to the cavalry school of Saumur, France, to study cavalry tactics and prepare a manual of instruction for that arm of the service in the army of the United States.

On returning to the United States, two years later, he was married to Miss Julia M. Hunt, daughter of Theodore Hunt and Anne Lucas Hunt, and granddaughter of John B. C. Lucas.

After his marriage he was stationed at Fort Leavenworth, and served as adjutant of his regiment until June, 1846. In the interval between these dates he was on duty at Fort Gibson, at Jefferson Barracks, St. Louis, as well as Fort Leavenworth, as acting assistant adjutant-general of the Third Military Department from July, 1844, to September, 1846, during which time he was detailed on an expedition through the South Pass of the Rocky Mountains. When the Mexican war broke out Gen. Atkinson had died, and Col. Stephen W. Kearney, who had been appointed brigadier-general, was placed in command of the Army of the West, on an expedition to New Mexico and California. Maj. Turner, who had become captain of the First Dragoons in April, 1846, was the acting assistant adjutant-general of the army, and his services in the arduous campaign on which it immediately entered were brilliant and highly appreciated by his gallant commander. At San Pasqual, Cal., on the 6th of December, 1846, a fierce attack was made in the early

James H. Lucas, the senior partner, subsequently had an interview with Capt. Sherman, and also presented for his consideration the particulars of the California project, desiring him to accept the position of resident partner and manager in San Francisco. The enterprise struck Capt. Sherman so favorably that he obtained a leave of absence and visited San Francisco. After carefully surveying the field, he

morning on a portion of the United States forces by a swarm of mounted Mexican lancers, and in the combat which ensued Capt. Turner received a painful flesh-wound from a lance; but none of his comrades knew of his mishap until the enemy had been routed. He was in the saddle at the skirmish at San Bernardo on the following day, and participated in that action. The passage of the San Gabriel River was effected on the 8th of January, 1847. The skirmish on the plains of Mesa followed on the 9th of the same month, and for his gallant and meritorious services in these engagements he was breveted major, to date from the first of them.

The Army of the West returned to the United States by the way of El Paso, in the summer of 1847, too late to engage in the operations under Gen. Scott near the city of Mexico. That place was captured in September, 1847. Maj. Turner, who was an essential witness at the trial by court-martial of Col. Fremont, was detained in attendance on that court at Washington City until the treaty of peace in 1848. In July of that year he resigned his commission and devoted himself to civil life. He cultivated a farm about nine miles from the city of St. Louis, and in 1850 was appointed assistant treasurer of the United States in this city. He performed the duties of his office until 1852, when he embarked in the business of banking, in partnership with the late James H. Lucas and Gen. W. T. Sherman. This partnership lasted until 1857. During part of this interval Maj. Turner, together with Gen. (then Capt.) Sherman, resided in San Francisco, where was established a branch of the bank of Lucas, Turner & Co.

The firm was dissolved in 1857, and Maj. Turner returned to his farm. In 1863 he was elected president of the Union National Bank, and served in that capacity until 1869, when he accepted the presidency of the Lucas Bank, which he held until 1874, when he insisted upon resigning the office and devoting his whole time to the care of his large property. In 1858 he had been elected to the House of Representatives of the State, and served most acceptably for two years, declining a re-election. In 1874, when a general uprising against municipal misrule brought about the active participation in city affairs of men who ordinarily refuse political duties, he was induced to become a candidate for a seat in the Common Council, and was elected by his fellow-citizens without distinction of party. The duties of this office he performed not perfunctorily but conscientiously and laboriously for two years, but then insisted on a discharge from further public service. Besides these public duties, he was repeatedly selected as the depository of the most important private trusts. Some of the largest estates that had ever been administered in St. Louis passed through his hands as executor. In every instance the performance of his duties was above all challenge.

During the trying days of 1877, when riotous mobs threatened the peace and good order of the leading cities of the Union, he was conspicuously energetic in organizing and arming the citizens for the suppression of disorder. Maj. Turner died on the 16th of December, 1881, universally regretted by the citizens.

determined to accept the proposition of Messrs. Lucas and Turner, and resigned his commission in the army, to take effect on the 6th of September, 1853. On the 20th of that month he left New York with his family by steamer for the Pacific coast, and arrived safely in San Francisco. Maj. Turner was associated with him in the management of the branch bank until 1855, when he (Turner) returned to St. Louis, and Capt. Sherman was left alone to tide the affairs of the agency over the crisis of that year. Nearly every other bank in San Francisco closed its doors, but the house of Lucas, Turner & Co. survived the "run." Early in 1857, however, he informed the parent house in St. Louis that in his opinion the maintenance of the San Francisco establishment was no longer advisable. His suggestion was approved, and he accordingly closed up the affairs of the branch bank, and with his family removed to Lancaster, Ohio. Subsequently Mr. Lucas and Maj. Turner determined to establish a branch house in New York, which was done on the 21st of July, 1857. In the fall of that year the great financial panic necessitated a suspension of the St. Louis firm, but Mr. Lucas assumed the liabilities and paid all the creditors, with ten per cent. interest.

In Normandic of old, in what is now the department of the Eure, at the head of navigation on the river Brille, which empties into the estuary of the Seine, stands the ancient town of Pont-Audemer,—not a large place, but venerable, with a history of its own, as you will read in Thierry and in Martin; with seven thousand or eight thousand people, and manufactures of leather and cloth. Its leather products are quite famous in their way, and it is to the fact of manufactures being of old establishment in Pont-Audemer that St. Louis owes the residence there of the Lucas family, who have done so much to improve and adorn the town and city; for manufactures must have manufacturers, and these again their wives and daughters, and thereby hangs a tale. The *procureur du roi* (king's prosecuting attorney) of Pont-Audemer from 1760 onward was Robert Edward Lucas. An old Norman family, the Lucases, with a terribly long pedigree,—Lucas, Lucie, Fitz-Lucas, De Lucy, Filius Lucæ,—you will find their names in the roll of Battle Abbey, in the English Domesday Book, in Holinshed, in Joinville, in Camden, Leland, and Froissart, proud they were accordingly, sticklers for rank and social distinction. Robert Edward Lucas married for his wife la Mademoiselle de L'Arche. He had a fine old family seat outside the town, and the office of *procureur* was in some sort almost hereditary in his family. His wife bore him a son, Jean Baptiste Charles Lucas,

UNIVERSITY OF ILLINOIS.

Aug. 14, 1758, and this boy from the first was looked upon as destined to be his father's successor. He was educated with the position steadily in view, and with the profession also in which it was intended he should succeed his father,—an education at once liberal and exact, classical and technical, received in part at the university founded in Caen by King Henry VI. of England, and in part at the Honfleur and Paris law schools. At Honfleur, J. B. C. Lucas met his fate, in the person of Mademoiselle Anne Sebin, daughter of a manufacturer of cloth. Because her father was in trade, while the family of Lucas were *gens du droit*, Mademoiselle Sebin was not looked upon as his social equal. But she was handsome, well educated, and rich in mental endowments, and Lucas did not care much for the social arrangements which not only stood between him and the object of his affections, but also proposed to marry him to quite another person. Besides, in Paris he had become acquainted with Jacques le Roy de Chaumont, son of the landlord at Passy with whom Franklin and Adams sojourned during the times of the Revolution, and through him was imbued with American ideas, becoming such a hot Republican, in fact, that he and the king's attorney, his father, could not agree at all. Le Roy was coming to this country to buy land and settle in Western New York. Lucas accompanied him, arriving in the United States in 1784, having first married Anne Sebin. As soon as he became sufficiently acquainted with the English language, Lucas sent for his wife to join him in the western wilds. Albert Gallatin, Lucas' lifelong friend, who had come out in 1780, had bought land in Virginia, but the Indians prevented him from occupying it, and he was settled near Pittsburgh. Thither went Lucas also, and bought a farm, called "Montpelier," on Coal Hill, on the Monongahela River, six miles from Pittsburgh. Here some of his children were born,—Robert, the eldest, who was cadet at West Point by Gen. Wilkinson's appointment, and died in the service of his country in 1813, on the Canada frontier; Charles, the lawyer, killed in a duel by Thomas Hart Benton; Adrian the planter, who was drowned while crossing on the ice on Loutre Lake, Mo., in 1804; Anne, born Sept. 23, 1796, widow and survivor of Capt. Theodore Hunt, U.S.N., and Wilson P. Hunt, the great fur-trader, who afterwards kept store in St. Louis (Hunt & Hankinson); James H., born Nov. 12, 1800; and William, born in 1798, who died in 1837. Mrs. Anne Sebin Lucas, who was born in Honfleur, Aug. 10, 1764, died in St. Louis, Aug. 3, 1811.

J. B. C. Lucas, a man of great parts naturally and of superior culture, began at once to take part in pub-

lic affairs, following the example of Gallatin. Like Gallatin, he took the popular side in the excise troubles of that section, acquiring great influence, and being able to do much good by conservative and moderate counsels. His next neighbor was Maj. Ebenezer Denny, a Revolutionary officer, and one of Harmar's staff. The two were opposing candidates in 1795 for the Pennsylvania Legislature. Denny was a universal favorite, Lucas scarcely known, speaking English with difficulty, and charged by partisan maligners with being an avowed atheist, and with permitting his wife, during his absence in France, to have his land plowed on Sunday. Nevertheless Lucas was elected, though next year, in a purely local contest, Denny beat him badly for county commissioner, receiving nearly every vote. Lucas himself told this to Denny's son, years after. They were great friends, went to the polls together, and Denny contradicted on the stump the calumnies circulated about his political opponent. Lucas had a chance to repay this generosity in kind long years afterward. When he was judge of the Territorial Court in St. Louis, a case came before him in which Denny, who was not present, was plaintiff, and Alexander McNair, first Governor of the State, and a very popular and influential man, was defendant. Denny's case rested on his own deposition and was likely to go against him, when Judge Lucas charged the jury, both in French and English, to this effect: "When I lived in Pennsylvania," he said, "I was the next neighbor to the plaintiff; we differed in politics, we were opposing candidates for office, but there never was a more honest man. It is impossible that he could set up any claim that was not just and true." The jury found for Denny without leaving the box. Lucas was a man of remarkable prudence and judgment. Jefferson selected him, in the beginning of his administration, to go West and ascertain the temper of the French and Spanish residents of Louisiana. This was about 1801. He went incognito to St. Louis, and thence to Ste. Genevieve and New Orleans, taking the name of *Pantreaux*.

In 1803, Lucas was member of Congress from Western Pennsylvania, and on the purchase of Louisiana being completed, was at once appointed by Jefferson commissioner of land claims and judge of the Territorial Court. He sold his Coal Hill farm for five thousand dollars and went West with his family, arriving in St. Louis in September, 1805, and immediately investing his money in land in and adjacent to the town. Mrs. Hunt, in her cheerful little memoir of her family, after mentioning that a Pittsburgh lot, taken by her father for a bad debt, and

afterwards traded for a horse, had sold for twenty-five thousand or thirty thousand dollars, adds, "On the advice of my mother, who had learned experience from the sale of the Pittsburgh lot, he invested his salary in the purchase of land. He bought mostly outlots, facing on what is now Fourth Street, each lot being one arpent wide by forty arpens deep. All this land was used as a common field, each man cultivating what he pleased. There were no fences of any kind on it. By purchasing a lot at a time, he at length came to own all the land from Market Street to St. Charles, and from Fourth Street to Jefferson Avenue. He did not buy it as a speculation, but for what it would produce; it turned out, however, to be an immense speculation, for the whole seven arpens front did not cost him over seven hundred dollars, and that property is now worth, I suppose, seventy millions! A hundred dollars was what he usually paid for an arpent in width by forty deep, though sometimes he got it for less. The heirs to this vast estate need not thank my father for it, for he was too much of a politician to think of investing his money in land; it was my mother's foresight that suggested the investment which turned out so well."

This is rather a feminine way of looking at things, perhaps. It needed the sagacity of a man, not the instinctive security women feel in land-holding, to see the possibilities of the future in the untamed and unprogressive trading town of that day, with streets all mud-holes, Chouteau's hill a barren waste, and wolves prowling in the suburbs at Sixth and Chestnut Streets when the snow fell. James Lucas, with his traps, caught prairie-hens where the Laeledge Hotel now stands, and rabbits on the site of the Four Courts.

Judge Lucas, so far from being an "avowed atheist," was, like all his family, a consistent member of the Catholic Church. So far from being a "confirmed poker-player," gambling away whole blocks of houses, as some alleged "old inhabitants" have gone out of the way to charge him with being, he was a man of refined, scholarly tastes and domestic habits, giving to his family all the time which he could spare from his business, and looking in person after the education of his only daughter, a lady of peculiar graces both of mind and person. He was a man of strong feelings, and grief for the untimely loss of his sons, five of the six of whom died sudden deaths in their youth and prime, bowed him under a weight of affliction such as would have crushed a less composed and resolute soul. These losses did, indeed, drive him into retirement and seclusion in his private life after the death of his accomplished wife and his distinguished son Charles, but they never

distracted him from close attention to his affairs. These were multifarious and complicated, as, besides the care of his own immense estate, with all its various interests, he had a large law business and a great amount of fiduciary concerns for others,—trusteeships, executorships, and administrations. It is related of him that in spite of all the innumerable time sales and leases made by him, through which he became the creditor of thousands of persons, he never foreclosed and sold up more than five mortgages, and the most of these by request of the debtors.

In 1814, having occasion to go to Washington, a journey then indeed, and scarcely to be made except on horseback and in the course of months, he took with him his son, James H., a frolicsome youth, full of fun and humor and rather coltish in his high spirits and free temper, naturally somewhat impatient of restraint, having lost his mother so young in life. Returning West, James H. Lucas was sent to school at the college of St. Thomas, Nelson Co., Ky., an institution in charge of the Dominican order of friars. Among his schoolmates at this academy were Jefferson Davis, with Louis A. Benoist, Bernard Pratte, Gustave Soulard, and Bion Gratiot, all of St. Louis. In 1816 he and his brother William were students in Jefferson College, Canonsburg, Pa., an institution founded in 1802, and under charge of the Presbyterians. He was still here when, Sept. 27, 1817, his brother Charles died of the wound inflicted by Col. Benton's pistol. It is said, we know not how truly, that his father, disliking the lad's propensity for mischief, sent him from here to a school in New Hampshire. He may, perhaps, have been "rusted." At any rate, he did travel, about the time assigned, in New England, and whether he sent his father a "declaration of independence" or not, he studied law in Hudson (or Poughkeepsie), N. Y., supporting himself the while by teaching French in a young lady's seminary. In Hudson he studied in the office of Elisha Williams, a leading lawyer. Afterwards he went to the well-known law school of Judge Reeves, in Litchfield, Conn., where he had for his fellow-students men like Governor Ashley, Ichabod Bartlett, of New Hampshire, and N. P. Talmage, of New York, afterwards United States senator.

In 1819 he and Ashley, tiring of the "land of steady habits," returned to the West, the two with a companion forthwith embarking on a keel-boat with the purpose of descending the Mississippi and seeking their fortunes in South America, then in all the turmoil and excitement of revolution. Having got as far as Montgomery Point, on the White River, they seem to have changed their minds, took a pirogue up

the river, passed through the "cut-off" to the Arkansas, and landed at Arkansas Post, famous for its founder Tonti, the companion of La Salle, and for the connection of Laclède with the place. Here Lucas was fortunate enough to become acquainted with Mr. Notrebe, the chief merchant and planter in that section, an elegant French gentleman of culture and refinement, with whom Lucas sealed a lifelong friendship. Doubtless this new acquaintance had a most beneficial influence upon young Lucas, for he seems at once to have settled down, resuming his law studies with energy, determination, and persistence, supporting himself by teaching school, and giving all his leisure hours to study. Here, and at Little Rock later, he followed other means of livelihood also, set type on the *Arkansas Gazette*, worked a plantation, and ran a ferry opposite the place, charging twenty-five cents' toll for his fares, foot passengers. He secured the appointment of county clerk also, until he passed the bar, when he took his saddle-bags and began to ride the circuit. This industry was not without its reward, for Governor James Miller, of the Territory, made him in 1825 major in the militia, and afterwards judge of the probate court. In this position Mr. Lucas remembered to have often performed the marriage ceremony, and it was he who married Albert Pike, the poet and general.

On May 10, 1832, he was himself married to Marie Emilie Desruisseaux, a native of Arkansas Post, but French in descent. The father of Miss Desruisseaux was Indian agent at the post of Arkansas at the time,—a man of consequence and ability, well educated, and possessing great influence. He was a Canadian by birth, French in his origin, and had come to that remote station from Canada by way of the ancient town of Cahokia. On the mother's side, the late Mrs. James H. Lucas was more American in blood. Her mother was a Van Noye, daughter of a native of New Jersey (of Dutch descent) who had married a Miss Anderson, of Virginia, and had seen service during the war of the Revolution. Thirteen children were the fruits of James H. Lucas' marriage, of whom six sons and two daughters survived him. Mrs. Marie E. Lucas died on the 24th of December, 1878, after a married life of forty-six and a half years, being then only in her sixty-fourth year. At the time of her death a St. Louis journal said that, "though occupying a position in society which the advantages of wealth and refinement entitled her to assume, she was unpretentious and unassuming. She was ever the dutiful wife, the indulgent mother, and faithful friend, devoted to every duty which a religious faith and matronly qual-

ities called upon her to exercise. Surviving her husband five years, she lived to see her numerous family settled in life, enjoying the large portions which fell to them from one of the largest estates in St. Louis. Besides her six sons she leaves two sons-in-law, Dr. J. B. Johnson, of St. Louis, and Judge Hager, of California."

In 1837 his brother William died, and James H. was the only living son of John B. C. Lucas, who was already old, getting feeble, and feeling lonesome. His daughter, Mrs. Hunt, had only at this time been married a year to her second husband, Wilson P. Hunt, and of course her own *ménage* demanded all her time. John B. C. Lucas wrote to his son James to come home to him, and, prompted by filial duty, the young man gave up his prospects in Arkansas and removed with his family to St. Louis. He arrived here in October, 1837, and settled on what Mr. Lucas called "the farm," or home-place, which his father gave him for his own. It consisted of fifty acres of land, and was valued then at thirty thousand dollars. His residence was near the fountain in Lucas (now called Missouri) Park, and he soon took the entire control and management of the extensive Lucas property, the judge, now nearly eighty years old, having become infirm and feeble. From 1837, therefore, James H. Lucas is thoroughly and effectively identified with the progress of St. Louis, and its growth in wealth and prosperity.

In 1842, on the 18th of August, John Baptiste Charles Lucas died, full of years and honors, and James H. Lucas and Annie L. Hunt, his sister, succeeded to the entire estate.

The original tract owned by the estate was bounded north by St. Charles Street, on the east by Fourth, south by Market, and west by Pratte Avenue. That embraced the Lucas property up to 1837. The last acquisition made by the old judge was Côte Brillante, consisting of two hundred and forty acres, which was bought for one hundred and fifty dollars in gold, and comprised the undivided land owned by Mr. Lucas and Mrs. Hunt. Mr. Lucas had also another farm, the New Madrid location, his country-seat, called "Normandy," on the St. Charles Rock road, nine miles from the city. This portion, now belonging to the Lucas estate, comprises eight hundred acres. Also, at the mouth of the Missouri River, there are six hundred and forty-three acres belonging to the estate. This is an old Spanish fort, where the battle of Bellefontaine was fought, in which fight Charles Lucas participated as colonel. There is also the Courtois tract, consisting of four hundred arpens, near Eureka Station, on the Maramee, still undivided; also twenty

acres on the Clayton road, the old Barrett place. In the management of the city portion of his vast estate, in building and improvements, Mr. Lucas devoted the remaining years of his protracted life, and but rarely engaged in the turbulent excitement of political affairs. He was, to be sure, State senator from 1844 to 1845, making a good serviceable member, and in 1847 consented to run as the Whig candidate for mayor in a triangular fight in which W. M. Campbell, Native American, and Judge Bryan Mulvanphy, Democrat, were his opponents. Mr. Lucas was simply the color-bearer in a forlorn hope, and he ran for the sake of his party, not to be elected. Mulvanphy triumphed over both the other candidates.

In business enterprises of a public character Mr. Lucas took a conspicuous and leading part. He was always ready to subscribe his money liberally and give his time freely to the service of any undertaking which he thought likely to promote the welfare and prosperity of St. Louis. He subscribed thirty-three thousand dollars at the start to the stock of the Missouri Pacific Railroad Company, of which he was twice elected president, promoting its success in many ways, and especially by shaping and indorsing its financial exertions. He helped to organize the St. Louis Gas Company, of which he was also president; was a director in the Boatmen's Savings Institution, and a large shareholder and director in nearly all the other prominent moneyed institutions of this city. In 1851, as hertofore stated, in order to promote his own extensive financial operations, he established a banking-house in St. Louis, branches of which were afterwards established in New York and San Francisco. He was now building very extensively, besides his ramified connection with many joint-stock enterprises, and the Lucas Market and the Lucas Place, both laid out by him, are perpetual monuments of the liberality of his great projects, and the taste which strengthened and embellished his judgment. His bank enjoyed, as it deserved, the confidence of the community, the vaults of the St. Louis house sometimes containing deposits to the value of two and a half millions.

In 1857 the banking firm of Lucas, Simonds & Co., of St. Louis, and the branch in San Francisco, under the firm of Lucas, Turner & Co., went under with the financial panic of that year. It was no reproach to the stability of any concern to yield temporarily to the pressure of such convulsions. Mr. Lucas gave his notes to all the creditors, some of whom valued the security so highly, with the rate of interest paid on them, that Mr. Lucas had not succeeded in calling them all in three years afterwards. In these financial troubles, Mr. Lucas, as we have seen, as-

sumed the entire liabilities, and paid off every creditor with ten per cent. interest, the loss to him amounting in the aggregate to about half a million of dollars. The debtors of the banking houses he never sued, but accepted whatever was offered.

In 1836, the year before this monetary cataclysm, Mr. Lucas sought a temporary relaxation from his labors in an extensive tour through Europe, his traveling companions being his son William and his daughter Elizabeth (now the wife of Judge Hager, of California). He visited the home of his ancestors in Normandy, and bought the old homestead near Pont-Audemer. Returning home he attended with assiduous industry to the management of his business. Under the transforming hand of time, and the rise in the value of real estate, his riches increased with the rapid progress of St. Louis.

Of this rapid growth and unexampled progress Mr. Lucas was at once the observant witness and the sagacious promoter. He enriched himself by contributing wisely and largely to enrich and beautify the city, and so freely did he employ his vast means that he was generally in debt for ready cash, and compelled to borrow money to help forward the innumerable enterprises with which he was associated. Sometimes his great estates made him "land poor," and he once told a friend, at a meeting at the Planters' Hotel, many years before his death, that while he was worth, as he supposed, two million dollars, he frequently had not money enough to go to market with. It was not with many people that he became thus confidential, for he was a quiet man, rather reserved, and fond of keeping his own counsel, but at times, in the company of a few friends, he unbent from his usual reserve, and was eminently social and fond of telling sketchy anecdotes of his early life and adventures.

Mr. Lucas was a man of marked capacity and positive character, and of the most undoubted integrity. He was modest and unassuming in his deportment, and retiring in his habits, with no disposition to put himself forward, but in whatever position he was placed he was emphatic and decided.

With all these elements of a strong character, he was fitted to assume the responsibilities devolved upon him by his father and to manage a great estate, which by his prudence, foresight, and industry was so largely increased in value and kept intact for the benefit of his family.

His fortune was very large. He owned two hundred and twenty-five dwellings and stores previous to the division of his property in 1872. His taxes the year before his death on his portion of the estate

RESIDENCE OF THE LATE JAMES H. LUCAS,
NOW OCCUPIED BY HENRY V. LUCAS,
NORMANDY PARK ST. LOUIS GO., MO.

LIBRARY
OF THE
UNIVERSITY OF ALBERTA

were one hundred and twenty-six thousand dollars. He had in all three hundred and odd tenants. Before the division of two millions to his wife and eight children, the income was forty thousand dollars per month, amounting to nearly half a million annually. After giving away the two millions, the portion of the estate left was estimated by good judges at five millions. He was also largely interested in the Pilot Knob Iron Company, owning one-fifth of the stock, which he gave away to his children, being twenty-five thousand dollars to each, and not included in the two millions given them as before stated. At an early day his father, Judge Lucas, lived in a stone house on Seventh Street, between Market and Chestnut, and he also had a farm residence in the woods, on the site of the First Presbyterian Church, and one of the apple-trees of the old orchard is yet standing.

The residence of Mr. Lucas was for many years on the southwest corner of Ninth and Olive Streets, but of late years he resided in an elegant dwelling on Lucas Place, bought of John How in 1867.

Mr. Lucas gave as liberally as he subscribed. The city owes him for a quit-claim deed for the old jail lot; he built the Lucas Market, and gave the Historical Society real estate valued at ten thousand dollars. He gave the ground upon which the Planters' Hotel was built, and which was originally called "Lucas Hotel."

He donated eleven thousand dollars towards building the Southern Hotel. He encouraged the new Exchange enterprise by selling a portion of the ground to the association at a low price and by taking twenty thousand dollars' stock, with assurances that the Fourth Street front when built would be equal in elegance and architectural design to the building of the Chamber of Commerce Association. He gave to the city Missouri Park. Two or three times he and Mrs. Hunt gave lots for a cathedral, besides lots and donations of money to numerous charitable institutions.

The following instance of his liberality may also be mentioned in this connection: At the close of the war in 1865, a man came up here from Little Rock, with three thousand dollars in "starvation bonds," which he endeavored to sell, in order to meet his pressing wants. The only offer he received was twenty cents on the dollar for the bonds. Mr. Lucas took them at their face, making only one request, that the party selling them would on his return to Arkansas give "Old Larky," who was in indigent circumstances from the war and whom he knew, some meat and flour. The bonds he subsequently gave away to old Dr. Price to pay his taxes with, as they were good in Arkansas for that purpose.

James H. Lucas died Nov. 11, 1873, at his residence, 1515 Lucas Place. His eight children survived him, six sons and two daughters, all of whom are married. He was buried with quiet but imposing ceremonies from St. John's Church, corner of Chestnut and Sixteenth Streets, Archbishop Kenrick officiating and Bishop Ryan preaching the funeral sermon in presence of nearly all the leading citizens of St. Louis, assembled to do honor to the deceased good man and honored fellow-citizen. The remains were interred in Calvary Cemetery.

Mr. Lucas' sister, Mrs. Anne L. Hunt, the other heir to the estate of J. B. C. Lucas, survived him for several years, dying April 13, 1879, at her residence, which, like her brother's, was also in Lucas Place. In youth she was a bright and lovely girl, precocious in intellect and a favorite in society. As has been stated above, she married early and had two husbands. Her large estate was managed by her with excellent prudence and judgment, while of its income she seemed to look upon herself as chiefly an almoner, giving very largely to charities, some of which originated with others, but some were planned and conceived by her alone. She gave in the most unostentatious way, so, indeed, as she used to say, that only she alone could see the fruits of her beneficence. It is said that in this way, in money and real estate, she gave away nearly a million dollars. Among the institutions founded by Mrs. Hunt were the sisterhood and house of the Good Shepherd, and the church and school of St. Mary's. She also materially aided the Little Sisters of the Poor.

Mrs. Hunt was her own executrix in a great measure, distributing her estate herself during the last four years of her life. She was as charitable in thought and speech as she was in deed, lived simply and plainly, and had such an aversion to ostentation that she particularly directed all the arrangements for her own funeral, so as to prohibit everything like display. She left two children, nineteen grandchildren, and twenty-two great-grandchildren.

The St. Louis Clearing-House Association was organized in the latter part of 1868, and began active operations on December 24th of that year with the following members:

Accommodation Bank, Bartholow, Lewis & Co., Boatmen's Savings Institution, Butchers' and Drovers' Bank, Central Savings-Bank, Commercial Bank, Exchange Bank, First National Bank, Fourth National Bank, Fourth Street Bank, Franklin Avenue German Savings Institution, Franklin Savings Institution, German Bank, German Savings Institution, Haskell & Co., International Bank, G. H. Loker & Brother, Mechanics' Bank, Merchants' National Bank, National Bank State of Missouri, National Loan Bank, North St. Louis Savings

Association, People's Savings Institution, Provident Savings Institution, St. Louis National Bank, St. Louis Building and Savings Association, Second National Bank, State Savings Association, Third National Bank, Traders' Bank, Union National Bank, Union Savings Association, United States Savings Institution, Clark Brothers & Co., Western Savings-Bank. The original management was composed of: President, W. E. Burr, president St. Louis National Bank; Vice-President, Charles Hodgeman, cashier Boatmen's Savings Institution; Committee of Management, J. H. Britton, president National Bank State of Missouri; Felix Coste, president St. Louis Building and Savings Association; J. C. H. D. Block, president Fourth National Bank; W. H. Maurice, cashier National Loan Bank; John R. Lionberger, president Third National Bank; Manager, James T. Howenstein.

In 1873, Charles Parsons succeeded Mr. Burr as president, J. R. Lionberger succeeded Mr. Hodgeman as vice-president, and Edward Chase succeeded Mr. Howenstein as manager.

On the 12th of July, 1875, an amendment (section 18) to the constitution was adopted, providing that

"no member shall be added to this association unless such member shall have a paid up capital of \$150,000, and no member having a less amount of paid up capital than \$150,000 shall be allowed to make the exchanges through the Clearing-House for any non-member, except under such contracts as are now existing."

The Clearing-House was originally located in the Exchange Bank building, but is now situated at No. 528, Chamber of Commerce building.

The present government is as follows:

President, Charles Parsons, president State Savings Association; Vice-President, Thomas E. Tutt, president Third National Bank; Committee of Management, Joseph O'Neil (president Citizens' Savings-Bank), William H. Thomson (cashier Boatmen's Savings-Bank), E. C. Breck (cashier Exchange Bank), Richard Hospes (cashier German Savings Institution), R. R. Hutchinson assistant cashier Mechanics' Bank; Committee of Arbitration, C. B. Burnham (president Bank of Commerce), S. E. Hoffman (president Valley National Bank), William Nichols (cashier Commercial Bank), James E. Yeatman (president Merchants' National Bank), George A. Baker (president Continental Bank); Committee on Membership, T. A. Stoddart (cashier Third National Bank), John Nickerson (cashier St. Louis National Bank), F. W. Biebinger (cashier Fourth National Bank); Manager, Edward Chase; Members, Laclede Bank, Boatmen's Savings-Bank, Commercial Bank, Fourth National Bank, Franklin Bank, German Savings Institution, International Bank, Mechanics' Bank, Merchants' National Bank, Continental Bank, Provident Savings Institution, St. Louis National Bank, Bank of Commerce, State Savings Association, Third National Bank, Union Savings Association, Citizens' Savings-Bank, Valley National Bank.

CHAPTER XXXIII.

INSURANCE, TELEGRAPH, POSTAL SERVICE, GAS, AND HOTELS.

Fire, Marine, and Life Insurance.—During the earlier portion of the city's history insurance was effected through the agency of foreign companies which had established branch offices in St. Louis, and it was not until 1831 that an effort was made to organize a home insurance company. One of the earliest insurance agents was Edward Tracy, of Tracy & Wahrendorff, who, on the 14th of June, 1824, announced that he would insure St. Louis property as the representative of the Farmers' Fire Insurance and Loan Company of New York. In February, 1826, announcement was made of the appointment of H. C. Simmons as agent of the Protection Fire and Marine Insurance Company of Hartford, Conn., which authorized him "to insure against the hazards of fire and against the hazards of inland navigation on the lowest terms." On the 15th of February of the following year, John Shackford informed the public that he would insure against fire and river risks. On the same day it was announced that Edward Tracy, of Tracy & Wahrendorff, would continue to act as the St. Louis agent of the Farmers' Fire Insurance and Loan Company of New York, and that Wilson P. Hunt, agent, would effect insurances in St. Louis on behalf of the Traders' Insurance Company of New York. Mr. Hunt's advertisement as agent of the Fire and Inland Navigation Insurance Company was renewed in September, 1828, as were also those of Edward Tracy, agent for the Farmers' Insurance and Loan Company of New York, and H. C. Simmons, agent for the Protection Insurance Company of Hartford, Conn. In March, 1829, Mr. Tracy and Charles Wahrendorff were still conducting a marine insurance business under the firm-name of Tracy & Wahrendorff. On the 8th of February, 1831, notice was published to the effect that those who wished to take stock in the Missouri Insurance Company of St. Louis were informed that books had been opened for that purpose under the supervision of a committee appointed by the Legislature. This committee was composed of George Collier, John Mullanphy, Peter Lindell, James Clemens, Jr., Thomas Biddle, Henry Von Phul, Edward Tracy, and William K. Rule. About five weeks later (March 15, 1831) it was announced that the company had gone into operation with very favorable prospects. The following were the directors for the year: John Mullanphy, Thomas Biddle, George Collier, P. Lindell, James

Clemens, Jr., Bernard Pratte, Henry Von Phul, and William Hill. George Collier was president of the company, and John Ford secretary.

In April following notice was issued that the capital, one hundred thousand dollars, having been secured, the company was prepared to insure steamboats and every other description of vessels against the dangers of sea or inland navigation; also stores, warehouses, dwelling-houses, mills, factories, and buildings in general, merchandise, household furniture, vessels building or in port, and their cargoes, and every description of personal property against damage by fire. The office of the company was situated on Main Street, near Vinc, "in the south end of the late dwelling of P. Chouteau." The business hours were stated to be "from 9 until 1 p.m., and from 3 o'clock until sundown." In February, 1837, a meeting of the Missouri Life Insurance and Trust Company was held, at which Edward Tracy was unanimously elected president, and Martin Thomas vice-president and cashier. On the 13th of February, 1837, notice was given that the books of subscription to the capital stock of the St. Louis Insurance Company would be opened on the 20th of March, at the office of the Missouri Insurance Company, under the supervision of William G. Pettus.

The commissioners whose signatures were appended to this notice were Theodore Labeaume, Christopher Rhodes, John W. Johnson, Thomas S. Stewart, Hardage Lane, William G. Pettus, Thomas Andrews, John Ford, William L. Sublette, John Shade. On the same day the commissioners of the proposed "Union Insurance Company" announced that subscription books would be opened "at 10 A.M. on Monday next at the counting-room of Von Phul & McGill, "and would be kept open for ten days, or until the stock was subscribed for." The commissioners were Augustus Kerr, Theodore L. McGill, William Hempstead, J. G. Lindell, Daniel P. Page, and Edward Walsh. Similar notices with regard to the proposed formation of the Citizens' and Marine Insurance Companies were issued on the 16th and 20th of February respectively. At an election for trustees of the Missouri Life Insurance and Trust Company, held in December, 1837, the following were elected:

Edward Tracy, Pierre Chouteau, Martin Thomas, George Collier, Henry Von Phul, William Glasgow, Nathaniel Paschall, John Walsh, Joseph Charless, Daniel D. Page, Augustus Kerr, George K. McGunneagle, M. Lewis Clark, all of St. Louis; John M. White, of Selina, Mo.; John M. Derby, of Boston, Mass.; David B. Ogden, C. T. Catlin, J. D. Beers, of New York; George Hanly, of Philadelphia.

The subscribers to the stock of the St. Louis Floating-Dock and Insurance Company were notified on the

25th of August, 1838, that a meeting would be held at the counting-room of Messrs. Charless & Blow on the 6th of September for the purpose of electing thirteen directors. The commissioners who gave this notice were Robert Walsh, John D. Daggett, Thornton Grimsley, Hugh O'Neil, Joseph C. Laveille, Thomas Andrews, John Shannon, and James S. Thomas. In April, 1839, the *Republican* announced that the St. Louis Perpetual Insurance Company had purchased the lot then occupied by it for twenty thousand dollars. The company had a capital of three hundred thousand dollars, which, however, had not at that time been paid in full, although it was stated that the amount would be secured in a few months. The institution had already begun to receive money on deposit.

The Perpetual Insurance Company also transacted a savings-bank business, as appears from a brief newspaper mention of the fact in April, 1839. At the election of directors of this institution held Jan. 4, 1841, John B. Camden, William M. Tompkins, Kenneth McKenzie, John J. Anderson, S. J. Bacon, Joseph Stettinius, and H. A. Garstens were chosen. March 30, 1843, the public was informed that the St. Louis Perpetual Insurance Company had "fully resumed its insurance business."

In the *Republican* of July 19, 1849, mention is made of the fact that the St. Louis Floating-Dock and Insurance Company, "which was revived a short time previous to the late disastrous fire," met with a heavy loss on that occasion. Notwithstanding the fact, however, that the losses amounted to one hundred and twenty thousand dollars, it was able within sixty days to adjust every loss, with the exception of one which involved a legal doubt. The stockholders about this time increased the capital stock one hundred thousand dollars, and the company was reported to be "doing a handsome business."

At the election of the St. Louis Insurance Company held in September, 1852, J. E. Yeatman, Charles Miller, J. D. Osborne, E. Y. Ware, S. K. Wilson, J. C. Rust, J. B. S. Lemoine, J. D. Houseman, L. Levering, George Knapp, George K. McGunneagle, Abner Hood, and T. Grimsley were chosen directors for the year.

On the 14th of July, 1853, the directors of the Pacific Insurance Company organized at the office of Leffingwell & Elliot by the election of A. B. Chambers, president, and Walter B. Foster, secretary. It was announced that the company would be prepared to commence business "at an early day next week."

CITIZENS' INSURANCE COMPANY.—On the 16th of February, 1837, a notice was published to the effect

that the Citizens' Insurance Company was about to be organized, the 27th being named as the day for opening the subscription books at the counting-room of Alfred Skinner. The commissioners were George W. Call, James Clemens, Jr., Alfred Skinner, H. L. Hoffman, John F. Darby, Henry Chouteau, David S. Hill, James S. Thomas, and John Shannon. The organization was duly effected, and the company, whose offices are located at the corner of Third and Chestnut Streets, has had a flourishing career of more than forty-five years' duration. Its actual cash capital is \$200,000; surplus, \$143,553.85; and its business, which amounts to about \$80,000 per annum, is conducted on sound and conservative principles.

The company transacts a general fire insurance business, which is principally local, being confined almost exclusively to St. Louis County. The officers of the company¹ during 1882 were E. O. Stanard, president; H. D. McLean, vice-president; John P. Harrison, secretary; Directors, E. O. Stanard, George H. Plant, Theo. Bartholow, H. C. Haarstick, Craig Alexander, J. G. Chouteau, A. Nedderhut, H. D. McLean, George Bain, J. B. M. Kehler, W. S. Humphreys, A. T. Harlow, W. P. Howard, A. O. Grubb, and Theo. Booth.

THE MARINE INSURANCE COMPANY, located at 212 North Third Street, was incorporated by the Legislature on the 25th of January, 1837, and books were opened for subscriptions to the stock on the

¹ One of the most prominent officers of the Citizens' Company was William Renshaw, Sr., who died at the residence of his son at Fulton, Mo., on the 14th of March, 1864, aged seventy-two years. Mr. Renshaw removed to St. Louis in 1818, when the future great city was an unpretentious town, and first established himself in business as a member of the firm of Renshaw & Hoffman, which continued in existence for a number of years. At a later period he was made secretary and then president of the Citizens' Insurance Company, which under his management enjoyed, as it still enjoys, a large share of public favor.

Another active officer of this venerable company was Gen. W. D. Wood, who died in St. Louis on the 2d of February, 1867. Gen. Wood was a native of Pennsylvania, but for twenty years had been a citizen and resident of St. Louis. He was educated for the medical profession, but having a preference for business pursuits, became a partner in a hardware house in St. Louis. Subsequently and for several years prior to the war he was secretary of the Citizens' Insurance Company. In 1861, on the breaking out of hostilities, he was appointed a member of Governor Gamble's staff with the rank of colonel. He commanded a regiment in Missouri during the early years of the war, and in 1863 proceeded with the Union forces to Arkansas. He was given command of a regiment, and sometimes of a brigade, until the close of the war. After the surrender of the Confederate armies he was promoted to the rank of brigadier-general. In 1866 he obtained a charter for the Occidental Insurance Company, and was elected president of that corporation.

20th of February following at the counting-room of Von Phul & McGill. The commissioners were John W. Reel, Theodore McGill, George Sproule, William Hempstead, James C. Way, William Finney, Edward Walsh, Samuel S. Reyburn, Augustus Kerr, and Edward Tracy. On the 15th of March, John W. Reel was elected president, and Samuel Hough secretary, and the company speedily entered upon a prosperous career. The present capital stock of the company paid up is \$150,000. Among the assets are real estate valued at \$20,000; Kansas Pacific Railroad bonds, \$120,000; Missouri Zinc Company's stock, \$28,200. The company has a surplus, over all liabilities, amounting to \$46,799.68. The business transacted by this company is a general fire, marine, and inland insurance. The officers for 1882 were Samuel M. Edgell, president; James A. Bartlett, vice-president; and S. G. Kennedy, secretary. Directors, S. M. Edgell, C. S. Greeley, R. P. Hanenkamp, Eben Richards, John H. Beach, R. B. Brown, D. Treadway, W. H. Chick, H. W. Hough, John T. Davis, Samuel Cupples, Abram Nave, John A. Bartlett, Hugh Rogers, C. Fath, A. O. Grubb.

THE HOME MUTUAL FIRE AND MARINE INSURANCE COMPANY was chartered in 1846, and the first annual meeting was held in May, 1847. It then had about nine hundred members. The directors chosen were B. F. Edwards, J. M. Krum, D. D. Page, J. A. Eddy, I. L. Garrison, W. A. Nelson, J. Kern, J. Whitehill, and Reuben Knox. The company continued in existence, doing a general fire and marine insurance business, until the 9th of March, 1880, when it was declared insolvent by decree of court, and its affairs placed in the hands of the superintendent of the Insurance Department of the State for settlement.

THE MISSOURI STATE MUTUAL FIRE AND MARINE INSURANCE COMPANY was incorporated in 1849. The first president was C. M. Valleau. The headquarters of the company are at 712 Chestnut Street. S. M. Edgell is president, and F. B. Holmes secretary. The present directors are W. A. Hargadine, S. M. Edgell, B. W. Alexander, J. B. C. Lucas, F. B. Holmes, C. S. Greeley, August Nedderhut, James E. Kaine, and Adolphus Meier. The original location of the company was on the southwest corner of Pine and Second Streets. Later they occupied an office in the old Exchange building, and in the Merchants' Exchange building. From the latter place they removed to their present quarters.

THE ST. LOUIS MUTUAL FIRE INSURANCE COMPANY was organized on the 22d of February, 1851, under the name of the St. Louis Mutual Fire and

Marine Insurance Company of St. Louis. The incorporators were John Kern, A. F. Hummitsch, E. F. Thuemmler, Jacob Rosenbaum, Peter Pelizarro, Adolph Kehr, Henry Kayser, Thomas Julius Meier, John C. Mueller, and Louis Bach. Originally its office was situated on the northeast corner of Second and Market Streets, but subsequently it was removed to the southeast corner of Seventh and Locust Streets. The building now occupied by the company was purchased in 1869. The company transacts a fire insurance business. Its first president was John Kern, who held office until August, 1856.¹ Its first secretary was George Weinhagen, and its first treasurer A. F. Hummitsch. The first board of directors was composed of John Kern, Adolph Kehr, A. F. Hummitsch, Henry Kayser, E. F. Thuemmler, Thomas J. Meier, Jacob Rosenbaum, and Louis Bach. The charter expired April 16, 1880, and the company was reorganized under the general insurance statutes, and received its charter for ninety-nine years, July 1, 1881, as the St. Louis Mutual Fire Insurance Company of St. Louis. The officers for 1882 were: President, John C. Vogel; Vice-President, John G. Haas; Secretary, John J. Sutter; Board of Directors, John C. Vogel, Michael Voepke, Caspar Stolle, Charles L. Stuever, John H. Mueller, John G. Haas, Charles Branahl, John P. W. Thul, and Henry G. Sachleben.

THE AMERICAN CENTRAL INSURANCE COMPANY was incorporated by an act of the Legislature approved Feb. 23, 1853, under the name of the Atlantic Mutual Insurance Company, the commissioners named in the act being Derick A. January, Phocian R. McCreery, John Cavender, Phillips Crow, and William T. Essex. In the following November the commissioners reported that they had secured sixty-four subscriptions, amounting to \$126,000. A permanent organization was effected Jan. 10, 1854, the following persons being elected trustees: Wayman Crow, John Cavender, John F. Darby, Phillips Crow, D. A. January, P. R. McCreery, William H. Pitman, John S. Cavender, James Smith, Christopher Rhodes, George P. Doan, John B. Carson, Samuel Russell, Charles P. Chouteau, O. W. Child, Samuel G. Reed, James A. Jamson, George Partridge, George Robinson, D. J. Hancock, and John J. Mudd. John F. Darby was elected first president on the 13th of January; Samuel Russell, vice-president, and I. J. Welbourn, secretary.

¹ John Kern died on the 27th of August, 1856, aged forty-two years. He had been a resident of St. Louis for about twenty years, and was one of its leading business men. In April, 1856, he was elected a member of the Board of Aldermen.

In 1869 the capital stock was increased and the assets invested in United States securities. On the 22d of September of that year the name was changed to the American Central, and the business was subsequently extended to large proportions, agencies being established in other States. The losses of the company by the great Chicago fire destroyed its paid up capital, —\$275,000,—but the corporation continued in business and soon regained its former prosperity. At the present time the American Central is one of the most flourishing institutions of its kind in St. Louis, a surplus of \$255,295.49 having been accumulated. For a number of years the company occupied a portion of the St. Louis Life Insurance building at Sixth and Locust Streets, but it subsequently removed to 419 Olive Street, where it is now located. The officers for 1882 were George T. Cram, president; S. M. Dodd, vice-president; W. H. Pulsifer, treasurer; and James Newman, secretary; Directors, S. M. Dodd, John Wahl, George O. Carpenter, George A. Madill, James Newman, John L. Blair, W. M. Senter, W. H. Pulsifer, D. Rorick, George L. Joy, George T. Cram, and G. W. Chadbourne.

THE COVENANT MUTUAL LIFE INSURANCE COMPANY was organized in 1853, under the General Insurance Act of Missouri. Since its incorporation the company has under careful and judicious management grown steadily in popular favor, and now makes the following showing: Real estate owned, \$112,760; loans on bonds and mortgages, \$183,638; loans on stocks and bond collaterals, \$1100; loans on company's policies, \$14,530; premium notes, loans, or liens, \$100,284.02; stocks and bonds owned, \$41,925; cash, \$25,173.87; uncollected premiums, \$6552.93; all other property, \$7813.38; making the total assets \$494,277.20.

The officers for 1882 were E. Wilkerson, president; A. F. Shapleigh, vice-president; and Alfred Carr, secretary; and the board of directors was composed of the following: Nathan Cole, S. H. Laffin, Isaac M. Veitch, Herman Eisenhardt, E. Wilkerson, J. D. S. Dryden, A. F. Shapleigh, A. G. Braun, Theodore Betts, John W. Luke, M. L. Libby, G. A. Finkelnberg, Given Campbell, John Wahl, Joseph S. Nanson, and John C. Moore. The general office is located at No. 513 Olive Street.

THE MOUND CITY MUTUAL FIRE INSURANCE COMPANY was organized in May, 1855, under a charter granted by the Legislature during the preceding month. The original incorporators were Wyllys King, Asa Wilgus, J. C. Harns, D. C. Garrison, George S. Drake, R. J. Lockwood, James S. Watson, Rollins Clark, and Robert Holmes. The officers in

1855 were D. R. Garrison, president; R. J. Lockwood, vice-president; David H. Bishop, secretary; and John F. Darby, treasurer. The company transacts a general fire insurance business, and issues policies varying in duration from thirty days to six years. The general offices of the company are situated at the southwest corner of Sixth and Olive Streets. The present president, Ellis N. Leeds, was elected in 1867, and has served continuously ever since. He is regarded as being one of the ablest and most thoroughly posted insurance men in the West.

Ellis N. Leeds was born in Burlington County, N. J., Sept. 28, 1814. His father was a farmer in moderate circumstances, and the boy, after enjoying such school privileges as were to be obtained in the neighborhood, learned the trade of a brick-mason. In 1839, while yet quite a young man, he removed to St. Louis, and continued to work at his trade until 1848, when he engaged in the lumber business, in which he continued until 1869, when he retired. Since then he has not been actively employed in any business. Since 1862 he has been a director in the Merchants' Bank, and for some years was a director in the Vulean Iron Company, the St. Louis Gas-Light Company, the St. Louis Railway Supplies Manufacturing Company, and the Cheltenham Fire-Brick Company. As a business man, Mr. Leeds has been signally and uniformly successful, and the bricklayer who came to St. Louis in 1839 now enjoys a handsome competence. Of Quaker descent, he avoids all publicity and show, but notwithstanding his unobtrusiveness, he has been associated with many important business enterprises, and has filled with credit a number of responsible positions. Mr. Leeds enjoys the respect of a very large circle of friends, and in his domestic and social relations is regarded as one of the most amiable and attractive of men.

C. H. Alexander, the present efficient secretary of the Mound City Mutual Fire Insurance Company, first entered the company as a clerk in 1862, and his close application, together with a thorough knowledge of the business, soon gained him the confidence of the stockholders. In 1875 he was promoted to his present position.

The directors of the company are Ellis N. Leeds, Daniel R. Garrison, William Booth, Matthias Dougherty, Francis L. Haydel, John Maguire, Charles Hofman, Preston Player, and Joseph T. Donovan.

The company is one of special prominence in St. Louis, from the fact that it has never faltered, its obligations having always been fulfilled to the letter. The total assets are \$181,379.94, the total liabilities \$116,285.06, and the surplus \$65,094.88.

THE HOPE MUTUAL FIRE INSURANCE COMPANY was organized in 1857, and began to issue policies early in March of that year. The first office was at Main and Vine Streets, but it soon removed to the basement of the Boatmen's Savings Institution, at the northeast corner of Second and Pine Streets. Its incorporators and first board of directors were Thos. E. Tutt, A. F. Shapleigh, L. D. Baker, R. M. Renick, Gerard B. Allen, N. J. Eaton, Alexander Finley, Taylor Blow, Rufus J. Lackland, Edward A. Filley, R. M. Park, W. H. Pritchatt, John A. Brownlee, A. M. Waterman, Isaac S. Smith, W. H. Tillman.

From Second and Pine Streets the office was removed to 307 Olive Street, and thence to 419 Olive Street. Its first and subsequent presidents were Thomas E. Tutt, N. J. Eaton, C. S. Kintzing, and Isaac M. Veitch. The present officers are: President, Isaac M. Veitch; Secretary, Henry Schmitt; Directors, A. F. Shapleigh, T. E. Tutt, James M. Carpenter, Anthony Ittner, Francis Carter, G. H. Loker, William H. Thompson, W. C. Jamison, M. A. Wolff, and Isaac M. Veitch.

The company has had a very successful career since its organization, and furnishes exceptionally low insurance to its members on the mutual plan, its business being mainly restricted to dwelling-houses and furniture.

WASHINGTON FIRE INSURANCE COMPANY.— This company was chartered on the 23d of November, 1857, under the name of the Washington Mutual Fire Insurance Company, the incorporators being C. F. Becker, I. Kurlbaum, William Siever, John H. Marquard, L. Roever, Herman H. Meier, William Seifried, P. Weber, E. Menche, Charles Altinger, Charles W. Gottschalk, John H. Burkhardt, Edward Eggers, and F. Roever. Its first president was Charles W. Gottschalk, who was succeeded by Arthur Olshausen, who continues to hold the office. Charles W. Horn was the first vice-president, and Arthur Olshausen the first secretary. The officers at present are: President, Arthur Olshausen; Vice-President, Philip Gruner, Jr.; Secretary and Treasurer, Edward Breitenstein; Assistant Secretary, Louis J. Behrens. The office is located at the corner of Market and Second Streets.

THE GERMAN MUTUAL LIFE INSURANCE COMPANY, located at the northeast corner of Second and Market Streets, was organized in 1857, and chartered November 23d of that year. The incorporators were Edward Eggers, Frederick Bergesch, Francis Krenning, Adolph Kehr, F. A. H. Schneider, Frederick Hauck, Gottlieb Martin, Charles G. Stifel, Francis

E. W. Leeds

LIBRARY
OF THE
UNIVERSITY OF ILLINOIS

R. W. Sewell

Saler, T. Thummmler, George Gehrke, and Charles W. Horn.¹

Its first and subsequent presidents were Charles W. Horn, Theodore Plate, Arthur Olshausen. Its first secretary was Arthur Olshausen. The officers for 1882 were: President, Arthur Olshausen; Vice-President, Christian A. Stifel; Actuary, Isidor Bush; Secretary, Edward Breitenstein; Assistant Secretary, Louis J. Behrens; Medical Examiners, Drs. Charles F. Hauck and P. J. Lingenfelder; Agent, S. Kehrmann.

FRANKLIN INSURANCE COMPANY.—One of the most successful institutions of its kind in the West is the Franklin Mutual Insurance Company of St. Louis, which was incorporated in March, 1859. Scarcely any other fiduciary institution of St. Louis is more closely identified with the interests of the community or has had a more uniformly successful career. Among its officers at the present time are a number of the prominent business men of the city. Its office is at No. 400 North Third Street, and the capital stock amounts to three hundred and twenty-two thousand dollars. Henry Meier is president of the company; John C. Nulsen, vice-president; Louis Ducstrow, secretary; and the directors are Charles F. Meyer, John C. H. D. Block, J. C. Nulsen, H. J. Spaunhorst, Henry Meier, C. Fink, D. J. Blanke, and L. J. Holthaus.

THE LACLEDE MUTUAL FIRE INSURANCE COMPANY was chartered on the 14th of January, 1860, under the name of the Laclede Mutual Fire and Marine Insurance Company of St. Louis, the incorporators being Isaac Walker, William T. Gay, Levin H. Baker, Joseph O'Neil, Charles H. Peck, Oliver Garrison, Dwight Durkee, Louis A. Labeaume, and Robert W. Powell. The office of the company was situated originally at No. 217 North Third Street, but was afterwards removed to 212 North Third Street, where it is still located. The business transacted is that of mutual fire insurance. R. W. Powell was the first president, William T. Gay the first vice-president, and John Baker the first secretary of the corporation. The officers of the company for 1882 were: President, R. W. Powell; Vice-President, Joseph O'Neil; Sec-

retary, J. C. Bury, Jr.; Directors, Joseph O'Neil, Charles H. Turner, Trumbull G. Russell, R. W. Powell, Oliver Garrison, John M. Sellers, G. Conzelman, Thomas Slevin, and J. B. C. Lucas.

Robert W. Powell, the president of the Laclede Mutual Fire Insurance Company, arrived in St. Louis in October, 1843. He was a tailor by trade, and at once established himself in that business. In 1844 a building was erected for him on Fourth Street near Pine, where the *Globe-Democrat* is now printed, his residence being situated on Market Street near Fourth. He continued the business at Fourth and Pine Streets for some time, and then removed to a store on Second Street, where he remained until 1857, when he relinquished this occupation to engage in the produce and commission business at No. 4 South Levee. In 1860 he withdrew from this pursuit, and on January 14th of that year, in company with several wealthy and prominent citizens, obtained a charter for the Laclede Mutual Fire Insurance Company. He was elected its first president, and has been annually re-elected ever since. The "Laclede" has long ranked as one of the safest insurance companies in the city. Mr. Powell was also one of the incorporators of the Citizens' Savings-Bank, was elected a director, and is now a vice-president of that institution.

In the management of his business as a merchant tailor Mr. Powell was very successful. He systematically invested his surplus in real estate, and with such judgment that he soon acquired a generous competence. He is a large owner of valuable real estate in the central residence portion of the city, and has improved much of it in a substantial and elegant manner. He occupies a handsome residence at No. 2642 Locust Street.

In religion, Mr. Powell is an Episcopalian. He was present at the organization of St. George's Church, when Dr. E. Carter Hutchison preached his first sermon at the Benton School, on Sixth Street between Locust and St. Charles, and for a number of years was connected with St. George's congregation, which built a church on Locust Street near Seventh. Subsequently he became a member of Trinity Church, at Washington Avenue and Eleventh Street, and was vestryman. Having (later) removed to Stoddard's addition, he became one of the incorporators of the parish of the Holy Communion, and was chosen vestryman. When St. George's congregation sold its church on Locust Street and removed to the new church at Locust and Beaumont Streets, he rejoined it, and is still a member. To the various benevolent enterprises of the church he has always contributed his full share.

¹ Charles W. Horn, president of the German Life Insurance Company, died suddenly at his residence, 2426 Carr Street, St. Louis, in June, 1872. Mr. Horn had filled a number of important positions of trust and honor, and was regarded as being one of the representative citizens of St. Louis. He served in the City Council during the sessions of 1856, 1857, and 1858, and was an energetic member of the Board of Health. Mr. Horn was born in the Grand Duchy of Nassau, Germany, emigrated to this country when a young man, and died at the age of about fifty-six years.

In private life Mr. Powell is retiring and amiable, but in business is outspoken and decided, and his success is mainly due to his prompt judgment and celerity of action. His career has been singularly quiet and uneventful, but it has been full of usefulness and marked by uniform success.

THE JEFFERSON INSURANCE COMPANY was organized May 1, 1861, with a capital of \$300,000. The total assets are \$313,484.71; surplus, \$125,248.71; net cash received during the last fiscal year for premiums and assessments, \$52,880.58; aggregate income for the year in cash, \$55,457.07; net amount outstanding risks, \$8,163,901.66. The officers are: President, Hermann Eisenhardt; Vice-President, Charles H. Teichmann; Secretary and Treasurer, C. R. Fritsch; Directors, H. Eisenhardt, F. W. Bieinger, Aug. C. Mueller, Charles Wulfing, Charles H. Teichmann, Adam Conrad, C. A. Stifel, George Schlosstein, G. H. Bokenkamp, Francis Cornet, F. E. Schmeiding, and Abraham Kramer. The general offices are located at No. 207 North Third Street.

EQUITABLE LIFE ASSURANCE SOCIETY.—The St. Louis agency of the Equitable Life Assurance Society of the United States, one of the largest corporations of its kind in the world, was established in 1862, S. A. Ranlett, since deceased, being the agent. The present office is located in the "Equitable Building," at Sixth and Locust Streets, one of the finest structures in the city. Benjamin May is the manager, and J. S. Kenrick is the cashier for the Southwestern Department. James M. Brawner, deceased, was the agent for twelve years. The main office of the Equitable was originally at No. 92 Broadway, New York City, but was afterwards moved to the imposing building No. 120 Broadway. Branch offices, located in handsome edifices owned by the company, have been established in Paris (France), Boston, and Chicago, and flourishing agencies exist in all the cities and most of the important towns in the country. The first president of the society was William C. Alexander, and the officers for 1882 were: President, Henry B. Hyde; Vice-Presidents, James W. Alexander, Samuel Borrowe; Secretary, William Alexander; Actuaries, George W. Phillips, J. G. Van Cise; Medical Examiners, Dr. E. W. Lambert and Dr. Edward Curtis; Superintendent of Agencies, E. W. Scott. The company, which was organized on the 26th of July, 1859, ranked at the outset as No. 19 in the list of insurance societies as to magnitude, but such has been its growth that the outstanding policies on its books are claimed to largely exceed the amount of the outstanding insurances of any other company organized since 1832. It now holds the sec-

ond place in size, but is said to have issued for many years past a larger amount of new insurance than any other company. The only other company whose transactions have approached those of the Equitable during recent years made a showing in 1881 of about \$11,500,000 less than the Equitable.

THE NORTH ST. LOUIS MUTUAL FIRE INSURANCE COMPANY was incorporated in February, 1864, the incorporators being H. Overstolz, Theodore Koch, and others. Since its organization the office of the company has been situated at the corner of Broadway and Exchange Street. Henry Overstolz has been president of the company from the beginning. The officers during 1882 were: President, H. Overstolz; Vice-President, L. Espenschied; Secretary and Treasurer, Theodore Koch.

ST. LOUIS LIFE INSURANCE COMPANY.—The Mound City Life Insurance Company, which afterwards changed its name to that of the St. Louis Life, was organized on the 14th of May, 1868, and its first policy was issued June 10th of that year. Its first president was Capt. James B. Eads, and the offices were located at first at No. 318 North Third Street, between Olive and Locust Streets. At the first annual election, held at the office, 319 North Third Street, on the 17th of May, 1869, the following officers were chosen: President, James J. O'Fallon; Vice-President, Alfred M. Britton; Secretary, Aylett H. Buckner; Assistant Secretary, S. W. Lomax; Directors, James J. O'Fallon, James H. Lucas, Alfred M. Britton, Samuel A. Hatch, William C. Sipple, Augustus McDowell, A. M. Wakerman, and A. B. Garrison. The first policy issued bore the date of June 12, 1868. In less than a year nine hundred and sixty-six policies had been issued, and one hundred and twenty thousand one hundred and seventy dollars and thirty-three cents received in premiums. In 1872 the capital was increased from one hundred and fifty thousand dollars to five hundred thousand dollars, and two years later, in January, 1874, it was again increased to one million dollars, and in February of that year the name was changed from Mound City to St. Louis. The company continued to transact a large and profitable business, and at the beginning of 1876 its assets amounted to seven million four hundred and six thousand eight hundred and fifty-two dollars and fifty-four cents. Subsequently the corporation went out of existence.

The old St. Louis Life Insurance building, at the northwest corner of Sixth and Locust Streets, is one of the handsomest business structures in the city. It is in the *renaissance* style, constructed after designs by George I. Barnett, architect, and the foundation is of

red Missouri granite, and the walls of cream-colored Missouri sandstone. The floors are constructed of brick arches supported by girders of iron, and the ceilings of the first floor and corridors are richly frescoed. The structure is fire-proof and supplied with all the modern conveniences.

THE GERMAN MUTUAL FIRE INSURANCE COMPANY was incorporated under the general insurance act of Missouri, Oct. 9, 1868, with a capital of \$300,000. Its surplus at the present time is \$67,055.16, and the income for the past year was \$22,381.19. The management from its inception has undergone comparatively few changes. Frederick Hill is president of the company, L. Ottenad is vice-president, and Henry Hiemenz is secretary. The board of directors is as follows: Jacob D. Hiemenz, F. Hill, Louis Ottenad, August Bohn, Jacob Gruen, August Gehner, Claude Juppier, Francis K. Krenning, Nicholas Berg, Christian Koeln, Henry Michel, and Charles Stumpf. The offices of the company are at the southeast corner of Market and Fifth Streets.

THE CARONDELET HOME MUTUAL INSURANCE COMPANY is located at 7005 South Main Street, and its officers during 1882 were John Krauss, president; R. J. Kilpatrick, vice-president; Charles W. Hoffmeister, secretary; and Bernard O'Reilly, treasurer; Directors, W. C. Plass, Venust Spindler, Daniel Paule, Abraham Herbel, John Krauss, R. J. Kilpatrick, and B. O'Reilly.

THE BOARD OF ST. LOUIS MARINE UNDERWRITERS, office 314 Chestnut Street, was organized Jan. 1, 1850, and was incorporated by act of Legislature on the 14th of January, 1860, the incorporators being James H. Hughes, George K. McGunnele, John McNeil, W. W. Green, W. D. W. Barnard, and B. M. Runyan. The object of the association is the "better preservation from loss or damage of property wrecked or stranded upon the navigable rivers of the State of Missouri." In the latter part of April, 1861, at the beginning of the civil war, George D. McGunnele, "president of the Board of Underwriters," announced that the insurance companies of St. Louis had adopted a special clause to "cover all future shipments, and to be attached to all cargo policies, as follows:

"Warranted, by the assured, free from claim or loss or damage arising from civil commotion, or from piracy, seizure, sequestration, or detention and overpowering thieves, or the consequences of any other hostile act of the government or people, person or persons of any State or States claiming to have seceded from this Union."

The companies also decided to cover the war clause by charging double rates net.

The officers of the board for 1882 were H. D. Mc-

Lean, president; J. A. Waterworth, vice-president; James Barnard, secretary, adjuster, and agent; and Silas Adkins, inspector of hulls.

INSURANCE EXCHANGE.—The Insurance Exchange building, situated at the southeast corner of Fifth and Olive Streets, was erected during 1869–70, after designs prepared by G. I. Barnett, architect. It is built of Chicago limestone in the Roman style of architecture, is five stories high, and is occupied by stores and offices.

ST. LOUIS BOARD OF FIRE UNDERWRITERS.—The present St. Louis Board of Fire Underwriters was established in May, 1872, but previous to that time similar organizations had existed.

On the 28th of September, 1866, a meeting of insurance men was held at the office of the Marine Board of Underwriters for the purpose of organizing a Board of Fire Underwriters. All the agencies and local companies were represented, and a constitution and by-laws were adopted. A committee consisting of George K. McGunnele, Samuel E. Mack,¹ and George D. Capen, appointed at a previous meeting, reported a tariff of rates which was a considerable advance over the rates previously in force. This action was taken in accordance with similar action on the part of the National Board of Underwriters, then recently organized in the city of New York, who asserted that "the experience of the past two years has demonstrated that there has been no profit in the aggregate business of fire underwriting throughout our country."

On the 6th of May, 1872, the present St. Louis Board of Fire Underwriters was organized, and by September of that year was in active operation. One of the first acts of the board was the selection of C. T. Aubin, civil engineer, for the purpose of surveying the buildings in the business section of the city, and obtaining the details of their construction,—the thickness of the walls, height of parapet walls, etc. Mr. Aubin completed his work in 1874, and presented to the board "a system of fixing adequate rates upon each building according to construction, starting with a moderate basis for standard buildings, and making additional charges for deficiencies and all inflammable goods contained therein."² The system having received the approval of the St. Louis Board,

¹ Samuel Ely Mack was prominently identified with the insurance interests of St. Louis for many years. He was a native of Westfield, Mass., and a son of Gen. Mack, of that State. In 1858, when the Home Insurance Company of New York transferred its general Western agency from Cincinnati to St. Louis, he was sent to St. Louis to supervise the Western and Southern business of that company, and soon took rank among the business men of the city. He died in December, 1866.

² Pictorial St. Louis, p. 95.

and subsequently of the National Board, went into effect on the 1st of July, 1875. The office of the board is at 508, Chamber of Commerce, and the officers for 1882 were J. A. Waterworth, president; A. C. Travis, vice-president; C. T. Aubin, secretary and surveyor; and William M. Lockwood, treasurer.

TELEGRAPH.

Notwithstanding the many impediments and embarrassments encountered by the projectors of the telegraph, its extension westward was wonderfully rapid. The first line in actual operation in the United States was established between Baltimore and Washington in 1844. It was completed and messages were transmitted on the 24th of May of that year, and a little over three and a half years later (Dec. 20, 1847) the lines connecting East St. Louis with the Eastern cities were finished. When we take into consideration the fact that telegraphy was as yet in its infancy, this feat deserves to be ranked with the great achievements of the age. The line between Baltimore and Washington was the creation of the general government; but the development of the telegraphic system in the West was due to the energy and unflagging zeal of one man, Henry O'Reilly, who after encountering many trials and discouragements succeeded in forming a stock company for the establishment of telegraphic communication between the great business centres of the East and Cincinnati, St. Louis, and other Western points. Mr. O'Reilly met with very little encouragement from the capitalists to whom he applied, finding it almost impossible to convince them that the telegraph would ever prove a paying investment; but, finally, having procured the necessary funds, he obtained control of the Morse patents from the Atlantic seaboard westward; Professor Samuel F. B. Morse, who owned them, having sought in vain to induce the general government to purchase them.

As early as 1837, Professor Morse petitioned Congress for assistance to enable him to demonstrate the value of his invention by constructing a telegraph line between Washington and Baltimore, but congressmen "ridiculed his invention as a mere chimera, and the bill was never called up." At the session of 1842, however, he renewed his application, and, mainly through the efforts of Hon. John P. Kennedy, of Baltimore, chairman of the House committee to whom the bill had been referred, Congress was induced on the 3d of March, the last day of the session, to pass an act appropriating thirty thousand dollars "to test the practicability of establishing a system of electro-magnetic telegraph in the United States." The

expenditure of the appropriation was intrusted to the Secretary of the Treasury, who appointed Leonard D. Gale and James C. Fisher assistants to Professor Morse. The original intention had been to lay the wires under ground in leaden pipes along the line of the Washington Branch of the Baltimore and Ohio Railroad, but the experiment proved a failure, and was abandoned after an expenditure of fifteen thousand dollars. Poles were then erected and a line of wire constructed mainly after the present method between the two cities. The first trial was made on the 9th of April, 1844. A message was sent a distance of six miles over the wire, which was of very indifferent construction, and an answer received "in two or three seconds." On the 7th of May the line was in full operation for a distance of twenty-two miles. "The fluid," we are told, "traversed the whole twenty-two miles and back again, making forty-four miles, in no perceptible part of a second of time. On Friday, the 24th of May, 1844, the line was completed, and the first telegraphic message was sent from Washington to Baltimore by Miss Annie Ellsworth, daughter of the commissioner of patents. This message was in these words: "WHAT HATH GOD WROUGHT!" The first message of the President of the United States to Congress ever transmitted over the wires was sent to the *Baltimore Sun*, May 11, 1846. Of the thirty thousand dollars appropriated by Congress for making the experiment, three thousand five hundred dollars remained unexpended.

About July 10, 1844, Professor Morse, with the concurrence of the Secretary of the Treasury, appointed Henry J. Rogers, of Baltimore, "the inventor of the American telegraph," assistant superintendent "of the line of electro-magnetic telegraph between Washington and Baltimore," with his office in the latter city. Mr. Rogers made many improvements in the telegraphic system, and was the inventor of the Rogers commercial code of signals, afterwards adopted by the United States and British governments. On the 15th of March, 1845, the first telegraph company was formed, with the name of "The Magnetic Telegraph Company," the object of the incorporators being to construct a line from Washington to New York, and in a little over a year (June 6, 1846) it was informally opened. It was not, however, in regular operation until several days afterwards.

About this time the war with Mexico commenced, Gen. Taylor having crossed the Rio Grande in May, and there was intense anxiety throughout the country for prompt and trustworthy intelligence from the scene of hostilities. News was received at Washing-

ton *via* the Southern mail, and telegraphed to Baltimore, Philadelphia, New York, and intermediate points. A Baltimore newspaper (the *Sun*), in order to obtain the war news at the earliest possible moment, established a "pony express" from the steamboat wharf to the telegraph-office in Washington. The desire to procure the promptest intelligence from the seat of war naturally suggested the extension of the telegraph system in the Southwest. During the previous year (April 8, 1845) the first Southern contract had been signed by Amos Kendall, agent for Professor Morse, with H. H. O'Callaghan, of the New Orleans *Crescent City*, for the extension of the line from Washington to New Orleans, Mr. O'Callaghan having established during the winter an exclusive private express on a portion of the Southern route, by means of which he was enabled to beat the United States mail twenty-four hours in reaching New Orleans, but it was reserved for Henry O'Reilly, aided by Assistant Superintendent Rogers, to construct a complete line of telegraph between the seaboard and the Mississippi.

Mainly through the efforts of Mr. Rogers, a number of Baltimore capitalists were induced to subscribe, and on the 12th of January, 1848, the American Telegraph Company was formally organized, the incorporators being H. McKim, Zenas Barnum, Moor N. Falls, William McKim, D. Pain, Josiah Lee, Henry J. Rogers, and George C. Penniman. The manager of the new company was Mr. O'Reilly, and the office was in the depot of the Baltimore and Susquehanna Railroad. Some time previously, however, the construction of a line between Baltimore, York, Columbia, and Harrisburg, Pa., had been commenced. Another company, known as the Western Telegraph Company, was organized Nov. 11, 1848, with John F. Pickell, president; Thomas J. McKaig, treasurer; and Howard Kennedy, secretary and superintendent. The lines extended from Washington to Frederick, Md., and thence to Wheeling, Va., Pittsburgh, Pa., Louisville, Ky., Cleveland, Ohio, and from these points to the South and Southwest. Prior to the organization of the above companies the lines westward had been constructed, and the first telegraphic dispatch received in Baltimore from the West reached that city from Cincinnati on the 20th of August, 1847, by way of Philadelphia.

Henry O'Reilly, to whom the people of the West are primarily indebted for the extension of the telegraph, was a native of New York, and was a printer's apprentice about the time that Horace Greeley and Thurlow Weed were learning the rudiments of the craft. Subsequently he was employed in the editorial

department of various newspapers printed in New York City, Albany, and different points in the western portion of the State. At that early day the mails were transported by canal, and Mr. O'Reilly often met the canal-boat, received his package of Eastern newspapers, and hurried back on his horse to give his readers "the latest intelligence." He subsequently removed to Rochester, where he established the *Daily Advertiser*, the first daily newspaper between the Hudson River and the Pacific coast, and while pursuing his vocation in Western New York strenuously urged the enlargement of the Erie Canal, and incidentally attacked the inefficient management of the State authorities with great force and vigor. The first call, issued by Murray Hoffman, for the State Constitutional Convention of 1846, was brought about by him. In company with one other gentleman, Mr. O'Reilly "held a meeting, organized, passed resolutions, and then waited upon Mr. Hoffman as a delegation, asking his acceptance of the post of leader." Mr. Hoffman consented and wrote the declaration of wants, "and so carefully was the matter conducted by Mr. O'Reilly, that the first intimation the 'regency' had of the uprising was the pouring in of the journals from all parts of the State filled with glowing articles on the new movement."

Mr. O'Reilly was keenly alive to every public improvement, and when the permanent success of the Morse telegraph was demonstrated, he was among the first to appreciate its wonderful possibilities. About this time, as previously stated, the Morse patentees were endeavoring to sell the exclusive right to that invention to the United States government, the price being fixed at one hundred thousand dollars. Congress, however, delayed action on the proposition, and in the mean time a contract was closed with Mr. O'Reilly and others, giving them the right to put in operation the Morse patents from the seaboard westward. The contract was general in its character, and the franchises conferred were extremely valuable. It covered not only the original patent to Morse, but all subsequent improvements. Mr. O'Reilly was not a practical electrician, but he went to work with an energy and determination which were finally crowned with success. He had been informed by experts that to cross rivers with the electric current it was only necessary to sink a copper plate on each bank. He followed their directions, but discovered that the copper plates were practically worthless, and substituted for them great poles or masts and stretched the wire from one to the other across the stream. The Morse patentees considered copper the best material for the wires, but finding that No. 16 copper wire was so

ductile that when wet it "sagged" down between the poles low enough to catch pedestrians under the chin, he replaced it with iron wire, and, in fact, was the first person to use iron for that purpose. He introduced many other improvements, and was not deterred by obstacles which must have disheartened a less resolute man. His experience with capitalists was anything but encouraging. "Jacob Little, then king of Wall Street, told the canvasser that the telegraph was a chimera, and put his name down for one hundred dollars as a matter of charity. Banks refused to lend a dollar on the security of 'a bit of wire,' and it was only by his personal enthusiasm that Mr. O'Reilly was able to get money enough to put his lines up." The first section was from Harrisburg to Lancaster, Pa., and when this line was at last in successful operation, capital became less coy and the necessary funds were soon obtained for completing the line to Pittsburgh. This was done during the winter of 1846-47, and the working parties suffered great hardships from cold and exposure during their passage over the Alleghenies. On the 1st of January, 1847, a message was flashed over the wires from Philadelphia to Pittsburgh, and on the 20th of August in the same year Cincinnati was placed in telegraphic communication with Philadelphia and other points in the East. On the 18th of September, 1847, the *St. Louis Republican* made the following announcement:

"An effort is now being made to test the practicability of connecting St. Louis with the Eastern cities and New Orleans by means of the magnetic telegraph. Mr. O'Reilly, who has recently constructed and put into operation the line from Pittsburgh to Cincinnati and Louisville, and is forming a connection with his lines along the lakes, and is also rapidly extending the line from Louisville *via* Nashville to New Orleans, proposes to give the citizens of St. Louis the benefit of this lightning speed by the first week in December, provided they will take from twenty thousand to twenty-five thousand dollars stock in that line, say from Louisville or Indianapolis to this city."

On the 11th of November following it said,—

"We are informed on reliable authority that Mr. O'Reilly is rapidly progressing with the construction of the telegraph in this direction. It is now completed and in operation to Vincennes, and it is expected that the wires will be put up and the communication completed from Louisville to the east bank of the Mississippi in the month of December."

On the 26th of the same month a meeting in aid of the enterprise was held at Mechanics' Hall. "The attendance," remarks the *Republican*,

"was large, but not so large as we think the importance of the occasion should have called forth. We are really surprised at the apathy and indifference which a large portion of our merchants and men of business evince towards measures which are almost exclusively for their own benefit. Col. Robert Campbell was called to the chair, and John J. Anderson appointed secretary. Judge Ellis, of Vincennes, one of the trustees of the

subscribers for the stock, made several explanations concerning the manner of taking the stock, how it was held, etc., after which Mr. O'Reilly addressed the meeting in explanation of his contracts, the extent to which he had carried his lines, their connection, their influence, and the purposes he had in view. A committee of five, consisting of Messrs. McGunneagle, Simonds, Rosier, Clarke, and Yeatman, was appointed to wait upon the citizens to procure subscriptions."

The President's message, delivered to Congress Dec. 6, 1847, was transmitted from Philadelphia to Vincennes by telegraph, and thence by "pony express" to St. Louis.

On the 8th of the same month announcement was made that the subscriptions for stock in the "St. Louis and Louisville Telegraph Company" would be closed "until Thursday, at least until trustees are elected and they shall determine what further measures are necessary." Three days later (Dec. 11, 1847) the *Republican* congratulated Mr. O'Reilly and Mr. Moore, agent of the mail contractor, on the speed and accuracy with which the President's message had been delivered at St. Louis. The time occupied in the transmission was three days. The message was sent to Congress on Tuesday, and the telegraphing from Philadelphia to Vincennes and intermediate cities commenced at seven o'clock on Tuesday evening and was concluded at a quarter before nine P.M. Wednesday. An interruption of several hours occurred, owing to derangement of the wires between Louisville and Cincinnati. When the operators were through with the message they were so exhausted that they refused to transmit any more telegrams.

The *Republican* pronounced the feat to be "one of the greatest triumphs of the age." From Vincennes to St. Louis, between which points there was as yet no telegraph line, the message was transmitted by a special express organized by Mr. Eastman, of Eastman's line of stages, and the "senior editor [of the *Republican*] went to Vincennes to receive the copy and bring it to St. Louis." Including stoppages and delays, the time of transmission by telegraph from Philadelphia to Vincennes was twenty-six hours and fifty minutes; the time actually employed, about nineteen hours. The "pony express" left Vincennes for St. Louis shortly after eight o'clock A.M., and reached Belleville, about one hundred and twenty-five miles, in twenty-four hours and fifty minutes. The message "was placed in the hands of our compositors, and in two hours and a half it was in type, and in a few minutes afterwards was delivered to thousands of people." The *Republican* was the only paper in St. Louis to receive the message by telegraph.

On the 18th of December the *Republican* an-

nounced that the posts and wires had been erected as far as the east bank of the river, and that in a short time the connection with the city proper would be established. A trial of the wires from the point of completion on the Mississippi to Vincennes was made, and resulted satisfactorily. Two days later (Dec. 20, 1847) the same paper informed its readers that "the most extraordinary undertaking of the age, the completion of a line of communication by magnetic telegraph from the Atlantic cities to the east bank of the Mississippi," had been accomplished. The time consumed in the work of construction was less than eighteen months. The company's offices were located on the third and fourth floors of the St. Louis Insurance Office, at the corner of Olive and Main Streets, and it was announced that business would be transacted there as soon as the wires were extended across the river to the city. In the mean time an office was established in a house in the upper end of East St. Louis, and messages were transmitted thence to Eastern points. On the 20th of December the regular operation of the line commenced, and the *Republican* announced that in a day or two it would begin the publication of the proceedings of Congress and all important events transpiring in the East, "almost to the very moment of putting the paper to press." On the 22d the *Republican* published the following:

"Dispatches by telegraph for the *Republican*."

"LOUISVILLE, December 21st, 9 P.M."

"W. N. Haldeman's respects to the St. Louis press, and congratulates them on the crowning feat of Henry O'Reilly's enterprise, the instantaneous communication of the Mississippi with the Atlantic.

"The river here has fallen two feet. It came within eight inches of the flood of 1832. The weather is cold. No news this morning. Chancellor Kent died on the 13th inst.

"(This is the only dispatch from Louisville, and we have nothing from the Atlantic cities. The flood has deranged the wires between Madison and Cincinnati, and communication by telegraph is cut off; but still we ought to have later dates from New York and Philadelphia, if there was not some defect on a more distant part of the line. Nothing is said of the foreign news.)"

On the 10th of January, 1848, telegraphic communication was established between the cities of St. Louis and Alton by the indefatigable O'Reilly, who announced his intention, in view of the approaching completion of the Illinois and Michigan Canal, to extend the line to Galena and Chicago. About this time Mr. O'Reilly began what was destined to be a tedious and only partially successful series of attempts to introduce the telegraph into the city of St. Louis. He proposed to do this by erecting two lofty poles on either bank of the river and stretching the wire across from one pole to the other. One of these poles was

erected in front of the St. Louis Insurance office, and a large lamp was placed on top of it to serve as a beacon for boats on the river and "for persons traveling by night." On the 24th of January the *Republican* stated that an unsuccessful attempt had been made to extend the wire from Bloody Island to the western shore. When near the shore the reel got fast and the wire broke.

On the 30th of January the citizens of St. Louis tendered Mr. O'Reilly a public dinner in testimony of the energy and skill with which he had prosecuted the construction of the telegraph from the East to St. Louis. The letter of invitation was as follows:

"To HENRY O'REILLY, Esq.:

"SIR,—The undersigned, citizens of St. Louis, as a slight testimonial of their sense of obligation for the efficiency and perseverance displayed by you in the extension of the telegraphic line to this city, and for the very favorable estimate they have formed of you personally, beg leave to tender to you a public dinner at such a time as may suit your convenience.

"John O'Fallon, Helfenstein, Gore & Co., J. E. Yeatman, Berthold, Ewing & Co., John Simonds, William T. Reynolds & Co., G. K. McGunegle, John J. Anderson & Co., Luther C. Clark, Kenneth, McKenzie & Co., G. K. Budd, Smith, Brothers & Co., T. H. Larkin, P. Chouteau, Jr., & Co., U. Rasin & Conn, Wilson & Brothers, Keith, Ray & Co., Samuel Trent, G. Matthews & Brother, Houseman & Lowry, W. Barton, J. Lemon, Charles P. Chouteau, Thomas T. Gantt, T. B. Dutcher, S. M. Bay, King & Fisher, Bryan Mullanphy, Anderson & Conn, John M. Wimer, W. W. Greene, Bogy & Miltenberger, Chouteau & Vallé, John M. Krum, Carson & Voorhies, William Milburn, Roe & Kercheval, Kirtly & Ryland, Henry Von Phul, Keemle & Field, A. Miltenberger, Peake & Baker, James Bryan, John R. Hammond, Lawrason Riggs, M. L. Clark, Robert Campbell, D. D. Mitchell, B. B. Dayton, James B. Clendenin, Lyman Farwell, J. C. Tevis, L. A. Benoist & Co., Edward Tracy, H. S. Geyer, D. H. Armstrong, Thomas O'Flaherty, Henry M. Shreve, George Knapp, C. Ladew & Co., Jesse Woodruff, Ferd. Kennett, Wayman Crow, Leslie & Lord, John O. Agnew, N. E. Janney, H. MacShane, M. Blair, Sproule & Keys, Francis P. Blair, Jr., Patrick Gorman, A. P. Ladew & Co., Bermhoud & Son, James H. Lucas.

"ST. LOUIS, Jan. 30, 1848."

Mr. O'Reilly replied as follows:

"ST. LOUIS, Jan. 31, 1848.

"GENTLEMEN,—I have already participated so largely in your hospitalities, and have been honored with such manifestations of your confidence in connection with the enterprise which has excited your attention, that no formal testimonial of your kindness, such as you now propose, could impress me more deeply with a sense of indebtedness for your favor, and while I would rejoice to participate in the festivities with which you propose to commemorate an event that you consider of public importance, circumstances compel me respectfully to decline your proffered invitation."

On the 8th of February the following notice was published in the St. Louis papers:

"TO THE PEOPLE OF MISSOURI, WISCONSIN, AND IOWA :

"I deem it my duty to give you notice that the claim of Henry O'Reilly to construct and use Morse's telegraph on any line in any direction beyond St. Louis is utterly fraudulent. He has no such right, and never had. Equally fraudulent are his pretences that he has other systems which he can use besides Morse's. They are either pure humbugs or direct violations of Morse's patents. His object is to fill his pockets with your money, and then leave you exposed to lawsuits and triple damages in the United States courts for violating Morse's patents. If any of your towns and villages want a telegraph, they can get it without the danger of lawsuits or damages by application to the undersigned at Washington City, or to William Tanner, Esq., Frankfort, Ky., or to Josiah Dent, Esq., St. Louis, Mo. AMOS KENDALL, *Agent for Proprietors.*

"LOUISVILLE, Jan. 24, 1848."

Thus was inaugurated a contest which resulted in a long and expensive litigation. O'Reilly became involved in lawsuit after lawsuit with the Morse patentees, and after a stubborn resistance was forced to yield. His Western telegraph franchises were transferred to a combination of capitalists, who organized the Western Union Telegraph Company, which has since absorbed a number of similar enterprises, until now it has become one of the great telegraphic corporations of the world, its lines radiating in every direction throughout the United States. During his control of the Western franchises O'Reilly constructed about eight thousand miles of line. Comparatively little, if any, of the original line remains, as it was crudely and hastily built, and has long since been replaced by a more reliable system of wires. O'Reilly was impoverished by his lawsuits, and for a number of years held the position of store-keeper in the New York Custom-House, from which he retired in 1878 at the age of seventy years. His chief occupation in recent years, aside from his official duties, has been the revision and classification of his papers for the use of the future historian of telegraphy in the United States. His memoirs, exhibits, papers, and books, in print and manuscript, number one hundred and fifty volumes, and are now in the collection of the New York Historical Society. On one occasion, after his removal from the custom-house, Mr. O'Reilly, it is stated, said,—

"I seek now only a quiet retirement, and would prefer to keep entirely out of the public view, but when the real history of the discovery and the development of the telegraph system of this country is written many misplaced honors will fall away from those who have won them."

On the 14th of March, 1848, the *St. Louis Republican* congratulated its readers on the fact that the wires would be brought across the river "this week." Two tall masts, it added, "have been erected, each about one hundred and seventy-five feet high, one on

the bank of the river in the water-works lot, and the other on Bloody Island opposite. The span at this place is considerably less than where the original attempt was made to carry it over the river."

On the 20th and 21st of the same month meetings of the stockholders of the "Louisville, Vincennes and St. Louis Telegraph Company" were held for the purpose of organizing under a charter granted by the Indiana Legislature. A temporary organization was effected in order to enable Mr. O'Reilly to transfer the lines to the company previous to his contemplated departure from that section of the country. The following were chosen temporary directors: Henry O'Reilly, William Bratch, George T. M. David, Samuel Wise, Sanford J. Smith, William R. McCord, John Ross, Thomas Bishop, A. T. Ellis.

The directors subsequently met and completed the organization of the "Ohio and Mississippi Telegraph Company" by electing the Hon. A. T. Ellis president, John Ross secretary, and Sanford J. Smith treasurer. The transfer of the line between St. Louis and Louisville, as also of the extension from Illinoistown to Alton, was then made by Mr. O'Reilly to the company. Steps were also taken for the engraving of appropriate certificates for stock.

During a heavy gale on the 4th of May, 1848, the tall mast near the shot-tower, upon which the telegraph wire was suspended, was blown down, and the operation of the telegraph interrupted. In consequence of this accident the company was forced to resort to the old system of sending the messages across the river, and transmitting them from Illinoistown. On the 1st of June following it was announced that the line of O'Reilly's telegraph had been extended from St. Louis to Springfield, Ill., and that in a short time it would be completed to Peoria, Chicago, Galena, Quincy, Burlington, and other important towns on the Illinois and upper Mississippi. The announcement of the completion of the line to Springfield was accompanied by the following dispatch from the editors of the *Springfield Register* to the editors of the *St. Louis Republican* :

"SPRINGFIELD, ILL., May 31st.

"The editors of the *State Register* shake hands with the editors of the *Republican*, with a slight variation, as the preacher said about the creation of women. Strike out Whig candidates and insert Cass and Butler and we are with you, but whatever the result may be, we hope always to remain friends."

On the 12th of August, 1848, the telegraph was completed to Dubuque, Iowa, and on the 19th of January, 1849, notice was given that O'Reilly's line of telegraph had been opened through from Louisville to New Orleans "day before yesterday,"—*i.e.*, on the

17th; that dispatches had been received at St. Louis from Baton Rouge, and that it was expected that dispatches would be received direct from New Orleans in a very few days. On the 21st of March, 1850, telegraphic communication was opened between St. Louis and Cape Girardeau. This was the last northern link on the St. Louis and New Orleans telegraph. On the 22d of the following month, April, 1850, Henry O'Reilly invited the attention of the people of St. Louis to a scheme for constructing a telegraph from St. Louis to San Francisco. Mr. O'Reilly declared that he would ask no aid from the government, except in building stockades at intervals along the line to serve as telegraph stations, and for the protection of immigrants and the property of the telegraph company. One of the arguments advanced in favor of the project was that the stockades would form the nucleus of settlements for the supply of persons traveling to and from California. On the 27th of July of the same year a telegraph line from St. Louis to New Orleans was completed under the direction of Mr. O'Reilly, and dispatches passed over the wires between the two cities. It was known as O'Reilly's or the "People's Line of Telegraph."

The use of masts for supporting the telegraph wires across the Mississippi River having proved unsatisfactory, it was determined on the 23d of September, 1850, to lay wires cased in gutta-percha at the bottom of the river from Bloody Island to the St. Louis shore. The work was completed by the 7th of October, and the telegraphic instruments were removed from East St. Louis to St. Louis. The submerged wire was found to be a marked improvement on the system previously in use. In the *Republican* of October 8th the announcement was made that the wire for Morse's Southern telegraph had been suspended across the Mississippi, and that "the 'Bostona' passed under it with the greatest ease." In the summer and fall of 1850 the work of extending the telegraph from St. Louis to St. Joseph, Mo., was actively prosecuted by T. P. Shaffner & Co., and on the 8th of October it was announced that the posts for the line had been put up to within thirty miles of Jefferson City. On the 4th of October, 1851, a telegraph-office was opened at Weston, and it was announced that the line would be completed to St. Joseph in the course of a week or two. Wade's telegraph line from Cincinnati to St. Louis, by way of Indianapolis, Terre Haute, and Alton, was completed during the same year to the east side of the Mississippi opposite St. Louis, and it was announced that "gutta-percha wire upon a new principle would be immediately laid across the river."

On the 6th of December, 1851, the *Republican* mentioned that the delay and inconvenience to which the Morse Telegraph Line had been subjected at Cape Girardeau had been remedied by the use of gutta-percha wire across the river at that place. "Messages can now be sent without interruption at that point to Nashville, and from thence to New Orleans by one line, and to Louisville and all the inland and Atlantic cities by other connected lines." In the same issue of the paper appears a notice of a "sumptuous supper" with which the O'Reilly Telegraphic Lines "celebrated their triumph last Thursday night in successfully crossing the river." This celebration marks the third attempt to solve the problem of safely transmitting telegrams across the Mississippi. Two wires belonging to the Northern and Eastern O'Reilly Telegraph Companies, as the corporations were styled, were successfully laid across the river above Bissell's Ferry landing, and the connection with the lines on either shore was soon perfected. For nearly four years the company had been experimenting in the hope of securing a permanent submarine telegraph. It never quite succeeded, but to St. Louis probably belongs the honor of having first utilized, with comparatively satisfactory results, the gutta-percha wire for laying telegraph cables below the surface of the water. The idea of a submarine telegraph was not a novel one, the electrician Salvá having, it is said, suggested as early as 1797 that a line be laid between Barcelona and Palma, in the island of Majorca.

On the 18th of October, 1842, Professor Morse laid a copper wire, insulated by means of a hempen strand coated with tar, pitch, and India rubber, from Governor's Island to the Battery, N. Y., and next morning was beginning to receive messages over it, when the wire became entangled in the anchor of a vessel and was hauled on board. In 1843, Samuel Colt laid a submarine cable from Coney and Fire Islands at the entrance of New York Harbor up to the city, which was operated with success. On the 28th of December, 1844, at Washington, D. C., Mr. Colt exhibited a submarine battery, of which he was the inventor, and succeeded in exploding several of his "combustible substances" at a considerable distance under water. He proposed to the government to permanently fortify any harbor by this means at a cost not exceeding that of a steamship of war. In 1845 gutta-percha became an article of commerce, but its insulating qualities had not then been discovered. In that year Professor Morse attempted to insulate a wire with a composition of beeswax, asphaltum, and cotton yarn, and failed. In 1848, Ezra Cornell and

Professor Morse endeavored to lay a cable across the Hudson River to Fort Lee, by the use of a mixture of asphalt and hemp, and afterwards strung the wire with glass beads and inclosed it in a lead pipe, but without success in either case. Professor Faraday first made public the insulating properties of gutta-percha in 1848, and the first submarine telegraph thus insulated was laid across the Rhine from Deutz to Cologne by Lieut. Siemens, of the Prussian Artillery. On the 22d of November, 1847, some months before Faraday's patent was granted in England, George B. Simpson drew up an application for a patent for the insulation of telegraph with gutta-percha. It was filed in the United States Patent Office in January, 1848, more than a month before Faraday's announcement. In November, 1848, Simpson exhibited his invention at the Washington Hall Fair in Baltimore, where it was tested and found successful, and received the unanimous commendation of the press of that city. As early as December, 1847, he had exhibited his invention to the late Amos Kendall and F. O. J. Smith, in Cincinnati. His patent was rejected by the Patent Office in 1850, and a long litigation ensued, which resulted in Simpson's favor in 1867, shortly before his death.

H. W. Cleveland, an assistant of Professor Morse in the Baltimore office, invented a submarine telegraph in April, 1847, which he tested across the bed of the stream at Gunpowder River drawbridge, between Baltimore and Havre de Grace, and it was eminently successful. In 1850 a copper wire covered with gutta-percha was laid from Dover to Calais by the electrician Brett. It was in the same year that the first submarine wire was laid across the Mississippi.¹

¹ Following are the *St. Louis Republican's* accounts of various attempts to overcome the difficulties in the way of maintaining constant communication with the eastern bank of the Mississippi:

"In October of last year a wire was sunk from the shore, near the termination of the Biddle Street sewer, to the opposite side. This wire had been first insulated with gutta-percha, and afterwards placed at distances of every thirty feet in leaden cylinders eleven inches long by four inches in diameter, and weighing each about twenty-five pounds. These cylinders, the manufacture of Mr. E. W. Blatchford, while partially protecting the wire, afforded great resistance to the current, and weighed the wire securely to the bed of the river. In this manner the line had worked well for a time, when the agents of the city, in prosecuting some work on the Levee, broke the wire. It was taken up and the damage repaired, but a second accident again put a stop to its usefulness. Several plans of sub-river telegraphic connection were afterwards considered by the directors and agents of our companies, but the dangers of a swift current, of snags continually appearing, and the large quantities of sediment continually shifting its locality made it difficult to suggest one adapted to every emergency. The one finally adopted

Early in November, 1852, the stockholders of the St. Louis and Missouri Telegraph Company elected the following officers:

and put into use yesterday appears the best calculated for effective resistance to every obstacle, and will, we trust, afford a reliable means of communication. It is this: A wire of the ordinary size is encased in three heavy coats of gutta-percha, and the whole protected with a sheeting of lead—continuous, and water- and air-tight—a little less than the eighth of an inch in thickness.

"To cross the river twice at the point mentioned required six thousand five hundred and seventy feet of gutta-percha wire, allowing eighteen hundred feet for the irregularities of the bed of the river, drifting, etc. Mr. Blatchford encountered many serious and annoying difficulties in the accomplishment of his task, by the breakage of dies, etc.; but after an assiduous application he finally succeeded in manufacturing the whole. The lead sheeting was turned out in pieces sixty feet long, and afterwards turned and soldered on the gutta-percha and secured together. The weight of the whole when finished was ten thousand pounds.

"The wire was placed on a ferry-boat, and at an early hour in the day taken to the north end of the city, to be laid under the direction of Mr. J. N. Alvord, superintendent of the 'Ohio and Mississippi' Line, Mr. C. F. Johnson, of the 'Illinois and Mississippi Company,' and Mr. Blatchford. Numerous doubts existed as to the practicability of running the wire on the plan proposed, but the result has set them at rest. One end having been secured to the Missouri shore, the process of laying the first line commenced precisely at twelve o'clock, and was terminated at sixteen minutes past twelve. The boat then returned, and the second line was laid in precisely twelve minutes, no obstacle whatever having been experienced either time, and a little over three-fourths of the wire only having been used. To assure themselves that the wires had sustained no injury in depositing it, Mr. Alvord and Mr. Johnson, in the afternoon, communicated with them from the opposite shores with perfect success.

"The operators on the Northern and Eastern Telegraphic Lines have received and sent their reports to Illinoistown for the past ten months. The difficulty of sending or receiving reports after night has proven an annoyance to every one. It is expected, and certainly it is much hoped, that this inconvenience is entirely removed."—*St. Louis Republican*, Dec. 5, 1851.

"The first lines that were constructed to this city were suspended across the river by the erection of high masts, but owing to the distance from shore to shore and consequent weight of the wire between the masts, they were constantly breaking from sleet, storms, and even by birds alighting thereon in great quantities. This plan has then, owing to its imperfection and expense, been abandoned, and the lines were laid across the bed of the river by wire insulated with gutta-percha, and sunk by means of leaden weights. This, too, soon failed, and at the time Mr. A. Wade came to the city for the purpose of finishing the Cincinnati and St. Louis line, all our telegraphing was done on the Illinois side and brought across by ferry. Since that time, however, there have been two wires laid across the river by the O'Reilly Telegraph Company, insulated with gutta-percha, and then inclosed in lead pipes, but from some unknown cause one of them has already failed.

"Amid all these discouraging circumstances Mr. Wade has devised and executed a plan which, in the opinion of scientific men and those best acquainted with telegraphing, will prove as effectual in resisting every obstacle with which it may have to

Isaac M. Veitch, president; John W. Morris, secretary; Directors, T. P. Shaffner, G. B. Allen, John How, S. H. Laffin, E. K. Woodward, St. Louis; E. B. Cordell, Jefferson City; William H. Trigg, Boonville; Robert Aull, Lexington; William McCoy, Independence; Hon. Sol. P. McCurdy, Weston; E. Livernore, St. Joseph.

In 1859 a new cable was laid across the Mississippi. "The Western Union Telegraph Company," says a St. Louis paper of August 22d of that year,

"some time since deputed Mr. Ed. Creighton to superintend the making and laying of a new electric cable across the Mississippi River at this point. The cable is now finished, and will be laid to-morrow. . . .

"Formerly a wire was stretched from a very tall pole on the island, but there were frequent accidents, which rendered communication uncertain and irregular. The flood of 1852 washed down the giant mast on the island, and since that time suspension wires have been abandoned and subaquatic cables substituted. But here, too, were obstacles to be met, for the impulsive current of the Mississippi presented difficulties in the way of telegraphic intercourse between this city and the opposite shore which have never to this day been overcome successfully. A great many cables have failed from breaking, loss of insulation, etc., and this sometimes after but a few months—sometimes weeks—service. Mr. Creighton thinks he has made a cable which will now withstand the force of the rushing waters and endure for years.

"The cable to be paid out to-morrow is manufactured of four pieces of the Atlantic cable purchased of Tiffany, New York, . . . together with twenty-one strands of No. 9 iron wire, and all securely bound every six inches with the same (No. 9). Each piece of the Atlantic cable has fifty-six strands of wire, so that in the present cable there are two hundred and forty-five wires. Two miles of the Atlantic cable are used in the Mississippi 'cord,' and the whole length of the latter is two thousand six hundred and fifty feet. Its diameter is something over two inches. The total weight is five tons and a half, and the cost is about three thousand dollars. It is now coiled in an immense

contend as it has thus far proved perfect in its working, and if so, must supersede all others now in use. . . . A No. 9 wire of the best quality, well connected and annealed, is covered with several coatings of gutta-percha to the thickness of about three-fourths of an inch. To protect this from driftwood, snags, floating ice, sand, chafing against rocks, and other like causes, the whole outer surface of the gutta-percha is covered with No. 10 annealed iron wire, running parallel with and confined thereto, in a round cable formed by iron-wire bands, within six or eight inches of each other, the whole weighing about eight thousand pounds to the mile, and possessing a strength equal to a three-quarter inch bar of solid iron.

"Great care has been taken to give to the outer wires the greatest tension, so as to protect the gutta-percha from any sudden wrench or strain. This cable is laid so as to touch the bed of the river in any part, and in such a way that should the channel become deeper at any one place than it now is, it will settle to the bottom.

"It is imbedded in the earth at each shore to the depth of six feet, extending from extreme low-water mark to a pole two hundred feet distant, where the inside wire alone is connected with the main wire of the line, while the outside wires are firmly attached to the pole. The length of this cable is but little over half a mile, and upwards of ten miles of wire were used in its construction."—*St. Louis Republican*, Dec. 20, 1852.

reel, and will be stretched by one of the Higgins ferry-boats, the termination on this side being near the foot of Biddle Street."

In the early part of 1859 a few gentlemen of St. Louis formed an association for the purpose of extending the then existing line running westward from St. Louis, and also for the purpose of building other lines with the view of inducing the California trunk lines to converge at St. Louis. This enterprise finally became of sufficient importance to justify the formation of an incorporated company. A charter was granted by the Legislature which was very liberal in its provisions. It had fifty years to run, and permitted a capital stock of a million dollars. The style of the company was the "Missouri and Western Telegraph Company," which was formed for the purpose of "building, buying, leasing, maintaining, and operating a telegraph line or lines west of the Mississippi River."

Messrs. S. H. Laffin, J. H. Lightner, A. C. Goddin, Charles M. Stebbins, J. H. Wade, Isaac R. Elwood, and Anson Stager, the persons named as the corporators of this company, met at the Planters' House in August, 1860, and perfected their organization by the election of Charles M. Stebbins, of St. Louis, president; Edward Creighton, of Omaha City, general agent; and R. C. Cloury, of St. Louis, secretary and superintendent.

This company absorbed the "Missouri River Telegraph Line," extending from St. Louis to Kansas City; the "Kansas Telegraph Line," extending from Kansas City through Leavenworth and Atchison to St. Joseph; and the "New Line," finished a short time before to Springfield, Mo. It had already raised nearly enough money to complete a line to Omaha City and Council Bluffs. It owned the exclusive right to use the Morse, Hughes, and House telegraph patents in all of Missouri south of the Missouri River, in all of Kansas Territory, and in all of Nebraska Territory south of the Platte River, with the right to extend to Sante Fé, Fort Smith, St. Joseph, Omaha City, and Council Bluffs.

On the 30th of May, 1865, the "United States Telegraph Line" commenced operating at the Merchants' Exchange.

In 1879 the American Union Telegraph Company was incorporated, and began operations in St. Louis as an auxiliary to the Baltimore and Ohio Railroad telegraph system. In 1881 the corporation was absorbed by the Western Union Telegraph Company, since which time the Baltimore and Ohio Railroad Company has been conducting a telegraph business on its own account. It has a large number of offices at the principal business points of the city, and has lines

in successful operation running to all the leading cities of the world.

UNITED STATES MAILS, POST-OFFICE, AND CUSTOM-HOUSE.

At the time of the transfer of Louisiana to the United States the mail facilities of the then French village of St. Louis and its modest neighbor, Vide Poche (or Carondelet), were quite inconsiderable. A weekly pair of saddle-bags from the East, that had run the gauntlet of the Indian tribes of the Northwest, brought New York and Philadelphia letters and papers from one to six months old. To the west of St. Louis the mail was mostly transported in the hats and breeches-pockets of hunters, trappers, *courriers du bois*, and occasional immigrants from Kentucky going into the central portions of Missouri. For many years the largest portion of the letters for people in central Missouri were brought by travelers or explorers, generally directed to some one in the "Boone's Lick country," and were stuek up in the bar-room or some log tavern to be called for by the owners. As the "Boone's Lick country" embraced a territory equal in size to some of the smaller States, it was esteemed a fortunate chance if a letter reached the person addressed. After remaining stuek up and uncalled for for a number of months they were considered "dead letters," and settlers in the neighborhood who were anxious to get news from their old homes in Kentucky would peruse them for the benefit of whom they might concern. The delays and disappointments occasioned by the lack of a regular mail system were naturally a source of much inconvenience, and long periods elapsed—quite frequently many months—before a reply could be obtained from any distant point. Such was the gay, contented character of the French residents, however, and such their happy, careless abandon, so thoroughly absorbed were they in the occupations, interests, and amusements of their comparatively isolated frontier life, that delays which in our day and generation would be considered altogether monotonous and unbearable were tolerated by them not always with patience, to be sure, but with a mild and good-humored resignation. The introduction of saddle-bags as a means of transporting letters was a noteworthy innovation, and was hailed as a marked advance in providing facilities for postal communication. When the transfer to the United States, however, had been effected, the new government at once proceeded to establish a regular mail service for St. Louis and other important points in the newly acquired territory, and post-offices were speedily established at St. Louis, St. Charles, and Ste. Genevieve. From 1804 until about 1823 there was only one mail line from St.

Louis to Philadelphia, running through Cahokia, Vincennes, New Albany, Louisville, Limestone (now Maysville), Wheeling, Pittsburgh, and Chambersburg, the two latter places in Pennsylvania. The distance traversed from St. Louis to Chambersburg was ten hundred and fifty miles, on which portion of the route the mail was carried on horseback, and from St. Louis to Philadelphia the distance was about twelve hundred miles. Between Chambersburg and Philadelphia there was a stage line making two trips a week.

There were two mails a week from Philadelphia to Pittsburgh, and one mail a week from Pittsburgh to the Western settlements. Letters from the East and from Europe were respectively six weeks and three months in reaching St. Louis. In 1804 a turnpike had been built between Philadelphia and Lancaster, Pa., a distance of sixty-five miles, and a few years later it was finished to Harrisburg. In 1819 it was extended to Pittsburgh, and for a long time was the only turnpike that crossed the Alleghenies. As the building of this and other great highways progressed there was of course a corresponding improvement in the transportation of the mails, which was still further accelerated by the introduction of steamboats on Western waters. At first steamers were six weeks in making the trip from Louisville to St. Louis, but as early as 1825, such had been the progress made in steam navigation that a letter could be sent from St. Louis to Philadelphia in twenty days. Subsequently the time was reduced to fifteen days. After the National road had been completed to Columbus, Ohio, and graded to Indianapolis, stages ran through from St. Louis to Philadelphia in ten days, and this was the most rapid transit prior to the introduction of railroads.

The first postmaster at St. Louis was Col. Rufus Easton, who was appointed Jan. 1, 1805, and held the office for ten years. Col. Easton was a prominent and influential citizen, and represented the Territory as a delegate in Congress from 1814 to 1816, succeeding Edward Hempstead. By the regulations of the postal department, Col. Easton was required to publish a quarterly statement of letters which remained unclaimed in the post-office, and until the establishment of the first newspaper in 1808 he posted a written notice, giving the quarterly list of unclaimed letters, on the post-office door. On the 2d of August, 1808, the following list was advertised:

"A list of letters remaining in the post-office at St. Louis, quarter ending June 30, 1808: James Ashley, Charles Applegate, William Bradley, William Bonham, James W. Coburn, John Chitwood, John Calaway, William McDaniel, John Davis, Samuel H. Dunn, Cornelius R. French, Samuel Gibson, Lieut. Daniel Hughes, Philip Leduc, Jacob Horine, John Mullanphy,

Philip Miller, Robert Owens, Louis Pre Pillet, Joseph Perkins, William Rodgers, George G. Rooney, Hannah Radcliffe, Moses Riddle, Messrs. Raugh & Ermatinger, Antony Sanders, William Shay, George Smith, Solomon Townsend, Thomas Vinson, Simon Vanarsdale, Daniel Walker, James Ward, Robert Westcott, Anne Wolfort, William R. Willis, Hezekiah Warfield, John Zomwale.

“R. EASTON, P.M.”

The irregularities, delays, and uncertainties of the mails about this time are set forth in the following from the *Missouri Gazette* of Aug. 10, 1808:

“The failure of the mail from Ste. Genevieve to Cahokia, and from Vincennes to the same place, has long since been a fact of serious complaint, and more so to the inhabitants of this Territory since the establishment of a *Gazette* at the town of St. Louis, it being impossible for the printer to give to his patrons early and correct accounts, either of foreign or domestic news. The fault is certainly not to be imputed to the contractors, yet there is a radical defect in the law which does not enable the postmaster-general to remedy the evil, the contractor only being liable to the forfeiture of five dollars for the loss of a trip, and the postmaster-general cannot annul the contract until there have been five failures. The carrier will make a speculation. Say, for instance, it costs fifteen dollars to make a trip between Vincennes and Cahokia; the carrier, by his failure, saves ten dollars on the loss of each trip, from the tenor of his contract; and after five forfeitures, and before the information can reach the proper department, the tenor of the contract will have nearly expired, and even in fact so before a new contractor could be had and he enter upon his duties.”

The mails were transported in 1808 from Vincennes and Ste. Genevieve to Cahokia, from which place another rider brought them to St. Louis and St. Charles. These were then the only mail routes west of Indiana and Kentucky.

The list of letters remaining in the post-office at St. Louis for the quarter ending Dec. 21, 1808, was:

Richard Bibb, Jr., John Brown, James Byrnside, John Carlson, John Calaway, Vincent Calico, Isaac Darnielle, William Danis, care of M. Butcher, Peter Detchler, Robert Finfev, Jacob Faill, John Finley, John Gribum, William C. Greenup, Garrot Di Grinelimour, care of A. Chouteau, Jacob Harry, Benjamin Johnson, James Leonard, care of A. McNair, Mr. McKinsey, William Miller, James McFarlane, Uriah Musick, James Mackay, Hezekiah O'Neil, John Patterson, William Patterson, James Reid, Moses Riddle, Mr. F. Regnier, Esck Sterry, Paskell Sary, Abram Teter, Peyton Thomas, Robert Westcott, Thomas Welsh, Jacob Wagner, White Warner.

During the winter of 1809 there was another vexatious interruption of the mails, none being received for over nine weeks, and Mr. Charless did not fail to call attention to the fact and denounce it in his *Gazette*.

“We are compelled,” he said, on the 4th of January, “to complain of the wretched state of the post-office department in this quarter; by especial grace we sometimes receive one mail in two or three weeks, and then perhaps receive only one or two papers. Where this pillage of papers exists we cannot learn; we sincerely wish that all the postmasters on the line from Washington to this place would only do their duty and send on such papers as are committed to their charge.”

Again, on the 11th of January, he stated that there had been no mail from the East for more than two months. “Excessively cold weather, and no thermometer in the place to record the degree,” he added.

On the 31st of May, 1809, an advertisement appeared inviting proposals for carrying the mails (the proposals to be received “at the general post-office in Washington City”), as follows:

“194. From Louisville, Ky., by Jeffersonville and Clarks-ville, to Vincennes, once a week. Leave Louisville every Sunday at 6 A.M., and arrive at Vincennes the next Wednesday by 10 A.M. Leave Vincennes every Wednesday at 2 P.M., and arrive at Louisville the next Saturday by 6 P.M.

“195. From Vincennes to Kaskaskia, once a week. Leave Vincennes every Wednesday at 2 P.M., and arrive at Kaskaskia on Saturday by 6 P.M. Leave Kaskaskia every Sunday at 6 A.M., and arrive at Vincennes the next Wednesday by 10 A.M.

“196. From Kaskaskia, by St. Philip, Prairie du Rocher, and St. Louis to St. Charles, once a week. Leave St. Charles every Thursday at 2 P.M., and arrive at Kaskaskia on Saturday by 6 P.M. Leave Kaskaskia every Sunday at 6 A.M., and arrive at St. Charles on Tuesday by 10 A.M.

“197. From Cape Girardeau to New Madrid, once in two weeks. Leave Cape Girardeau every other Tuesday at 6 A.M., and arrive at New Madrid on Friday by 10 A.M. Leave New Madrid same day at 2 P.M., and arrive at Cape Girardeau on Monday by 6 P.M.

“198. Kaskaskia, by Geneva, Cape Girardeau, Tywappety, and Wilkinsonville, to Fort Massac, once a week. Leave Kaskaskia every Sunday at 6 A.M., and arrive at Fort Massac on Wednesday by 10 A.M. Leave Fort Massac every Wednesday at 1 P.M., and arrive at Kaskaskia on Saturday by 6 P.M.”

The mails announced on the 14th of November, 1810, were “from St. Louis to Cahokia east, once a week; to Herculaneum, Mine à Breton, and Ste. Genevieve, once in two weeks; to St. Charles, once a week.”

The following extracts from the diary of Mr. Frederick L. Billon forcibly illustrate the vexatious delays which attended travel and the transportation of the mails in those early days:

“I came to St. Louis in the year 1818, and was just two months on my way from my native city, Philadelphia. I left that city Sunday morning early, August 30th, in the mail-stage for Pittsburgh, where I arrived at 4 P.M. on Friday, September 4th, the sixth day from Philadelphia. There being then no stages west of Pittsburgh, we remained there some four or five days, waiting for a keel-boat to descend the Ohio, keels and flat-boats (then called ‘broad-horns’) being the only conveyances by water west of that point. Meeting with a Capt. Fellows, then coming to the marine settlement in Illinois with his family in a keel-boat, we took passage with him, and left Pittsburgh on Wednesday, September 9th, and after several groundings on account of the low stage of water, reached Louisville on Monday, the 21st, being twelve days on our voyage to that point. We remained there four days while the boat was discharging her cargo, to be drayed around the Falls of the Ohio to Shipping-port below. The boat was then taken over the falls and reloaded, and we left again on Friday, September 25th. After six or seven days’ run from the falls, we grounded on a bar at the head of Green River Island, and the water falling rapidly, soon left us

high and dry on the bar. We lay here seven or eight days, discharged the freight on the bar, cut skids on the island to slide the boat to the water, reloaded her, and started again on Thursday, October 8th, and in three days more reached Shawneetown. Here we left the boat, being persuaded that she would never reach St. Louis until the following spring, having yet over one hundred miles to reach the Mississippi, and two hundred more up that stream against a strong current. We were here several days seeking a conveyance for ourselves and trunks to Kaskaskia, one hundred and twenty miles from Shawnee, on the way to St. Louis. Finally we induced an old man who possessed the only wagon in the place, for the sum of fifty dollars (five dollars per day for ten days he would be in going and returning), to take our few trunks, and we to have the privilege of riding if we thought fit. There were then but some four or five houses between these two places. We left Shawnee on Thursday, October 15th, and arrived at Kaskaskia on Tuesday, the 20th; crossed the Mississippi to Ste. Genevieve in a large canoe on Wednesday, the 21st; remained here some five or six days; left for St. Louis on Tuesday morning early, the 27th; recrossed the Mississippi, and came up in a French cart that night to Waterloo, and on the following morning, Wednesday, the 28th of October, came through the heavy timber in sight of St. Louis at ten o'clock A.M.; crossed in a flat that landed us on a large bar extending out several hundred yards from the main shore, reaching St. Louis in just two months from Philadelphia."

Mr. Billon descended the Ohio at the season of the year when the water was lowest, and his journey was lengthened on that account some twelve or fifteen days.

The perils encountered by the mail-carriers of that early period are only suggested by the announcement made on the 6th of September, 1810, that the postmaster-general had offered a reward of five thousand dollars "for the apprehension and securing of the robber or robbers who murdered the post-rider between Vincennes and Kaskaskia and carried away the mail portmanteau with its contents; to be paid upon the conviction of the offender."

Such was the alleged mismanagement of the mail department, or that portion of it in which St. Louis was interested, that on the 28th of November, 1812, it was announced that the grand jury of the district had presented it as a nuisance. The postmaster at St. Louis at this time was Col. Rufus Easton, a capable officer and gentleman of high standing, and the fault lay not with him, but with the mail contractors or "post-riders," who, as we have already seen, were often lax and negligent in the discharge of their duties. Col. Easton was succeeded in the postmastership by his brother-in-law, Dr. Robert Simpson, who was appointed by President Madison Jan. 1, 1815, the vacancy having been created by Col. Easton's election to Congress. Dr. Simpson retained the position nearly four years, and in the autumn of 1818 was succeeded by Capt. A. T. Crane, of the United States army. After a brief and popular administration of less than twelve months Capt. Crane died, on the 26th of September,

1819. The next postmaster was Col. Elias Rector, who retained the office until his death in 1822. During Col. Easton's incumbency the post-office was located at his residence and law-office, on the southwest corner of Third and Elm Streets. Dr. Simpson established it at various points from time to time, first on the east side of Main Street above Elm, then on the east side of Main below Elm, then on the west side of Main Street, at the southwest corner of Elm Street. Under Capt. Crane it was situated in the back part of the old stone building occupied by the Bank of St. Louis, and under Col. Rector was removed to the old stone mansion of Mrs. Chouteau, at the southwest corner of Main and Chestnut Streets, and subsequently to the frame building on the south side of Chestnut Street below Second.

Proposals were invited Aug. 10, 1816, for carrying United States mails in Missouri, from St. Louis, by Potosi and Lawrence Court-House, to Arkansas, once in four weeks; to leave St. Louis every fourth Saturday, commencing on the first Saturday in November, and arrive at Arkansas in ten days, on Monday at six P.M.; leave Arkansas the next Wednesday at six A.M., and arrive at St. Louis in ten days, on Friday at six P.M.

Nathaniel Simonds made the following announcement to the public Nov. 20, 1818:

"The subscriber intends running a stage-coach between St. Louis and St. Charles three times in each week, to commence on the first Monday in December, in the following order, viz.:

"Leave the ferry-house opposite St. Charles at ten o'clock A.M. on Mondays, Wednesdays, and Fridays.

"Leave Pitzer's brick livery-stable in St. Louis at ten A.M. on Tuesdays, Thursdays, and Saturdays, and pass the boarding-houses of Mr. Pitzer, Mr. Paddock, and Mrs. Snow."

"We understand," said the *Missouri Gazette* of March 17, 1819, "that it is contemplated to establish a regular line of stages between this town and Franklin, Howard Co. A stage runs regularly once a week to and from St. Louis to Kaskaskia, another runs three times a week to St. Charles, another twice a week to Edwardsville, to which will, we hope, shortly be added the stage to Franklin. We have also understood that it has been in contemplation to establish a line from Edwardsville to Vincennes. It will only remain to have it continued from Vincennes to Louisville; a direct communication by stage will then be opened from the Atlantic States to Boon's Lick, on the Missouri. It is one of the most advantageous investments of money in the Eastern States, where the price of conveyance is much cheaper than it is west of the Allegheny. Seven cents to the mile is the usual price in the former, while ten cents, and sometimes 12½, are charged in the latter."

R. Smith announced, Dec. 15, 1819, that "the great Western stages start every morning from the door, and on the premises is one of the best livery-stables in the city, conducted by Mr. John Tomlinson, where travelers' horses will be faithfully attended to."

The following advertisement, under date of Dec.

27, 1827, shows the arrangements for transporting passengers and mails at that time:

"United States mail stage from St. Louis, Mo., to Louisville, Ky., passing through the States of Illinois and Indiana, *via* Vincennes. Through in five days; no night driving; twice a week each way. Arrangements: Leaves St. Louis every Tuesday and Saturday at four o'clock A.M., and arrives at Vincennes every Monday and Thursday at four o'clock P.M.; leaves Vincennes at four o'clock A.M. next morning, and arrives at Louisville by way of New Albany in two days; leaves Louisville every Sunday and Wednesday at four o'clock A.M., and in returning the same time is occupied; arrives at St. Louis every Sunday and Thursday at six o'clock P.M. All baggage at the risk of the owner. Fare, from St. Louis to Vincennes, one hundred and sixty miles, ten dollars; from Vincennes to Louisville, one hundred and twelve miles, seven dollars."

As late as 1835 the arrangements for distributing the mails were still of a primitive character, and our present carrier system was then of course unknown. Among the expedients resorted to the following (described in a local journal) is rather unique:

"In 1835, Mr. R. D. Watson was a merchant on Main Street, near Olive, and lived on his farm, about seven miles from the court-house. He generally came into town on Monday morning, bringing in with him a little black pony, and this pony was his letter-carrier. Any correspondence that might have arrived for Mrs. Watson or any member of the family was fastened to the pony's mane, and he was then turned loose on Olive Street, and would make straight tracks for home, where a servant would be waiting for him. In those days there were but few houses between St. Louis University and Mrs. Watson's residence, on the western part of Watson's Fruit Hill sub-division."

The question of expediting the mails between St. Louis and Baltimore, in accordance with the suggestion of the Baltimore Board of Trade, was the subject of a meeting of the Chamber of Commerce on the 17th of April, 1851. It was thought at the time that there was no reason why the mail should not be received in St. Louis in five days from Baltimore, and that it could be done if the merchants of the city would set themselves about it in earnest.

The first overland mail from California arrived in St. Louis Oct. 10, 1858, and the occasion was celebrated by a demonstration in honor of Mr. Butterfield, who had been mainly instrumental in putting it into successful operation. A procession was formed in front of the Planters' House about eight o'clock in the evening, and, headed by the St. Louis Silver Band in Arnot's band-wagon drawn by six horses, marched to the Pacific Railroad depot. Mr. Butterfield was received with an address on behalf of the

citizens and of the reception committee by Hon. John F. Darby, to which he responded.

Upon leaving the depot the carriages proceeded to their starting-point on Fourth Street, preceded by the band-chariot, and passing around Pine, did not draw up until they reached the post-office, when the mail was turned over to the proper officials. Some extra bags, containing the *San Francisco Evening Bulletin*, the special edition of the *Alta California*, and other papers, were retained and put out at the hotel. Here they were opened, and the papers handed around to the assembled spectators, who read them with great apparent interest. The *Alta California* was most in demand, as it displayed a fine special head of "By the Overland Mail," and an imposing picture of a mail-coach with four horses in full gallop. A journal, showing the route taken by the overland mail on its first trip from San Francisco to St. Louis, and also the distances between the different points and the time required for the performance of the trip, states that at least four days' time was lost on this trip. The record is as follows:

"Memorandum of distances between the stations on the overland route from San Francisco to St. Louis *via* Arizona, and of the time made on the first trip: San Francisco to Clark's, 12; Sun Water, 9; Redwood City, 9; Mountain View, 12; San José, 11; Seventeen-Mile House, 17; Gilroy, 13; Pacheco Pass, 18; St. Louis Ranch, 17; Lone Willow, 18; Temple's Ranch, 13; Firebaugh's Ferry, 15; Fresno City, 19; Elk Horn Spring, 22; Whitmote's Ferry, 17; Cross Creek, 12; Visalia, 12; Packwood, 12; Tule River, 14; Fountain Spring, 14; Mountain House, 12; Posey Creek, 15; Gordon's Ferry, 10; Kern River Slough, 12; Sink of Tejon, 14; Fort Tejon, 15; Reed's, 8; French John's, 14; Widow Smith's, 24; King's, 10; Hart's, 12; San Fernando Mission, 8; Canuengo, 12; Los Angeles, 12. Total, 462 miles. Time, 80 hours.

"Los Angeles to Monte, 13; San José, 12; Rancho del Chino, 12; Tymascol, 20; Laguna Grande, 10; Teencoula, 21; Tejungo, 14; Oak Grove, 12; Warner's Ranch, 10; San Felipe, 16; Vallecito, 18; Palm Springs, 9; Carisso Creek, 9; Indian Wells (without water), 32; Alamo Mucho (without water), Cook's Wells (without water), 22; Pilot Knob, 18; Fort Yuma, 10. Total, 282 miles. Time, 72 hours and 20 minutes.

"Fort Yuma to Swiveler's, 20; Filibuster Camp, 18; Peterman's, 19; Griswell's, 12; Flap-Jack Ranch, 15; Catman Flat, 20; Murderer's Grave, 20; Gila Ranch, 17; Maricopa Wells, 40; Socatoon, 22; Peacho, 37; Pointer Mountain, 22; Tucson, 18. Total, 280 miles. Time, 71 hours and 45 minutes.

"Tucson to Seneca Springs (without water), 35; San Pedro (without water), 24; Dragon Springs (without water), 23; Apache Pass (without water), 40; Stein's Peak (without water), 35; Soldier's Farewell (without water), 42; Ojo de Vaca, 14; Miembre's River, 16; Cook's Springs, 18; Peacho (without water), 52; Fort Fillmore, 14; Cottonwoods, 25; Franklin, 22. Total, 360 miles. Time, 82 hours.

"Franklin to Waco Tanks, 30; Canodrus, 36; Pinery (without water), 56; Delaware Springs, 24; Pope's Camp, 40; Emigrant Crossing, 65; Horse-Head Crossing, 55; Head of Coneho (without water), 70; Grape Creek, 22; Fort Chadbourne, 30. Total, 428 miles. Time, 126 hours and 30 minutes.

"Fort Chadbourne to Station No. 1, 12; Mountain Pass, 16; Phantom Hill, 30; Smith's, 12; Clear Fork, 26; Francis', 13; Fort Belknap, 22; Murphy's, 16; Jackboro', 19; Earhart's, 16; Connolly's, 16; Davidson's, 24; Gainesville, 17; Diamond's, 15; Sherman, 15; Colbert's Ferry (Red River), 13½. Total, 282½. Time, 65 hours and 25 minutes.

"Colbert's to Fisher's, 13; Wail's, 14; Boggy Depot, 17; Gary's, 17; Waddell's, 15; Blackburn's, 16; Pusley's, 17; Riddell's, 17; Holloway's, 17; Trayon's, 17; Walker's, 17; Fort Smith, 15. Total, 192 miles. Time, 38 hours.

"Fort Smith to Woosley's, 16; Brodie's, 12; Park's, 20; Fayetteville, 15; —'s Station, 12; Callaghan's, 22; Harburn's, 19; Conch's, 16; Smith's, 15; Ashmore, 20; Springfield, 13; Evan's, 9; Smith's, 11; Bolivar, 11½; Yost's, 16; Quincy, 16; Bailey's, 10; Warsaw, 11; Burns', 15; Mulholland, 20; Shackelford's, 13; Tipton, 7. Total, 318½. Time, 48 hours and 55 minutes. Tipton to St. Louis, 160 miles. Time, 11 hours and 40 minutes.

"24 days, 20 hours, and 35 minutes; 2 hours and 9 minutes allowed for difference in longitude, leaves 24 days, 18 hours, and 26 minutes."

The first effort to secure the erection of a building for a post-office, custom-house, land-office, etc., was made in 1838, a meeting being held at the court-house November 12th of that year, for the purpose of taking into consideration the propriety of memorializing Congress on the subject. The meeting was organized by calling William Renshaw to the chair, and appointing John H. Watson secretary, after which, Gen. N. Ranney having explained its object, the following resolutions were submitted by the secretary:

"Resolved, As the sense of this meeting, that a building for a custom-house and other public offices is highly necessary for the convenient transaction of the public business in this city, and that such measures as may be deemed essential to the furtherance of this object should be prosecuted without delay.

"Resolved, That a committee, to consist of five members, be appointed by the chair, for the purpose of drafting a memorial, to be addressed to Congress in behalf of the object contemplated in the foregoing resolution, and that an additional committee, to consist of ten members, be appointed in like manner, whose duty it shall be to present said memorial to the citizens for their signatures."

The resolutions were unanimously adopted, and the chairman, pursuant to their provisions, announced the appointment of the following committees: Committee to prepare a memorial, Messrs. N. Ranney, William Milburn, J. B. Bowlin, A. Wetmore, and A. J. Davis; committee to obtain signatures, Messrs. N. Ranney,

John B. Sarpy, James Clemens, Augustus Kerr, Abner Hood, H. L. Hoffman, S. S. Rayburn, Edward Walsh, William Glasgow, C. Garvey, Robert Rankin, and Edward Tracy.

The latter committee was increased to twelve members, on motion of Maj. Wetmore that the chairman and secretary be added to the last-named committee.

In 1851 it was proposed to locate the post-office temporarily in the court-house buildings, and a local journal, under date of May 6th, referring to the project, said,—

"In the course of the present year the construction of the eastern wing of the court-house will be commenced and probably finished. We stated some time since that it was contemplated to erect two other buildings separate from the court-house building, one of which is to stand on the northeast and the other on the southeast corner of the lot, and both of which are to be used as offices or court rooms, or by persons in the employ of the county. It was designed that these buildings should be thirty-two feet front by sixty feet on Chestnut, and the same dimensions on Market Street. A proposition is now before the county court which may cause a change of these plans. Mr. Gamble, the postmaster, proposes that these additional buildings shall be constructed of sufficient capacity to be employed temporarily for post-office and custom-house purposes. For the post-office alone Mr. Gamble asks that one apartment be set aside, forty feet front by one hundred in depth."

On the 9th of October, 1851, it was announced that

"an association of gentlemen of this city have leased from Mr. D. D. Page a portion of the ground at the corner of Second and Chestnut Streets, with the intention of erecting thereon a building suited to the wants of the St. Louis post-office. For this purpose a front of sixty-five feet on Second by ninety-six on Chestnut has been obtained. It is contemplated to erect a building three stories high, and to appropriate the whole of the first floor for the uses of the post-office; the interior will be arranged with direct reference to the accommodation of the office and of its customers."

In the following year the old St. Louis Theatre property, at the corner of Third and Olive Streets, was purchased by the government, and the erection of a custom-house and post-office building commenced, after plans prepared by George I. Barnett, architect.

In addition to the custom-house and post-office, Mr. Barnett has prepared the plans for many other public buildings, and occupies a deservedly high place among the architects of the country. He is an Englishman by birth, and his father, who was a clergyman and a writer of some note on questions of political economy, gave him careful home training, supplemented by a course in the grammar school at Nottingham. Leaving this institution at the age of sixteen, young Barnett spent three years with a practical builder, and then studied architecture in some of the best schools in England and under the best preceptors

until he was twenty-four, when he determined to emigrate to America. After spending a few months in New York, he removed to St. Louis in the latter part of 1839. Here he opened an office, and soon obtained a most lucrative business. For nearly twenty years he was the only educated architect in the city, and his genius and enterprise naturally secured for him an extensive clientage. He was employed in nearly every great work of that period. In later years St. Louis has had highly accomplished architects, but Mr. Barnett still retains a leading position. It is a well-known fact that Mr. Barnett has erected a much larger number of buildings than any other

architect in St. Louis, and to his skill and genius are due the architectural beauties of many of the public buildings, fine business houses, and elegant residences of the city. It would be impossible to enumerate all his achievements in this direction, but the following may be cited as prominent specimens of his work: The Southern and Lindell Hotels, the St. Louis Mutual Life Insurance building (Sixth and Locust Streets), the post-office (Third and Olive), the granite building Fourth and Market, Barr's building (Sixth and Olive), and the old Merchants' Exchange. In the competition with the most eminent architects of the country in designs for the new Merchants' Exchange, his drawing secured the first prize of fifteen hundred dollars.

Mr. Barnett also enjoys a high reputation as a hotel architect, and in addition to the splendid fruits of his genius in this department in St. Louis, has built many famous structures throughout the West, notably the Maxwell House at Nashville, Tenn.

In 1850, Mr. Barnett made a professional tour of Europe, and examined with well-trained and cultivated faculties the monuments of art which the great masters left for the instruction of their followers. St. Louis gained much from the results of his observation and comparison at this period, and his career from that time forward was one of constantly-increasing

honor and influence. While impressing his individuality on the most noted and beautiful of the structures of an ambitious and growing city, he has established a stainless record as an architect of incorruptible character. He is a kind-hearted, modest, and unpretentious gentleman, of genial nature and rare social qualities, and while honored as an artist he is also loved as a man.

Mr. Barnett has two sons, who have been bred to his profession. George (the younger) is associated with his father in business, and is a young man of extraordinary proficiency for his age, who in the judgment of those who have watched the development of his youthful powers, must ultimately take rank among the architects of the country.

"The removal of the post-office," it was stated in a newspaper of May 20, 1852, "has had the effect to turn the attention of certain classes of dealers to property in its present vicinity, and the consequence has been to increase materially its value."

The erection of the building proceeded until April, 1859, when the post-office, which occupied the whole of the main floor, was established in its new quarters.

The building is one hundred and thirty-nine feet three inches long, eighty feet nine inches wide, and sixty-six feet seven inches high on the west front, and seventy-seven feet seven

inches high on the east front. It is of the Roman Corinthian order, and in all its details is in strict consonance with that style of architecture. The entire structure is faced with a peculiar stone known as the "Barrett stone," selected for the purpose by Capt. Bowman, United States supervisor of public buildings, and containing a large proportion of siliceous matter, rendering it almost time- and fire-proof. On the west or principal front are six massive rusticated stone piers, connected by large arches the height of the first story, and forming a sub-base, which supports the six fluted columns of the portico, which is two stories high.

The building has been used for the post-office,

Geo. I. Barnett

custom-house, United States courts, and government offices generally, but for a number of years has been inadequate for those purposes, and in 1872 the government determined to erect a new building for the custom-house, post-office, etc., which should not only provide ample space and facilities, but should be an ornament to St. Louis commensurate with the dignity and importance of the city. A site was accordingly determined upon, comprising what was known as the Crow block, bounded by Olive and Locust, Eighth and Ninth Streets, which was condemned and purchased in the autumn of 1872, and plans were prepared by A. B. Mullett, United States supervising architect.

The structure, which is now in course of completion, has a frontage on Olive and Locust Streets of two hundred and thirty-two feet, by a depth on Eighth and Ninth Streets of one hundred and seventy-seven feet. It is three stories in height with an attic, and the central compartment of four stories is crowned by an immense convex dome, the distance from the ground to the apex of the dome being one hundred and eighty-four feet. The height of the cornice of the wing building is ninety-six feet. Each façade of the building is divided into three parts, each central division being crowned by pitched pediments, over which are ornamented windows of corresponding style. The main front on Olive Street is surmounted by the immense dome, and so decorated as to produce a grand and imposing effect.

This floor is but two feet higher than the sidewalk on Olive Street, and is easy of access, a decided improvement on the present post-office building in that particular. The whole of the first story will be used for post-office purposes, and is lighted not only from the four fronts of the building, but from the interior court or quadrangle, thus avoiding the necessity of burning gas during the day, as is the costly and unhealthy experience with the old building.

The facilities for the reception of mail matter are to be made a chief feature. They will be unequalled by any building, either in this or any other country, from the fact that the mail-cars will be carried across the St. Louis bridge into the tunnel, and so on until they are switched off in front of the basement of the post-office. For this purpose the tunnel will be widened opposite the post-office so as to afford a broad platform between the two tracks for the delivery and receipt of all mail matter, and from every direction. The mail matter is then to be placed on elevators and run up into the distributing-room, and there classified. The same course is to be pursued with reference to all bonded goods, and all this immense business is

made easy of transaction without the distraction or disturbance in the slightest degree of the ordinary business of the railroad through the tunnel, or the business above or on the streets.

The height of the basement from its flooring to the sidewalk is twenty-eight and one-half feet, divided into two stories, to be known as basement and sub-basement. The foundation of the sub-basement extends eight feet below the floor, which makes the entire depth from Olive Street to the bottom of the foundation thirty-six and one-half feet.

Over the first story or post-office floor will be arranged the United States District Courts, with suitable apartments for associate judges, clerks, district attorneys, marshals, and deputies, grand and petit juries, etc., with ample room for all other government offices demanding accommodation. These offices are approachable from the main Olive Street front, as well as from others, affording spacious stairway to every part of the building. The main staircase is colossal in its proportions, and elaborate and beautiful in its design, with return flights, continued from floor to floor to the upper story. Exclusive of this principal stairway are two of the largest passenger elevators, placed one on either side of the staircase, and accessible from the same vestibule as the Grand or Olive Street stairway.

The imposing edifice has already influenced the erection of handsome business houses in its immediate vicinity and for blocks around. The basement of the building is of red granite blocks with a plain finish. The color of the stone is a pale, delicate red, not usually employed in buildings in St. Louis. The material employed above the basement is Maine granite throughout. The principal stone-work was done on Hurricane Island, the lower story being rusticated and having orders above, in style of composition so frequently employed by the Venetian school during the *renaissance* period, and which owes its origin to San Micheli. The second and third stories, of the Corinthian order, have pilasters resting on moulded bases, the intercolumniations being filled in with square-headed windows, having arched pediments in the second story and in the third triangular ones. Of the triple divisions and façades, the central one on either side, which forms a projection, is adorned by porticoes and crowned with a pediment. Two porticoes, one above the other, over the grand entrances have very elegant proportions and details wrought with extraordinary care. The porticoes are formed by a couple of granite columns resting on massive plinths and having Corinthian capitals. In each portico are four fluted columns, with balustrades between the couples.

Piers supporting statuary stand at the base corners of the lower portico, which is that of the second story. Over the upper portico the fourth-story windows are semi-circular headed, have finely-moulded cornices, and are surmounted by a massive pediment enriched with sculptures. A finely-wrought entablature is surmounted by a balustrade, and above this appears the quadrangular dome, having its windows encaused with grooved and coupled pilasters, and their richly-designed cornices furnishing support for statuary.

The building when completed will be one of the most elegant and perfect in its interior arrangements in the country, and although not as complicated in

architectural design as other post-offices, notably those of New York and Boston, it will undoubtedly exceed them all in the simple grandeur of its architectural proportions and the quiet beauty of its general details.

The following statistics were returned by the St. Louis post-office in 1881:

Annual cash receipts from sale of stamps, stamped envelopes, etc., \$730,539; letters delivered at general delivery, 124,465; letters delivered at daily call, 21,514; mail letters delivered by carriers, 13,119,988; mail postal cards delivered by carriers, 3,008,926; drop letters delivered by carriers, 2,366,852; letters and postal cards delivered from boxes, 1,852,375;

mitted to New York, \$2,489,000. The total number of packages handled during the year ending Dec. 31, 1881, containing letters, was 78,578, amounting to 47,797 pounds. During the same time there were 13,941 sacks of papers handled.

The following is a list of the postmasters of St. Louis, with the dates of their appointment, from the establishment of the office in 1805:

Postmasters.	Date of Appointment.
Rufus Easton.....	Jan. 1, 1805.
Robert Simpson.....	Jan. 1, 1815.
Aaron T. Crane.....	Sept. 11, 1818.
Elias Rector.....	Jan. 1, 1820.
Wilson P. Hunt.....	Oct. 10, 1822.
Thomas Watson.....	June 26, 1840.

Postmasters.	Date of Appointment.
Samuel B. Churchill.....	July 9, 1842.
John M. Wimer.....	June 14, 1845.
Archibald Gamble.....	April 24, 1849.
David H. Armstrong.....	April 3, 1854.
John Hogan.....	March 30, 1858.
Peter L. Foy.....	April 1, 1861.
Joseph S. Fullerton.....	Feb. 21, 1867.
Andrew J. Smith.....	April 6, 1869.
Chauncey I. Filley.....	March 12, 1873.
Samuel Hays.....	Sept. 4, 1878.

GAS COMPANIES.

St. Louis Gas-Light Company.—In 1837 the Legislature of Missouri granted a charter to the St. Louis Gas-Light Company, vesting in it the power to erect works and necessary apparatus for lighting St. Louis and its suburbs with gas. This charter was amended in 1839 and again in 1845. Under the original charter and the acts of Assembly amendatory thereof the company had the exclusive right to manufacture and vend gas in the city of St. Louis, and was also authorized “to receive on deposit or loan, and upon such terms as the parties interested may agree upon, any funds, the temporary or permanent use of which may be offered them, and the use of which may be beneficial to the company.” By these acts it was also provided that the city of St. Louis should have the right, at the expiration of a period of either twenty or twenty-five years after the 1st of January, 1840, if it should so resolve, to purchase the gas-works from the St. Louis Gas-Light Company, upon the terms and conditions and by the means (the appointment of arbitrators, etc.) mentioned in these acts, and that the charter should continue in force for twenty-five years from Jan. 1, 1840, unless the company should convey to the city its property, etc., but should the city not determine to purchase at either of the times provided for, then the charter was to remain in force another twenty-five years. In 1839, after the first amendment to the charter was passed, an office was opened on Chestnut Street near Main for the purpose of engaging in the business of a general deposit and savings institution. At this time the officers and directors of the company were: President, N. Paschall; Secretary, A. Chadwick; and Directors, Theodore L. McGill, John D. Daggett, R. S. Tilden, J. T. Swearingen, N. E. Janney, M. L. Clark, L. B. Shaw, and P. R. McCreery. In 1840 negotiations were entered into between the company and the city with reference to lighting the streets with gas, and a bill authorizing the city to subscribe to the stock of the company to the amount of fifty thousand dollars passed the City Council and was approved by the mayor. In 1841 the construction of the works was commenced on ground between Second Street and the river, nearly opposite the bridge. Only a beginning

was made, however, the banking branch of the business continuing to engage the entire attention of the directory.

This soon proved unsuccessful, and it was not until 1846 that the company bent its energies to the construction of its works and the business of making and selling gas. At this time it found itself, with impaired capital, unable, unless extraordinary efforts were made, to complete its undertaking. Looking to this end, and for the common benefit of the contracting parties, an agreement was entered into between the city and the company Jan. 9, 1846, in which the company engaged to furnish gas, etc., at a stipulated price, and the city agreed to relinquish its right to purchase the gas-works, etc., at either twenty or twenty-five years from Jan. 1, 1840, provided it should have the right to purchase at a period of thirty years after Jan. 1, 1840, and at the period of every five years thereafter. On June 17th, G. F. Lee, of Philadelphia, entered into a contract with the company to build the needed works and furnish the city with gas. The whole cost was to be \$130,000, the contractor agreeing to take the bonds of the company, payable three years after the completion of the contract, for \$50,000, and to subscribe for and pay \$40,000 of the capital stock, leaving \$40,000 to be raised by subscription, the real estate and personal effects of the company being valued at \$40,000. The old stock was scaled down and new stock to the amount of \$40,000 issued, making a total capital of \$170,000. The work was pushed rapidly forward, and the city was lighted with gas for the first time on Nov. 4, 1847. During 1848 about 6,600,000 cubic feet of gas was consumed, and in 1868 the consumption had increased to 247,480,000 cubic feet. The success of the company was assured. The city, through its counsel, notified the company on Feb. 27, 1869, that it had resolved to purchase the gas-works on the 1st of January, 1870, under their agreement of 1846. The city appointed arbitrators, etc., as required by the company's charter, but the company made no move in the matter, and failed to appoint arbitrators to agree upon the price, etc. The city instituted action against the company in May, 1870, in the Circuit Court of St. Louis County, to compel the company to comply with the terms of the agreement.

Pending the litigation, in 1873 a compromise was effected between the city of St. Louis, the St. Louis Gas-Light Company, and the Laclède Gas-Light Company (then recently organized), in which it was agreed that the Laclède Company should furnish gas to all that part of the city lying north of Washington Avenue, and that all litigation between the city and

Painted by A. H. Wood

Thos Pratt

the St. Louis Company should cease. This compromise, however, failed to put an end to the litigation, which was renewed in 1875, and in 1876, under a decree of court, the company's property was placed in the hands of a receiver, Socrates Newman, and the company was restrained and enjoined from manufacturing or selling gas. From this decree an appeal was taken to the Missouri Supreme Court. While awaiting the decision of the court, the affairs of the company prospered greatly in the hands of the receiver. In November, 1879, the opinion of the Supreme Court was delivered adverse to the claim of the city and completely overruling the decisions of the lower courts. On Dec. 24, 1879, Mr. Newman, under an order of the court, delivered the entire property of the company to R. J. Lackland, its president. Later in the month, at the election for directors, the following gentlemen were chosen: Gerard B. Allen, E. N. Leeds, Rufus J. Lackland, and John R. Lionberger, who with Oliver A. Hart, Charles H. Peck, E. A. Manny, George S. Drake, and W. F. Ferguson, who held over, constituted the board.

The capital stock of the company is six hundred thousand dollars, divided into twelve thousand shares of fifty dollars each. The present board of directors is composed of R. J. Lackland, president; G. B. Allen, vice-president; George A. Madill, Samuel Hays, E. A. Manny, W. H. Ferguson, Dwight Durkee, and Charles H. Peck. George M. Paschall is secretary, and Socrates Newman assistant manager.

The boundaries of the company are from Washington Avenue to Keokuk Street and from the river to the city limits.

On Sunday afternoon, Dec. 13, 1874, Thomas Pratt, chief engineer of the St. Louis Gas-Works, was killed in an explosion. He had gone into one of the purifier-rooms to examine a purifier tank, when an explosion was heard; and the employes, rushing in, found him lying on the floor, having been thrown some twenty feet with such violence against one of the tanks that his chest was crushed in, and he was then quite dead.

Mr. Pratt was one of the oldest and best-known gas experts in the country, and one of the most popular citizens St. Louis ever had. He was born at Longborough, county of Leicester, England, in 1802; was of humble parentage, and had to rely entirely on his own resources in waging the battle of life. In 1827 he came to America, but during the same year returned to Europe, settling at Calais, France, where he remained five years. He then went to London, where he resided nearly two years, working in both places at gas-fitting.

In November, 1834, he again came to America, and having spent some time in New York, removed, in 1837, to Pittsburgh, where he worked for the gas company. In 1842 he went to Cincinnati, and became superintendent and chief engineer of the gas-works there. He arrived at St. Louis in 1848 to accept a similar position, which he held until his violent and sudden death.

Mr. Pratt was a prominent builder of gas-works, having planned and constructed the works at Pittsburgh, Cincinnati, Quincy, St. Louis, Peoria, Bloomington, Denver, and Kansas City, and was a large stockholder in the gas companies in several of these cities. He possessed business talents of a high order, and although on coming to this country he had practically nothing, his ability enabled him to command the highest salaries, and his management was such that at the time of his death his fortune had reached a handsome sum. Although nearly seventy-three years of age, he was to the last a youth in energy, and had in contemplation several schemes of great interest to his profession. One of his projects of a public nature was the revival and working of the Chihuahua silver-mines of Mexico.

Mr. Pratt was a deacon in the Second Baptist Church, and for many years was classed, with the honored McPherson and Gale, as one of the pillars of that society. He loved his church, and cheerfully and generously contributed to her support, he and his wife being among the largest subscribers to the beautiful edifice which the Second Baptist Church now occupies. He also gave liberally to various charities. In church work he was one of the most aggressive of men, and while old in years was youthful to the last in ideas, fervor, energy, and zeal. In the funeral discourse his pastor, the Rev. Dr. Burlingham, summed up his character as that of a "well-balanced, conscientious, considerate, and devout member and officer of the church." After his death the board of directors of the gas company adopted resolutions eulogizing his integrity and other estimable qualities, and declaring that his capacity and efficiency in the economical management of the gas-works made his loss severely felt.

The Laclede Gas-Light Company was chartered under an act of the Legislature in 1858, and reorganized in 1871. The works, situated on Main, between Mullanphy and Mound Streets, were erected in 1872-73, and gas was first supplied in June, 1873. The original incorporators were S. L. Husted, H. Y. Attrill, Frederick Cromwell, J. H. Porter, Henry Fitzhugh, S. B. Chittenden, and Charles Gibson. The first board of officers was composed of S. L.

Husted, president; Frederick Cromwell, vice-president; and J. F. Magoreen, secretary. The territory occupied comprises all that portion of St. Louis north of Washington Avenue. The company has about one hundred miles of pipe laid, and supplies light for over four thousand public lamps. The works have a capacity for making one million feet per day. The officers at the present time are Erastus Wells, president; John H. Maxon, vice-president; and J. D. Thompson, secretary. The directors are Erastus Wells, John H. Maxon, Charles Gibson, John J. Mitchell, Samuel Simmons, Frederick Cromwell, and J. H. Porter.

The present capital stock is one million two hundred thousand dollars. The offices of the company from 1873 to 1881 were located at No. 701 Washington Avenue, but during the latter year they were removed to the present commodious quarters at No. 1100 Washington Avenue.

Carondelet Gas Company.—On March 3, 1857, a charter was granted to the Carondelet Gas-Light Company, the object of which was to light that city with gas, but for some reason the provisions of the charter were not complied with. In April of 1874 the company was reorganized with John M. Krum as president, T. C. Hogan secretary, and A. C. Judge superintendent, with a capital stock of two hundred and fifty thousand dollars. The incorporators were Frederick Hill, Henry T. Blow, Louis C. Picot, Madison Miller, William Taussig, Francis Kellerman, Joseph Taussig, Michael Conrad, Delphy Carlin, Bernard Poepping, August Blumenthal, Jacob Stein, and Michael Jod.

Its presidents have been, in order, Frederick Hill, John M. Krum, John H. Terry, Charles H. Thornton, Frank Erskine, and John R. Lionberger. Its first officers were Frederick Hill, president; William Taussig, treasurer; and Madison Miller, secretary. After the extension of the city limits so as to include Carondelet, the latter grew quite rapidly, and the desire of the people to have their streets and dwellings lighted with gas was of such a character as to induce the company to erect works to supply that want. Ground for this purpose was broken June 17, 1874, and on December 31st gas was lighted for the first time in Carondelet.

The present officers and board of directors are John R. Lionberger, president; Charles Green, vice-president; Nelson F. Constant, superintendent; Henry C. Scott, secretary; Directors, John R. Lionberger, Charles Green, George A. Madill, John Scullin, Erastus Wells, Thomas E. Tutt, and J. H. Lionberger.

HOTELS.

In the matter of hotels St. Louis enjoys facilities not surpassed by any city in the West, and from the old Missouri of half a century ago, with its many historical traditions and reminiscences, down to the celebrated Lindell, Southern, Planters', and others of to-day, its fame for conveniences and hospitable entertainment to the traveler has been justly proverbial. In the earlier days of the city, when it was but a little town, some of its best citizens were tavern-keepers, but the term tavern-keeper had a different meaning then from that which attaches to it at the present time. The ancient tavern-keeper was in some sense a public benefactor, and often occupied a most honorable position in the community.¹

Among the earliest notices of taverns is that of the Missouri Hotel, in the old government mansion, southeast corner of Main and Walnut Streets, kept by Maj. William Christy for several years prior to 1808. In the latter year he engaged in farming and grazing, and was succeeded in his hotel business by Maj. Richard Webster, who changed the name of the house to the Eagle Tavern. In 1810, tiring of farming, Maj. Christy assumed charge of his tavern again, and renamed it the Missouri Hotel. He continued to operate it until 1816, when Thomas Pechels (or Poebles) bought it and called it Union Hall. In September, 1809, James H. Audrian opened the Grove Tavern at the upper end of Main Street, nearly opposite P. Chouteau. In 1810, Joseph Charless kept a "boarding-house" on North Main Street. In 1811, Frederick Weber, baker, notified the public that he had commenced keeping a house of entertainment. In 1811, Maj. Delauney kept a boarding-house in St. Louis, and in the following year Horace Austin opened a tavern "in the house lately occupied by Madame Robidoux." In July, 1816, Hugh C. Davis opened the Green Tree Tavern on Second Street. The Green Tree was taken in 1820 by John Simonds, Jr. About this time the Mansion House was also started, and at the beginning of 1823 became the property of George S. Greene, who changed its name to the City Hotel. In 1829 it passed into the hands of Ephraim Town, and in 1840, Col. Theron Barnum, who had just reached St. Louis, bought it. Col. Barnum kept it for twelve

¹ At the time of the transfer of the province of Louisiana to the United States there were but two little French taverns in the town, one kept by Yostic, and the other by Landreville, chiefly to accommodate the *courriers du bois* (hunters) and the *voyageurs* (boatmen) of the Mississippi. Both of these taverns stood upon the corners of Main and Locust Streets.—*Edwards' Great West*, pp. 288-89.

years, and then disposed of it to William R. McClure. Subsequently A. S. Merritt, formerly of the Pacific Hotel, operated it.

The first hotel of any prominence in St. Louis was the old Missouri, which stood on the southwest corner of Main and Morgan Streets. It was built in 1819 by John McKnight and Thomas Brady, and subsequently became the property of the latter, who retained it until his death in 1822. It was a two-story stone structure, built in the old French style, its side fronting on Main Street, and its steep roof studded with dormer-windows. After Mr. Brady's death, Maj. Thomas Biddle bought it, and owned it until he was killed in a duel with Spencer Pettis, in October, 1831. Maj. Biddle built an addition to the hotel by which the accommodations were greatly increased. He sent to the East and procured a hotel-keeper, who opened the house with conveniences never before known west of the Mississippi River. After the death of Maj. Biddle, the hotel was sold to John F. Darby, who in the year 1835 sold it to Isaac Walker. Subsequently the following persons kept it as tavern and hotel: Abijah Hull, Ephraim Town, and Messrs. Mitchell, Johnson, Louis Oldenburg, Scudder, Hubbard, Seymour, and others. In 1873 the building was torn down, and gave place to the tobacco-factory of Christian Peper.

The old Missouri Hotel was the scene of many historical incidents. The first Legislature that met under the State Constitution convened there in the year 1820. There also the first Governor and Lieutenant-Governor of the State were sworn into office and delivered their inaugural addresses, and there the two first United States senators ever elected in Missouri, David Barton and Thomas H. Benton, were chosen. It was also a favorite place for the arrangement of duels, trials by courts-martial, and rendezvous for army officers. Gen. Scott, Gen. William Henry Harrison, Gen. Zachary Taylor, Gen. Leavenworth, and the celebrated Indian-fighter and soldier, Gen. Henry Dodge, and many other eminent and distinguished men made it their stopping-place.

St. Clair Hotel.—In 1829 the growing wants of St. Louis seemed to demand a more commodious and pretentious hotel than the Missouri, and accordingly Col. Thornton Grimsley purchased the Baptist Church property on the southwest corner of Market and Third Streets, and remodeled it into a neat four-story hotel, which he called the National, placing his brother William G. in charge of it. The National at once became the principal hotel of St. Louis. Henry Clay, Daniel Webster, Gen. Zachary Taylor, Jefferson Davis, Robert E. Lee, and others who

were then or have since become prominent, made it their stopping-place when visiting St. Louis. In 1837, Messrs. Stickney & McKnight leased the house from Grimsley, and fully maintained its popularity until 1841, when they retired to take charge of the Planters', then just built. They were succeeded by Col. Scott, and a close rivalry existed for some time between the National and Planters'. In 1846 or 1847 a fire partly destroyed the National, and bad luck seemed to hang about the house for some time thereafter. A number of changes occurred. Mr. Scott leased and ran it a few years as Scott's Hotel, and was followed by William Chesley, who changed its name to the St. Clair. By this name it has been known since that time, with one or two brief intervals. From 1860 to 1877 the following persons have managed the St. Clair: Col. Gannett, Jeremiah Wood, George C. Wales, Jonathan Chesley, Valentine Gerber, William Baird, M. W. Quinn, Trumbull B. Raymond, and McDonald & Rochester. In 1877 the house was closed, but was afterwards leased by Judge George Williams, who remodeled and newly furnished it, since which time it has been managed successfully on the moderate price plan.

Planters' Hotel.—In November, 1817, Evarist Maury announced to the public that he had opened the Planters' Hotel on Second Street, opposite Maj. Douglass' office, where a few boarders could be accommodated. He proposed to go into the business on an extensive scale, and announced that he would enlarge the capacity of his house and erect additional buildings. This was not, however, the forerunner of the present hotel known as the Planters'. In 1836 a number of prominent citizens thought that it would be advisable to erect a larger and more commodious hotel than any the city then contained. To consider this proposition a meeting was called in October, at which Judge J. B. C. Lucas presided and Bernard Pratte acted as secretary. A committee consisting of Messrs. McGunnege, Morton, Kerr, and Brant was appointed to select a suitable site and report to an adjourned meeting. The committee reported a week afterward, and the location immediately north of the courthouse, having a front on Fourth Street and bounded by Chestnut and Vine, was almost unanimously selected, and a committee was appointed to obtain the subscription of the necessary amount of stock. The liberal offer of Judge Lucas, who owned the site selected, unquestionably had much to do with bringing about this result. At a meeting of the shareholders on Dec. 6, 1836, Messrs. Alexander R. Simpson, D. D. Page, D. Lamont, J. C. Laveille, E. Tracy, J. Charless, and G. W. Call were elected directors of

the company for the first year. Application was made to the Legislature of '1836-37, and a charter with a capital of one hundred thousand dollars was obtained. In March, 1837, ground was broken, but owing to the embarrassments of the times the work was not completed until March, 1841.¹

The following announcement, made upon the eve of its opening, will explain why an intended compliment was not conferred: "We would briefly observe, further, that the title of the house is that given in the charter. After the house had been taken by the present enterprising proprietors, Messrs. Stickney & McKnight, and after they had ordered their furniture, part of which, the porcelain, cutlery, etc., was manufactured in England, and the name of the establishment impressed or otherwise fixed on every piece, the board of managers altered the title to that of 'The Lucas House,' in honor of the liberal patron of the same, the Hon. Judge Lucas, but on account of the above previous arrangement of the proprietors they have felt themselves bound to open under the title of 'The Planters' House.'" On the 1st of April, 1841, the hotel went into operation. Stickney & McKnight, the lessees, had previously conducted the National Hotel, and were experienced hotel-keepers. Mr. Stickney subsequently bought out Mr. McKnight's interest, and afterwards associated with him Leonard Scolly. The latter died in the fall of 1860, and Mr. Stickney kept the house until April, 1864, when he retired with a competency. Benjamin Stickney was one of the leading citizens of St. Louis, and filled the positions of director in the St. Louis Gas-Light Company, the Missouri Pacific Railroad, and the St. Louis National Bank. He died on the 14th of November, 1876. After his retirement the house was reopened by J. Fogg & Co., Mr. Fogg having previously been associated with Theron Barnum in Barnum's Hotel.

Glasgow House.—On the 3d of March, 1843, the Glasgow House was opened at the corner of Olive and Second Streets.

Barnum's Hotel was erected in 1854 by George R. Taylor. The building stands at the corner of Walnut and Second Streets, and extends ninety-two feet on Second Street and one hundred and sixty feet on Walnut, with an interior court one hundred by sixteen feet. The building is six stories above the pavement and one story below, and its extreme height from pavement to cornice is ninety feet six inches. The architectural style of the exterior façades is modern Italian. The first or basement story supporting the structure is composed entirely of finely-wrought St. Louis limestone. "Barnum's" was unquestionably the finest hotel then in St. Louis, and was built by Mr. Taylor expressly for Theron Barnum. On the 28th of September, 1854, the hotel was opened under the proprietorship of Barnum & Fogg, and at once gained a wide reputation. In April, 1864, Mr. Barnum retired, and the hotel was continued under the management of Fogg, Miles & Co.

Theron Barnum, the senior member of the firm, was born April 23, 1803, in Addison County, Vt., and in 1808 moved with his father to Susquehanna County, Pa. There he worked on the farm, also getting such instruction as could be obtained in a country school. At the age of seventeen he began to teach school, and pursued that avocation for several years, in the mean time cultivating his mind in the advanced branches of English education. In 1824 he went to Wilkesbarre, Pa., and filled the position of clerk in a store until 1827, when he removed to Baltimore at the request of his uncle, David Barnum, and became associated with him in the management of Barnum's Hotel, then enjoying a well-deserved fame as one of the best hotels in the United States. He remained with his uncle in the capacity of confidential clerk, and became under his able instruction well versed in the art of conducting a first-class hotel. He then opened the Patapasco Hotel at Ellicott's Mills, fifteen miles from Baltimore, and the terminus of the first fifteen miles of the Baltimore and Ohio Railroad. While there, in 1832, he married Mary Lay Chadwick, daughter of Capt. Chadwick, of Lime, Conn., and captain of one of the large packets between New York and Liverpool. The fruit of this marriage was two sons, Freeman and Robert. In 1835 he removed to Philadelphia, and bought the Philadelphia Hotel on Arch Street, but having long thought of going to the West, he sold out in 1838, and determined to settle in St. Louis. On his way he was induced to stop at Terre Haute, Ind., where

¹ A curious circumstance connected with the land on which the Planters' Hotel was built is this: A Frenchman, François Gunell, in 1834, had the contract for grading Fourth Street four feet in front of the present court-house and Planters' Hotel. He had six yoke of oxen engaged to plow up the hard pan, for which he paid six dollars per hour; the fact that an hour or two's plowing loosened dirt enough to keep his hands at work shoveling the remainder of the day will account for the high price extorted for the labor of the oxen, as they were employed but a short time. He had a contract with Judge J. B. C. Lucas to fill up the gully on which the Planters' Hotel stands with the excavated dirt, for which he was to receive three cents per cubic yard. The hole was about thirty feet deep, and the dirt dumped in amounted to sixty dollars. When he came to settle up with Judge Lucas the latter offered him a deed to half the block on which the Planters' House now stands in lieu of the sixty dollars, which Mr. Gunell refused to accept, as he needed the money.

he opened the new Prairie House. He remained here only until 1840, becoming satisfied in the mean time that Terre Haute could never support the kind of hotel which he was desirous of establishing. In March, 1840, he removed to St. Louis, and rented the City Hotel, at Third and Vine Streets. This hotel was for a long time the favorite house of the public, and became the headquarters of the army officers residing in or visiting St. Louis. Among the distinguished officers who made the City Hotel their home were Gen. Gaines and Col. Croghan. Mr. Benton also stopped here. Mr. Barnum managed the hotel for thirteen years, and in September, 1852, sold out. After a short retirement the present Barnum's Hotel was built for him by George R. Taylor, and for many years he had charge of it. During his supervision the Prince of Wales, George Peabody, William H. Seward, Abraham Lincoln, and many other distinguished persons stopped at it. In 1877 he took the Beaumont House, which he put in successful operation. He died there on the 17th of March, 1878, of pneumonia. Mr. Barnum was a cousin of P. T. Barnum, and seems, with the other prominent members of that family, to have followed his peculiar bent with a pertinacity and energy that deserved if it did not always achieve success. He filled at different times responsible positions, and was a director in the Home Mutual Insurance Company for thirty years.

Lindell Hotel.—On the 5th of March, 1855, the Governor of Missouri approved an act of the Legislature chartering the "Laclede Hotel Company of St. Louis." Directors were elected by the corporators, and a practical organization was effected in 1857, and work commenced on the lot bounded by Washington Avenue and Green Street and Sixth and Seventh Streets, part of which had been selected for a site. Jesse G. and Peter Lindell, brothers, contributed the ground and took in exchange for it eighty thousand dollars in the company's stock; they also subscribed ten thousand dollars in money. The monetary panic in 1857 obstructed the progress of the work. In 1859 an act was obtained revising the charter, and permitting the erection of a larger and finer structure, and the expenditure of more than five hundred thousand dollars, the limit in the original act. The name was also changed to "Lindell Hotel," in compliment to the brothers who had so largely interested themselves in the enterprise. In 1863 the hotel was completed and leased to Messrs. Sparr & Parks, who had recently been the proprietors of the Olive Street House. The board of directors at this time were Levin H. Baker, president, J. T. Swearingen, Charles H. Peck, Gerard B. Allen, S. H. Laffin,

D. K. Ferguson, and Derrick A. January. Thomas Walsh and James Smith were the architects. The design was Italian of the Venetian school. The hotel consisted of two parallel buildings, extending east and west the length of the whole front, with a space of forty-five feet between them, and connected only in the centre and both extremes by wing buildings running north and south, leaving between them two courts. The Lindell was six stories high exclusive of basement and attic. The height from sidewalk to basement was one hundred and twelve feet. The stone used was a rich cream-colored magnesian limestone from the Grafton quarries. The east and south fronts were of this stone, and showed much elaborate carving. The north and west fronts were faced with the finest stock brick, ornamented by cut-stone window-trimmings. In every respect the hotel was a model one. On the 25th of November the formal opening was marked by an immense ball and banquet, which was attended by about four thousand guests. On December 17th the hotel was sold at trustees' sale to Henry Ames & Co., for one hundred and fifty-three thousand dollars, subject to first mortgage bonds and accrued interest amounting to two hundred and twenty thousand dollars, but Sparr & Parks were not disturbed in their lease.

About half-past eight o'clock on the night of the 30th of March, 1867, fire was discovered in the upper story of the hotel, and in a short time the flames burst through the roof and spread on all sides with great rapidity. The alarm was conveyed to the fire department, and the engines arrived without much delay. They were powerless, however, to stay the progress of the flames, the great height of the building rendering it impossible to throw water on the roof. In a short time the entire top of the hotel was on fire; the flames gradually worked downward, and it was soon evident that the magnificent structure was doomed. Fortunately, owing to the earliness of the hour, very few of the guests, of whom there were about four hundred, had retired. Those who were sick were carried out and conveyed to places of safety. As soon as it was known that the building could not be saved efforts were made to secure the stock in the different stores and the furniture and portable property of the hotel, much of which was saved. Within three hours the fire was at its height, the heat being so intense that water thrown upon the flames flew upward in sheets of steam. The firemen desisted from their fruitless efforts and devoted their attention to saving the surrounding buildings. About twelve o'clock the walls fell, and all that remained of one of the finest hotels in the world was a shape-

less mass of ruins. The loss on the building was about nine hundred thousand dollars, and on the furniture between two hundred thousand and three hundred thousand dollars.

The destruction of the Lindell was regarded as a public calamity. Impromptu meetings of the citizens were held almost before the smoke had ceased ascending from the ruins to take measures for the erection of a new building, but it was not until five years had elapsed that these efforts were crowned with success. It became frequently, during this time, a question whether the new Lindell should be erected on the old

and the numerous contractors, and within two years from the breaking of ground the structure was completed. For two months more the process of fitting and furnishing went on, and on the 28th of September, 1874, the whole establishment in complete running order was thrown open to the public.

The exterior of the new building presents a very different aspect from the old one, being less ornate but much handsomer.

The first story is flush with the sidewalk, instead of having a basement elevating it several feet above the pavement. The principal front, as in the old

LINDELL HOTEL,
Corner Washington Avenue, Sixth Street, and Lucas Avenue.

site or at a point farther west on the same thoroughfare. The matter was finally determined by Mrs. Vincent Marmaduke (formerly Mrs. Henry Ames), who resolved to build on the spot made historical by the old Lindell. A company was formed consisting of Messrs. William Scudder, Levin H. Baker, and Charles Parsons, who engaged the well-known architect George I. Barnett to design the proposed building. About the 1st of September, 1872, the work was commenced by removing the rubbish from the old foundations for the purpose of constructing the new. The work was pushed forward without intermission through the untiring efforts of Messrs. Scudder and Barnett

building, is on Washington Avenue, with a frontage of one hundred and eighty-two feet, and a depth of two hundred and twenty-seven feet to Christy Avenue. The height of the building is one hundred and five feet, and the architecture is of the modern Italian school, the first story being of the Tuscan order and constructed of iron. The five upper stories of the façades on Washington Avenue and Sixth Street are composed of Warrensburg gray sandstone that hardens with age until it becomes almost as capable of resisting the elements as granite. The second story is composed in the principal compartments of Corinthian columns supporting semi-circular arches over the win-

dows. The intermediate windows have semi-circular arches with caps, supported by carved trusses. This story is surmounted by a fine cornice, and the four upper stories are divided by five moulded water-tables. All the angles of the building are finished with heavy quoin-stones. There are three capacious stores on each side of the main entrance, and six equally so on Sixth Street. A striking feature of the front is a massive two-story portico immediately in front of the main entrance, forty-five feet wide, and projecting fifteen feet from the building, with six Tuscan columns below and six Corinthian columns above. Massive iron railings of unique designs inclose each floor. The ladies' entrance on Sixth Street has also an elegant but smaller portico, one story high, with six columns. The whole building is crowned with a massive iron cornice eight feet high. On the first floor is a splendid hall or exchange, one hundred and fifty-five feet long, forty-one feet wide, and eighteen feet high. The ceiling is elegantly frescoed in intricate and tasteful designs and harmonious colors. The floor is laid in tessellated marble, and the walls are pleasantly tinted. On the west side of the exchange is the office, elegantly fitted up with all the modern appliances. Immediately west of the office is a spacious reading-room, comfortable and well lighted. Opposite the office is the grand staircase, an elaborate and stately structure. The walls and ceilings are elegantly frescoed, and a view upwards presents a most pleasing effect.

There is not a dark room in the hotel, and the ventilation is excellent. There are two hundred and seventy guests' rooms, which is about a score less than the old building had, but there are many more rooms devoted to public use, and the floor-room is much greater. Everything that forethought could devise for the comfort of the guest and the facilitating of business has been provided, and that, too, in the best possible manner. The proprietors of the Lindell were Messrs. Felt, Griswold, Clemmens & Co., being W. W. Felt, of the old Lindell; J. L. Griswold, formerly superintendent of the Ohio and Mississippi Railroad; H. H. Clemmens, formerly one of the proprietors of Congress Hall, Saratoga; and Charles Scudder. The chief architect was George I. Barnett; assistant architects, Furlong & Taylor; general carpenter and builder, Charles H. Bireh.

The present proprietors of the Lindell Hotel are the members of the Lindell Hotel Association; Charles Scudder, president; Henry Ames, vice-president; William F. Haines, secretary. Mr. Scudder is a brother of Capt. John A. Scudder (of whom a full biographical sketch is given elsewhere), and, like his brother, is one of the most active and influential

citizens of St. Louis. Maj. William F. Haines was born at Buffalo, N. Y., Nov. 5, 1829. He was the son of Samuel Haines, of Lancaster County, Pa., and his mother was formerly Miss Anna Lengeker, of the same county. At the age of sixteen William F. Haines served as ordinary seaman on the brig "Odd Fellow." After nearly a year "before the mast" he was employed in Robinson's banking-house, and at the age of seventeen was cashier of the Merchants' National Bank of Erie County, N. Y. Subsequently young Haines returned to school until September, 1849, when he removed to St. Louis, where his first occupation was that of book-keeper in the commission house of David Tatum. In the spring of 1851 he accepted the position of chief clerk on the steamer "Josiah Lawrence," plying between St. Louis and New Orleans, and was identified with various river steamers as chief clerk and master until the opening of the civil war, when he entered the Confederate service as private in Capt. James Pritchard's company, First Missouri Regiment. He was afterwards appointed quartermaster of the regiment, with the rank of captain, and after the promotion of Col. Bowen, of the First Missouri, to brigadier-general, Capt. Haines was made brigade quartermaster on his staff, with the rank of major. He participated in all of the engagements in which Gen. Bowen's several commands took part, and was in Vicksburg during the siege.

On being exchanged, Maj. Haines was sent to serve with Gen. L. S. Baker, in North Carolina, where he remained until the close of the war. Gen. Baker's command being cut off from the main army of Gen. Joseph E. Johnston, Maj. Haines was sent to Raleigh to arrange terms of surrender with Gen. W. T. Sherman. Having previously known Gen. Sherman in St. Louis, Maj. Haines secured the same terms given to Gen. Lee, and was designated as paroling officer of Gen. Baker's command. After the war closed, Maj. Haines returned to St. Louis and resumed his river occupation, becoming captain of the steamer "Stone-wall," plying between St. Louis and New Orleans. In December, 1865, he married Miss Abbie Kennerly, youngest daughter of Capt. George H. Kennerly, formerly of the United States army, and whose mother is a daughter of the late Col. Pierre Menard, of Kaskaskia, Ill. The fruits of this marriage were four daughters and three sons. Maj. Haines was for twelve years general freight agent of the Mississippi Valley Transportation Company, which position he held until February, 1882, when he became one of the proprietors of the Lindell, and of the Hotel St. Louis, at Lake Minnetonka, Minn.

The **Pacific Hotel** was completed in January, 1857. It was located at the corner of Poplar and Seventh Streets, was three stories high, and had a front on Seventh Street of more than eighty feet. The ground-floor was divided into stores; the second floor contained the office, dining-room, and some sleeping apartments; and the third floor was divided into small rooms separated by lath and plaster partitions. The capacity of the house was about one hundred guests. George B. Field, who was the owner, leased the hotel to Daniel W. Strader, who opened it in June following, with Jacob Lyons as his partner. Its career was destined to be a short one, and to terminate with the most appalling catastrophe that had ever befallen St. Louis. On the morning of Saturday, Feb. 20, 1858, between three and four o'clock, the building was discovered to be on fire, and before the lodgers on the third floor could be aroused the flames had cut off all means of egress by the stairways. The terrified guests, finding no safety except in leaping to the ground, did so in many instances and escaped more or less injured. So rapid was the spread of the flames, owing to the combustible nature of the building, that many were unable to escape from their rooms. There were about seventy-five persons in the hotel at the time the fire broke out. Of these forty-four escaped uninjured. The killed numbered nineteen, of whom only ten were identified, as follows: Henry A. Rochester and T. Hart Strong, of Rochester, N. Y.; infant child of J. Jones, Bruce McNitt, Paul Steinestel, and Miss H. Hunter, of St. Louis; Evans J. Watkins, Columbus, Ohio; Ephraim Doane, Chicago; Mrs. H. Hubbard, Boston; and J. Wag-
oner.

James Francis Geary, local reporter of the *Leader*, and Elihu Hays died on February 24th from injuries received at the fire, making the entire number of deaths twenty-one. A meeting of citizens to provide for the burial of the dead and the relief of the wounded was immediately called. Col. Thornton Grimsley presided, and committees were appointed to provide for the interments and to obtain subscriptions for the survivors. Twelve of the dead were buried in Bellefontaine Cemetery, their remains being followed to the grave by the largest procession ever seen in St. Louis. The survivors, so far as they could be discovered, were handsomely cared for and assisted.

The Southern Hotel.—Early in 1857 efforts were made by public-spirited citizens to erect a finer and larger hotel than any that St. Louis could then boast of. Meetings were held, propositions submitted, a company formed, a charter obtained, and subscription books opened. A site was purchased and the cellar

walls built, but the scheme languished, and in 1859 it was seriously proposed to divide the property into lots and sell it. This was not done, however, and in the early part of 1860 the company obtained from the Legislature an act exempting its property from city and county taxation for ten years. New life was infused into the project, and Thornton Grimsley, John A. Brownlee, George Knapp & Co., Henry T. Blow, John J. Anderson, Charles McClaren, Robert K. Woods, B. M. Runyan, Belt & Priest, and Taylor Blow associated themselves together to finish the hotel. The work was resumed, and continued with long and frequent intervals of delay until 1865. The hotel fronted on Walnut, Fourth, Fifth, and Elm Streets,—on Walnut Street, two hundred and seventy feet; Fourth and Fifth Streets, one hundred and thirteen feet six inches each; and on Elm Street, sixty feet, and was six stories high, in the Italian style of architecture. On Dec. 6, 1865, it was opened with a ball, with Messrs. Theodore Laveille, Charles P. Warner, and George W. Ford as proprietors. It was sold in August, 1866, to Col. Robert Campbell.

The hotel was destroyed by fire early on the morning of April 11, 1877. The fire was discovered at twenty minutes past one o'clock in the basement of the hotel. The inmates were aroused as far as possible, and an alarm was sounded through the agency of the district telegraph. This brought out the salvage department, but the key of the fire-alarm telegraph-box having been lost or mislaid, it was ten minutes before the city fire department could be notified. On the first call six engines and two hook-and-ladder companies responded, but, the fire gaining rapid headway, two subsequent alarms were sent in, calling out the entire department. To the natural progress of the flames was added the flood of gas from the large pipe used in supplying the hotel, and it was soon found impossible to save the building, which was totally destroyed. When the department reached the scene the flames had gained such headway that the efforts of the firemen were directed particularly to saving the lives of the inmates. Of these there were several hundred, including a number of female domestics, who slept on the sixth floor of the hotel. The fire was first discovered in the store-room, which was in the basement near the passenger elevator, and the flames, ascending through the elevator shaft, spread immediately over the two upper floors, and filled all of the halls and corridors above the ground-floor with dense smoke, which rendered escape a matter of the greatest difficulty. The loss of life was exclusively among the occupants of the fourth, fifth, and sixth floors, who, their means of escape being cut off

by the fire, either fell or jumped into the streets and were killed. Many, however, were saved through the agency of the fire department and citizens by means of ladders, and there were scores of rare instances of heroism on the part of rescuers, whose efforts were rendered peculiarly dangerous owing to the height of the burning building and the inaccessibility of the upper floors.

The conflagration was made the subject of an investigation by the proper authorities, the jury consisting of John McNeil (foreman), Sylvester H. Laffin, Walter C. Carr, Jacob Tamm, Charles W. Irwin, and George Bain. Ninety-two witnesses were examined, and in rendering their verdict the jury said, "As to the cause of the fire, we have no testimony sufficient to base an opinion on, but from the dryness of the woodwork and the inflammable material in the storeroom, wine-room, and carpenter-shop, all situated in the basement of the hotel, it would have required only the slightest spark in a very few minutes, if not discovered, to have caused a fire of such magnitude as to be beyond ordinary control."

The victims of the fire were George F. Gouley, of St. Louis, secretary of the Grand Lodge A. F. and A. M. of Missouri, who was killed by falling from a fourth-story window on the Walnut Street side.

Henry Hazen, of New Castle, Pa., assistant engineer Missouri Pacific Railroad, killed by falling from a third-story window.

Mrs. Abbie Moran, Mary Dolan, and Kate Reilly, all domestics employed in the hotel, killed by falling from a fifth-story window of the south wing.

Rev. A. R. Adams, vicar of the parish of Stockross, Berkshire, England, killed by falling from a fourth-story window on the Fourth Street side.

Mrs. Jennie Stewart, wife of W. S. Stewart, of St. Louis, killed by the breaking of an improvised rope while being lowered by her husband from a fifth-story window.

Charles A. Tiernan, a well-known St. Louis sporting man, killed while forcing his way into the burning hotel to rescue the inmates.

Andrew Einstman, of Teichmann & Co., St. Louis, killed by falling from an improvised rope while descending from the fifth floor at Fifth and Elm Streets.

H. J. Clark, formerly of North Adams, Mass., an ex-railway conductor, found in the ruins after the fire.

Mrs. Abbie E. Clark, wife of H. J. Clark, and child, found in the ruins after the fire.

In addition to the above, the body of an unknown man was found in the ruins, and William F. Munster, of England, committed suicide a few hours after escaping in safety from the hotel.

Two policemen reported that during the earlier progress of the fire, while engaged in rescuing people from the burning building, they heard two pistol-shots, and on entering the room where the reports came from saw the dead bodies of a man and woman. There were also several persons missing who were never successfully traced, but whose death at the time of the fire has never been clearly demonstrated.

The hotel building was owned by Robert Campbell, who estimated his loss at three hundred and seventy thousand four hundred and twenty dollars, which was ninety-two thousand dollars above the total insurance.

The blackened ruins and the crumbling walls remained a ghastly memento of this awful disaster for two years, when, through the untiring energy and perseverance of the prominent members of the Merchants' Exchange and other leading business men and citizens, chief among whom was George Knapp, senior proprietor of the *Missouri Republican*, a project for rebuilding the hotel took definite shape, and was speedily urged to a successful termination. Hon. Thomas Allen assumed the leading part in the movement, and to him more than to any other person was due the erection of the present magnificent building. For the construction of the hotel building, Mr. Allen engaged Messrs. George I. Barnett and Isaac Taylor, architects, to carry out his plans, and selected his son George W. Allen as general superintendent of the whole work. The Southern Hotel occupies the block between Walnut and Elm, two hundred and twenty-six feet, and Fourth and Fifth Streets, two hundred and seventy-five feet, has three fronts of stone on Walnut, Fourth, and Fifth Streets, and is six stories high, with an additional basement as highly finished as any floor of the house.

Mr. Allen obtained possession of the block on the 21st of May, 1879, when the preliminary work was commenced, and the building was begun in August, 1879. Mr. Allen's first and most solicitous object was to erect a thorough fire-proof house from basement to roof. To this end he bent all his energies, and enlisted the ingenuity of the architects and builders. On the principle that a building is only as strong as its weakest part, he resolved that there should be no weak place, and was constantly on his guard against a flaw. Enough of the heaviest railroad iron to lay seven miles of track was used as support for the floors, which are laid on solid cement. Besides the interior brick walls necessary to give strength to the structure, the apartment partitions are of gypsum, sand, cement, and pulverized coke, with no particle of wood in them. The doors, window-

frames, and other necessary wood-work are of gum, cypress, and ash, hard wood, and of the finest finish. Should fire occur in any of the rooms it would necessarily stop with the furniture and upholstery of the one room, as there is no chance of its eating through or crawling out. There is no exception to this thorough fire-proofing in any part of the building. The builders pronounce the Southern the most thoroughly fire-proof hotel structure in the world.

Among the additional features of special interest are two engines, basement fixtures, running machinery for elevators, electric light, and the latest improved

vators, two for passengers and three for freight and other purposes. It will thus be seen the means for ingress and egress are abundant.

The rotunda hall, extending from Walnut to Elm Streets, is two hundred and twenty-six feet long and sixty feet wide; the cross hall, from Fourth to Fifth Street, is two hundred and seventy-five feet long and twenty-six and a half feet wide, and the rotunda terminates in a skylight at the roof, the several floors being guarded by balusters. A terrace-garden on the roof over the grand dining-hall is ninety-eight by fifty-eight feet in extent, and safely guarded by an iron

smoke-consuming furnaces in the basement and kitchen, which also make drafts for carrying off all impure air. There are three hundred and fifty rooms for guests, connected with the office by a system of electric bells, and there is hot and cold water throughout the house. The building is heated with steam, and, besides, there are fireplaces and grates in every room for coal- or wood-fires. The public parlors are also thus supplied.

There are three main stairways of iron and slate, extending from the ground-floor to the upper story, for the use of guests, and two iron stairways for servants. Besides these there are five hydraulic ele-

railing. The garden is laid out with paths and promenades, and flowers and shrubbery watered by fountains. The furniture was ordered and selected wholly by James H. Breslin and Robert M. Taylor, and the entire outfit, including carpets, drapery, silverware, etc., cost two hundred and twenty-five thousand dollars. On May 11, 1881, the Southern Hotel was formally opened with a ball and banquet. Hon. E. O. Stanard, chairman of the committee of arrangements, introduced Hon. Thomas T. Crittenden, Governor of Missouri, who made a brief address. On the following day the new "Southern" began to receive guests. The first non-residents to register were Governor and

Mrs. Crittenden. The entire block was owned by Thomas Allen.

The Southern is managed by the Southern Hotel Company, as follows: James H. Breslin, president; George W. Allen, secretary and treasurer; Charles P. Warner, W. R. Allen, Thomas Breslin. Of these, James H. Breslin and Charles P. Warner were identified with the management of the old "Southern," and have a wide public acquaintance. The various departments are in charge of the following persons: W. M. Bates, general manager; John E. Mulford, private office and head book-keeper; E. V. Williams, cashier, late of Tift House, Buffalo, N. Y.; M. W. Quinn, chief room clerk; Charles E. Myers, room clerk, Tift House, Buffalo; F. W. Lee, key clerk; William A. Gilbert, key clerk; William Patton, night clerk; Horace M. Clark, steward. W. M. Bates, general manager, was placed in 1859 in a responsible position in the office of the famous St. Nicholas, New York, where he remained for years. Then he connected himself with the Ocean House, Newport, R. I., when he subsequently became a partner in the business. In 1877 he leased Congress Hall, Saratoga Springs, under the firm-name of Bates, Rogers & Farnsworth, and since has been connected with the Fifth Avenue, New York, and the Ocean House, Newport, R. I.

CHAPTER XXXIV.

BENCH AND BAR.

IN a large sense it may be said that the history of a community is written in the records and traditions of its courts of justice. If it has grown rapidly, and from small beginnings; if difficulties have beset its path, and a stirring, energetic people wrought great things with courage and foresight; if, above all, diverse elements of language and society have mingled and struggled there, the bench and bar will inevitably reflect these characteristics and meet these needs, it will be strong, brilliant, and original, offering high prizes to genius, but little place for mediocre talent. A glance at the political history of Upper Louisiana, from which Missouri was carved, shows that to this battle-ground young giants of the law found their way. Its ownership first by France, then by Spain, and afterwards again by France, introduced into its colonial practice peculiarities of both the Spanish and the French codes, and formed customs which in later times had to be interpreted and regulated by the principles of English law. When, in March, 1804, at St. Louis, Commandant Delassus

transferred the territory to Capt. Stoddard, representative of the United States, the throbbing current of American life flowed unimpeded into the quiet and almost Arcadian communities of Upper Louisiana. A wise policy prevented difficulties and harmonized conflicting interests, but for years Missouri courts had tasks before them which required the utmost tact, judgment, firmness, and acumen. It is easy to see why this should have been so. Three distinct classes of emigration had, previous to 1804, flowed into the Territory, attracted by its fertile soil, its abundant game, its mild laws, and the picturesque simplicity of its customs. From Canada by way of the great lakes and the network of streams that cross Illinois, or floating down the upper Mississippi, many French *voyageurs* had found their way, so that in some districts a French *patois* was almost the only language spoken. French and Spanish families from New Orleans ventured the voyage northward, and in some districts the Spanish element predominated. Sturdy Western hunters, trappers, traders, and farmers were beginning to occupy points of vantage and invest in lands, timber, and town property. The rude border life developed a race of plainspoken frontiersmen, who afterwards carried into their innumerable legal battles that necessarily grew from conflicting land grants and titles the same courage and tenacity that they showed in their Indian wars. The able and courageous lawyers who won their way to fame and fortune in the earlier days of Missouri were not only trained athletes of the judicial forum, but their lives were crowded with romantic incident and adventure.

It was absolutely essential to professional success that a lawyer should be thoroughly acquainted with the Spanish language and civil law. As Hon. W. V. N. Bay, late judge of the Supreme Court of Missouri, says in his interesting reminiscences of the bench and bar of that State, "A want of knowledge of either unfitted the claimant to legal honors to cope with those who had devoted years of laborious study to their acquirement."

The St. Louis bar was from the first a centre of legal activity in the Territory, and many of its members won national reputation. Among its characteristic leaders were such men as Benton, the Lucases, Geyer, Easton, Gamble, McGirk, Hempstead, Pettibone, Tompkins, Darby, Spalding, the Bartons, Lawless, Bates, Allen, Mullanphy, Leslie, Wright, Blennerhassett, Polk, Gantt, Williams, Bowlin, Leonard, Field, and others who belonged in the same brilliant *coterie*. The student of the bench and bar of St. Louis in its early days will search long for a parallel in points of force and originality. The lawyers of

Kentucky, of Southern Ohio, and of Indiana had the same extensive practice in profitable land litigation, and developed the same rough and ready wit, terse, epigrammatic speech, and Western eloquence; the lawyers of Texas, and at a later date those of the southern portion of California and of New Mexico had to struggle in like measure with the difficulties of the Spanish code and Spanish language; but only in Missouri were all these complex and varied elements mingled in stormy confusion, in a conflict of diverse creeds, systems, and languages, whose struggle and final harmonious union are written in the pages of court records and legislative enactments of Territory and State.

There were a few capable and efficient lawyers, mostly French, in St. Louis previous to 1804, and they soon found that the American purchase meant for them only increased business activity and infinitely broader opportunities, which they were not slow to embrace. In many cases the wise policy of the United States retained the former alcaldes as justices of the peace under the new government. The Chouteaus, the Chauvins, the Prattes, and the Leducs were leaders among the French citizens. In 1764, Col. Auguste Chouteau landed at what is now the foot of Market Street, St. Louis, and camped there. In 1799, when a census was taken, both St. Charles and Ste. Genevieve exceeded St. Louis in population, and drew much legal talent to their courts. Of the four legal and military districts of St. Charles, St. Louis, Ste. Genevieve, and Cape Girardeau, no one could in 1804 foresee which would contain the metropolis. In that year Col. Rufus Easton and Edward Hempstead came to the Territory.

At this time the district of Louisiana, in which St. Louis was situated, was attached to the Territory of Indiana, whose courts exercised jurisdiction over the newly-acquired country. The Governor and judges were instructed by the act of Congress of March 26, 1804, to hold two courts a year at St. Louis and enact such laws for the immediate government of the district as they might find necessary. Accordingly, William Henry Harrison, Governor, and Thomas Terry Davis, Henry Vanderburgh, and John Griffin, judges of the Territory of Indiana, adopted a code of laws for the government of the district. The first law in the code established the office of sheriff, the second was one for regulating boatmen, the third established recorders' offices, the fourth was entitled "a law respecting slaves," the fifth was "a law of defalcation," and the sixth "regulating the oath of office."

A copy of the *Republican Register*, a newspaper published at that period in Rushville, Ky., dated June

20th, contains a letter, dated Vincennes, May 29, 1805, which thus describes the holding of the first general court in St. Louis:

"The first general court in and for the district of Louisiana was opened in the town of St. Louis on Tuesday, the 6th of May inst., at about eleven o'clock A.M. The judges, Vanderburgh and Griffin, being attended by the sheriff and his deputy, the bar, and a respectable number of citizens, proceeded to the house of Monsieur Chouteau. After the grand jury (which was composed of twenty odd of the most respectable citizens) were sworn, his Honor Judge Vanderburgh delivered a charge of some length, in which he congratulated them upon the happiness and prosperity they would experience from the change of government. The grand jury continued their session from Tuesday until Friday morning. They found an indictment against one Davis for murder, without malice, of his father-in-law, and one against one Hunter and Dennis for the willful murder of one Clark, a presentment against the inferior court, and one against John Mullanphy, Esq., as presiding justice of the inferior court of the district of Louis. Hunter, upon traversing the indictment, was acquitted; Dennis was found guilty of manslaughter and punished; Davis was acquitted, and so was Mullanphy. The Indian prisoner, who was some time in confinement in the garison at St. Louis, in endeavoring to make his escape (a few days previous to the arrival of the President's pardon), was shot by the sentinel, and from the wound he received was enabled to get about six miles, where he was found dead some time after. During the sitting of the court the Sioux nation of Indians brought down a prisoner for having killed two Canadians. There was no confession by which he was justified in the commission of the act. The court, after a session of fifteen days, during which a variety of business was done, adjourned till court in course."

The letter mentions an "inferior court," which appears to have been formed of a quorum of justices of the peace, over which John Mullanphy presided.

Courts of Quarter Sessions, to hold four terms each year, were established for the five sub-districts into which the district was divided, with a sheriff and recorder for each sub-district, the court at St. Louis to meet on the third Tuesday of June, September, December, and March. The first session of this court in St. Louis, as stated elsewhere, was an Oyer and Terminer held Dec. 18, 1804, at the tavern of Emilien Yosti. The justices present were Auguste Chouteau, Jacques Clamorgan, David Delaunay, and James Mackay, and the sheriff was James Rankin. Charles Gratiot was presiding justice, and Edward Hempstead was deputy attorney-general *pro tem*.

By the act of March 3, 1805, Congress provided for the appointment of three judges, who with the Governor should constitute the Legislature of the newly-created Territory of Louisiana. These judges were J. B. C. Lucas, John Coburn, and Rufus Easton, who constituted what was known as the Superior Court. Before the new government was organized, however, the Court of Quarter Sessions had held another term, March, 1805, Charles Gratiot presiding.

In addition to those already named, Alexander McNair, of St. Louis, and Richard Caulk, James Richardson, and John Allen, from the other sub-districts, occupied seats on the bench. In 1806 the judges of the Superior Court were J. B. C. Lucas, R. J. Meigs, and Otho Strader. In June of this year the Territorial Legislature provided for a general court to be held in St. Louis twice a year, which exercised the functions of a Court of Appeals or Supreme Bench, and in October of the same year for a clerk of the General Court, Joseph V. Garnier being appointed to the position. In 1807 the Legislature passed an act reconstructing the courts, which provided that judges of the Common Pleas should be appointed by the Governor for each district for four years, two being a quorum to hold court. There were to be three terms a year in St. Louis, on the first Mondays of March, July, and November. The act also provided for a Court of Oyer and Terminer (criminal), to consist of the judges of the General Court and the Common Pleas judges of the respective districts when the punishment involved life or death. Other criminal cases were to be tried in the Quarter Sessions, with a clerk for each district. It was further provided that a Supreme Court, called the General Court, should sit in St. Louis on the first Mondays of May and October.¹

In the mean time the Common Pleas Court had been in active operation. At the March term, 1806, Joseph Browne was presiding justice, with Messrs. Chouteau, Delaunay, and Mackay associates; Andrew Steel, prothonotary. At the special term of Quarter Sessions, in October of the same year, Jacques Clamorgan, Bernard Pratte, and William Christy were the justices in attendance. The sheriff at this time was Jeremiah Connor. In June, 1807, Silas Bent assumed the duties of presiding justice of the Common Pleas, having been appointed to that position by acting Governor Bates. On the 19th of September, 1808, a Court of Oyer and Terminer was held, J. B. C. Lucas presiding, with Judge Chouteau as associate. At the February term in 1809, Judge Lucas' associates were Judges Pratte and Labeaume.

The act of Congress of June 4, 1812, provided that there should be three judges of the Superior Court, to serve four years, and by the act of the Legislature Aug. 20, 1813, the old courts were abolished, and it was provided that three judges of Common Pleas for each county should be appointed by the Governor for four years. These courts were to hold three terms a

year, those for St. Louis on the third Monday of February, first Monday of June, and third Monday of September. The clerks of these courts were also to be recorders of deeds. On the 4th of January, 1815, county courts were established for each county except Arkansas; the term in St. Louis commencing on the second Monday in March, June, September, and January, the clerk for each to be recorder. The Territory was divided into two circuits,—St. Louis, St. Charles, and Washington constituting the northern circuit, and Ste. Genevieve, Cape Girardeau, and New Madrid the southern, with three terms a year, commencing in St. Louis on the second Mondays in February, June, and October. The old courts were abolished, and a clerk for each county was to be appointed by the judges. The Superior Court was to hold one term annually in St. Louis, commencing on the first Monday of July. On the 15th of the same month the office of attorney-general of the Territory was abolished, and a circuit attorney for each circuit provided for. An act of Jan. 21, 1816, directed that the Superior Court should hold two terms annually in each circuit (commencing in St. Louis on the third Monday of March and September), and that a clerk for each circuit should be appointed. The same act abolished the county courts and transferred their duties to the Circuit Courts. The latter met in St. Louis on the first Monday in May, August, and November, and the Superior Court on the third Monday in March and September. On the 1st of February, 1817, the Legislature passed an act changing the time of holding the courts,—Superior Court in St. Louis, northern circuit, fourth Monday in March and August; Circuit Court in St. Louis, second Monday in February, June, and October. In 1818 the Circuit Court of St. Louis met on the first Monday in April, August, and December, and the Superior Court on the fourth Monday in April and the third Monday in September. The following is a list of the presiding justices, clerks, sheriffs, etc., of the Courts of Common Pleas under the old organization:

PRESIDING JUSTICES.

Charles Gratiot, appointed December, 1804, by Governor Harrison.

Joseph Browne, appointed March, 1806, by Governor Wilkinson.

Silas Bent, appointed June, 1807, by Secretary Browne.

William Christy, appointed March, 1813, by Governor Howard.

CLERKS OF THE COMMON PLEAS.

Rufus Easton, appointed December, 1804, by Governor Harrison.

Thos. F. Riddick, appointed March, 1805, by Governor Harrison.

Andrew Steele, appointed March, 1806, by Governor Wilkinson.

¹ For a full account of the proceedings of this court see Chapter XIV. of this work, vol. i. p. 331-34.

William Christy, appointed March, 1807, by Secretary Browne.
 Thomas F. Riddick, appointed July, 1807, by Secretary F. Bates.

SHERIFFS.

James Rankin, appointed December, 1804, by Governor Harrison.
 Josiah McLanahan, appointed June, 1805, by Governor Harrison.
 Jeremiah Connor, appointed September, 1806, by Governor Wilkinson.
 Alexander McNair, appointed November, 1810, by Secretary F. Bates.
 John W. Thompson, appointed July, 1813, by Governor Clark.
 Joshua C. Browne, appointed April, 1819, by Governor Clark.

DEPUTY ATTORNEYS-GENERAL.

Edward Hempstead, appointed December, 1804, by Governor Harrison.
 Rufus Easton, appointed March, 1805, by Governor Harrison.
 Edward Hempstead, appointed June, 1805, by Governor Harrison.
 James L. Donaldson, appointed December, 1805, by Governor Wilkinson.
 Edward Hempstead, appointed May, 1809, by Governor Lewis.
 Thomas T. Crittenden, appointed November, 1810, by Governor Howard.
 Robert Wash, appointed November, 1811, by Secretary Bates.
 David Barton, appointed March, 1813, by Secretary Bates.

CORONER AND CONSTABLE.

William Sullivan, appointed December, 1804, by Governor Harrison.

In 1825 the Legislature passed a law establishing judicial districts and circuits, which prescribed the following as the times of holding the several courts in St. Louis County: The Supreme Court in the city of St. Louis on the fourth Mondays of May and November; the Circuit Court on the fourth Mondays in March, July, and November; the Probate Court on the first Mondays of March, June, September, and December.

The St. Louis Criminal Court was established in 1839 (the first term to be held in March of that year), with a view of giving the Circuit Court full time to transact the civil business of the county, criminal business having before that time attached to that court alone. In progress of time the Common Pleas Court, and even the land commissioners' court, was created with the design to relieve the Circuit Court of a portion of its labors.

Soon after the admission of Missouri into the Union the entire State was made one United States district, with a District Court which sat twice a year, usually for a very few days, at Jefferson City; and a Circuit Court for that district sat twice a year at St. Louis, the district judge holding it either alone or in conjunction with the United States Supreme Court justice assigned to the circuit of which Missouri composed a part. Prior to 1852 the admiralty jurisdiction of the

United States District Courts had been so strictly construed that very few "steamboat suits" were brought in that of Missouri, and litigation of that description was almost entirely confined to the State tribunals.

But at its December term of 1851 the United States Supreme Court made a decision, in the "Genesee Chief" case (12 Howard, p. 443), by which the admiralty jurisdiction of the United States courts, previously regarded as confined to tide-waters,—the "navigable waters" at common law,—was held to extend to the great lakes and rivers, navigable in fact. As such jurisdiction was superior, in most cases, to that of any State court, the Missouri District Court began to be crowded with cases affecting steamboats and other river-craft and river men. As the trial of these cases at Jefferson City occasioned great inconvenience and expense to litigants residing at St. Louis, there soon arose a very general demand for the establishment of a United States District Court in St. Louis.

But various difficulties in the way of it were soon discovered. The first suggestion, as of the most economical plan, and therefore that most easily and promptly to be got through Congress, was that sessions of the District Court should be held in St. Louis as well as at Jefferson City, or that the court should be entirely transferred to the latter place. To either of these plans there were serious objections. As the entire Indian country between the western boundaries of Missouri, Iowa, and Minnesota was then annexed for certain purposes to the Missouri district, and offenders against the laws in that country were tried in that district, the administration at Washington objected to the additional expense and trouble which would arise from the transfer of trials to St. Louis, and the steamboat interests of the upper Missouri River and its tributaries joined in the objection. Against the holding of terms at St. Louis by the district judge, who resided at Jefferson City, it was objected that, as an admiralty court is always in session, and the great bulk of admiralty business in Missouri arose at St. Louis, either the judge would have to remove to St. Louis, or the lawyers would still have to go to him at Jefferson City, not then connected by railroad with St. Louis, to attend to the business constantly arising between the regular terms of court. The opinion of the bar and of the commercial public therefore soon settled upon the plan of dividing Missouri into two districts and establishing a separate District Court at St. Louis.

Senator Stephen A. Douglas had about that time suggested a reorganization of the Federal judiciary, and a part of his plan was to compose the Circuit

Court of all the district judges within the circuit, sitting together, as an appellate court. This suggested the plan which was finally adopted for the organization of the United States Circuit Court at St. Louis. A bill was drafted by which the old district was divided into the Eastern and Western. Judge Wells was assigned to the Western, in which he had so long resided, a new district judge was to be appointed for the Eastern, and both judges were to sit in the Circuit Court at St. Louis, the senior in commission to preside in the absence of the Supreme Court justice.

The bill above described was introduced into the United States Senate by the senior Missouri senator, Henry S. Geyer, and with the support of his colleague, Senator James S. Green, and of Senators Seward, Fessenden, and Douglas, promptly passed that body. It ran some risk of delay under the rules in the House of Representatives, but through the parliamentary skill and great personal influence of Hon. John S. Phelps it was taken up and promptly passed by that body on the last day of the session, March 3, 1857. It was at once approved by President Pierce. The Missouri delegation in Congress presented to him its unanimous recommendation of Hon. Samuel Treat for the new judgeship. The President at once made the nomination, with the complimentary remark that Judge Treat was also his own choice. Indeed, so general had been the recognition of his especial fitness for the distinguished position, that the name of no other person had been mentioned in connection with it. The Senate unanimously confirmed the appointment, and his commission was signed by President Pierce.

After devoting the necessary time to finishing up the pressing business of the St. Louis Court of Common Pleas, Judge Treat took the oath of office on March 23, 1857, and on the next day organized his District Court. At the next term of the new United States Circuit Court, on April 6, 1857, he took his seat with Judge Wells on the bench.

Up to 1877 the courts of St. Louis exercised jurisdiction over both city and county, but in that year a separate county court was organized, and a new court-house for the county was erected at Clayton in the following year.

From 1804 to 1812 the courts provided an abundance of work for members of the St. Louis bar. The treaty of cession stipulated that the "inhabitants of Louisiana should be protected in the free enjoyment of liberty, property, and religion." Congress passed various acts to enforce these rights, but, as John F. Darby, one of the leading lawyers of early St. Louis,

says, there were not, up to 1811, three perfect land titles in all Upper Louisiana. Spanish grants and conflicting claims of every sort, growing out of surveys of a primitive kind, and judicial decisions under French, Spanish, and American law gave the lawyers enough business. A similar state of affairs in California has produced corresponding results, some of the famous land cases there being still in court after twenty years of conflict among opposing claimants. Lawyers who won renown in these entangled civil cases were fit to cross weapons with the best legal talent of the country, and their fees were correspondingly large. It was a time when "homespun ways" ruled everywhere, and judges who presided at the Circuit Courts and young lawyers who pleaded before them were trained in a hard, healthy school that developed manhood and originality.

Old files of the St. Louis papers throw considerable light upon the state of society in these earlier years. Sept. 23, 1808, the trial of George Duillard for the alleged murder of Antoine Bissonette came off in the District Court. Hon. J. B. C. Lucas presided, and Hon. Auguste Chouteau was associate justice. Attorney-General John Scott prosecuted the case, and Edward Hempstead, W. C. Carr, and Rufus Easton were the prisoner's counsel. The facts were briefly these: Manuel Lisa, a wealthy St. Louis trader, and the prisoner had, in 1807, joined forces and embarked merchandise which, with their outfits and equipments, were worth \$16,000, as a venture on a trading voyage to the sources of the Missouri. They had engaged the deceased to serve for three years, and to do duty not only as a hunter, but also to mount guard, and to obey his employers in every particular. Bissonette also agreed that he would not leave their service on any pretext whatever. But while near the mouth of the Osage River he deserted, and Mr. Lisa, commander of this party of traders in a hostile Indian country, sent Duillard and others in pursuit, saying, "Bring him, dead or alive." Duillard found him, and, after calling on him to surrender, shot him in the shoulder, from which wound he died the next day, after saying that "no one had treated him ill, and he did not know why he deserted." Every possible care was taken of him. The jury in fifteen minutes returned with a verdict of acquittal.

All the lawyers who took part in this case became noted afterwards. John Scott, prosecuting attorney, was born in Virginia in 1782, graduated at Princeton in 1802, first located in Indiana, but went to Missouri in 1804.

Judge William C. Carr, son of Walter Carr, was born in Albemarle County, Va., April 15, 1783;

studied law, and came to St. Louis March 31, 1804, at the age of twenty-one years, being only twenty-five days on the trip by water from Louisville.¹

After remaining a month here he went to Ste. Genevieve, then a larger place, to settle. Here he married his first wife, Ann, daughter of Aaron Elliot, and remained one year, when he returned to St. Louis to settle permanently.

He was appointed circuit judge by Governor John Miller, and held the first term of his court July 24, 1826. Judge Carr retained this office about eight years, and then resigned it, retiring to private life, and died March 31, 1851, aged sixty-eight years.

Judge Carr left a numerous progeny,—by his first wife three daughters, who all married; and by the second, Dorcas, a daughter of Silas Bent, Sr., whom he

¹ Charles Carr, brother of Judge William C. Carr, and father of Walter C. Carr, at one time president of the Boatmen's Savings Institution, and R. E. Carr, at one time president of the Exchange Bank of St. Louis, died near Lexington, Ky., Nov. 14, 1868. He was born in Spottsylvania County, near Fredericksburg, Va., on the 29th of October, 1774. His father, following the footsteps of Daniel Boone, removed to the wilderness of Kentucky in 1777, leaving Charles, only three years old, with his relatives till 1785, when he accompanied a family over the mountains to his father's house, not far from Lexington, then containing only a few log cabins.

At the age of nineteen he volunteered as a soldier, in company with Samuel R. Combe and other neighbor boys, in a Kentucky regiment under Gen. Wayne, and was in all his operations against the Northwestern Indians, terminating in a bloody and decisive victory at the foot of the Maumee Rapids, some ten miles above the present city of Toledo. He was married in 1801 to Miss Elizabeth Todd, daughter of Gen. Levi Todd, also an early emigrant to Kentucky, and one of the most distinguished of her Indian-fighters and bunters. He was for some years a merchant in Lexington, and about the year 1808, in conjunction with William R. Morton, bought out the sheriff's office from the oldest magistrate for two years, and continued in that office for eight or ten years by successive purchases from senior justices, who had the right to sell, as the law then stood. In the discharge of his various official duties he was always polite and courteous.

While holding this office the disastrous battle of River Raisin was fought by Gen. Winchester on the 22d of January, 1813, in which so many gallant Kentuckians lost their lives. A call was made for more troops, and Mr. Carr was among the first to volunteer in Col. William Dudley's regiment. His high character and business habits induced Col. Dudley to appoint him paymaster, which office he held throughout the campaign and until the troops were paid off according to a special act of Congress. He was taken prisoner at Dudley's defeat opposite Fort Meigs, on the 5th of May, 1813, robbed of his hat and coat, as all the prisoners were, and forced to run the gauntlet into old Fort Maumee, long before given up by the British, and then rotted to the ground. In this terrible exploit many were killed and wounded, but Mr. Carr was fortunate in escaping without an injury. Mr. Carr returned home and resumed his official duties, in which he continued several years, and at the close was elected to the Legislature. In 1827 he removed to the farm on which he died.

married in 1829, several sons and daughters. His fifth daughter, Eliza B., was married to William H. Ashley, Lieutenant-Governor and member of Congress; the sixth, Harriet, to Capt. James Deane, United States army; and the seventh, Virginia, to the late Dr. E. Bathurst Smith.

The St. Louis Circuit Court, of which Mr. Carr was judge, embraced five large counties, and extended nearly to the Arkansas line. So large was it that it was commonly called from its largest county the "State of Gasconade," and Dr. David Waldo, clerk of the courts, was usually called "Governor" of this State.² There were many saw-mills in the then extensive pineries, and the lumber was rafted to St. Louis. Circuit Court was held at Mount Sterling in a log court-house. Although Judge Carr stood high at the bar, he had personal enemies, and they succeeded in having articles of impeachment presented by the Legislature. In the winter of 1832 the trial occurred, he being charged with neglect of duty, incapacity, and favoritism, but he was acquitted after a protracted investigation. Among the lawyers who practiced in this Circuit Court were Gamble, Bates, Geyer, Darby, Cole, and others.

Upon the death of Judge Carr the members of the bar, with some of whom he had been associated for over thirty years, passed the usual resolutions of respect. He had been fortunate in his investments at a time when it required little money to purchase property in what is now the heart of the city.³

Edward Hempstead was another of the distinguished arrivals of 1804, and the high place he at once took is sufficient proof of his ability. His biography will be found in full elsewhere.

But the man whose advent in the struggling St. Louis of 1804 was, perhaps, of the greatest importance to the community was Rufus Easton, one of the most profound lawyers of that brilliant era, when such

² This Dr. Waldo, afterwards companion of the Bents and Sublettes, was an unusual man in an age of original characters. He was self-taught, but his acquirements would have been remarkable anywhere. At one time he was clerk of Circuit Court, *ex officio* recorder of deeds, clerk of the county court, justice of the peace, deputy sheriff, postmaster, major in the militia, and a practicing physician. He accumulated a large fortune, and was almost the idol of the community in which he lived.

³ Alfred W. Carr, a nephew of Judge Carr, was born in 1804, in Kentucky graduated at Transylvania University, began practice in Missouri in 1823, in the St. Charles Circuit, Hon. Beverly Tucker judge, and soon became widely known, but died in his early manhood, leaving a young wife, daughter of Maj. Graves, of Kentucky. She afterwards married Col. Chambers, a lawyer, who became editor and part proprietor of the *Missouri Republican*.

luminaries as Geyer, the Bartons, Gamble, Spalding, Allen, Lawless, Mullanphy, Bates, and Leonard were leaving their impress upon the laws, statutes, and institutions of Missouri. The fame of these men filled the State, and any one of them would have held a place in the front rank of any professional brotherhood in this country. Rufus Easton was born in Litchfield, Conn., May 4, 1774. His parents were of English descent, and some of the family rendered important services in the Revolutionary war. He received a good education before entering upon the study of the law. In February, 1791, he became a student in the law-office of Ephraim Kirby, a prominent lawyer of Litchfield, and remained with him two years, completing his studies elsewhere, and obtaining a license to practice law. To what extent, if any, he practiced in Connecticut does not appear; but at the opening of the present century he is heard of at Rome, N. Y., where he soon became known as a promising young lawyer. Here he attracted the attention of the leading men of the Republican party, and was so deep in their confidence as to be consulted regarding Federal appointments in Western New York, as appears from letters addressed to him by Gideon Granger, Mr. Jefferson's Postmaster-General.

Mr. Easton spent the winter of 1803-4 at Washington. The subject of the approaching Presidential election was beginning to attract attention, and De Witt Clinton was prominently mentioned as a candidate, and was in communication with the leading Republicans. Just before Mr. Easton's departure for the seat of government, Mr. Clinton addressed him a note, requesting him to watch the progress of measures and act accordingly.

While in Washington Mr. Easton determined to remove to New Orleans, and left for that purpose early in March, armed with a letter from Aaron Burr to a gentleman in Louisiana. The young lawyer evidently had strongly impressed Burr, for the latter showed him many attentions, and did much to make his stay in Washington a pleasant one.

Mr. Easton did not, however, visit New Orleans, but decided to locate at Vincennes, Ind. His stay there was short, for in the same year he settled at St. Louis, which became his permanent residence.

He again visited Washington in 1804-5, and received attention from men of prominence. It was during this winter that Burr completed arrangements to carry out his favorite project of establishing a Western empire on the banks of the Mississippi, with New Orleans for its capital. It is probable that he then resolved upon securing the co-operation of Easton; and in order to increase Easton's influence

with the people of the Territory, as well as to place him under obligation to himself personally, he procured for him, in March, 1805, the appointment of judge of the Territory of Louisiana; and a few days later addressed him a letter, courteously phrased, and recommending him to make the acquaintance of Gen. Wilkinson, the newly-appointed Governor of the Territory, and others who, Burr said, were about to remove to the Territory. In the light of subsequent events this letter was of importance as foreshadowing Burr's conspiracy against the government, but there was nothing in it that then excited the suspicions of Easton, who interpreted it as merely one of the many civilities which he had received from Mr. Burr. That Burr and Wilkinson had formed an unpatriotic alliance fully appeared upon Burr's trial for treason; but Easton was not and could not then have been aware of the fact.

Burr spent that summer in a trip down the Ohio, visiting Blennerhasset's Island, etc., and in June, 1805, was at Massac, where, in anticipation of visiting St. Louis, he wrote Judge Easton a letter designed to establish the most intimate relations between him and Governor Wilkinson, which indicates that he hoped to find him, when he arrived in St. Louis, not only in harmony but on terms of confidence and friendship with that official.

Burr came to St. Louis in September, and the object of his visit was undoubtedly to secure the co-operation of Easton and other prominent men of the Territory in his scheme. He soon had a conference with Easton, and broached the subject of the empire, but received a decided and spirited refusal, and at once broke off all communication with him. After Burr left St. Louis, Wilkinson expressed a strong dislike for Easton, and circulated charges of official corruption against him, which came to the ears of President Jefferson, who, when Easton's commission expired, nominated another person to the office. Easton at once repaired to Washington, and sought an opportunity to meet the charges against him. He was granted a personal interview with Mr. Jefferson for that purpose, and the latter, being satisfied that Wilkinson's allegations were unfounded, appointed Judge Easton United States attorney. When Burr's conspiracy was officially disclosed to the President (in October, 1806), Judge Easton was appealed to for information on the subject, and frankly revealed all he knew. His own skirts were certainly clear of complicity in the matter, for as early as January, 1805, he wrote to Gideon Granger, stating his belief in the existence of a traitorous project to divide the Union, and in the following October informed the

President that "Gen. Wilkinson has put himself at the head of a party of a few individuals who are hostile to the best interests of America." Judge Easton was violently attacked by witnesses in Burr's trial for withholding certain important information regarding the plot from the government, but he filed a deposition disclaiming any knowledge beyond what has been related, and was completely acquitted in the judgment of the leaders of the administration. He enjoyed a friendly and interesting correspondence with Mr. Granger and many of the leading men of his time, and was honored with letters from Jefferson, Clinton, Calhoun, Granger, and many others.

In 1805 a post-office was established in St. Louis, and Judge Easton was appointed the first postmaster, a proof that the government reposed the utmost confidence in his patriotism and integrity. His popularity and influence in the Territory gradually increased, and in 1814 he was elected delegate to Congress and served four years. Upon the organization of the State government in 1821 he was appointed attorney-general, and continued in that office until 1826. He died at St. Charles, Mo., July 5, 1834.

During this long and varied career Mr. Easton was actively engaged in the practice of his profession, and was indisputably the leading lawyer of the Territory. He was noted more for the soundness and vigor of his intellect than for eloquence, although he was not without many of the graces of oratory. He expressed himself with extraordinary clearness and force, and would have been esteemed a strong debater at any bar in the country. But his chief excellence consisted in his fine executive and administrative talents. He discharged the duties of every one of the many and important offices he held with distinguished ability and unimpeached fidelity.

Judge Easton was a man of very kind heart, and was charitable to the full extent of his means. He and his accomplished wife (who was a native of New York) dispensed a most generous hospitality, and few strangers of note visited St. Louis without receiving an invitation to his house.

He left a large family. The oldest son, Col. A. R. Easton, is still living. There were seven daughters; one married the Hon. T. L. Anderson, of Palmyra, Mo.; another became the wife of the Hon. H. S. Geyer; the third married Archibald Gamble, a brother of Governor Gamble; another was the wife of Major Sibley, of St. Charles. Mrs. Sibley was a lady of fine literary taste, and with her husband founded and endowed the Lindenwood Female Seminary at St. Charles, which became and is yet noted as an institution of learning.

Judge Easton engaged largely in real estate speculation, his partner being William Russell, father-in-law of the late Hon. Thomas Allen. They owned the ground on which the present city of Alton, Ill., is situated. The city was named after Judge Easton's oldest son, and several of its streets after members of his family.

Col. Easton was a man of fine appearance. The portrait which accompanies this sketch is an excellent likeness, and is from a miniature taken when he was about forty years old.

Col. Alton R. Easton, the oldest son of Rufus Easton, was born in St. Louis, June 23, 1807. His early education was received at a private school conducted by Rev. Salmon Giddings, after leaving which he spent two years with the Rev. Dr. Townsend, a cultivated gentleman, who kept a select school on his farm on Shoal Creek, a tributary of the Kaskaskia River, Illinois. Here young Easton was instructed in the ordinary English branches and the classics. In 1823, in company with a son of Dr. Townsend, he was sent East to complete his education. The journey was made by carriage, but the usual rate of travel was so slow that the boys walked most of the way, and actually traversed the greater part of the distance through Illinois, Indiana, and Ohio on foot. At Cleveland, desiring to enjoy a new phase of travel, they took a sloop for Buffalo, and there rejoined their escort. The trip ended at Bloomfield, N. J., where for a year young Easton attended an academical school taught by the Rev. Dr. Perrine, and then in 1824 entered the Military Academy at West Point. At the end of two and a half years, however, owing to a misunderstanding with the authorities of the institution, he resigned, and in the winter of 1827 returned to St. Louis and engaged in the study of medicine with Dr. Samuel Merry. This well-remembered gentleman was also receiver of public money, and as he was in poor health, Easton was often left in charge of the office, and ultimately became practically the receiver himself.

Several years of this confining service affected his health unfavorably, and he left the office and for four years was engaged almost exclusively in hunting and fishing. He is wont to say that this was the most pleasant and interesting period of his life. This *regimen* and his campaigning in the Mexican war fully restored his health, and since the latter period he has scarcely known what sickness is.

In 1832 he started with his rifle, a solitary volunteer, to engage in the Black Hawk war, but peace was concluded before he reached the field of action. About the year 1833 the "St. Louis Grays" were

A. R. Easton

UNIVERSITY OF MINNESOTA

organized and became the crack company of the city, and Mr. Easton was for many years their captain. The organization of other companies in due season necessitated the formation of a regiment, and Capt. Easton was chosen colonel of the famous "St. Louis Legion." In May, 1846, when Gen. Taylor, after the brilliant battles of Palo Alto and Resaca de la Palma, appealed to Gen. Gaines for reinforcements, the Legion promptly responded to the requisition of Gen. Gaines. Within three days the regiment was recruited to about nine hundred men and was on its way down the river for Mexico, with Col. Easton in command. The Legion spent the summer at Bureto, on the Rio Grande, far from the theatre of war, and in the fall returned to St. Louis, without having participated in any engagements.

Early in the following year a requisition for volunteers was made, and St. Louis raised a battalion, with Col. Easton in command, and dispatched it southward. The force crossed the plains from Fort Leavenworth to Santa Fé. While on the march Col. Easton indulged his passion for hunting, and won much renown among the men of his command by shooting buffalo and other game. One of his adventures resembled, but greatly eclipsed, Putnam's exploit with the wolf. A wolf which he was pursuing suddenly disappeared in a cavern in one of the "salt licks" common to the West. He fired and killed him, and sent a companion down who dragged him out. A growl indicated the presence of another animal, and he shot, killed, and dragged out another. To his great surprise another savage demonstration was heard in the cavern, and a third shot resulted in the death and dragging forth of a third wolf.

On arriving at Santa Fé affairs were found in an extremely unsettled condition, and Col. Easton took the reins as military Governor and restored order. On being relieved by Gen. Sterling Price, he led his command to Chihuahua, arriving there in March, 1848. The rumors of an armistice then prevailing prevented the battalion from engaging in any military movements, although there was brisk fighting at Santa Cruz, only sixty miles away. Peace having been declared the regiment was ordered home, and was mustered out of the service in October, 1848.

Though in the service for a considerable period before war was declared, and long after the war was over, it so happened that Col. Easton saw no fighting whatever, notwithstanding the fact that in his two periods of service he probably traveled farther for a chance to fight than any officer in the army.

Upon returning from Mexico, Col. Easton resumed his field sports, and was a familiar figure in all the

unsettled portions of St. Louis and the adjacent counties. He was particularly expert with the rifle, and there were few men in the Southwest who were better marksmen. It is still his delight to talk of his exploits with rod and gun, and even yet he often indulges in his favorite pastimes. It is his custom annually to go into a "fall encampment" with certain of his sporting friends, who have built club-houses near Grand Tower, Mo., and on the Black River, Ark.

When the Territory of New Mexico was organized, President Fillmore offered him the secretaryship, but he declined the honor. In 1853, Mr. Fillmore appointed him assistant treasurer of the United States, at the request of Maj. H. S. Turner, who had resigned, and he retained this office until removed by President Pierce. After the war Col. Easton was strenuously urged to run for Congress, but declined.

From 1860 to 1864 he was a member of the county court. During his term the court-house was finished, and the insane asylum was in process of building.

When the street railway system was established in St. Louis, Col. Easton subscribed to the stock of several companies, and succeeded B. Gratz Brown in the presidency of the Citizens' Railway. From 1861 to 1864 he was inspector-general of the State of Missouri, under the celebrated "Order No. 96," which authorized the equipment and maintenance of a body of troops raised in Missouri under the authority of the Federal government, and bearing allegiance thereto, but to be employed exclusively for the defense of the State. In this capacity Col. Easton showed great ability as an organizer, and rendered the Union cause the most indefatigable and efficient service, his duties at times leading him into situations of extreme personal peril. His commission was signed by Governor Gamble, and he subsequently learned with pride that it was the first one issued by that official under the order in question.

For several years Col. Easton was the agent of Mrs. Tyler, of Kentucky, and efficiently managed that lady's vast estate. In 1873 he was appointed assessor of internal revenue by President Grant, of his own motion, and without the customary consultation with the Missouri delegation. When Grant lived in St. Louis and was but a retired army captain, Col. Easton had rendered him many services. Notably when a member of the county court he had advocated (though unsuccessfully) Grant's appointment as county engineer. Col. Easton held this office until it was legislated out of existence, and soon after that event was appointed pension agent by President Grant, who was

still anxious to show his regard for an old and trusty friend. He was often consulted by the President concerning appointments in St. Louis, and his recommendations were usually concurred in. To show the estimation in which he was held by the administration the following graceful note is appended :

"TREASURY DEPARTMENT,
"WASHINGTON, May 7, 1875.

"DEAR SIR,—The President directs me to tender you the office of collector of internal revenue at St. Louis, *vice* Maguire, resigned, and I beg to add an expression of my official and personal desire that you may see proper to accept the same.

"Please regard this communication as confidential, and answer by telegraph. The word 'yes' will be regarded as acceptance.

"Very truly yours,

"B. H. BRISTOW, *Secretary*.

"ALTON EASTON, ESQ., St. Louis, Mo."

Col. Easton did not accept the position, but at the expiration of his term as pension agent, in 1877, retired to private life, and has spent the succeeding interval in the enjoyment of well-earned ease. His years considerably exceed the Psalmist's limit, but he is yet vigorous in body and mind. When in the prime of life he wandered and hunted over the very spot where his large but modest residence now stands in West St. Louis, on a busy avenue called by his name, and so designated because of the respect which his townspeople entertain for him personally and their appreciation of his many and distinguished public services. Col. Easton is one of the few remaining links that connect the present with the Territorial period of the State, and in a long and singularly interesting career he has won and retained the high regard of two generations of his fellow-men.

Incidental reference has been made to Judge Silas Bent as a lawyer of eminence. His father, also named Silas, was born in Sudbury, Mass., in 1744, and was commander of the "Boston Tea Party." The subject of this sketch, one of seven children, was born in 1768, educated at Rutland, moved to Ohio in 1788, and afterwards to Virginia, where he married Martha Kerr. In 1804, after holding various surveyorships and associate judgeships, he was appointed chief deputy surveyor for Upper Louisiana by Albert Gallatin. In 1807 he was made first judge of the Court of Common Pleas for the district of St. Louis. The next year he became auditor of public accounts. In 1809, with Bernard Pratte and Louis Labeaume as associates, he was appointed presiding judge of the St. Louis court, and signed the first town charter. In 1811 he was again public auditor and first judge of the courts, and in 1813 became supreme judge of the Territory, was recommissioned, and held the office until it was abolished by the

admission of Missouri. Then he was appointed clerk of the St. Louis County Court, which place he retained until his death in November, 1827. His public duties were most onerous, and were ably and honestly performed. Of his seven children, the third, John, born in 1803, and admitted to the Missouri bar in 1824, gave great promise, and was very popular in St. Louis, where he held the office of circuit attorney, and at one time represented the district in the Legislature. He died in 1845. Charles Bent became Governor of New Mexico, and was murdered in a Mexican outbreak at Taos in 1847.¹ Julia married Governor Lilburn W. Boggs, during whose term the "Mormon excitement" occurred, and who in 1849 moved to California, settling in the Sacramento valley, where he died a few years later. The other children were Lucy, Dorcas, William W., Mary, George, Robert, Edward, and Silas.

Thomas Hart Benton came to St. Louis in 1813, and began the practice of the law. How large a part he played at the bar of St. Louis and in the councils of the nation his biography, on another page, relates in full. The mention of Benton recalls the Lucases, his lifelong enemies, whose lives are also given in full in another place. Charles Lucas, the son, who fell beneath Benton's pistol, was of great promise as a young lawyer, and seems to have been his father's favorite child up to the time of his unhappy fate. He, like his brother James, began his education at Jefferson College, Pennsylvania, passed the bar in 1814, was at once elected to the Legislature, and soon after appointed United States attorney for the Territory. It was his rapid advancement in political honors which probably earned him the hatred of Benton, who saw in him a formidable rival for that senatorship which was the goal of his own ambitions. Judge Lucas at least seemed to think so, and never relented

¹ Charles, William W., and some of the younger brothers were among the bravest of the mountain men who fought Indians, led parties across the plains, pierced the loveliest valleys and climbed the steepest slopes of the Rocky Mountains. Their deeds are forever a part of those stormy days of warfare with Blackfoot, Comanche, and other tribes of fierce warriors. They rank with Milton Sublette and his brothers Andrew, Saul, and William, with St. Vrain and Bonneville. They were traders, explorers, heroes, and the men whom they led were absolutely fearless, infinitely fertile in resource. Capt. Charles Bent was once seen to charge alone and check fifty Indians. His genius in Indian warfare was of the first rank. In 1829, with sixty men, he defeated over five hundred well-armed Indians on the Cimaron River. William W. Bent and two companions, while trapping beaver in New Mexico, were once attacked by two hundred warriors, but built a breastwork of stones, fought them for three days, and finally drove off their assailants. It was a time when the sons of the best families of St. Louis were on the frontiers. William W. Bent died in Colorado, May 19, 1869.

in his bitter hostility to and his relentless scorn of Benton. An instance of this occurred at a ball at the Planters' House, when Col. Benton was one of the invited guests. Judge Lucas was standing with his daughter at the head of the room when he saw Benton. Anxious friends endeavored to prevent a "scene," with no avail. Making his way to where Col. Benton stood, he coolly and deliberately surveyed him with the most contemptuous expression of countenance, and turning to his son James, in a distinct tone, and in his slightly broken accent, said, "It is a con-so-la-shion, my son, that whoever knows Measter Col. Thomas H. Benton knows him to be a rascal,—eh, my boy?" Col. Benton thought it wiser to brook the insult than to resent it, and shortly after left the room. There are many stories told of Judge Lucas. He was a man of faultless integrity, of immovable opinion, and of a haughty imperiousness. Old citizens speak of him as a little, bent old man, with snow-white hair and sparkling jet-black eyes.

James H. Lucas assumed care of the extensive estate left by his father, and filled many positions of trust and honor.

Of J. H. Lucas' family, the eldest daughter married Dr. J. B. Johnson; another married Silas Hicks, of New York, and some years after his death Judge Hagar, of San Francisco; J. B. C. Lucas possesses much of his father's business capacity; Robert married Miss Clara Kennedy, daughter of Dr. Kennedy, of the United States army; William, the eldest son, married a daughter of ex-Governor Horner, of Wisconsin, and is of a decided literary turn; James, Joseph, and Henry are the other children. His domestic life was in all respects a fortunate and happy one. In 1870, Wilson McDonald, the sculptor, executed a bust of Mr. Lucas, which was formally presented to him with a speech by Hon. John H. O'Neil.

In the Territorial days of Missouri three brothers, Joshua, David, and Isaac Barton, sons of a Baptist minister, were distinguished for their knowledge of the law, though David possessed the most talent, and was unquestionably one of the greatest men of his time. They were from the mountains of East Tennessee, where they had studied English law. Alexander Gray, James Peck, afterwards United States district judge for Missouri, and the three McGirk brothers, Matthias, Andrew, and Isaac, were also from this rugged region. The father of the Bartons, Rev. Isaac Barton, was born in Maryland in 1746, removed to North Carolina, and settled near Greenville, where David was born in 1783. Isaac Barton, the elder, afterwards moved to Jefferson County, Tenn., where he died in 1831; his wife Keziah survived until

1845, dying at the age of ninety-one. This worthy couple had twelve children born to them. One son was killed in the war of 1812. David began his education at Greenville College, now in Tennessee, but then in North Carolina, Tennessee being a part of that State up to 1796. The inscription on the monument to his memory erected by the State says he "came to Missouri in 1800," but this is a mistake, as he was admitted to practice in 1810 in Tennessee, and reached St. Louis the following year. In the war of 1812 he was an Indian ranger, as were many of the most noted lawyers of the day in the West. The memory of Jo Daviess, of Kentucky, yet lingers in the State made famous by his eloquence and consecrated by his life-blood. The leaders of the St. Louis bar in 1804-15 were no less brave, though more fortunate. Some of them were as familiar with the rifle, the sword, and the dueling pistol as with their Blackstone and Kent, and were notable figures at hunts in canebrake and forest, and at turkey shoots in the villages. Shortly after David Barton's arrival, Col. Easton remarked that he would become a famous orator, and in a few years he was one of the best stump-speakers of his party. When the first Territorial Legislature met, of which several Tennessee lawyers were members, an act was passed making the common law of England and British statutes, so far as not inconsistent with the Constitution of the United States, the law of the Territory. David Barton was immediately appointed circuit judge for St. Louis. In December, 1817, he found he could make more money in his private practice, and resigned his office. The Superior Court and the Circuit Courts of St. Charles, Washington, and St. Louis often thereafter rang with his eloquent pleadings. At this time, and for some years after, he was the most popular man in the State. When the Constitutional Convention met in June, 1820, David Barton was elected presiding officer by a unanimous vote, and so many of the provisions of the State Constitution were framed by him that the instrument is still known as the "Barton Constitution." That autumn, while his courtesy and administrative ability were still fresh in the public mind, the General Assembly met, and the election of David Barton as United States senator was by acclamation. Then followed that remarkable contest between Benton and Lucas, elsewhere more fully described. As is well known, Barton and Benton did not take their seats in the Senate until the passage of the Missouri Compromise, but in 1821 their first speeches gave them high rank as debaters, which they afterwards maintained throughout their public life.

In 1823 a correspondent of the *New York Advertiser* gave the following graphic description of these famous men: "It is striking to see the shyness which these two distinguished senators exhibit with regard to each other. On every political subject they are antipodes, and they seem to have for each other no great personal friendship. They never converse or associate either in public or in private. In debate they are uniformly opposed on every subject, but still they never, even in direct and sharp replication, allude to each other in the ordinary way, as 'my honorable colleague,' or 'my friend, the senator from Missouri.' In no way are they ever known to recognize each other, either in friendship and courtesy or in avowed hostility. In person and mind they also differ. Benton is tall, large, and erect. Barton is thin and of rather low stature. Benton's education and genius fit him for activity and stirring life; Barton's for quiet and sedentary pursuits. The former is the more laborious, the latter is the more highly gifted. Both are literary, but the learning of the former is the result of the hard study of his later years, while that of the latter grew with the growth of his own mind, and is affiliated with it. Benton's speeches, and particularly his writings, remind one of extracts, abridgments, and labored compilations, while Barton's words and ideas flow easily from a native and inexhaustible fountain. Benton is ambitious and aspiring; his colleague, on the other hand, is careless of political fame and advancement. Benton is lofty and imposing in his manner, and in temper high-toned, fierce, and contentious, while Barton is modest and unpretending, but dignified, cool, and resolute. Both of these gentlemen were born and educated in the old States, but have passed their lives chiefly in the new regions of the West, where they have filled with reputation the highest offices. Of the State of Missouri, which they now represent, they are eminently the founders, having been among the first to settle it, having framed its Constitution and established its laws, and having, as it is to be presumed, imparted much of their own strong and original character to its institutions and its population." It is evident from this that the personal friendship which in 1820 made Barton throw the whole weight of his influence for Benton's election had greatly waned, and that the way was opening for the estrangement of 1825, and his subsequent philippic against his colleague. In reference to the quotation just made the *St. Louis Republican* commented as follows: "Col. Benton was not a member of the convention which formed the present Constitution of Missouri, nor has he ever acted in a legislative

capacity since his removal to the State. He never was what is termed a popular man with the people. They have always viewed him with distrust, and time in developing his character has not served to do away their apprehensions. The same feeling which has heretofore existed would now prevent his elevation to any office which depends upon a manifestation of the popular will."

In describing Barton's eloquence, Judge Bay, author of the "Bench and Bar of Missouri," says that his wit, sarcasm, and invectives were terrible, and even overpowering. Benton was the best logician, but was far inferior in pathos, vehemence, and imagination. For ten years Barton served in the United States Senate with zeal and efficiency, but the support he gave to Adams in 1825, as against Jackson, urging John Scott, Missouri's representative, to vote for the former, was fatal to his political future, and he retired from public life for some years. Before this, however, he delivered his great speech, which was ranked at the time with Webster's famous reply to Hayne. Wrought up to the passionate heights of fearless and torrent-like oratory, he spared none of his opponents, not even Benton, whom he arraigned for official misconduct. The speech remains to this day a model of masterly invective and denunciation, and at this time he received the title of "Little Red," which clung to him the rest of his life. It was a rough-clad backwoodsman from Western Missouri who, after hearing this great speech, shouted through the Senate galleries and the streets in wild excitement, "Hurrah for the Little Red!" and when asked for an explanation, said he once owned a little red rooster which whipped all its opponents, and that "was like Dave Barton!" When public feeling turned so strongly against Barton that he was defeated, the opposition press called it a national calamity. The earnest leaders who afterwards organized the Whig party spoke with universal regret of his retirement.

St. Louis journals of July 13, 1830, contain accounts of a dinner given in his honor by his personal friends and those who approved of his public course. A preliminary meeting had been held July 7th, and the following gentlemen were appointed the managing committee: George Collier, Josiah Spalding, D. Hough, Jesse G. Lindell, Henry S. Geyer, W. R. Grimsley, F. L. Billon, W. H. Hopkins, D. B. Hill, C. Wahren-dorf, M. Tesson, J. Baum, William K. Rule.

On Saturday, July 10th, two hundred persons sat down to the banquet at the old Missouri Hotel. Mayor Daniel D. Page acted as president, and William Russell, Thomas Forsythe, James Clemens, and Thomas Cohen were vice-presidents. David Barton delivered

an address that occupied more than an hour. His friends in 1831 persuaded him to run for the Lower House as candidate against Spencer Pettis, of the Jackson party, but the latter was so overwhelmingly in the majority at that time that all Barton's eloquence could not turn the scale. In 1834-35 he was sent to the State Senate, and assisted greatly in compiling the "Revised Statutes." This ended his public life.

Many stories are told about David Barton's witty remarks. Once, when pleading a case before the Supreme Court, the judge (George Tompkins) stopped his argument with "Do you call that law?" "No, your Honor," he replied, with suavity, "but I did not know but that the court would accept it as law." He was short in build, broad-shouldered, and had a high forehead, and was very careless in his dress. His conversational powers were great. After his death, on the 26th of September, 1837, the State named a county after him, and also placed a marble shaft over his grave, whose inscription characterized him as a profound jurist, an honest statesman, and a just and benevolent man. The saddest fact in regard to his life is its close, which was clouded by an impaired judgment and by an intellect reduced almost to imbecility. The *St. Louis Republican* of Oct. 9, 1837, says, "Such has been the melancholy condition of his mind, from which for some time past there has been no hope of his recovering, that we cannot but look upon his death as a relief from a worse condition. The deceased was one of the most distinguished lawyers and politicians of the West. His name is particularly identified with the history of Missouri from the organization of the State government to the present time. He was alike distinguished for his eloquence and profound legal acquirements, and unaided by fortune or alliance, rose by dint of an indomitable spirit and his own capacious mind from rustic obscurity to fame and affluence. During the session of the Legislature of 1834-35, Judge Barton was observed to be unusually abstracted and moody; a slow but desponding melancholy seemed to be preying upon his faculties, which continued to assail him until he sunk at last into hopeless and desperate insanity, the inevitable symptoms of which were first recognized by his friends in a series of numbers which appeared in this paper during the past winter over the signature of 'Cornplanter.' His malady increased with the most frightful effects, leaving naught of the once highly-gifted statesman and critical jurist save an emaciated frame and a ruined and distracted mind."

Joshua Barton, brother of the preceding, was much less of a public speaker but far more of a jurist. He

was born in East Tennessee about 1788, though the exact date is unknown. His earlier law studies were pursued in the office of Rufus Easton, St. Louis, and Edward Bates, afterwards his partner, and Attorney-General of the United States during Lincoln's administration, studied under the same profound jurist. After the State government was formed he became Secretary of State, but resigned to accept the United States district attorneyship. He was then in the prime of his powers, and Judge Edward Bates used afterwards to say that "he had the best legal mind at the St. Louis bar, and was the most accomplished lawyer he had ever met."

At this time also the third Barton brother, Isaac, was holding the position of clerk of the United States Court of Missouri, which he obtained in 1821, and kept till his death in 1842. The star of the Bartons seemed in the ascendant. David was winning laurels in Washington, and few could contend with Joshua in the St. Louis courts; but in 1823 a communication appeared in the *Missouri Republican* charging Gen. William Rector, surveyor-general of Missouri, Illinois, and Arkansas, with corruption in office. He was absent, and his brother Thomas called on the editor, learned that Joshua Barton wrote the letter, and challenged him. In their correspondence Barton refused to fight unless Rector would first admit the truth of the charges, and this being done they met on Bloody Island, where so many duels had occurred. It was June 30, 1823, weapons pistols, distance ten paces. At the first fire Barton fell dead, shot through the heart. His body reposes in St. Charles, near where the old round stone fort stood. On the 2d of July the St. Louis bar met, Alexander Stuart being chairman, and it was unanimously resolved that, in testimony of their respect for his memory, each member should wear crape on the left arm for thirty days.

On March 6, 1859, the chords of public sorrow were deeply touched by the announcement of the death, on the previous night, of Henry S. Geyer, for more than forty years one of the very foremost at the St. Louis bar. All the records of that time give evidence of the respect and admiration he had inspired, and his fame as an acute juriconsult was national. The principal arguments and authorities presented in the Dred Scott case were submitted by him. He was born of German parents in Frederick County, Md., Dec. 9, 1790. His early promise attracted the attention of Gen. Nelson, with whom he studied law. Another early friend was his uncle, Daniel Sheffie, of Virginia, a prominent lawyer and politician. He began practice in 1811, but entered the army in 1812 as first lieutenant, and rose to the rank of captain in active

duty on the frontier. In 1815 he re-entered the legal field in St. Louis, and almost immediately won recognition. At that time the laws of the Territory were in a rudimentary condition, and the inchoate titles granted by Spain were being examined and readjusted, and the most intricate problems were involved in their settlement. Capt. Geyer applied himself so assiduously to this department of law that for over forty years hardly an important land case was settled in Missouri without his aid. But he also possessed a variety of legal accomplishments, and was perfectly at home in the subtle distinctions of commercial law, in complex details of chancery cases, and in the skillful management of jury trials, when his examination of witnesses and of the evidence was unequalled. A writer says of him, "His vigilance, dexterity, and perfect presence of mind were indescribable." But we will let his old associates describe his valuable services to jurisprudence. When, March 8, 1859, the St. Louis bar met to pass resolutions regarding their loss, their sorrow was manifested in the most marked degree. Edward Bates was president, and Albert Todd and F. A. Dick vice-presidents. C. D. Drake, J. M. Krum, J. K. Shepley, C. Gibson, and T. C. Reynolds drew up the resolutions, which contained the following:

"Through a period of more than forty-three years his clear, acute, and logical mind, unimpaired to the last, dealt with all the great questions which have arisen in connection with the peculiar jurisprudence of this State, and none has been more distinctly felt by our State and Federal judiciary in their elucidation and final determination.

"His influence upon the statute law of Missouri has been no less marked. When he had been but two years in the then frontier town of St. Louis he compiled, with rare accuracy and system, and published a digest of the laws then in force in the Territory of Missouri, which still bears his name, and has always held a position of unquestioned authority. In 1818 he was a member of the Territorial Legislature of Missouri. In 1821 he was elected a representative in the First Legislature of this State, and on taking his seat was chosen Speaker of the House. He held the same position with distinguished ability in the Second and Third General Assemblies. Upon that which convened in 1824-25 devolved the difficult duty of making the first revision of the statute law of Missouri. He had been by the

preceding Legislature appointed one of the revisers, and he thus had an opportunity to do much in moulding the legislation of a young State, where few men could be found having the peculiar qualities which he possessed in a very eminent degree for such a work. Again in 1834-35 he participated laboriously and with great ability in the enactment of the second revision of the statutes. His last legislative service was in the session of 1838-39. In 1843 he was again appointed one of the revisers of the statutes, but declined the appointment. Throughout his legislative career he was distinguished for comprehensive views, for independent and accurate judgment, for clear perception of what was required in general legislation, and for a remarkable adaptation to the laborious and ill-understood work of framing laws.

"In his service as senator of the United States in 1851 he exhibited the same mental qualities which had distinguished him at home. His mind was logical, acute, fertile, elastic, analytical, and vigorous. His legal learning was varied and profound, and he wielded it with a skill and power equaled by few. His forensic efforts, whether before a court or a jury, were always impressive, and often exhibited the highest order of ability."

HENRY S. GEYER.

The members of the bar voted to wear mourning for the usual period, and the resolutions were presented to the Supreme Court and to the inferior courts.

It is impossible within the limits of this brief sketch to fully describe the unique legal position of Henry S. Geyer. In the Supreme Court of the United States he came into contact with such men as Webster, Ewing, and Reverdy Johnson, who entertained the highest respect for his ability. Politically, he was a firm Whig, and an ardent admirer of Henry

Clay. When that party disappeared he returned to the Democratic ranks. When elected to the Senate (1851) it was as the successor of Thomas H. Benton. His greatest reputation as a criminal lawyer was gained in the trial of Darnes for the murder of Davis, publisher of a St. Louis paper, in 1840. After Darnes' acquittal, Mr. Geyer's profound argument, which occupied two days in its delivery, and turned upon the closest analysis of surgical evidence, was published in book form in Boston. Rufus Choate expressed the highest admiration for its ability. In one of his noted land cases, that of *Strother vs. Lucas*, William Wirt was his associate, and Chief Justice Marshall, who presided, afterwards expressed his as-

tonishment at Geyer's legal acumen. Indeed, the entire history of the times makes evident the fact that he was a formidable opponent whom few could safely encounter, and throws into strong relief the admirable singleness of purpose and devotion to any cause in which he is enlisted that marks the great lawyer. Many stories might be told of his sparkling, graphic sarcasm and pungency of retort, and he wielded a good controversial pen, writing many articles for the St. Louis journals of the day. His religious beliefs were decided, and he was a consistent member of the Episcopal Church. Personally he mingled but little with the people, being reserved and not intimate with any one, but he showed a great fondness for practical joking, and there are some capital stories of his success in that line. Some time in 1816 he exchanged shots with Capt. Kennerly, and the latter was wounded in the leg. The exact cause of the duel has never been understood, but the difficulty was amicably settled, and they continued friends.

Benjamin B. Dayton was for years a partner of Henry S. Geyer. He was born in New York State in 1817, graduated at Union College in 1838, reached St. Louis, and at first was with Ferdinand W. Risk. About 1844 he married Miss Mary Jennings, of Philadelphia. In 1855 the dreadful Gasconade bridge disaster occasioned his death. He was a hard student, and a man of most exemplary habits. The firm of Geyer & Dayton did a large business in land cases.

One of the first judges of Missouri was Mathias McGirk, a contemporary of the Bartons. His colleagues were J. D. Cook and John R. Jones. They were appointed in 1820. Judge McGirk was born in 1790, in Tennessee, and reached St. Louis about 1814. In 1827 he removed to Montgomery County, and there married a Miss Talbot. In 1816 he was author of the bill to introduce the common law into Missouri, and he framed other important bills while a member of the Legislature. In 1841 he retired from the bench, devoting himself to agriculture. He was not a brilliant jurist, but had practical sense, a retentive memory, and an admirable style, both as conversationalist and writer. In politics he was a Whig. Little information is obtainable about Andrew and Isaac McGirk, relatives of the preceding, who practiced law in St. Louis. Isaac died in 1830. John D. Cook, Judge McGirk's associate on the bench, was a member of the State Constitutional Convention, and a jurist of excellence. When Judge R. S. Thomas¹

was removed from the Circuit Court, Judge Cook was appointed, preferring that place. He presided there many years, and was a noted *nisi prius* judge. He had great ability, but was too indolent to take a commanding place. Judge Cook was always a pleasant companion, and widely known for his benevolence and friendliness to younger members of the profession.

Another of the noted lawyers of the formative era in Missouri was Judge Rufus Pettibone, who was born in Litchfield, Conn., in May, 1784, and graduated at Williams College in 1805, taking high honors. Adopting the legal profession, he studied in Central New York, and afterwards in Albany, where he was admitted in 1808. In 1812, Oneida County elected him to represent it in the Legislature, and the next year he married Louise Esther De Russey. Five years later he removed to St. Louis, and on his arrival was offered and accepted a partnership with Col. Rufus Easton, then one of the leaders of the bar. Even at this early date numbers of persons in the Territory were opposed to slavery, and a ticket was by them presented when the admission question became prominent. J. B. C. Lucas, Rufus Easton, Rufus Pettibone, Robert Simpson, and Caleb Bowles were on that ticket, though well aware they were in a hopeless minority. When the State government was organized Rufus Pettibone was appointed judge of the Second Circuit, embracing the counties of Gasconade, Callaway, Montgomery, St. Charles, Lincoln, Pike, and Ralls. In 1823 he was appointed to the Supreme Bench. In the winter of 1824-25, in conjunction with Henry S. Geyer, he also revised the State laws, and prepared the same for legislative enactment. On the last day of July, 1825, in the fullness of his powers, he died, and the State lost one of its most valued citizens. Mr. Geyer announced his death in the St. Louis Circuit Court, and it, as well as the Supreme Court, adjourned with the usual marks of respect.

Now and then, in every profession, there are lives that tradition sets apart and crowns with peculiar sacredness, seemingly without definite reason, except that they were brief, brilliant, and tragical. Such a life was that of Horatio Cozens, whom the common opinion of his time ranked as a phenomenon of rapid and fervent eloquence. But little is known of his boyhood, birthplace, and education. After the admission of Missouri he came to that State from Virginia, and in a few years built up a large and lucra-

¹ This Richard S. Thomas reached Upper Louisiana in 1815. In 1817 he was appointed a circuit or district judge, but in 1824 was impeached and removed. He is said to have been

disagreeable and tyrannical, and to have become very intemperate. Some years after his removal from office he was thrown from a horse and killed.

tive practice. In July, 1826, being then but about twenty-six years of age, he was stabbed and instantly killed by French Strother, a dissipated young lawyer, with whose uncle Cozens had had some political controversy. It was a brutal, unprovoked murder, and caused the wildest excitement. The murderer broke jail a few days later, fled to Mexico, and died of *delirium tremens*. Mr. Cozens left a young wife and two children. The members of the bar met a few days later, Thomas H. Benton being in the chair, and Henry S. Geyer secretary. Resolutions expressing the deepest regret were adopted, and crape was worn for thirty days. At a much later day the famous Edward Bates was wont to express unbounded admiration for Cozens, and call him the worthy rival of Geyer himself. The memory of the gifted, attractive orator is forever linked with the story of his early, deplorable death.

Incidentally, heretofore, we have mentioned the name of Edward Bates. His career covered the most eventful period of Missouri's history, and no member of the legal fraternity stood higher or was more esteemed. He was widely known and loved, perhaps more so than any of his contemporaries, for all unite in admiration of the gentleness, kindness, and perpetual, overflowing cheerfulness that made him a universal favorite. Edward Bates was born on a farm in

Goochland County, Va., Sept. 4, 1793, and received an academic education, but, being the youngest of twelve children, and his father dying, his scholastic training was defective through lack of means. His brother Fleming, clerk of Northumberland County, aided him as far as possible. He was offered a position as midshipman in the United States navy, which he declined, but while still a lad he served as a private in the war of 1812. It is also on record that his family had been Quakers, but his father disobeyed their doctrines and joined the Revolutionary patriots.¹

¹ It was related of the father of Mr. Bates that when Lord Cornwallis offered him British protection, he carefully folded up the papers and returned them, disdaining to accept the proffered advantage.

In 1814 young Bates came to St. Louis, without a profession, and with very small means. His elder brother, Frederick Bates, was then living in St. Louis, being secretary of the Territory of Missouri, to which position he had been appointed by President Jefferson, after holding a United States judgeship in Michigan, in order to thwart and counteract the supposed schemes of Gen. Wilkinson, then Governor, in aid of Aaron Burr's designs. He was also first recorder of land titles when the office was created in 1806, and secretary of the first board of land commissioners in 1807. After the formation of the State government Frederick Bates was elected the second Governor of the State, and died in office in 1825.

EDWARD BATES.

The first thing Edward Bates did was to enter Col. Rufus Easton's law-office, where he remained until admitted to practice in 1816. In 1818 he was appointed district attorney of the Territorial government, and commissioned by Governor Clark. He was chosen a delegate to the Constitutional Convention in 1820, attorney-general the same year, member of the Legislature in 1822, United States attorney for Missouri district in 1824, and was sent to Congress in 1827 over John Scott, but was defeated for re-election by Spencer Pettis. After returning from Congress he was elected a member of the Legislature from St. Charles. Immediately

after this Mr. Bates removed to St. Charles, and located on a farm in the county of St. Louis, on Dardenne Prairie. He still had an extensive and profitable practice, but used to say that it took all the money that Lawyer Bates could make to support Farmer Bates. He resumed practice in St. Louis in 1842, until he was elected judge of the Land Court by popular vote, a position which he filled with great ability.

In 1850 he was offered the secretaryship of war in Fillmore's cabinet, but declined it; was elected presiding officer of the great National Whig Convention at Baltimore in 1856; was honored by Harvard with a degree in 1858; and was chosen Attorney-General in Lincoln's first cabinet. In these various capacities his useful life broadened into many channels. Ill

health caused him to leave the cabinet, and he died in March, 1869. It would be difficult to find a more rounded, complete, satisfactory record of public service. During all these years he was indefatigable in his study of law and literature, and had the conduct of many important cases.¹

¹ Mr. Bates' labors in behalf of the public schools of St. Louis are especially worthy of mention, and are thus described by Col. T. T. Gantt in an address before the United States Court on the occasion of Mr. Bates' death:

"The first cases in the trial of which he became conspicuous in the eyes of the younger members of the bar, unfamiliar except by tradition with his merits as a barrister, were those which tested the title of the Board of President and Directors of the St. Louis Public Schools to lots of ground in the township of St. Louis equal in area to one-twentieth of all the land included in a survey comprising the town, its common fields and common. The litigation thus inaugurated was, from every point of view, most interesting, not only by reason of the immense value of the endowment given to the public schools of St. Louis by the act of 1812, but on account of the difficulty of the questions to be decided before the title could be settled; the subject engaged the attention of the profession as scarcely can be predicated of any other head of titles to land. The first decision on the title of the schools was given by our Supreme Court in 1843. Even at this day the school corporation is still engaged in the assertion of a doubtful claim to some lands in this city. But it is believed that all matters of substance in this connection were determined by the court of last resort in 1861. With the earlier, more difficult, and precarious strife of the first cases Mr. Bates was intimately connected. He was the leader of the counsel for the schools, and obtained from a court, one of the judges of which was irreclaimably hostile to the pretensions of that corporation, the decision which, after long dispute, has at length become the accepted law of the land. I shall not, I think, as long as I remember anything, forget the impression made upon me by the argument which Mr. Bates made before Judge Engle, then presiding in the Court of Common Pleas, upon the general merits of the school title to lots of ground in St. Louis under the act of 1812 and the acts supplementary to it. The theme was a vast one. The discussion was new to the judge before whom it was carried on, for, though a man of great learning and ability, he had been trained in a school which had not familiarized him with our peculiar system of land titles, and there was, especially at that day, a complexity about these which few, if any, were able to master who had not an acquaintance with our local history, impossible of attainment except after years of residence among us. The immense advantage of this perfect acquaintance was, of course, enjoyed by Mr. Bates, who had almost been an eye-witness of the most important events involved, and the matchless order in which he grouped these events and traced their bearing upon the case at the bar made an abiding impression upon a young lawyer who felt keenly his own want of the peculiar knowledge which enabled Mr. Bates to shine so brightly. After that argument it was my privilege to see and hear him over and over again, both at the bar of the Circuit and the Supreme Courts, sometimes exhibiting the tact which enabled him to extract from even unwilling witnesses the facts which it concerned his client to have in evidence, sometimes dealing, with an ability altogether his own, with a mass of conflicting testimony in his appeal to a jury, and sometimes wringing from a reluctant court, by irresistible argument, a reconsideration and overruling of a hasty decision."

In politics he was in early life a Jeffersonian Republican; in 1825 he supported Adams; afterwards he was a strong Whig, but when that party perished did not join any other, though in the Republican Convention of 1860 he was strongly supported for the Presidency. When the civil war broke out he was intensely loyal, and advocated the most decisive measures for its suppression. Brought up as a member of the Society of Friends, he adhered to many of their doctrines, but joined the Presbyterian Church in 1842, and was for years a presiding elder.

In 1823 he had married Miss Julia D. Coalter, of South Carolina, one of five sisters, all of whom were united in marriage to men of note. One became the wife of William C. Preston, of South Carolina; another of Chancellor Harper, a distinguished judge of the same State; and a third married Dr. Means, a wealthy South Carolinian, whose brother was Governor. One of them, in 1827, became the wife of Hamilton R. Gamble, afterwards provisional Governor of Missouri in war times. It is of this lady that several biographers relate a romantic story, stating that Edward Bates fell deeply in love with her and proposed, but was refused. He continued his suit, and her high regard for him then led her to disclose to him the fact that she loved Hamilton R. Gamble, but would never marry him because of his dissipated habits. With characteristic magnanimity Bates then sought Gamble, pleaded with him, stood by him, got him to sign the pledge and keep it, and in brief reformed him, so that he afterwards, in 1827, married Miss Coalter. If the story is not true it ought to be, for such devotion to duty and friendship was a marked trait of Edward Bates. At his death he left six sons and two daughters. He never sought wealth, and in fact owned hardly any property. Though he held so many public offices, he was always poorer when he left than when he entered them; though he earned such large sums in his practice, the demands of charity and friendship kept equal pace with his income.

As a lawyer, Judge Bates was an earnest, practical reasoner, and a hard student upon his cases. The finer graces of oratory were his, and though Geyer, Easton, Gamble, and Joshua Barton probably possessed a more strictly legal analysis, no lawyer of his time was more persuasively eloquent. Some of his forensic efforts may well be classed among the fairest blossoms of eloquence. In public life Mr. Bates was not a violent factionist, but he was a strong adherent of whatever cause he espoused. For many years he was a liberal contributor to the columns of the *Missouri Republican*, and his discussion of public questions always attracted and commanded attention from the

force and vigor of his writings, which were characterized by a fresh, original, and captivating style. He despised the arts of the mere politician; a demagogue found no toleration in his sight. Indeed, Mr. Bates, by his great abilities, his profound reflection, his comprehensive views of political economy, had entitled himself to be regarded as a just and eminent statesman. In his youth he published a violent denunciatory pamphlet against Col. Benton, but in after-life expressed his regret. His old friend, John F. Darby, says, "Mr. Bates won great distinction by presiding at a meeting held at Chicago for commercial and internal improvement purposes. Men of genius and cultivated talents were there, and they were astonished to find a man of such splendid eloquence and elegant elocution and force of delivery among Western delegates. It is said, so thrilling was his address, that the reporters themselves, pausing for a moment, were so charmed that they forgot to take down his words." He presided over the national Whig Convention in the year that President Buchanan was nominated by the Democracy. He then returned home and followed his professional pursuits, and in a measure retired from politics, but he was never withdrawn so far as to cease to write occasional essays and make public speeches. Though always in a popular minority, he did more during the Jackson days to shape affairs than any other man in Missouri. He was small in figure, wore the customary broadcloth coat with gold buttons, and ruffled shirt, and seemed a notable person in any assemblage. With all his modesty, tact, and suavity, there were times, in the heat of party conflict, when he was threatened with violence, but his courage never faltered, and in every instance he quelled the rioters.

Mr. Bates never fought a duel, but when in Congress, when Missouri was still a Territory, he promptly resented a supposed slight to the constituency represented by him by challenging George McDuffie, the eminent Democratic orator and leader, of South Carolina, who was at that time chairman of the Committee of Ways and Means. "I see," said Bates, rising in his seat, "that the chair has not the will to protect Missouri from insult in my person; let the gentleman avow himself, and I will protect myself, sir." McDuffie rose and the challenge forthwith passed. The South Carolinian made handsome explanations, showing that he had no purpose of insulting Missouri or aggrieving Mr. Bates, but was simply giving effect to a parliamentary stratagem, and so the hostile meeting was avoided.

The action taken by the St. Louis bar on Mr. Bates' death evinced the greatest regard for his mem-

ory. Two meetings were held, and speeches were made by Col. James O. Broadhead, Samuel T. Glover, Judge S. M. Breckinridge, John F. Darby, and others. All were glowing eulogies, called forth by his long and splendid career; all dwelt with especial affection on his personal virtues. One speaker closed by saying, "He was a bold, brave, good man. In all relations of life it may be said of Mr. Bates that he performed his duty to his family, as a citizen, and to his God. It is well to record the fact that here was a man without advantages, without, as I am told, a classical education, without any adventitious aid, a mere youth seeking his fortune in the West, without pretensions, without assumption or arrogance, but by the native force of his intellect, and by an honest, conscientious, upright life, mounting up from the lowest to the highest round of the ladder of fame."

With all this evidence regarding the character and achievements of this great man, it is a pity that a record of his most famous speeches has not been kept. There was, for instance, the celebrated Montesquieu trial in 1850, one of the most dramatic and widely-known cases of modern times. Judge J. B. Colt presided. James R. Lackland and Uriel Wright represented the State, and Edward Bates, H. S. Geyer, Wilson Primm, and Charles Gibson the defense. The latter, in 1878, being then the only surviving counsel, contributed an account of the trial to the Missouri Historical Society.¹

¹ No event in the criminal annals of St. Louis ever created such an intense feeling in the community as the Montesquieu murder, or City Hotel tragedy, as it was popularly called. On the morning of Sunday, Oct. 28, 1849, two young French noblemen, Gonsalve and Raymond de Montesquieu, arrived in St. Louis and stopped at Barnum's City Hotel. They had come to this country the preceding June for recreation and pleasure, and had traveled leisurely westward, Chicago having been the last stopping-place. Gonsalve was about twenty-eight years old, and his brother was two years his junior. Both were liberally supplied with money. Among their effects were capacious wardrobes, a number of guns, and an extensive hunting equipment. They were assigned a room situated on a hall leading from a back piazza. Directly opposite, but in a room opening directly on the piazza, Albert Jones, H. M. Henderson, and Capt. Wm. Hubbell slept, and in another room, the window of which overlooked the piazza, were T. Kirby Barnum, nephew of the proprietor of the hotel, and Mr. Macomber, the steward.

Between eleven and twelve o'clock on the night of Monday, October 29th, while young Barnum and Macomber were preparing for bed, they were startled by a tapping on the window-pane, and the curtains being drawn aside they saw the two young Frenchmen on the piazza, one of them armed with a gun. Simultaneously with the discovery one of the Frenchmen fired, the contents mortally wounding Barnum and giving Macomber a flesh-wound on the wrist.

Aroused by the report of the gun, Jones, Henderson, and Hubbell opened the door of their room, and were immediately

A bronze statue has been erected to Edward Bates' memory in Forest Park, and the St. Louis Law Library has a fine portrait of this distinguished advocate. In his long life many persons afterwards noted were his

fired upon, Jones being instantly killed, and the others slightly wounded. The brothers returned to their room after the shooting, and were subsequently arrested there.

The homicide was at first regarded as a mystery, as the Montesquieus were perfectly sober, and had had no intercourse or communication whatever with the five men who were shot. At the time of their arrest the younger brother stated that Gonsalve had recently displayed symptoms of insanity, and the latter, exculpating his brother from all blame, said he was controlled by an irresistible inclination to kill two men; that he started out to do so, and that his brother merely followed to prevent a tragedy, but it was consummated before he (Raymond) could interfere.

After the tragedy public indignation ran so high that the jail was surrounded, and efforts were made to obtain possession of the Montesquieu brothers, but these were foiled by the jailer and sheriff, who, between seven and eight o'clock on the evening of the day succeeding the homicide, and while the crowd were assembling around the jail walls, deeming it unsafe to keep the prisoners longer in jail, quietly took them from their cells, conveyed them over the back wall, through the churchyard to Fifth Street, where cabs were in waiting, and conveyed them to Jefferson Barracks. On the way to the barracks the elder of the two seemed perfectly composed, and when they reached the gate took advantage of the sheriff's absence from the cab, sprang from his seat, and made a slight effort to escape. The younger appeared very much frightened, and used every precaution while being conducted from the jail to avoid recognition. Between one and two o'clock A.M. on the Friday following they were returned to the jail.

At the time of their arrest the statements of the Montesquieus as to their birth and social position in France were received with incredulity, it being generally believed that they were desperados, but a few weeks later their claims were substantiated, as the following extract from the *Missouri Republican* will show:

"The deplorable and almost incomprehensible event which produced so much sensation in the public mind a few weeks ago, and so much grief in several families, seems to have excited equal sensation and grief in France. The last steamer brings out from Mr. Rives, our minister at Paris, a letter of his own to Senator Benton, with many letters and official documents to himself and others to Senator Benton, Senator Cass, and the Hon. Mr. Winthrop, on the subject of this most melancholy occurrence. The letters make known the fact that the father of these young gentlemen (the late Count Montesquieu) labored under insanity, and destroyed his own life two years ago, and that their elder brother is now insane in Paris, and hence raise the irresistible inference that inherited insanity must have broken out in the two brothers at St. Louis. All the letters speak of them in the same terms as being remarkable for the amiability of their characters and their 'mild and inoffensive manners;' that they came to the United States for information and recreation, and especially to see the Western country, and with ample means and credit. They descend from a family in France not only of great historic fame, but distinguished for private virtues.

"The celebrated Duke de la Rochefoucauld-Liancourt, author of the 'Maxims,' is their grandfather on the mother's side; the present Duke de la Rochefoucauld writes in their behalf as

students, as will be seen hereafter. One of these was Col. Jo Davis, of Fayette, born in 1804, who died in 1871.

The Gamble brothers, Hamilton R. and Archibald, were distinguished for character and ability, and upon the first fell the burden of state in those "times that

nephews; the Gen. Oudinot, Duke of Reggio, and Gen. Arrigri, Duke of Padua, also in their behalf as relations. The Count Montesquieu himself belonged to the distinguished family of that name. Many Americans in Paris, among them Mr. William H. Aspinwall, of New York, also writes, and with all the deep feeling which the view of the agonized condition of the unhappy mother and relations so naturally inspires. These letters and official attestations have all been forwarded to St. Louis, to have their effect in explaining a transaction which seemed to be incomprehensible."

In the latter part of December, 1849, Lewis Borg, vice-consul of France at the port of New York, and Justin Paillaire, of Paris, arrived at St. Louis, M. Borg being commissioned to investigate the Montesquieu tragedy, and his companion being an intimate friend of the young men involved in the melancholy affair. The effect of the letters from abroad and the visit of Messrs. Borg and Paillaire was to change public sentiment in regard to the guilt and character of the accused, and it was not strange that in each of two trials the juries failed to agree upon a verdict. In the first trial the jury stood seven for acquitting and five for convicting Gonsalve, and eight for acquitting and four for convicting Raymond. In the case of Gonsalve the jury divided upon his insanity, and in the case of Raymond they divided upon the dying declaration of Barnum and Macomber's testimony as given before the coroner and recorder. Barnum and Macomber identified Raymond as the person who fired into their room, but the fact that at the time of the shooting Barnum and Macomber were in a lighted room, the defendants in the dark upon the piazza, and the alarm of the persons in the room when they saw a man approach the window with a gun in his hand, their hasty observation and precipitate retreat, the similarity in the appearance of the two brothers, the excitement of Barnum and Macomber at the time of recognition on the night of the occurrence, the fact that both were identified at different periods on that night as the "man" who shot, that but one gun, double-barreled, was discharged, and if both shot they would necessarily have had to use the same piece, that at the time of the arrest Raymond denied he had shot, and stated that his brother did it, that Gonsalve admitted he killed both men, and exonerated his brother, were all considered by the jury, and caused the division upon the conviction of Raymond.

This first trial occupied four weeks, and was concluded April 20, 1850. On the next trial, which took place two weeks later, the jury, after being out forty hours, also disagreed, the vote being nine for conviction and three for acquittal in the cases of both of the brothers.

A few weeks after the second trial the Governor pardoned Gonsalve on the ground of his insanity at the time of committing the murder, and shortly thereafter he pardoned the younger brother on the ground of "a general belief that he did not participate in the homicide whereof he stands indicted, and that a further prosecution of these indictments will not accomplish any of the objects of public justice, but will result only in renewed trouble and increased expense to the State." The brothers Montesquieu sailed for France from New York immediately after being set free. Gonsalve afterwards died a raving maniac.

tried men's souls" in the early period of the civil war. Their ancestry was of sturdy Virginian stock. The grandfather emigrated from Ireland in 1752, settling in Pennsylvania, but ten years later returned to Europe. His eldest son came back to America, fought in the Revolutionary war, and afterwards was Professor of Latin and Greek in the University of Pennsylvania. A younger son, Joseph, was the father of the subjects of our sketch. He, while in Ireland, married Anne Hamilton, and in 1784 reached America, settling in Winchester, Va., where seven children, of whom Hamilton Rowan was the youngest, were born and reared under the strictest religious influences, Joseph Gamble being ruling elder in the Presbyterian Church. Hamilton's birth occurred Nov. 29, 1798. His education was chiefly obtained at Hampden-Sidney College, and he was admitted to practice when he was but eighteen years of age; before he was twenty-one he had been licensed as a lawyer in three States, Virginia, Tennessee, and Missouri, arriving in Missouri in 1818. Some time previously his elder brother Archibald, a well-trained and successful young lawyer, had located in St. Louis, was then clerk of the Circuit Court, and appointed Hamilton as his deputy. At that time the entire territory north of the Missouri River was divided into two counties, Howard and St. Charles, and young Gamble soon removed to Old Franklin, the chief town of the former, where he was appointed prosecuting attorney for the circuit. His official duties required thousands of miles of travel on horseback each year, his only law-books being such as he could carry in his saddle-bags. Social temptations in this frontier life were natural, and for a time the brilliant attorney yielded to them, but, as related elsewhere, the influences of love and friendship caused a complete reform. In 1824 he was appointed by Governor Frederick Bates Secretary of State, and removed to St. Charles, the temporary seat of government. After the death of Governor Bates, which soon occurred, he settled in St. Louis, and his great success as a lawyer dates from that period. He at once became engaged in active competition for professional honors and rewards with such men as Benton, Geyer, the Bartons, Robert Wash, and others, and was fully their peer. Devoting his attention chiefly to land cases, he seldom addressed a jury, but was retained in all the important land suits, followed them to the Supreme Court, argued them in person, and became widely known as a jurist. He was slow of speech and not eloquent, but no man had greater capacity for clear, brief, and logical statement of facts and law. Herein lay his strength and his reputation.

In 1832-33 he aided to defend Judge Carr, then

under impeachment; in 1846 he was sent to the Legislature to assist in revising the laws, and his services were extremely useful. Five years later (in 1851) a place was vacant on the Supreme Bench of the State, and Mr. Gamble, though belonging to the Whig party, then hopelessly in the minority, was elected, receiving over forty thousand Democratic votes, and, to still further emphasize this tribute to his worth, his associates on the bench chose him as presiding judge. Ill health led to his resignation in 1855, after which he only appeared in a few important cases in the United States Supreme Court. His opinions, delivered while presiding judge, were noteworthy both in style and matter. About 1858, Governor Gamble removed to Philadelphia to educate his children, and was still there when the war-clouds began to gather. When the Legislature of Missouri passed an act to call together a "State Convention," Judge Gamble hastened home, found anarchy impending and dissension everywhere, addressed a meeting of the citizens at the court-house the very next evening after his arrival, and proclaimed his unswerving fidelity to the Union. It is impossible to estimate the value of this one man's words at such a crisis; they rallied the Union men and strengthened their cause immeasurably. When the convention met the Unionists had a majority. Judge Gamble took a prominent part in the deliberations, and was unanimously chosen provisional Governor after the flight of Governor Claiborne Jackson. This was in July, 1861. The eyes of all Union men turned to Hamilton Rowan Gamble as their surest and wisest counselor. He shrank from the difficult task, and accepted it only when convinced that it was his duty. This period properly belongs to the political history of the State. It is sufficient to say that Governor Gamble won fitting place in the list of "war Governors."

In 1827, Mr. Gamble was married at Columbia, S. C., to Miss Caroline J. Coalter, sister of Mrs. Edward Bates. He died on Jan. 31, 1864, worn out by arduous duties and anxiety. The city buildings, stores, and many residences of St. Louis were draped in mourning, and business was suspended. The funeral cortege was over a mile long. Rev. Dr. Brooks delivered the sermon, and pulpit and the press united in expressing the general sorrow. The St. Louis bar assembled *en masse*, paid every possible tribute (Thomas T. Gantt pronounced the eulogy), and went in a body to his funeral. His full-length portrait hangs in the Mercantile Library. Lieutenant-Governor Willard P. Hall assumed the duties of chief magistrate, and proved faithful and efficient. The *Missouri Republican* said editorially, after

Governor Gamble's death, "A purer patriot, one more devoted to his country, a more sincere man, a better Christian has rarely taken his departure from among us. If he had not possessed these attributes it is unlikely that he would have endured the fiery ordeal with which embittered political malice pursued him to the last hour of his life, for he was not a politician. But he took upon himself the cares of State and the drudgery of office at a time when he might well be excused from it, and devoted all his energies, his life, to the redemption of the State from the troubles which encompassed it."

Governor Gamble's brother Archibald was born in Winchester, Frederick Co., Va., in 1791 or 1792, and came to St. Louis in 1816. He was a lawyer; served for a year as clerk of the St. Louis Bank, then as deputy clerk under Clerk Marie P. Ledue in Judge David Barton's court. Governor William Clark appointed him clerk of Circuit Court and *ex officio* recorder of deeds of St. Louis County, an office he held for eighteen years, when J. F. Ruland succeeded him. In 1822 he married Louisa, third daughter of Col. Rufus Easton. He was long the efficient and active legal agent of the public schools. When Lafayette visited St. Louis in 1825, he was one of the aldermen, and aided in the reception. In 1836 he was a leading spirit in the railroad building movement. At one time he had charge of the St. Louis post-office, and was secretary of the Barton Convention in June, 1831. During the last twenty years of his life, which closed in September, 1866, he lived in comparative retirement, possessing abundant means. Like his brother, he was a strict and worthy member of the Presbyterian Church. When in the full vigor of his manhood no person was more closely identified with business enterprises and the growth of the community.

Hon. John F. Darby, who flourished so long and so genially, might be treated as the contemporary of almost any group of lawyers in St. Louis. His period of greatest activity, however, was from 1830 to 1842. Mr. Darby's name occurs in numerous places in this chapter, and a full biography of him will be found in the record of municipal history, during his administration as mayor of St. Louis.

Numbers of distinguished lawyers have been school-teachers in their early career. The comparative leisure afforded in small country schools makes this occupation a favorite stepping-stone from college to the bar. Even now the schools of the West contain many bright, ambitious young teachers who are spending their evenings and Saturdays in reading law, and who may be heard from hereafter as noted jurists. The Missouri bar has had several shining lights whose

earlier manhood was passed in pedagogic work. One of these was George Tompkins, for many years the presiding justice of the Supreme Court. Born in Caroline County, Va., in March, 1780, of sturdy Saxon stock, and in a family which was one of the earliest to settle in that region, he seems to have lacked a college training, but was a great reader and a hard student. About 1801 or 1802 he left Virginia with but one hundred dollars, and removed to Kentucky, teaching school, and reading such books as he could obtain. He remained six or seven years in this State, most of the time in Jefferson County. Then he came to St. Louis, and was the second teacher in the public school, having succeeded a man named Ratchford. The school was in a room on Market Street, between Second and Third Streets. The population of the town was not over fourteen hundred, chiefly Creole French, there being only two American families there. He still read law in his leisure hours, and made diligent use of the few books obtainable. To train himself and others in the art and practice of public speaking he organized a debating society, the first on record west of the Mississippi. Joshua and David Barton, Edward Bates, Maj. O'Fallon, and other young men who afterwards did good public service participated in the discussions. It is a pity that a full report of these meetings has not been preserved. In school and in debating club young Mr. Tompkins exercised influence over many who afterwards became leading citizens of the metropolis. About 1812 or thereabouts his father's death left him heir to a share of the ancestral estate, but there were thirteen children, George being the youngest but one, and he refused to receive any portion of it. In the expressive phrase of the West, he could easily "paddle his own canoe."

The law career of Mr. Tompkins began in 1816, when he was admitted and settled in Old Franklin, Howard Co. In those days young attorneys found that their surest road to fame lay through politics. They could in no other way form so wide a circle of friends nor better display their latent capacities. We find that Lawyer Tompkins was twice sent to the Territorial Legislature, then meeting at St. Charles. In 1824 he was chosen judge of the Supreme Court, and remained in that important office until he passed the constitutional limit of age (sixty-five years), and was therefore forced to resign. Two years later, in April, 1846, aged sixty-seven, he died on his fine farm near Jefferson City. No incompetent or weak person could so long have held such a position. Judge Tompkins was eminent for ability, integrity, and close legal research, as all his decisions evince. Judge W. V. N.

Bay, late of the Supreme Court of Missouri, in his able book upon the bench and bar, says that Judge Tompkins was too great a stickler for precedent, and in the case of *Lecompte vs. Seargent* held that "an executor or administrator is for every purpose owner of the moneys of his testator or intestate which have come into his hands;" in other words, such funds are liable for the administrator's personal debts. The judge was misled by a reference in an old English digest he carried in his saddle-bags. This will serve to show some of the difficulties for lack of books under which the lawyers and judges of an early day labored. At a later date Judge Bay himself reversed this decision. There are many amusing stories afloat about Judge Tompkins; he was a whimsical, original genius, eccentric, kindly, and prone to indulge in a dry humor all his own. Sometimes it took the form of sarcasm, as when a backwoods lawyer named Mendell, attired in the most slovenly manner, was arguing a case before him. Just before the usual adjournment hour the judge said, "Mr. Mendell, it is impossible for this court to see any law through as dirty a shirt as you have on. We will adjourn to give you an opportunity to change your linen." Sometimes, however, the judge received back as good as he gave, as in a tilt with Peyton R. Hayden, one of the finest lawyers in Central Missouri. He was arguing a case in the Supreme Court, and Judge Tompkins, becoming tired, said, "Mr. Hayden, why do you spend so much time on the weak points of your case, to the exclusion of the more important ones?" Hayden was equal to the emergency, and replied on the instant that it was because he had found during his long practice before that court that the weak points won fully as often as the strong ones.

Like many professional men, the judge was an ardent lover of horticulture. His orchards were noted for the fine fruit they bore, and he became quite an authority on the subject. It is often the case that men's thoughts turn as old age approaches to quiet scenes and rural pursuits. They cannot quite take off the armor, but they hunger for the garden, the orchard, the wide landscape, the rolling pastures, the glades and forests and well-tilled fields. Almost everywhere the leaders of the bar have owned and improved rural estates, introduced thoroughbred stock, and aided largely in the advancement of agriculture. Bates, McGirk, and Scott all owned fine farms. A number of other instances might be given, but two must suffice. In 1868, May 10th, the *St. Louis Republican* noticed the death of Adolphe Renard, aged sixty-five, for many years United States recorder of land titles, and afterwards in the surveyor-general's office, but

during the later years of his life engaged in horticulture and grape culture near St. Louis. In 1846 the same journal speaks of the death of Col. Justus Post, at one time judge of the St. Louis County Court, afterwards in the Missouri Senate, and still later holder of a staff appointment in the Mexican war. A native of Vermont, he came to Missouri in 1816, practiced law, and owned a large farm in St. Louis County. In 1831 he removed to Pulaski County, Ill., where he died on the fine farm which he owned there.

Another of the representative lawyers of Southern Missouri, who is nevertheless entitled to notice here, was Gen. Nathaniel W. Watkins, born in Kentucky in 1796, and a half-brother of Henry Clay. Reaching St. Louis in 1820, he soon established himself at Jackson, Cape Girardeau Co., served several terms in the State Legislature, and was speaker of the Sixteenth General Assembly. He also served as a member of the St. Louis Convention of 1861. During these years he was a noted horticulturist, and divided his time between his office and farm. His greatest successes were before juries, as he was a forcible speaker and a most adroit manager. He died March 20, 1875.

Returning to the characteristic men of the early St. Louis bar, we find Nathaniel Beverly Tucker, who was born at Mattox, Chesterfield Co., Va., on Sept. 6, 1784. He was the third son of J. St. George Tucker, from the island of Bermuda, who settled in Virginia previous to the Revolutionary war, and married in the year 1778 the widow of John Randolph. Mr. and Mrs. Randolph were the parents of the celebrated John Randolph of Roanoke, who was thus the half-brother of N. B. Tucker.

Mr. Tucker came to St. Louis in 1815, at the age of thirty-one years, to practice his profession of the law, and was appointed by Frederick Bates, the secretary, and then acting Governor, of the Territory, judge of the Northern Circuit, and he held the first term of his court at St. Louis on Monday, Feb. 9, 1818. This position he held for about five years, except during a brief absence, and was succeeded on the bench by Judge Alexander Stuart in June, 1823. He lived for a time in Saline County, about 1831-32. After a residence in Missouri for some eighteen years or so he returned to Virginia, about 1833 or 1834, to accept the chair of law professor in William and Mary College at Williamsburg, James City Co., which position he filled about eighteen years until his death at Winchester, Va., Aug. 26, 1851, at the age of sixty-seven years.

Alexander Steuart, from Virginia, practiced law for a short time at Kaskaskia about 1806 or 1807, and then came over to St. Louis.

He was appointed by Governor McNair judge of the Circuit Court to succeed Judge Tucker, and held the first term of his court in St. Louis, June 2, 1823, which place he filled for three years, being succeeded on the bench by Judge W. C. Carr. He died on his farm in the upper part of the county near Bellefontaine.

Here, too, belongs the name of Robert Wash. He was born in Virginia, Nov. 29, 1790, was well educated, graduating from college at the age of eighteen, pursued a wide range of legal studies, and after the war of 1812 removed to St. Louis, where he began the practice of law. He was United States district attorney during Monroe's administration, afterwards a member of the City Council, and became a judge of the Supreme Court shortly after the State government was organized. His death occurred on the last day of November, 1856. In May, 1837, he had resigned his seat on the Supreme Court. Judicious real estate investments secured him a large fortune. He was very fond of the chase, and always kept a pack of hounds. At the usual bar meeting after his death the Hon. Edward Bates presided, and in the course of his remarks said,—

"Judge Wash was one of the oldest members of the St. Louis bar, much older, as a member of the bar, than any man that any one of you have seen in practice here. When I came to this place, in the spring of the year 1814, Judge Wash was then one of the junior members of the bar. He was a native of Virginia, from the county of Louisa. He was an educated man, having all the benefits of scholastic instruction, being of the ancient college of William and Mary, and having perfected in that honorable institution by teaching in the capacity of a college tutor for some time. He then studied law, and looked westward. When I came here I found him in a respectable and honorable position, a rising member of the St. Louis bar, having but some four his seniors at that day. I presume that if he had devoted himself exclusively to the profession that he would have risen to much higher rank and have attained even a greater and better fame than he did. He served under Gen. Howard as an aide-de-camp in his expedition from St. Louis to Peoria, in the Indian war, and he served for years after peace was practically restored as secretary to the commissioners. He rose also in his profession, for he has had the honor of holding a seat for some time on the Supreme Bench of the State. His decisions are good, though he did not, perhaps, rank higher than his colleagues."

Hon. J. F. Darby spoke of the late judge as one of those who signed his certificate in 1827. The chair appointed Hon. J. F. Darby, Willis L. Williams, Charles E. Whittelsey, Philip C. Morehead, and Albert Todd to draft appropriate resolutions, which were then adopted. H. R. Gamble, John M. Krum, Judge Ryland, and Willis L. Williams were appointed to act as pall-bearers.

Judge Wash was twice married. His first wife, Mrs. Berry, daughter of Maj. William Christy, bore him a daughter, afterwards wife of G. W. Goode, of

the St. Louis bar. His second wife, Eliza, was Col. Taylor's daughter, and she bore him four sons and several daughters.

George W. Goode, born in Virginia in 1815, finely educated and associated in law with Hon. James A. Seddon at Richmond, settled in St. Louis, in partnership with Tully R. Cormick. His fees in the land case of *Bissell vs. Penrose* were over sixty thousand dollars. He died from softening of the brain in 1863, and had some years previously been compelled to give up his profession and retire to a farm. The litigant here referred to seems to have been James Howard Penrose, born in Philadelphia, a son of Clement B. Penrose, one of the board of commissioners appointed by President Jefferson in 1806 to adjudicate the titles to the lands granted by the Spanish government, and who removed to St. Louis with his family the same year, or else an older brother of James H., Charles Biddle Penrose, who returned to Philadelphia and became a prominent politician. James Howard Penrose also left St. Louis for parts unknown, and died unmarried.

About 1817, Josiah Spalding graduated from Yale with the highest honors of his class, and in the winter of 1819–20 settled at St. Louis. The two years intervening had been spent in studying law, during which he supported himself as a tutor in Columbia College, New York. The bar of St. Louis was not an easy one for a young man to enter, for its standards were high and its requirements extensive. Mr. Spalding began a series of articles in the city papers, whose literary merit attracted attention to him. The *Republican* of May 15, 1852, a few days after his death, thus drew attention to his editorial career: "In 1822, when the Constitution of the State was disregarded, and the real interests of the people jeopardized by the enactment of the 'Loan Office' and 'Stay Laws,' Mr. Spalding became the editor of the *Missouri Republican*, which then passed into the hands of Mr. Edward Charless, and he continued to occupy that position until the good sense of the people and the wisdom and integrity of the judges combined to put down the whole series of mischievous measures. When this was accomplished Mr. Spalding ceased to have any control of the paper as editor, and after that time wrote little for political or other journals."

On the occasion of his death the members of the bar met and passed resolutions of regret. The speakers all referred to the high moral character of the deceased. He was a consistent Christian and very benevolent, devoted to his family, and almost idolized by them. As a lawyer, he was profuse in authorities, and his briefs always attracted attention. He was

not an orator, but few men were equally regarded as an adviser when important interests were involved. One of his characteristics was an unquenchable optimism. Most of his cases were of a commercial nature, though he did not make a specialty of that department. Judge Bay calls attention to the case of Hamilton and Treat, judges, *vs.* St. Louis County Court, which was tried in 1851; the point involved being a constitutional question as to the legality of a legislative act requiring the payment of additional compensation to judges of certain courts out of the county treasury. The case went to the Supreme Court, and Messrs. Spalding and Field were for the relators, and Messrs. Bates and Gantt for the county court. The brief filed by Mr. Spalding is considered a choice example of his fine powers of research.

One of the eminent jurists and pleaders of Central Missouri was Abiel Leonard, born at Windsor, Vt., in May, 1797.¹ He spent three years at Dartmouth College, injured his sight by hard study, and left before graduation. His law studies began at Whiteboro', N. Y., in 1816; in 1818 he was admitted, and the next year floated down the Ohio in a skiff, and paddled up the river to St. Louis. Old Franklin then had about eighteen hundred inhabitants, and was thought the best place for a young lawyer, and so Leonard turned his footsteps thither, but his funds gave out, and he taught a country school for six months. He afterwards practiced law at Boonville, Old Franklin, and New Franklin, but his eyes again failed, and for some time he employed a person to read to him. He soon moved to Fayette, the county-seat of Howard, began to take high rank in his profession, and measured steel with the best lawyers of the State.

In 1823 he became State attorney for his judicial district, filling out H. R. Gamble's unexpired term. Judge Bay, from whose valuable work these particulars are obtained, says that the only law partner Mr. Leonard ever had was Gen. S. M. Bay, and this continued until the latter removed to St. Louis. Some time about 1820, Mr. Leonard had a personal difficulty with Maj. Berry, who, under some pretense,

cowhided him and was challenged. In the duel which followed Berry was killed. Mr. Leonard was debarred and disfranchised, but public opinion justified him, and the next Legislature restored him to citizenship. In 1830 he married Miss Jeannette Reeves, of Kentucky. In 1834 he assisted to revise the Constitution. When Governor Gamble resigned from the supreme bench, Judge Leonard took his place, and rendered decisions which compare well with the best of his time. His death occurred March 28, 1863. One of his warmest personal friends and associates was Peyton R. Hayden, of Boonville, Cooper Co., whom he met for the first time in 1819 at a small wayside tavern. The acquaintanceship thus begun grew year by year till Mr. Hayden's death in 1855. This gentleman was born in Kentucky, at Paris, Bourbon Co., in 1796, came to Missouri in 1817, taught school a year, and was admitted to the bar in 1819. Cooper County then had a frontier population of about seven thousand. David Todd was judge of the Circuit Court, and no less than six of the lawyers who practiced there afterwards sat in the Supreme Court.

Judge John F. Ryland, afterwards of the Lexington bar, belonged to this circuit, and was a familiar figure in early days in St. Louis, making frequent visits to that city. He used to say that once in 1825 he was offered forty arpens of land now in the heart of the city, and worth millions of dollars, in trade for the horse he was riding. The judge was of Virginian birth. In 1809, when he was twelve years of age, his father moved to Kentucky. He attended Forest Hill Academy, afterwards opened a successful private school, read law with Judge Hardin, obtained a license, and removed to Missouri in 1819. From 1848 to 1857 he was a judge of the Supreme Court. His death occurred in 1873, and was deeply lamented throughout the State. Three of his sons became lawyers. He was an old school Presbyterian. For two years he held the Grand Mastership of the Missouri Masonic fraternity.

Still another of this noted Franklin Circuit was Charles French, born in New Hampshire in 1797, where he studied law. Coming to Missouri in 1817 or thereabouts, he obtained his license. He was well read, and a first-rate special pleader. About 1839 he settled in Lexington, and about 1862, attacked by melancholia and mental derangement, he took his own life.

One of the marked characters of early St. Louis was Judge Frederick Hyatt, of the county court, afterwards for many years a legislator, and as such taking active part in the most exciting political events.

¹ Judge Leonard's grandfather, Rev. Abiel Leonard, graduated at Harvard, and preached at Woodstock, Conn. He wished to enter the army as chaplain when the Revolution broke out, but his church would not consent. The brave and persistent pastor then visited Washington's Cambridge camp, and procured a joint letter from Gens. Putnam and Washington (March 24, 1776), begging the "congregation of Woodstock to cheerfully give up to the public a gentleman so very useful," which they did without more ado. Nathaniel Leonard, his son, and Judge Leonard's father, was born in this ancient town in 1768. Serving in the war of 1812, he was commander of Fort Niagara when the British took that place.

Born in Madison County, Ky., in 1790, and enjoying only common school facilities, he came to Missouri in 1815 or thereabouts, and became engaged in flat-boating on the river. He settled in St. Ferdinand township, St. Louis Co., about 1819, and was one of the first to cultivate the soil in that garden-spot, the beautiful Florissant valley, now so blooming with flowers, overflowing with abundant crops, crowded with homes of wealth and refinement. He had not wasted his time. Reading and study gave him power among men, and his associates in those earlier years of the century were among the best of the region roundabout. He was the friend and companion of the Chouteaus, the Leducs, the Chauvins, the Prattes, the Bissells, the Grahams, the Stuarts, and the Mullanphys. Barton, Bates, Gamble, Geycr, Cozens, and Col. O'Fallon were also among his intimates, not only at this time, but later in the State Legislature. As a farmer, he realized his duties to the community, taking active part in neighborhood improvements, roads, bridges, school-houses, churches. Governor Alexander McNair appointed him justice of the peace in St. Ferdinand township. This was in 1822 or 1823. He afterwards became collector of revenues and taxes for St. Louis County, and still later judge of the county court, performing all these duties efficiently. While judge, the courts all being held in a dilapidated old building on the southwest corner of Second and Walnut, he took steps to build a court-house on the present Court-House Square, which at that time was vacant, uninclosed, and unoccupied save by a public whipping-post, on which malefactors, both male and female, were publicly whipped, receiving generally thirty-nine lashes on their bare backs, the sheriff in every instance being sworn to lay on the lashes to the best of his ability, without "fear, favor, or affection." Judge Hyatt, with the assistance of the other two judges, removed that obnoxious emblem of the administration of justice, and had the contractors, Laveille & Morton, erect what was then considered not only the finest court-house, but also the finest building in the State, the predecessor of the present edifice. Judge Hyatt afterwards, as a legislator, helped to change the law from stripes, as a relic of barbarism unworthy of a highly-cultivated Christian people, to the present penitentiary system. In 1828 he ran for county sheriff, but was defeated by Dr. Robert Simpson. Judge Hyatt's character was never better shown than in the turmoil which followed the Constitutional Convention, whose work was adopted by the people June 12, 1820. For fourteen months the State was kept out of the Union. It was one of the great premonitory struggles on the

slavery issue, and the battle-ground was at the capital of the nation. Turbulent spirits among the frontiersmen threatened "to fight their way into the Union," but Hyatt and many like him opposed and crushed these rebellious schemes. When the "First General Assembly" met in the famous old Missouri Hotel, Hyatt saw Barton elected, saw the struggle against Benton, and took part in these eventful occurrences.

When the first Legislature met at St. Charles and passed the "solemn public act," on the 26th of June, 1821, as a pre-requisite for the admission of Missouri, on the proclamation by the President of the United States, as required by the act of Congress, and under which Missouri was admitted as a State on the 10th of August, 1821, Judge Hyatt supported the measure. The Legislature was afterwards convened to pass relief laws, there being no money in the country and the people in great distress, unable to pay their taxes. This was done by establishing a "loan office," to issue paper money in the name of the State of Missouri, based on the credit of the State, and to lend the same to enable the people to pay their taxes. Frederick Hyatt was a member of the Legislature, and helped to pass this law, but it was afterward declared void by the Supreme Court of the United States as being a violation of the Constitution of the United States. After the Legislature removed to Jefferson City, Frederick Hyatt was a member from St. Louis County, when the attempt was made to remove Judge William C. Carr from the Legislature. Frederick Hyatt denounced the proceeding as "unjust political persecution." When the State-House was burned down in Jefferson City and the archives of the State destroyed, Frederick Hyatt, again as a member from St. Louis County, took his seat in the Senate. In all Judge Hyatt was a member of the Legislature for about twenty years, sometimes as senator, sometimes as representative. He was no speaker, but helped to shape important legislation of the State during these busy years under six Governors. He was always a Whig, and in the great campaign of 1840, when "conventions, log cabins, coon-skins, and hard cider emblems were the order of the day, when paintings, banners, mottoes, processions, barbecues, songs, and speech-making ruled and swept over the land with unobstructed sway, Frederick Hyatt was always on hand in the procession, marching in the ranks of his party." It is also said that during the forty years in which he served the State in various capacities he performed jury service under Judges Tucker, Stuart, Carr, Lawless, Mullanphy, Krum, Hamilton, and other judges of the State courts, and under Judges Peck, Wells, Catron, and

Treat of the Federal courts. He was married four times, his first wife being Miss Hume, of Florissant valley, his second wife a widow lady from Kentucky, his third wife the widow of Maj. Whistler, and his fourth wife the widow of Thomas J. Ferguson. His own death occurred Sept. 10, 1870.

A lawyer of widespread fame was Judge Luke E. Lawless, born in Dublin in 1781. His life was checkered and romantic. At an early age he entered the British navy, serving there till after the treaty of Amiens. Afterwards he graduated at the Dublin University, was admitted to the bar in 1805, and seemed likely to win high standing. But he was a Catholic, and the restriction laws, then in force, presented what seemed insuperable obstacles in the way of his gaining the prizes of the profession. He therefore, in 1810, entered the French service under his uncle, Gen. William Lawless, acted as military secretary for the Duc de Feltre, and was promoted to a colonelcy. Napoleon's final defeat caused him to seek America, scarred with honorable wounds, and in 1824 he settled in St. Louis, where he soon built up a large practice, which he enjoyed till his death in 1846. For three years he was judge of the St. Louis Circuit Court, following Judge W. C. Carr. Judge Lawless was slender, dignified, and always interesting, thoroughly versed in his profession, supreme in his judicial analysis, never eloquent, but terrible in his pungent sarcasm. Taking part in a duel in France, he was rendered lame; he also acted as Benton's second in the Lucas duel. His wife was a French lady.

The most remarkable judicial incident in Judge Lawless' life was his leadership in the famous impeachment of Judge James H. Peck, of Missouri, before the United States Senate. This Judge Peck was a noted man, an accomplished scholar, and a thorough lawyer. Little is known of his early life, but he began the practice of law in Tennessee. He came to Missouri about 1820, and was presently appointed judge of the Federal court, it is said, at the instance of Richard M. Johnson, of Kentucky. In 1826 the difficulty with Judge Lawless began, the latter being counsel for certain Spanish land claims. In April of that year he printed over the signature "A Citizen" a respectful criticism upon one of Judge Peck's decisions on a case similar to those he represented. The judge ordered the proprietor of the paper to show cause why an attachment should not issue against him for contempt of court. A reply was made denying jurisdiction, as an appeal had been taken in the case criticised, affirming that it was a fair and correct statement of the decision,

and saying that Luke E. Lawless was the author. An order was then made on Lawless, who replied respectfully, though denying jurisdiction, but was sentenced to twenty-four hours' imprisonment in jail, and to eighteen months suspension from practice. December 8th of that year John Scott presented in Congress a memorial from Lawless, charging Judge Peck with tyranny, oppression, and usurpation of power. The House committee reported charges of impeachment, which came before the Senate at the following session. It was one of the most important and became one of the most celebrated cases ever brought before that body, the question of the liberty of the press being so closely involved. The House of Representatives chose five of its prominent members, including Buchanan, of Pennsylvania, to manage the prosecution, and William Wirt and Jonathan Meredith, of Baltimore, appeared for the defense.

Among the eminent jurists who were members of the high court of impeachment were Webster, Clayton, Livingston, King, Poindexter, Grundy, White, Forsyth, Chase, and Tazewell. Half the St. Louis bar were summoned as witnesses, the trial occupied six weeks, and the pleadings, which were prepared by Judge Peck and Mr. Lawless respectively, showed the highest ability and the most exhaustive research. Judge Peck was acquitted, and the decision authoritatively settled many questions relating to the powers of courts to punish for contempt.¹

¹ Hon. John F. Darby gives the following version of this interesting controversy: "Richard M. Johnson and his brother came here with some steamboats, which were seized for debt, and he could get no lawyer to defend him except Peck, who was not a regular lawyer. When Johnson went back to Washington he caused Peck to be appointed judge of the District Court. Peck soon after went blind, and would sit on the bench with a handkerchief over his eyes, an animated imitation of the heathen figure of justice. He passed upon the land claims presented, and Edward Bates was the United States district attorney. When the court met in the old building at the corner of Second and Walnut Streets, the people would come and present their claims. Judge Peck on one of these occasions asked some one to explain the *modus operandi* of proceeding. Judge Lucas undertook to explain to the judge. Lawless, who had filed a claim for ten thousand acres for the Soularde, protested against Lucas being allowed to make the explanation to the court. Judge Lucas said he was licensed by an act of heaven, which gave him a tongue to speak and explain; that he had taken his degree in France, his native country, and had been invited to emigrate to America by Franklin; that when Mr. Lawless had applied for admission to the bar he was one of the three to examine him, and had voted to pass him, while one of the others had voted against him, and it might be that he had done wrong in doing so. Lucas was very severe upon Lawless, who had acted as the second of Col. Benton in the duel with the son of Judge Lucas, and it was said that Lawless had fled from Ireland to escape the penalty inflicted upon those engaged in the rebellion. Judge Peck decided against the claim

An idea of the feeling that prevailed in some quarters may be obtained from a statement in the *Missouri Republican* of Feb. 3, 1837, to the effect that in the previous December some members of the St. Louis bar met and passed a resolution to the effect that their objection to the "reappointment of Luke E. Lawless to the office of judge of the Third Judicial District be expressed to the Governor." The following lawyers were present: Henry S. Geyer, Hamilton R. Gamble, Beverly Allen, Gustavus A. Bird, John F. Darby, James L. English, Harris L. Sproat, Charles F. Lowry, Wilson Primm, Charles D. Drake, Ferdinand W. Risque, Alexander Hamilton, William F. Chase, Thomas B. Hudson, John Bent, Singleton W. Wilson. Henry S. Geyer was chairman.

Judge Lawless died in September, 1846, aged sixty-five years, leaving no children. The bar met and expressed their sense of his fine talents, and of the loss to the profession. Bryan Mullanphy was chairman, and Hon. A. Hamilton secretary. Lewis V. Bogy, Edward Bates, Alexander Hamilton, Thos. T. Gantt, and W. M. Campbell drew up the resolutions. The *Dublin Nation*, the exponent of "young Ireland," published a history of the professional and military life of this distinguished man, and reprinted the proceedings of the St. Louis bar in memory of his services. Tradition reports that he ranked among the half a dozen best lawyers of his time, but few persons knew him intimately, as his manner was reserved and almost cold. He was called the most absent-minded man in St. Louis, and if half the stories to that effect be true richly deserved the title. One of his peculiarities was a habit of carrying into the court-room a large green bag in imitation of the English and Irish barristers.

John Delafield, a graduate of Columbia College (1830), studied law with Judge Arius Nye, Marietta, Ohio; was admitted in 1833; married Miss Edith Wallace, of Cincinnati, and in 1849 settled in St. Louis. Here he gained considerable reputation in

of Lawless, and the latter published an article in a newspaper reflecting upon the judge. Peck had the editor brought into court and made to divulge the name of the writer. Peck had Lawless arraigned for contempt, and fined and debarred him from practice. On his way to jail Lawless used the most violent language against Peck. For this conduct Congress impeached Peck, and he was prosecuted in the Senate by McDuffie, of South Carolina, and James Buchanan, of Pennsylvania, and was defended by William Wirt and Mr. Meredith, of Baltimore. Clay, Webster, Calhoun, and other senators of the day sat as the jury, and the trial was conducted without regard to political prejudices. Peck was acquitted because there was not a majority of two-thirds against him, but Congress passed the claim of Lawless for ten thousand acres of land, a matter of great exultation to him."

land cases, but turned his attention to literary pursuits, and wrote several essays and published books on archæological topics. His death occurred in Liverpool in 1865, at the age of fifty-three. He left a wife and four children. The three daughters married, and the son became a prominent business man in St. Louis.

One of Mr. Delafield's contemporaries was L. M. Kennett, whose biography will be found in the municipal chapter, as he was mayor of St. Louis in 1852. Another was Judge J. M. Krum, a biography of whom finds place in the same chapter for the same reason.

Joseph B. Wells was a brother of Judge Carty Wells, of the Lincoln Circuit, who was born in 1805 in Virginia, and died in 1860. Joseph, born in 1806, studied law with his brother, practiced in Warren County, went to the Legislature, and in 1845 moved to St. Louis, where he became William M. Campbell's partner. In 1849, after Mr. Campbell's death, he was in partnership with Judge Buckner. His health failing, he went to San Francisco, and practiced there with Judge J. B. Crockett, since and for many years judge of the State Supreme Court, and afterwards with Hon. Henry H. Haight. His health became worse, and he died while visiting relatives in Missouri in 1858. He was a good lawyer and a genial gentleman. His best work, professionally speaking, was done on the Pacific coast, where he is still remembered with affection and respect. Some extremely important land cases were in his hands.

Judge Robert W. Wells (not a relative of the preceding) ranked with the best jurists of the State, and was born in 1795 in Winchester, Va. His early education was defective, but he was ever an indefatigable student, and became a good classical scholar. About 1818 he began practice in St. Charles; in 1821 was made prosecuting attorney for that circuit under Judge Rufus Pettibone, and in 1826 was made attorney-general of the State, an office which Bates and Easton had held with credit, and which Judge Wells occupied with equal success for ten years. Then he became judge of the United States District Court, remaining in this office until his death, April, 1865, while visiting his married daughter at Bowling Green, Ky. Twice married, his first wife was Miss Barcroft, daughter of Maj. Barcroft (State auditor, 1823-33); after her death he married Miss Covington, of Kentucky. Five children were left to mourn his loss. Hon. Thomas T. Gantt presided over the meeting of the St. Louis bar which was held in honor of Judge Wells. His tribute was a memorable one. Judge Wells, said he, "illustrated and adorned the judgment

seat." "He has done more than any other judge, living or dead, for the elucidation and correct exposition of the United States statutes on which land titles in Missouri depend." "The State is impoverished by his death." Such and of similar import were the utterances of his long-trying associates in honor of Judge Wells. Politically he was a Democrat, supported the Union, and advocated a gradual system of emancipation years before the war. He was presiding officer of the State Constitutional Convention of 1845.

A genial and popular gentleman, for many years clerk of the United States Circuit and District Courts, was Col. B. F. Hickman, born in Frankfort, Ky., in 1810, afterwards a deputy in Francis P. Blair, Sr.'s office, then law student with Judge Saunders; admitted to the bar in 1832, and representative from Anderson County for two terms. Miss Cunningham, his first wife, was killed by being thrown from a buggy, and Mr. Hickman was severely injured. Years after he married Miss Moore, of Kentucky. In 1841 he located in St. Louis, and afterwards in Jefferson City, but in 1848 assumed the court clerkships, which he retained until February, 1871, the time of his death. He could not, of course, in his brief practice win much reputation as a lawyer, but his faithful efficiency as clerk received and retained the friendship of every practitioner in the Federal courts, and the usual tributes to his memory were more than ordinarily earnest. Judge Samuel Treat was one of the speakers on this occasion.

In 1826 irregular living hastened the death of a brilliant young lawyer, Capt. Alexander Gray, who fought in the war of 1812, and reached Missouri in 1816. Soon after coming to St. Louis he became judge of the Circuit Court, and was afterwards judge of the Northern Circuit (St. Charles, Montgomery, and Howard Counties). As an advocate, particularly in criminal cases, he won a great reputation. Judge James Evans reached Missouri in 1816, and secured a large practice in Southeastern Missouri. In 1842 he was appointed judge of the Ninth Circuit Court, but his career was short.

The list of the leaders of the bar who were born previous to the present century is nearly complete, and some glimpses of the lesser currents of activity have been afforded. One of the really strong men of that early bar, of which Gamble, Spalding, Geyer, Bates, and Darby were exponents, was Beverly Allen, native of Virginia, as were so many of the best Missouri lawyers. He was born in the year 1800, in Richmond, and having graduated at Princeton, he began his law studies with Judge Upshur, who gave him letters of

the highest value when he removed to St. Louis in 1827. For a while he had been located at Ste. Genevieve, and was John Scott's partner there. In St. Louis he was for a time a partner of Hamilton R. Gamble. President Adams appointed him United States district attorney, but the next administration removed him for political reasons. He was afterwards in the State Legislature, was member of the City Council, and was for a time city attorney. In 1838 he canvassed the State as a Whig congressional nominee. His death occurred Sept. 12, 1845, on which occasion the *Republican* said,—

"Mr. Allen was a distinguished member of the bar of Missouri, eminent for his talents and professional abilities, and universally admired and esteemed for his sound social, moral, and Christian principles and virtues. In a life not prolonged beyond the medium age he had won for himself, by uniform uprightness of conduct, a reputation which will long make his memory cherished by all who knew him. A few months ago Mr. Allen, accompanied by his wife, made a visit to the south of France and Italy, in the hope of effecting the restoration of his health. He had reached New York on his way home, when his course was arrested and his usefulness cut off by death."

Judge Thomas T. Gantt, whose memory is an unfailing fund of interesting reminiscences, has said of Mr. Allen that in 1839 he was one of the five leading lawyers of St. Louis. His acquaintanceship with land titles was vast and exact. One of his ablest reports was that in justification of the title of Carondelet to the common south of the Rivièr des Peres, which had been unsettled by claims of the War Department.

Capt. Edward E. Allen, for many years a justice of the peace in St. Louis, afterwards clerk of the law commissioners' court, and then a successful lawyer, fought through the civil war, receiving wounds which ultimately caused his death at the age of sixty-one (in 1878). He was born in Norfolk, Va., and educated in Richmond.

Judge James H. Birch, another of the "Virginians of the ancient régime," was born in March, 1804. His early life was spent in Kentucky, where he studied with Judge John Trimble, of the Supreme Court. He married a daughter of Daniel Halstead, of Lexington; removed to St. Louis in 1826, and assisted in editing the *Enquirer*, Col. Benton's paper. The next year he established the *Western Monitor* at Fayette. In 1828 he was clerk of the Lower House, and soon after was sent to the State Senate. From 1849 to 1852 he was a judge of the State Supreme Court. Twice

he served as register of the Plattsburgh land office. His great ambition was to go to Congress, but he failed in accomplishing this object. Stately, commanding, dignified, conservative, possessed of a clear, ringing voice and a graceful delivery, he might have been a marked and useful public servant; but the times were ripe for partisans, and the days of compromises had long gone by. In one of his speeches in 1861 he appealed eloquently to "the people of the North against the politicians of the South," though the civil war had already begun.

The Bay family furnish examples of inherited tastes and faculties that would have delighted Francis Galton. Judge Elisha Bay was for forty-nine years judge of the highest court in South Carolina, and declined a seat in the Supreme Court of the United States in Jefferson's administration. His brother was law partner of Ambrose Spencer, chief judge of the New York Supreme Court. A son of this brother was very successful at the Columbia County, N. Y., bar, ranking with Van Buren, Morrell, and Edmonds, and his grandsons, Samuel M. Bay and W. V. N. Bay, became noted in Missouri as talented advocates and learned jurists. Judge Samuel M. Bay, born in Hudson, N. Y., in 1810, studied some time under Salmon P. Chase, in Washington, engaged in mercantile business, took up law, and in 1833 settled in Franklin County, Mo. He was soon sent to the Legislature, and was afterwards appointed attorney-general of the State, proving a vigorous and successful prosecutor. Removing to Jefferson City, he formed a partnership with Abiel Leonard, of Howard County, and this lasted until 1846, when he changed his residence to St. Louis, and became attorney for the State Bank. In July, 1849, he fell a victim to the cholera. A career of rare promise was thus cut short. He left a widow and four children. His brother, Judge W. V. N. Bay, late of the Supreme Court of Missouri, is the author of the able work on the "Missouri Bench and Bar," from which we have before quoted.

Sept. 12, 1839, a young lawyer of note, Albert G. Harrison, died in Fulton. He was born in June, 1800, in Kentucky, educated there, and removed to Missouri in 1827. For a time he was register of the St. Louis land office, and in 1836 was elected to Congress, and re-elected in 1838.

A man of multifarious eccentricities was William M. Campbell, who died in December, 1849, aged forty-five, a native of Virginia, and a graduate of Washington and Lee University. In 1829 he reached Missouri, settled in St. Charles, became very popular, and was sent to the Legislature and State Senate, but in 1844 moved to St. Louis to edit a Whig news-

paper. In a few years he went to the State Senate again from St. Louis County, and remained in that body until his death. His talents were of the highest order, and his reputation for honesty was unquestioned. Never seeking for office, it was forced upon him in every case. He was absolutely indifferent to dress and money, and nothing ever ruffled his temper. Physically he was as lazy as possible, mentally a giant of industry. He could listen to a speech an hour long, and then write it out from memory, a feat almost beyond belief. As an editor he was invaluable,—he could do the work of a dozen ordinary men. His political editorials were always of a high order. Though seldom appearing in court, his power over a jury was notable.

Another diamond in the rough, full of eccentricities and talents, was James Winston, born in 1813. His mother was the youngest daughter of Patrick Henry, and James was the youngest of twelve children. He had little education, but became a successful practitioner, though he seemed to have no definite purpose in life. He represented the Benton district in the State Senate in 1850. Two years later he was the Whig nominee for Governor, and, though defeated, the wit and fluency which he exhibited in the canvass greatly increased his popularity.

In 1857 the bar lost one of its efficient members by the death of Richard S. Blennerhassett, a noted criminal lawyer, who was born in County Kerry, Ireland, in 1811, and who was related on his mother's side to Daniel O'Connell and to the Spottswoods of Virginia. His father was first cousin of Herman Blennerhassett, concerned in the Burr conspiracy. In 1831 he married Miss Byran, great-granddaughter of Rousseau, came to America, taught school, studied law, was admitted in 1835, and in 1841 reached St. Louis. In 1848, '49, and '50 he was city counselor. It is asserted that he never had a superior in criminal cases at the St. Louis bar. He was not as eloquent as Uriel Wright, but was a better reasoner, and his self-possession was perfect. His social qualities and unbounded generosity made him a universal favorite among his associates and in private life. In one of his most important cases—the defense of McLean for murdering Col. Floyd—he obtained four successive trials between 1842 and 1845, at the last saving his client from the gallows. No record has been kept of his most eloquent speeches, but they seldom failed to win the jury. His management of witnesses and analysis of testimony still live in tradition as unsurpassed among the lawyers of his time.

Robert P. Farris was born in Natick, near Boston,

Mass., in the year 1794. He came to St. Louis about 1815-16, and entered upon the profession of the law. About the time of the admission of Missouri as a State, in 1820-21, he was lieutenant-colonel of the First Regiment Missouri Militia, and upon the office of colonel becoming vacant, he was elected to the same May 25, 1822, by a vote of four hundred and three over his competitor, Col. René Paul, who received one hundred and thirty-one votes. Col. Farris was appointed circuit attorney for the St. Louis Circuit by Governor Alexander McNair, and entered upon the discharge of his duties at the term of the court held on the first Monday of June, 1822, N. B. Tucker then judge. He held the office nearly seven years, being succeeded by Hamilton R. Gamble, March 23, 1829, William C. Carr being then judge of the circuit. Col. Farris was married to the daughter of Capt. Joseph Cross, formerly of the United States artillery. A contemporary journal says,—

“Married at Potosi, Washington Co., on the 31st March, 1824, by the Rev. Mr. Donnelly, Col. Robert P. Farris, of this city, to Miss Catharine Anne Cross, step-daughter of Samuel Perry, Esq., of the above place.”

The notice of his death reads as follows:

“Died in this city on the 27th December, 1830, Col. Robert P. Farris.” He was buried in the Protestant graveyard in North St. Louis, where now stands Grace Church.

His wife died some years previously.

His only son, the Rev. Robert P. Farris, was born in 1826.

One of the most eccentric, liberal, and widely-known lawyers of St. Louis was Bryan Mullanphy, of whom the genial John F. Darby, in his chatty reminiscences, has an abundance to tell. He was born in Baltimore in 1809, and his father, John Mullanphy, who settled in St. Louis in 1804, accumulated an immense fortune, and did much to develop the material resources of the West. Determined to give his son every advantage, he sent him to France, then to England, whence he returned at the age of eighteen, began the study of law, was admitted to practice, and soon took a creditable position. At his father's death it was found that most of the property was willed to his sisters, but they at once admitted him to an equal share. One of these sisters married Gen. Harney, another became the wife of Judge Boyce, of Louisiana, and a third of Maj. Thomas Biddle, while the other two married Charles Chambers and James Clemens, Jr., influential business men of St. Louis. Bryan Mullanphy became a fluent and impressive though not eloquent speaker. Though wealthy, he

enjoyed the practice of law, and his wide range of reading on literary topics rendered him an agreeable companion. He was in several noted trials the antagonist of the best men of the time, and showed fine legal capacity. In 1840 chosen judge of the St. Louis Circuit Court, he served until 1844 with great fidelity, and few of his decisions were reversed. His successor was John M. Krum. In 1847 came an interesting and difficult period of his life, resulting from his election as mayor of the city. The cholera prevailed shortly after, and the dreadful sufferings of poor emigrants suggested to him the disposition he afterwards made of his wealth. His death occurred June 15, 1851, when he was forty-two years of age. For twelve years or more he had filled important offices, and for some time he had been director of the Bank of Missouri. The bar met two days after his death, and Messrs. L. V. Bogy, J. M. Krum, M. Blair, S. Treat, C. D. Drake, H. R. Gamble, and J. F. Darby drafted the resolutions, which closed as follows:

“As a member of the profession, the deceased was distinguished for every quality which makes the gentleman in his intercourse with his brethren, and never for a moment forgot, in the excitements which are inseparable from the practice of the law, his habitual decorum, either to the highest or to the lowest among us, whilst his great legal attainments and varied knowledge made him an ornament to the profession.” Nevertheless, this life, so useful and full of deeds of kindness and of charity, was curiously marred by eccentricities of many sorts, instances of which abound. He seems to have been a quaint, humorous oddity, and dressed with extreme carelessness. His countless gifts to the poor were marked in nearly every instance by some strange provision. His own likes and dislikes were strongly shown. On one occasion he invited a noted actor to take a drive, but drove off and left him twelve miles or so from St. Louis, being, it is supposed, angry at something the latter had said. But all his oddities, and they were many, are but as dust in the balance when weighed against the uprightness of his life and the succession of his charities, crowned at last by his munificent gift to the great city where that wealth had been accumulated by his father. His property was valued at six hundred thousand dollars.

The *St. Louis Republican* of June 17, 1851, gives an interesting account of the character and provisions of his will, which was contested, but fully sustained after a protracted litigation. It seems that after Judge Mullanphy's death many rumors prevailed regarding the disposition of his property, and at first no

will was found. But it was known, however, that a sealed package had been deposited by him with one of the city officers. This instrument, it was suggested, might be his will, and as it was supposed, if so, that it might contain instructions as to his funeral, the mayor notified the relatives of the deceased that at twelve o'clock the package would be opened in the presence of a portion of them, thus summoned, and of other citizens. The package was produced by the city register and opened. The outside envelope contained a memorandum of the circumstances under which the package was received, signed by the then mayor, James G. Barry, and D. H. Armstrong, then comptroller. The will was then opened, on the outside of which was a memorandum in Judge Mullanphy's handwriting, directing that it should not be opened until after his death. This memorandum bore date Aug. 31, 1849. The will itself was as follows :

"I, Bryan Mullanphy, do make and declare the following to be my last will and testament :

"One equal undivided third part of all my property, real, personal, and mixed, I leave to the city of St. Louis, in the State of Missouri, in trust and to be and constitute a fund to furnish relief to all poor emigrants and travelers coming to St. Louis on their way *bona fide* to settle in the West.

"I do appoint Felix Coste and Peter G. Camden to be executors of this my last will and testament, and of any other will or executory devise that I may leave. All and any such document will be found to be olograph, all in my own handwriting.

"BRYAN MULLANPHY. [Seal]

"Witnesses who have all signed in presence of the testator and each other, and saw the testator sign in presence of them and each of them.

"ADOLPHUS WISLIZENUS.

"JOHN WOLFF.

"M. W. WARNE.

"AUGUSTUS SCHNABEN."

This instrument was written on the first page of a sheet of letter-paper, which was folded in letter form and sealed with three separate wafers, over each of which was written the word "wafer." On the outside it is indorsed as follows :

"St. Louis, 31st August, 1849.—I leave this document in the hands of the city of St. Louis by delivering the same to the mayor. It is not to be opened until after my death. It was left with the comptroller, the mayor being absent.

"BRYAN MULLANPHY."

June 19th, Judge Ferguson admitted this will to probate, and P. G. Camden was appointed executor.

The remaining two-thirds of his estate he left by another will to be disposed of according to law. In 1855 the *Republican* remarked that no legal division of the estate had then been made, though commissioners had been appointed, had completed their labors, and had valued the estate at one million five hundred and sixty-one thousand one hundred and fourteen

dollars, or two and a half times the estimate placed upon it at the time of his death. In 1860 the litigation which grew out of this case was decided; the heirs had appealed to the Circuit Court, hoping to obtain all, but were defeated, and took the case to the Supreme Court, where the judgment below was affirmed, thus securing to the city of St. Louis this trust fund. Hopes were then entertained that matters would not be longer delayed, but in 1867 the committee still complained of the slowness with which the Mullanphy trust fund was being made available. At that time it amounted to over six hundred thousand dollars. The City Council created a board to take charge of the property, and so managed it as to produce a satisfactory annual income, to be spent in accordance with the donor's plan. Thus used the fund has become one of great usefulness, and hundreds of persons on their way to the vast Rocky Mountain region have experienced its benefits. It may here be noted that some of the most valuable gifts, in the way of real estate, libraries, and works of art, which American colleges and schools have received came from members of the legal profession, but no more generous gift than this of Judge Mullanphy is on record anywhere.

Charles B. Lord, who died in St. Louis Nov. 15, 1868, was the successor of Edward Bates as judge of the land court. At the time of his death he was one of the Circuit Court judges. He had held the important land court judgeship for two terms, beginning in 1855. Judge Lord was a native of Thomaston, Me., born in 1810, was educated in Onondaga County, N. Y., studied law at Buffalo, was admitted in 1833, and removed to St. Louis in 1843. Meanwhile he had married Miss Wiley, of Philadelphia. His first law partner in St. Louis was Myron Leslie, and when the latter died, in 1848, he was associated with Isaac Kiem. From 1855, as noted, he held judicial offices, and always with credit to himself. In the laws pertaining to real estate he was particularly strong. A leading journal, in announcing his death, said,—

"Judge Lord was a man of no ordinary qualities of mind. Even had he never occupied a public position, his eminence in his profession would have given him a reputation extending beyond local limits. But he was peculiarly fitted for the bench. He possessed a clear, analytical, unwarped judgment and a remarkable perception. We would not assert that his decisions as a jurist were invariably correct, but undoubtedly they were always based upon his best and most conscientious interpretation of the law."

In court he was often severe towards young law-

yers, but his uprightness and anxiety to deal out justice impartially were proverbial.

Abram Beek came to St. Louis from Albany, N. Y., in 1819, as a lawyer and land agent, and was associated for a brief period with Josiah Spalding. He died Sept. 4, 1821, a young man, unmarried.

A son of the Old Dominion, who honored the best traditions of the courtly and cordial past, was Judge Henry Shurlds, born in Gloucester County, Nov. 21, 1796. He was educated at college, and had the advantage of studying law at Richmond under the celebrated William Wirt, then standing at the head of the Virginia bar. In 1819 this thoroughly-equipped young lawyer came to St. Louis, this year being, as the reader will notice, a time when the attention of many who afterwards won high reputation was attracted to the brisk, growing, and impetuous community being organized on the banks of the mighty Mississippi. Much has been said of the land litigation in which many lawyers won fame, but it must not be forgotten that there were great lead, iron, and coal interests beginning to develop, and law cases in that connection were abundant. Potosi, Washington Co., was in the midst of the mines, and here Judge Shurlds settled, and in 1822 married Miss Jane Jamison Bush, of that place; in 1821 he had been appointed circuit judge of that district, which office he resigned to become Secretary of State. In 1832 the General Assembly elected him secretary of the Senate, and the following year the Governor and Senate made him public auditor, which office he held till March, 1837. Meanwhile the State Bank had been organized, and as the times were financially gloomy great caution and skill were needed to conduct it. Judge Shurlds became its cashier, and for fifteen years contributed greatly to its financial success. His death occurred in 1852 near St. Louis, and his only son Edward died in 1865. Of his five daughters one married G. W. Dent, of San Francisco, and the others were all united to gentlemen of position in St. Louis.

The early files of Missouri papers contain many incidental references in advertisements and brief notices which throw light upon the bench and bar of that time. One of the first to be found is an advertisement in the *Gazette* of May 3, 1810, which says, "William O. Allen, Esq., will continue to practice law in all the districts of this Territory except Arkansas, and he will also attend the Illinois General Courts." Four years later, October 24th, was announced the death of Gen. Howard, Governor of the Territory, and a man thoroughly well versed in law, a summary of whose life is given elsewhere. Another of the well-known men of this era was Gen. Ruland,

a sociable and kindly man, who had hosts of friends. His death, which occurred March 1, 1849, was noted at the time as follows: "Gen. John F. Ruland was born in the year 1789, on the banks of the river Raisin, in what is now the State of Michigan. At the age of nineteen he entered the Northwestern army under the command of Gen. Harrison, and served with reputation for several years, as was proved by his having passed rapidly through several grades of military station. At the termination of his military career, and when twenty-eight years of age, Gen. Ruland removed from Detroit to St. Louis, and engaged in the business of surveying afterwards. He was the chief clerk in the office of the superintendent of Indian affairs in this city by appointment of Gen. William Clark. On retiring from this position in 1835 he was then elected clerk of the Circuit Court and recorder of deeds of St. Louis County for a term of six years, and being re-elected, was in office for more than twelve years, and was the incumbent at the time of his death."

David Thomas was brought to St. Louis from Maryland about the time the post was turned over to the United States, being then but three years old. His father died on the journey, and was buried by the wayside. His education was such as the city schools afforded. He practiced law some years, and about 1848 became county judge, filling the office with satisfaction to the public. He had much probate business in later years. His death occurred in December, 1874. Another judge of the county court in early days was Peter D. Barada, born in 1798, and a pioneer of Carondelet. He served at various times as justice of the peace and member of the City Council. His death occurred in August, 1877.

The saddest chapter of a complete history of the bench and bar of any city would be that which tells how men fail in their early struggles and fall by the wayside. Every old lawyer crowned with deserved honors will remember many and painful instances. Usually, but not always, "the fittest survive." Promising young attorneys came to the West full of ardent hopes that perished without fulfillment. The *Gazette* of Sept. 19, 1811, says, "Died at Cape Girardeau, after an illness of six days, George C. Harbison, attorney, aged thirty-one." July 16, 1833, the same paper says, "Died in this place, in the twenty-fifth year of his age, Charles T. Parker, a native of Boston, and a member of the Missouri bar." On the 30th of the same month it says, "Died, after a short illness, William F. Duncan, a member of the Missouri bar. Endowed with a highly-cultivated mind, he was gifted with all those endearing and social qualities which never fail to render their possessor an object

of love and admiration." Jan. 12, 1833, the sudden death of Bethel S. Farr, a young member of the bar, called forth the following: "*Resolved*, That the death of Mr. Farr has deprived the bar of a member who gave every indication of future usefulness and brilliancy."

The most notable loss of the bar in 1839 was that of Joseph M. White, October 19th. A bar meeting was called, Judge Bowlin presiding, and G. A. Bird acting as secretary. The resolutions closed by saying, "The bar of St. Louis has lost one of its brightest ornaments, society one of its most valued members, and the country one of its most gifted and patriotic sons."

Another lawyer who already had made considerable reputation died in 1840. The *Republican* of November 30th says, "Died, on Saturday last at his residence, George F. Strother, Esq., formerly of Culpeper, Va. Mr. Strother was a member of the bar, was a member of Congress from Virginia, and since his residence here has held several highly important offices, having served several sessions in the State Legislature as a representative from this county." In 1841, Stephen Lanham, a justice of the county court, died at his residence near Manchester. The following year (September 23d) Joseph W. Walsh, clerk of the St. Louis Court of Common Pleas, died, aged thirty-two. In May, 1847, Judge Alonzo Manning, of the St. Louis Criminal Court, died. The *Republican* said, "Judge Manning had been for many years a citizen of St. Louis, and was endeared to those who knew him intimately by his many excellent qualities. In his official capacity he was distinguished by uprightness, firmness of purpose, and a desire to render strict and impartial justice."

July 4, 1849, a newspaper announces, "Russell Prentiss, Esq., member of the bar, was buried yesterday." On the 15th of the same month it says, quite as briefly,—

"Died on the 14th instant, of the prevailing epidemic, William K. Titcomb, Esq., aged twenty-eight years, a member of the St. Louis bar."

The same year, June 29th, the same journal spoke of Judge Schaumburg's death, saying that he "was a Creole from New Orleans, and thirty-nine years of age at the time of his death. After graduating with great *éclat* at the Transylvania University, in Kentucky, he studied law and was admitted to the bar of Louisiana. He was made a parish judge, and soon after married one of the fair daughters of our city and became a resident of St. Louis. All who knew him well acknowledged his fine talents, classical education, and bland manners." March 30, 1851, occurred

the death of D. N. Hall, for ten years an active and estimable member of the St. Louis bar.

Of an altogether different sort is a leaf from early St. Louis court records: "On the 7th day of May, 1827, Marie P. Leduc presented his commission as justice from Governor Miller, as also did Hartley Lanham, father of Judge P. J. Lanham. The court was opened by Robert Simpson, sheriff. At the next meeting Frederick Hyatt appeared as associate justice on the bench, and Marie P. Leduc was made presiding justice. The name in French, Marie, was frequently given to males as a premonition of good luck by the old French *habitans*. A large part of the business done at that time was connected with probate matters."

Judge Marie P. Leduc was a distinguished character in the early history of the St. Louis bench and bar. Indeed, his may be said to have been an official life, for throughout the period of his residence in the village until his resignation, about 1839, of the position of judge of the county court, not a year elapsed that he did not occupy some important public station.

Judge Leduc was born in St. Denis, near Paris, France, from whence he came to this country and located in 1793 at New Madrid, Upper Louisiana. St. Louis being then the seat of government, Mr. Leduc removed here in 1799, and being a man of superior abilities, his influence in the affairs of the little village soon brought him into marked prominence. Early in November, 1799, Governor Dehault Delassus appointed him secretary of the province, which office Mr. Leduc held until the cession of Louisiana to the United States. On the 10th of March, 1804, he was appointed by Capt. Stoddard syndic of the town and within four miles of its vicinity. On the 1st of October of the same year he was appointed by Governor William H. Harrison judge of probate, recorder, and notary public of St. Louis. He was appointed translator of the Board of Land Commissioners on the 14th of December, 1805; in 1807 he was appointed by acting Governor Frederick Bates justice of the peace and notary public, and in 1810 to administer oaths of office. In 1812 he was reappointed justice of the peace, judge of probate, notary public, recorder, and register of boatmen, and was also appointed clerk of the Court of Common Pleas.

In 1815 he was appointed clerk of the County Court, and in February of the same year clerk of the Circuit Court, which position he held with great acceptability to his fellow-citizens until 1818, when he resigned, and received from the presiding judge a note expressive of "the great satisfaction with which the duties of said office had been discharged." In 1818

he was elected a member of the Territorial Assembly, and when Missouri was admitted into the Union he was re-elected, and again in 1822, but soon after resigned. In 1825 he was commissioned by Governor Bates judge of probate for the county of St. Louis, and when that court was abolished and the county court created he was appointed presiding justice of the latter, and continued to serve in that capacity until he resigned about 1839. In all the various offices of high responsibility conferred upon Judge Leduc, he discharged his duties with eminent ability and to the general satisfaction. He said "he had no family until the year 1802."

Judge Leduc resigned his last position on account of declining health, and continued to linger until his death, at the residence of Hypolite Papin, "about five miles west" of St. Louis, on Monday, Aug. 15, 1840, aged seventy years.

Another old volume of court records contains the "marks and brands," commencing February, 1831. The first entry is:

"John B. Bavnet, a farmer of St. Louis township, adopts for his brand the letters J. B. B., and for his ear-marks of cattle, hogs, sheep, and goats a crop of left ear and two notches under the same and nothing on right ear." The clerk of the county court at that time was Henry Chouteau, and the writing has the appearance of print.

Another book contains a list of free negroes and mulattoes licensed by the county court of St. Louis County, as all such were required to register. The name, age, height, and occupation are given; the first entry December, 1841, and the last entry May 1, 1863.

The salaries paid in those days in St. Louis County were liberal enough, all things considered. In 1846 the State Legislature abolished the fee system, which had made some offices enormously lucrative, and fixed salaries as follows: Sheriff, per annum, \$7000; clerk of Circuit Court, \$3500; clerk of Common Pleas, \$3000; clerk of Criminal Court, \$2500; clerk of County Court, \$3000; marshal, \$2500; law commissioner, \$1500; each justice, \$1200; each constable, \$1500.

Some of these clerks were lawyers themselves and deserve mention. We will advert to a few in this place and this connection, without attempting to arrange them in chronological order. Joseph V. Garnier was born in France and emigrated to San Domingo. He came away from there at the insurrection of the negroes in 1793 to New York, where he was for a number of years in the employment, in some fiduciary capacity, of Col. Livingston. He came out

to St. Louis about the period of the transfer in 1804. At the incorporation of the borough town of St. Louis in 1809 he was appointed by the trustees the first town clerk, and also filled the office of clerk of the Superior Court of the Territory. Subsequently he was a justice of the peace and notary. He came to St. Louis a mason, and was the first secretary of St. Louis Lodge, No. 111, and subsequently a member of No. 12 and No. 1. His widow survived him, living beyond ninety years of age, and his only child, Harriet, married the Hon. John Hogan.

Col. Thomas Fiveash Riddick was born at Suffolk, county-seat of Nansemond County, Va., on June 5, 1781. He removed to St. Louis about the time of the transfer of the country to the United States, and during the first fifteen years of his residence filled at various periods a number of public offices of trust, as follows: 1807, July 9th, appointed by Frederick Bates, secretary of the Territory and *ex officio* acting Governor, to the office of assessor of rates and levies for the district of St. Louis; 1807, July 10th, appointed by same to the office of clerk of the Courts of Common Pleas, Quarter Sessions, and Oyer and Terminer for the district of St. Louis; 1807, August 20th, appointed by the same a justice of the peace for the township of St. Louis; 1808, May 7th, also appointed by "Frederick Bates, recorder of land titles under the board of land commissioners, about to be absent from St. Louis on official business connected with his duties, his deputy recorder, to act as such in his absence;" 1812, December 10th, reappointed a justice of the peace by acting Governor Bates; 1813, March 1st, reappointed by Secretary Bates to the office of clerk of the before-mentioned courts; 1815, January 2d, appointed by Governor William Clark a justice of the peace for four years; 1817, when the old "Territorial Bank of Missouri" was chartered, he was one of the first directors of the same; and in the year 1820 succeeded Col. Auguste Chouteau, its first president, in that office, which position he held until the collapse of the bank in the summer of 1822. Col. Riddick was for twenty years an active and efficient business man of St. Louis. Subsequently he removed to the Sulphur Springs, in Jefferson County, where he continued to reside until his death on Jan. 15, 1830, at the age of forty-nine, leaving a widow, a sister of Judge William C. Carr, and four children, two sons and two daughters, who subsequently became the wives of Charles J. Billon and Edward Brooks.

Ewel Baker came from Winchester, Va., in 1824, a nephew of the Gambles, and during his few years' residence in St. Louis he was a clerk in the office of his uncle, Archibald Gamble, circuit clerk.

One of the best of real estate lawyers was R. M. Field, who died in July, 1869. He was born in Newfane, Wyndham Co., Vt., in the year 1807. At fifteen years of age he was graduated at Middlebury College, and at eighteen was admitted to the bar. His legal and literary career was marked by great ability and determination, even before he left his native State. In 1839 he came to St. Louis. Field's name was associated with coadjutors or opponents in nearly every important lawsuit in the State during twenty-five years. His profound studies led to the most keen and acute judgment, whether in law or literature. He was familiar with the literature and language of France, Spain, and Germany, and in the ancient classics seemed ever to be as proficient and ready as in his college days. Mr. Field had few intimate companions but many friends, by whom the genial warmth of a generous nature was known and appreciated. To the world he perhaps appeared austere, but it was the austerity of a profound intellect and a deeply thoughtful nature. His success as a lawyer in his native State was in every way unusual. He practiced law fourteen years in his native county, and represented it in the Vermont General Assembly. Judge Story declared some of his special pleas to be masterpieces. From 1832 to 1835 he was State's attorney for Wyndham County. But an event which occurred in 1838 was the leading motive of his leaving his native State. Miss Mary Ann Phelps was engaged to one Jeremiah Clark, but secretly married Mr. Field. She returned home the same day, and soon after told her family, wrote to Mr. Field, desiring to rescind her action and refusing to see him, and in a few days married Clark. Clark and his wife then filed a bill to declare the marriage with Field null and void. The Chancery court so ruled, and the Supreme Court strongly supported this view. After Mr. Clark's death his widow visited St. Louis to bring about a reconciliation with Mr. Field, but he refused to see her. This episode in his life necessarily had a marked effect upon his character, and for many years he avoided society. He finally married Miss Frances Reed, a relative of C. W. Pomeroy, of St. Louis, who died a few years later, leaving two sons, one of whom entered journalism.

At one time Mr. Field's partner was Myron Leslie, also a native of Vermont, and a very gifted man. He was born near Bennington, and had little education, but his abilities were far beyond the average, and he picked up enough law to pass an examination. By 1834 he was building up a lucrative practice in Central Illinois, and by 1837 was in St. Louis, in partnership with F. W. Risque, who afterwards re-

moved to Washington. He then joined forces with Mr. Field, and the firm took high rank immediately. About 1842 he became circuit judge for that district, held the office two years, and then went to the State Senate. In 1845 he was a member of the Constitutional Convention. He succeeded Judge Bowlin as attorney of the old State Bank. As a speaker, he was full of energy and almost invincible when aroused, though often he seemed slow and indolent. In later years his health failed, and he died in 1854, mourned deeply by all his associates.

Judge E. B. Ewing, a prominent lawyer and judge of the Supreme Court, was born in Todd County, Ky., in 1819. His father was Rev. Finis Ewing, one of the founders of the Cumberland Presbyterian Church. He immigrated to Missouri about 1820. He was educated at Cumberland College, Caldwell Co., Ky. Studying the law, he was admitted to the profession at the Ray Circuit Court in 1842, and soon acquired such influence and reputation as to bring him prominently before the people of Missouri. In 1848 he was appointed to the office of Secretary of State, the duties of which he performed for four years. Again, in 1856, he was elected attorney-general, and performed the duties of that office until his election, in August, 1859, to the Supreme Bench, to fill the vacancy occasioned by the resignation of Judge Richardson. This position he occupied until 1861, when he resumed professional practice at the bar, first at Jefferson City, and then at St. Louis, until his election as one of the judges of the St. Louis Circuit Court in 1869. The labors of this office so severely taxed his energies that in 1872 he was induced to accept the nomination for judge of the Supreme Court, to which station he was elected, and he took his seat at the January term, 1873, but his death occurred in June of that year. Pleasant, winning, and earnest in his manners, though often reserved, his uprightness won him the implicit confidence of the public, and though never brilliant, his lucid and well-developed decisions were always to the point, were usually sustained, and commanded the respect of his brothers of the bar. Rev. Dr. Linn, of the Methodist Church, preached his funeral sermon, and the usual resolutions of regret were passed by his professional brethren. One of the interesting episodes of his life was when, in 1856, his brother, Robert C. Ewing, also an able lawyer, was nominated for Governor, in the great triangular contest of that year, but E. B. Ewing was running for attorney-general on the Polk ticket. The brothers were political antagonists, but the ticket headed by Trusten Polk was elected.

A career which well illustrates the sterling qualities of manhood was that of Hugh A. Garland, who was born in Nelson County, Va., about 1805. When sixteen he entered Hampden-Sidney College, and did such good work there that after his graduation he became Professor of Greek at that institution. Shortly after he married Miss Anne P. Burwell, daughter of Col. Armistead Burwell. In 1830 he studied literature and law for a year at the University of Virginia, and then opened an office in Boydtown. Two years later Mecklenburg sent him to the State Legislature. It was a time of great political turmoil. He was an ardent Jackson partisan, and contributed considerably to the controversial literature of the day. For five years he represented that county. In 1838 he was chosen clerk of the House of Representatives. About 1840 he retired to rural and literary pursuits, but in 1845 lost his property through unfortunate business connections, removed to St. Louis, and resumed law practice with an ardor and capacity which bore good fruit. Five years later he published a "Life of John Randolph." His death occurred in October, 1854.

Judge James Ransom Lackland held high rank at the St. Louis bar, though contending against early educational disadvantages, and in later years poor health. His birthplace was Montgomery County, Md., where he was born in January, 1820. In 1828 his parents removed to Missouri, and settled on a farm near St. Louis. His early opportunities for education were limited, until he reached the age of sixteen, to those which a country neighborhood could afford. He then entered the grammar school connected with Marion College, over which Rev. Dr. Potts then presided, remaining there three months. He subsequently attended as student, and afterwards as assistant teacher, a school conducted by Rev. W. D. Shumate, on the St. Charles Rock road, fifteen miles from St. Louis. Beyond these modern advantages his acquirements were the fruits of private study. He next obtained employment in the house of Mullikin & Pratt, wholesale grocers, and was subsequently engaged under his relative, Rufus J. Lackland, as a clerk on a Mississippi River steamboat.

In the year 1845 he became a deputy clerk of the St. Louis Court of Common Pleas, under Nathaniel Paschall, then clerk.

At this time he decided to adopt law as his profession, and began study in the office of Hon. Charles D. Drake, and was admitted to practice in 1846. He had neither fortune nor influential friends, but his indomitable energy enabled him to surmount all obstacles. In 1848 a vacancy occurred in the circuit attorneyship of St. Louis County, and he was

elected to fill it. This was an important office, involving great labor and responsibility, and brought the young lawyer into conflict with the best legal talent of the day. As a prosecutor, he is described as "bold, defiant, and successful." In 1852 he was again a candidate, but shared the defeat of the Whig party of that year, but meanwhile (in 1849) he had formed a partnership with Mr. Jamison,¹ and engaged in civil as well as criminal practice.

In 1853, Judge Colt having resigned from the bench of the St. Louis Criminal Court, he was elected to fill the vacancy, and sat as judge of that court during the residue of the term, which expired in 1856. At the general election in 1857 he was the successful candidate for judge of the St. Louis Circuit Court, then held by one judge, and held that office until 1859, when he resigned from the bench and resumed the general practice of the law as senior in the firm of Lackland, Cline & Jamison. In 1864, attacked by a pulmonary complaint, he undertook long journeys in hope of recovery, and in 1868, partially restored, he became senior member of the firm of Lackland, Martin & Lackland (his brother), from time to time until the day of his death, Oct. 9, 1875, appearing in important cases.

A St. Louis journal after his death said, "The professional career of Judge Lackland was distinguished to an extraordinary degree by untiring industry, vigorous common sense, learning, and integrity of the highest order. As a lawyer, he grasped with unusual clearness and force the essential questions of a controversy, and presented them to court or jury with direct and powerful simplicity of diction. In the discharge of official duty no man was more diligent, more upright, or more fearless. No one charged to protect the community from crime has ever won, whether at the bar or on the bench, a higher or more deserved reputation. And to those who at first doubted whether a like success would attend his labors in his administration of civil justice,

¹ A partner from 1849 till 1852 with Judge Lackland, and at various times since, was William C. Jamison, a resident of St. Louis since 1843. Born in Tennessee in 1822, of a family noted in that State, and educated at Union College, Murfreesboro', he prosecuted his early law studies under Hon. John F. Darby, and later with Messrs. Todd & Krum. In 1846 he opened an office of his own, though licensed nearly two years before. His first partnership was with F. R. Diek. In 1849 it was Lackland & Jamison; in 1853, Cline & Jamison; in 1857, Lackland, Kline & Jamison. In 1863, Judge Lackland retired; in 1866, M. C. Day became a member. Mr. Jamison became administrator for some of the largest estates in St. Louis; and is a director in many prominent companies and associations. Both as lawyer and citizen he possesses high claims to regard. In 1865 he married Miss Mary E. Noe, of Norfolk, Va.

his ceaseless industry and honorable ambition were not slow to furnish a reply. Simplicity, courage, honesty of purpose, scorn of everything mean or base, and dauntless energy, these were his characteristics. As a man, to these in later years was added earnest Christian faith."

There is little to add to this deserved praise of one of the leaders of the St. Louis bar, whose power in impressing a jury has seldom been surpassed. His greatest case was that of Effie Carstang *vs.* the noted Henry Shaw, of Shaw's Gardens, a suit for alleged breach of marriage promise. She had obtained, with Uriel Wright and L. M. Shreve for her lawyers, a verdict of one hundred thousand dollars damages from a jury, to the utter astonishment of the whole city. The verdict was set aside, and a new trial granted. Mr. Shaw retained Judge Lackland and Mr. Glover (his former counsel had been Edward Bates and John R. Shepley), and spent, it is said, twenty thousand dollars in the affair. The woman's earlier history was searched into, and the entire case prepared by Judge Lackland. On the second trial the verdict was for the defendant. The skill and energy displayed in this famous case increased Judge Lackland's already great reputation. In social life he was generous and warm-hearted. He was twice married, and left several children.

We have spoken of Uriel Wright as engaged in the case of Carstang *vs.* Shaw, and it is proper to say further of him here that, all in all, Missouri, and indeed the West, never had a more brilliant, eloquent, erratic, marvelous genius than Maj. Uriel Wright. Judge Bay calls him the "Prentiss of Missouri." Born in 1805 in Virginia, mother of such orators as Wirt and Henry, Uriel Wright, a descendant of the noted Johnsons and Barbours, showed great mental power, and was sent to West Point, but left the institution on his father's death, and began the study of law with Judge Barbour, of Orange County, also in a law-school at Winchester.

After marriage, in 1833, he removed to Missouri, where so many Virginians had taken high rank at the bar, settling in Northeast Missouri (Marion County). He speculated in one of the paper cities of the era, and lost all his means. About this time he served a term in the State Legislature; soon after he removed to St. Louis, having gained reputation as an orator, and found plenty of work in criminal practice, in which class of cases his success was unparalleled, saving the lives of many hardened criminals by his ardent eloquence, of which no specimens have been preserved, but which carried away judge, jury, and audience alike. Judge Bay says, "The style of

Maj. Wright's oratory was *sui generis*; his words flowed from his lips like a placid stream; his voice was clear and musical; his invective scathing." Another writer says, "His eloquence, the beauty of his diction, and the keenness of his logic were universally acknowledged. As a criminal lawyer, he probably never had a superior at our bar." The greatest genius is, however, sometimes allied with the saddest weaknesses. Maj. Wright lacked will-force, moral power, and moral balance. On the heels of a denunciation of gambling so fierce and yet pathetic that men trembled and wept he might be seen at a card-table. Early in his life he was a Whig in politics, and in 1861 was an Unconditional Union man. As such he was elected by a tremendous majority to the State Convention of 1861. He continued to combat secession and disunion until the capture of Camp Jackson. This roused his indignation, and from the steps of the Planters' House he declared on the night of the 10th of May, 1861, that "if Unionism meant such atrocious deeds as had been that day witnessed he was no longer a Union man." Like Sterling Price and hundreds of others, Maj. Wright joined his fortunes with the Southern Confederacy, and served as a staff officer. After the war was over he returned to St. Louis, where he remained a short time, but finally removed to Winchester, Va., where he died Feb. 18, 1869, and "life's fitful fever" was past. The St. Louis bar met and passed resolutions which showed how highly he was personally esteemed. They spoke particularly of his literary culture (he had been a contributor to the *Knickerbocker Magazine*, and was always a great reader). With the beauties of Shakespeare he was perfectly familiar, so much so, indeed, that he often unconsciously spoke in the language of that great author as if he were speaking in his own copious diction. Some of his speeches prove that he was not unfamiliar with the Greek tragic poets, Sophocles and Euripides.

Judge M. R. Cullen, an intimate friend, and himself a fine orator, said on this occasion, "No lawyer excelled Uriel Wright in practical management of a case. As a criminal lawyer, he stood among us unrivaled. Discussing political questions, his eloquence was supremely in the ascendant, and the brilliancy of his language won the hearts of his hearers." In conversation, also, he had the same unique combination of wit, talent, and solidity which made his forensic efforts so successful. A little more common sense would have undoubtedly given this eloquent advocate a national reputation.

There is something at least of coincidence in the fact that while Walter C. Gantt was a most promi-

ment victim of the cholera in 1866,¹ Thomas T. Gantt was among the most devoted combatants of the disease in 1849. During the epidemic the Committee of Public Health was organized, with Thomas T. Gantt as chairman. He filled this position with such ability and thoroughness that when the scourge was driven from the city and the committee disbanded they closed its existence with the following resolution :

“That the thanks of the committee are due, both in their own behalf and in that of the citizens of St. Louis generally, to Thomas T. Gantt, Esq., for the zealous, able, efficient, and impartial manner in which he has discharged the many and arduous duties devolved upon him as president of the Committee of Public Health during the existence of said committee as a Board of Health, under the city ordinance ‘to prevent the spread of cholera.’”

Thomas Tasker Gantt bears the names of two of the oldest Maryland families, and was born at Georgetown, D. C., July 22, 1814, his mother being a Stoddart. Young Gantt studied at Georgetown College, and then had an appointment to West Point, which after a two years' course an accidental injury compelled him to leave. He studied law in Upper Marlboro', Prince George Co., Md., under Governor Pratt, and after passing the bar, came West to St. Louis in 1839. Since then his career has been thronged with events and crowned with successes. In 1845, President Polk made him United States district attorney. In 1853, Mayor How made him city counselor; next year the great riot occurred. Mr. Gantt, after helping to suppress it in the streets, drew the police bill, which made the recurrence of such mob violence almost impossible. Many other instances of his successful war upon public abuses are recorded. In 1861, Mr. Gantt became a leader among the Unconditional Union men of St. Louis; served as colonel and judge-advocate in McClellan's Army of the Potomac, provost-marshal-general under Schofield in Missouri, etc. Returning to his profession after the war, Col. Gantt continued in active practice and

¹ A St. Louis journal of Aug. 18, 1866, thus notices Mr. Gantt's death :

“Col. Walter C. Gantt died very suddenly at his residence in this city yesterday, at two o'clock P.M., of cholera. He had attended a meeting at the court-house on Thursday night of the Society for the Preservation of Game, and participated in the proceedings by the delivery of a short speech, apparently in his usual good health. His wife and child were absent on a trip East. Col. Gantt was thirty-six years old, a lawyer of respectable standing at the St. Louis bar, and had been assistant circuit attorney since the fall of 1864. During the recent troubles he volunteered into the Third Missouri Cavalry, and was lieutenant-colonel of that regiment when it was mustered out of service.”

active political service until 1875, when Governor Hardin made him presiding judge of the St. Louis Court of Appeals. During the same year he was a member of the convention which framed the present Constitution of the State, and was chairman of the committee on the bill of rights, and a member of the committee on the legislative department. He was also the author of Sections 19, 20, 21, 22, 23, and 24 of Article IX. of that Constitution, which separated St. Louis from the county and made it a free city. It was the first attempt of that nature in American jurisprudence, and its success so far has proved the wisdom of the departure. Col. Gantt returned to the bar in 1877 rather than soil the ermine by making a canvass for popular election. That year, the one of the great strike, he was a leading member of the Committee of Safety, seeking to restore law and order. Col. Gantt is wealthy, esteemed, scholarly, distinguished at the bar, but most eminent as the public-spirited citizen to whom all turn, and upon whom all rely in danger and critical emergencies.

In his political career, while he has never been a seeker of office nor asked for the applause of his fellow-citizens, Judge Gantt has consistently and persistently followed a straight course as a constructionist. During the war he was an Unconditional Unionist and a war Democrat; was an opponent of the Drake Constitution and all radical or reconstructive measures; a supporter of President Johnson's policy, and being opposed to the Democratic party in the nomination of Mr. Greeley in 1872, voted for Charles O'Connor for President, but for Mr. Tilden in 1876. He claims that his political career antecedent to the war was consistent, having voted for Seymour in 1868, for McClellan in 1864, for Douglas in 1860, for Buchanan in 1856, for Pierce in 1852, for Cass in 1848, and for Polk in 1844. In 1840 he voted for Harrison on his pledge to reform the civil service; but when the Whig party repudiated that pledge he returned to the Democratic party, to which he has since constantly adhered. But in his political views, while tenaciously clinging to his opinions, he has ever been liberal toward others, and only asking the same liberty for himself. He never asked for an office. Mr. Gantt has never been a member of any church, but has since early manhood inclined toward Unitarianism in his religious belief.

He was married in 1845 to Miss Mary Carroll Tabbs, a granddaughter of Charles Carroll, of Bellevue, Md. In regard to his professional, social, and other characteristics, an eminent gentleman of St. Louis, who has known him long and intimately, says, “He is a man of genial disposition, honorable in his

dealings with his fellow-men, being possessed of a stern sense of justice, and endowed with a keen and discriminating intellect, which enables him to separate the true from the false and the ideal, being gifted in an eminent degree with the qualities which have distinguished him as a lawyer and a judge. There is no man who, by precept and example, has done more than he to preserve the honor of the legal profession in the courts where he has practiced and in the community where he has resided; and whilst it must be admitted that among his contemporaries he is one of the most learned men in the profession, it may be said that he has not considered a professional knowledge of jurisprudence at all incompatible with general culture and literary accomplishment, for in spite of the arduous duties of his profession, he has not only kept himself well informed in the political history of his country, but his literary attainments are of a high order. Industrious, energetic, and orderly in his habits, the knowledge which he has acquired on all subjects to which he has directed his attention is peculiarly accurate and reliable, and this may be attributed not less to his industry and close attention than to his natural love of truth and justice."

Another of the men who, like Judge Lackland, were the architects of their own fortune, and who climbed with steady foot against many disadvantages to a high place, was Thomas B. Hudson. His birthplace was Davidson County, Tenn., the year was 1814. Academically educated, he began law studies in 1832, and about 1835 removed to Tennessee, and began practice. About 1840 he was a member of the City Council, and two years later became city counselor. He was quite a politician, and in 1840 occurred the Chambers-Hudson duel. Hudson was a candidate for the Legislature; Col. A. B. Chambers was editor and part proprietor of the *Republican*. An editorial had contained imputations upon Mr. Hudson's truth and courage; he replied with a challenge. The parties met and exchanged three shots without effect. A reconciliation followed, and they became lifelong friends. In 1842, Mr. Hudson went to the Legislature, and distinguished himself as one of the most influential of its members. At one time he was president of the North Missouri Railroad Company. About 1854 he retired from the more public sphere in which he formerly moved, and devoted his time to the improvement of a handsome estate and the pursuits of agriculture at his home, Glen Owen, in the Florissant valley, ten miles north of St. Louis. During the Mexican war he raised a cavalry company, was chosen captain, and was one of the heroes of the Doniphan expedition. His wife was Miss

Eliza Chambers. Capt. Hudson's death occurred in 1867.

Governor Trusten Polk, one of the ornaments of this period of the St. Louis bar, which then included such men as Wilson Primm, M. Blair, and J. B. Bowlin, became widely known for his adhesion to the cause of the South. His absolute devotion to what he deemed his duty involved personal sacrifices such as earn for his convictions at least respect. After the war he resumed practice in St. Louis, and in fact just before his death, in April, 1876, was preparing an address in the land case of *Glasgow vs. the Lindell heirs*, which case had then been twenty-three years in court. He was born in Sussex County, Del., in 1811. His father was a well-to-do farmer, and his mother was the sister of Governor Peter Causey. His father gave him a university education at Yale College, where he graduated with high honors in the class of 1831. Soon after he went into the law-office of James Rogers, attorney-general of Delaware, where he remained nearly two years, when he returned to Yale College, and attended a two years' course of law lectures. Returning home again, he was admitted to the bar, but in 1835 removed to St. Louis. Two years after his arrival he was united in marriage to Miss Elizabeth W. Skinner. One of his daughters afterwards married William F. Causey, his law partner and nephew. He labored with brilliant success for nearly ten years, but his health failed. In 1845, while absent on a visit to Cuba, he was elected from St. Louis County as one of the members of the convention which assembled in 1846 to revise the Constitution of the State. James O. Broadhead, Judge Robert Wells, William M. Campbell, Myron Leslie, Uriel Wright, James S. Green, and others were also members.

In 1848 he was chosen a member of the Democratic Convention which nominated Judge Austin A. King for Congress, and in 1848 was one of the Presidential electors on the Cass-Butler ticket. In 1856 he was made the nominee of the Democratic party for Governor, and was elected after an exciting contest over his Free-Soil and Know-Nothing opponents. Receiving the vote of his party in the Legislature for United States senator, he resigned the gubernatorial seat soon after his election to the position and entered Congress. With reference to this eventful period, a prominent journal said at the time,—

"Honors have clustered upon Mr. Polk during the past year. The party he represents bore the sneers of the Benton organ for a number of years. He himself was taunted with having a constituency of sixty-four votes, and commiserated for the feeble signs of his

popularity. Since then the Benton faction in the State has steadily declined. Mr. Polk, in spite of the Benton coalition with Know-Nothings, was elected Governor by a very gratifying vote; and now, again, in joint session of the Legislature, Mr. Polk, by a vote of one hundred and one, is declared United States senator for six years, offset by the mournful vote of twenty-three for Col. Benton." Shortly after the breaking out of the war in 1861 he resigned his seat in the United States Senate and cast his lot with the Southern Confederacy. In 1864 he was taken prisoner, and was confined on Johnson's Island until exchanged several months afterwards. During the war he held the position of presiding military judge of the Department of the Mississippi. At the close of the war he returned to St. Louis to find his property in the hands of the government, but it was afterwards restored to him. Governor Polk was again offered positions of high public trust, but invariably declined. He was generally recognized as one of the leading members of the St. Louis bar, and was engaged in many important cases. He was a member of the Methodist Episcopal Church, and all his life showed consistent Christian virtues. Few men had fewer enemies. His diligence, patience, friendliness, and courtesy were the corner-stones of his success.

Judge Wilson Primm was born Jan. 10, 1810, in St. Louis, the city which recognized his talents and virtues in after-years by choosing him to many offices of trust and honor, and his death occurred in the same city, after a long and useful life, Jan. 17, 1878. He was twice married, leaving in all five children. He was the oldest of the eleven children of Peter Primm, a Virginian, and Mary La Rue, of French descent. His second wife and his mother survived him a short time. The latter, at the age of eighty-six, recalled vividly the eventful history of St. Louis, and the changes of government in the early Territorial history, the American flag being triumphantly carried up Walnut Street, and the Stars and Stripes unfurled from the fort or magazine, on which occasion, she said, all of the French and Spanish inhabitants of that day, herself among the number, shed tears of misgivings and regret.¹

Wilson Primm attended the village French schools, and then Judge Tompkins' English school, showing great application and capacity. He was then sent to Bardstown College, Ky., where he graduated, and returned to read law under Hon. Edward Bates, who

had showed him many kindnesses, and given him every encouragement. At the age of twenty-one he was admitted to the bar, and became justice of the peace for a few years. Charles D. Drake, of Illinois, was his first law partner. George R. Taylor and Charles C. Whittlesey were subsequent partners. In his younger days Judge Primm was an ardent

Wilson Primm

Whig. In 1834 he became a member of the Board of Aldermen, and was retained in that body through many administrations, being its president for many years. He was elected in the fall of 1834 to a seat in the Missouri House of Representatives, and re-elected for several terms.

His efforts in improving the harbor of St. Louis and in fostering its educational interests were great and unremitting. He urged the sale of the "commons" and the devoting of a part of the proceeds to the public schools, and assisted in organizing the first Board of Education, of which he was the first secretary. He was long in the habit of attending the public school examinations and addressing the children, and made some of his happiest efforts on such occasions. In 1846 he was an unsuccessful candidate for sheriff, but some years later was elected clerk of the Circuit Court. About 1862 he was chosen judge of the St. Louis Criminal Court, and for thirteen busy years filled that place with uniform excellence. For

¹ Judge Primm's mother, grandmother, and great-grandmother were born in St. Louis, and Col. A. R. Easton contributes the remarkable fact that lately enough to come within his distinct recollection they were all living in the city.

a brief period he returned to practice, but his health failed, and he retired permanently. It is difficult to give any one a proper idea of the well-rounded strength and simplicity of his character. He was called the best linguist at the bar; his social qualities were almost of the nature of genius, and he was a famous amateur vocalist, violinist, and elocutionist. On March 3, 1878, George R. Taylor delivered an eloquent address upon Judge Primm. It shows clearly the devoted affection he won from his associates. Others were equally loved, but none better. His professional capacity and his loyalty to right were corner-stones of his life. In many and important cases the patriarchs of the bar, Geyer, Bates, Gamble, and Spalding, were his associates or opponents. Mr. Taylor says, "As early as 1837 he was among the members of the bar which had for its object the purification of the bench, alleging that the judge of the Circuit Court, among other grievances, was too passionate and impatient while on the bench to admit a calm and full examination of cases. Subsequently, in the impeachment trial of Judge Peck before the United States Senate, the oldest members of the bar were summoned, and among them Wilson Primm, who at that early day showed attainments of so great and universal a character, combined with the blandest manners, not supercilious or obtrusive, with a voice full, musical, and persuasive, that it is no wonder he at once took high position among his brethren." As a witness in the Peck case, he was called upon to translate many of the old French and Spanish archives, and it is related that he attracted universal attention in Washington by his natural grace and charm of manner, and electrified the social circles by his wit and accomplishments.

Judge Hamilton, in after-years, remarked, "None knew better the true use and power of language, or how to match the expression to the thought. It was this peculiarity, added to soundness of judgment, aptness and beauty of illustration, and a voice of rare sweetness and variety of intonation, that made him so successful before the jury." Hon. Gilchrist Porter recently alluded to his recollections of Wilson Primm's eloquence as far back as 1836 before the St. Charles court. The resolutions passed by the St. Louis bar after his death were unusual tributes of respect and affection. In the historical address before alluded to Mr. Taylor speaks of his many professional kindnesses. In 1841 a young and promising lawyer was shot and killed; Judge Primm bore the funeral expenses and gave his splendid talent in the murderer's prosecution, and dozens of such cases occurred, notably in the famous Montesquieu trial, where his knowledge of

French was of great service. He aided largely in establishing the insanity of the elder and the innocence of the younger brother. One of the objects of his peculiar interest was the old cathedral, to which so many of the old French descendants contributed years of labor, love, and talent. He was a member of the executive committee that built the cathedral, and organized and for a long time led its choir. Though in demand on public occasions, as an orator of force and grace, his masterpiece in this line was delivered on Feb. 15, 1847, when the anniversary of the founding of St. Louis was celebrated. From the steps of the court-house Judge Primm thrilled a vast assemblage with his fervid and impetuous language, surpassing himself, and surprising even his closest friends.

Judge Primm possessed a vivid recollection of events connected with the progress of the city, and his reminiscences were very interesting. He wrote a small historical treatise, which was accepted as authority as to the matters of which it treated, and delivered numerous addresses and wrote numerous articles for the press on the history of St. Louis.

Judge James B. Bowlin, a contemporary of Judge Primm, died in July, 1874. He was born near Fredericksburg, Va., in 1804, and moved to St. Louis in 1833. In 1837 he was married to Miss Margaret Colburn. In 1838 he represented St. Louis County in the Legislature, and on the establishment of the Criminal Court he was elected judge, being the first to hold that position. Under President Polk's administration he was minister to Bogota, New Grenada, and during the second year of the administration of President Buchanan he was appointed special commissioner to Paraguay, which was the last political position he held. His diplomatic career was a very successful one, and he was held in the highest estimation abroad. Much of his success in life can fairly be attributed to the beauty, manners, and ability of his wife. He mingled in politics a good deal in early years, and established a Democratic paper. He served in Congress for four terms, beginning in 1842, and was very popular there. The warm feelings manifested when the usual bar meeting was held after his death showed how strong a hold upon his associates Judge Bowlin had gained. Hon. John F. Darby, always ready, genial, and full of reminiscences, said, on that occasion,—

"He had known Judge Bowlin since the latter came to St. Louis, and although they were on opposite sides in politics, they were always warm friends. Judge Bowlin was a Jackson man all over, and swore by Tom Benton. The speaker was an enthusiastic Whig. In 1838 they were opposition candidates for

Congress. At that time the Jackson party was dominant, and had had unlimited sway for twenty-five years. Previous to that congressmen were elected by the State at large, and twice Judge Bowlin had been so elected. A nomination on the State Democratic ticket at that day was always regarded as equivalent to an election. He recollected going out into the State to electioneer for his party, and meeting a man who told him he was wasting his efforts, as there were not Whigs enough there for seed. In the canvass of 1838, however, the State had been for the first time districted, and it happened that in this district the Democratic party was not in the ascendancy, so Judge Bowlin was beaten. Up to this time there were but two courts in St. Louis County,—the Circuit Court and County Court. The criminal business had increased until it was found necessary to separate it from the civil business, and the Criminal Court was created. The Senate nominated Judge Bowlin, and the Governor commissioned him. He was universally considered by the bar as a just and impartial judge, and in the days when Geyer and Allen, and Spalding and Bates, and other great men practiced before his bar, he was equal to dealing with all the intricate questions that arose. The speaker cited two great cases that had been tried before him, which showed what metal he was made of, as a lawyer and a man. In one of these cases a great popular interest was excited, and much angry feeling. Judge and jury, defendant and counsel, witnesses and spectators, all came into court armed to the teeth, and no man could tell when the case might be appealed from a court of justice to one of force and violence. Amid all the excitement, Judge Bowlin sat unmoved, coolly rendering his decisions, and satisfying both sides that he was intending to do impartial justice, and when at length a decision was reached it was gracefully accepted by the losing side without a word of fault-finding with the judge."

At this meeting of the bar Hon. L. V. Bogy presided; Governor Polk, Hon. S. Clemens, and others were among the speakers. Judge Bowlin had a younger brother, Richard H., who entered the navy, served with credit for eight years or so, then went to San Francisco, edited a paper, and took part in politics. Leaving this field he studied for the bar, returned to St. Louis, began practice, and was soon elected to the Legislature, but his health failed, and he died in June, 1859.

One of the fine lawyers and business men of the past was Hon. William M. McPherson. Born in Boone County, Ky., in 1813, the recipient of limited school advantages, a school-teacher himself, brought

up in a rugged way on a farm, and spending his spare hours in reading law, this gentleman deserved all his success. He studied in Lexington at the Transylvania University, practiced in his native place a while, removed to Arkansas, where he met with financial reverses, came to St. Louis (1841), and entered upon a career that enabled him by 1852 to pay up his Arkansas liabilities. He was known as an excellent advocate, served two terms as prosecuting attorney, and one term in the Legislature. His marriage in 1843 to Miss Mary Mitchell was blessed with five children. He became in later years an extensive and successful operator in real estate, built several business blocks, was a director of several railroads and other important companies, and Thomas Allen's successor as president of the Missouri Pacific. The Bellefontaine Cemetery was one of his enterprises, and, in brief, the city, as it stands, owes much to his business energy. His death occurred in November, 1872.

In 1834 or 1835, Charles D. Drake, whose biography is given on another page, began practice in St. Louis, and soon after identified himself so enthusiastically with the idea of establishing a law library that it is properly his best memorial. In 1847, May 22d, the Law Association, in honor of his efforts, tendered him a banquet. (At that time the library had twelve hundred and eighty-five volumes, sixty-nine members, and an annual income of six hundred dollars.) Joseph B. Crockett, president of the association, presided. Forty-five members took their seats, and the following invited guests: Hon. Thomas H. Benton, Hon. Nathaniel Pope, district judge of the United States for the district of Illinois; Hon. Robert Wash, formerly judge of the Supreme Court of Missouri; Hon. Ezra Hunt, judge of the Third Judicial Circuit of Missouri; Hon. Peter Ferguson, judge of the St. Louis Probate Court. In the course of his speech Mr. Drake gave a *résumé* of his labors in behalf of the library, saying,—

"When I made my home in our city it was a town of seven thousand five hundred people, now it numbers fifty thousand; then there were seventeen members of the bar, now they count nearly one hundred and forty. Of these seventeen, four have passed, by death, from our midst, four have retired from the active pursuits of the profession, two have removed to other homes, and seven remain, five of whom are with us this evening. I made in 1838 the effort which has resulted in the establishment of our association. First securing the countenance of the seniors of the bar, I went through our ranks and obtained twenty-two signatures to the original proposals. Twenty of those signers paid twenty dollars apiece, and with the

four hundred dollars thus contributed, barely enough to purchase one hundred volumes of books, the law library was commenced."

John F. Darby, in his reminiscences, mentions the fact that until 1836 large pasture and timber tracts had lain waste near St. Louis on "the common," and were the resort of desperadoes. In July, 1838, Judge Thomas M. Dougherty, of the county court, was murdered on the road between St. Louis and Carondelet, being shot with seven buckshot in the head. His friends offered a reward of one thousand dollars for the apprehension of the murderers, and every effort was made to find them, without success. In 1840 a letter was received in St. Louis from Texas, signed by a Dr. Hughes, stating that he committed the deed to gratify his revenge for an injury he imagined he suffered through the agency of Judge Dougherty. This man Hughes had many years ago been engaged in circulating counterfeit money, and was detected and sentenced in Kentucky to ten years' imprisonment, which he served out, and shortly after was seen in St. Louis. Further than this the entire tragedy has since that time remained a profound secret. In 1843 the murder and robbery of a Santa Fé trader named Chavir created considerable excitement. Joseph Brown and John McDaniel were executed in 1844; six or eight accessories, after confinement in jail for some time, were pardoned by the President.

Williamsboro', N. C., was the birthplace of one of the most popular members of the bar, Willis L. Williams, who died in March, 1857, aged forty-eight. He graduated at Amherst, studied law with Joseph Bradley, at Washington, and daily attended the Congressional debates, taking copious notes. His admiration of Clay and Webster was unbounded, and through life he was an ardent Whig. After practicing at Paris, Tenn., for a short time he removed to St. Louis (1842), and became very successful. The revising session of the Legislature of 1844-45 found him an acknowledged leader in that body. Many as were his talents, perhaps his powers of shining supreme in the social circle were most unusual. He exercised, and always for good, a strange fascination over every one he met. A born optimist, he looked on the bright side of everything, and tried to make every one happy. When after his death the members of the bar assembled, the room was densely crowded, and the oldest members of the bar vied with each other in expressing their sorrow. Sobs were heard and tears seen on many faces. It was as if a loved relative had departed. Edward Bates showed much feeling. He said he felt as if he were walking among the gravestones of his former associates. "I

have known Mr. Williams," he said, "from the first month of his residence here,—a man of warm impulses, of active heart, so to speak, sometimes impulsive, but even then, it occurred to me, his fault leant to virtue's side. His success at the bar shows at least his qualification, and even when he gave offense, as we all do sometimes, the kindness of his heart won back the affection of him that he may have offended. Mr. Williams belonged to a family remarkable for their success in life, many of them eminent in their old native State of North Carolina. Some have flourished since in South Tennessee, and he was pursuing here a course that might have rendered illustrious his own name."

Charles D. Drake, Senator L. V. Bogy, Gen. Coalter, Judge Albert Todd, Judge Primm, and others paid affectionate tributes to the deceased. Before the Court of Common Pleas, Mr. Strong said, "It would be invidious and untrue to say that he was foremost in his profession, but we all know that in legal attainments, in the number and magnitude of the cases in which he was engaged, and in the general success of his professional life, he had secured a rank among those who are really eminent. Few men could appreciate more quickly or thoroughly whatever is beautiful in thought, or elegant in expression, or striking in sentiment, or droll, grotesque, and ridiculous in its character. He possessed a great fondness for the humorous, imitated well, and was, among his other genial qualities, an admirable story-teller. He had that greatest glory of man or woman, a large heart."

Of the members of the St. Louis bar who devoted much of their time and talents to the material development of the city, few, if any, played a more active or more prominent part than Lewis V. Bogy. His family was of French extraction, his grandfather having come from Canada and settled at Kaskaskia, where he married Miss Placy. About 1786 or 1787 he began to trade with the Indians in what is now Arkansas, and owing to the lack of facilities in that section of the country, sent his son Joseph, father of Lewis V., to New Orleans to be educated. In 1805, Joseph Bogy settled at Ste. Genevieve, where Lewis V. Bogy was born on the 9th of April, 1813. French was the language of the people, and no English school was established there until John D. Grafton, from Connecticut, opened one in 1822. After remaining at this school for one year, young Bogy was sent with his brother Charles to a Catholic school at Perryville, and while there was attacked by a white swelling, which interrupted his studies for several years. He next engaged as clerk in a store, investing all his savings in books, which he studied in the evening

after business hours. He finally decided to study law, and for that purpose was admitted, in 1832, to the office of Judge Pope, at Kaskaskia, Ill. On leaving home he placed in his mother's hands the following remarkable paper :

“STE. GENEVIEVE, Jan. 16, 1832.

“On this day I left home, under charge of Mr. William Shannon, an old friend of my father, to go to Kaskaskia, to read law in the office of Judge Pope. My education is very limited, but with hard study I may overcome it. I am determined to try; and my intention is to return to my native State to practice law, if I can qualify myself, and while doing so to work to become United States senator for my native State, and to work for this until I am sixty years old. I will pray God to give me the resolution to persevere in this intention. I have communicated this to my mother, and given her this paper to keep. So help me God!

“LEWIS V. BOGY.”

His intention to become a United States senator was never lost sight of, and was finally realized. In order to acquire a knowledge of Latin, he made an arrangement with Father Condamine, a Catholic priest of Kaskaskia, who agreed to give him lessons in return for his services as altar assistant. Young Boggy served as a volunteer in the Black Hawk war, and upon the cessation of hostilities returned to Kaskaskia and resumed his studies. In December, 1833, he entered Transylvania University, at Lexington, Ky., John G. Miller, J. S. Rollins, and William M. McPherson, all of Missouri, being among his classmates. He taught school a while, returned to his studies, and graduated in 1835. In April, 1835, having obtained a license from the Supreme Court of Missouri, he opened a law-office in St. Louis, associating himself with Logan Hanton. He was elected to the Legislature in 1840, but devoted himself otherwise to his growing practice until he decided to enter politics. He removed to Ste. Genevieve, then in the St. Louis congressional district, and led the anti-Benton party there in a very bitter campaign, but was defeated. At the next election for national representatives he ran against Col. Benton himself. Though Boggy was defeated, the talents he displayed increased his repu-

tation. Two years later he was again sent to the State Legislature. In 1848 he became interested in the Pilot Knob iron ores, but ten years' experiment ruined him financially, and he was forced to return to his law practice. In 1863 he was nominated for Congress in St. Louis against Francis P. Blair and Samuel Knox, but, as the Democrats were largely in the minority, was defeated. In 1867, President Johnson called him to the head of the Indian Bureau, but the Senate, being Republican, refused to confirm him, and at the end of six months he retired, after exhibiting superior administrative capacity.

From this time he occupied no other public position until 1873. In the beginning of 1873, Hon. Frank P. Blair's term of office being about ended, Mr. Boggy announced himself as candidate for the place of United States senator. There were a number of candidates on the occasion of the Democratic caucus nomination for senator, the contest finally narrowing down to Boggy and Blair, and resulting in the election of the former by a vote of sixty-four to fifty-seven. When the election by the Legislature took place, Mr. Boggy was elected over the Republican candidate, Hon. J. B. Henderson, by a majority of fifty-nine votes. In the Senate Mr. Boggy chiefly devoted himself to the question of finance, and was especially

Lewis V. Boggy

prominent in connection with the silver bill. He was a member of the congressional commission which visited different cities for the purpose of securing information upon the silver question, and was also its chairman. He was an earnest worker for Western interests, and active in the work of securing direct trade with Brazil. As a member of the Senate, his course was marked by moderation, ability, and great industry, and he speedily won the esteem and respect of his associates. He died at his residence in St. Louis, Sept. 20, 1877. His wife, who survived him, was a sister of Gen. Bernard Pratte, and he left two children,—Joseph Boggy and Mrs. T. S. Noonan.

Mr. Bogy was a man of great generosity of heart, charitable toward all who needed help, steadfast in friendship, vigilant in the discharge of his duties, and altogether one of the best citizens St. Louis has ever had.

Hon. James S. Rollins, born in Kentucky in 1812, became a resident of Boone County, Mo., in 1830, and graduated at the Transylvania Law School in 1834. He became the political leader of his section, served many terms in the State Legislature and in Congress, and was particularly distinguished as the friend of public schools and universities, and of internal improvements. His services in the Thirty-seventh and Thirty-eighth Congresses were of peculiar importance, sustaining as he did the war measures of the government and the famous Thirteenth Constitutional Amendment.

Another "noted Transylvanian" was Greer W. Davis, born in Kentucky in 1799, and for fifty-seven consecutive years a lawyer in Cape Girardeau County, Mo., seventeen of these years being passed as circuit attorney. He died in 1878, the only survivor of the Territorial lawyers of Missouri. Since 1824 he had been a consistent member of the Methodist Church. His son is now a member of the St. Louis bar.

Descendant of a well-known artist, graduate of a New England college, a lawyer of good standing, and an officer in the late civil war, Chester Harding lived an active and useful life. His birthplace (October, 1826) was Northampton, Mass. In 1847 he began his law studies in St. Louis, under his brother-in-law, Judge John M. Krum, of the Circuit Court. The next year he entered the Harvard Law School, graduated in 1850, returned to St. Louis, in 1852 became Judge Krum's partner, and, being diligent and capable, was soon favorably known. The firm of Krum & Harding continued till 1861, when the junior partner entered the army as colonel, assigned to duty as assistant adjutant-general on Gen. Lyon's staff. He was in command at St. Louis for a few months before Fremont's arrival in August, 1861. After this he was in active service in the field until the close of the war. He resumed his profession in St. Louis, and continued in practice until his death, February, 1875. Col. J. O. Broadhead occupied the chair at the bar meeting, sympathetic resolutions were passed, and the members of the bar in a body attended the funeral.

Another lawyer of note who settled in St. Louis about the time that Gen. Harding began practice there was Newton D. Strong, son of a Connecticut minister, and a graduate of Yale in 1831. His elder brother William afterwards became one of the justices of the Supreme Court of the United States. From

1834 to 1836, Newton was a tutor at Yale. About 1837 he settled at Alton, Ill., in law partnership with Junius Wall, a college classmate, and soon after was sent to the Legislature. In 1844 he married Miss Matilda Edwards, of Alton. In 1851 he removed to St. Louis, formed a partnership with his cousin, George P. Strong, and they had an extensive clientele. But after his wife's death, in 1851, Mr. Strong's abiding sorrow drew him more and more from active life into quiet and literary pursuits. His death occurred in August, 1866, in his fifty-seventh year.

A jurist of recognized capacities and tried integrity is Judge Horatio M. Jones, born in Pennsylvania in 1826, of Welsh parentage, graduated at Oberlin College in 1849, and at the Cambridge Law School in 1853. The next year he reached St. Louis and began practice. After serving several years as reporter of the Supreme Court of the State, he was in 1861 appointed a Territorial judge of Nevada, where he made many friends. From 1863 to 1866 he had a law-office in Austin, Nev., in the heart of "sage-brush land." Returning to St. Louis, in 1870 he was elected a judge of the Circuit Court, and has since retained that responsible position. He married Miss Strong, of Livingston County, N. Y., in 1851. Another Judge Jones (William C.), a prominent lawyer at the St. Louis bar, has held offices of importance. He is a native of Kentucky (Bowling Green), and his father, Cuthbert, was a leading physician of that State. Young Mr. Jones graduated at McKendree College, Lebanon, Ill., in 1852, read law, and was admitted the next year. After a short practice in Chester, Ill., where his father then lived, he came to St. Louis, entered in partnership with William L. Sloss, which only lasted a year, and some time after with Judge Cady. When the war began he enlisted in the United States Reserve Corps, and served in Southwestern Missouri. From 1862 until November, 1865, he was a paymaster of the United States army. He then returned to civil life, entered politics, engaged in business enterprises, and in 1868 resumed law practice, first with Charles G. Mairo, afterwards with John D. Johnson. In November, 1874, he was elected judge of the St. Louis Criminal Court, proving eminently worthy of the honor. Still another lawyer of the same name, Charles Jones, of the Franklin bar, became wealthy, and spent the later years of his life in St. Louis. He was born in Somerset County, Md., in 1814, read law with Hon. William H. Handy, and with Hon. William H. Collins, of Baltimore. About 1837 he came to Missouri. His secretiveness was abnormal; it was his passion to hide his designs, even in the most

frivolous matters, and from his best friends. He was very parsimonious, regarding wealth as the chief passport to happiness; but his kindness to his slaves, whom he would never sell, and never derived any profit from, was in unique contrast to his usual habits. In July, 1876, he died, leaving a widow and four children.

Another eminent lawyer and statesman of this epoch is Hon. Charles P. Johnson, whose life will be found in the chapter on Political Progress.

The greatest loss that the bar of St. Louis had sustained for years was the death of Judge John C. Richardson, partner of Samuel T. Glover, which occurred Sept. 21, 1860. Although but forty-two years of age, the place he had won by his professional talents and illuminated by his virtues has never been more wisely filled. Though not an orator, his clear, precise, earnest, and convincing speeches gave him unbounded success with courts and juries. "A model of a good lawyer and of a good citizen" is what one of his associates termed him. Born in Kentucky in 1817, and educated at that Transylvania University which sent to St. Louis so many well-trained jurists, young Mr. Richardson spent the years between 1840 and 1850 in practice in Boonville, ranking with the best lawyers of Central Missouri. While there he married Miss Lionberger, who, with several children, still survives him. But as all roads once led to Rome, so in those days the paths of ambitious lawyers all led to St. Louis. The year 1850 saw the law-office of Richardson & Kirtley in the tide of success, but Sinclair Kirtley removed to California, and Mr. Richardson, with Samuel T. Glover, under the firm-name of Glover & Richardson, began to create by their industry and ability that reputation which brought them an immense business, and made them known throughout the entire West. In 1853, Mr. Richardson became city counselor for St. Louis. Four years later a vacancy occurred on the bench of the Supreme Court. Hamilton R. Gamble initiated an appeal from the leading lawyers of the time, asking Mr. Richardson to accept the nomination. The people indorsed him with enthusiasm, and he served until 1859, when ill health compelled his resignation, and he returned to practice, again in partnership with Mr. Glover. After his death the members of the bar assembled, Hon. Edward Bates presiding, Judges Wood and Lackland as vice-presidents, and M. R. Cullen as secretary. Judge C. D. Drake reported the resolutions, which were couched in the most tender terms of admiration, affection, and sorrow. "His departure in the prime and vigor of manhood is," they said, "a calamity to the bar and the community."

Mr. Glover, Maj. Uriel Wright, and others eulogized the truth, tenacity, and harmonious development of his character.

Samuel T. Glover is a man of the period now being treated of, but we like to think of him as a contemporary in the strictest sense, or rather as a "man for all time." Eminent as he is at the bar, it is still in public life that he ranks highest.

Mr. Glover was especially prominent in the agitation for the repeal of the "test oath" after the close of the war, and his services in that connection will long be remembered by grateful thousands whose re-enfranchisement he helped to secure. Mr. Glover had been a devoted, self-sacrificing adherent of the Federal government throughout the war, and his loyalty was unimpeachable. Upon the adoption of the proscriptive "Drake Constitution," however, in 1865, he placed himself at the head of the movement to resist those of its provisions which were aimed at citizens of Missouri who had sympathized with the South. Speaking of Mr. Glover's legal arguments in this connection, Gen. Francis P. Blair once characterized them as "arguments characterized by extensive and accurate learning, by marvelous power in the grasp of principles and irresistible vigor in their application, by the highest order of forensic eloquence, by a noble courage, by a passionate devotion to the fundamental doctrines of civil liberty as declared in the immortal 'Magna Charta' and reproduced in the American Constitution. No man," added Gen. Blair, "has been found to answer his arguments. The judges who listened to them had no responsive arguments to make, though they ruled adversely. With as clear a conscience as any man who lives Mr. Glover could have taken the oath prescribed, for no man in the Union has more faithfully than he, in act, word, and thought, at all times and in all circumstances, fulfilled his obligations to the Union. But the requisitions accompanying that oath were so at war with every principle of right that he preferred to be driven from the forum, where he had been the brightest ornament, rather than swear it. He was great before, honored for his unrivaled capacity and strength by all the members of the bar and by judges on the bench. He stands nobler and greater now in public estimation and renown. Those precious and priceless arguments of his will be read hereafter with a glow of admiration for his patriotism and his genius, and no name in Missouri will be cherished in the future in more loving honor than that of Samuel T. Glover."

In September, 1865, Mr. Glover made a test case in his own person. He was indicted for practicing without taking the oath. This indictment was so-

licited by him, as will be seen by the following letter addressed by him to the circuit attorney :

"St. Louis, Sept. 11, 1865.

"J. P. VASTINE, Esq., *Circuit Attorney* :

"SIR,—I am among those who believe that several provisions of the new Constitution of Missouri are not only highly oppressive to the citizens, but *in violation of the Constitution of the United States*. Indeed, so extraordinary are they that I deem it my duty, in person, to resist them, so far as they interfere with me, by every means which the law provides. With this purpose in view I have omitted to take the oath prescribed for attorneys and counselors-at-law, and on last Saturday and today I have been practicing as an attorney in the suit of Norman Cutter *vs.* James Clemens *et al.* Nor is it my intention to take said oath until I have secured the means of putting its constitutionality to the judicial test that I desire.

"I would thank you to institute an indictment on the above admission.

"If other proof is necessary, call on Samuel Gaty, Esq.

"I am ready to save you from any trouble in the premises by such further acts, admissions, or proofs as will enable you to present the matter fully and fairly to the court.

"I have the honor to be, sir, very respectfully yours,

"S. T. GLOVER."

The grand jury, September 20th, returned an indictment, and three days later Judge Primm sentenced him to pay a fine of five hundred dollars. An appeal to the Supreme Court was then prayed for, and a stay of execution was asked, and both granted, and time until the last day of term granted for defendant to file his bill of exceptions. Mr. Glover gave bond in the sum of five hundred dollars for his appearance before the Supreme Court, and to obey every order and judgment that might be entered against him, Abraham M. Gardner becoming his security. The October session of the Supreme Court reversed the judgment, holding the test oath null and void. The question was also carried before the United States Supreme Court, by which, in December, 1866, it was decided that the law of Congress imposing a retrospective oath of loyalty as a condition of being admitted to practice in the United States courts was unconstitutional. Although many and distinguished lawyers and jurists were associated in this great struggle, the final success before the United States Supreme Court is due in large degree to Hon. Alexander J. P. Gareschè. It must be remembered that all these men sacrificed their extensive practices, being debarred from the courts until this test case was settled so conclusively.

Another of the many gentlemen who left the law in later years to engage, and successfully, in mercantile pursuits was Maj. Ryland, from 1850 to 1858, when his death occurred, closely identified with St. Louis business interests, and in 1857 chosen president of the Chamber of Commerce. He was a native of Kentucky, but located himself at Franklin, Mo., when he was quite a young man, and soon after accepted the

appointment of receiver of public moneys, which he held until the spring of 1840. He was "recognized as honest, faithful, and competent," or, in the words of Judge John C. Richardson, "no man ever held the office longer or left a cleaner record." In 1847 he removed to St. Louis, formed a partnership with his brother-in-law, Capt. Reilly, an old law partner of Judge Richardson's, and three years later, as noted, he became engaged in commercial pursuits. At his death, the Chamber of Commerce and the St. Louis bar passed appropriate resolutions of regret.

In 1850, Judge Nathaniel Pope died suddenly, while on a visit to St. Louis. He had been for some years United States district judge of Illinois, and was a pioneer of 1808 in that State. Many leading St. Louis lawyers read law in his office at Kaskaskia.

An old member of the St. Louis bar was Alexander Kayser, a native of Nassau, born in 1815. From 1833 to the time of his death, 1864, he was in active practice. During the month (October of 1864) in which Alexander Kayser died, the bar of St. Louis was called upon to mourn three other deaths of prominent members,—Wells and Coalter died, crowned with years; W. B. Clarke, a native of Waltham, Mass., was cut off at the threshold of many honors. He had been in St. Louis only seven years, but had won marked success, and profound sorrow was everywhere expressed over his loss.

One of the judges of the Supreme Court at this time merits more than a passing notice. Walter L. Lovelace, the son of a Baptist minister, born in Virginia in 1831, toiled in his boyhood to help support his mother and sisters, taught school, worked as a farm hand, studied law, was admitted in 1854, went to the Legislature twice, and in 1865 was appointed to the Supreme Court. His death occurred in 1866. Most of his life was spent in Montgomery County. Integrity and high moral purpose were his characteristics, and the people of that region still venerate his memory.

Alexander J. P. Gareschè, already mentioned, was born in 1823, on the island of Cuba. His parents were French refugees from San Domingo in 1791, and his early education was obtained at Georgetown (D. C.) College, and afterwards at St. Louis University, where he received the highest honors, and ultimately the three degrees in the gift of that institution. In 1842 he began to study law in the office of Col. Thomas T. Gantt, and was admitted in 1845. Fervid eloquence and untiring energy were soon recognized as his characteristics, and his practice became very large. In 1846 he served as city attorney, but otherwise declined political preferment.

Mr. Gareschè was especially prominent just after the war on account of the manly resistance which he offered in the courts to the unconstitutional test oath, and his name is identified with those who, as leaders in the cause, inspired the people of the State with a resolute purpose to maintain the privileges of civil and religious freedom. He exhibited his devotion to the cause by self-denying and expensive labors in order to secure a judgment from the Supreme Court at Washington declaring the oath unconstitutional.

In 1849 he married Laura, granddaughter of Wyant Van Zandt, of the old Knickerbocker stock of New York, and nine children were born of this union. A cousin of his, P. B. Gareschè, born in Delaware, was for a time his partner (1848), and in 1855 was appointed public administrator, and afterwards elected to the same office.

In 1861, feeling that with his ideas of State sovereignty, and with his sympathies with the Southern people, he could not conscientiously take the required oath of loyalty, he resigned his office and joined his fortunes with the Confederate cause, taking charge of the powder-works of the South, a position he filled until the close of the war, after which he returned to St. Louis, becoming senior member of the firm of Gareschè, Bakewell & Farish, but died in November, 1868. Alexander J. P. Gareschè still survives, honored and successful.

Edward T. Farish, so long a law partner of the Gareschès, was and is one of the conspicuous men of his time. He was born in Woodville, Miss., in August, 1836, his father being a physician of large practice, and his mother a granddaughter of Sir William Hamilton. In 1847 his parents died. Young Farish was cared for by his father's relatives, and graduated at the St. Louis University in 1854. He studied law with Hon. A. Fenby, was admitted in 1856, and soon joined the Gareschès. From 1861 to 1864 he practiced on his own account, then formed professional relations with Hon. R. A. Bakewell, afterwards judge of the St. Louis Court of Appeals (elected in 1876). In 1867 he was married to Miss Lily Gareschè, sister of A. J. P. Gareschè, his former partner. He is an eloquent speaker, with rare power over his associates and the jury, a cultivated gentleman, and a close student. Occasional contributions to the press show his polished literary talent, and his social qualities make him everywhere a welcome guest. His practice has been chiefly in civil cases, but on several memorable occasions he has entered the criminal court. In the Britton-Overstolz contest for the mayoralty (1876), Mr. Farish and Judge Madill were counsel for the latter, and won a hard-fought field.

For some time Mr. Farish was city counselor of St. Louis.

In the ten years immediately following the close of the civil war the bar lost several valued members. Two Prussians of ability and fine legal training won rank at the St. Louis bar, and both died in the same year, 1865. Frederick Kretschmar was for eleven years clerk of the Criminal Court. He was a native of Hagen, Westphalia, born in 1806, emigrated in 1830, settled in Philadelphia, married in 1832, and removed to Missouri in 1836. In 1838 he began to publish a paper in St. Louis, but was chosen justice of the peace, and held that office for fifteen years, resigning it to take the clerkship just mentioned. At a time when party politics ran high, and he was, as a rule, in the minority, he retained the esteem and support of his fellow-citizens. Col. Christian Kribben, born in 1821 at Cologne, Prussia, settled in St. Louis in 1835 and studied law. He was afterwards a lieutenant in Doniphan's Mexican expedition, and was at one time inspector-general of the State militia. About 1848 he began to take a high rank at the St. Louis bar, served two years in the State Legislature, one term as Speaker of the House. When Gen. McClellan was nominated at Chicago for President, he was a delegate from Missouri.

Here, if the fact that these gentlemen were not more prominent upon a broader stage, would be the place for the biographies of those leading and contemporary lawyers, Frank P. Blair, Jr., B. Gratz Brown, Charles D. Drake, James O. Broadhead, Gen. J. S. Fullerton, Charles Gibson, and John W. Noble, but they belong to the public, and their biographies must be sought in the stern narratives of grand events given elsewhere in this work in the chapters on "Political Progress" and "The Civil War."

It may not be inappropriate to mention here, however, the fact that of the members of the St. Louis bar Charles Gibson has shed peculiar lustre upon his profession. In addition to the successful management of many important cases at home, he has rendered valuable professional services to foreign governments, which have honored him in return with distinctions such as are seldom conferred except for the highest merit. The decree and accompanying letter from the Austro-Hungarian government conferring the commander's cross of the Franz Joseph Order are as follows :

"837.—K. F. J. O.

"His Imperial and Royal Apostolic Majesty, Francis Joseph I., Emperor of Austria, King of Hungary and Bohemia, etc., has by an all highest decree of Dec. 15, 1882, been graciously pleased to confer upon Your Right Honorable self the Commander's Cross of His Sovereign Franz Joseph Order.

"The Chancery of the Order has the honor to make known this grant, and to send inclosed the Insignia of the Order which has been bestowed.

"VIENNA, the 16th December, 1882.

"DR. BATTIOLI.

"Chancery of Imperial Austrian

Franz Joseph Order.

"TO MR. RIGHT HONORABLE CHARLES GIBSON,
"Counselor-at-Law, St. Louis."

"No. 77.

"K. UND K. OEST.-UNG. GESANDTSCHAFT,
"WASHINGTON, 29th January, 1883.

"SIR,—In recognition of your services recently and so disinterestedly rendered to our government in the unfortunate case of our former consul at St. Louis, Mr. Bechtolsheim, His Majesty the Emperor of Austria and King of Hungary has been graciously pleased to confer upon you the cross of the commandership of His Sovereign Order Francis Joseph.

"In transmitting to you inclosed the respective decree together with the Insignia I congratulate you on the high distinction, and have great pleasure to add that by special favor the decoration is not to be returned as usual, but may remain in the family as a gratifying heirloom.

"Accept, sir, the assurance of my high consideration,

"The I. and R. Austro-Hungarian Minister,

"SCHAEFFER.¹

"TO THE HONORABLE MR. CHARLES GIBSON,
"K. V. S."

John B. Henderson, another distinguished member of the St. Louis bar, was born in Pittsylvania County,

¹ The *St. Louis Post-Dispatch* of Feb. 3, 1882, thus notices the formal act of conferring the cross upon Mr. Gibson:

"The emperor of Austria-Hungary has celebrated the six hundredth anniversary of the reign of the Hapsburgs, so far as this country is concerned, by decorating Hon. Charles Gibson, his counsel in the case against Baron von Bechtolsheim, late Austro-Hungarian consul at St. Louis, as Knight Commander of the Order of Franz Joseph. The emperor himself is Chief, and the Commanders for the inner circle are next to himself in the order. The order itself is as high as any in the empire or in Europe. This is the highest honor, so far as we are informed, ever conferred by a great European sovereign on an American lawyer. After the dismissal of Baron von Bechtolsheim, Dr. Von Gerlich, the Imperial German consul, officiated as an international courtesy in his stead until to-day, when Mr. Diehn, the new consul, takes the office. The last and most pleasing act of Dr. Von Gerlich's administration was to wait upon Mr. Gibson at his residence last evening, and on behalf of the emperor to deliver to him the decree making the appointment, the official letter of Baron von Schaffer, Austro-Hungarian minister at Washington, and the high insignia of the order. The knights of the order wear their cross on the lappel of the coat, but the Commander's insignia is pendant to a silken collar around the neck, making it a very striking personal ornament. This order, and especially Mr. Gibson's position in it, is not merely a medallion or mark of commendation, but it is a rank, and one of the very highest honors in the empire. It was well and fairly earned by Mr. Gibson in the line of professional duty."

Va., Nov. 16, 1826. His parents were James Henderson, who was born at Dandridge, Jefferson Co., Tenn., and Jane Dawson, of Pittsylvania County, Va. The family resided in Pittsylvania County until 1832, when they removed to Lincoln County, Mo., and settled there. When he was nine years old his parents died, leaving one brother and two sisters younger than himself, who naturally fell to his care during his boyhood. Having but small means, his facilities for an education were restricted at first to the common schools, and then to academies taught by good classical scholars. His tuition embraced the English branches, mathematics, and Latin and Greek, and he is yet a good Latin scholar. He taught school for several years, during which time he studied law, and in 1848 he was admitted to the bar in Pike County, Mo., by Ezra Hunt, then judge of that circuit. In 1849 he commenced the practice of the law at Louisiana, Mo., and continued it successfully at that place until 1861.

Mr. Henderson took a strong interest in political questions from an early age, and in 1848 was elected to the Lower House of the Missouri Legislature as a Democrat from Pike County. In 1856 he was again elected to the lower branch of the Missouri Legislature as a Democrat, and served during the regular and adjourned terms. In 1860 he was a candidate for Congress in the Pike district as a Union Democrat, but was defeated by James S. Rollins by about two hundred and forty votes in a total vote of about twenty-five thousand, after a spirited and memorable canvass of sixty days, during which the candidates traveled together and engaged in joint debate throughout the district.

In February, 1861, Mr. Henderson was elected as a Unionist to the State Convention called in Missouri to determine the question of secession. During its several sessions, which were held until the summer of 1863, Mr. Henderson took an active part in all of its proceedings as a Union man.

In the summer of 1861 he was appointed by Governor Gamble, then Provisional Governor of Missouri, a brigadier-general of the State militia, and was requested to organize a brigade of State troops in North-eastern Missouri. While he was thus engaged, and after having organized nearly two full regiments for the defense of the Union in that part of the State, Lieutenant-Governor Willard P. Hall, then acting as Governor, commissioned Mr. Henderson as a senator of the United States to fill the unexpired term of the Hon. Trusten Polk, who had been expelled for disloyalty, and the appointment was confirmed by the Legislature of 1862-63. The term expired March

4, 1863, and Mr. Henderson was then elected to the United States Senate for the full senatorial term ending March 4, 1869.

During Mr. Henderson's term in the Senate he acted with the Republican party, giving every possible support to the friends of the Union. He served on the following committees: Finance, Foreign Relations, Post-Offices and Post-Roads, Claims, Contingent Expenses of the Senate, District of Columbia, Indian Affairs, and others. He is the author of the amendment to the Constitution of the United States abolishing slavery, known as the Thirteenth Amendment, and immediately on its adoption in 1865 he was among the first to propose the amendment granting suffrage without distinction, which finally took form as the Fifteenth Amendment.

As chairman of the Committee on Indian Affairs, in 1867 he organized a commission, consisting of Gens. Sherman, Terry, Harney, Sanborn, and others, and went among the hostile Indians of the upper Missouri River and the plains, and succeeded by numerous treaties of peace in quelling disastrous and expensive wars then being waged by the Sioux, the Cheyennes, the Arrapahoës, the Kiowas, and Comanches.

While a member of the Senate he succeeded in having the State of Missouri reimbursed for its war expenses from the Federal treasury, which enabled the State to resume its credit, and restored its old condition of solvency.

In the Senate he acted rather on his own judgment than on the dictation of any partisan caucus. He gave a remarkable instance of his independence when, in opposition to the behests of a caucus, he voted with Fessenden, of Maine, Trumbull, of Illinois, and other Republican senators against the impeachment of President Andrew Johnson, and thereby defeated it. This vote undoubtedly prevented his re-election to the United States Senate by the Missouri Legislature of 1868-69.

In 1868, while a member of the Senate, Mr. Henderson married, at Washington, Miss Mary Newton Foote, a daughter of Judge Elisha Foote, of New York.

In 1870 he removed to St. Louis and engaged in the practice of the law, which he has diligently pursued ever since. His practice has chiefly been in the Federal, Circuit, and District Courts, and the United States Supreme Court, and has been attended with marked success.

In 1872 he was the Republican candidate for Governor, but was defeated by Silas Woodson.

In May, 1875, he was appointed assistant United

States attorney to aid in prosecuting what was then known as the "whiskey ring," which, mainly through Mr. Henderson's efforts, was entirely broken up. During the prosecutions Mr. Henderson delivered a speech which gave offense to President Grant, and in December, 1875, he was dismissed from the service of the government, since which time he has devoted himself to his profession. Whatever reputation he has gained as a lawyer he ascribes to careful, diligent work. His cases are prepared with great care; every point is fortified, and no point is deemed too unimportant to receive attention.

Gen. Henderson is fond of books, and has a large and well-stocked library both of law and miscellaneous works. He keeps up his youthful studies both in languages and mathematics. He is fond of public discussion, delights in good society, and is of a genial and hospitable nature. Gen. Henderson is fortunate in having a wife who is also fond of society, and who enters with him fully into its pleasures and enjoyments. Their house is celebrated far and near for its open-handed and unstinted hospitality.

Hon. Thomas E. Noell, born in Perry County, Mo., in 1839, and dying in April, 1867, was another of the bright young men of his time. His father, John W., had been sent to Congress from the Third Missouri District, and the son inherited political ability and unusual courage. Being well educated, he was admitted to the bar at the age of nineteen, but volunteered in the Union army in 1861, reached the rank of major of volunteers, and in 1862 was made captain in the regulars, and served bravely in many battles. Chosen to represent the Third Missouri District in the Thirty-ninth Congress, he served there on various committees, and supported President Johnson's policy. In 1866 he was re-elected, and had just entered upon his second term, when his career was cut short.

Judge William S. Allen, for many years an editorial writer on the *St. Louis Republican*, was perhaps the greatest loss of that year, though his active connection with the bar had long ceased. He was born in Newburyport, Mass., in 1805, liberally educated, a graduate of Dartmouth at the early age of nineteen, and in 1832 represented Essex County in the State Legislature. He edited the *Newburyport Herald* a while, and in 1837, moving to St. Louis, became connected with journals there. His association with the *Republican* began in 1856, and continued until within a short time of his death. In 1844 he was secretary of the Board of Aldermen, in 1849 register of the land office, in 1850 a member of the State Legislature, in 1851, and until 1855, secretary of the Territory of New Mexico, in 1855 he was ap-

pointed justice of the St. Louis County Court. It will be seen that his life was spent more in journalism than in law, but his wide and varied legal lore was of untold benefit, and his versatility was shown alike in literary, mercantile, and political articles. In the same year occurred the death of an ex-State senator, Thomas C. Johnson, who before the war had ranked as an able lawyer, but had followed the fortunes of Governor Claiborne F. Jackson.

A more than ordinarily active man of this period was Charles G. Mairo. Born in Washington City in 1828, he removed to Missouri with his elder brother, Philip, in 1840, studied law with Hon. Albert Todd, and entered into practice in 1851; the next year city attorney, in 1856 circuit attorney, in 1861 city counselor, and in 1866 appointed United States district attorney, but not confirmed by the United States Senate for political reasons, his success in his profession was evident. Generous and honest, his friends were many, and his death (in March, 1873) was widely mourned.

In the same month and year the bar lost John Decker, who was born Aug. 29, 1828, in Annapolis, Md. He graduated at St. John's College, and studied with Chancellor Johnson, of Maryland, and with Joseph Bradley, of Washington, entering on practice in 1850. In 1853 he reached St. Louis and joined forces with Robert S. Voorhis, the prosperous firm continuing until 1861, when Mr. Decker joined the Confederate army, but returned to St. Louis in 1865 and resumed his practice. He was Grand Master of the Masonic fraternity in Missouri at the time he went into the army. Two years later the county court lost Judge Busby, aged forty-four, a native of Ireland, who had been justice for four years.

In the same year (1875) that Frank P. Blair (whose life, with that of his brother Montgomery, will be found on another page) passed from the land of the living, Fidelio C. Sharp, a prominent lawyer of long standing at the St. Louis bar, also died, at the age of fifty-four years. He was a Kentuckian, grandson of Capt. Thomas Sharp, of Virginia, a Revolutionary soldier. The family was large, and noted throughout Kentucky for its intelligence and enterprise. At the age of twenty-one young Sharp was admitted to practice; in 1843 removed to Missouri, settling in Lexington, in partnership with John P. Campbell, next with Judge William T. Wood, and afterwards with Judge Samuel Sawyer; in 1857 moving to St. Louis, first in practice with Mr. Thomas, and afterwards with James O. Broadhead. In the latter connection the firm was known throughout the entire West for its ability, and did an immense busi-

ness. Col. Broadhead, his partner, said that as a practitioner Mr. Sharp had not an equal in the State,—that is, in the preparation and trial of a case before a *nisi prius* court. In speaking before the bar meeting which met to express its sorrow over his death, one speaker said, "He was an industrious man, indefatigable in his exertions to win a victory for his client, yet was fair, open, candid, gentlemanly, and friendly. He had a wonderful stock of good sense and a strong will, and accomplished a good deal. There was something peculiar in his character. He was not a great lawyer in the sense that Daniel Webster and Rufus Choate were; that culture which gave to legal learning a higher cast he did not have. In jury cases and all purely business cases he had, during the time I knew him, no superiors and few equals." During fifteen years he was engaged in almost all the important cases which occupied the courts of St. Louis, and he devoted himself to the law with untiring assiduity, never for a moment stepping aside for political preferment, and uniformly declining all proffered political honors. His happiness was in his profession and his family. He married twice, his first wife being Miss Wallace, of Lexington; his second wife, Miss Maude, of St. Louis. Both were ladies of great worth and culture. He left six children.

This year also witnessed the death of Charles C. Whittelsey, who was born in Connecticut in 1819, of a long line of ancestry, chiefly clergymen. In 1838 he graduated from Yale, taught school for a year, and then entered a law-office in Middletown, Conn., but came to St. Louis in 1841, and devoted his time to the practice of law and preparation and publication of legal works. He was the author of the "Missouri Form-Book," adapted to the statutes of 1856. He was Supreme Court reporter from 1862 to 1868, inclusive, and published Volumes XXXI. to XLIV. Missouri Reports. From time to time he furnished articles for literary and law magazines and for the daily papers. In 1870 he published a work on General Practice, which proved valuable to the profession. Insurance and commercial cases were his specialties, and he was successful in practice, though possessing no oratorical abilities. He seems to have enjoyed the utmost confidence of his legal brethren and of the community, and his capacities were such that high services as a jurist were rightfully expected from him. In 1854 he married Miss Groome, a Maryland lady, and they had six children.

In April, 1875, James F. Maury, a young lawyer, who had acquired considerable reputation in Mississippi, died in that State. His connection with the St. Louis bar was a short one. Born in 1842, in

Port Gibson, graduated at Oxford, Miss., serving three years in the Southern army, and being captured and sent to Johnson's Island for two years, his study of the law was attended with unusual difficulties. But in 1867 he was admitted, and became a partner with his father, a lawyer of some note. In 1873 he removed to St. Louis, and began to build up a good practice, so that two years later he returned for his family, and died suddenly while on his journey.

Joseph N. Litton was born in Nashville, Tenn., Feb. 4, 1846. At the age of twelve years he entered Washington University, St. Louis, as a student, from which he graduated with the highest honors in June, 1866. In the same year he began the study of law, when he was admitted to practice. From that time he continued his general studies, interrupted to some extent by employment in some important cases, until April, 1870, when he was retained by the Pacific Railroad Company as its assistant attorney, which position he filled until the merging of the company in that of the Atlantic and Pacific Railroad Company in 1873, after which he continued to occupy a like position under the management of the latter company, attending to the law business of both companies. His duties from that time were extremely arduous, testing to its utmost his physical strength, at no time very great. He not only attended to the ordinary routine of his office, but also took the principal part in the trial at *nisi prius* of many important cases in which the company was a party in St. Louis and throughout the State, and also rendering very valuable assistance in the presentment of its cases in the Supreme Court of the State and in the Circuit and Supreme Courts of the United States.

In 1874, the two corporations having become separated again, he severed his connection with the Pacific Railroad, being at the same time retained by the management of the St. Louis and San Francisco Railroad Company, successors of the Atlantic and Pacific Railroad Company, as their chief law officer. In April, 1877, owing to continued ill health, brought on in large part, no doubt, by overwork, he was obliged to resign his office of attorney of the railroad company. He went during the summer to Colorado, and there spent several months, whence he returned in the fall apparently improved in health. Soon after, however, his disease exhibited worse symptoms, and from that time he was confined to his room and bed the greater part of the time until his death on Thursday, April 11, 1878.

As a man, Mr. Litton was honorable, modest, generous, brave, and just. In manner he was quiet,

grave, and dignified. He was easily approached by others, but he wanted no one's favor. He delighted in the intercourse of friends, and was of a most kind and genial nature. He was possessed of bright wit, and was a most agreeable companion. As a lawyer, he was faithful to his clients, candid, courteous, earnest, industrious, learned, and able. His intellectual faculties were strong. He was a clear and ready thinker, and endowed with great analytical power. His judgment was sound, and his reason well balanced. He was a close student, and well grounded in the principles of the civil jurisprudence.

Dec. 2, 1879, at Cincinnati, Hon. Samuel Reber, of St. Louis, was found in his room, dead. Born in Lancaster, Ohio, in 1813, well educated, and settling in St. Louis in 1842, in partnership with Mr. Fremon, he soon gained a lucrative practice. After the Mexican war Mr. Fremon removed to New Mexico. Mr. Reber in 1856 was made judge of the Court of Common Pleas, succeeding Judge Treat. Judge Reber held this position of honor and trust with skill, integrity, and fairness until the Court of Common Pleas was changed into the Circuit Court. This position he also held until 1867, when he resigned for the purpose of again engaging more actively in practice. While upon the bench he sustained the Constitution of 1865, and was the author of the "test oath decision." Under the administration of Mayor Cole he was appointed city counselor, and during his term of office was actively engaged in defending many important suits, among which was the famous water-works case.

Another gentleman who took extreme views on the "test oath" under the Drake Constitution (1865) was ex-Judge Moody, but the course he pursued had a disastrous effect on his subsequent life. He was born in Pennsylvania in 1817, and died in January, 1880. Removing to St. Louis about 1855, he went into the law firm of Moody, McClellan & Hillyer. Capt. U. S. Grant, while collecting bills as a real estate agent, occupied a desk in the office of the firm. In the early part of the war Judge Moody was elected circuit judge of St. Louis County, and for several years discharged the duties to the satisfaction of the profession. For a year or two before he left the bench his political opinions underwent a change, and he became intensely hostile to the Drake Constitution, and absolutely refused in his official position to perform the duties imposed upon him by that Constitution. He refused to require the jurors and others to take the "ironclad oath" required by the Constitution and ordinances of the convention. This opposition led to his removal by address by the Legislature in 1866.

This year, 1880, also took from among the former members of the St. Louis bar Hon. Logan Hunton and George R. Taylor. Mr. Taylor, a sketch of whose life appears elsewhere, was one of the leading members of the St. Louis bar, and promoted many useful measures, legislative and commercial. His business enterprises drew him from legal pursuits in later years. Hon. Logan Hunton and his brother Felix were lawyers of note. The latter practiced chiefly in the southwest of Missouri. His death occurred in 1873. Logan Hunton was born in Albemarle County, Va., in 1806. Educated in Kentucky, he became a member of the State Legislature there, but removed to St. Louis in 1837, and formed a partnership with Hon. L. V. Bogy, afterwards United States senator. He married Miss Mary Jane Moss, daughter of the late Mrs. J. J. Crittenden. In 1843, Mr. Hunton went to New Orleans, remained there ten years, and held for a while the United States district attorneyship, also built up a large practice and gained a competency. After spending some years in travel in Europe with his family, he returned, in 1859, to St. Louis, and made his home near Bridgeton, which became the centre of a generous and discriminating hospitality. He left a wife and three children.

Henry B. Belt, born in Huntsville, Ala., in 1815, and dying in February, 1881, had led an eventful life. His father was a mining prospector in Tennessee, Alabama, and Hannibal, Mo., where he died in 1829, after which young Belt became a clerk in the sheriff's office, then under Archibald Gamble, circuit clerk. On the death of his father, his mother and younger brothers and sisters returned to his mother's old home, Washington, Va., but in 1837 he brought the whole family to St. Louis. In the cholera epidemic of 1849 he lost his mother, one brother, and two sisters. After this he served as deputy sheriff under James Brotherton, Marshall Brotherton, William Milburn, Samuel Conway, and Louis T. La-beaume. In 1855 he was elected sheriff on the Whig ticket. He ran again, two years later, and received a majority of votes cast, but was counted out. In 1853 he formed a real estate partnership with John G. Priest, which lasted till his death. He left a wife and seven children.

Singularly fortunate in examples of early brilliancy the bar of St. Louis seems to have been; eloquence of the highest order was amply illustrated in each decade of its history. But never since Barton, Uriel Wright, and their compeers were in their prime did a young man of thirty-four win such praise as was bestowed on the memory of Edward P. McCarty, who died in June, 1881. A native of Indiana, he studied

law in the office of Judge Miller, of Keokuk, Iowa, and came to St. Louis about the year 1861. Under Mr. Fishback he was deputy clerk of the Supreme Court, and chief clerk after Mr. Fishback's death. After having been for a time in the office of Sharp & Broadhead he was admitted to the bar. The position of city counselor, to which he was appointed by Mayor Brown, he filled admirably. He was a Democrat in politics. His wife, *née* Miss Lydia Evans, daughter of the late A. H. Evans, and two children survive him. The bar association met and passed resolutions expressive of their deep sorrow. A few days later the *St. Louis Republican* said of him, "The impression of his genius is retained by every one that knew him; possessed of a graceful form and a rich and fluent mind, he commanded attention as a unique person wherever he appeared. He had a mind of extraordinary clearness and quickness of insight. On legal questions his judgment was that of 'the intuitive decision of a thorough-edged intellect.' He was rarely wrong, and hence his cases were nearly always put in court correctly, involving no changes in their first presentment. Col. Broadhead, Gen. Noble, Mr. Chandler, and other mature practitioners bore witness to his remarkable natural gifts, and expressed their profound grief at his premature departure."

In the early years of the century, Dr. Abel Slayback was a noted physician of Cincinnati. His father was Solomon Slayback, a soldier at Valley Forge. His son, Alexander L. Slayback, studied at Marion College, Missouri, was admitted to the bar in 1838, married Anna M. Minter, of Philadelphia, and opened a law-office in Shelbyville. In 1847 he removed to Lexington, and died there the following year, leaving a widow and five children. Three of his sons afterwards became residents of St. Louis. He was a sincere Christian and a very successful lawyer, a favorite everywhere, and deeply mourned by his associates. Alonzo W. Slayback, his son, became a prominent member of the St. Louis bar. Born in July, 1838, in Marion County, he received a good education, taught school, studied law, was admitted in 1857, and began practice in St. Joseph. The civil war came with its rendings and desolations; Slayback raised a cavalry regiment, was elected its colonel, and joined the cause of the South. He fought with the greatest courage and skill, took part in more than forty battles and skirmishes, and after the cause was lost joined Shelby's romantic expedition to the land of the Moutezumas. No one has yet written the story, pathetic and well worth the telling, of the man, self-exiled, ardent, heart-broken, who could not longer stay under the Stars and Stripes, who went to Mexico,

to Central America, to the West Indies, and regions still farther South, engaging in warlike expeditions, in strange and heroic adventures, in vast commercial enterprises, coffee-planting, stock-raising, mining, and a thousand other pursuits, sometimes successful, sometimes reduced to penury and suffering. But Col. Slayback's career was not to end thus. His mother, a lady of culture, grace, and strong character, made the journey to Mexico, sought long, found her son, and persuaded him to return. So in 1866 he again entered the law in St. Louis, meeting with marked and increasing success. He became known as an orator of remarkable powers of persuasion and conquest, full of liberal impulses, and passionately loved by his friends. The gift of leadership was his; socially and politically, no man seemed to have a brighter future before him. His practice became one of the largest in the city.

Col. Slayback's tragical death in 1882 rallied his friends and roused the most impassioned sympathy. The Merchants' Exchange, whose attorney he was, placed on record an almost unparalleled tribute of their personal sorrow. Speakers, after his death, compared him to a streak of sunshine,—a man whom all loved, the friend of the poor, the helpless, the oppressed. And because of this overflowing charity he left his family in straitened circumstances. The citizens and his associates in the law gave liberally, public benefits were held, and in all a large sum was raised for the widow and orphans. Col. Dyer, ex-Governor Stanard, Rev. Dr. Snyder, and many others aided in this good work. Mrs. Wm. McKee paid one thousand dollars for a private box at the first entertainment, and then had it sold again for one hundred dollars, thus netting eleven hundred dollars for the cause. Col. Slayback's wife was Miss Alice A. Waddell, of Lexington.

A man whose youth was beset with difficulties, but who won by reason of his indomitable pluck, was Henry A. Glover, still living (1882) to enjoy the honors and wealth he has so creditably earned. In 1844, a poor, friendless lad, he came to St. Louis, and searched in vain for employment. He was willing to turn his hand to anything; a position in the school department was beyond his reach; nor could he procure a clerkship in any store; but being a good penman, and having read some law, he at last obtained copying and clerical work under Gen. Ruland, clerk of the Circuit Court. Here he spent years in toil at a meagre salary; refused, when Ruland retired, the place the latter had held, and in 1847 was admitted to the bar. Two years later he was city attorney. It has taken but a few words to tell this story of man-

hood, aspiration, and success, but there is an eloquence finer than speech about its steady progress from friendless obscurity to recognized position. In 1851, Mr. Glover was sent to the State Legislature, and from 1852 to 1856 was circuit attorney for St. Louis. Many able and ingenious men have filled this office, but "it is one of the traditions of the Criminal Court that the State never had a prosecutor whose work, in point of success or ability, compared with that of Circuit Attorney Glover." His treatment of witnesses was admirable, and his skill in conducting a cross-examination has rarely been surpassed. In the argument of cases before juries he also displayed rare excellence. Judge Lackland, who was judge of the Criminal Court, said that the only criticism to be indulged in on Mr. Glover as circuit attorney was that he was too successful,—that he not only convicted the guilty, but in some instances verdicts were rendered against innocent parties by juries carried away by the vigor and force of his prosecution. It was at this time and in this position that the full strength of the man developed itself, and it was brought out by his conflicts in the Criminal Court and in the Supreme Court with such men as Leslie, Wright, Blennerhasset, Cline, and others who then practiced at the criminal bar, whose reputation and efforts there are well remembered.

When Judge Lackland retired in 1856, his successor was Henry A. Glover, who continued to hold the office until 1864, when he returned to his private practice, became city counselor, and was a member of the Constitutional Convention of 1865, and chairman of its judiciary committee. In 1868 he was nominated judge of the Supreme Court by the Republicans, but declined the nomination, though tantamount to an election, and Judge Currier's name was substituted. Since that time his large and extended private practice has required all his attention, and some of the heaviest litigation in the courts has been in his hands. As the legal adviser of the city and county he had to deal with many and important interests, such as the gas question, the Pacific Railroad controversy, the long fight over the school lands, the taxation of shares in national banks. As judge over the Criminal Court, no man in the State did more to settle legal principles in reference to crimes and offenses. Well rounded, crowded with achievement, his life-record merits the study of young men in hours of discouragement.

Among the leading barristers of St. Louis now living is Britton Armstrong Hill, a lawyer of forty-two years' practice in St. Louis. He was born in Hunterdon County, N. J., in 1816, received his early

ST. LOUIS BANK NOTE COMPANY

Britton A. Hill

LIBRARY
OF THE
UNIVERSITY OF ILLINOIS.

education at Ogdensburg, N. Y., and was admitted to the bar at Albany, and to the Court of Chancery at Saratoga, in that State, in 1839. In 1841 he came to St. Louis, where he was admitted to the bar by Judge Mullanphy. In the same year he formed a partnership with John M. Eager, which was dissolved in 1848. In 1850 his brother, David W. Hill, became his partner, and in 1854, William N. Grover was added to the firm, which thus became Hill, Grover & Hill. This partnership continued till 1858, when it was dissolved, and Mr. Hill gave his attention wholly to practice in important land, insurance, and railroad cases. In 1861 he entered into copartnership with the Hon. D. T. Jewett, which continued about ten years. In 1863 he, with Hon. Thomas Ewing, of Ohio, and Hon. Orville H. Browning, of Illinois, formed a partnership in the city of Washington, under the firm-name of Ewing, Hill & Browning, for the transaction of business in the courts of the United States. This firm, which was one of the strongest in the United States, was terminated in 1865, when Mr. Hill returned to St. Louis. In 1873, Frank J. Bowman, of Vermont, became his partner, and continued till 1876. In his extensive practice in the national and State courts Mr. Hill became strongly impressed with the dangers which seemed to him to threaten the institutions of the country, and in 1873 he published his first work, entitled "Liberty and Law under Federative Government."

In 1876 he published two pamphlets urging the Democratic party to adopt his views with regard to absolute money, and early in 1877 put forth another, entitled "Gold, Silver, and Paper as full, equal, Legal Tenders." The system which was advocated in this pamphlet was adopted in 1878 by Congress and the Treasury, and the financial success which has followed is a source of just pride to its author. In the autumn of 1877 he called, at St. Louis, a State Convention, the object of which was the advocacy of measures for the overthrow of monopolies, for the establishment of governmental control of railroads, telegraphs, and other internal improvements, postal savings-banks, international clearing-houses, courts for the settlement of all national differences without resort to war, and the restoration to the people of the public domain that had been given to railroads. In the campaign of that year he was active in the advocacy of the principles set forth in the platform of that convention. His health failed in 1879, and he was compelled to retire from active political life. In 1880 the second edition of "Liberty and Law" was published, setting forth fully his views of a complete system of popular government. This work was highly

commended by the press, and by members of the United States Supreme Court and of several of the State courts. In 1882 he was, without his solicitation, made a candidate for Congress in the Ninth District of Missouri. In this candidacy he was simply the standard-bearer of the Anti-Monopoly party, without, of course, any expectation of an election.

Mr. Hill has retired from the active practice of his profession, with an ample competency, and now only engages as counselor in important cases.

His great popularity among people of all classes has arisen not alone from his eminent intellectual and legal abilities, but from his large humanity, which has manifested itself whenever circumstances permitting its exercise have arisen. One instance may be cited. In 1849, when St. Louis was visited by the cholera, and the physicians of the city were unable to visit half the sick, Mr. Hill, who had been a medical student, "went daily for several weeks into the poor districts, where the scourge was most fatal, visiting the sick, laying out the dead, and relieving the distresses of the poor and unfortunate by all the means in his power at his own expense."

The great aim of his life, as illustrated in his last work on "Liberty and Law," has been to elevate the laboring and producing classes, to abolish all corporations that usurp or control the means of public intercommunication, to remove the tax on lands and manufactures, and to establish a graduated income tax to compel capital to bear its just share of the taxes now borne by labor.

The Empire State has the honor of ranking among its sons Judge Albert Todd, who was born March 4, 1813, near Cooperstown, Otsego Co., N. Y. His parents were Scotch and English, his Scotch blood coming through his father, who was a direct descendant of Christopher Todd, one of the original colonists of New Haven, Conn., and his English through his mother. Albert Todd was the fourth of eleven children. He had the benefit of the public common schools at the rate of four months in the year until he was fifteen years old. While he was not engaged at school he was trained to work at some of his father's vocations. His early choice was that of a seafaring life, but after a brief experience in coasting, which his parents allowed him, he gave it up and chose a professional life, with the privilege of a collegiate education. He was in his eighteenth year when he began his studies in Amherst, Mass., and in 1832 he matriculated at Amherst College. The next year he left Amherst and became a member of the sophomore class of Yale College, and graduated in 1836 with an appointment for an oration. During

the greater portion of his senior year he was engaged in teaching school, and by this means earned the money to pay the expenses of his senior year. On leaving Yale he chose the profession of law, and began his studies in the office of Judge Arphaxed Loomis, in Little Falls, Herkimer Co., N. Y. The regulations in the State of New York then required a seven years' course of study before application could be made for a license to practice in the inferior courts of record, and three years' additional study, with the previous admission to practice as an attorney, before an examination was allowed for a license to practice as counselor and solicitor in chancery. Of the first seven years, a student was allowed a credit of four years if he was a graduate of a college. Mr. Todd prepared himself for his first license to practice, and sought a location in the West. He selected St. Louis as the place to practice his profession, and arrived on the 9th of November, 1839. In March, 1840, he was licensed to practice in the courts of Missouri by Judge Tompkins. In 1854, Mr. Todd was elected to the Lower House of the Missouri Legislature. During this session he devoted his services to revising the laws of the State, which duty was performed that session.

In 1860 he was a candidate for Congress on the Bell and Everett ticket. He was a Whig in politics until the dissolution of that party; since then he has acted with the Democratic party.

Mr. Todd was one of the freholders who provided a scheme for the separation of the city of St. Louis from the county of St. Louis, and to organize new governments for them, and he was a member of the State Convention held in 1875 for revising and amending the Constitution of the State.

He has always taken an active interest in public enterprises. He is one of the trustees of Washington University, and has given his services gratuitously as professor in the Law Department, of which he is one of the founders. He was one of the founders of the St. Louis Agricultural and Mechanical Association, and of the University Club, Public School Library, Mercantile Library, and the Missouri Historical Society. He was also one of the first members of the St. Louis Bar Association, and is a member of the Academy of Sciences, and one of the founders of the first St. Louis Cremation Society.

For the last twenty-two years Mr. Todd has not practiced in the courts, having withdrawn on account of his health. He continues an office practice of a limited character from his attachment to the profession.

Mr. Todd has co-operated in nearly all enterprises

undertaken by private corporations for promoting the attractions of the city and its facilities for trade and commerce.

A graduate of the Michigan University, W. H. H. Russell climbed to enviable prominence in his chosen profession with surprising rapidity, and has added to the technique of law a fund of general knowledge that few persons surpass. Born in Michigan in 1840, of sturdy farmer stock, student, after leaving the university, of the Ann Arbor Law School, he located in 1864 at Memphis, Tenn., entering the office of W. K. Patson; the next year becoming counsel for Capt. John A. Morgan in a noted case against the general government, he won it, received a fine farm of six hundred and forty acres in Arkansas, and fixed at one stroke his own reputation. The year 1867 was spent in travel; 1868 saw him a resident of St. Louis. Maj. Uriel Wright, his warm friend, secured him as Hon. R. S. Donald's associate in the murder case of Dr. Headlington. Charles P. Johnson and J. P. Colcord were their opponents. The trial was before Judge Wilson Primm. The admiralty case of the "Bright Star," involving constitutional questions of importance, was shortly after placed in his hands. Though his opponent was the United States attorney, General Noble, a very able lawyer, Mr. Russell won his case. His speech in the noted divorce suit of Redelia vs. Dr. James Fischer was printed and widely circulated for its wit and sarcasm. Then came that long, strange romance of the Max Klinger trial, a boy of seventeen, who murdered his uncle. There seemed no hope for him. Judge Primm chose Mr. Russell as Klinger's counsel. The case had three jury trials, was twice before the State Supreme Court, and in 1872 was decided by the United States Supreme Court, after having been unsettled for over four years. Mr. Russell has since been engaged in many important cases, and is in great demand as a public speaker. In 1871 he visited Europe, and wrote letters to the *Democrat* and *Republican*. Ever an admirer of the fine arts, a lover of out-door sports and rural delights, a hard student in his profession, he deserves his success and his popularity.

Blennerhasset's success as a public prosecutor was not equaled again in St. Louis until the days of Col. James C. Normile, whose career in this city began in 1869, he then being but twenty-one years of age. He graduated at Georgetown (D. C.) College, and studied law in Columbia Law School, Washington, D. C., and under Hon. O. H. Browning and Gen. Thomas Ewing, then in Washington. The former gentleman took a warm interest in young Normile, and did much to develop his powers and waken his ambition. The young

UNIVERSITY OF TORONTO

A. P. Dyer

lawyer used the libraries and other advantages of Washington to the utmost, and between 1860 and 1868, besides serving for a time in the army, was a witness to some of the most stirring scenes in American history. When, in 1869, he landed in St. Louis, he remained idle for some time. Chosen to defend a young man for murder, with Governor Johnson as prosecutor, he made a three-hour speech that was like a tidal-wave, sweeping down opposition and bearing him into an immediate renown. This was the noted Fore trial, and his speech was published in full in the *Missouri Republican*. It gained him the nomination of circuit attorney on the Democratic ticket, though three of the oldest and best lawyers at the bar were his opponents. Being elected, he bent all his splendid energies to the task of making the best possible record in that office. A public prosecutor has to familiarize himself with all the secrets, sources, and wanderings of crime, and analyze the most profound mysteries of the human soul in health or disease. The records of the courts and the columns of the press for the past ten years show how great, continuous, and often unexpected have been the successes of Col. Normile, pursuing his object with sleuth-like determination through the most complex labyrinths. The trial of Antoine Holme, for wife-murder, of William Morgan, for the same offense, of Julia Fortmeyer, a professional child-murderess, of John McNeary, for murder, were all State trials that tested the best abilities of Col. Normile. Called upon on many public occasions for speeches, his utterances would fill volumes. Always apt, ready, and eloquent, he is a marked and interesting figure among St. Louis lawyers.

David Patterson Dyer was born in Henry County, Va., Feb. 12, 1838. In 1841 his parents migrated to Missouri and settled near Troy, in Lincoln County, where Mr. Dyer labored on his father's farm till eighteen years of age, and enjoyed only the educational advantages afforded by the common schools of his neighborhood. In these, however, he acquired sufficient education to enter college at St. Charles, where he remained a year. At the age of twenty, or in 1858, he commenced the study of law in the office of Hon. James O. Broadhead, of Bowling Green, in Pike County, and at the end of 1859 he was admitted to the bar of Missouri. In 1862 he removed to Louisiana, Mo., and formed with Hon. John B. Henderson a partnership which continued till 1870. In 1875 he removed to St. Louis, which has ever since been his residence. In 1881 he entered into his present partnership with B. D. Lee and John P. Ellis, under the firm-name of Dyer, Lee & Ellis.

In 1860 he was elected circuit attorney in the Third Judicial District of Missouri. In 1862 he was chosen to represent Pike County in the Legislature of Missouri, and though but twenty-four years of age was made chairman of the judiciary committee. In 1866 he was made secretary of the State Senate, and in 1868 was elected to the Congress of the United States. In 1875 he was appointed United States attorney for the Eastern District of Missouri, and by his able management of the celebrated "whiskey ring trials" achieved a national reputation.

In 1860 he was a Douglas Democrat, and on the breaking out of the civil war in 1861 he took an active part in the organization of the First Regiment of Home Guards. In 1864 he left his seat in the Legislature to raise and organize the Forty-ninth Regiment of Missouri Militia, and was made its colonel. He served with the regiment in 1864 and 1865, under Gens. Rosecrans and Canby, and took an active part in the siege of Mobile.

The honorable positions which he has held, and the important duties he has been called to discharge, are the best evidences which can be offered of his ability, and of the esteem in which he is held by his fellow-citizens.

In 1860 he was married to Miss Lizzie Chambers Hunt, daughter of Judge Ezra Hunt, of Pike County, Mo., and his domestic relations have been exceedingly happy.

The son of Dr. Bernard G. Farrar, one of the earliest and most famous of St. Louis physicians, was educated as a lawyer, and became one of the most efficient members of the county court. James S. Farrar was born in St. Louis in 1839, and educated at the old college which stood on the corner of Ninth Street and Washington Avenue. In 1861 he raised a company at his own expense, was made captain, and assigned to the Thirtieth Missouri Volunteers, and was with Gen. Francis P. Blair's brigade in the hard service of 1862 and 1863. He was commissioned major about this time. In 1865, Governor Fletcher appointed him justice of the county court of St. Louis, and the people at subsequent elections signified their approval, so that he served in that office until 1876. When Judge Farrar assumed this office he was a rich man, but he gave lavishly of his means to the sick and poor, sacrificing much time and money to the public service. Largely to his exertions was it due that the county recovered its seven hundred thousand dollars loan to the Missouri Pacific Railroad in 1875, after it had been given up as lost. Frank J. Bowman, county counsel, proposed action, and with Judge Farrar carried the case to a successful close.

It has been said that class valedictorians never amounted to much afterwards. Josiah G. McClellan is evidence to the contrary. Born in 1824, in Wheeling, W. Va., of New England stock, he took the highest honors in 1847 at Williams College, began the study of law, wrote articles for the journals, and being admitted started for St. Louis in 1850, with fifty dollars in his pocket. He entered the office of Peter A. Ladue, assessor of the county, and as chief clerk familiarized himself with the land and land-owners of the city. In 1851 he began practice, associating himself with Judge Moody, afterwards of the Circuit Court, and Col. Hilyer, afterwards Gen. Hilyer, of Gen. Grant's staff, Capt. U. S. Grant at that time occupying a desk in the same office. In 1856, Mr. McClellan married the daughter of F. C. Sharpe, a renowned Kentucky lawyer. The civil war disrupted the firm. Mr. McClellan removed to Kentucky, and returned in 1863, the disasters of the war having ruined him financially, and he had to begin over again. His practice grew, and turning his attention to land titles, he decided to make an index of titles to all the real estate in the county of St. Louis. This was a gigantic task. There are over six hundred books of records of deeds in the recorder's office, averaging five hundred pages to a volume. The various concessions, grants, and charges under French, Spanish, and English law immeasurably increased the difficulty of this task, but its value to the public needs no comment. It is one of those works which remain as monuments of industry long after their projectors are dead.

George W. Bailey was born in St. Louis Nov. 27, 1841. His father, George Bailey, familiarly known in St. Louis as "the carriage man," was a native of New York State, where he was born in 1813. He was left parentless and penniless at childhood, but by energy and perseverance rose from poverty to an independency. He learned the trade of carriage-blacksmithing at Bridgeport, Conn., thence diligently working his way into a small carriage business, and afterwards to a greater. In 1837 he opened in St. Louis the first carriage repository and manufactory of consequence established in the Mississippi Valley. The founders and proprietors of the "Fallon" and "Wright" carriage manufactories of St. Louis learned their trades in the establishment of Mr. Bailey. In St. Louis he rose rapidly to an independent position, and heavily invested the fruits of his enterprise and labor in St. Louis real estate, in which he had unbounded confidence, which he maintained to the time of his death in March, 1878. He was thus closely identified with St. Louis interests for more than forty

years, during which period his business sagacity was widely recognized, and his commercial honesty was without blemish or question. Mr. Bailey left a large estate for equal distribution among his surviving heirs, five sons and one daughter. Most of the sons are prominent business men of St. Louis. Mrs. Mary Bailey, the mother of these surviving children, was a native of Bridgeport, Conn. Her mother was a Palmer, hence her children are members of the celebrated "Palmer family," whose reunions bring together so many thousands from all parts of the country.

George W. Bailey, the second son, who was administrator of his father's estate, was educated in the best schools afforded by New England, finishing his course at the New York Conference Seminary and Collegiate Institute, of Charlotteville, N. Y., after which, entertaining an ambition to follow his father's example to success in the carriage business, he voluntarily acquired, as indispensable to success, a knowledge of the business by learning the trade of carriage-trimming at the establishment of Wood Brothers, in Bridgeport, of which fact he is to-day justly proud, although circumstances caused a departure from his original intention. His father retiring from business, a regular collegiate course was then determined upon, but the breaking out of the civil war in 1861 prevented the execution of the latter purpose. Young Bailey promptly enlisted as a private soldier in the first "three years'" regiment from Connecticut (the Sixth Infantry), and served as a private for seventeen months, during which period the regiment was attached to the Army of the Potomac at Washington, and the Army of the South at Hilton Head and Beaufort, S. C. With the regiment he participated in the expedition which sailed from Fortress Monroe, Va., to Port Royal, S. C., in November, 1861, under Gen. W. T. Sherman and Commodore Dupont, and which was threatened with destruction in the terrible ocean storm off Cape Hatteras. He witnessed the picturesque bombardment of Forts Walker and Beauregard, Nov. 7, 1861, and was among the first Union troops on South Carolina soil.

He participated with his regiment in the campaign and expeditions about Hilton Head, and witnessed the bombardment and reduction of Fort Pulaski, at the mouth of the Savannah River, from Danfuskie Island, where the Sixth Connecticut was stationed, prepared for an emergency.

In February, 1863, Mr. Bailey was commissioned by Governor Gamble as second lieutenant in the Sixth Missouri Infantry, then stationed at Young's Point, La., opposite Vicksburg, and a part of the Fifteenth Army Corps and Army of the Tennessee. He par-

Geo. W. Bailey.-

LIBRARY
OF THE
UNIVERSITY OF ILLINOIS

ticipated in the entire campaign of Vicksburg, commanding his company in the bloody assaults upon that stronghold on the 19th and 22d of May, 1863. He was slightly wounded, but remained in the field until the surrender of the city, July 4th. He participated in the battles of Champion Hills and Jackson, and accompanied his command to the relief of Chattanooga, when the Army of the Tennessee, under Grant, hastened to the relief of the beleaguered Army of the Cumberland, under Thomas. With the Fifteenth Army Corps, under Sherman, he participated in the bloody battle of Missionary Ridge and the night pursuit of Bragg's defeated army. Thence he proceeded with the Fifteenth Corps to the hurried relief of Burnside, besieged by Longstreet at Knoxville. After the raising of the latter siege the army returned to winter-quarters in Northern Alabama. He participated in the Atlanta campaign, opening in May, 1864, and took an active part in the battles of Resaca and Dallas, and several minor engagements and skirmishes with his company. When the term of service of his regiment expired he, with most of the regiment, promptly re-enlisted for "three years, unless sooner discharged." Shortly after he was promoted to be first lieutenant of his company, and shortly thereafter detailed from the regiment to serve as aide-de-camp on the staff of Maj.-Gen. Morgan L. Smith, then commanding the Second Division of the Fifteenth Army Corps, in which capacity he remained during the rest of his service in the army. At the battle of Kenesaw Mountain, Ga., he performed a brilliant service. Having been directed to accompany the assaulting lines, and report concerning the position and works of the enemy, he was in the thickest of the fire of that terrible assault, and observed the insurmountable obstacles forbidding the success of the venture. He picked his way back among the dead and wounded, and reported to Gen. Smith the causes of defeat. As orders had been given to "re-form and re-assault at three P.M.," it was important that Gen. Logan (commanding the Fifteenth Army Corps) should be at once apprised of the situation, and Lieut. Bailey was detailed for that purpose. Mounted, he made his way three miles through the timber cover to Logan's headquarters, where he found Gen. Logan and Gen. McPherson. He reported the situation, and was questioned by Gen. McPherson as to his own opinion, and modestly said that he thought that any further attempt to carry the works by assault would prove only a useless sacrifice of life. Thereupon he was directed to return to Gen. Smith with the order that he was not to re-assault without further orders. Lieut. Bailey dashed back, and on the way was the target of

batteries, whose aim was to intercept a solitary horseman galloping across the open space, and evidently the bearer of a very important message. Eventually an exploding shell prostrated the horse and dismounted and severely wounded the rider. Regaining their feet, though torn and bleeding, rider and horse were soon again hurrying to insure the delivery of the order. When he arrived the troops were in line for another assault. The welcome order was delivered, the bugle sounded the halt, the troops cheered, but the enemy, mistaking the cheers as indicating another assault, opened a furious fire upon the supposed advance. The "further orders to assault" never came. Thus many valuable lives were saved from useless sacrifice.

At the battle of Atlanta, July 22, 1864, Lieut. Bailey was assigned to the important duty of ascertaining at what point in the Confederate lines Hood's forces were massed for the assault on the Federal works, in order that they might be opposed by the Union reserves. He selected an elevated position immediately in rear of the Federal works, and awaited the terrible battle which followed, and was captured and taken into Atlanta. While at a point about forty miles within the Confederate lines he escaped by the novel means of being buried alive, and permitting his captors to march off and leave him. After two and a half months of endeavor to regain the Federal lines, enduring many hardships, and having many narrow escapes and romantic experiences, he finally gained a point within one mile of the Federal pickets, where he was captured by Confederate guerrillas, taken into the woods, and given "two minutes" to prepare to die. By remarkable presence of mind and by resorting to a ruse he again escaped, though shot at four times, receiving a rifle-ball through his right lung and shoulder, which wound for months after seriously threatened his life. He regained the Federal lines at Atlanta, gradually recovered, and when Sherman "marched to the sea" was, with other wounded, removed to St. Louis, and subsequently promoted captain of his company, but retained his position on the division staff until the close of the war.

A graphic account of his peculiar experiences at the battle of Atlanta and while within the Confederate lines has been published by Capt. Bailey in a neat little volume entitled "A Private Chapter of the War," which was highly commended by officers and soldiers of the late war, and referred to by the press generally throughout the country as one of most thrilling and absorbing interest.

During the war Mr. Bailey acted as special artist and correspondent of the *New York Illustrated News*,

and his many sketches and accounts of war incidents appearing in that pictorial work were noted for a degree of accuracy hardly to be expected from mere war correspondents and artists, whose duty required of them no exposure to extraordinary dangers.

After the surrender of Lee and Johnson, Capt. Bailey was mustered out of the service of the government, and shortly after received from Governor Fletcher, of Missouri, a position on his staff, with the rank of first lieutenant, and was assigned to duty as enrolling officer of the city and county of St. Louis, and enrolled all citizens subject to military duty into regiments of Missouri militia. In June, 1865, Mr. Bailey had sufficiently recovered from his wound to commence the study of law in the office of Hon. Charles D. Drake, of St. Louis. He completed his legal studies in the office of the late Judge James K. Knight, of St. Louis, and was admitted to the bar of Missouri in 1866 by the late Judge Reber, and to practice in the United States courts by an examining board in 1867. He has ever since been practicing law in the city of St. Louis, enjoying a handsome practice in the civil and appellate courts, which was won only by a strict and careful attention to business, conscientious discharge of duty, and unquestioned integrity, coupled with acknowledged ability.

In 1870, Mr. Bailey married Mary G., daughter of Dr. G. W. Scollay, of St. Louis, of which union three children were born, two of whom still survive. For the benefit of his family Mr. Bailey established his home in Kirkwood, a suburban town thirteen miles from the city on the Missouri Pacific Railroad, where he resided until 1878, when he removed to the city.

When Mr. Bailey went to Kirkwood the town court was held in general contempt on account of its futile efforts to enforce the law and command respect. The orders and writs of the court were disregarded and remained unexecuted, and the recorder was in court openly defied and insulted by some of those who were violent in their opposition to the enforcement of the town ordinances against the sale of intoxicating liquors without a license. At the earnest solicitation of the recorder, Mr. Bailey accepted the appointment of prosecuting attorney for the town, and grasping the situation, at once inaugurated a new order of things. His first step was to enforce respect for the law and the court, which having been accomplished by a series of energetic and masterly proceedings, prosecutions were then vigorously conducted, fines were collected, and the guilty punished, and Kirkwood has ever since had a worthy court.

In 1874, Mr. Bailey was nominated and elected for two years a member of the House of Representatives

of the Missouri Legislature. His representative district extended entirely around the city of St. Louis, from the Missouri to the Mississippi River, embracing three large townships. He was elected as a "Straight" Republican, defeating both a Democratic and a "Liberal" Republican opponent. In the Legislature Mr. Bailey took an active and prominent part in all measures of importance which came before the House, and, as the most prominent Republican newspaper of the State said, "made his influence felt on the right side of almost every contest in the House."

An incident illustrating the fidelity of Mr. Bailey to his tried friends is found in the record of the contest between the Missouri Pacific Railroad Company and its colored passengers in 1873. The latter were sold only first-class tickets, but were compelled to ride in the smoking-car. Women and children and infants constituted no exception to the requirement. Finally a colored girl attempted to enter the regular Kirkwood passenger-car, but was forcibly opposed and maltreated by the brakeman. Her friends sought redress, but resident counsel were generally afraid to take hold of the case on account of "public sentiment." Mr. Bailey was appealed to, and accepted the case, ignoring "public sentiment," and glad to be able to cancel a portion of his indebtedness to the colored race on account of services gratuitously rendered to him while in the Confederate lines. He declared that the requirement of the railroad company was a discrimination against "race and color," and was prohibited by the Constitution of the United States and of Missouri, and secured the arrest, conviction, and fining of the brakeman for assault and battery. A civil suit for damages was also prepared, but was ended by the company agreeing formally to acknowledge the right of colored passengers to ride in first-class seats at first-class prices. The case attracted widespread attention, the question involved (the application of the Fifteenth Amendment) being put to the test for the first time in Missouri.

: During the labor riots of 1877, when mobs held possession of St. Louis, Mr. Bailey's military knowledge was rendered available, and he was prominent in effecting the military organization in Kirkwood for home protection known as the "Kirkwood Rifles," which was composed of the most prominent citizens of the town. The company was drilled to efficiency by Mr. Bailey and others, and its services were tendered to and accepted by the town authorities to assist in the preservation of the public peace. Mr. Bailey succeeded Capt. Wright as commander of the company, and remained in command until its services were no longer required.

In politics Mr. Bailey is an earnest Republican.

He is generally recognized as a skilled parliamentarian, and is a prominent member of various orders and societies,—the Masonic fraternity, the American Bar Association, the national and local Legion of Honor, the Society of the Army of the Tennessee, and the Grand Army of the Republic, etc.

Mr. Bailey is also an enthusiastic advocate of outdoor recreation, especially for professional men. Being deprived, on account of his wound, of even the unsatisfactory benefits afforded by a city gymnasium, he has always set apart convenient days for out-door exercises in the hunting-fields, claiming that more can be accomplished in six days by spending one in such recreation than otherwise. He is an expert wing-shot, and an admirer of well-bred and well-trained setters and pointers, and attributes his present excellent state of health and power of endurance to a naturally tough and wiry physical constitution, somewhat shattered during the war, but preserved and fostered by periodical and ample exercise in the open air of the country, which he regards as a sure prevention of most of the complaints which mind and flesh are heir to.

Late in the eighteenth century (about 1790) Robert Morrison, of Philadelphia, settled in ancient and quaint Kaskaskia. Fortunate in many things, most of all fortunate in his wooing, he courted and won Eliza A. Lowry, daughter of Col. Lowry, of Baltimore, for years afterwards called "the most brilliant woman in the valley of the Mississippi." Of this marriage James L. D. Morrison was born, April 12, 1816. His father became the largest mail-contractor in Illinois. When but fourteen young Morrison was sent hither and thither, collecting drafts and money, and arranging business matters with tact and fidelity. By 1832 he carried mail two days, "kept store" one day, and attended school three days each week. That year he became midshipman in the United States navy, cruised twenty-seven months in the South Pacific, afterwards in the West Indies, became rich, studied law, and in 1836, returning to Illinois, completed his studies and was admitted. He joined the Whigs with ardor, stumped the State, and became one of its best-known leaders, but in later years has been a Democrat. He now resides in St. Louis. Col. Morrison's second wife is Adele Sarpy, daughter of John B. Sarpy, one of the pioneer St. Louis merchants.

Richard Bland, of the first Continental Congress, had no more notable descendant than Hon. Peter E. Bland, born in St. Charles County, March 29, 1824. He was also connected with the learned Chancellor

Bland, of Virginia. Educated in the Methodist college at St. Charles, forced to teach school for a livelihood, student in Judge Lackland's office till 1849, young Bland struggled upwards, and when admitted opened an office, and soon became known as a worker, commanding a large practice. From 1861 to 1863 he served in the Union army as colonel of a Missouri cavalry regiment. Locating in Memphis, Tenn., he practiced with success; in 1868 returned to St. Louis, almost a stranger, but became connected with some of the most important Supreme Court cases, and his services have since been in continual demand. His wife, Miss Virginia Clark, of Richmond, Va., whom he married in 1845, died in 1870, leaving three children, all grown.

Richard Aylett Barret, son of Richard F. and Maria Buckner Barret, was born at Cliffland, the home of his grandfather, a place of great natural beauty, near Greensburg, Ky. The estate was situated on a plateau, diversified by hill and dale, and bordered on the one side by forests of beech and oak, and on the other by lofty cliffs, composed of shelving rocks, to which cling mosses and cedars. At the base of the plateau winds the silvery course of the Green River as far as the eye can reach.

Richard A. Barret spent his early youth at Springfield, Ill., and at St. Louis, where he attended the school of Edward Wyman and the St. Louis University, and also received instruction from Chester Harding, who entered him at Phillips Academy, Exeter, N. H., to prepare for Harvard College, which he entered in 1852. On the journey eastward his companions were Mrs. Rhodes, John Cavender, J. S. Cavender, and Chester Harding (the two last mentioned afterwards rising to distinction as officers in the Union army during the civil war), and the route taken extended from St. Louis to Brownsville, Pa., and along the Monongahela by steamboat, across the Alleghenies to Cumberland, Md., by stages, and thence by rail to Washington. In the latter city his uncle, Aylett Buckner, a member of Congress from Kentucky, was then domiciled opposite the Treasury Department, with Giddings, Greeley, Lincoln, and Richardson, while Clay, Douglas, Crittenden, and other famous men of the period were frequent visitors. When Messrs. Lincoln and Buckner went to Philadelphia to attend as delegates the convention which nominated Gen. Taylor for the Presidency, R. A. Barret accompanied them.

Having obtained the degrees of M.A. and M.D., the latter from the Missouri Medical College, March, 1854, Mr. Barret went to Europe and studied at Bon, Munich, and Heidelberg, being awarded the

degree of Ph.D. He belonged to the Swabia "Burschenschaft," and traveled on foot up and down the Rhine, and through the "Phalz" and "Swartzwald," and much of Italy, France, and Spain. For some time he acted as secretary of legation at Paris under John Y. Mason, minister at the court of Napoleon III. In 1859, having returned to the United States, he was admitted to the bar of St. Louis, and entered into the practice of the law with his uncle, Aylett Buckner. He was immediately engaged with Stephen T. Logan and Milton Hay, of Springfield, Ill., in a suit in which the Hanks, of Decatur, Ill., the relatives of Abraham Lincoln, were interested, and he greatly enjoyed the witty and pointed stories, the cheerful conversation, and the familiar courtesies of the future President.

In the winter of 1859-60, Mr. Barret was employed, with Messrs. Blocker, Gurley, and Coke, now United States senator, in settling disputes as to the eleven-league Galindo claim, near Waco, McLernan Co. In May, 1860, his father died, leaving a distracted and scattered business, and a young and expensive family to his care. About this time the political skies became overcast with the clouds of the impending war, and in the agitation which followed Mr. Barret bore an active and influential part. He at once took firm ground in favor of the Union cause, and became a close and intimate friend of Capt. Nathaniel Lyon, who was looked up to as the leader of the anti-secession element. Mr. Barret was one of the leading actors in the Southwestern campaign, being attorney for the United States government in the offices respectively of Gen. Farrar, general supervisor of confiscated and contraband property; Col. James O. Broadhead, city provost-marshal; and Gen. E. B. Alexander, United States provost-marshal for Missouri. He also acted as chief clerk and private secretary to the latter until April, 1866. Mr. Barret was thrown into contact with the leaders on both sides, and was personally acquainted with Governor Reynolds and Gens. Frost, Jeff Thompson, Buckner, and Price (the last two being his relatives), whom he believes to have been actuated by unselfish and patriotic though mistaken motives, together with many other active participants in the exciting scenes of that stormy period.

Mr. Barret wrote several reports of the fairs of the St. Louis Agricultural and Mechanical Association, which were published in book form, and did much to popularize the association and advance its interests. In 1866 he went to Burlington, Iowa, to settle up his father's estate, and there purchased and edited the *Gazette and Argus*, the oldest paper in the State.

With Henry W. Starr and J. G. Foote, he was sent as a delegate to the Des Moines Rapids Convention at St. Louis, which resulted in the building of the Keokuk and Nashville Canal, and was selected by the State of Iowa, together with Gen. A. C. Dodge, formerly United States senator and minister to Spain, Governor Gear, and Judge Edmonds, of Illinois, to urge upon the business men and capitalists of St. Louis the importance of the St. Paul and St. Louis Air-Line Railroad. On this occasion the *Burlington Hawkeye* said, "Mr. Barret is entitled to the thanks of our people for his untiring efforts and success in directing public attention to this important road."

Mr. Barret has been a lifelong member of the Turner Association, and is an ardent advocate of physical culture, having delivered addresses before the Turners at Hyde Park, Burlington, Iowa, in company with Theo. Gulich, Governor Stone, and Senator James W. Grimes, and at Peoria, Ill., with Attorney-General ("Bob") Ingersoll, of Illinois. He is a member of the old "Central Verein," from which so many Union soldiers were recruited in St. Louis during the spring and summer of 1861, and served on the finance and citizens' committees for the great "Turnfest" of 1881.

From 1869 to 1872, Mr. Barret was editor-in-chief of the *St. Louis Dispatch*, and afterward commercial and then city editor of the *St. Louis Times*. He was also private secretary to his brother, Mayor Arthur B. Barret, and to Mayor James H. Britton.

Mr. Barret married Miss Mary Finney, daughter of the late William Finney, one of the earliest settlers and most prominent citizens and merchants of St. Louis. He prefers a quiet life, removed from the bustle and confusion of the world, and of late his private affairs and his library have been "dukedom large enough."

Samuel B. Churchill came to St. Louis in 1835. He was born in Louisville in 1812, a lineal descendant of the famous Churchill family of Virginia, and connected by blood or marriage with the Armisteads, the Carters, the Turners, Harrisons, Oldhams, and many other of the proudest families of colonial and Revolutionary days. Col. Churchill practiced law but two years. He was in law partnership with Ferdinand Risk. After 1837 journalism and politics occupied his entire time. Sympathizing with the South, he was arrested and imprisoned in 1861, and in 1863 was ordered to leave the State. He returned to Kentucky, took a prominent part in politics there, serving as Secretary of State from 1867 to 1872.

Shepard Barclay was born in St. Louis, Nov. 3, 1847. He is the grandson of Elihu H. Shepard,

Shepard Barclay

LIBRARY
OF THE
UNIVERSITY OF ILLINOIS.

one of the pioneers of St. Louis, who for many years was the leading school-teacher of the city. Mr. Barclay began his education at the public schools and High School of St. Louis, and afterwards attended St. Louis University, where he was graduated in 1867. He next attended the University of Virginia, at Charlottesville, Va., and was graduated with high honors in 1869. He then visited Europe, and studied civil law for two sessions at the University of Berlin, Prussia. During his sojourn on the continent he acquired the French and German languages. He then returned to St. Louis, and began the practice of law June 1, 1872. During his early practice he was connected professionally with the press of St. Louis, as editorial contributor, and manifested decided aptitude for the calling.

In 1873 he formed a law partnership with W. C. Marshall, and in that connection continued to practice law until elected circuit judge, Nov. 7, 1882.

Mr. Barclay has been connected with and has successfully managed some of the most important cases that have come before the courts. A ripe scholar, an able, faithful, diligent, and untiring lawyer, patient, polite, energetic, careful, and honest, he seems by nature, education, and experience eminently fitted for the judgeship, and his friends confidently expect from him a brilliant record on the bench.

Joseph G. Lodge was born in Gloucester County, N. J., Jan. 27, 1840; was educated in Gloucester County and at Chester, Pa.; at the age of nineteen taught school, continuing in this occupation for nearly two years, and in 1860-62 attended the law school of Michigan University at Ann Arbor. He also took at this institution a partial course in the senior class of the Literary Department. In 1862 he graduated in the law school with the honors of his class, having been chosen orator. He then spent a year in a law-office at Detroit, and in 1863 removed to Battle Creek, Mich. On his arrival in that town he was poor and unknown, but soon made friends and rapidly acquired a lucrative practice. He was elected to several offices, the most important that of prosecuting attorney for the county, in which capacity he managed many intricate cases, and was generally very successful, although he often had to contend with some of the leading lawyers of Michigan. He retained this office four years, having been re-elected for a second term.

In October, 1866, he married Miss Mary S. Sailer, of Gloucester County, N. J., and in October, 1871, removed to St. Louis. Here, as in Michigan, he began as an entire stranger, but he again quickly built up a large and lucrative practice as a criminal lawyer. While practicing mostly in the criminal

courts, he has had many important civil cases, and in both fields has shown himself an able advocate. At present he is a member of the legal firm of Johnson, Lodge & Johnson, which is generally conceded to be one of the first in the West. In 1882 he was a candidate on the Republican ticket for judge of the Criminal Court, but owing to dissensions in the party was defeated. Industrious, faithful, attentive, and with broad and comprehensive views, he is an earnest and forcible advocate, but his analytical mind makes him perhaps more effective in the argument of legal propositions before a court than in the discussion of questions of fact before a jury.

The bar of St. Louis at the present day, as reflected in its living and active members, both those upon the shady side of the hill and those who are climbing to the summit, is not unworthy in any respect of the distinguished ancestry whose faint outline has been traced in the preceding pages. The profession holds out the same high rewards to honorable industry, cultivated talents, probity and integrity, and our contemporaries toil with an inherited zeal and compete with an ardor transmitted through unbroken generations for the same sort of distinction as that which compensated Easton and Hempstead, Carr and Benton, the Bateses, the Bartons, the Gambles, and other illustrious men. Those who lightly pretend to believe that the bar of St. Louis has degenerated are not familiar with its past, or have neglected to measure the stature of its present greatness. They may not have forgotten Gibson, Hitchcock, the Glovers, Broadhead, Henderson, and others of national reputation, but they do not sufficiently take into account such men as D. Robert Barclay, H. A. and A. C. Clover, R. Graham Frost, James S. Garland, Joseph R. Harris, Waldo P. Johnson, Edward P. Lindley, and many others.¹

It will be seen, from what has been set forth above, that the bar of St. Louis was never, even in the most primitive times of its history, what is called a "country bar," where the simple disputes of rusties are adjudicated in an unpretentious, rural fashion, and the calibre of judges and counsel is as light in weight as the causes brought to trial. Where the missiles are mountains and hills, the giants must be called in to throw them. The big lawyers of the country—those who felt that they could become big, that is—went to Missouri, Kentucky, Louisiana, Texas, because the big fees were there which they

¹ The author endeavored without result to obtain the material for biographical sketches of Henry Hitchcock, Samuel T. Glover, and other leading members of the bar, whose modesty forbade them to supply the necessary facts.

grasped at. So when a class of fledgling doctors graduates, the youth who is content to "tote" around his saddle-bags and pill-box all his life, because he has no greater faith in his own capacity, gets him away to some rural district, where the doctors are as few and far off as possible, but the really ambitious "saw-bones" seeks the heart of the great city, where he knows that one critical case well conducted will bring him into lucrative practice. The fees in any good fat land case in St. Louis County, paid in land, were often a fortune to the lawyer who won the case, or, if not, they pointed the way to fortune; for the people took an immense and enthusiastic interest in courts and law-suits, and attended upon prominent trials as one would go to the circus or the theatre. A murder trial or a land suit would bring a whole county, a whole circuit, to the county-seat. Thus the lawyers were always in the public eye, and their merits and achievements instantly known; and in this way the St. Louis lawyer constantly had the two greatest possible incentives to endeavor by which man can be urged on,—large profits, and the sincere applause of multitudes.

In this respect the Western courts were as different as possible from those in the East. Hon. Oliver H. Smith, some time United States senator from Indiana, in his very entertaining volume, "Early Trials in Indiana," notes this difference forcibly. The people of the West in those early days, he says, thought "the holding of a court a great affair. They came hundreds of miles to see the judges and hear the lawyers 'plead,' as they called it. On one occasion there came to be tried before the jury an indictment for an assault and battery against a man for pulling the nose of another, who had insulted him. The court-room was filled to suffocation. There were two associate judges on the bench. The evidence and the pleadings were heard with breathless expectation, and when the case was concluded, the people returned home to tell their children that they had heard the lawyers 'plead.' How different this," continues Mr. Smith, from a scene witnessed by him in Baltimore in 1828, when he visited the United States court-room there and got a seat from the United States marshal. "There was a venerable judge on the bench, a lawyer addressing the court, another taking notes of his speech. These three and the marshal composed every person but myself in the room. They were all strangers. I asked the marshal who they were. 'The judge,' he said, 'is Chief Justice Marshall, the gentleman addressing the court is William Wirt, and the one taking notes is Roger B. Taney,'—three of the most distinguished men in the United States, and yet in a city of fifty thou-

sand souls they were unable to draw to the court-room a single auditor." Mr. Smith seems utterly unconscious of the fact that they were not there to "draw."

This necessity of Western eloquence, "drawing," has been very slow to change, if it has disappeared entirely now. Nor have the busy people quite ceased to be drawn; at least such was the case down to a recent epoch. We do not wish to seem libelous, and hence will not vouch for the tradition that in Lexington, Ky., upon occasion of the second trial of one of the Shelbys for murder, in 1846, the trustees of the Methodist Church seriously and urgently debated as to whether or not a great strawberry and ice-cream festival of the church, to which weeks of labor and preparation had been given, should not be adjourned to a later day, to enable the people to go hear the great Henry Clay "plead." And in the interesting account, quoted from on a previous page, from the pen of Charles Gibson, descriptive of the great St. Louis venue of 1850, when MM. les Comtes de Montequieu were tried for the murder of Kirby Barnum and Albert Jones, we discover that this personal interest in trials still at that day pervaded the whole community. "The trial," says Mr. Gibson, "was largely attended, not merely by our best citizens, but nearly the whole of the spacious apartment was filled by the most refined and aristocratic ladies, old and young, of the city." The writer adds, in the true regretful spirit of a *laudator temporis acti*, that "the contrast between a great criminal trial thirty years ago, in which the entire community took a profound interest, and the proceedings of the present day in the Four Courts has to be seen in order to be understood and fully appreciated."

The temples of justice, however, and the instruments of punishment in those primitive days were just as poor and mean as can be conceived, and very little calculated to draw the crowds which they had no capacity to accommodate. The machinery of justice seems to have advanced in complications and magnificence in proportion as the public interest in her mysterious, awful ways has diminished and grown cold. This is the way civilization works, perhaps. We do not say that early St. Louis contented itself with the corn-crib court-house and the goods-box jail seen by Mr. Darby in his early rides upon the circuit; yet in 1811, as Brackenridge describes, there was no jail but the martello tower of the old Spanish fort, and no court-house but the stone barrack in that fort, where vermin must have been plenty, or a dining-room in a tavern by the river-side. The record-office and records did not keep much better

state, nor were the court forms ceremonious or intricate, except in the matter of pleas and replications and practice, where the Indiana forms, which had been introduced, were, like the farmer's worm fence, so twisted in and out that he could not tell which side he was on for the life of him. These forms cost the simple and ingenuous French *habitans* of St. Louis many a dollar and many an arpent.

There may, perhaps, have been a litigious propensity among the primitive St. Louisans in respect of suits upon personal issues. The number of slander and scandal cases during the Spanish *régime* is noticeable, and makes the supposition thrown out quite probable. The early judges under the American *régime* probably thought it needful to be severe in order to maintain their dignity, at least they were severe in many cases. The newspaper court reporter of the present day had no existence then, luckily for him, but the courts appear to have resented in a very uppish manner not only criticism, but every other sort of reference to their proceedings and manners, and there are several cases on record—the chief of them noticed in other parts of this work—in which criticism and comment were punished severely as constituting contempt. It usually happens that these blows of the courts, no matter whom they are aimed against, light upon the best and most amiable citizens, and this has been the case in St. Louis from the time of Joseph Charless, the first printer, to that of Samuel T. Glover, who in 1865, as we have seen, was fined five hundred dollars for contempt in resisting an unjust statute that impaired his most precious rights as a citizen.

As a rule, however, the chief and characteristic trait of the courts of St. Louis has been the great individuality and force of ability of the bench and bar, the important character and intricate nature of the issues joined, and the simplicity of the court's methods and surroundings. The extreme economy of the administration in primitive times has already been sufficiently spoken of. This proceeded in part from the simple surroundings with which judge, jury, and bar contented themselves on all occasions, from the low salaries allowed, and from the doubling up of many offices and functions in one person. Thus the clerk of the Circuit Court of St. Louis County was also always *ex officio* recorder of deeds, and usually prothonotary or register of wills and clerk of the Probate Court likewise. An odd instance of this consolidation of offices in one person is to be observed in the case of Dr. David Waldo, of whom some mention has already been made in this chapter. Said Mr. John F. Darby, "He was clerk of the Circuit Court of Gasconade

County and *ex officio* recorder of deeds for the county; he was also clerk of the County Court of Gasconade County, justice of the peace, acting as coroner and as deputy sheriff, it is said, as well as postmaster. He held a commission also as major in the militia, and was a practicing physician. The duties of all these offices David Waldo attended to personally, and discharged with signal and distinguished ability. The county of Gasconade at the time took in an immense territory, including within its boundaries the scope of country now included in the counties of Osage, Maries, Phelps, Pulaski, Wright, and Texas, and on that account it was called by many of the inhabitants 'The State of Gasconade, David Waldo, Governor.' In speaking of the doctor, even to his face, very few of them saluted him as mister, doctor, or major; they all called him 'Dave.'"

The court-room in which this factotum exercised every quality and degree of civil function consisted of one large hewed log house, with one room, a kitchen, and some log stables, so that all had to eat and sleep in the same room, and after the table for breakfast or dinner, as the case might be, had been cleared away, the judge would take a seat on one side of the room in one of the old-fashioned split-bottomed chairs and hold court.

It is to be observed of Waldo, moreover, that he was a gentleman, a scholar, and a man of many superior qualities, and that he did all these things for the people among whom he lived and not for himself, differing therein entirely from that Iowa family not so many years back, of whom the tradition runs that, profiting by sundry convenient laws of the new State, they moved out into the open prairie, and there, all by themselves, after taking up no end of government land, went through all the motions of erecting a new county, held an election, county, township, and State, electing themselves to all the offices, secured the benefit of the school-house, school, court-house, road, and other county funds, and then issued county bonds at a rate to make the Egyptian Khedive stare, selling them for what they would bring and pocketing the proceeds. Dr. Waldo's method of serving the public was much more genuine and cheaper than the modern method, and the public service was benefited in proportion.

As the officers, so the judges, with one or two exceptions. And well was it for early St. Louis and Missouri that they possessed an honest and capable judiciary in the face of so much and so many temptations, for otherwise corruption and villany would have stalked abroad.

As we have said, the court's surroundings in St. Louis were a little less rude than in Gasconade, yet

primitive enough in all conscience. The first court-house, in the tavern under the bank, where Emilien Yosti waited upon his boatman customers, the second, in the old fort on the hill, have already been spoken of sufficiently in several parts of this book, nor is there need to say much of the third, that on the west side of Third Street, between Spruce and Almond Streets, a little one-story house of frame, fronting on Third Street. Here, within these lowly precincts, McNair ruled upon the bench, Benton took his attorney's oath; here sat Lucas, here pleaded Barton and Easton and Pettibone, and many another of the goodly names enrolled in the preceding pages among the pioneers. The catalogue of buildings need not be extended further. So frugal did the people continue to be that even as late as 1827, when population was growing rapidly and the streets were being paved, the city could only spare eighteen thousand dollars to build a new court-house, and the structure was erected complete within the estimates,—two miracles in one!

There is nothing more to be said upon this subject except that the bench and bar of St. Louis continue to maintain their pristine vigor and intelligence, illustrating the records of the future, not by extinguishing but by intensifying the lights of the past upon them, making

"Experience the arch wherethrough
Gleams that untraveled world, whose margin fades
Forever and forever where they go."

The Bar Association of St. Louis.—On the evening of the 16th of March, 1874, a meeting of the members of the St. Louis bar was held in Circuit Court Room No. 2 for the purpose of "considering the propriety and feasibility of forming a Bar Association in the city of St. Louis." Col. Thomas T. Gantt was made temporary chairman, and E. W. Pattison was chosen secretary. Alexander Martin stated at length the objects and purposes of the proposed association, and on his motion a committee consisting of five members of the bar was appointed by the chair to draft a suitable constitution and by-laws and submit the same at an adjourned meeting of the bar. The committee consisted of Alexander Martin, Henry Hitchcock, R. E. Rombauer, George M. Stewart, and Given Campbell. The next meeting was held on the 23d of March, 1874, at which a constitution and by-laws were submitted and adopted substantially as presented, and the final organization and incorporation effected. The incorporators were:

John R. Shepley, E. B. Adams, Henry Hitchcock, G. A. Finkelburg, Shepard Barclay, Arba N. Crane, Edmund T. Allen, Edward T. Farish, Thomas Thoroughman, E. W. Pattison, Alex. Davis, Amos M. Thayer, Nathaniel Holmes,

Alex. Martin, H. T. Kent, E. C. Kehr, John R. Warfield, C. S. Hayden, A. M. Gardner, John W. Dryden, E. B. Sherzer, George M. Stewart, R. H. Spencer, William Patrick, Charles T. Daniel, W. F. Boyle, Joseph Shippen, R. E. Rombauer, Edward W. Tittman, H. D. Wood, J. N. Litton, E. P. McCarty, D. W. Paul, T. A. Post, J. B. Woodward, Samuel T. Glover, William H. Bliss, H. A. Hanessler, J. S. Fullerton, J. S. Garland, Hugo Muench, Preston Player, Leonard Wilcox, M. Dwight Collier, Robert W. Good, George W. Lubke, Leo Tarlton, Charles G. Singleton, W. H. Holmes, W. H. Lackland, R. Schulenburg, J. F. Maury, Wm. H. Clopton, Lucien Eaton, Braxton Bragg, Jr., J. F. Conroy, J. Q. A. Fritchey, H. C. Hart, Jr., Henry M. Post, David Goldsmith, William C. Marshall, D. D. Duncan, John C. Orrick, William B. Thompson, H. L. Warren, J. S. Laurie, John E. Jones, Silas B. Jones, J. A. Seddon, Jr., J. O. Broadhead, A. M. Sullivan, J. T. Tatum, J. D. S. Dryden, Samuel Erskine, Nathaniel Meyers, John H. Rankin, Charles C. Whittlesey, George W. Cline, M. J. Sullivan, F. T. Martin, M. D. Lewis, G. D. Reynolds, John W. Noble, B. L. Hickman, E. S. Tittman, J. P. Vastine, S. S. Boyd, Francis Minor, Given Campbell, M. R. Cullen, T. A. Russell, George B. Kellogg, A. W. Slayback, Thomas G. Allen, C. O. Bishop, Chester Harding, Jr., J. D. Foulon, F. J. Donovan, Francis Garvey, William J. Richmond, G. H. Shields, J. W. Ellis, Henry M. Bryan, J. D. Johnson, James Taussig, R. S. McDonald, Simon Obermeyer, J. K. Tiffany, Samuel Simmons, A. R. Taylor, Sherard Clemens, A. W. Mead, J. F. O'Rourke, G. Pollard, F. C. Sharp, D. Tiffany, F. N. Judson, Leo Rassieur, P. Donohue, Melville Smith, W. C. Jamison, Theo. Hunt, T. C. Fletcher, W. C. Jones, T. T. Gantt, H. E. Mills, V. W. Knapp, George W. Taussig, J. B. Nicholson, Clinton Rowell, John M. Krum, W. C. Bragg, John G. Chandler, J. G. Lodge, F. Wislizenus, L. Bell, M. L. Gray, A. D. Anderson, and Julius E. Withrow.

The association continued to meet in court-room No. 2 until the 2d of November following, when it was removed to the life insurance building on the northwest corner of Sixth and Locust Streets. On the 21st of April, 1876, it returned to the court-house and occupied a room on the second floor, now used by the fire-alarm telegraph, and just opposite the office of the clerk of the Court of Appeals. It remained there until the 5th of January, 1880, when it was again removed to its present commodious quarters on the ground-floor in the Market Street wing of the court-house, near the office of the recorder of deeds. Since its organization the presidents and the date of their election have been:

1874, John R. Shepley; 1875, James O. Broadhead; 1876, Samuel M. Breckinridge; 1877, John M. Krum; 1878, George W. Cline; 1879, Alexander Martin; 1880-81, Henry Hitchcock; 1882, Edward C. Kehr. The first board of officers were John R. Shepley, president; G. A. Finkelburg, A. N. Crane, E. T. Farish, vice-presidents; E. W. Pattison, secretary; A. M. Thayer, treasurer; Alexander Martin, Edward C. Kehr, Charles S. Hayden, executive committee. The present board is composed of Edward C. Kehr, president; Edmund T. Allen, James Taussig, S. M. Breckinridge, vice-presidents; G. A. Finkelburg, secretary; Eugene C. Tittman, treasurer; G. A. Finkelburg, Alexander Martin, John W. Dryden, executive committee.

The object of the association is to "maintain the honor and dignity of the profession of the law, to cultivate social intercourse among its members, and for the promotion of legal science, of the administration of justice." It has accomplished great good in elevating the tone of the legal profession in St. Louis.

CHAPTER XXXV.

THE MEDICAL PROFESSION.¹

THE earliest physicians in St. Louis were the army surgeons stationed at the military posts under the French and Spanish *régimes*, who in many instances settled in the community and identified themselves with its interests and life. As they were usually men of superior education and good social position, they established a standard of medical practice which has ever since been maintained, and laid the foundations of a code of medical ethics which has caused the profession in St. Louis to occupy a foremost place in the medical world.² The first physician whose name is found in the early archives is

Dr. André Auguste Condé, a native of Aunis, in France, who was post-surgeon in the French service at Fort Chartres prior to the cession to England, and crossed the river with the few soldiers brought over by Capt. St. Ange de Bellerive, after placing the British Capt. Stirling in possession of the other side, Oct. 20, 1765. Dr. Condé had married Marie Anne Bardet de Laferne, July 16, 1763, whom, with his infant daughter Marianne, he brought over with him to the new post. He received from Governor St. Ange, June 2, 1766, a concession, the fifth recorded in the "Livres Terriens,"—the "land-grant books,"—of two lots together in the village, fronting two hundred and forty feet on Second Street, by one hundred and fifty deep, being the east half of the block next south of the Catholic Church block (now No. 58). On this lot he built for his residence a house of up-

right posts, with a barn and other conveniences, where he resided for some ten years, until his death, Nov. 28, 1776.

Dr. Condé was a gentleman of fine education, and a prominent man in the village in his day. He had an extensive professional practice, as well on the west as on the east side of the river, being for a time alone in his profession at this point. Having died intestate, the Governor appointed his relative, Louis Dubreuil, merchant, guardian to his two minor daughters, the oldest, Marianne, mentioned above, the second, Constance, born in St. Louis in 1768. An inventory of his estate, taken a few days after his death, includes the names (numbering two hundred and thirty-three) of all those indebted to him on both sides of the river for professional services rendered, comprising nearly all the inhabitants of the two places, and might almost serve for a directory had such a thing then been needed. His widow married a second husband, Gaspard Roubien, also a European, Sept. 19, 1777. They subsequently removed to St. Charles, where they both died.

Condé's eldest daughter, Marianne, was married to Charles Sanguinet, Sr., Aug. 1, 1779, and the second, Constance, first to Bonaventura Collell, a Spanish officer, in the year 1788, and secondly to Patricio Lee, in 1797. Each of these ladies left a numerous progeny. The Sanguinets of St. Louis comprise the Benoists, the wife of the Hon. John Hogan, former member of Congress, William H. Cozens, etc., and the Lees of St. Charles, Mrs. Stephen and Mrs. Thomas Rector, the Rousseaus, Benjamin O'Fallon, and others.

Dr. Jean Baptiste Valleau was the second physician who settled at St. Louis. A native of France, in the Spanish service, he came to St. Louis late in the year 1767 as surgeon of the company sent up by Count Ulloa from New Orleans, under the command of Capt. Rios, to receive possession of the place. That they had come up expecting to remain, at least for a time, is evident, as immediately after his arrival in the place he made application for a lot in the village upon which to build a house for his family, which he had left in La Rochelle, France. Accordingly, he received a concession (No. 43) from St. Ange, dated Jan. 2, 1768, of the northeast quarter of the present Block No. 61, being one hundred and twenty feet on the west side of Second Street by one hundred and fifty feet deep west up the hill on the south side of Pine. After he received the grant of his lot, it was some little time before he could find any one to build his house, owing to the scarcity of workmen in that early day of the village. He then entered into the following agreement :

¹ For the preparation of the greater part of this chapter the author is indebted to Dr. E. M. Nelson, editor of the *St. Louis Courier of Medicine*, who, we think it will be conceded, has discharged his task with great care and with painstaking and discriminating accuracy. The author is also under obligation to Dr. Nelson for many other kindnesses in the compilation of this work. A number of the biographical sketches contained in this chapter were prepared by him, and those contributed by other persons are indicated by foot-notes.

² The portion of this chapter relating to the physicians of St. Louis in the early French and Spanish days was prepared by Mr. Frederic L. Billon.

"I, Peter Tousignau, under my customary mark of a cross, not knowing how to sign my name, in presence of Mr. Labuscrière, acknowledge that I bind myself to build for Mr. Vallean, surgeon in the Spanish service, a house of posts in the ground, eighteen feet long by fourteen wide on the outside, and roofed with shingles, with a stone chimney, and a partition in the centre of small square posts, with one outside door and another in the partition, two windows with shutters, well floored and ceiled with hewed cottonwood plank well jointed. The whole is to be completed by the 15th July next, subject to inspection, to be built on the lot of Mr. Vallean, adjoining Mr. Calvé's.

"In consideration of the sum of sixty silver dollars, which Mr. Vallean binds himself to pay to said Tousignau as soon as the house is completed, and to furnish all the iron and nails necessary for said house, but nothing else, the posts of the house to be round, of red oak.

"Thus covenanted and agreed in good faith between us, at St. Louis, April 23, 1768.

"TOUSIGNAU'S ✕ MARK. VALLEAU. LABUSCIÈRE, witness."

In due time his house was completed and he in possession, shortly after which the quarter block south of and adjoining his was ordered to be sold by the Governor (the owner, one Calvé, having left in the night to avoid his creditors), and was purchased by Vallean, with a small house of posts some sixteen feet square on it, for six hundred livres (about one hundred and twenty dollars), Sept. 26, 1768, Vallean then owning the east half of said block (now 11). Shortly afterwards having been much exposed to the effects of a hot sun in a new and to him deleterious climate, in riding back and forth between St. Louis and Bellefontaine, on the Missouri, where Rios' men were engaged in building a fort, he fell ill, and died at the close of November, 1768, at the house of Joseph Denoyer, nearly opposite his own, within a year of his arrival in the country. On finding his end approaching, in conformity with a custom almost uniformly followed by devout Catholics at that day, he executed his will on Nov. 23, 1768. He was but one of numerous others who fell victims to the unhealthy influences incident to all newly-settled countries in certain latitudes, particularly on water-courses. So universally was it the custom at that day in colonies for a sick person to execute his will, commending his soul to his Maker, that a man who died without having done so was deemed to have neglected one of his most important religious duties. It mattered little whether he possessed much or no property whatever to dispose of, the will appeared to be an essential to entitle him to burial with all the solemnities of the holy church in consecrated ground.

This will was as follows:

"WILL OF JOHN B. VALLEAU, SURGEON.

"Before the royal notary in the Illinois, province of Louisiana, in presence of the hereafter-named witnesses, was personally present Mr. John B. Vallean, a senior surgeon of His Catholic Majesty in the Illinois, being now at the post of St. Louis,

in the French part of the Illinois, lying sick in bed, in the house of Denoyers, but sound of mind, memory, and understanding, as appears to the undersigned notary and witnesses, who, considering there is nothing more certain than death, nor nothing so uncertain as its hour, fearing to be overtaken by it without having disposed of the few goods which God has given him, the said John B. Vallean has made and dictated to the notary, in the presence of the undersigned witnesses, his last will and testament in the following manner:

"First, as a Christian and a Catholic, he commends his soul to God the Father, Son, and Holy Ghost, beseeching His divine bounty, by the merits of His passion, and by the intercession of the Holy Virgin, of Holy St. John, his guardian, and of all the spirits of the celestial court, to receive it among the blessed.

"The said testator wishes and ordains that his debts should be paid and the injuries occasioned by him, if there be any, shall be relieved by his executor hereinafter named.

"He declares, wishes, and ordains that Duralde, employed in the Spanish service, residing in this post of St. Louis, whom he appoints his executor, shall take possession of all his effects, situated in this colony of the Illinois and at New Orleans, either personal or real property, goods, effects, money, or anything belonging to the said testator at the day of his death, in whatever part of this colony they may be situated, without any reservation, appointing the said Duralde as the executor of this will, and praying him to undertake the charge as a last proof of friendship.

"The said Duralde shall make a good and exact inventory of the property belonging to said testator, shall make the sale thereof, and the money arising therefrom shall be sent by him to Madame Vallean or to her children, residing at La Rochelle, in the house of Madame Chotet, Main Street, revoking all other wills and codicils which I might have made before this present will, to which I adhere as being my last will.

"Thus made, dictated, and declared by the said testator, by the said notary and witnesses, and to him read and re-read, he declaring to have well understood it, and wishing the said last will to be executed according to its tenor.

"Done in the room in which the said testator keeps his bed, the year one thousand seven hundred and sixty-eight, the twenty-third of November, about six o'clock P.M., in the presence of De Rive (Rios), civil and military Governor of the Missouri portion of the country, at present in this post of St. Louis, and of Joseph Papin, trader of this same place, witnesses summoned for the purpose, and who have with the notary and the testator signed these presents after the same was read conformable to the ordinance.

"VALLEAU.

"FRANCISCO RIVE (RIOS).

"JOSEPH PAPIN.

"LABUSCIÈRE, Notary."

It does not appear that any inventory of his personal property was taken, as no mention of it is to be found in the archives, nor of any sale, but they may have been sent to New Orleans, as was sometimes the case at that early day in our history. But his executor, Martin Duralde, proceeded without delay to dispose of his two lots, which was done at public sale on Sunday, Dec. 11, 1768.

Dr. Vallean's is the first will on record. He had brought up with him from New Orleans a box of one gross packs of playing cards, to assist him in getting through the long and tedious winter months of this

then out of the way part of the world. After his death, Duralde, his executor, not finding sale for them except at great loss, kept the box in his store for two or three years, when, finding they were almost ruined by water leaking from his roof just over the place where he kept them, he received permission from the Governor to dispose of them at auction.

Dr. Antoine Reynal appears from the archives to have been the third surgeon in St. Louis, from about the year 1776. In the year 1777 he purchased from one Jean Hugé the west half of the block on the east side of Third Street, from Market to Chestnut Streets, with a log house at the south end, fronting on Market Street, opposite the Catholic graveyard. The north end of this lot, at the southeast corner of Chestnut and Third Streets, is now occupied by the *Missouri Republican* building. Dr. Reynal lived here for about twenty-three years, and sold the property to Eugenio Alvarez in November, 1799. He subsequently removed to St. Charles, where he died.

Of Dr. Bernard Gibbins, the fourth physician, we know but little, except that he was in St. Louis in the years 1779 and 1780, as we find him the possessor of a house and lot at that period. But of what nationality, where from, or whether he died here or removed from the place, is not found in the archives of the day.

Dr. Claudio Mercier came up to St. Louis from New Orleans early in 1786. His native place was Lavisère, Dauphiny, France, where he was born in the year 1726. He had resided for a time in New Orleans, where he had acquired some property, and left a will there when he came up to St. Louis, which he had executed in 1784. He added a codicil to this will at St. Louis, dated May 17, 1786, in which he reaffirms his first will, emancipates his negro woman François, gives one hundred dollars to the poor of St. Louis, and appoints John B. Sarpy his executor. He died unmarried at St. Louis, on Jan. 20, 1787, aged sixty-one years. It does not appear that he practiced here.

Dr. Philip Joachim Gingembre (Ginger) came early in the year 1792 to St. Louis, and purchased a small stone house at the northwest corner of the present Olive and Second Streets, where he lived for some years. He then went to France, leaving his house unoccupied and closed. Not returning after some years' absence, the house, which was going to ruin, was publicly sold by order of the then Governor, Trudeau, to pay his creditors.

Dr. Antoine François Saugrain, born at Versailles, France, Feb. 17, 1763, came to St. Louis to reside with his wife and two children, from Gallipolis,

Ohio, in the year 1800. Here he continued in the practice of his profession until his death, May 20, 1820, at the age of fifty-seven years. Dr. Saugrain when but a youth had made the acquaintance of Dr. Benjamin Franklin in Paris, through whose representations of the country he came to the United States, after the recognition of our independence. After remaining a time in Philadelphia, he, in the winter of 1787-88, being then twenty-four years of age, proceeded with two other young Frenchmen, Messrs. Pique and Raguét, to Pittsburgh. Early in the spring of 1788, having been joined there by an American, a Mr. Pierce, the four left Pittsburgh in a flat-boat or broad-horn, then so called, with their horses and baggage, to descend to the Falls of Ohio, now Louisville. Dr. Saugrain subsequently joined those Frenchmen who, about 1790-91, emigrated from France to establish the new settlement of Gallipolis, in Ohio, in what is now Gallia County, then a wilderness. He remained some nine or ten years in this locality, during which period he was married on March 20, 1793, in Kanawha County, Va., just opposite the place, to Miss Genevieve Rosalie Michaud, the eldest of the two daughters of John Michaud, Sr., one of the settlers of Gallipolis, from Paris; and here two of their children were born, viz., Rosalie and Eliza. The first became in after-years Mrs. Henry Von Phul, and the second Mrs. James Kennerly, both of St. Louis. The Michaud and Saugrain families removed together from this place, Gallipolis, to St. Louis in the year 1800. Dr. Saugrain immediately entered upon the practice of his profession, and at the date of the transfer to the United States, 1804, was the sole practitioner in the village, and the last of the old French stock. In addition to the two daughters they brought with them from Ohio, Mr. and Mrs. Saugrain raised to maturity several other children born in St. Louis,—two sons, Alfred, now deceased, and Frederick, yet living; Harriet, who married Maj. Thomas Noel, United States cavalry, both deceased for some years, and Eugenie, still living, the widow of John W. Reel, a former merchant of St. Louis. The family of old John Michaud, who died June 29, 1819, aged eighty-one, comprised several sons, all now deceased, and two daughters, Mrs. Dr. Saugrain, and a second who became the wife of Dr. Robinson, formerly of the medical corps of the United States army. The lineal descendants of Dr. A. F. Saugrain are quite numerous, comprising the Von Phuls, Kennerlys, Noels, Reels, Saugrains, and others. Henry Von Phul, a sketch of whose life appears elsewhere, and who married the eldest of the daughters of Dr.

A. F. Saugrain, was one of the earliest of the American merchants of St. Louis, honored for his uprightness, and universally esteemed by the community among whom he lived for the largest portion of his prolonged life. James Kennerly was a Virginian by birth, and a merchant in the early days of the Territory. The widows of these two gentlemen still survive at an advanced age.

During the early period of Dr. Saugrain's residence in St. Louis there was also located here a Dr. Watkins, with reference to whom we have been able to learn nothing save only the name. There was also a Jesuit priest named Didier, who used to prepare teas and other simple remedies for any who were ailing,¹ but who was not an educated physician. Dr. Saugrain had had a thorough scientific and medical education in Paris, and was fully qualified in all the professional learning of the day. He relied almost exclusively upon ptisanes and vegetable remedies, regarding calomel as a virulent poison that never should be taken into the human system. He left behind him the reputation of a good physician and a thorough gentleman.

Dr. Saugrain was one of the early advocates of vaccination. In the *Missouri Gazette* of June 7, 1809, we find a card in which he calls attention to the value of vaccination as a preventive of smallpox, and announces his readiness to vaccinate any who should apply.²

¹ Dr. Saugrain's oldest daughter, Mrs. Von Phul, states that there was very little sickness here in those days, and little occasion for calling upon a physician or taking any medicine. Every one was strong and healthy.

² "The undersigned having been politely favored by a friend with the genuine vaccine infection, has successfully communicated that inestimable preventive of the smallpox to a number of the inhabitants of St. Louis and its vicinity, and from a sincere wish which he entertains more widely to disseminate this blessing, he has taken the present occasion to inform such physicians and other intelligent persons as reside beyond the limits of his accustomed practice that he will with much pleasure, on application, furnish them with the vaccine infection. The following comparative view and certificate will sufficiently show the high estimation in which vaccination is holden by a number of the most learned and respectable physicians in our country. Persons in indigent circumstances, paupers, and Indians will be vaccinated and attended gratis on application to

"A. SAUGRAIN.

"St. Louis, May 26, 1809."

"A comparative view of the natural smallpox, inoculated smallpox, and vaccination in their effects on individuals and society:

"1. It is attempting to cross a large and rapid stream by swimming, where one in six perish.

"2. It is passing the river in a boat subject to accidents, where one in three hundred perish, and one in forty suffer partially.

"3. It is passing over a safe bridge."

This was accompanied with a certificate of the value of vaccination from a large number of prominent physicians of Philadelphia and elsewhere.

A similar announcement by Drs. Masop and Gebert is found some years later (in March, 1823), viz.:

"Drs. Mason and Gebert will be prepared on the 1st of April to vaccinate those persons who wish to avoid that dreadful disease, smallpox. The utmost punctuality may be relied on."

The next name of a physician which appears in these early papers is that of Dr. Farrar, whose card first appeared in the *Gazette* May 24, 1809, as follows:

"Dr. Farrar will practice medicine and surgery in St. Louis and its vicinity. He keeps his shop in Mr. Robidoux's house, Second Street."

Dr. Farrar was a man of considerable note, and the most conspicuous among the early practitioners of the city.

Dr. Bernard Gaines Farrar,³ son of Joseph Royal Farrar, was born in Goochland County, Va., July 4, 1785, but his parents removed to Kentucky in the autumn of that year. He commenced the study of medicine at the age of fifteen in the office of Dr. Selmon, of Cincinnati, studying afterwards with Dr. Samuel Brown, of Lexington. He attended lectures in Philadelphia at the University of Pennsylvania in 1804, and subsequently graduated from the Medical Department of Transylvania University, Lexington, Ky. He located first at Frankfort, Ky., but in the fall of 1806, at the suggestion of Judge Coburn, one of the Territorial judges of Missouri, who was his brother-in-law, he moved to St. Louis, and was the first American physician who permanently established himself west of the Mississippi. From this fact and the high character which he sustained he was in later days spoken of as the "father of the profession in St. Louis." He rapidly acquired a large practice and extended reputation, not unfrequently being called upon to take long journeys to see critical cases. Not more by his skill as a physician and surgeon than by his great kindness of manner and devoted attention to his patients did he win friends and secure patrons. He was tender-hearted, and suffered greatly in the suffering of his patients, and yet when there was duty to discharge, when he had ought to do to relieve such suffering, none could be firmer than he. He excelled particularly in tact, and seldom erred in prognosis. He was bold and decided in character and prompt in execution. He was specially dextrous in the various manipulations that are demanded in obstetric practice, which was a department of professional work and study in which he took special pride

³ For the facts in regard to Dr. Farrar's life we are indebted to a paper by Dr. C. A. Pope, published in the *St. Louis Medical and Surgical Journal*, September, 1850.

and interest. He attained some distinction also as a surgeon.

One of his first operations was an amputation of the thigh, performed on a man by the name of Shannon, who, when a youth, accompanied Lewis and Clark on their expedition to the Pacific Ocean. In 1807 Shannon undertook a second expedition, under the auspices of the general government, to ascertain the sources of the Missouri. At a point eighteen hundred miles up that river he was attacked by the Black-foot Indians, and wounded by a ball in the knee. He was brought down to St. Louis, and successfully operated on by Dr. Farrar. In those times the case was considered as an evidence of great skill, in view of the distance which the patient had traveled, and the low state to which his constitution had been reduced by the accident. This same Mr. Shannon afterwards received an education in Kentucky, and became one of her best jurists. He was subsequently elevated to the bench. Judge Shannon often said, and even declared on his death-bed, that he owed both his life and his honors to the skill of Dr. Farrar.

Dr. Farrar made the recto-vesical section for the removal of a calculus which had become attached to the fundus of the bladder several years earlier than Sansom, who is recognized as having the prior claim by virtue of having been the first to publish such a case. In the war of 1812, Dr. Farrar served as a surgeon, and also as a soldier in defending the State against the depredations of the Indians. His reputation became widely extended, and he was offered a professorship in his Alma Mater, the Medical Department of Transylvania University, which was then the only medical school west of the Allegheny Mountains, but declined the position. He was a member of the first Legislature under the Territorial form of government, and very active and influential in the affairs of the community. He died of cholera July 1, 1849, being within three days of sixty-four years of age.

In the discharge of his professional duties, Dr. Farrar was both physician and friend. No company or amusement could make him neglect his engagements, and he was ever ready at the call of the poor. Indeed, with respect to remuneration for his services, it was in most cases virtually optional whether payment was made at all. The convenience of all was the rule that governed him. He was always generous and disinterested, and history can produce few instances in which a life of such intense devotion in relieving the diseases incident to his fellow-men was less rewarded by pecuniary emolument. This utter want of selfishness and extreme pecuniary carelessness

formed perhaps one of the most distinctive traits of his character. Among his professional brethren he was universally beloved and esteemed. He was a gentleman in the highest sense of the term, and well deserved their respect and consideration. His acknowledged professional skill, his goodness of heart, his polished urbanity, his high sense of honor and his noble generosity of nature endeared him to all.

With reference to a number of other physicians whose names appear in professional cards in the early numbers of the *Missouri Gazette* there is little to say. Some of them were men of sterling merit and great ability, but records are wanting as to details of their lives. Yet it may be

a matter of interest to note the names of some of these pioneers and the wording of their cards.

A few of them are given in the order in which they appear in the newspaper files:

April 26, 1810.—“Dr. William Reynolds has removed from Kaskaskia to Cahokia, and has commenced the practice of medicine in conjunction with Dr. Truman Tuttle.”

March 14, 1811.—“Dr. Wilkinson has just opened a handsome assortment of medicine at the house of Mr. Manuel Lisa, lately occupied by Fergus Moorhead, Esq.”

March 21, 1811.—“Dr. William Reynolds has opened a shop of fresh and genuine medicines in the house of Maj. N. Jarrot, Cahokia, where he will be found.”

Jan. 4, 1812.—“Dr. J. M. Read, from Baltimore, offers his professional services to the citizens of this place and its vicinity.

W. G. Farrar

His residence is in the north end of Madame Dubreuil's house, and next to Maj. Penrose's, where he can be found by those who may wish to consult him."

July 25, 1812.—"Dr. Simpson will practice medicine and surgery in the town and vicinity of St. Louis. He keeps his shop in the house adjoining Mr. Manuel Lisa, and formerly occupied by Fergus Moorhead, Esq."

Oct. 1, 1812.—"Drs. Farrar and Walker associated in the practice of medicine."

Sept. 30, 1815.—"Dr. Quarles will practice medicine and surgery in the town of St. Louis and its vicinity. He may be found at his shop opposite Mr. Patrick Lee's, on Main Street."

Jan. 13, 1816.—"Drs. Simpson and Quarles having formed a connection, the business will in future be conducted under the firm of Simpson & Quarles."

Dr. Simpson was prominent in various ways, and the following additional facts in his life will be read with interest:

Dr. Robert Simpson was born in Charles County, Md., in 1785, of a family which had been long in this country. At an early age he studied medicine in Philadelphia, and graduated from a college the name of which is now forgotten. In 1809 he entered the United States army as assistant surgeon, and was ordered to duty at St. Louis. In his official capacity as assistant surgeon he accompanied the troops that established Fort Madison, on the upper Mississippi, remaining there about a year, when he returned to St. Louis. In connection with the late Dr. Quarles he established the first drug store in St. Louis, and about the same time was appointed postmaster. He held also, at various times, several other offices of honor and public trust. In 1823 he was appointed collector of St. Louis County, which position he held three years. In 1826 he was elected sheriff of St. Louis County, and served two terms. Subsequently he engaged in merchandise, transacting business on Main Street, between Market and Chestnut Streets, in the same building with the *Missouri Republican*. Still later he was elected city comptroller, and was also cashier of the Boatmen's Savings Institution and member of the State Legislature. He had not practiced medicine for a long time prior to his retirement from active business. Throughout life he was remarkably robust and strong. He died at his residence, No. 2911 Washington Avenue, in the eighty-eighth year of his age. In all the relations of life none were more favorably known than himself in St. Louis through more than a half-century. The geniality of his temper won him hosts of friends, and his high sense of honor and incorruptible integrity gained him the admiration of all who knew him. It is but a few years since that he knew and was known by almost every inhabitant of the city and the surrounding country; but the immense increase of population, together

with the retirement demanded by his great age, in his late years made him less known to the citizens at large.

In connection with the statement that Drs. Simpson and Quarles established the first drug store in St. Louis, it may be noted that in August, 1808, there appeared in the *Missouri Gazette* an advertisement that Aaron Elliot & Son had received from New York a large supply of drugs and medicines, which they offered to the inhabitants of Ste. Genevieve on as good terms, they claimed, as could be obtained anywhere in the country. This was several years before the establishment of the drug store in St. Louis by Drs. Simpson and Quarles. From the same advertisement it would appear that the supply of patent medicines for "all the ills that flesh is heir to" was as liberal in the early years of the century as at the present time. The following list of these articles is taken from the advertisement mentioned: "Church's Cough Drops, Turlington's Balsam of Life, Bateman's Drops, British Oil, Steer's Opodeldoc, Hill's Balsam of Honey, Godfrey's Cordial, essence of peppermint, Lee's New London Bilious Pills, by the gross or less quantity, Anderson's do., Hooper's Female do., Liquid True Blue, Maccaboy and Cephalick snuff, chemical fire-boxes, 'one of the best inventions in the known world for travelers.'"

Dr. Samuel Merry was also one of the early practitioners in St. Louis. He graduated in medicine at the University of Pennsylvania, and in 1833 was appointed receiver of public moneys at St. Louis, which office he held for twelve years. His time was taken up chiefly with his practice, which was large and burdensome, while the duties of the receiver devolved, in great part, upon his deputy.

The following are some additional cards that are found among these early papers:

Nov. 2, 1816.—"Dr. Edward S. Gantt offers his professional services to the citizens of St. Louis and its vicinity."

Aug. 23, 1817.—"Dr. G. P. Todson has the honor of acquainting the inhabitants of St. Louis and its vicinity that he has taken possession of the shop formerly occupied by Mr. Alex. Laforce Papin, opposite Landreville's stone building, on Main Street, and determined on a permanent residence in St. Louis to practice physic, surgery, and midwifery."

April 24, 1818.—"Dr. Arthur Nelson tenders his professional services to the citizens of St. Louis and its vicinity."

Jan. 1, 1819.—"Doctor Gebert (lately from France), having received a regular diploma from the faculty of medicine in Paris, has the honor to offer his services to the inhabitants of St. Louis and its vicinity as a physician and surgeon. He lives at the house of Mr. Benoit, opposite Mr. Paddock's boarding-house."

Jan. 15, 1819.—"Dr. William Carr Lane's office on Third Street, late Reed's."

June 9, 1819.—"Dr. G. P. Todson's office in Perras' house, on Second Street, Block 57."

Feb. 2, 1820.—“Dr. Mason, from Philadelphia, offers his services to the inhabitants of St. Louis and its vicinity.”

March 19, 1823.—“Drs. Mason & Gebert having formed a copartnership, respectfully offer their professional services to the public.”

Sept. 13, 1824.—“*Medical Notice.*—Elisha Embree, M.D. Medicine and surgery in the city and vicinity of St. Louis.”

Jan. 18, 1827.—“*Stammering.*—Mrs. Leigh’s St. Louis institution for correcting impediments of speech. Mr. A. Yates, of New York, assistant in conducting Mrs. Leigh’s agency for correcting impediments of speech in the Western States, informs the public that he has established an institution for correcting impediments of speech at St. Louis, Mo.”

Nov. 29, 1827.—“Dr. Auguste Masure, lately arrived from Europe, offers his professional services in the different branches of physic, surgery, and midwifery to the public.”

Aug. 12, 1828.—“Dr. Harding, late of Kentucky, tenders his professional services to the citizens of the city and county of St. Louis.”

March 17, 1829.—“Dr. H. Gaither respectfully tenders his services to the citizens of St. Louis and its vicinity.”

July 28, 1833.—“Dr. Charles Geiger respectfully announces to the citizens of St. Louis and its vicinity that he has established himself in this city with the intention of devoting himself to the practice of medicine, surgery, and midwifery.”

As the years went on the number and influence of the physicians increased. We give here sketches of the lives of some who were eminent in the profession, of others who became prominent in other ways, and again of others whose lives are noteworthy by reason of their associations.

Dr. Clayton Tiffin was among the most prominent of the early practitioners. He was raised and educated in and near Chillicothe, Ohio, mostly with his uncle, Dr. Edward Tiffin, who was Governor of Ohio at an early day and also a physician. Dr. Clayton Tiffin left Chillicothe as an assistant surgeon in the war of 1812, and served as surgeon until the war closed, when he settled in St. Louis. He had great energy, and was an eminently practical man. During his residence in St. Louis he carried on a more extensive practice than any other man who ever lived here, becoming quite wealthy through his profession. He was of a restless disposition, and after some years of prosperous practice went over the plains to Utah and then to California, finally moving in 1846 to New Orleans, where he again entered practice. Here he soon built up a large business, especially among the river men, many of whom had been his friends and patrons while he was practicing in St. Louis. He was a skillful surgeon, and is believed to have made the first successful Cæsarian operation in the Mississippi valley. He died in New Orleans about 1856, and his remains were brought to St. Louis for interment.

Dr. Herman Laidley Hoffman, another pioneer physician, was born Oct. 17, 1796, in Winchester County, N. Y. Having had the advantages of a

superior literary and medical education, Dr. Hoffman left New York in the fall of 1819, and, as he said, “with his doctor’s degree in his pocket and his worldly goods in a valise,” started for St. Louis, then a place of about four thousand inhabitants. In those days it was necessary for a physician to keep his own drugs and medicines. Dr. Hoffman opened a drug store on the west side of Main Street, about sixty feet north of Market Street. His practice increased rapidly, and by the time he had been settled in St. Louis four or five years he looked upon himself as a prosperous man. In 1826 he was one of sixty-five citizens comprising the old Phoenix Fire Company. While in Illinois in 1835 the stage in which he was riding upset, and his right hand was so badly injured as to necessitate its amputation at the wrist. By that accident he was deprived of one of the greatest enjoyments of his life,—that of hunting, as he could no longer handle a gun. He soon learned to write with his left hand, his first essay in that line being the signing of the coupons to the city bonds, which, as treasurer, he was required to do. The doctor, it appears, continued in practice but a few years, abandoning it some fifty years ago. He subsequently resided principally in Cincinnati and Cleveland, where he carried on an extensive vineyard, but returned to St. Louis in 1874. He died Nov. 5, 1878. He was a man of fine literary ability, and an unpretending, upright citizen.

It was from the ranks of the medical profession that the first mayor was selected when the city was incorporated in 1823, and such an efficient and popular officer did Dr. William Carr Lane prove himself that he was nine times elected to that office. A sketch of his life will be found in the municipal chapter of this work.¹

¹ The following fee bill, found among the papers of Dr. William Carr Lane, was kindly loaned the author by Dr. Lane’s grandson, Dr. William C. Glasgow, of St. Louis:

“At a meeting of the medical faculty of the city of St. Louis, held at the City Hall, on the twenty-third day of November, 1829, the following regulations for fees were unanimously entered into:

Charge		
No. 1.	For the first visit in the city.....	\$1.00
“ 2.	“ two or more visits to regular patients, per day.....	2.00
“ 3.	“ a whole day’s medical attention.....	10.00
“ 4.	“ a night visit (expressly), after nine o’clock.....	2.00
“ 5.	“ a whole night’s medical attention.....	10.00
“ 6.	“ application or dressing vesicatories.....	.50
“ 7.	“ any other simple dressing.....	.50
“ 8.	“ visit in the country, per mile.....	1.00
“ 9.	“ consultation.....	5.00
“ 10.	“ writing a prescription.....	1.00
“ 11.	“ verbal prescription or advice.....	1.00
“ 12.	“ treating syphilis.....	20.00
“ 13.	“ treating gonorrhœa.....	10.00
“ 14.	“ natural labors, from.....	\$8.00 to 20.00
“ 15.	“ preternatural, difficult, etc., labors, from	\$30.00 to 40.00

Dr. Hardage Lane, another prominent physician of that period, was a cousin of Dr. William Carr Lane, and was regarded as one of the most accomplished members of his profession in the State. He had a large and lucrative practice among the best families of the city, and gave his attention closely to professional

duties, so that he was less conspicuous in political circles and not so generally known as his cousin Mayor Lane. He died early in July, 1849, having practiced medicine in St. Louis for more than a quarter of a century. During the prevalence of cholera in that year he was employed day and night in his ministrations to those stricken with the pestilence. He was at last forced to yield to physical exhaustion and disease, and after an illness of two weeks died, a sacrifice to his convictions of professional honor and duty. He was very hospitable, and used to entertain a great deal of company. His wife was an accomplished woman and a leader in society, and they frequently gave the most elegant dinners and fashionable parties. Dr. Lane was a great reader, and kept himself abreast of the most recent progress in the profession.

Charge	No. 16. For	amputating fingers, toes, and other small members.....	\$10.00
" 17. "	"	amputating arm, leg, or thigh.....	50.00

" 10. "	"	quinine solution (eight grains to the ounce), per ounce.....	.50
" 11. "	"	blistering plasters.....	from 25 cents to 1.00
" 12. "	"	strengthening plasters.....	from 50 cents to 1.00
" 13. "	"	common ointment, per ounce.....	.25
" 14. "	"	compound ointment, more costly, per oz..	.50

Dr. Stephen W. Adreon was born in Baltimore in 1806. His father was Capt. Christian Adreon, a soldier of the Revolutionary war, and in the war of 1812 a captain in the Fifth Regiment of Maryland. In early life Dr. Adreon enjoyed all the requisite facilities for acquiring a liberal education, and after a protracted course of study graduated finally at the University of Maryland. About 1832 he came to St. Louis, turning his attention first to commercial pursuits, engaging in the wholesale dry-goods business. He did not long continue in mercantile occupations. His tastes for professional life led him to the study and practice of medicine, in which he continued with success to the end of his life. During his long career in St. Louis he was frequently called to occupy positions of responsibility in the administration of municipal affairs. During the incumbency of Mayors Kennett, King, and Filley he was a member of the Common Council. For a considerable period he was president of the Board of Health, discharging the responsible duties of that office with fidelity and skill. He served the public well in 1865 as health officer, and during the last year of his life was one of the managers of the House of Refuge, and ward

For attending to one person.....	\$20.00
" " two persons.....	25.00
" " three persons.....	30.00

All over five to ten, for each.....	5.00
All over ten, for each.....	3.00

"Resolved (secondly), That every practicing physician in the city of St. Louis annex his signature to the above bill of prices.

"We whose names are hereunto subscribed bind ourselves to observe the above regulations, under the penalty of being denounced as unworthy members of the medical faculty:

"Signed by Breton, D.M.M.; A. Moran, Docteur; B. Graham, Horace Gaither, Samuel Merry, C. Tiffin, G. Brun, Cornelius Campbell, Stephen W. Roszett, John Woolfolk, Hardage Lane by Samuel Merry, G. W. Call, W. M. Millington."

"It was also unanimously

"Resolved, 1st. That in attending by the year the following charges be adopted:

Edwin B. Smith

physician for the poor of the Eighth Ward. He died Dec. 9, 1867, leaving a wife and two sons.

Dr. Adreon enjoyed the confidence and respect of the community. He ranked well among his professional brethren, by his personal qualities entitling himself to the friendly esteem of the social circles in which he moved, and by his municipal services commanding the honor of the public. Agreeable in disposition, and liberal in the devotion of time and money to the interests of the city and to those who stood in need of his services, he died regretted by all who knew him.

Dr. Edwin Bathurst Smith, for nearly fifty years an honored citizen of St. Louis, was born in Essex County, Va., towards the close of the last century. His father, Edwin Bathurst Smith, of "Bathurst Place," Va., belonged to one of the most distinguished families of the Old Dominion, and was the only brother of Governor George W. Smith, who perished in the burning of the Richmond Theatre in 1811, an event rendered memorable as well as appalling on account of the large number and high social position of those, of both sexes, who perished in the flames on that lamentable occasion.

His grandfather, Col. Merriwether Smith, bore a conspicuous part in the struggle for independence, both as a member of the House of Burgesses of Virginia (serving on the committee which framed the Bill of Rights), and as the author of the American "Crisis." He was subsequently a member of the Congress of the United States from 1778 to 1783. His mother, Sallie Monroe, descended through a long line of distinguished ancestors from Sir Robert Monroe, Bart., of Fulis, Scotland, who came to this country in 1642, and settled in the northern neck of Virginia, and whose descendants filled an important place in the early history of the country.

Dr. Smith acquired his early education in the literary institutions of his native State, after completing which he determined to qualify himself for the medical profession. With this view he went to England, bearing letters of introduction from his relative, President Monroe, to the nobility and gentry. On arriving in England he became the guest of the Marquis of Hawbury, at whose suggestion he matriculated in the University of Edinburgh, at that time the most celebrated seat of medical learning in the world. In this institution he completed his medical education, after which he spent some time in visiting the various capitals of Europe for the purpose of gratifying his taste in the study of chemistry, botany, geology, and entomology, the pursuit of which was to him a source of peculiar pleasure through life.

On returning to America he settled in New Orleans, where, with all the energy of youth and a well-stored mind, he commenced the practice of medicine. As might be expected, he soon became prominent, both as a practitioner and a writer on medical subjects. He was one of the founders of the Medical College of Louisiana, in which institution he filled the chair of Professor of *Materia Medica* and Therapeutics. He felt a special interest in the treatment of yellow fever, the scourge of the Southern metropolis, and was the first one to introduce the refrigerant regimen in the treatment of that formidable disease, by giving his patients cold drinks to slake their thirst and allay their burning fever.

In the first epidemic of cholera in this country in 1832, which proved so fatal in New Orleans, as well as in other places in the South and West, he was untiring in his efforts to stay the progress of the plague, and in the same year was honored by the Governor of Louisiana in being appointed a member of the Western Medical Board, charged with the sanitary affairs of the State. The periodicals of that date contain many articles from his pen on medical and scientific subjects, which added to his reputation as a physician and scientist.

In 1838, when in the prime of life and in the successful practice of his profession, he was married to Miss Virginia Christy, the youngest daughter of Maj. William Christy, of St. Louis, so well known as one of its early settlers and most enterprising and honored citizens, a sketch of whose life and career is to be found in another part of this volume. The climate of New Orleans proved injurious to the health of his youthful bride, on which account Dr. Smith reluctantly consented to abandon the theatre of his successful labors and moved to St. Louis to reside. Here he spent the remainder of his life in literary and scientific pursuits, in gratifying his taste for letters, in looking after his property interests, and, assisted by his accomplished wife, in rendering his hospitable home the abode of domestic happiness and of social enjoyment to his and her numerous friends. Dr. Smith retained all his mental faculties to a ripe old age. On the 2d of February, 1883, after a brief illness, he died in his eighty-sixth year, respected and beloved by all who knew him.

Dr. Smith was a man of fine native ability and of refined and cultivated manners,—a high-toned gentleman of the old school, with whom honor and integrity towered above all other considerations.

Dr. Meredith Martin, one of the oldest physicians now living in St. Louis, was born in Kentucky in 1805, and studied medicine in the office of Dr. B. G.

Farrar, commencing in 1828, the first student of medicine west of the Mississippi. He graduated in medicine at the University of Pennsylvania in 1832, and in 1838 married a daughter of John H. Gay, of St. Louis. His second marriage occurred in 1864, his wife being Mrs. Tracy, formerly Miss Morton, of St. Louis. He commenced practice in 1832, and was at once sent out to the Indian Territory to vaccinate the Indians, in which service he was engaged for several months, returning to the city at about the close of the terrible cholera visitation of that year. He then entered into general practice, and only within a few years has withdrawn from active service in the profession. He was three times elected president of the St. Louis Medical Society, viz., in 1840, 1842, and 1845.

Dr. E. H. McCabe was born in Adams County, Pa., in 1801; received his collegiate education at Georgetown College, and graduated in medicine at the University of Maryland in 1822. He came to Missouri in the following year, and practiced medicine for two years at Fredericktown, and then at Kaskaskia, Ill., for seven years. From the year 1833 to 1849 he was engaged in practice in St. Louis, being associated in business with Dr. Lewis F. Lane, and afterwards with Dr. Hardage Lane. He was highly esteemed as a physician and as a Christian gentleman. In 1849 his health became so seriously affected as to necessitate his withdrawal from active professional service. He died June 4, 1855, having suffered for five years from epithelioma of the face.

Dr. William Beaumont, whose name is known all over the world in connection with the observations made upon the subject of gastric digestion in the case of Alexis St. Martin, the Canadian boatman, was for many years a resident of St. Louis, where he died April 25, 1853, after a painful illness of a few weeks' duration. At the time of his death Dr. Beaumont was in the sixty-eighth year of his age, having been born in Lebanon, Conn., in the year 1785. In 1812, after studying medicine at St. Albans, Vt., for two years, he joined the Sixth Infantry, with the appointment of assistant surgeon. For more than twenty years he was a member of the medical staff of the regular army, being stationed at various points on the Northern frontier. He served through the war of 1812 with distinction, being present, among other occasions of interest, at the capture of Fort George in May, 1813. In 1830 he was stationed at Jefferson Barracks, and afterwards in the arsenal at St. Louis. Two or three years later he resigned from the army and took up his residence in St. Louis. For many years he was considered by all odds the most promi-

nent surgeon in the city, and enjoyed a large and profitable practice. He was not only popular among the people, but had an excellent reputation in the profession.

That which has made his name best known to the profession, however, is the publication of his papers on the "Physiology of Digestion and Experiments on the Gastric Juice" (published in Boston in 1834). While stationed upon the northern frontier he was so fortunate as to be called to attend a Canadian boatman named Alexis St. Martin, who had received a gunshot-wound in the abdomen that healed up in such a manner as to leave a fistulous opening. By means of this accidental fistula Dr. Beaumont was enabled to make a series of observations upon the nature of the gastric juice, and to solve many problems with reference to the subject of digestion which had previously been unknown.

Dr. George Engelmann was born at Frankfort-on-the-Main, Feb. 2, 1809, was educated at Frankfort, Berlin, Heidelberg, and Würzburg, removed to the United States in 1832, and settled in St. Louis in 1835, where he has practiced medicine ever since. He was president of the St. Louis Medical Society in 1852. In 1836 he was one of the founders of the Western Academy of Natural Sciences, which held regular sessions for several years. The St. Louis Academy of Science was organized in March, 1856, and continues a valuable organization to the present time. Of this society Dr. Engelmann was for many years the president, and has contributed much to the value and interest of its sessions and its publications.

For many years he carried on a very large and laborious practice, and was recognized as one of the leading practitioners in the city. He had a large midwifery practice, and was the first one in St. Louis to use the forceps in difficult cases, in which he was at first bitterly opposed by other practitioners.

In addition to the conduct of an arduous practice, he has made original investigations which have given him a world-wide fame as a botanist. He made meteorology an especial study, principally as connected with the sanitary status, and has kept a record of meteorological observations now for over forty-seven years. Dr. Engelmann has practiced medicine in St. Louis longer than any other physician now living. At the age of seventy-four he is still occupied with study and work which many a younger man would consider onerous, and manifests an enthusiastic interest in professional and scientific affairs which would put to shame the indifference of those who have far less right to rest upon their laurels than he has.

Thos. Van Studdiford M.D.

Dr. John Laughton was born in Sullivan County, N. H., in 1804. He attended two courses of lectures in the medical school of Woodstock, Vt., and one at the Berkshire Medical Institute, at Pittsfield, where he graduated Dec. 11, 1833. He then practiced medicine in Arlington, Vt., for six years, removing to St. Louis in the autumn of 1839. He built up a large business here, but of late failing strength and impaired health, with advancing years, have withdrawn him from active service in the profession. He was one of the incorporators of the St. Louis Medical College at the time when it separated from the St. Louis University, and has been one of the board of trustees constantly to the present time.

Dr. Alexander Marshall was born eight miles from Edinburgh, Scotland, in 1810, of Scotch-Irish parentage. His father dying when the boy was eight years of age, he went with his mother to Ireland, where he received his preliminary education. He pursued his medical education in Edinburgh, in the college of which the celebrated Professor Simpson filled the chair of surgery. In 1838 or 1839, Dr. Marshall came to the United States, and in selecting a location he made a tour of the principal Southern cities, spending two or three months in New Orleans, whence he came to St. Louis in the year 1840. He immediately commenced the practice of his profession. With reference to this portion of his life, he once stated to an intimate friend that when he came to St. Louis he had but six hundred dollars in his pocket, which he expected would last him about six months, but instead of consuming that amount his practice was such that he added six hundred dollars to his finances in that time. He continued to prosper in his profession, and by good management and economy accumulated an estate valued at three hundred thousand dollars. A year previous to his death he married a lady from Mississippi, who survives him. He died Oct. 21, 1875.

Dr. Henry Van Studdiford¹ was born on the 2d of April, 1816, in Parcippeny, Morris Co., N. J. It was intended by those to whose charge he had been committed (having been left an orphan at the age of eight years) to prepare and educate him for the ministry. This idea, however, was soon discarded as the character of their young relative and ward began to develop. While not lacking in that deep reverence for everything connected with religion which is so characteristic of the school in which he was reared, his family being devout Presbyterians, he was gifted with superabundant energy and activity of body and

mind, and longed for a more exciting and combative sphere of life than that which generally falls to the lot of a clergyman. It was finally decided that he should become a physician, and having finished his academic course he entered the University of Pennsylvania, and in due time graduated at that institution. After practicing his profession for some time in the town of Madison, N. J., he determined to seek a more extended and a more promising field, and in accordance with this resolution removed to St. Louis, then a place of thirteen thousand or fourteen thousand inhabitants, where he arrived in 1839. He at once commenced the practice of his profession, and soon secured a leading place among the physicians of that period. Gifted with a suave and courteous manner, together with a splendid physique, he speedily won the confidence of his patients, which his skill as a physician developed into implicit trust.

About this time he met and married Margaret Thomas, the second daughter of Col. Martin Thomas, founder and first commandant, it is said, of the United States arsenal, a gentleman who, aside from his military standing, held the highest social position among the residents of old St. Louis, and possessed rare qualities of head and heart. The young physician, though a comparative stranger, mingled in that society, and encountered with success the by no means undistinguished *coterie* of professional men and officers. At this early period he had, aside from his professional attainments, given evidence of rare business qualifications. His superior foresight and judgment, together with an abiding faith which he seems ever to have cherished in the ultimate growth and prosperity of St. Louis, caused him to invest extensively in real estate, the natural and rapid increase in the value of which, together with the proceeds of a large and lucrative practice, have yielded him an ample fortune. Thus situated he has of late years withdrawn from the more laborious part of his practice, but still retains a large office business and occasionally responds to the calls of old and cherished friends. Though thus partially retired he has by no means lost his skill or his interest in his profession, and frequent demands are made by his professional brethren for his advice in consultations, on which occasions his deep penetration, keen analytical powers of mind, and ripe experience enable him to be of invaluable service in obtaining a correct diagnosis of disease.

His retentive memory and wonderfully clear judgment, aided by a long and varied practice and great prognostic skill and knowledge in the treatment of patients, fully account for his extended popularity and success. Gifted with a commanding presence

¹ Contributed by F. H. Burgess.

which would distinguish him in any assembly, his manners in ordinary intercourse would be considered rather reserved than otherwise; but among his more intimate friends this easily gives place to a more genial bearing, which discloses a mind well stored with professional and philosophical information, and a conversation full of anecdote and reminiscence, made peculiarly interesting by his long and varied intercourse with distinguished men. Strong in his likes and dislikes, as men of his type generally are, he seems to have adopted the advice of Polonius in forming his friendships, and prefers, rather than dull his palm with entertainment with each new-hatched, unfledged comrade, to grapple to his soul with hooks of steel those friends whom he has tried, gathering about him a *coterie* of strong and faithful companions, who, from many a quiet and unheralded act of kindness and generosity, have learned how to estimate his sterling personal virtues.

After a long, interesting, and active practice, Dr. Van Studdiford is still in the enjoyment of unbroken health and physical vigor, and of mental faculties that give no sign of impairment, the result of a careful observance of that moderation, temperance, and cheerfulness which his profession inculcates as the most effective agency of the prevention and cure of disease. Indeed, he might still be responding to the calls of an active and varied general practice but for the demands of a large office and consulting business, and a desire to enjoy the society of family and friends and the pleasures of study and research.

In looking over the biographical sketches of a considerable number of the eminent living and dead practitioners of medicine in St. Louis, one will be struck with the large number of those who came to St. Louis in the course of a few years, from 1840 to 1845. Among them were Drs. McDowell, McPheeters, C. W. Stevens, S. G. Moses, J. B. Johnson, George Johnson, John S. Moore, M. M. Pallen, Linton, and Wislizenus, all of whom have left the impress of their minds and character upon the profession by their work as teachers or as men of science.

Dr. Joseph Nash McDowell, one of the best-known physicians and surgeons who have ever practiced in St. Louis, was born in 1805, and came to St. Louis in the spring of 1840 from Cincinnati, where he had been associated in the Cincinnati Medical College with Drs. Drake, Gross, and other distinguished men. On coming here he immediately set to work to organize a medical college.¹ He was a fluent and eloquent

speaker, and was possessed of great wit. His voice and manner were like those of John Randolph, of Virginia. He was a natural orator, and possessed a remarkable power of adapting himself to his audience, so that he could entertain any company or society into which he might be thrown. He had an inexhaustible fund of anecdotes. It is said of him that he had a story for every bone, muscle, nerve, and vessel in the whole body, and that he used to enliven his lectures and stimulate the memory of the students by relating these stories, and so fixing the anatomical facts in their minds.

He was proverbially careless and improvident in pecuniary matters, kind and charitable to the poor, but ready to take advantage whenever opportunity afforded of those who had abundant means. He was very eccentric in some particulars. In the early years of his residence here he delivered a number of lectures against Jesuitism, his ire being aroused against the order, perhaps, by reason of the fact that the Jesuit fathers of St. Louis University had allowed a rival medical school to be organized under the charter of their college. These lectures created some excitement in the community, and Dr. McDowell was so impressed with the belief that his life was in danger that he made and wore a brass breast-plate, and always carried arms. The medical college building was so constructed as to be a formidable fortress, and his residence on the opposite corner was also planned so as to be capable of resisting an assault. He formed a plan to go across the plains and capture Upper California. For this purpose he purchased from the United States government fourteen hundred discarded muskets for two dollars and fifty cents each, which he stored in his house and in the basement of the college building. He also got together quantities of old brass and melted them up, and even took down the large bell of the college and had six cannon cast. All these arms were given by Dr. McDowell to the Southern Confederacy at the outbreak of the late war. It is said that several hundred young men, most of them graduates from the college, had promised to accompany Dr. McDowell on the proposed expedition to the Pacific coast.

Among other strange fancies which he had were those with reference to the disposal of the remains of deceased friends. Dr. Charles W. Stevens relates that within a day or two after he first came to the city as a medical student he attended the burial of one of Dr. McDowell's little children. The coffin was lined with metal, and after the body of the child had been placed in it, was filled with alcohol and sealed tight. The grave was in Mr. Dillon's orchard. One year

¹ See history of the Missouri Medical College, farther on in this chapter.

afterward Dr. McDowell had the coffin exhumed, and removed the body of the child to a copper vase of suitable dimensions and shaped just like a diploma-case. This again was filled with alcohol and hermetically sealed. Two or three children died and were thus disposed of. No religious ceremony of any sort was held. The copper vases were taken at night, and a procession being formed by the students and other immediate friends of the doctor, each one carrying a light, were quietly deposited in a vault in the rear of the premises where he resided.

Once when on a hunting excursion he was much struck with a beautiful knoll at the commencement of the high ground just east of Cahokia. He purchased it, constructed a vault there, and when his wife died he placed her remains in a vault which he had had built there, where they remained until after his own death, when their son had them removed to Bellefontaine. At another time he purchased a cave near Hannibal and had masonry constructed with an iron gate at the entrance. He took a copper vase containing the body of one of his little children preserved in alcohol to this cave, and had it suspended from the roof of the cave by means of hooks. The gate at the entrance was broken down and the vase broken open by a company of roughs not long after, and the doctor gave up the idea of having it used as a place of deposit for the dead.

However, this method of disposal of the dead seems to have taken a firm hold upon his mind, for some time after, when he was quite sick and believed himself to be at the point of death, he called to his bedside his son, Drake McDowell, and his intimate friend and associate in practice, Dr. C. W. Stevens, and made them swear that in case of his death they would have his body placed in a copper vase with alcohol, and that they would then take it to the Mammoth Cave of Kentucky, and have it suspended from the roof of that cave, asserting that he had already made arrangements with the proprietor to allow it to be done.

In erecting the stone octagon building that served so many years for the purposes of the college he caused a foundation to be laid in the centre for a large column which was to extend up to the peak of the roof, and in which niches were to be prepared for the reception of copper vases containing the bodies of himself and members of his family.

It is said that the plan of the octagon building was suggested to him by the form of a very handsome stove which stood in the amphitheatre of the former college building, and which the doctor greatly admired. It was his intention to carry the structure up

eight stories high, and surround the top with ramparts, making it a regular fortress; and the foundation walls were laid six feet thick with this in view. Lack of means alone prevented him from carrying out the plan.

When the war broke out in 1861, Dr. McDowell was very pronounced in the stand which he took in favor of the cause of the South, and, as already mentioned, he turned over to the authorities of the Southern Confederacy the arms which he had purchased and had had manufactured several years previously.

As the result of this his college building was confiscated by the United States authorities, and was used for some years as a military prison. Dr. McDowell himself went South and served as surgeon and medical director at different points during the war, after which he returned to the city, reorganized the faculty of the college, and practiced medicine until the year 1868, when he died. His remains are interred in Bellefontaine Cemetery.

Dr. John S. Moore was born in Orange County, N. C., in 1807. He was educated at Cumberland College, Princeton, Ky., graduating in 1826. He attended one course of lectures at Miami University, in Ohio. He then practiced for five years at Mount Vernon and Carlisle, Ill., having married Miss Morrison, of Princeton, Ky., daughter of one of the professors in the college. He started for Philadelphia to complete his medical education and secure a diploma, but meeting Dr. McDowell in Cincinnati, he was persuaded by him to enter the first class of the Cincinnati Medical College, at which he graduated in the spring of 1832. He then practiced in Pulaski, Tenn. He removed to St. Louis in September, 1840, and took part in organizing the Medical Department of Kemper College, with which institution, under its various changes of name, he has been identified to the present time.

In accordance with the usual custom in those days, the various professors gave public lectures as introductory to their several courses. It fell to Dr. Moore, as the youngest member of the faculty, thus to give the first medical lecture delivered west of the Mississippi River.

He was dean of the college faculty and president of the board of trustees for a number of years. In 1869 he was elected vice-president of the American Medical Association. From 1849 to 1860, and during the war, he had a very large practice, but of late years has withdrawn from active business.

Dr. William M. McPheeters, who for more than forty years has been one of the leading medical prac-

tioners of St. Louis, was born in Raleigh, N. C., Dec. 3, 1815, and was the second son of the Rev. William McPheeters, D.D., a Presbyterian clergyman of great prominence and ability. William M. McPheeters was educated at the University of North Carolina, and subsequently studied medicine under Professor Hugh L. Hodge, of Philadelphia. In 1840 he graduated from the Medical Department of the University of Pennsylvania, after which he served for one year as resident physician at the Blockley Hospital, Philadelphia. Upon relinquishing this position in the fall of 1841, he removed to St. Louis, where he arrived October 15th of the same year.

In company with Drs. Charles A. Pope, S. G. Moses, J. B. Johnson, George Johnson, and J. I. Clark, Dr. McPheeters assisted in establishing the first public dispensary west of the Mississippi-River. These gentlemen also inaugurated many important reforms, and brought to the practice of their chosen profession a devotion and skill which marked a new era in the medical history of St. Louis.

The high esteem in which Dr. McPheeters was held by those most competent to judge of his professional abilities is seen in the fact that he was early chosen Professor of Clinical Medicine and Pathological Anatomy, and afterwards of *Materia Medica* and Therapeutics, in the St. Louis Medical College, in which positions he served faithfully for fourteen years, and until he left home to join the Confederate army. He also occupied the same chair after the war in the Missouri Medical College, from 1866 to 1874, when he retired from the professorship to accept the position of medical director of the St. Louis Mutual Life Insurance Company.

From 1856 to 1861 he was surgeon of the United States Marine Hospital at St. Louis, and for a number of years was physician in charge of the medical wards of the St. Louis Hospital of the Sisters of Charity.

For eighteen years (from 1843 to 1861) he edited with great ability and success the *St. Louis Medical and Surgical Journal*, in which appeared numerous able articles from his incisive pen, among them being a history of the cholera epidemic in St. Louis in 1849, which attracted wide attention, and proved a valuable contribution to medical science. He is a member of the Obstetrical and Gynecological Society of St. Louis, of the St. Louis Medical Society, and of the Medical Association of the State of Missouri. Of the two latter societies he has been president.

In 1872, at the annual meeting of the American Medical Association, held in Philadelphia, he was elected vice-president of that body. He is a member

also of the St. Louis Medico-Chirurgical Society, and has been elected an honorary member of the State Medical Associations of North Carolina and Arkansas.

During the late war Dr. McPheeters' sympathies were with the Southern Confederacy, and for three years he served as surgeon in the Confederate army, filling many important positions, among them that of medical director on Maj.-Gen. Sterling Price's staff. At the close of the war he returned to St. Louis, and resumed the practice of his profession. He has been twice married, the first time to Miss Martha Selden, of Virginia, who died about a year after her marriage; the second time to Miss Sallie Buchanan, of St. Louis, who is the mother of six children, and who for more than a third of a century has made his home one of great peace and comfort.

Dr. McPheeters is a man of such decided Christian character that a failure to refer to that fact would render this outline of his life conspicuously incomplete. For many years he has been a ruling elder in the Pine Street (now the Grand Avenue) Presbyterian Church, in which position he has served with marked fidelity. He was the first president of the St. Louis branch of the Western Society for the Suppression of Vice. Dr. McPheeters' learning and skill have won for him a wide reputation and the confidence of the entire medical profession wherever he is known, while his unswerving devotion to the duties of religion has endeared him to thousands who have received at his hands not only remedies for the ills that flesh is heir to, but also spiritual advice and consolation.

Dr. Adolph Wislizenus is a man of note among the physicians in St. Louis, having made for himself a name that is known all through the world of science by reason of his original observations and the careful researches which he has made. He was born in Rudolstadt in 1810. He came to St. Louis in 1840, and was associated in practice for five years with Dr. George Engelmann. He then made a tour through the southwestern part of this country, and into Mexico, making a thorough exploration of the regions through which he traveled, taking the altitudes of different points, examining the flora, the geological features, and making other observations which enabled him on his return to prepare a report of such value that it was published by the Senate of the United States in 1846-47. So far as the territory of the United States is concerned, this exploration has been virtually superseded by the more exhaustive researches of the government surveys; but Dr. Wislizenus' report is still the most complete and reliable with reference to the part of Mexico which he traversed. His original plan was to explore the territory of

W. M. M. Pheters

Arizona and California, but he was taken prisoner at Chihuahua, and after being released he joined the United States army. On his return he spent some time in Washington, and then came back to St. Louis, where he has lived ever since, devoting his time, in the intervals of leisure from the arduous duties of a general practice, to scientific pursuits, being specially interested in botany and meteorology.

Dr. Charles W. Stevens was born June 16, 1817, in Pompey, Onondaga Co., N. Y. He was educated as a civil engineer and surveyor, but having come West, and finding little encouragement for success in that vocation, he commenced the study of medicine with Dr. Rogers, of Rushville, Ill. He graduated in 1842, at the Medical Department of Kemper College (now the Missouri Medical College), and located for practice in St. Louis. In 1844 he was elected Demonstrator of Anatomy in the Kemper College, which position he held for five years, when he took the same position in the St. Louis Medical College. In 1855 he was elected to the chair of general, special, and surgical anatomy in the St. Louis Medical College. About this time he went to Europe, and spent several months in professional study. After thirteen years' service he resigned the professorship in order to take the position of super-

intendent and physician to the St. Louis County Insane Asylum. This position he left in 1872, and has since then been engaged in practice in St. Louis, giving attention specially to the treatment of diseases of the nervous system. In 1861 he was appointed coroner of St. Louis County, to fill a vacancy caused by the resignation of Dr. Boislinière. He saw several months of military service during the war. In 1879 he was elected president of the St. Louis Medical Society.

Dr. Charles Alexander Pope, one of St. Louis' most distinguished surgeons, was born in the beautiful town of Huntsville, Ala., March 15, 1818. His

father, Benjamin S. Pope, a man of rare literary culture himself, was careful that his son should have the advantages of a complete education. After thorough academic instruction in his native town, he entered the University of Alabama, at which institution he graduated at a very early age. Soon thereafter he entered upon the study of medicine with the same zeal and industry which ever characterized his whole professional career. Attracted by the well-deserved reputation of Dr. Daniel Drake, then at the height of his popularity as a teacher and lecturer, he attended his first course of medical lectures in the Cincinnati Medical College.

From Cincinnati he went to Philadelphia, and entered the University of Pennsylvania, from which institution he received the degree of M.D. in the spring of 1839, when just twenty-one years of age. The French school of medicine being at that time the most celebrated in Europe, Dr. Pope immediately after graduation went to Paris, where for two years he devoted himself with untiring industry to the special study of surgery, for which department of medicine he had a strong natural inclination, and for which he possessed superior qualifications. After his residence in Paris he also visited the great Continental schools, as well as those of Great Britain and Ireland. On returning from Europe he came to

Ch. W. Stevens, M.D.

St. Louis, then the most attractive point in the Great West, where in January, 1842, he commenced his professional career. From the first he devoted himself with industry to the study and practice of surgery, and it was not long before his thorough medical training, studious habits, urbane manner, and high moral qualities brought him permanently before the public as a man of mark in his profession. His career was one of uninterrupted progress. Having already acquired reputation as a judicious, skillful, and successful operator, he was in 1843 chosen Professor of Anatomy in the St. Louis Medical College, then the Medical Department of the St. Louis University. His knowledge of

anatomy was minute and accurate, and his success as a teacher undisputed. In 1847, in accordance with his cherished desire, he was transferred from the chair of anatomy to that of surgery, which chair he continued to occupy and adorn for many years. In 1846 he was married to Miss Caroline, only daughter of Col. John O'Fallon, who as a tribute to the merit of his distinguished son-in-law erected out of his own ample means the large and handsome building known as the St. Louis Medical College; so that Dr. Pope was not only a distinguished professor in, but also a real benefactor to, this still flourishing medical institution.

In 1854 he had the high honor conferred upon him of being elected president of the American Medical Association, and the year following he presided at the meeting held in Philadelphia with dignity and acceptance. This gave him a national reputation, which he well sustained by his achievements in surgery, being constantly called on to perform all the more important and difficult operations, which he always did with eminent skill and success. He continued in the diligent pursuit of his profession until 1865, when, reluctantly yielding to the solicitations of his family, he resigned his professorship and gave up his large and lucrative practice with the view of spending a few years in European travel.

In 1870 he returned to St. Louis on a visit, when such a reception was given him as is rarely accorded to any one. The whole city, as it were, rose up to do him honor, and his entire visit was one continued ovation. He returned, however, to Paris to join his family, but scarce had tidings of his arrival been received before the whole city was startled by the announcement of his sudden and unexpected death, which occurred in the city of Paris, July 5, 1870, in the fifty-second year of his age.

Dr. Pope was an accomplished and high-toned gentleman and physician. He was not impelled as some men are by strong passions, but the elements were so combined in him as to form a character at once symmetrical and admirable, a character in which urbanity, suavity, candor, and high moral qualities constituted the Corinthian column.

Dr. Moses M. Pallen died in St. Louis, Sept. 25, 1876, at the age of sixty-six. He took his literary degree at the University of Virginia and his medical degree at the University of Maryland, at Baltimore. He practiced medicine for seven years at Vicksburg, Miss., and in 1842 came to St. Louis, where he had a remarkably successful career as a practitioner and teacher of medicine. He held the position of Professor of Obstetrics in the St. Louis Medical College

for over twenty years, resigning about three years before his death on account of failing health. During the Mexican war he held the position of contracting surgeon at the St. Louis arsenal. He also performed the duties of health officer during Mayor Pratte's administration, and held that position during the prevalence of the cholera epidemic of 1849. He was one of the founders and earliest presidents of the St. Louis Academy of Science, and he was also president for several years of the St. Louis Medical Society.

Dr. Pallen was a terse and ready writer, and frequently contributed articles to the medical journals and newspapers on subjects of scientific and popular interest. He left four sons and two daughters. Of the former, Dr. M. A. Pallen, of New York, is well known in the profession on both sides of the Atlantic.

Dr. M. L. Linton was a native of Kentucky, where he studied his profession, but finished his preparatory course in Paris and Edinburgh. Having practiced with success in his native State, he came to St. Louis in 1843, and was elected to a professorship in the Medical Department of St. Louis University, which position he retained under its re-establishment as the St. Louis Medical College until the day of his death. In his distinguished career as a teacher he was associated both in friendship and fame with Dr. Pope, whose untimely decease he greatly mourned, their intimacy commencing when students together in Paris, and continuing warm and unbroken until severed by death.

Dr. Linton did not confine himself exclusively to matters pertaining to medical science, occasionally taking active part in the political movements of the day. He was a conspicuous member of the Missouri State Convention in 1861-62, which formed a provisional government for the State, with Hamilton R. Gamble as Governor, and he was also a member of the convention of 1865. As a teacher, he stood with the ablest and best. He was also a philosopher and a poet. Dr. Linton was an invalid for forty years; his body moved slowly, and frequently required a long rest; his mind was restless, resistless, quick, brilliant, and vigorous; his wit was sharp and his repartee unrivaled. His limited early advantages were only known to the associates of his youth. He had by the force of intellect and untiring mental industry become a polished scholar, learned in the ancient and modern languages. He died in June, 1872, in the sixty-fifth year of his age.

Dr. George Johnson was born in Georgetown, D. C., Sept. 12, 1817, and in his seventeenth year came to seek his fortune in St. Louis, which was then just beginning to attract attention as a prominent business

Cha. A. Pope

S. Gratz Moses

centre. Shortly afterwards he commenced the study of medicine with Dr. Beaumont, and after graduating at the University of Pennsylvania in 1841, became and for many years remained his partner. During the time he was pursuing his studies he received the appointment of assistant paymaster of the United States army at the arsenal in St. Louis, the emoluments of which office greatly facilitated his medical education. In 1846 he was appointed surgeon to the St. Louis Legion, under command of Col. A. R. Easton, and participated in the stirring scenes of the Mexican war. After his return from the war he was appointed surgeon to the United States Marine Hospital at St. Louis, but owing to ill health he resigned in 1853 and went to Texas to recuperate. Repeatedly he was obliged to leave the city on account of ill health, only to return at the earliest possible moment, for he could not endure being long separated from the many friends residing here, whom he loved and who were devotedly attached to him. Dr. Johnson was, in the highest sense of the term, a true man, brave and chivalrous in his bearing, and one upon whose hearty co-operation in every humane and philanthropic enterprise people could always rely. Although a man of delicate frame, and frequently a great sufferer from disease, he pursued his profession with a zeal and self-sacrificing devotion which greatly endeared him to his patients. He was the very soul of professional honor. No one had a more profound or outspoken contempt for the tricks of the charlatan, nor did any one ever more truly exemplify the character of the high-toned physician. He died in April, 1873.

Dr. Alfred Heacock is now the oldest medical practitioner in St. Louis, having graduated in medicine at the University of Pennsylvania in 1825, and having been engaged in the practice of his profession ever since, a period now of almost fifty-eight years. He was born in Norristown, Pa., May 18, 1804. After his graduation he located in Ohio, where he lived for seven years. He then moved to Terre Haute, Ind., where he practiced for eleven years, after which he removed to St. Louis, and has been here ever since. He chose a location in what was then the extreme northern part of the city, not far from the upper ferry landing, and he was not infrequently called out to cross the river and visit patients in the Illinois bottom lands and as far over as Collinsville. In 1829 Dr. Heacock received an *ad eundem* degree from Jefferson Medical College, and in 1847 the same honor from the Missouri Medical College. In 1853 he was elected to the Board of Aldermen, and was appointed a member of the Board of Health.

At the first meeting of the St. Louis Medical Society in 1883, Dr. Heacock was unanimously elected a member of that society without payment of dues for the remainder of his life.

Dr. S. Gratz¹ Moses was born in Philadelphia, Oct. 6, 1813. His ancestors, who were merchants noted for their strict integrity, came to this country in the last century, and settled in Pennsylvania. His father was a Philadelphia merchant, a gentleman of means, who gave his son a liberal education. In accordance with his enlightened views, Dr. Moses received his preliminary education at the school in Philadelphia of the late John Sanderson, an accomplished scholar and competent instructor. He then entered the Classical Department of the University of Pennsylvania as a sophomore, and graduated at that institution in 1832.

Dr. Moses commenced the study of medicine in the fall of 1832, under the direction of Isaac Hays, M.D., of Philadelphia, editor of the *American Journal of Medical Science*, and graduated in 1835 at the Medical Department of the University of Pennsylvania.

During the same year he began the practice of medicine at Bordentown, N. J., where he remained until 1839, in which year, owing to the kind recommendation of the well-known Professor Nathaniel Chapman, of the university, he went to Europe as the private physician of Joseph Bonaparte, eldest brother of the great Napoleon, and ex-king of Spain, who for many years had been a resident of Bordentown. His connection with Bonaparte brought Dr. Moses into contact with the most distinguished men in France, especially the famous members of his own profession, and from the adherents of the empire, particularly from the Murat family, he received many attentions.

Dr. Moses returned to Philadelphia in 1840, and in the fall of 1841 removed to St. Louis, where he still resides, having been engaged, with but one interruption, in the practice of medicine ever since.

In 1842, with the assistance of Drs. J. B. Johnson, William McPheeters, Charles A. Pope, J. I. Clark, George Johnson, and others, Dr. Moses was active in the establishment of the first organized dispensary in St. Louis, and became its president, continuing as such throughout its existence. This praiseworthy enterprise was the suggestion of Mrs. Vital M. Gareschè, a lady noted for her charities, and was sustained by contributions from the churches and by private subscriptions, notably from the Mulanphy family. The Rev. Dr. Eliot proffered the

¹ Contributed by F. H. Burgess.

basement of the Unitarian Church (then at the corner of Fourth and Pine Streets) for the dispensary, and the institution was managed by the above-mentioned physicians, who gave their services gratuitously for seven years, when the city established a dispensary of its own.

Dr. Moses was city health officer when the Hon. Luther M. Kennett was mayor, and assisted in organizing the sewer system and other important sanitary measures. He was also connected with the Medical Department of Kemper College in 1842 as lecturer on obstetrics and diseases of women, assisting Dr. William Carr Lane (who held that chair in the institution), and was afterwards chosen professor of the same branch of studies in Missouri Medical College. He resigned this position in 1853. During the civil war, being known to have Southern sympathies, and both of his sons being in the Confederate army, he was arrested at his office, by order of the United States provost-marshal, and, after a few days spent in the military prison, was, in company with other well-known citizens, sent under guard into the lines of the Confederacy. He at once volunteered his services, and assisted in caring for the sick in hospitals at Savannah, Ga. After the close of the war he returned to his home, and at once resumed his occupation.

Dr. Moses was one of the founders of the St. Louis Obstetrical and Gynecological Society, and was twice its president. He also assisted in establishing the Medico-Chirurgical Society, and continues to take an active interest in the affairs and debates of these associations. He is also a member of the St. Louis Medical Society.

In 1835, Dr. Moses married Miss Mary Porter Ashe, of Wilmington, N. C., a daughter of Col. Samuel P. Ashe, a planter and Revolutionary soldier, who was taken prisoner at the siege of Charleston by the British. Col. Ashe was a gentleman of high standing and fine culture. By this marriage there were two sons and two daughters. The eldest son,

Dr. Gratz A. Moses, is associated with his father in the practice of his profession; the younger, John A., is a merchant in Silver City, N. M.

In 1855, Dr. Moses married Mrs. Marie Atehison (widow), *née* Papin, a native of St. Louis, and a descendant of old French settlers. There have been no children by this marriage.

After forty-seven years of active practice of his profession, Dr. Moses is still in vigorous health, and engages daily in the performance of his arduous duties.

Dr. John B. Johnson was born at Fair Haven, Mass., in 1817. He prepared for Harvard College, but his mother's ill health interfered with his plans, and he did not complete his college course. He attended his first course of lectures at the Berkshire Medical College in Pittsfield, but not having the facilities for studying practical anatomy there which he desired, he went to Cambridge and entered the Harvard Medical School, and attended two courses of lectures. He then entered the competitive examination for a position as house surgeon to the Massachusetts General Hospital, in which he was successful, and held that position for a year, while the corresponding position of house physician was held by H. J. Bigelow. Being detained by the illness of a brother from attending the examination pre-

John B. Johnson M.D.

liminary to graduation at Harvard, he passed the examination at Pittsfield, and received his diploma from Berkshire College in 1840. Afterwards he received an *ad eundem* degree from Harvard. He came to St. Louis in the spring of 1841, and, as previously stated, was associated with five other young physicians in establishing the first dispensary organized in the city. He ascribes much of his success in the early years of his practice here to the kindly interest taken in him by Theron Barnum, who was then the proprietor of the City Hotel, the principal hotel at that time. Dr. Johnson has for many years filled the chair of theory and practice of medicine in the St. Louis Medical

College, and has had a very large and lucrative practice among the leading families of the city. He has repeatedly been a delegate to the American Medical Association, and was a constant member of the State Medical Association, of which society he was the president in 1852. Dr. Johnson's wife is a daughter of the late James H. Lucas, and a lady of rare accomplishments and graces of mind and character.

Dr. Thomas Barbour was a son of Philip C. Barbour, of Virginia, one of the judges of the Supreme Court of the United States. He was educated scholastically at the University of Virginia, and professionally at the University of Pennsylvania, in Philadelphia. He received the degree of Doctor of Medicine in 1830, and soon after settled for practice in Columbia, Tenn., where he became distinguished as a practitioner and as a man of science. He was elected Professor of Chemistry in Lagrange College, Alabama; in 1842, Professor of *Materia Medica* in the Medical Department of Kemper College; in 1843, to the chair of obstetrics and diseases of women and children, and finally, in 1846, when the medical professors of Kemper College were transferred to the University of Missouri, he was elected to the same chair, which he continued to occupy with distinguished abilities until the time of his death, which occurred in June, 1849.

At a meeting of the medical faculty of the University of the State of Missouri, held on the evening of June 23, 1849, the following preamble and resolutions were unanimously adopted:

"THAT WHEREAS, It has pleased an all-wise Providence to remove by death from our faculty and from his active and distinguished career of usefulness Doctor Thomas Barbour, Professor of Obstetrics and Diseases of Women and Children in this institution; therefore,

"*Be it resolved*, That, as co-professors and friends of the humble dead, it gives us some consolation thus publicly to testify to his pure character, his high professional attainments, and his distinguished ability as a teacher, and that we mourn sincerely the afflicting dispensation which has deprived our institution of his talents and services, and the community of his usefulness.

"*Resolved*, That we desire to be permitted to mingle our sorrows with those of his bereft wife and family for the irreparable loss they have sustained in the death of one so highly and so justly esteemed; and that Professor Barret, as the organ of our faculty, address a letter of condolence to Mrs. Barbour, and request of her the loan of the portrait of her lamented husband that a copy may be taken and placed in the medical hall of the university.

"*Resolved*, That the foregoing preamble and resolutions be published in the city papers, and that a copy thereof be sent to the widow and mother of the deceased.

"JOHN S. MOORE, M.D.,

"*Dean Medical Faculty of the University of the State of Missouri.*"

Dr. Barbour was a man of high professional attainments, and especially skillful in the treatment of diseases of women and children.

Dr. Simon Pollak was born in Prague, Bohemia, April 14, 1816, and received his medical education in the universities of Prague and Vienna, graduating at the latter place in 1836. He then spent some months in visiting the hospitals of various European cities, after which he came to the United States and located in Nashville, Tenn., where he resided some years. He came to St. Louis in 1845, March 14th. About that time Dr. Clark resigned his position in the dispensary, and Dr. Pollak was appointed to that position.¹ This opened the way for him to a vast amount of unremunerative professional labor, and it was not until August 1st that he received any compensation for services rendered. His first professional fee was ten dollars, for attending a case of obstetrics. After that time he went on prosperously, and has been a very successful practitioner. In 1852 he secured the means through personal solicitation from the charitably-inclined citizens of St. Louis to establish the Missouri Institution for the Education of the Blind, which was supported for five years by such voluntary contributions, and then became a State institution. Dr. Pollak has been the attending physician to this institution ever since its establishment.

Having visited Europe in 1860, where he spent some months in the special study of ophthalmology, he returned to St. Louis, and in 1863 established the first eye and ear infirmary west of the Mississippi River. This institution is still maintained by Dr. Pollak, being held now at the Sisters' Hospital, in the western part of the city, as it had been for years at the same institution when located on Fourth Street. Over eighteen thousand cases have been recorded as treated in connection with this infirmary. Dr. Pollak was a member of the United States Sanitary Commission, and of the Western Sanitary Commission during the war, and also held the position of hospital inspector. He is a member of the American Medical Association, of the St. Louis Medical Society and Medico-Chirurgical Society, and has written many articles which have appeared from time to time in the columns of medical journals, especially those of the *St. Louis Medical and Surgical Journal*.

Dr. B. F. Edwards, who practiced for over half a century in Illinois and Missouri, was born at Darnestown, Md., July 2, 1797. In 1820 he removed from

¹ Dr. Pollak says that Dr. Clark was the only physician in St. Louis who drove in a buggy when he came to the city; all the others rode on horseback.

Kentucky to Old Franklin, in the Boone's Lick country, Mo., with Cyrus Edwards, his brother. There were living there Gen. Duff Green, the Gambles, and many other prominent Kentuckians. He then went back to Kentucky, and after a while removed to Edwardsville, Ill., where he settled, obtaining an extensive practice. His rides extended for forty miles, and so constant day and night were the calls for his services that he kept five horses as relays in responding expeditiously to the demands on his professional services. He next established himself for a short period in Alton, and in 1846 removed to St. Louis, where his reputation gave him at once an extensive practice. About the year 1850 he engaged in the California speculations, and shipped a lot of frame houses from St. Louis *via* the Horn to San Francisco, and erected them on the beach for sale to enterprising gold-seekers. He returned to St. Louis and resumed his practice until 1867, when he removed to Kirkwood, where he continued in practice till about two years before his death, which occurred April 27, 1877. Dr. Edwards was a man of robust virtues, an humble Christian, and a member of the Baptist Church.

Dr. E. S. Frazier was born in Todd County, Ky., in 1809. He was one of the first class which graduated from the Medical Department of Kemper College, the whole class numbering but three. He had practiced for some time before graduating in Salem, Ill. He then located in Liberty, near Peoria, and removed thence to Springfield. He married Miss Mary Moore, of Montgomery County, Tenn., a sister of Dr. John S. Moore, of St. Louis. Through the influence of his brother-in-law, he removed to St. Louis in 1847, being associated with Dr. George Johnson as resident physician of the Hotel for Invalids. This institution being abandoned after a few years, he entered general practice, and soon gained a large and lucrative business. He still continues to practice, though not so actively as in former years.

Dr. G. Fischer has been for a number of years one of the most prominent German physicians of St. Louis. He was born at Prague in 1812, and graduated at the university of that city in 1837. He practiced with eminent success in the city of his birth, but in 1848, having become involved in political difficulties, he found it necessary to leave that country, and determined to come to the United States, that he might rear his children in a free land. He has practiced medicine in St. Louis ever since that time, and has met with remarkable success, having won the respect and esteem of the profession and achieved popularity among the laity, two results by no means always attained by one man.

Among the great men whose name and fame must endure forever in the annals of surgery, that of John Thompson Hodgen will stand deservedly pre-eminent. He was born at Hodgenville, among the rugged hills of La Rue County, Ky., not far from the birthplace of Abraham Lincoln, on the 19th of January, 1826. His father, Jacob Hodgen, was an elder of the Christian Church. His mother, Frances Park Brown, was a woman of sterling worth, who contributed greatly to fashion the current of his infant thoughts, and to give them a healthy direction. He regarded her as the chief source of his aspirations for the good and noble, and his affection for her was deep, tender, and reverential. Her declining years were brightened by the lustre of his renown, and her dying moments soothed by his tender and matchless skill.

His early years were spent in the common schools of Pittsfield, Pike Co., Ill., and his collegiate course at Bethany College, West Virginia. In childhood he exhibited a fondness for medicine, and in his twentieth year he entered the Medical Department of the University of the State of Missouri, where, on the threshold of his career, his ambition, industry, and bright intellect marked him as a student of unusual promise.

He graduated in March, 1848; was assistant resident physician of the St. Louis City Hospital from April, 1848, to June, 1849, and was demonstrator of anatomy in his Alma Mater from 1849 to 1853. The energy with which he devoted himself to his profession secured him the chair of anatomy, beside Joseph Nash McDowell, which position he occupied from 1854 to 1858. From 1858 to 1864 he filled both the chairs of anatomy and physiology.

In 1864, the Missouri College building having been seized by the government and transformed into the Gratiot Street prison, and Dr. McDowell, its head, having gone South, Dr. Hodgen led a remnant of the shattered faculty in a noble effort to preserve the life of his Alma Mater. After earnest but ineffectual efforts he relinquished the task, and transferred his allegiance to the St. Louis Medical College, where he filled respectively the chairs of physiology and of anatomy with eminent ability. In 1875 he assumed the chair of surgical anatomy, of fractures and dislocations, and was created dean of the faculty, which position he held at the time of his death. During the eighteen years from 1864 to 1882 he taught clinical surgery at the City Hospital.

Meantime his valuable services were sought and employed by his country, then in the throes of civil strife, in the capacities of surgeon-general of the Western Sanitary Commission, 1861; surgeon United

UNIVERSITY OF ILLINOIS.

States volunteers, 1861 to 1864; and surgeon-general State of Missouri, 1862 to 1864. Upon the restoration of peace he relaxed neither resolution nor industry, and wherever honor, science, or philanthropy called, he was always in the van. He served as consulting surgeon of the City Hospital from 1862 to 1882, and was president of the St. Louis Board of Health from 1867 to 1868, and a member of that body until 1871. In this position he was instrumental in organizing on an efficient basis the charity hospitals and dispensaries of the city, and in laying the foundation of that sanitary improvement that has since revolutionized the mortuary record of St. Louis. He was president of the St. Louis Medical Society in 1872, was chairman of the surgical section of the American Medical Association in 1873, was president of the State Medical Association in 1876, and was president of the American Medical Association in 1880.

Fame and emoluments crowned his labors, but he never paused or halted in his efforts to improve himself as physician, surgeon, and scholar. For renown and wealth he cared but little; he never sought an honor, and his simple tastes, unselfish nature, and busy habits suggested little thought of money. The author of brilliant achievements, he never vaunted his deeds, while his blunders were always in his mouth. Devotion to duty was the mainspring of his life; his only boast that he had never refused to heed the call of the suffering, had never paused to consider the reward, and had never failed to do his best. Conservative, honest, earnest, original, and bold, he was eminently a man of action, appalled by no difficulty, and superior to any emergency in practice. Quick and clear in apprehension, terse and forcible in expression, and a master of the elementary branches of the medical science, he was a powerful debater, whom no sophistry confused, and one who never lost sight of controlling principles nor confounded ideas with facts. In debate with the most distinguished surgeons of all nations, convened in the International Medical Congress at Philadelphia in 1876, he won substantial honors, and made a record that stamped him as a great man in the midst of the greatest the civilized world could produce.

He possessed decided mechanical genius, but many inventions worthy of note have been lost to science owing to the fact that he neglected to record them. Among the most important of those recorded, some of which have attained a world-wide renown, are wire-splint for fracture of the thigh; suspension-cord and pulleys, permitting flexion, extension, and rotation in fracture of the leg; forceps-dilator for removal of

foreign bodies from the air-passages without tracheotomy, cradle-splint for treatment of compound fracture of the thigh, wire suspension-splint for injury of the arm, double action syringe and stomach-pump, hair-pin dilator for separating lips of the opening in the trachea, and as a guide to the trachea tube.

His chief contributions to medical literature were, Wiring the Clavicle and Acromion for Dislocation of the Scapular End of the Clavicle; Modification of Operation for Lacerated Perineum; Dislocation of both Hips; Two Deaths from Chloroform; Use of Atropia in Collapse of Cholera; Three Cases of Extra-Uterine Fecundation; Skin-Grafting; Nerve Section for Neuralgia and Induration of Penis; Report on Antiseptic Surgery; Shock, and Effects of Compressed Air, as observed in the building of the St. Louis and Illinois Bridge.

His literary, mechanical, and operative contributions made him known in Europe and America, and afford the guarantee that his name and memory will endure as long as medicine and surgery are taught.

He died in his fifty-seventh year, April 28, 1882, of acute peritonitis, caused by ulceration of the gall-bladder, and after a short and painful illness.

Remarkable for erudition and knowledge of the art he professed, untiring in study, an extensive and thorough reader, clearly digesting and appropriating ideas, he was noted for his solidity and sobriety of understanding, the legitimate fruit of industry and application. He loved his profession, and knelt at its shrine with the devotion of a priest. He was quick to cheer and help the meritorious and struggling young student and practitioner, and of a free and open nature. He was easy and familiar with the younger members of the profession, rejoiced in their emoluments, success, and honors, gave them their full meed of praise when merited, and never sought to monopolize the honors of his calling. Broad and liberal in his views, and original and independent in thought and action, he was the standard-bearer of progress in the medical profession. Possessed of a bold heart and a clear head, he yet had the keenest sympathy for suffering humanity. The poor, the halt, the lame, and the blind received his ministrations without price, and he made no distinction in his treatment between the rich and the poor.

In professional counsel and friendly intercourse he was the comfort and help of the young practitioner. No time was too inconvenient, no call too sudden, no patient too humble to claim immediate attention. Like the soldier on the eve of battle, he was ever ready to respond to the bugle-call, no matter when or where it sounded.

He knew every medical man in the city, and a large proportion of those in its vicinity and the adjoining States, not merely by name and reputation, but by the estimate he had formed of their personal and professional qualifications, and, remarkable for his knowledge of human nature, he was rarely deceived, save when sympathy swayed his judgment. His broad acquaintance, great personal influence, and unselfish alacrity to serve others made him, directly and indirectly, the almoner of many valuable professional places in the governmental and municipal service and in civil life. He always had a place for a deserving man, and a deserving man for a place. Numbers of medical men now prosperous and honored owe their first successes to his disinterested kindness. Under his apparently brusque manner and calm exterior his heart pulsed in sympathetic unison with the trials of all who came in contact with him. A man in the fullest and highest sense of the word, ever true to his convictions of right, loyal to his friends, tender in sickness and sorrow, wise and cultured from extensive and thoughtful reading, but much more so from direct and constant insight into the human frame in health and disease, the memory of John T. Hodgen will long be cherished as an enduring honor to St. Louis, the city of his adoption, and to the profession which he honored and ornamented, and to which he was a benefactor.

Dr. R. S. Holmes was born in Pittsburgh, Pa., Feb. 25, 1814. At the early age of thirteen he lost his father, but although deprived of parental guardianship at this important period, his education was not neglected. Having qualified himself he entered Jefferson College, at Cannonsburg, Pa., in which institution he was admitted to the degree of A.B. Sept. 30, 1835, just as he reached his majority. His preliminary education having been completed, he lost no time in commencing the study of his profession; and in October of the same year he went to Cincinnati and became the private pupil of Professor Gross, then connected with the Ohio Medical College, in which institution he attended his first course of medical lectures in the winter of 1835. After the close of the session, in the spring of 1836, he went to Philadelphia, and the following fall matriculated in the Jefferson Medical College, which was then just commencing its rivalry with the University of Pennsylvania. After remaining two winters in connection with this institution, he was admitted to the degree of Doctor of Medicine in the spring of 1838, his inaugural thesis being on the subject of chlorosis.

Immediately after graduating, in May, 1838, he went to Europe, where he spent a year in visiting the different capitals of the Old World, and in pursuing

his studies in their various hospitals. In May, 1839, he returned home, and shortly thereafter wrote an article describing the church of Ste. Genevieve, in Paris, which was published in the *Knickerbocker* for 1840, and which displayed both literary and critical ability of a high order. In May, 1841, having obtained permission from the Secretary of War to that effect, he presented himself before the board convened in Philadelphia for the purpose of examining applicants for the post of assistant surgeon in the United States army. Twenty-two candidates presented themselves, only fourteen of whom were admitted to an examination, and of this number six only were approved. Dr. Holmes ranked third. On the 22d of August of the same year he received his commission, and immediately thereafter was ordered to Carlisle Barracks, where he entered upon his duties as assistant surgeon of the army.

From Carlisle he went to St. Peter's, where, however, he only remained a short time, having been ordered to join the army in Florida during the existence of the Seminole war. At the close of this war he was retained in that department until 1844, when he was ordered to Fort Preble, in Maine, and remained at that post until the succeeding year, when he was again ordered with the First Regiment of artillery to Florida, and was stationed at Fort Pinckney, near Pensacola. During his several residences in Florida, as in fact at other points where he was stationed, he occupied his leisure time in investigating the geological character of the soil and in studying the climate and diseases of those regions. The results of these investigations he gave to the world through the medical periodicals of the country.

On the breaking out of the Mexican war he accompanied the army first into Texas and afterwards into Mexico. His stay here, however, was of but short duration, for on the 28th of June, 1847, while at Point Isabel, Texas, he resigned his commission as assistant surgeon in the army on account of the death of his mother, which rendered his presence at home necessary. His withdrawal from the army was regretted by all the officers with whom he had been associated, and by whom he was highly esteemed.

In the spring of 1848 he came to St. Louis and commenced the practice of his profession, and in the fall of the same year was chosen Professor of Physiology and Medical Jurisprudence in the St. Louis Medical College, then the Medical Department of the St. Louis University. His first course of lectures was delivered during the winter of 1848 and 1849, and although but little time was allowed him for preparation prior to entering upon the important duties of

his chair, he succeeded to the entire satisfaction of his colleagues and class, as is shown by the fact that at the close of the session a meeting of the students of the college was held, at which resolutions were adopted thanking him in the most complimentary terms for his able and instructive course of lectures on physiology, and expressing their high appreciation of his character as a man and his ability as a lecturer.

In the spring of 1849, prior to the breaking out of the cholera, he again sailed for Europe, where he spent the summer in professional pursuits and especially in the study of microscopy. While in London he procured one of Rosse's celebrated microscopes of high power, and on his return devoted himself with his accustomed zeal and industry to the study of microscopic anatomy, with special reference to its bearings on physiology and pathology, in which department he acquired considerable expertness.

During the subsequent four years Dr. Holmes continued to discharge the duties of his chair with marked ability and with great acceptance to those who attended on his instructions. But his career of usefulness was destined soon to be cut short. In the month of August, 1854, worn out by close application to study and by the extreme heat of the weather, he was suddenly seized, while walking on the street, with an attack of paralysis affecting the right side. After lingering for two years the powers of body and mind began to fail rapidly, and continued to do so until the 26th of June, 1856, when he died, in the forty-second year of his age. As a practitioner of medicine, Dr. Holmes was bold, original, and successful. While connected with the army in Florida he had an opportunity of observing the malignant fevers of that climate, and he was among the first to recommend and carry out the practice of administering large doses of quinine in this form of disease, a practice the success of which is now universally acknowledged.

As a medical writer he stood deservedly high. He was a frequent contributor to the pages of the *American Journal of Medical Sciences* and the *St. Louis Medical and Surgical Journal*, in which he published articles on the Climate and Diseases of Florida and Texas, on Quinine, Malaria, and a number of other subjects, all of which showed him to be a close and faithful observer of nature, a bold and original thinker, and a clear and logical reasoner. His report, too, on Epidemic Erysipelas, read before the American Medical Association at its meeting held in May, 1854, and published in the transactions for that year, exhibited marked ability, and attracted attention and called forth complimentary notices from critics at home and abroad.

But his talent as a writer was not displayed in his contributions on medical subjects alone. In the domain of general literature, also, he has left behind many valuable evidences of the fertility of his intellect and the variety of his attainments. While in Europe, as well as after his return, he wrote frequently for the leading literary journals of the country; among them may be mentioned the *Knickerbocker*, the *New York Literary New World*, the *New York Mirror*, the *United States Gazette* of Philadelphia, the *Philadelphia Inquirer*, the *North American* of Philadelphia, the *Pittsburgh Advertiser*, and the *St. Louis Republican*, all of whose pages were at different times adorned by his pen. Many of these contributions are worthy of special notice, particularly the following: "Beauty, a use of the Hair;" "Use of the Hair among the Ancients;" "The Birds of Florida;" "Sketches of American Character," etc.

Dr. Louis Ch. Boislinière was born Sept. 2, 1816, on the island of Guadeloupe, W. I., of one of the oldest families of the islands. His father was a wealthy sugar-planter, and appreciating the value of a thorough education, he took his son to France in 1825 in order that he might have every advantage attainable. Here thirteen years were spent in scientific, classical, and legal studies at the most celebrated institutions of the day. He took a diploma as licentiate-in-law at the University of France, and returned to Guadeloupe in 1839, after the death of both parents. After spending some months there, and subsequently making an extensive journey through South America, he determined to leave the West Indies entirely and locate permanently in the United States. In 1842 he landed in New Orleans, but went almost immediately to Lexington, where he received polite attention from Henry Clay's family, to whom he had brought letters of introduction. He spent some time in this place, acquainting himself with the language and customs of the country. He then went to Louisville and took charge of the classical institute there, and the school prospered under his direction.

In 1847 his attention was attracted by the advantages that seemed to be afforded to young men in St. Louis, and after due deliberation he removed here. He had continued in Kentucky his medical studies which he had commenced in France, and in 1848 he graduated in medicine in the Medical Department of the St. Louis University. He immediately entered into practice, and has remained here ever since. In 1853, Dr. Boislinière took part in establishing, under the auspices of the Sisters of Charity, the first lying-in hospital and foundling asylum founded in America, and he still keeps up his connection with it.

In 1858 he was elected coroner of St. Louis County, the first physician who held that office. He was re-elected to the position in 1860, but resigned in December, 1861. In 1865 he was elected a member of the Anthropological Society of Paris. In 1870 he was elected to the Professorship of Obstetrics and Diseases of Women and Children in the St. Louis Medical College. For a number of years he conducted a clinic for the diseases of women at the St. Louis (Sisters') Hospital, and now has a clinic at the St. Louis Medical College Dispensary. He was elected for two successive years president of the St. Louis Obstetrical and Gynecological Society. In 1879 he received the degree of LL.D. from the St. Louis University. He has written a number of medical and literary essays, which have appeared in various periodicals. In a ripe old age he retains the mental faculties and powers of his earlier manhood in full vigor, and is still busy as ever with the care of a large and burdensome practice.

Dr. F. Ernst Baumgarten was born Dec. 27, 1810, at Nordheim, kingdom of Hanover. He studied at Göttingen, and passed the State examination in surgery in 1831. He was appointed "mining surgeon," a government office, at Clausthal, the centre of the Harz Mountains mining districts. Later he went to the University of Jena, where he graduated in 1844. He edited a surgical journal, *Zeitschrift für Chirurgen von Chirurgen*, also an annual *Chirurgische Almanack*, and was permanent secretary of the Society of North German Surgeons. While still engaged in writing a text-book of surgery, of which only one part was published ("Lehrbuch d. primær-meehanischen Krankheiten." 8vo. Osterode, 1843), he was persuaded to emigrate to America in 1846. He practiced at Galveston until 1849, when he was induced, by repeated attacks of yellow fever, from which he suffered there, to seek a home farther North. He came to St. Louis in May, 1849, where he soon acquired a large practice, chiefly medical and obstetrical. He was one of the founders and for many years the secretary and librarian of the German Medical Society of St. Louis. He died Nov. 13, 1869, in consequence of injuries received by a fall from his buggy three days before.

Dr. Thomas O'Reilly was born in Virginia, County Cavan, Ireland, Feb. 11, 1827. He commenced the study of medicine in 1840, by apprenticeship to a druggist. He studied and attended lectures first at the Apothecaries' Hall, Dublin, and then at what was at that time called the Original School of Medicine, now the Ledwich School of Medicine. Next he served three years in the Meath Hospital as a

clinical clerk to the celebrated Dr. William Stokes. He graduated in London at the College of Surgeons in 1849, and came to this country and to St. Louis in the same year. Arriving here in the midst of the epidemic of cholera, he immediately gained a large practice, and has been a busy practitioner ever since.

Dr. Adam Hammer was born in the Grand Duchy of Baden, Germany, Dec. 27, 1818, and received a thorough preliminary and medical education in the leading German universities, taking a special interest in mathematical studies. He was most thoroughly informed in all the literature of the profession. It was his ambition to be known as a surgeon, and above all things he abominated the practice of midwifery. He was an admirable diagnostician, and twice diagnosed in the living subject an occlusion of the coronary artery of the heart, and the diagnosis was confirmed by post-mortem examination. He performed a number of successful plastic operations, and in two cases removed an entire upper extremity, including the scapula. He came to St. Louis in 1848. He was an enthusiastic teacher. He organized the Humboldt Medical College, and through his personal influence secured the means to erect the building for that institution, which still stands on the corner of Soulard and Closey Streets. The college was broken up during his absence in Europe, and on his return he was offered a professorship in the Missouri Medical College, which he accepted. After a few years he returned to Europe, and died there Aug. 4, 1878.

Dr. Edward Montgomery was born at Ballymena, near Belfast, Ireland, Dec. 20, 1816. He received his preliminary education in Belfast, and graduated in medicine at the University of Edinburgh in 1838. He practiced medicine for about four years in his native town, but removed to the United States in 1842, and after spending some years in the South, settled in St. Louis in 1849. Here he has continued in the practice of medicine ever since, and has enjoyed a very large and profitable practice. He has been an active member of various medical societies and associations, having been president and vice-president of the St. Louis Medical Society, and of the State Medical Association. He has contributed papers on a variety of medical subjects to the medical journals. During the last few years he has withdrawn to some extent from practice on account of failing health, but he still attends a good many of his old families, who prefer his advice to that of any of the younger practitioners.

Dr. Benjamin Franklin Shumard, who died on the 14th of April, 1869, was esteemed as a physician, having, during the last years of his life, filled the chair of obstetrics in the Missouri Medical College,

and was far famed throughout the scientific world as a geologist and palaeontologist. He was a corresponding or honorary member of many scientific associations in the United States and in Europe, and was honored and beloved at home as the president of the Academy of Science of St. Louis, an office to which he was re-elected at the beginning of the year, when his lingering illness had already taken away all hope that he would ever again personally preside over the meetings of that body.

Dr. Shumard was born at Lancaster, Pa., on the 24th of November, 1820. His father was a merchant, but he inherited his scientific tastes from his maternal grandfather, Mr. Getz, well known as an inventor, and who made delicate scales used in the Philadelphia Mint. His father afterwards moved to Cincinnati, and while living there, Dr. Shumard graduated at Oxford, Ohio, and returning to Philadelphia, he went through one course in the medical college of that city. His father then moved to Louisville, Ky., where young Shumard completed his medical studies in 1846. He then practiced for a short time in one of the interior towns of Kentucky, but subsequently removed to Louisville, where he devoted his leisure to the study of the fossils and shells in the adjacent county. He laid broad and deep, by arduous application, the foundations upon which his scientific reputation is built. His collection of organic remains was visited by Sir Charles Lyell and Edward De Verneuil when those distinguished *savans* were in Louisville, and the last named manifested his appreciation by the presentation of his magnificent work on the geology of Russia.

He was then appointed by Dr. David Dale Owen assistant geologist in the United States government survey of Iowa, Wisconsin, and Minnesota, for which he had been commissioned by the national government in 1846. He remained in that survey until the fall of 1856. The published reports of this important survey, in which Dr. Shumard took so prominent a part, will remain monuments of the industry, acquirements, and genius of their author. Besides his share in the publication of the reports, Dr. Shumard published a monograph, entitled "Contributions to the Geology of Kentucky," which abounded in original observations, and which made his name familiar to European geologists. This work is constantly referred to by home and foreign writers on the fossils of America.

In 1850, Dr. Shumard was appointed by Dr. John Evans to aid him in a geological reconnoissance of the Territory of Oregon, of which he prepared the palaeontological report. He spent eighteen months in

Oregon, and returned to Louisville in 1852, where he occupied nearly a year in making out the reports on palaeontology for his brother, Dr. George Getz Shumard, who was employed under Capt. R. B. Marcy in the Red River exploration. In 1853, Dr. Shumard came to St. Louis, and was appointed assistant geologist and palaeontologist of the Missouri Geological Survey, under Professor Swallow. He labored here until the summer of 1858, when he was appointed State geologist for Texas, and made a reconnoissance of almost the entire eastern and middle portions of that State, and had just got his specimens collected and arranged, when the war broke out, and he returned to St. Louis. In the survey of Texas, he found within the limits of that State the most complete series of geological formations to be found in any State in the Union, ranging as they do from the oldest palaeozoic strata to the latest tertiary, and presenting an aggregate thickness estimated at not less than ten thousand feet. He succeeded in rescuing his library from Austin at the end of the war, but never returned to prosecute the survey.

Dr. S. T. Newman was born in Mississippi Nov. 30, 1816. His preliminary education was obtained in Augusta College, Kentucky, and he graduated in medicine at the Transylvania University, Lexington, Ky., in 1839. He practiced medicine for five years at Amsterdam, Miss., and then removed to Richmond, Ky., where he lived until 1856, when he came to St. Louis. He identified himself at once with the St. Louis Medical Society, and in 1860 was elected president of that body.

Dr. T. L. Papin is a grandson of Laclède, who was the founder of St. Louis. He was born in St. Louis in January, 1825, and obtained his literary education here, and his medical education partly here and partly in Paris. He graduated from the Medical Department of the St. Louis University, and then went to Paris, where he pursued his studies some years longer. He has been a teacher of medicine all through his professional life. In 1852 he was Professor of Clinical Medicine in the St. Louis Hospital, and in 1873 was appointed Professor of Clinical Gynecology in the Missouri Medical College, which position he resigned last year.

He has been the attending physician at all the Catholic asylums of various sorts, and was the originator of St. John's Hospital. After that hospital was well established, he suggested to some of his friends who were connected with the Missouri Medical College that they buy the property adjacent to the hospital and erect a new college building. This was done, and Dr. Papin was chosen president of the

Missouri College Building Association. In order to raise the money necessary for the building, he and Dr. Moore mortgaged their own property. The success of the effort, and the remarkable prosperity of the college since its removal, have been mentioned elsewhere. Dr. Papin justly feels that he contributed very largely to the success of the school, not only by carrying out the Building Association plans, but by the hospital facilities which he provided and secured for them. He is not now connected with the college, and only retains his gynecological clinic at the hospital, which is probably the most largely attended of any in the city.

Dr. James C. Nidelet¹ is descended from some of the most noted pioneer families of Missouri. His grandfather, the well-known Gen. Bernard Pratte, was born in Ste. Genevieve, Mo., and was educated at the Sulsipitian College, Montreal (Canada); and returning to St. Louis, married Emilie I. Labadie, a native of the town, and daughter of Sylvester Labadie and Pélagie Chouteau. His father, Stephen F. Nidelet, of French extraction and a native of San Domingo, arrived in Philadelphia when but seven years old, and ultimately became a member of the prominent silk house of Chapman & Nidelet. While visiting St. Louis he met and married on Aug. 12, 1826, Celeste E., daughter of the Gen. Pratte above mentioned. He returned with his wife to Philadelphia, where, on the 15th of January, 1834, James C. Nidelet was born.

Young Nidelet acquired his early education in Philadelphia, at the classical school of John D. Bryant, a famous instructor in that city. In 1844 he was taken by his parents to St. Louis, where his father spent the rest of his life, dying in 1856, after having won the respect of a large circle of friends. His widow is yet living, a sprightly and well-preserved lady of seventy-three years. In her day she was one of the belles of St. Louis, and, despite the lapse of years, her recollections of pioneer times are very distinct and interesting.

James C. Nidelet attended the St. Louis University for a year or two, and in 1847 and 1848 St. Mary's College, Emmitsburg, Md. In 1849 he entered St. Louis University again, and spent five years there, but left in 1853 while on the point of graduating. He then prepared for the Military Academy at West Point, but failing to receive an appointment as cadet, applied himself to the study of medicine. His first tuition was obtained in the practical experience of a drug store, and for three years he was employed in the well-known houses of Bacon, Hyde & Co. and

Barnard, Adams & Co. He then attended the St. Louis Medical College, under Dr. C. A. Pope, and the Missouri Medical College, under Dr. Joseph N. McDowell. He graduated in 1860, and began the practice of medicine.

In December, 1861, he joined the Confederate army, and served as chief surgeon under Gens. Price, Maury, and Forney in the Army of East Tennessee and Mississippi. During the last year of the war he was transferred to the Trans-Mississippi Department. His service embraced four years of desperate and bloody warfare, and he was in every engagement in which his army corps participated. Among the most memorable of these conflicts may be mentioned those attending the capture of Vicksburg, and the sanguinary fields of Corinth, Big Black, Iuka, and the famous retreat from Hatchie. During all this period of exposure to the dangers and privations incident to the war, Dr. Nidelet was never wounded and never lost a day from sickness, his splendid constitution carrying him safely through trials to which weaker natures would have succumbed. He was always to be found where the danger was greatest, and where there was the greatest need of the prompt assistance of the surgeon. His composure amid the storms of shot and shell and the awful distractions of the battlefield was proverbial, and repeatedly won the commendation of his superiors.

Frequently, with the din of conflict raging about him, he performed operations that would have made many a hospital practitioner famous. His four years' service in the war gave him a practically unlimited experience in every branch of surgery, especially that appertaining to the treatment of gunshot-wounds, and in July, 1865, he returned to St. Louis rich in knowledge of the surgeon's art but extremely poor in purse. The "Drake Constitution," which was then in force, forbade him to practice medicine, because he could not take the oath, and at one time, while struggling against adverse fortune, he was on the point of leaving for the Pacific coast. During the winter of 1865-66, however, he formed an engagement with his old Alma Mater, the Missouri Medical College, and assisted in gathering the scattered faculty together once more. In the winter of 1866-67 the college was reopened, and as Professor of Anatomy he was for four or five years engaged in his favorite pursuit of teaching medicine. He had large classes, and contributed materially towards bringing the historic old institution into popular favor again. He then engaged in the private practice of medicine with distinguished success.

In 1875-76, Dr. Nidelet was appointed police commissioner, and for two of the four years of his term

UNIVERSITY OF ILLINOIS

was vice-president of the board. He signaled his administration by a determined effort to suppress the lottery business, which then flourished without let or hindrance in St. Louis, and such success crowned his labors that more than fifty dealers were convicted and fined. As a consequence he incurred the hostility of the "lottery ring," and charges of corruption were made against him. His indictment was sought at the hands of several successive grand juries, but he was accorded a most searching investigation, which resulted in the utter failure of his enemies to make even a plausible case of official misconduct against him.

The following estimate of Dr. Nidelet's standing as a physician and surgeon is furnished by a gentleman who has known him from a boy, was several years intimately associated with him, and is familiar with his professional career.

"Dr. Nidelet is a good physician in every sense of the word, being thoroughly and scientifically educated for his profession. His success has been as great as that of any practitioner of his years in St. Louis, and he has a very large and growing patronage. His judgment is accurate, and in the diagnosis of diseases and the selection of suitable remedies he is distinguished. I cannot say that he has any specialty, but he strikes me as being a fine specimen of the symmetrically-developed doctor. His professional standing is excellent, and he enjoys the respect of his associates in the profession as a high-toned and honorable man."

Dr. James M. Youngblood was born in Tennessee on the 16th of December, 1833. He was reared in Tennessee and Kentucky, and graduated at the St. Louis Medical College, receiving also the *ad eundem* degree from Dr. Joseph N. McDowell, of McDowell College.

On the breaking out of the civil war Dr. Youngblood was at heart and in feeling a Southern man, but was opposed to secession and in favor of upholding the government. Hence he sought a position in which he could do the most good on both sides. He accordingly joined the army as a surgeon, and in 1863 was placed in charge of Gratiot Street prison, and served in that capacity till 1864. In that year he was sent South with Col. Thomas C. Fletcher's regiment, the Forty-seventh Missouri, and arrived just after the battle of Nashville. Dr. Youngblood was a man of benevolent disposition and charitable to the poor. When his death, which occurred Jan. 24, 1879, became known in the neighborhood, many poor children and their parents called at the office of their benefactor, manifesting regret for the loss of a dear friend.

He married a daughter of Edward J. Xaupi, who survived him, together with five children. A few months before his death he was chosen a member of the School Board.

On April 1, 1881, Dr. A. B. Nichols died at his home in Sparta, Wis. Dr. Nichols was well known in St. Louis, where he had many friends. He was born in Northfield, Vt., in 1842. After traveling about the country for some time he settled at Racine, Wis., where he studied and made wonderful progress in medicine. In 1862 he entered the army as an aid to an assistant hospital surgeon. He attended to hospital duties for about two years. Dr. Nichols was present at the battle of Pittsburgh Landing, and his skillful treatment, during and after the battle, of wounded soldiers gained him favor with the surgeon-general and many other high officers. In 1864 he removed to Sparta and settled there, following his profession until his death. Dr. Nichols left a wife and one child, a son.

That the complaint of over-crowding in the medical profession is no new thing is apparent from the following paragraphs, which appeared editorially in the *Missouri Medical and Surgical Journal* of August, 1845:

"We have a list of the names of one hundred and forty-six persons who are endeavoring to obtain a livelihood by the practice of the healing art in this city, which includes the homœopaths, Botanics, Thompsonians, etc. Of this number probably ninety or one hundred hold diplomas. With a population of forty thousand, each would have two hundred and seventy-four persons to attend upon, supposing the whole number to be equally divided; but when we consider the fact that about one-third of the number have a large practice, we are not surprised that a large number are not able to collect enough to pay their expenses, and the consequence is that many, after spending 'from one to three years and the means which they brought to the city,' leave and settle in the smaller towns in the surrounding country. Some, who are favored by circumstances, hold on, hoping that with the rapid growth of the city they will finally obtain a lucrative practice; others, determined to be employed, resort to whatever will obtain their ends, regardless of proper respect for themselves or their profession, by giving their professional services for little or nothing and a constant endeavor to build themselves up by injuring the professional reputation of their colleagues. Real merit never goes long unrequited, and it is an acknowledgment of weakness for any one to slander the whole profession because forsooth he has not sufficient merit to retain a lucrative practice.

"While the facilities for obtaining a medical education in St. Louis are not surpassed by those of any city in the West, and the city in its rapid strides to greatness has anything but a sickly appearance, it cannot rationally be supposed that its inhabitants are bound to sustain all the ambitious of the profession who prefer to practice in the West; nevertheless they are always glad to rent them offices."

Medical Societies.—There are a number of medical societies in St. Louis, which will be noticed in the order in which they were organized. Those of

the regular school of medicine are the St. Louis Medical Society, the German Medical Society, the St. Louis Medico-Chirurgical Society, the St. Louis Obstetrical and Gynecological Society, the Beaumont Medical Club, and the Scientific Association of German Physicians.

ST. LOUIS MEDICAL SOCIETY.—In 1836 a medical society was organized, which was incorporated by a special act of the Legislature Jan. 25, 1837, under the name of the Medical Society of the State of Missouri. For some years its meetings were held monthly from May to November and semi-monthly from November to May, but after 1846 it virtually suspended. In 1850 a new organization was formed, which, under the name of the St. Louis Medical Society, has done a good deal of valuable work and wielded a large influence. Its first officers were B. G. Farrar, M.D., president; Hardage Lane, M.D., vice-president; B. B. Brown, M.D., recording secretary; J. B. Johnson, M.D., corresponding secretary; Y. D. Bolling, M.D., treasurer. The presidents since its first organization to the present time have been the following: B. G. Farrar, M.D., in the years 1836 and 1837; Hardage Lane, M.D., in 1838, '39, '43; Meredith Martin, M.D., in 1840, '42, '45, '65; William Beaumont, M.D., 1841; Stephen W. Adreon, M.D., 1844; Josephus W. Hall, M.D., 1846; R. P. Simmons, M.D., 1850; David Prince, M.D., 1851; George Engelmann, M.D., 1852; John Barnes, M.D., 1853; Thomas Reyburn, M.D., 1854, '57; John S. Moore, M.D., 1855; William M. McPheeters, M.D., 1856; E. H. McGintie, M.D., 1858; M. L. Lenton, M.D., 1859; S. T. Newman, M.D., 1860; M. M. Pallen, M.D., 1861; J. S. B. Alleyne, M.D., 1864; William Johnston, M.D., 1866; A. Hammer, M.D., 1867; Edward Montgomery, M.D., 1868; John H. Walters, M.D., 1869; John T. Hodgen, M.D., 1870; E. H. Gregory, M.D., 1871; E. F. Smith, M.D., 1872; Francis G. Porter, M.D., 1873; G. Hunt, M.D., 1874; J. M. Scott, M.D., 1875; G. M. B. Maughs, M.D., 1876; T. F. Prewitt, M.D., 1877; Thomas Kennard, M.D., 1878; L. Ch. Boislinière, M.D., 1879; H. H. Mudd, M.D., 1881; William Dickinson, M.D., 1882; and William L. Barret, M.D., 1883.

It is a somewhat remarkable fact that two of the greatest men in the profession that the medical society has numbered among its members never occupied the president's chair, viz.: Dr. Joseph N. McDowell and Dr. Charles A. Pope, the former being a skilled surgeon and the founder and for thirty years the dean of the first medical college established west of the Mississippi River, the latter a most skillful and

expert surgeon and for nearly thirty years Professor of Surgery in the St. Louis Medical College.

The St. Louis Medical Society, like all such organizations, has had its times of special interest and profit and its periods of depression and little value. At times its meetings have been fully attended, papers of interest and scientific value have been presented, and discussions have taken place which attracted the attention of physicians throughout this section of country. At other times its halls have been the scene of heated and bitter wrangling, mutual recrimination, charges and counter-charges of professional discourtesy or of unprofessional conduct. On one or two occasions the bitter animosities and differences of opinion growing out of personal antagonism between members have nearly wrecked the society; but the faithful work of some loyal members has kept it alive, and it still continues to be a valuable and profitable organization. Its meetings have been regularly held on Saturday evening of every week.

For a number of years in the early history of the *St. Louis Medical and Surgical Journal*, abstract reports of the meetings of the Medical Society were published in that journal. For several years now full reports, taken by a short-hand reporter and revised by a committee on publication, have formed a considerable and valuable part of the *Journal's* contents. The meetings of the society were held in 1835 in Masonic Hall, in 1850 at Westminster Church, afterwards in a hall at the corner of Fourth and Chestnut Streets, then in the commercial school, then for a time in the office of Drs. Jordan and Shumard. When the Academy of Science had its building at Seventh and Myrtle Streets, adjoining the St. Louis Medical College, the building erected by Col. O'Fallon, the Medical Society held its sessions in the Academy Hall. After the burning of that building, arrangements were soon made by which the society meetings have been held at the Polytechnic Building, at Seventh and Chestnut Streets, in a room well adapted for the purpose. One valuable feature of the society is the arrangement made some years ago with the Public School Library, by which the society turns over to the library the membership fees of three dollars per annum for four years, thus securing to the members not only the usual privileges of membership during that time, but also a life-membership ticket after that time, the library agreeing to expend all money so received for medical publications under the direction of the library committee of the Medical Society.

Any reputable regular practitioner resident in the city of St. Louis is eligible for membership in this society. Application for membership may be made

in writing by the party seeking admission, or verbally by some member. The application is referred to the committee on elections, to whom must be exhibited the diploma of the applicant. A favorable report of this committee is equivalent to an election, although formally a favorable vote of three-fourths of the members present is necessary in order to constitute an applicant a member. An admission fee of five dollars is required, and a payment of dues to the amount of three dollars each year thereafter. The present membership of the society is not far from one hundred and seventy-five.

The officers of the society for 1883 are: President, William L. Barret, M.D.; Vice-President, G. F. Dudley, M.D.; Recording Secretary, A. H. Ohmann-Dumesnil, M.D.; Corresponding Secretary, Garland Hurt, M.D.; Treasurer, W. E. Fischel, M.D.

THE GERMAN MEDICAL SOCIETY ("Deutsche Medicinische Gesellschaft") was organized in 1850. The society subscribes to the leading European medical journals, and these circulate among the members according to a definite plan. The membership is limited to twenty-five. The society has accumulated a large library. The present officers are Dr. G. Baumgarten, president; Dr. Hugo Kinner, secretary; Dr. W. E. Fischel, treasurer; Dr. George J. Engelmann, librarian.

THE ST. LOUIS MEDICO-CHIRURGICAL SOCIETY was first organized in 1873 under the name of the Medical Club, as a result of a state of affairs in the St. Louis Medical Society, which had led a considerable number of members to cease attending its sessions. There is no permanent presiding officer of this society, some member being chosen at each meeting to preside on that occasion. The secretary, treasurer, and librarian each serve one year. The present officers are George Homan, M.D., secretary; J. P. Kingsley, M.D., treasurer; W. A. Hardaway, M.D., librarian.

When first organized the club met in a hall at Twelfth and Pine Streets, then for several years in the directors' room of the Mercantile Library Association. Later, when an arrangement was made to subscribe regularly for the most valuable European journals, the meetings were held stately at the office of the librarian; but as the membership of the society increased and the value of the journal list became more apparent, it was deemed best to secure permanent quarters for the meetings of the society and for a reading-room. Accordingly, a convenient hall was secured in a most desirable location on Washington Avenue near Jefferson Avenue. This has been fitted up with comfortable chairs, cases for

books and periodicals, tables for reading and writing, etc. Already the nucleus of a valuable library has been collected through gifts of members and by an arrangement with the Medical Journal and Library Association, by which the exchanges of the *Courier of Medicine* and the books received by that journal for review are deposited in this room, and are at the disposal of its members.

The following is an alphabetical list of the members of this society: G. Baumgarten, L. Ch. Boislinière, J. K. Bauduy, John P. Bryson, C. E. Briggs, N. B. Carson, C. O. Curtman, D. V. Dean, J. O'F. Delaney, George Engelmann, George J. Engelmann, W. E. Fischel, W. H. Ford, W. A. Frazier, R. M. Funkhouser, E. H. Gregory, E. C. Gehrung, D. C. Gamble, W. C. Glasgow, A. A. Henske, B. M. Hypes, T. E. Holland, W. A. Hardaway, George Homan, J. B. Johnson, E. W. Jamison, W. C. Kennett, J. P. Kingsley, A. P. Lankford, James M. Leete, E. S. Lemoine, I. N. Love, E. Montgomery, J. M. B. Maughs, C. E. Michel, S. G. Moses, G. A. Moses, H. H. Mudd, M. P. Morrell, E. M. Nelson, R. J. O'Reilly, T. F. Prewitt, T. L. Papin, S. Pollak, M. H. Post, P. G. Robinson, E. W. Saunders, P. V. Schenck, James M. Scott, A. B. Shaw, H. N. Spencer, I. G. W. Steedman, A. J. Steele, F. L. Stuever, H. Tuholske, C. A. Todd, O. A. Wall, B. T. Whitmore.

Applicants for membership must be recommended by two members. The name is referred to the executive committee, and posted for two weeks in the hall of the society. If the executive committee report favorably upon the application the name comes before the society, all the members having been notified by postal card of the election. Two adverse ballots exclude an applicant from membership. No physician is eligible for membership in this society until after having practiced medicine in the city for a period of at least two years. The admission fee is ten dollars, and the annual dues are the same amount. The meetings of the society are held on alternate Tuesday evenings throughout the year, and the discussions are regularly reported in the *St. Louis Courier of Medicine*. A paper is read at each meeting by some member of the society, the order of reading being determined by lot.

THE ST. LOUIS OBSTETRICAL AND GYNECOLOGICAL SOCIETY was organized in 1877. Meetings are held on the third Thursday evening of each month, except July and August. Papers are read by the members in turn, and discussions follow upon the paper or verbal reports of cases. The discussions are taken down by a short-hand reporter, and are pub-

lished in the *St. Louis Courier of Medicine*, and have been generally regarded as of very considerable interest and value. The meetings are held at the houses of the different members, and one fact that has had a pronounced influence in sustaining the interest and attendance upon the meetings has been the custom of adding a social to a scientific interest by the serving of a supper to the members after the regular business meeting has been concluded.

The officers of the society for the current year are T. L. Papin, M.D., president; W. H. Ford, M.D., vice-president; Walter Coles, M.D., recording secretary; M. Yarnall, M.D., corresponding secretary; T. F. Prewitt, M.D., treasurer.

The following list embraces the present membership of the society: W. L. Barret, L. Ch. Boislinière, W. Coles, George J. Engelmann, W. H. Ford, E. C. Gehlung, E. H. Gregory, G. M. B. Maughs, E. Montgomery, S. G. Moses, G. A. Moses, William McPheeters, T. L. Papin, T. F. Prewitt, and M. Yarnall. Drs. George Engelmann and Adolph Wislizenus are honorary members.

THE BEAUMONT MEDICAL CLUB was organized in April, 1879, by a number of the younger men of the profession, for the purpose of medical discussion and social intercourse. The meetings were held monthly for a couple of years, but have been discontinued of late. The first officers were I. N. Levi, M.D., president; W. H. Frazier, M.D., secretary; and George Homan, M.D., treasurer. The officers last elected were George Homan, M.D., president; E. M. Nelson, M.D., secretary; J. R. Lemen, M.D., treasurer.

THE SCIENTIFIC ASSOCIATION OF GERMAN PHYSICIANS ("Wissenschaftliche Verein Deutsche Aerzte") was organized in the fall of 1881. The society meets every other Friday, and at each meeting an essay is read, followed by discussion, pathological specimens are shown, cases presented, and the usual business routine gone through with. Every member is compelled to read an essay when his name is called in the alphabetical order. The society has commenced the formation of a library, for which there is already a respectable nucleus. The present membership numbers twenty-one. There is no permanent president, the presiding officer being selected at each meeting. The secretary is Dr. George Richter; Treasurer, Dr. Joseph Sprigelhalter; Librarian, Dr. A. Alt.

Medical Schools.—The history of medical education in St. Louis is an interesting chapter in the history of the profession.

MISSOURI MEDICAL COLLEGE.—In 1840, when Joseph Nash McDowell came to St. Louis from Cincinnati, there was a literary institution west of the

city, where the old county farm lies just east of the insane asylum. Some of the original stone buildings of the college are still standing. This institution was incorporated with a university charter under the name of "Kemper College." It was established under the auspices of the Episcopal Church, and President Hutchinson was then at its head. Dr. McDowell set to work with enthusiasm, and organized a faculty of medicine to work under the charter of this institution and to be known as the Medical Department of Kemper College. The first course of lectures was delivered in the winter of 1840-41 by the following faculty: Joseph Nash McDowell, Professor of Anatomy and Surgery; John S. Moore, Professor of Obstetrics and Diseases of Women and Children; Josephus W. Hall, Professor of Theory and Practice of Medicine; John De Wolf, Professor of Chemistry; Hiram L. Prout, Professor of Materia Medica and Therapeutics.

These lectures were delivered in a building erected for the purpose on the high bank of Chouteau's Pond, at the corner of Ninth and Cerré Streets, where the Wainwright brewery now stands.

In 1847, Kemper College having failed, owing to the lack of financial backing, the Medical Department became the Medical Department of the State University, and was so conducted until the general organization of the State University, when a separate charter was procured, under which the college is now conducted as the Medical Department of the Missouri Institute of Science, more commonly known, however, as the Missouri Medical College.

The stone octagonal building on the corner of Eighth and Gratiot Streets was erected for the use of the college, and was occupied by it until the war, when it was confiscated by the United States government and used as a military prison. After the close of the war, when the faculty was reorganized, lectures were again delivered in the same building for three or four years. In 1874 a joint-stock company was formed for the purpose of erecting a new college building. The capital stock of this company amounted to fifty thousand dollars, most of which was taken by members of the faculty. The present site was purchased, and an excellent building erected at the north-east corner of Lucas Avenue and Twenty-third Street, at a cost of twenty-five thousand dollars. During the last year the building has been improved and enlarged at an expense of fifteen thousand dollars.

The college is now in a most flourishing condition, with classes numbering between two hundred and three hundred each year. The faculty, as constituted at present, is as follows:

William M. McPheeters, M.D., Emeritus Professor of *Materia Medica* and Therapeutics; John S. Moore, M.D., Professor of Principles of Medicine and Hygiene; G. M. B. Maughs, M.D., Professor of Obstetrics and Diseases of Women; P. Gervais Robinson, M.D., Professor of Practice of Medicine and Clinical Medicine; J. K. Bauduy, M.D., LL.D., Professor of Psychological Medicine, Diseases of Nervous System and Clinical Medicine; Charles E. Michel, M.D., Professor of Histology and Ophthalmology; H. Tuholske, M.D., Professor of Clinical Surgery and Surgical Pathology; Otto A. Wall, M.D., Ph.G., Professor of *Materia Medica*, Therapeutics, and Pharmacy; C. A. Todd, M.D., Professor of Anatomy and Diseases of the Ear and Throat; J. P. Kingsley, M.D., Professor of Physiology and Clinical Professor of Diseases of Children; T. F. Prewitt, M.D., Dean, Professor of Principles and Practice of Surgery and Clinical Surgery; C. O. Curtman, M.D., Professor of Chemistry; P. V. Schenck, M.D., Clinical Teacher of Gynecology; C. A. Todd, M.D., Demonstrator of Anatomy and Curator of Museum; Justin Steer, M.D., Assistant Demonstrator; Adjuncts: A. B. Shaw, M.D., Adjunct to Professor of Clinical Medicine and Lecturer on Physical Diagnosis; F. Stuever, M.D., Adjunct to Professor of Ophthalmology; J. R. Lemen, M.D., Clinical Assistant to Chair of Surgery.

Hotel for Invalids.—In the summer of 1848 the upper stories of the large house situated on the corner of Second and Walnut Streets, previously known as the Paul House, were fitted up as a "hotel for invalids," which was conducted under the supervision of Drs. W. L. Barret and John S. Moore, of Missouri Medical College, as consulting physicians, and Drs. Frazier and Johnson, as resident physicians and surgeons.

Post-Graduate School of the Missouri Medical College.—The object of this school is to give practitioners of medicine and recent graduates facilities and advantages for special studies and practical instruction such as cannot be afforded in the ordinary courses of lectures. The faculty of the Post-Graduate School is constituted as follows:

Professor P. Gervais Robinson, M.D., Dean of the Faculty, Physical Diagnosis; Professor John S. Moore, M.D., Malarial Diseases; Professor A. B. Shaw, M.D., Clinical Medicine; Professor A. P. Lankford, M.D., Surgery; Professor H. Tuholske, M.D., Diseases of the Genito-Urinary Organs; Professor T. F. Prewitt, M.D., Surgery; Professor T. L. Papin, M.D., LL.D., Diseases of Women; Professor George J. Engelmann, M.D., Secretary of the Faculty, Operative Midwifery; Professor J. P. Kingsley, M.D., Diseases of Children; Professor Charles E. Michel, M.D., Diseases of the Eye; Professor H. N. Spencer, M.D., Diseases of the Ear; Professor W. A. Hardaway, M.D., Diseases of the Skin; Professor O. A. Wall, M.D., Ph.G., Urinology.

The school was organized in 1880 under the charter of the Missouri Medical College, and its classes are held in the building of that college.

ST. LOUIS MEDICAL COLLEGE.—In 1836, after frequent consultations between the trustees of the St. Louis University on the one hand and the St. Louis Medical Society on the other, an agreement was entered

into for the appointment of a medical faculty in connection with the university. A constitution was prepared and ratified by both parties, and the Medical Society selected as the first faculty Drs. C. J. Carpenter, J. Johnson, William Beaumont, E. H. McCabe, H. Lane, and H. King. A prospectus of the medical lectures was published annually with that of the literary department of the university, but the medical department was not actually put into operation until the fall of 1842. In the mean time (in 1841) the St. Louis Medical College had been organized, and in 1842 it was chartered as the Medical Department of the St. Louis University. In 1855 it became independent, and was incorporated under its present name, incorporators being John O'Fallon, James H. Lucas, Luther M. Kennett, James Clemens, A. L. Mills, Trusten Polk, G. Penn, W. G. Elliot, James E. Yeatman, J. Laughton, Thomas Allen, and H. D. Bacon.

It was originally located on Washington Avenue facing Tenth Street, where the building still stands, on the grounds of the St. Louis University. The present building is located on the northeast corner of Seventh and Myrtle Streets. It is a large, well-constructed, and substantial building, which was erected for the use of the college in 1850 by the late Col. John O'Fallon. The whole building was remodeled and renovated some three years ago, and an addition built at the rear for the chemical laboratory. There are three lecture-rooms and two dissecting-rooms and a library, besides the museum and smaller rooms set apart for the faculty and other uses.

Last year a building was erected upon the adjoining lot especially for dispensary purposes. On the first floor are a drug-room, waiting-rooms for male and female patients, consultation-room, and amphitheatre for clinical lectures. On the second floor are the rooms for the gynecological clinic of Professor Boislinière, and those for the dental college, laboratory, and operating-room. Several thousand patients have been treated in the year and a half since the dispensary was organized.

The faculty own the buildings, and supply the necessary appliances for teaching and illustration from the income derived from tuition fees. There is no endowment. The course of study in this school is a graded one, extending over three years, the first being devoted to theoretical and demonstrative branches, and the practical subjects and specialties being taken up in the second and third years.

The first dean of the faculty was James V. Prather, M.D., the second was Charles A. Pope, M.D., the third John T. Hodgen, M.D., and the fourth and

present dean is J. S. B. Alleyne, M.D. The faculty is composed of the following physicians and surgeons :

A. Litton, M.D., Professor of Chemistry and Pharmacy; J. B. Johnson, M.D., Professor of the Principles and Practice of Medicine; E. H. Gregory, M.D., Professor of the Principles and Practice of Surgery and Clinical Surgery; J. T. Hodgen, M.D.,¹ Professor of Surgical Anatomy, Special Fractures and Dislocations, and Clinical Surgery at the City Hospital; J. S. B. Alleyne, M.D., Dean, Professor of Therapeutics and Materia Medica and Diseases of Children; E. F. Smith, M.D., Professor of Clinical Medicine and Pathological Anatomy; L. Ch. Boislinière, M.D., Professor of Obstetrics; G. Baumgarten, M.D., Professor of Physiology; H. H. Mudd, M.D., Professor of Anatomy and Clinical Surgery at the City Hospital; H. H. Mudd, M.D., Demonstrator of Anatomy; John Green, M.D., Lecturer on Ophthalmology; W. L. Barret, M.D., Lecturer on Diseases of Women; J. M. Scott, M.D., Lecturer on Clinical Medicine; G. A. Moses, M.D., Lecturer on Clinical Gynecology; N. B. Carson, M.D., Assistant to the Chair of Surgery; W. C. Glasgow, M.D., Clinical Lecturer on Physical Diagnosis; W. E. Fischel, M.D., Lecturer on Therapeutics; J. Friedman, M.D., Demonstrator on Chemistry; Edward Evers, M.D., Lecturer on Histology; R. Luedeking, M.D., Lecturer on Pathological Anatomy; J. P. Bryson, M.D., Lecturer on Diseases of the Genito-Urinary Organs; W. A. McCandless, M.D., Frank R. Fry, M.D., Assistant Demonstrators of Anatomy.

HUMBOLDT INSTITUT ODER DEUTSCHE.—This institution was organized as a German medical college in 1859. Lectures were delivered regularly, and two classes were graduated. It was discontinued during the war, and in 1866 was reorganized as the Humboldt Medical College. The faculty included the following: Dr. F. J. Bernays, Professor of Chemistry and Pharmacy; Dr. G. Bernays, Professor of Materia Medica and Midwifery; Dr. D. Goebel, Professor of Physics and Higher Mathematics; Dr. A. Hammer, Professor of Anatomy, Surgery, and Diseases of the Eye; Dr. F. M. Hauck, Professor of Physiology; Dr. T. C. Hilgard, Professor of Botany, Zoology, and Comparative Anatomy; Dr. C. Roesch, Professor of General and Special Pathology and Therapeutics and Clinical Medicine; Dr. E. Schmidt, Professor of Pathological Anatomy, gerichtlichen Medicine, and Psychiatry.

The first course of lectures was given during the winter of 1866-67. The organization of the college was effected with a view to promoting a higher standard of medical education. In their prospectus the faculty announced the purpose of having a longer term than that of any other medical college in the country, of arranging a graded course, and of affording facilities for instruction in the different specialties.

The faculty at that time consisted of the following gentlemen: D. Goebel, Ph.D., Professor of Natural

Philosophy; A. Wadgymer, M.D., Professor of Chemistry and Botany; H. S. Leffingwell, M.D., Professor of General and Descriptive Anatomy; D. V. Dean, M.D., Professor of Physiology, Histology, and Toxicology; G. M. B. Maughs, M.D., Professor of Obstetrics and Diseases of Women and Children, and Acting Professor of Materia Medica and Therapeutics; I. P. Vaughan, M.D., Professor of Theory and Practice of Medicine; A. Hammer, M.D., Professor of Principles and Practice of Surgery, Ophthalmology, and Clinical Surgery, and Acting Professor of Pathological Anatomy; Hon. James J. Lindley, Professor of Legal Medicine; A. J. Steele, M.D., Professor and Demonstrator of Anatomy; Charles Heyer, Assistant to Chair of Pathology, Anatomy, and Curator of Museum; P. J. Lingensfelder, Assistant to Chair of Clinical Medicine.

The building of the Humboldt College stood and still stands on the lot directly fronting the City Hospital, extending from Linn to Closey Street, upon the south side of Soulard Street. It was an admirable location, and the building was convenient and well arranged for the purpose.

Lectures were delivered for three successive winters, but after the close of the session of 1868-69 most of the members of the faculty resigned, and the college was given up.

ST. LOUIS COLLEGE OF PHYSICIANS AND SURGEONS.—After the abandonment of the Humboldt Medical College in 1869, an organization was effected under the name of the College of Physicians and Surgeons, under the leadership of Professor Louis Bauer, who had then recently come to St. Louis from Brooklyn. The faculty consisted of

Louis Bauer, M.D., M.R.C.S., Professor of Surgery; Montrose A. Pallen, M.D., Professor of Gynecology; Augustus F. Barnes, M.D., Professor of Obstetrics; T. F. Prewitt, M.D., Professor of Surgical Anatomy and Diseases of the Skin; J. K. Bauduy, M.D., Professor of Diseases of the Mind and Nervous System; John Green, M.D., Professor of Ophthalmology; G. Baumgarten, M.D., Professor of General Pathology and Pathological Anatomy; I. G. W. Steedman, M.D., Professor of Clinical Surgery and Diseases of the Genito-Urinary Organs; W. B. Outten, M.D., Professor of Descriptive Anatomy; A. J. Steele, M.D., Professor of Military and Minor Surgery, Fractures and Dislocations; F. H. McArdle, M.D., Professor of Chemistry; J. M. Leete, M.D., Professor of Physical Diagnosis and Diseases of the Chest; J. M. Scott, M.D., Professor of Practice of Medicine; Charles E. Briggs, M.D., Professor of Physiology; William L. Barret, M.D., Professor of Diseases of Children; James F. Johnson, M.D., Professor of Materia Medica and Toxicology; William T. Mason, LL.B., Professor of Medical Jurisprudence; A. G. Jackes, M.D., Demonstrator of Anatomy, and Curator of the Museum.

The second year Dr. Barret withdrew from the faculty. Dr. Briggs took the Professorship of Dis-

¹ Deceased.

eases of Children, and LeGrand Atwood, M.D., became Professor of Physiology. In the course of this second year dissensions sprang up between members of the faculty, and the scheme was abandoned at the close of the year. The building in which the two years' lectures were delivered stands on Locust Street, between Tenth and Eleventh Streets.

It is believed that the first endeavor in the way of a "practitioners' course," with reference to which so much has been said and done within the last few years, was made in connection with the College of Physicians and Surgeons. Special courses of lectures were delivered on Monday, Wednesday, and Friday evenings at eight o'clock, commencing Monday, Nov. 1, 1869; gynecology, Mondays, by Professor Pallen; ophthalmology, Wednesdays, by Professor Green; orthopedic surgery, Fridays, by Professor Bauer. Physicians and advanced students of medicine were cordially invited to attend.

The present St. Louis College of Physicians and Surgeons¹ was incorporated in 1879 by James O. Broadhead, William Hyde, Louis Bauer, M.D., Isaac Cook, Gustav Woltman, Charles P. Warner, L. M. Rumsey, A. A. Millier, Ellis Wainwright, and A. S. Barnes, M.D., and a faculty was chosen. A building was procured on the southwest corner of North Market and Eleventh Streets, which had been previously used for similar purposes. This was fitted up conveniently, a dispensary was organized, and material was thus secured for illustration by clinical lectures. The regular work of the college was commenced in the autumn of 1879, a class of five members being graduated in the spring of 1880. Each succeeding class has increased in numbers.

This college demands of its students a certain amount of knowledge and mental training as preliminary to admission, and requires a three years' graded course of study.

The present faculty is composed of

Louis Bauer, M.D., M.R.C.S., Eng., Dean; William B. Hazard, M.D., Secretary and Registrar. General Departments: Louis Bauer, M.D., M.R.C.S., Eng., Professor of Principles and Practice of Surgery and Clinical Surgery; Algernon S. Barnes, M.D., Professor of Obstetrics and Diseases of Women; Robert M. King, A.M., M.D., Professor of Physiology, Histology, and Clinical Medicine; William G. Moore, M.D., Professor of Materia Medica, Therapeutics, and Clinical Medicine; G. Wiley Broome, M.D., Professor of Anatomy; George W. Hall, M.D., Professor of Practice of Medicine and Clinical Professor of Infantile Diseases; Frank L. James, M.D., Professor of Chemistry and Toxicology. Special Departments: William B. Hazard, M.D., Professor of General Pathology and of Nervous and Mental

Diseases; L. H. Laidley, M.D., Professor of the Theory and Practice of Gynecology; R. A. Vaughan, M.D., Professor of Diseases of Children, with Clinic; Joseph G. Lodge, Esq., Professor of Medical Jurisprudence; John T. Larew, M.D., Professor of Minor Surgery; A. D. Williams, M.D., Professor of Ophthalmology and Otology; Edward F. Raband, M.D., Lecturer on Pharmacy; G. Wiley Broome, M.D., Demonstrator of Anatomy.

THE ST. LOUIS SCHOOL OF MIDWIVES was founded in 1854 as Mrs. Carpentier's School of Midwives, and graduated one class after a four months' term of instruction each fall. It was incorporated and placed under its present director, Dr. George J. Engelmann, in 1874, with an English and German class. Dr. W. E. Fischel was the instructor of the English class. This was given up after three years' trial, as there seemed to be no demand for instruction by English-speaking women, and now only the German class is held. Two courses are given annually, one continuing from March 1st to June 12th, the other from September 1st to December 18th. The names of the incorporators were Dr. George J. Engelmann, Mrs. L. Carpentier, Dr. G. Baumgarten, Dr. John T. Hodgen, Dr. Ph. Weigel, Dr. A. Wislizenus, the latter four constituting the board of advisers. The present board consists of Dr. A. Wislizenus, president; Dr. G. Baumgarten, secretary; Dr. Hugo Kinner, and Dr. George J. Engelmann. The school is held at the residence of Mrs. Carpentier, 911 Chouteau Avenue.

THE COLLEGE FOR MEDICAL PRACTITIONERS was incorporated April 11, 1882, and its first session commenced Nov. 11, 1882. It is intended to be what is indicated by the name, a school for instruction in special branches, but does not grant diplomas, only certificates of attendance upon the lectures in one or more branches or in the full course as the case may be. The faculty consists of the following: Thomas F. Rumbold, M.D., Professor of Diseases of the Nose, Throat, Ears, Lungs, and Heart; Edward Borek, A.M., M.D., Professor of Diseases of Children and Clinical Surgery; Hon. Frederick T. Ledergerber, Professor of Law, Forensic Medicine, and Toxicology; W. B. Outten, M.D., Professor of Railroad Surgery; J. H. McIntyre, A.M., M.D., Professor of Gynecology. Besides the instruction imparted by these members of the faculty lectures have been given by William Dickinson, A.M., M.D., Professor of Ophthalmology; B. Roemer, M.D., Professor of Diseases of the Nervous System and Venereal Diseases; Garland Hurt, M.D., Etiology, Hygiene, and Management of Diseases; A. H. Ohmann-Dumesnil, A.M., M.D., Skin Diseases; H. Marks, M.D., Demonstrator of Anatomy, Lecturer on Pneu-

¹ This institution, though having the same name, is entirely distinct from and independent of that just mentioned, which still has a legal though not an actual existence.

monia. Non-resident professors: David Prince, M.D., Plastic Surgery, Electro-Therapeutics, and Massage; William A. Byrd, M.D., Surgical Lesions of the Abdominal Viscera; Hiram Christopher, A.M., M.D., Medical Chemistry and Urinology; A. E. Prince, M.D., Demonstrator of Operative Ophthalmology.

THE ST. LOUIS COLLEGE OF PHARMACY was organized in the spring of 1865.¹

At first the meetings of the college were held in the dispensary building of the St. Louis Medical College, and the chairs originally established were those of chemistry and botany, materia medica, and pharmacy. At this time the officers and faculty of the college were:

President, A. Leitch; Vice-Presidents, E. L. Massot and E. Sauder; Corresponding Secretary, J. O'Gallagher, M.D.; Recording Secretary, C. L. Lips, M.D.; Treasurer, M. W. Alexander; Register, J. R. Coleman, M.D.; Board of Trustees, *ex officio* the officers of the College, E. L. Massot (chairman), J. McBride (secretary), Col. J. O'Fallon, Henry Shaw, I. H. Sturgeon, Drs. J. Barnes, C. Roesch, J. Laughton, M. M. Pallen, G. Engelmann, J. T. Hodgen, and Messrs. W. Primm, H. Kirehner, T. Kalb, F. W. Sennewald, E. Fasold, W. D'Oench; Faculty, A. Wadgymar, Professor of Chemistry and Botany; J. S. B. Alleyne, M.D., Professor of Materia Medica; J. O'Gallagher, M.D., Professor of Pharmacy.

The college is now located at the southeast corner of Fifth and Olive Streets, and its officers are F. W. Sennewald, president; Charles Getner, vice-president; Edmund P. Walsh, secretary; W. C. Bolm, corresponding secretary; and S. Boehm, treasurer.

Hospitals, Dispensaries, Medical Charities.—**ST. LOUIS MULLANPHY HOSPITAL (SISTERS' HOSPITAL).**—It was in 1828 that the Sisters' Hospital was first instituted. In that year John Mullanphy donated to Joseph Rosatti, then bishop of the Catholic diocese, in trust for this hospital, one hundred feet of ground fronting on Fourth Street and running to Third Street, on the south side of Spruce Street. A small building was erected at first, the remainder of the lot being devoted to a garden and orchard. As

occasion required new buildings were erected, until not only the whole frontage on all three streets was covered, but the rear of the lot also, leaving a large area in the centre, used as a promenade by convalescent patients. The first building occupied by the sisters was a log cabin. The four sisters who came here in 1828 were Sister Frances Xavier, who was the first Lady Superior here, Sister Rebecca Dellone, Sister Frances Regis, and Sister Martina. They were members of the order of the Sisters of Charity of St. Vincent de Paul, which was established at Emmittsburg, Md., in 1809, by Mother Seton, a daughter of Dr. Bailey, a celebrated surgeon of New York City. In 1831 four more sisters joined the little community in St. Louis.

In 1831 the corner-stone was laid of the brick building which stood so many years on the corner of Fourth and Spruce Streets. It was the first hospital of the kind established west of the Mississippi, and it has acquired the unquestioned confidence of the community. It is not, however, a public charity in the general acceptation of the term. The public use it, but it is intended to be and should be self-sustaining. Those who are able, go there and pay for attendance, preferring it either to a public or a private hospital, and strangers especially and persons who have no homes of their own prefer it generally to other institutions of the kind.

In the growth of the city westward the original location became an undesirable one for a hospital, and in the middle of July, 1874, the patients were removed to a fine new building in the western part of the city, one square east of Grand Avenue. The building fronts on Montgomery Street, toward the south; the north side is on Cardinal Street, the east side on Colman Street, and the west on Bacon Street.

The cost of the building was not far from one hundred and fifty thousand dollars. The area of the site was five hundred by two hundred and fifty-five feet. The hospital buildings present a stately appearance as one approaches the place along Grand Avenue, the vast pile of brick looming up, with the white facings, above the surrounding elevations. The main buildings, together with the east and west wings, are four stories high, while the connecting wings have a height of only three stories. The interior arrangements of the hospital are all that modern improvements could suggest. The buildings will accommodate three hundred patients comfortably, and contain fifty private rooms, which are all large and elegantly furnished, also large and well-ventilated wards devoted to the different departments of medicine and surgery. The specialties are thoroughly recognized, and we find

¹ "The opinion has long prevailed among the members of the medical profession and the body of apothecaries of St. Louis that some measure should be taken for the scientific development of pharmacy in this city by more highly educating the apothecaries' clerks, and protecting the interests of both classes against the baneful influence of illiterate men. At several preliminary meetings of physicians and apothecaries to consider the steps necessary for the above purpose an organization was perfected, and now we have established among us a College of Pharmacy. The institution, though yet in its infancy, bids fair to stand firmly, and, like similar institutions of Eastern cities, to exert a highly beneficial influence upon those whom it most nearly concerns. Already its list of members is large, and rapidly increasing from day to day."—*Republican*, April 1, 1865.

distinct departments of surgery, general medicine, diseases of the chest and throat, diseases of women, and diseases of the eye and ear. In addition to the usual hospital accommodations, there is also a large and rich polyclinic, consisting of the departments of surgery, medicine, diseases of chest and throat, diseases of women and children, and diseases of the eye and ear. In these clinics patients are treated gratuitously, and medicine is furnished at moderate rates.

There are at present twenty sisters connected with the hospital, the entire institution being in charge of Sisters Theresa and Servente.

The names of the Sisters Superior who have had charge of this hospital, with their terms of service, are the following: Sister Frances Xavier, for five years; Sister Rebecca Delorne, for one year; Sister Seraphina, three years; Sister Alexis, twenty-five years; Sister Anacaria, two years; Sister Mary Rosa, four years; Sister Theresa, one year. The medical staff at present comprises the following: E. H. Gregory, M.D., surgeon-in-chief; N. B. Carson, M.D., surgeon; P. Y. Tupper, M.D., assistant; S. Pollak, M.D., surgeon to department of eye and ear; W. C. Glasgow, M.D., physician to department of diseases of the chest and throat; L. L. McCabe, M.D., physician to male medical department; B. T. Whitmore, M.D., assistant; G. A. Moses, M.D., physician to female medical department; F. A. Glasgow, M.D., assistant.

Dr. E. H. Gregory, surgeon-in-chief of the hospital, was born near Russellville, Ky., Sept. 10, 1824. He was educated in Kentucky, at an institution of which his father had charge. He graduated in medicine from the Medical Department of the St. Louis University in 1849, and after practicing medicine for two or three years in Cooper and Morgan Counties, Mo., removed to St. Louis in 1852. He has been connected with the St. Louis Medical College as Demonstrator of Anatomy and Professor of Surgery since 1852, and has for many years been at the head of the medical organization of the Sisters' Hospital. He is a popular lecturer, an able surgeon of conservative tendency, and has had the best success in ovariectomy of any operator in St. Louis.

ST. ANN'S WIDOWS' HOME, LYING-IN HOSPITAL, AND FOUNDLING ASYLUM.—This institution was organized May 12, 1853, and was incorporated in March, 1859, in the name of the Sisters of Charity. It was originally situated in the southern part of the city, on the corner of Marion and Minard Streets, in a house hired for the purpose. The present building on the southeast corner of O'Fallon and Tenth Streets was erected in 1857-58, and was first

occupied Sept. 8, 1858. The physicians who have had professional charge of the lying-in hospital were Dr. L. Ch. Boislinière, from 1853 to 1861; Dr. Shumard, 1861 to 1865; E. L. Feehan, 1865 to 1874; Dr. William Reilly, 1874 to 1879; Dr. A. A. Henske, from 1879 to the present time.

The ground on which this building was erected was donated by Mrs. Ann Biddle, and the institution takes its name from her. The lying-in patients accommodated in this hospital (including private patients) number from one hundred and twenty-five to one hundred and fifty per annum. The number of infants received (born in the house and brought thither as foundlings) was three hundred and eighty-five in the year 1882.

ST. VINCENT'S INSTITUTION FOR THE INSANE, situated on the southeast corner of Marion and Decatur Streets, was founded Aug. 10, 1858, by the Sisters of Charity. The archbishop by way of encouragement gave them a lease for ten years on their present building, which was originally built for an orphanage. By 1867 the sisters had paid for the house. During the next year they built an addition and raised the old building one story. There is now a centre building fronting on Decatur Street and two wings. In 1881 the sisters were incorporated under the name of St. Vincent's Institution for the Insane, under the management of the Sisters of Charity, with Sister Julia as superior. The building is large, well ventilated, and fitted up with every convenience necessary for an institution of that character. The grounds on which the building stands cover an entire block, and are laid out in shady walks. All classes of insane persons and of all denominations, without regard to the duration of the disease or its curability, are admitted; also a limited number of those addicted to the use of opium and other stimulants to excess. A farm belonging to the institution, a short distance in the country, affords a source of much pleasure and recreation for the patients during the spring and summer. The asylum is private. Patients who are able pay, and what is left after defraying the actual expenses goes towards the support of the charity patients, of whom there is an average of forty-five in the house. Dr. John A. Seavy was the first physician in charge of the institution, and its present medical attendants are Dr. Jerome K. Bauduy, who has been the attending physician for nearly a score of years, and Dr. A. B. Shaw, who has recently been associated with him.

DISPENSARY.—As heretofore stated, the first free dispensary for the gratuitous treatment of the poor was established by Drs. S. G. Moses, William Mc-

Physicians, George Johnson, J. B. Johnson, C. A. Pope, and Joseph Clark. Drs. Beaumont and Hurdage Lane were the consulting physicians. The six young physicians first mentioned pledged each other that they would each give an hour a day to the work at the dispensary and take charge of out-door cases in one of the city wards, and that they would carry on the work for five years. The out-door service in the different wards was changed every six months, so as to equalize the work as much as possible. Dr. Moses was president of the organization. Through the kind offer of Dr. Eliot, the basement of the Unitarian Church, which then stood on the northwest corner of Pine and Fourth Streets, was placed at their disposal, and was occupied for some years. At the end of the first year the dispensary was several hundred dollars in debt. At that time an ordinance was passed by virtue of which the president of the dispensary was made an honorary member of the Board of Health, and an appropriation of five hundred dollars per annum was secured, thus enabling them to procure a stock of medicine and lighten the expense materially. A number of philanthropic citizens contributed generously to the support of the undertaking, among whom the Mullanphy family may be mentioned specially. Collections were taken up in the churches for the same object. Gradually the debt was extinguished, and when the dispensary was given up, seven years after its establishment, it owed nothing. It was discontinued because the city established a public dispensary and withdrew the appropriation for medicines for this charity. The colleges also had established dispensaries, and the original dispensary seemed to be no longer needed.

CITY HOSPITAL.—At the meeting of the City Council on the 10th of July, 1845, an ordinance was passed directing the appointment of a committee of five to select a building site and cause plans to be made for a city hospital. The committee selected a tract of ground, embracing about twenty-eight acres, in the city common, at the head of Soulard Street and west of St. Ange Avenue, bounded north by Linn Street and south by Lafayette Avenue, the same ground where the hospital now stands. This site was originally occupied by the St. Louis cemetery. The land was surveyed by Henry Kayser, city engineer, and contracts were awarded in August of that year for the construction of the building. The hospital was partly completed (the original plans as prepared by Thomas Walsh were not fully carried out), and was immediately put to use in August, 1846. The building was then one hundred and eleven feet long by fifty and a half feet wide, which was but the northern half of

the whole front, originally designed to be two hundred and thirteen feet in length, with extended wings on each side running westwardly. It was three stories in height, inclusive of stone basement nine feet above ground. Besides rooms for domestic purposes and officers' quarters, there were on the principal floor three wards for patients, and on the second floor six wards. The wards measured from nineteen by nineteen and a half to nineteen by thirty-eight feet. The part of the building then completed cost \$17,068.57. Drs. John S. Moore and M. M. Pallen, health officers under Mayor Bernard Pratte, were appointed to take charge of the hospital, and to have the sick removed from the St. Louis Hospital, where they had previously been attended to at the city's expense.

The succeeding mayor, Peter G. Camden, was empowered to appoint, by and with the consent of the Council, a resident physician to serve one year at a salary of two hundred dollars per annum; four attending physicians, to be selected from the medical schools of the city alternately, each physician to serve three months; four consulting physicians to serve one year, and one steward and one matron, at a yearly salary, respectively, of six hundred and two hundred dollars.

The hospital could accommodate about ninety patients, and was supplied with few conveniences. The grounds were not inclosed. The following was the staff of officers under the first organization: Dr. David O. Glasscock, resident physician; Col. N. Wyman, steward; Mrs. Susan F. Wyman, matron; Drs. B. Bush Mitchell, J. B. Johnson, Charles A. Pope, and Thomas Barbour, attending physicians; Drs. William Beaumont, John S. Moore, Thomas Reyburn, and J. N. McDowell, consulting surgeons. The second resident physician was Dr. D. M. Cooper, assisted by Drs. E. F. Smith and John T. Hodgen. Dr. David Prince, now of Jacksonville, Ill., was resident physician of the hospital during the cholera season of 1849 until the epidemic had to a great extent subsided, when he was succeeded by Dr. T. Y. Bannister, who held the position until 1857. He was succeeded by Dr. O. C. Johnson, and he by Dr. L. T. Pine; then followed in order Drs. A. Jaminet, J. V. L. Brokaw, R. H. Paddock, Charles Spinzig, J. W. Hall, E. D. Clark, J. G. Morgan, T. F. Prewitt, G. Hurt, and D. V. Dean, who still holds the position, and under whose charge the institution has been greatly improved in efficiency and equipment, while the expense of administration has been materially diminished.

On May 15, 1856, the hospital was almost wholly destroyed by fire, which broke out about three o'clock in the morning in the lecture-room in the southwest wing of the building, and in a few hours only a ruin

was left. The patients were all removed, and those who were unable to assist themselves were carried to the Sisters' Hospital at Fourth and Spruce Streets, where they were cared for. Only one life was lost, that of an insane Italian, who rushed back into the flames after having been once rescued. Arrangements were then made for the use of a part of the United States Marine Hospital and of the buildings on the county farm until the hospital could be rebuilt. In May, 1857, the main building and extension of the hospital were completed, but were not occupied until the following July. The total cost of rebuilding the hospital was \$46,079.16; the engines, outhouses, fences, etc., cost about \$16,000.

The grounds of the hospital contain some eight acres. An ornamental garden about forty feet wide lies between the front of the building and Linn Street, on which it fronts. The main building is in the shape of an "L," the wing facing toward Lafayette Avenue.

During the years 1873-74 a new wing was erected on the Lafayette Avenue side of the lot four stories in height, including the basement. It is "T"-shaped, measuring thirty-four by one hundred and twenty feet and thirty-eight by fifty-six feet. This has relieved to a considerable degree the overcrowded condition of the hospital, but the building is still inadequate to the requirements of so large a city as St. Louis.

THE HOUSE OF INDUSTRY was opened Oct. 1, 1872, for the reception of patients, and was devoted to the treatment of women who were sent thither on certificate of the examining physicians under the "social evil" registration law. Dr. E. P. Powers was the resident physician until the spring of 1875, when Dr. P. V. Sehenek was appointed to that position, and the hospital was made a general female hospital for the reception of all the female patients of the city, except such cases of emergency and night cases as cannot be carried to such a distance. The building is a fine brick structure, situated upon high ground in the western part of the city, one mile west of Tower Grove Park. The present superintendent is Dr. George F. Hulbert.

THE UNITED STATES MARINE HOSPITAL,¹ for the treatment of sick and disabled seamen of the merchant marine, is situated on Marine Avenue, south of the United States Arsenal, in the southern portion of the city overlooking the river, and is distant about three miles from the custom-house. The surgeon in

charge is Dr. Henry W. Sawtelle. The local quarantine station is about twelve miles below the city, and during the sickly season all vessels hailing from epidemic regions are carefully inspected, good accommodations being provided for those persons who are detained for examination or treatment.

By the act of 3d March, 1837, an appropriation was made, and authority given the President of the United States to cause to be *selected suitable sites for marine hospitals on the Western waters for the benefit of sick seamen, boatmen, and all other navigators on the Western rivers and lakes*, restricting the number to three on the Mississippi, three on the Ohio, and one on Lake Erie. To accomplish its provisions the President was authorized to call to his aid a board of the medical staff of the army. The commission appointed under the provisions of this act reported in November, 1837, which report was laid before Congress with the documents accompanying the President's message to the second session of the Twenty-fifth Congress. In that report, among other sites selected and contracted for, was one at St. Louis, for the sum of seven thousand four hundred and sixty-eight dollars.

The board of surgeons, in their report, state: "From the most authentic information in their reach, there were at that time navigating the Ohio and Mississippi Rivers 638 steamboats, requiring the employment of 15,950 hands, and the number of officers and hands navigating those rivers in keel- and flat-boats was estimated at 30,000, making the aggregate number engaged in navigating those rivers 45,940 men." The same report, when remarking on the site selected at St. Louis, says, "St. Louis, as the site selected for the third and last hospital on the Mississippi River, presents such superior and evident claims over every other town on the upper portion of the river that it is hardly necessary to enumerate them."

By the act of the 29th of August, 1842, Congress appropriated the sum of seven thousand four hundred and sixty-eight dollars, the amount which had been stipulated in the contract made by the board of surgeons with William C. Carr for the site selected by them at St. Louis. The money not having been appropriated and paid within the time stipulated, Mr. Carr having declined executing the conveyance, and no further action having been taken by Congress, the money appropriated reverted back to the treasury.

The Treasury Department, however, contracted for the maintenance of patients at the Charity Hospital in St. Louis, at three dollars per week for each one, board, lodging, nursing, medical attendance, etc., supplied by the hospital. At these prices the funds

¹ The author is indebted for the greater part of the material from which this sketch is compiled to Dr. Henry W. Sawtelle, surgeon in charge of the United States Marine Hospital.

assigned went but little way in supplying the numerous persons claiming aid.

On the 13th of January, 1846, Hon. James H. Relfe introduced into Congress a resolution instructing the Committee on Commerce to inquire into the expediency of establishing a marine hospital at St. Louis. The necessary legislation was secured, and a board of surgeons appointed in 1848 to select a site, the amount of the purchase-money being limited to ten thousand dollars. In 1849 the additional sum of twenty thousand dollars was appropriated. A site was selected on the ground known as the Magazine lot, situated about half a mile below the United States Arsenal, and between Carondelet Avenue and the Mississippi River, which was transferred to the medical service by the War Department in 1850. In January, 1852, the hospital was under roof, and about the 1st of August, 1855, was occupied by the Marine Hospital patients, who were then divided between the City Hospital and the Charity Hospital. After the act passed for the erection of the Marine Hospital, Dr. J. N. McDowell was appointed hospital physician.

The building erected in 1855 is a parallelogram, one hundred and eight feet by eighty-seven. It has three floors, a basement, an attic, and a cupola, and the roof is pyramidal. Each floor on both east and west sides has open porticoes, fifty-four feet by ten, which are connected with the wards by large central and end halls. On each floor are eight large rooms or wards, with small rooms on the extreme corners, which open into the side hallways. The kitchen, convalescents' and attendants' dining-rooms, dispensary, office, and surgeon's quarters are on the first floor, the wards for patients being on the second and third. While the external conditions are excellent, the grounds being high and rolling, with a free circulation of air, the internal arrangements, both as regards ventilation and easy management, are defective, the only escape for the impure air, except through the windows and doors, being found in the octagonal cupola, four sheet-iron pipes passing through the roof, six small skylights, and four wooden shafts opening from the outside into the east and west attic rooms, with no provision to convey the foul air from the wards to the attic.

During the civil war the hospital was used for the sick and wounded of the army, and to meet the emergency temporary wards were constructed of rough material after the barrack plan on three sides of a square just north of the main building, the stone walls around the court forming an oblong square, within which were built a large stone powder

magazine and a wooden tank-house. The wards are four hundred and fifty-one feet in length, nineteen and one-fourth in width, and nine and one-half in height, which, with the present average number of patients, gives sixteen hundred and forty-nine cubic feet of air-space per man. They are well ventilated by thirteen wooden shafts passing through the centre of the roof. A piazza extends entirely around the outside of the building.

Three experiments have been made at heating the main building. Originally hot-air furnaces were used, and subsequently fireplaces and stoves, which in turn gave place to a steam-heating apparatus. Through some defect, however, sufficient heat could not be maintained by the latter method, and the apparatus was removed several years ago. Stoves and open grates have since been depended upon. The pavilion wards are also heated by means of large stoves.

In the autumn of 1879 the temporary pavilion wards were repaired sufficiently to make them suitable for winter use. The walls were clap-boarded, a new composition roof and stone porches were built, and the open spaces under the veranda sheathed. During the summer of the same year an abundant water supply was obtained by tapping the city main on Marine Avenue in front of the hospital, and the old tank-house was torn down, together with the remaining portion of the stone wall at the south end of the court which originally formed the square. The stone powder-house or magazine still remains, and is used to accommodate the engine, boiler, and laundry. Ground was broken for the new executive building of the hospital Sept. 15, 1881, and the building was completed and ready for occupation Feb. 15, 1882. The plans were prepared under the direction of the surgeon-general. The building stands on the northwest portion of the reservation, commanding a fine view of the river and surrounding country. It is a brick structure, forty-four feet front by forty-two, with limestone caps for the windows and doors, and a veranda in front, and is connected with the pavilion wards by a covered way. It has two floors and a basement, attic and observatory. The basement rooms are used principally for store-rooms.

The surgeon's office, reception-room, dispensary, and operating-room are on the first floor, and the second floor is occupied as quarters for the steward and attendants. The main hall is ten feet wide, with a marble-tiled floor, and the interior trimmings are of Eastlake design. All the doors have transoms, which operate by patent fastenings. The rooms are provided with ventilating registers which open into

flues and terminate in the attic, from which point tin tubes are carried immediately under the slate roof to the ventilating louvres in the roof lunettes of the observatory. The first floor is heated by a furnace and open grates, with anthracite coal as fuel. The second floor is heated by means of small stoves. The dispensary, operating-room, and officers' bath-room are provided with hot water from a cylinder boiler, with proper attachments to a small base-heater. The building contains all the latest improvements and conveniences, and is admirably adapted for its purposes.

QUARANTINE HOSPITAL.—Prior to 1854 the quarantine station was on Arsenal Island, but as the southern part of the city became more densely peopled, objections were made to the hospital being kept in that location, and arrangements were made for its removal to a location some eleven and a half miles south of the city. In 1855 two small, badly-ventilated buildings were constructed for the reception of such patients as might be taken from the boats, and a stone house already upon the property refitted for the residence of the officers. In 1867 four large buildings upon Arsenal Island were removed to quarantine, and thus a first-class hospital was established there. This hospital was discontinued as a general hospital, but is continued now as a small-pox hospital, and during the yellow fever season of 1878 yellow fever cases were taken there. Dr. A. Montgomery was the resident physician in 1867; in 1869, Dr. Thomas Fox had charge, and in 1870, Dr. Robert A. Burgess. Then followed Drs. S. H. Brokaw and R. A. Anderson. The latter officer was in charge of the hospital when it was discontinued as a general hospital.

ST. LUKE'S HOSPITAL.—Two preliminary meetings were held in the early part of the month of November, 1865, in a room in the Mercantile Library by a few zealous Episcopalians, for the purpose of considering the advisability and the need of establishing a hospital for the sick, and for furthering other church work in a portion of the city needing the labors of a missionary. Those present were Rev. J. P. Cannon, M.D., and William H. Thompson, R. H. Spenger, H. S. Brown, J. R. Triplett, E. H. Mead, B. E. Walker, Charles Thaw, R. M. Wilson, W. T. Mason, E. A. Corbett, E. P. Curtis, M. N. Burchard, J. Percival, F. A. Lane, Henry Brown, V. W. Knapp, Herbert Bell, M. Williams, James Mitchell, W. B. Crittenden, and Mr. Donaldson.

At their suggestion a meeting was called by Bishop Hawks in the basement of St. George's Church of the rectors and members of the Episcopal Church in the city, to which the whole matter was referred. At

that meeting there were present of the clergy the Rev. Drs. Berkley and Schuyler, and the Rev. Messrs. McKim and Spencer; of the laity, J. P. Down, J. W. Luke, Edward Mead, R. H. Franklin, J. F. Madison, Francis Hawks, H. S. Brown, Charles Mauro, Judge W. F. Ferguson, and Dr. J. J. Clark. Articles of organization were approved, and the name "St. Luke's Association" was adopted.

A building was erected for a hospital on an elevated plateau with spacious grounds between Ohio and Sumner Streets, and was in many respects admirably adapted to the purpose. The first patient was not admitted until the following April. The first medical staff was composed of Drs. J. B. Johnson, J. S. B. Alleyne, J. J. McDowell, J. J. Clark, E. S. Lemoine, F. V. L. Brokaw, T. F. Prewitt, and James P. Gallagher.

During the summer of 1866, St. Louis was visited by that fearful scourge, Asiatic cholera, and St. Luke's Infirmary was thrown open to the public for gratuitous treatment of cholera patients during its continuance. The history of the hospital was for years one of financial embarrassment and painstaking, earnest endeavor on the part of the board of trustees to secure and wisely dispose of the funds necessary to make it a success.

In September, 1867, an important step was taken in the right direction. It was resolved "that, for the purpose of insuring greater efficiency in the household management, a board of lady visitors be constituted, to consist of two ladies for each city parish." The experience of over three years convinced the friends of the hospital that in its then location it was too far removed from the centre of population, and particularly inaccessible for surgical patients brought in from railroads and demanding immediate care. A removal was, therefore, determined upon and effected in the month of March, 1870, to the corner of Elm and Sixth Streets.

Upon this removal rooms were furnished by the ladies of Christ Church and St. George's, and also the Good Samaritan room by Mrs. Triplett. A new interested seem to be aroused among the ladies by reason of the nearness and accessibility of the hospital. In November, 1873, Dr. Pottinger was elected visiting physician, and Dr. Hodgen invited to act as surgeon-in-chief, and Dr. Pallen as assistant. In June, 1873, the hospital was removed to a building on the north side of Pine Street, between Ninth and Tenth Streets.

At the annual meeting in 1874 the board reported the hospital as entirely out of debt. For some years every effort has been put forth to secure the means for erecting a building for the hospital. This has at

length been accomplished, and now the hospital (the corner-stone of which was laid on the 26th of June, 1881) is located at the northeast corner of Washington Avenue and Twentieth Street. The structure, which cost forty-one thousand dollars, is built on land donated by Henry Shaw, and was dedicated on Whitsunday, May 28, 1882. Messrs. Barnett & Taylor were the architects of the building, in the internal arrangements of which, under the supervision of Dr. John Green, every device and appliance for the care of the sick suggested by modern science has been carried out. The outside walls are double, with air-chambers between, and the floors are of marble or of yellow-pine stained and waxed. The other woodwork is of sweet-gum, with ash and cypress, oiled. The plumbing and ventilation are in accordance with strict sanitary conditions. There is a fire-proof Whittier elevator, large enough for a cot and patient, and the rooms are furnished luxuriously, most of them being memorial gifts, as, for instance, the reception-room, furnished by Mrs. Kennett; the waiting-room, by Mrs. Sides; the private parlor, by Mrs. Foster; two rooms to the memory of the late Dr. John T. Hodgen, by E. C. Simmons and Mrs. Tyler; the Schuyler room, by Christ Church; the Holy Communion room, by the church of that name; Trinity room, by Trinity Church; Mount Calvary room, by Mount Calvary Church; the Susan R. Larkin, St. Barbara's, and Buchanan memorial rooms, by ladies who withhold their names; and other rooms by Mrs. Wainwright, Mrs. Thornburgh, Mrs. Whitelaw, Mrs. Pickham, Mrs. Plant, Mrs. Dimmock, Mrs. Lewis, and others. The internal management of the hospital since 1872 has been under the control of the Sisterhood of the Good Shepherd.

In that year the Sisterhood transferred their residence from Baltimore to St. Louis, and immediately took charge of the internal management of the hospital. They also have control of the Protestant Episcopal Orphans' Home, which they relinquished in 1874 to establish the School of the Good Shepherd for Girls. This was carried on for three years at 1532 Washington Avenue, and was then removed to 2029 Park Avenue, where it is now. There are now in the order eight full sisters, one probationer, and three associated sisters.

The present medical staff of St. Luke's Hospital are Drs. H. H. Mudd, junior surgeon; E. S. Lemoine, J. S. B. Alleyne, John Green, W. L. Barret, W. E. Fischel, M. H. Post, William Porter, R. H. Realhofer, G. F. Gill.

THE PROTESTANT EPISCOPAL ORPHANS' HOME, on Grand Avenue, at the head of Lafayette Avenue,

was organized in 1848 by Rev. Whiting Griswold, rector of St. John's Church. Its first site was the corner of Eleventh and North Market Streets. Its present home was erected in 1873 at a cost of forty thousand dollars, on land given by Henry Shaw. It has endowments amounting to about forty thousand dollars, and provides for about sixty children at a time. Carrie V. Burchard is matron, and Rev. Benjamin E. Reed is chaplain.

THE ST. LOUIS EYE AND EAR INFIRMARY, AND INFIRMARY FOR DISEASES OF THE THROAT, was incorporated Dec. 23, 1871. It was located at Nos. 1407 and 1409 North Twelfth Street (between O'Fallon Street and Cass Avenue), and was established for the gratuitous treatment of all poor persons suffering from affections of the eye, ear, and throat. The dispensary was open daily (except Sunday) from 1 to 2.30 o'clock P.M.

The following gentlemen composed the board of trustees:

James E. Yeatman, president, William G. Eliot, John B. Johnson, Albert Todd, Carlos S. Greeley, Henry Hitchcock, William Glasgow, Jr., secretary and treasurer; consulting physicians, J. B. Johnson, M.D., William M. McPheeters, M.D., T. L. Papin, M.D., John T. Hodgen, M.D., E. H. Gregory, M.D., G. Baumgarten, M.D.; attending surgeons, John Green, M.D., H. N. Spencer, M.D., William C. Glasgow, M.D., Charles A. Todd, M.D.

After being sustained for a couple of years at the site mentioned, the staff discontinued their service as such, and Dr. John Green transferred the infirmary to St. Luke's Hospital, in connection with which it is still carried on.

ST. JOHN'S HOSPITAL is one of several enterprises carried on under the fostering care of the Sisters of Mercy, an order established in the city of Dublin, Ireland, by Miss Catherine McAuley. The sisters first came to St. Louis in 1856, and established a school at Tenth and Morgan Streets. As they gained influence and means they undertook other work, and in 1871, at the suggestion of Drs. Papin and Yarnall, they established an infirmary for women and children. This rapidly grew and necessitated enlargement of accommodations and extension of facilities until now, besides the main building on the corner of Morgan and Twenty-third Streets, to which they moved in 1861, wings have been erected on each of those streets, and accommodations are now afforded for one hundred and fifty patients, which can readily be increased to two hundred as occasion demands. The medical service is now under the direction of the faculty of the Missouri Medical College, whose fine building on Twenty-third Street and Lucas Avenue is directly connected with the hospital. One wing of

the building is devoted to male and another to female patients, and different wards are set apart for surgical and medical cases, while there is a considerable number of single rooms which patients can have to themselves with the privilege of employing any physician whom they may choose. The sisters also conduct a school for poor girls, and an industrial school for children, and supply lodging for deserving women out of employment. Mother De Pazzi, the Superior, has been with the convent since its organization.

ALEXIAN BROTHERS' HOSPITAL.—The order which conducts this institution was established in Germany in the fourteenth century, during the prevalence of the plague known as the "black death," and for the purpose of ministering to its victims. It has since been devoted to the care of the sick and insane. The St. Louis branch was established in October, 1869, and chartered March, 1870, with Brother Stanislaus Schwiperich as its first president, and Brother Prochus Schutte as secretary. The first house occupied (a small one) was bought with the grounds in 1870; the present building (the corner-stone of which was laid June 6, 1873) has a front of one hundred and seventy-six feet by a depth of thirty feet, and was opened for patients June 4, 1874. The building, which is situated at Jefferson Avenue and Osage Street, is of an imposing exterior, and is fitted up with every appliance for the care and comfort of its inmates. It will accommodate one hundred patients. The grounds contain about four and a half acres, and bear eloquent testimony to the industry and gardening skill of the brothers. During the year 1881 nine hundred and thirty-six patients were treated. The hospital is open to people of all denominations, and the poor are received without charge, but those able are expected to pay. It is mainly supported, however, by collections and donations. The present officers are Brother Jodocus Schiffer, president; Brother Hubert Cremer, vice-president; Brother Dominic, secretary; Brother Prochus, treasurer. The hospital is attended by Drs. Gregory, Lutz, and Wessler.

THE ST. LOUIS LYING-IN CHARITY AND LYING-IN HOSPITAL.—This charity was incorporated Nov. 30, 1874, its object being "to inaugurate an institution whereby a mother with a family of dependent children could be, in the hour of her extremity, attended to and relieved of her suffering, as also one whereat the sick and helpless of her sex could at all times apply for medical and surgical aid."

A board of directors was appointed, consisting of Drs. John B. Johnson, president; George J. Engelmann, secretary; John T. Hodgen, Philip Weigel, A. Wislizenus, and G. Baumgarten. The medical

staff consisted of Dr. George J. Engelmann, physician-in-chief; Dr. G. Baumgarten, consulting physician; and Drs. E. M. Nelson, Edward Evers, W. Wyman, W. E. Fischel, A. M. Bierwirth, and I. N. Love, attending physicians. The members of the graduating classes at the St. Louis School of Midwives volunteered their services to nurse patients of the charity during the following year.

A committee of prominent ladies from different parts of the city was organized, and took an active part in raising funds, and in other ways extending the influence and usefulness of the organization, while the leading druggists filled gratuitously prescriptions written by the medical staff for patients of the charity. The first patient was attended at her own home under the auspices of the charity Jan. 22, 1875.

One year after the organization of the out-door department it was deemed practicable to inaugurate the hospital. This was done by renting the building 2834 Franklin Avenue, now occupied by the Children's Hospital, which was partially furnished and opened Dec. 1, 1875.

In March, 1877, the hospital was moved to the building on the northwest corner of Clark Avenue and Fifteenth Street, where the work was continued until the close of the year 1879, when it was found necessary to give it up for lack of means to continue it. During the five years of its existence a great deal of good was accomplished.

THE MISSOURI EYE AND EAR INFIRMARY was founded in 1876 by Dr. R. Gebser, and incorporated in August of that year. Dr. Gebser carried on the infirmary at his own expense for three and a half years, until his death, since which time it has been kept up by Dr. W. A. Frazier, who was associated with Dr. Gebser. The infirmary is located at 1304 Chestnut Street, and has been the means of affording relief to a large number of worthy poor.

CONVENT AND HOSPITAL OF THE FRANCISCAN SISTERS.—In 1865 four sisters of the Order of St. Francis (better known as Franciscan Sisters) came from Germany and built a convent near Carondelet, south of the River des Peres. This was burned in 1877, and the sisters removed to St. Louis, purchasing from Father Henry, of St. Lawrence O'Toole's Church, the lot (one hundred by one hundred and twenty-seven and a half feet) on which their convent now stands, at the southeast corner of O'Fallon and Fourteenth Streets. The sisters who first came in 1865 afterwards returned to Germany, but not before others had come to supply their places. In 1877, Sister Bernarda Passman, banished from

Germany for political reasons, came to St. Louis, and was made Mother Superior, which position she has since retained. In January, 1878, the Order at St. Louis was chartered, with Sisters Bernarda Passman, Alfonsa Cornann, and Cecilia Hawig as incorporators. Their house was erected in 1878-79, and Pius Hospital (as they call it) received its first patient on Jan. 1, 1880. The sisters, of whom there are now twenty in the establishment, also provide board and lodging for servant-girls out of place, at low rates and on easy terms of payment.

ST. LOUIS PROTESTANT HOSPITAL.—In the spring of 1881 a "Medical Mission" was organized under the supervision of a committee from the board of directors of the Young Men's Christian Association. Rooms were fitted up in a building that belonged to the association, a small stock of drugs was procured, and a medical staff was appointed consisting of Drs. L. H. Laidley, E. M. Nelson, F. R. Fry, E. W. Saunders, and M. H. Post. Circulars were sent out, and one of the physicians was in attendance at certain hours every day. The dispensary work was carried on under this form of organization, except that Dr. Saunders withdrew from the medical staff, until about the end of the year, when the work was enlarged by fitting up the remaining rooms of the building as a hospital for the reception of patients. In the autumn of 1882 an organization was effected under the name of the St. Louis Protestant Hospital Association, and a charter was procured. The incorporators were E. O. Stanard, E. H. Semple, Charles W. Barstow, J. G. Chapman, S. M. Dodd, George W. Parker, W. P. Mullen, E. P. V. Ritter, George A. Baker, F. L. Johnston, George S. Edgell, James H. Wear, and I. M. Mason.

The officers of the Medical Mission transferred to the new association all their medicines and hospital stores and furnishings. The following gentlemen constitute the medical staff of the hospital, in connection with which the regular dispensary service is still maintained: Drs. L. H. Laidley, E. M. Nelson, M. H. Post, G. Armstrong, W. G. Moore, P. Y. Tupper, and Frank P. Johnson.

It is still the day of small things with this institution, but it promises to become one of great value and usefulness.

ST. LOUIS INSANE ASYLUM.—In St. Louis City and County, up to within a few years, no provision for the insane poor had been made, and the county authorities were finally compelled to make such arrangements as enabled them to send their insane to the State asylum at Fulton. This plan, however, was found expensive and inconvenient, and the ne-

cessity of having a county insane asylum was plainly suggested. The matter came up before the County Court at different times during the years of 1861 and 1862, but no definite action was taken until the 20th of April, 1864, when the motion of Judge Fiske, submitted Dec. 10, 1863, to erect a county insane asylum, was taken under consideration by the court. The original motion contemplated a building with a capacity for one hundred patients, but when the matter came to be discussed it was generally admitted this was insufficient to meet the wants of the county. In the mean time, William Rumbold, county architect, was instructed to prepare plans to be submitted to the court. On the 21st of July, 1864, the first allowance in connection with the project was made by the court for the purchase of a tract of land in the vicinity of the county poor-house, which was deemed advisable to include in the ground, consisting of one hundred and forty arpens. The inception of the enterprise was attended with the usual delays and difficulties. On the 21st of August, 1864, the plan prepared and submitted by Mr. Rumbold was approved, but the work did not commence till late in the fall. The site chosen was an elevated piece of ground a short distance west of the county poor-house, being part of what is known as the county farm, from which there is a wide prospect on all sides of an undulating and fertile country. The work progressed steadily, and as the design of the architect, in character and extent, became evident the magnitude of the undertaking began to excite alarm. Mr. Rumbold always maintained that the building could not have been made smaller and meet the wants of the county, and that the future would even render necessary a further increase of accommodation, and time has shown that even he underestimated the demands that would be made upon the asylum. Mr. Rumbold died during the progress of the work, and was succeeded by Edward Mortimer, superintendent, and John F. Durham, assistant.

The general appearance of the edifice is that of a massive, substantial structure, built to endure, and for a practical purpose rather than for architectural display. It consists of a centre building five stories in height, with wings three stories in height branching out at the east and west sides. Each of these wings terminates in what architects call "an arm," or, more intelligibly, a building broader and higher than the body of the wing, and forming a cross at either end of the edifice. The projections thus formed, and also by the centre building, which is considerably broader than the wings, relieve the structure from monotony of appearance. The centre building is ninety-six

feet by seventy-six feet. The body of each wing is seventy-six feet in length by forty-four feet wide, and the arms are sixty-seven feet in length by forty feet wide. The total length of building is three hundred and thirteen feet ten inches. The foundation walls are built of stone, and are constructed of solid masonry, and descend six feet below the surface of the ground. The basement walls are also of stone, and are strong and solid; their height to floor of first story is eleven feet. At the highest point, the altitude is one hundred and ninety-four feet. In the arms of the wings there are five stories. There are in the entire building about four hundred and thirty-seven windows. On the first story, in either arm of the wings, and also in the main buildings, there are large windows, adorned by beautiful stone pillars of the Corinthian order. The main entrance is on the north side, to which there is an approach of massive stone steps, and is also handsomely ornamented. The walls are of brick, with stone facings, and the stone used in the construction of the base is all North St. Louis limestone, and is a handsome and compact material. All the other cut stone is from Joliet, Ill. On the south side of the centre building there is an open portico, supported by brick piers running up the entire height of the main building, thus affording a pleasant out-door promenade for patients on each story.

The lower part of the dome is of brick, and the dome proper of iron rib work, similar to that of the court-house, covered with copper. There is also an observatory, from which a magnificent view may be obtained.

The interior of the building is admirably arranged for the treatment of insane persons, and is well supplied with every convenience. The ventilation is excellent, and the water supply ample. The boilers and engines, the main kitchen, laundry, and officers' quarters are located in a brick out-building about one hundred feet distant from the main building, which is connected with it by a subterranean railway running through a tunnel of about one hundred and four feet in length, through which food and other necessaries are carried to the main building. The cost of construction, etc., was about seven hundred thousand dollars. The building was first occupied April 23, 1869. The only fault to be found with the asylum is that it is inadequate to the demands made upon it. In the report of N. de V. Howard, superintendent, to Charles W. Francis, health commissioner, April 1, 1881, he says, "I must again call your attention to our crowded condition. Although one hundred and nine patients have been discharged and sixty-six transferred to

other institutions, there are still three hundred and forty-three in a house which was built to contain two hundred and fifty. I can't pack them much closer. The number admitted, two hundred and fifteen, is larger than that of any preceding year. It should be borne in mind that an insane asylum is not like a hotel in that it has 'always room for one more.' If the insane are herded together like sheep they may be expected to fight like tigers. If the overcrowding here becomes much worse you must prepare for the occurrence of homicides and other serious accidents in spite of all the surveillance that can be exercised, and then the cry of bad management will be raised. In my violent hall I have only five available single rooms: it contains thirty-nine patients. One small associate dormitory contains seven patients every night."

The superintendents have been successively Drs. Charles W. Stevens, T. R. H. Smith, William B. Hazard, J. K. Bauduy, E. S. Frazer, and N. de V. Howard, the present incumbent, who has served for seven years. Drs. Bauduy and Frazer were what were then styled "visiting superintendents," Drs. Fichtenkamp, Leffingwell, and Howard being successively the "resident physicians."

THE HOUSE OF REFUGE.—The present building, on Louisiana Avenue, between Gasconade and Osage Streets, was erected in 1858, and cost about sixty-four thousand dollars. It originally consisted of a centre building four stories in height, with wings on the east and west sides of three stories each. When the institution was opened it had a capacity of about three hundred inmates and all the necessary business offices and apartments. Previous to its erection, the building used for house of refuge purposes was the small structure some little distance east, and now used for the female branch of the institution. On the 15th of February, 1865, the east wing and centre of the new building were destroyed by fire. The value of furniture, clothing, and bedding was five thousand dollars. There was an insurance of twenty thousand dollars on the building, which was applied to restoring the west wing. This wing is the principal branch of the institution, and is occupied by the male department. The old building is still occupied by the girls' department. The daily average of children for the year ending April 10, 1881, was two hundred and thirty-four. The amount expended in the maintenance of the institution during the same time was about thirty-five thousand dollars. John D. Schaeffer is the superintendent, and the managers are the mayor, *ex officio*, Theophile Papin, John Schnell, James E. Cowan, and George Bain.

LITTLE SISTERS OF THE POOR.—In May, 1868, several French sisters arrived in St. Louis and established the order of Little Sisters of the Poor. The location of their first house was on Morgan Street, near Eighteenth, but it was subsequently removed to its present location at Nineteenth and Hebert Streets. The incorporators were Hortense Marie, Marie Barnard, Barbara Vackeus, Elizabeth Vergne, Elizabeth M. Neville, Frances Schever, Elizabeth Stern, Marie Brent, Marie Garabalda, and Anselme Bouvidase. The object of the institution is to aid the poor and care for the aged and infirm. The institution was chartered July 14, 1870, and the corner-stone of the present building was laid in the following year. The structure was finished in 1875, and dedicated October 24th of the same year. Although commodious, it was insufficient on account of the increasing number of poor and infirm inmates, and in September, 1882, the corner-stone of an addition which nearly equals the original house was laid. Sister Hortense Marie became first president of the board of officers. She was followed by Sister Marie Blanche, the present manager.

Medical Journalism.—The greatest part of the literary effort of St. Louis physicians has found expression in the pages of medical journals, and the St. Louis periodicals of this class have contained much of real value to the profession. In the order in which they were established, the various medical journals of the city have been as follows:

St. Louis Medical and Surgical Journal.—The first number of this periodical, which was the first medical journal published west of the Mississippi River, was issued in April, 1843. Many other medical journals have been started in St. Louis since its advent, but most of them have had a brief existence, while the *Journal* has continued to the present time, increasing in influence and circulation. Its publication was temporarily suspended during the war, but with that exception and the omission of one issue at the time of the great fire that occurred during the epidemic of cholera in 1849, it has appeared regularly from the time of its establishment to the present day. The founder of the journal was Dr. M. L. Linton, who was at first the sole editor and proprietor, but after a time he associated with himself Drs. McPheeters and Fourgeaud, the former of whom continued to assist Dr. Linton in the management of the journal until the war. At the close of the war the journal was revived by Dr. T. J. White, who was succeeded in the editorial chair by Dr. G. Baumgarten, who conducted the publication with marked ability for three years. In 1871, Drs. Edgar and Gill

assumed the editorial and business control. In 1878, Dr. Edgar sold the journal to its present proprietor, Dr. Thomas F. Rumbold, under whose management it has been enlarged and its circulation greatly increased. It is at the present writing in the fortieth year of its publication, and is in a very prosperous condition. For three years prior to 1883, Dr. A. H. Ohmann-Dumesnil was associated with Dr. Rumbold in the editorial management. A feature of special interest and value in the journal for several years has been the publication of full reports of the discussions at the meetings of the St. Louis Medical Society. These discussions are reported by short-hand, and then corrected and revised by the publication committee of the society, thus securing a complete report of the meetings, and preserving in a permanent form much valuable medical truth that would otherwise fail to be brought before the profession.

The Missouri Medical and Surgical Journal was started in May, 1845. It was under the editorial management of Dr. R. F. Stevens, and was a twenty-four-page monthly, the subscription price being two dollars per annum. Towards the close of the year it passed into the hands of Drs. J. N. McDowell and Thomas Barbour, the latter of whom assumed the entire charge in April, 1846, Dr. McDowell's time being taken up with the preparation of a work on surgery and surgical anatomy. In May, 1847, Dr. Coons was associated with Dr. Barbour in the conduct of the periodical. At the commencement of the third volume the proprietors congratulated themselves on having a subscription-list of three hundred, and upon the fact that during the preceding few weeks they had received "some fifteen or more new subscribers." In September, 1848, this journal was merged into the *St. Louis Medical and Surgical Journal*.

The St. Louis Probe was established in 1850, by Drs. Coons and Atkinson. It had only an ephemeral existence, and we have been unable to learn any particulars in regard to it.

The St. Louis Medical Reporter was established in 1866 under the editorial management of Drs. O. F. Potter and J. S. B. Alleyne. It was a thirty-two-page semi-monthly. It continued for three years, and was then discontinued. It was ably edited and well printed, and illustrations were liberally used. Changes in the publishing house and editorial management had an unfavorable effect, and after the completion of the third volume the publication was discontinued.

The Humboldt Medical Archives was established in 1868 by Drs. A. Hammer and J. C. Whitehill.

It was designed to be an exponent of the teachings of the school of pathology of which Virchow was the leader, and to take an advanced position in all professional matters. Dr. Hammer's connection with the *Archives* ceased at the end of the first year, but Dr. Whitehill continued to edit and publish it until 1874, about which time he left St. Louis. During a part of this time he was alone, but most of the time he had assistant and associate editors, among whom were Drs. E. A. Clark, E. F. Smith, E. H. Gregory, J. S. Moore, L. Ch. Boislinière, E. Montgomery, A. Hammer, J. S. B. Alleyne, and Thomas Kennard. After the first two volumes were published the word "Humboldt" was dropped from the title, and the journal was known simply as the *Medical Archives*.

The St. Louis Clinical Record was established in 1874 by Drs. W. A. Hardaway and A. B. Shaw, the latter of whom only remained in connection with the journal one year. After two years the journal passed into the hands of Dr. W. B. Hazard, who carried it on until the middle of 1882, at which time the publication was discontinued.

St. Louis Courier of Medicine.—In the fall of 1878 a number of physicians in St. Louis, together with some of their friends, formed an association under the style of the Medical Journal Association of Missouri. The object of the association was to establish and sustain a first-class medical journal, which should be devoted exclusively to medical and scientific matters, and maintain the highest possible standard of literary merit with the best attainable mechanical execution. The officers of the association during its first year were John T. Hodgen, president; H. N. Spencer, secretary and treasurer; P. G. Robinson, G. A. Moses, and John P. Bryson, executive committee.

The name chosen for the new journal was *The St. Louis Courier of Medicine and Collateral Sciences*. The first number appeared in January, 1879, under the editorial management of Dr. A. J. Steele, with Dr. W. A. Hardaway as associate editor, and Dr. E. W. Schauffler, of Kansas City, as corresponding editor. At the end of that year Dr. E. M. Nelson was appointed editor, and has filled that position ever since. Drs. G. A. Moses, John P. Bryson, Isaac N. Love, C. A. Todd, W. A. Hardaway, and W. C. Glasgow have been members of the corps of editors for one or more years, the present staff comprising Drs. E. M. Nelson, W. A. Hardaway, John P. Bryson, and W. C. Glasgow, together with several corresponding editors in other leading Western cities.

At the end of the first year the membership of the association was extended and the name was changed to "The Medical Journal Association of the Mississippi Valley." In 1881 the association was formally incorporated under the name of the Medical Journal and Library Association of the Mississippi Valley. In accordance with an arrangement made in the establishment of the *Courier of Medicine*, the exchanges and books for review are preserved in a library, to which all members of the association have free and unrestricted access for purposes of consultation, and already quite a valuable reference library has been accumulated. This is at present kept with the library of the Medico-Chirurgical Society in the hall of the latter. After publishing the *Courier* for two years an arrangement was made with the medical publishing house of James H. Chambers & Co. by which they assumed charge of the business management, while the association retains control of the literary management, appointing the editor and directing the general policy of the *Courier*.

The arrangement has proved a very satisfactory one. The influence of the *Courier* is constantly increasing, and it has become a very handsome property, as well as a credit to those who have been concerned in founding and carrying it on.

The Alienist and Neurologist is a journal devoted to a consideration of affections of the mind and nervous system. It is a quarterly, owned and edited by Dr. C. H. Hughes, whom long experience as superintendent of the State Insane Asylum and years of special study of all forms of nervous disease have qualified to edit such a journal with credit to himself and satisfaction to the readers. *The Alienist and Neurologist* is making a fine success in every way and constantly gaining in reputation and value.

Medical Books.—The following list comprises the titles and authors of the medical books which have been written by St. Louis physicians so far as the editor has been able to ascertain them:

A Practical Treatise on Diseases of the Eye. By B. B. Carter, M.D. Edited, with additions and test-types,¹ by John Green, M.D. Philadelphia: Henry C. Lea & Co., 1875.

Outlines of General Pathology.² By M. L. Linton, M.D. Lectures on Diseases of the Nervous System. By J. K. Bauduy, M.D. Philadelphia: J. B. Lippincott & Co., 1874.

Reports on Yellow Fever. By W. Hutson Ford, M.D. St. Louis: George O. Rumbold & Co., 1879.

¹ Dr. Green's observations and writings on the subject of astigmatism have made his name known to the profession all through this country and in Europe as well.

² This work appeared first in the *St. Louis Medical and Surgical Journal*, under the title of Medical Essays, by L. Afterwards they were reprinted in a volume, and a small edition published for the benefit of his classes.

Prolapse of the Umbilical Cord, its Causation and Treatment.¹ By George J. Engelmann, A.M., M.D., etc. New York: William Wood & Co., 1874.

The Mucous Membrane of the Uterus, with Special Reference to the Development and Structure of the Decidua.¹ By George J. Engelmann, A.M., M.D. New York: William Wood & Co., 1875.

Labor among Primitive Peoples, showing the Development of the Obstetric Science of to-day from the Natural and Instinctive Customs of all Races, Civilized and Uncivilized, Past and Present. St. Louis: J. H. Chambers & Co., 1882.

The Nurse and Mother. By Walter Coles, M.D. St. Louis: J. H. Chambers & Co., 1882.

Lectures on Orthopedic Surgery. By L. Bauer, M.D.

Diseases of the Ear. By A. D. Williams, M.D. Cincinnati, 1873.

Hygiene and Treatment of Catarrh. By Thomas F. Rumbold, M.D. St. Louis: George O. Rumbold & Co., 1881.

Essentials of Vaccination. By W. A. Hardaway, M.D. Chicago: Jansen, McClurg & Co.

Holmes' System of Surgery. American edition. Sections on Injuries of the Chest, by Alfred Poland; and Injuries of the Abdomen, by George Pollock. Edited by Dr. John T. Hodgen.

The American Encyclopedia of Medicine, now in course of publication by William Wood & Co., has articles on Measles and Roetheln, by Dr. W. A. Hardaway, and on Abortion and its Importance to the General Practitioner, by Dr. George J. Engelmann.

Specialties.—A noticeable feature in the history of the medical profession is the remarkable development of specialism within the past few years. The first department to be differentiated from the rest as a specialty was that concerned with diseases of the eye and ear, and for many years this was the only special department represented in St. Louis. Then the treatment of diseases of the throat became more and more prominent as a special branch of practice, and still later the treatment of diseases peculiar to women, of diseases of the skin, and of diseases of the genito-urinary organs has been made more or less distinctly the work of individuals whose peculiar skill or advantages have qualified them as specialists in these departments. The men whose success and skill have so notably developed this tendency to specialism and whose names are identified with their several departments, in some cases with a national or even European reputation, are still among the active workers of the day. They are now making their records, and their fame is still increasing. They are not yet a part of the history of the profession, but when the time shall come in which it may be proper to commemorate their lives and work, it will be to the historian a pleasant task to note and record the eminent success and skill of a considerable number of St. Louis specialists.

In ending this brief sketch the writer is aware that

¹ These works are cited by all recent writers on gynecology and obstetrics as authorities on the subjects treated in them.

many readers will close the book in disappointment at not finding here the names of the middle-aged and younger men of the profession, who are doing the greater part of the practice and are wielding the strongest influence in the profession and among the laity, so far as matters medical are concerned, at the present time. But it has seemed to him that history deals with work done and records completed, and that a history of the medical profession in St. Louis has to do with the men now living and working here only so far as these men were associated more or less intimately with those whose work is done, or as they are identified with institutions which may be considered permanent elements in the life of the city. In accordance with this view it has seemed to him best to leave unsaid much that might with truth and pleasure be said of men with whom he is daily in more or less intimate association, having full confidence that when the time shall come in which their lives shall be a part of the history of their city, able pens will be found to delineate those lives and set them in their proper places.

Homœopathy in St. Louis.²—The pioneer of homœopathy in Missouri was John T. Temple, A.M., M.D., who settled in St. Louis in 1844. Dr. Temple was a native of King William County, Va., and had a classical and collegiate education, obtained at Lexington, Va. He graduated in medicine at the University of Maryland in 1824, and practiced in Washington, D. C., until 1833, at which time he moved to Chicago, Ill., then a frontier post. In 1843, Dr. Temple became a convert to homœopathy, and in the following year, as stated, removed to St. Louis. In 1848 he established the *Southwestern Homœopathic Journal*, which he maintained for two years, until he went to California, where he remained two years. In 1857 he assisted in founding the Homœopathic Medical College of Missouri, and was its dean and Professor of *Materia Medica* and *Therapeutics* until shortly before his death, which occurred in 1877. Dr. Temple was a skillful physician and worthy man, and was known among his fellow-practitioners in St. Louis as the "Nestor of homœopathy." He was a valuable contributor to the medical literature of the day, many of his articles being copied into foreign journals, and was constantly on the alert to defend the cause of homœopathy. The next in order of arrival was Dr. Spaulding, who moved to St. Louis from Flatbush, N. Y., in 1846. He also was a convert to homœopathy, a man of fine attainments, and an excellent physician. He died two years after his arrival.

² Written for this work by Dr. F. T. Knox, of St. Louis.

T. Griswold Leonard.

During the same year four other homœopaths made St. Louis their home,—Dr. Ira Vail, from Kentucky, a fine physician, who remained only a short time, removing to New Orleans, where he obtained a large practice; Dr. Steinestel, an accomplished scholar and excellent physician, who had a large practice, but died in 1849 of cholera; and Drs. Houghton and Hough, partners, from Tennessee. Dr. Hough died of consumption in the following year, and Dr. Houghton removed to New York in 1853.

Dr. J. T. Vastine, a well-educated physician, came to St. Louis from Pennsylvania in 1849. He won many friends to homœopathy, and became a professor in the Homœopathic Medical College of Missouri. He died in 1872, greatly mourned and honored. He was succeeded in his practice by his son, Dr. Charles Vastine.

Dr. Thomas Griswold Comstock,¹ next in order among the homœopathic physicians of St. Louis, was born at Le Roy, Genesee Co., N. Y., July 27, 1828. His parents, Lee and Sarah Comstock, were natives of Lyme, Conn., and his mother was a lineal descendant (seventh generation) of one of the English Pilgrim families that came over in the "Mayflower." His father was a soldier in the war of 1812, and his uncle, the late Dr. John L. Comstock, of Hartford, was the author of Comstock's "Philosophy," "Geology," "Chemistry," etc., standard text-books, which were popular in the schools of thirty years ago. He also served in the war of 1812 as a surgeon.

Young Comstock, after finishing his education at Le Roy, removed to St. Louis, and studied medicine with the late Dr. J. V. Prather, one of the founders of the St. Louis Medical College, and its first Professor of Surgery. Dr. Prather resigned in 1847, and subsequently the late Dr. Pope received the appointment. The present St. Louis Medical College was then the Medical Department of the St. Louis University. Under the tutelage of Professor Prather, Dr. Comstock entered the Medical Department of the St. Louis University, and in March, 1849, received the degree of Doctor of Medicine.

Immediately after graduation he began to investigate the merits of the homœopathic system of medicine, having formed the idea that in the treatment of some diseases it was superior to the "old school." In 1851 he went to Philadelphia, and having attended lectures, graduated at the Homœopathic Medical College of Pennsylvania.

He then returned to St. Louis and began practice, meeting with flattering success, but, regarding him-

self as still a student, he went to Europe a year later, and spent some time at the medical schools of Berlin, Prague, London, Paris, and Vienna. He remained two years at the University of Vienna, and was admitted to the degree of Doctor of Midwifery after a rigorous examination before the faculty of Vienna, made in the German language.

In 1857, Dr. Comstock returned to St. Louis and resumed practice. Although he had adopted the homœopathic system, he became noted for his conservatism, or, rather, a liberal eclecticism which willingly accepted all that seemed to be good in both schools.

During the late war he was appointed surgeon of the First Division of the enrolled militia of Missouri, but he declined the appointment. He has been attending physician of the Good Samaritan Hospital for twenty years, and at present is one of the consulting physicians. He is a frequent contributor to medical journals, and his writings are characterized by exceptional breadth and vigor.

The cares and responsibilities of a large practice do not appear to absorb him to the exclusion of affairs around him, and he exhibits a keen interest in all movements for the benefit of the community. Among the enterprises which have elicited his warm sympathy and support are the Humane Society and the Citizens' Committee. In religion he is an earnest Episcopalian.

A friend of Dr. Comstock, who has known him intimately for many years, describes his character in the following words:

"He is a man of broad intellect and catholic views. Always liberal in thought, he exercises charity where differences begin. He has acquired various cultures, and made large attainments beyond the limits of his profession. Choice and rare objects of art have an unusual interest for him. The idea of beauty in all its forms seems to delight and fascinate him. The world would have lost a first-class physician, but would have gained in the fields of art had he chosen another profession. He possesses a choice library, probably the most extensive and costly of any physician in St. Louis. It abounds in works not only in the mother tongue, but in learned volumes in Latin, French, German, and other languages, in all of which the doctor is very proficient. He is a man of wide and varied reading in every field of thought.

"As a physician, he stands very high. He could not be content with any abbreviated or partial course of study. He has made himself equally master of the allopathic and the homœopathic systems of practice. He has not only an exact and exhaustive knowl-

¹ Prepared by F. H. Burgess.

edge of his chosen profession, but he also has what culture and science do not always give, a curious run of luck. It seems to follow him in all things. He belongs to that fortunate class of men to whom work and study come easily, and is able to indulge in cultivated tastes and beautiful things. Feeling the need of rest and change, he consigns his patients to proper hands, drops all things, runs off to Europe, attends a course of lectures in London, Vienna, or Paris, gathers up the points of medical advancement there, and comes back as quietly as he went, and resumes an immense practice, and all his home work comes to him again. His ideal of a doctor seems to keep him a perpetual student.

"A full, rounded intellect, well developed, and well informed, characterizes the doctor. He enjoys society and clubs and art, but none the less close application to his professional and literary studies. In the very prime of life, there can be no reason why he should not continue to grow intellectually, and in full ripeness of his years become one of the leading physicians in the West."

Although a general practitioner, his specialty in medicine is gynecology, and in this branch he has superior attainments and a large experience.

Homœopathy made steady progress from 1849 to 1857, during which time Drs. B. M. Peterson, D. R. Luyties, E. A. Fellerer, and others appeared on the scene.

It was in 1857 that the charter of the Homœopathic Medical College of Missouri was obtained by Drs. Temple and Peterson, and in this year also Dr. E. C. Franklin moved to St. Louis from Dubuque, Iowa. This gentleman was already well and favorably known in New York, San Francisco, Panama, and Iowa, but his fame has since become widespread as the "chief founder, teacher, and acknowledged authority in homœopathic surgery." It is due largely to his skill as a surgeon and instructor that homœopathic surgery has reached the proud place it now occupies. Dr. Franklin was converted to homœopathy by being himself cured by homœopathic remedies when all others had failed. In 1860 he was appointed demonstrator of anatomy in the Homœopathic Medical College of Missouri. In 1861 he entered the United States army as surgeon; in 1864 was appointed to the chair of surgery in the Homœopathic Medical College of Missouri, and in 1867 published "The Science and Art of Surgery." Soon after this Drs. Franklin, P. G. Valentine, and others succeeded in prevailing upon the city Board of Health to give the homœopaths a day to lecture in the City Hospital. In 1871, Dr. Franklin was appointed surgeon of the

Good Samaritan Hospital, and in 1876 became dean of the Homœopathic Medical College of Missouri. In 1879 he received and accepted a call to a professorship in the Michigan State University at Ann Arbor, where he now resides.

In 1858, Dr. William Tod Helmuth—another physician who has since won a national reputation—came to St. Louis from Philadelphia. At the age of twenty (in 1853) he graduated in medicine at the Homœopathic Medical College of Pennsylvania, and in two years thereafter was Professor of Anatomy in the same college, which position he held until he came West. In 1855 he published a work entitled "Surgery, and its Adaptation to Homœopathic Practice," a late new edition of which is a large handsome volume, and is a text-book in the homœopathic colleges. In 1859 he was appointed to the chair of anatomy in the Homœopathic Medical College of Missouri, and elected registrar of the faculty. He held the same chair until 1865, when he took the chair of theory and practice. About this time he visited Europe, and on his return, finding disagreements in the faculty of the college, he used his influence in 1869 to aid the establishment of a new medical school, to be called the St. Louis College of Homœopathic Physicians and Surgeons. In this new school he filled the chair of surgery until 1870, when he accepted a call to the chair of surgery in the New York Homœopathic Medical College.

It would be impossible, in so brief a history of homœopathy in St. Louis, to give a sketch of all the physicians, but no history would be valuable for reference or correct in facts that did not allude to one other physician, Dr. G. S. Walker.

George S. Walker¹ was born June 19, 1820, in Allegheny County, Pa. His medical training was preceded by a thorough literary course in Jefferson College, Pennsylvania, from which institution he was graduated in 1844. This preliminary training doubtless laid the foundation for those eminent attainments in literature and art by which he has been especially distinguished among the men of his profession, and which, while they adorn his domestic and social life, give added vigor, precision, and breadth to his medical opinions.

After leaving college he taught for two years in the academies of South Carolina and Georgia, thus confirming and establishing his literary tastes and culture, while at the same time he was constantly exploring the field of professional knowledge. To enlarge and perfect his medical acquirements, he devoted the years

¹ Prepared by F. H. Burgess.

G. S. Walker,

of 1846-47 to attendance upon lectures in the schools of Philadelphia, and then began the practice of his profession near Pittsburgh. Soon, however, the gold fever of 1849 broke out, and Dr. Walker was one of its earliest subjects. Yielding to the prevailing excitement for profitable adventure, he became an "Argonaut," and remained nearly three years on the Pacific coast. With a mind stored with reminiscences of the struggles of those exciting days, he returned to the States by the Isthmian route, entered upon another course of lectures in Philadelphia, and was graduated in 1852. In the previous autumn he had been married to Miss A. C. McKain, of Allegheny City, Pa., a lady whose high social qualities and varied accomplishments, and especially her pure and cultivated taste in music and art, have long made her the delight and ornament of the beautiful home over which she so gracefully presides. Of the four children of this union but one survives, a promising boy, who inherits apparently his father's strength, energy, and fine mental balance, with his mother's refined and delicate tastes.

While visiting St. Louis, in April, 1852, Dr. Walker was so much impressed with its advantages as a field of professional labor that he determined to make it his home. He was then of the allopathic school in medicine, and so remained until 1860. The claims of homœopathy having been presented to his attention, he candidly investigated them and became satisfied of their validity. He did not conceal his convictions, and was summoned by his professional brethren to appear before the medical society of which he was a prominent member and answer to the charge of infidelity to their faith. He replied in a defense which has become memorable as the vigorous protest of an independent mind, but, though unable to answer him, they "cast him out of their synagogue." This, however, was an unintentional kindness, for it resulted in placing him at the head of the new school of medicine.

In May, 1861, Dr. Walker entered the United States army as surgeon of the Sixth Missouri Infantry Volunteers, but acted during the greater portion of his service as brigade surgeon under Gen. Sherman.

He has held the chair of obstetrics, or gynecology, in medical colleges of the city for eleven years, occupying prominent official positions in the medical societies of which he has been a member, and has repeatedly been elevated to the presidency of the Society of Homœopaths. He has also been president of the Western Academy and American Institute of Homœopathy, and an honored member of the American Medical Association (allopathic). In these places and relations his profound learning, his sparkling wit and genial humor, and above all

his great talents and accomplishments have made him of the first consideration, and responsibilities have devolved upon him which were as honorable as they were onerous. He is a member of the Academy of Science of St. Louis, and takes a warm interest in all its proceedings, notwithstanding the absorbing demands of a large and successful practice. He is also a member of the American Association for the Advancement of Science. He was for some time associated with Dr. William Tod Helmuth in the editorial labors of the *Homœopathic Observer*, and with Dr. T. G. Comstock in the conduct of the *Occidental*, medical journals published in St. Louis. His lectures, addresses, and orations, of which a number are preserved in permanent form, have attracted the attention of first-class minds throughout the country.

Dr. Walker has a fine physique, is exceedingly fond of field sports, and devotes to them the brief intervals for recreation which he is able to snatch from absorbing professional labor. He has purchased land near Lake Detroit, Minnesota, on which he is about to erect a cottage for summer resort, where, with his family and friends, he proposes to enjoy his few remissions from arduous professional toil.

A career of such unbroken success and distinction would seem to lack none of the conditions of happiness, but Dr. Walker is no exception to the common rule of life. Death has not spared his household treasures, and he has suffered much and keenly from their loss. He has, however, had the consolation in all his afflictions of the wide and generous sympathy of unnumbered friends.

With unimpaired mental and physical health and vigor, Dr. Walker is still devoted to the labors of his profession.

There are upwards of seventy-five homœopathic physicians in St. Louis, a few of whom are devoting their skill to specialties with marked success. Among the latter may be mentioned Drs. J. A. Campbell, oculist and aurist; J. Martin Kershaw, mental and nervous diseases; and S. B. Parsons, surgery. Dr. Campbell, however, is the only one who has entirely given up general practice.

The first homœopathic pharmacy in St. Louis was established by Dr. Wesselhoeft, and the next by Dr. John T. Temple. Subsequently Dr. D. R. Luyties established one, which in 1859 passed into the hands of R. & H. Luyties. In 1861, H. C. G. Luyties, brother of the doctor, became its proprietor, and is still the owner of what has grown from small beginnings to be one of the finest homœopathic pharmacies in the West. Mr. Luyties edits and publishes a journal called the *Homœopathic News*.

In 1867, John W. Munson opened Munson's Western Homœopathic Pharmacy. Under the successful management of Mr. Munson and his chief assistant, William F. Bockstruck, who is now a partner, this has also become one of the prominent pharmacies of the West. This pharmacy also publishes a journal called *Munson & Co.'s Homœopathic Bulletin*.

HOMŒOPATHIC MEDICAL COLLEGE OF MISSOURI.—On the 23d of November, 1857, the General Assembly of Missouri passed an act to incorporate the Homœopathic Medical College of Missouri, located at St. Louis, and appointed the following trustees: John M. Wimer, George R. Taylor, Robert Renick, Samuel C. Davis, and Gen. Bernard Pratte. This charter was proposed and drawn up by Dr. John C. Morgan, and after revision was enacted through the combined influence of Drs. John T. Temple and H. B. Peterson, who were at that time the leading homœopathic physicians in St. Louis. In 1859, by invitation, several of the most prominent representatives of homœopathy in the West met in St. Louis to make arrangements for the establishment of a college under the charter. In accordance therewith the following persons were appointed professors in the first faculty of the college: R. E. W. Adams, M.D., of Springfield, Ill., Professor of Theory and Practice of Medicine; B. L. Hill, M.D., of Cleveland, Ohio, Professor of Institutes and Practice of Surgery; J. Brainard, M.D., of Cleveland, Ohio, Professor of Chemistry and Medical Botany; A. R. Bartlett, M.D., of Aurora, Ill., Professor of Physiology and General Pathology; E. A. Guilbert, M.D., of Dubuque, Iowa, Professor of Obstetrics and Diseases of Women and Children; John T. Temple, M.D., of St. Louis, Mo., Professor of Materia Medica; and William Tod Helmuth, M.D., of St. Louis, Mo., Professor of Anatomy. The officers of the faculty were John T. Temple, dean, and William Tod Helmuth, registrar.

The calamity of civil war determined the board of trustees to close the doors of the college during the years of 1860, '61, '62, and '63. In 1864 lectures were renewed under more favorable auspices than during any of the foregoing sessions, and an entire change of organization was effected in the faculty by the appointment of resident professors. With but few changes in the faculty the college continued to prosper and had little to contend with until the fall of 1869, when, as has been previously mentioned, Dr. Helmuth organized the "St. Louis College of Homœopathic Physicians and Surgeons," with almost an entirely new faculty.

The Homœopathic Medical College of Missouri,

however, still maintained its prestige and popularity, and though the classes in each were small, both colleges labored with determined zeal and vigor to be foremost in the race for educational preferment. After the close of the second year, in 1871 the new college succumbed and closed its doors.

In the spring of 1872 another college sprang into existence styled the "St. Louis Homœopathic College of Medicine and Surgery;" but it met with such feeble encouragement from the profession that the enterprise was abandoned before the lecture season opened.

From this time until 1880 the college was prosperous and harmonious. At the close of the spring session of that year (1880) the managers of the institution, for financial reasons, decided upon a change, and obtained a new charter and a new name, the "St. Louis College of Homœopathic Physicians and Surgeons." This new enterprise, however, did not meet with the approval of all the profession, and accordingly some of the friends of the old college, under the leadership of Dr. William C. Richardson, issued an announcement for the next season, 1880-81, which contained a "Note to the Alumni and Profession," of which the following are extracts: "The faculty and board of trustees to whom were confided, a few years since, the interests and welfare of the Homœopathic Medical College of Missouri saw fit at the close of the last course of lectures, for reasons best known to themselves, to abandon the name and prestige established during an honorable and praiseworthy career of over twenty years. They have organized an entirely new college, under a new name, ignoring the old, thus throwing the alumni out of an acknowledged Alma Mater." . . . "It is now the intention of the present board, under a new charter, to perpetuate the record and maintain the good reputation of the old institution and its graduates." Accordingly the college was re-established under its old name, and for two years both institutions were maintained.

The number of students in both colleges being about equal to and no more than the former classes of the old college, the faculties of both colleges, though they had become somewhat estranged, were finally convinced that, divided, neither college was likely to prosper. The union of the two faculties was therefore proposed and consummated, and the college, under the old name, the Homœopathic Medical College of Missouri, in the fall of 1882 commenced the college term under more promising auspices and with better educational advantages than it had ever had during its long and eventful history. The following are the officers and faculty for the

present year, 1882-83, viz.: C. W. Spalding, M.D., president; S. B. Parsons, M.D., secretary; William Collison, M.D., treasurer; Philo G. Valentine, A.M., M.D., business manager. *Honorary Board of Trustees*, John M. Harney, John H. Crane, Azel B. Howard, Gen. John W. Noble, Hon. E. O. Stanard, Hon. John B. Henderson, Right Rev. C. F. Robertson, D.D., Bishop of Missouri. *Officers of Faculty*, W. A. Edmonds, A.M., M.D., dean; W. B. Morgan, A.M., M.D., registrar. *Faculty of Medicine*, W. A. Edmonds, M.D., Professor of Diseases of Children, and dean; C. W. Spalding, M.D., Professor of Physiology and Clinical Surgery; William C. Richardson, M.D., Professor of Obstetrics and Gynecology; J. Martine Kershaw, M.D., Professor of Brain, Spinal, and Nervous Diseases; James A. Campbell, M.D., Professor of Ophthalmology and Otolary; Philo G. Valentine, M.D., Professor of Theory and Practice; Adolph Ulemeyer, M.D., Professor of Materia Medica and Therapeutics; W. John Harris, M.D., Professor of Clinical Medicine, Hygiene, and Sanitation; Irenæus D. Foulon, A.M., LL.B., Professor of Medical Jurisprudence; J. T. Kent, A.M., M.D., Professor of Principles and Practice of Surgery; W. B. Morgan, M.D., Professor of Anatomy and Demonstration; Lee H. Dowling, M.D., Professor of Chemistry and Toxicology. There have been upwards of three hundred and fifty graduates of this college since its organization.

THE MISSOURI SCHOOL OF MIDWIFERY was chartered in 1875. It holds two sessions yearly, each of twelve weeks' duration, and has a lying-in hospital attached, and a course for physicians desiring to pursue this specialty. The first president was Alfred E. Reiss, M.D., now dead. He occupied the chair of obstetrics, and the same chair in the Homœopathic Medical College of Missouri. He graduated from the latter college in 1868, and went to Europe, where he spent three years in the Obstetrical Department of the University of Vienna, taking the highest honors. He then entered the Prussian army as assistant surgeon, and had charge of the general hospital at Sedan, for the management of which he received acknowledgment and thanks from the eminent Dr. Bilroth. As a lecturer he had good command of language, and was altogether an excellent instructor.

Dr. Wm. C. Richardson was the first secretary, and

is now president of the Missouri School of Midwifery, and also Professor of Diseases of Women and Children, which chair he also held in the Homœopathic College of Missouri. He graduated in the same class with Dr. Reiss. He was for several years editor of the obstetrical department of the *Western Homœopathic Observer*, and was afterwards editor and proprietor of the *Homœopathic Courier*. In 1876 he published a small treatise on "Cholera Infantum, and other Diseases of Children," and in 1878 a text-book on "Obstetrics," which has become a standard authority, not only in the medical schools of this country but of Europe. He is a fine, free, and ready speaker, and a very successful lecturer.

THE GOOD SAMARITAN HOSPITAL was founded in 1857 by the Rev. Lewis E. Nollau, at that time pastor of St. Peter's Lutheran Church. It was opened in a modest way, occupying a small building which contained about seven rooms. For the first few years it was supported mainly through the per-

GOOD SAMARITAN HOSPITAL.

sonal efforts of Rev. Mr. Nollau, aided by voluntary subscriptions principally from among the German population. Dr. E. A. Fellerer was the first physician, and continued in charge until early in 1859, when Dr. T. G. Comstock was also appointed attending physician. These two gentlemen were the medical attendants until 1862. The hospital was first incorporated in 1859, when a new hospital building was begun, the corner-stone being laid in August of that year and finished in 1861. The board of trustees, to whom the credit of erecting the new hospital was due, were Samuel Plant, Russell Scarritt, Francis Whittaker, Adolphus Meier, Frederick Bolte, Francis Hackemeier, and Rev. Louis E. Nollau. The patients

were removed to the new quarters in March, 1861. The building is situated on Jefferson Avenue, at the head of O'Fallon Street, and is a fine edifice, capable of accommodating one hundred and sixty patients. It was scarcely opened when the civil war broke out. Soldiers wounded at the memorable capture of Camp Jackson, and many patients from the military camps, who at that time could not be accommodated in the military hospitals, were admitted. In the fall of 1861 arrangements were made to care for a larger number of patients from the army for a reasonable compensation from the government. Afterwards the board of directors rented the building to the United States government for use as a military hospital for two years.

The hospital was originally intended for a charitable institution, and during the lifetime of Mr. Nollau this idea was carried out as far as practicable, but there being no permanent endowment for its support, it is now maintained in part by patients paying when they have the means, only a limited number being treated gratuitously. Mr. Nollau, the founder, died Feb. 6, 1869.

Besides the two physicians mentioned as having been connected with the institution since its organization, Drs. Helmuth, Walker, Luyties, Gundelach, Franklin, Parsons, Campbell, and others have served at different periods as medical attendants. The hospital has a number of well-arranged rooms, where private patients may be treated in accordance with any practice and by physicians of their own selection.

THE ST. LOUIS HOMŒOPATHIC DISPENSARY was organized in 1864, and was opened in March, 1865, with the following officers, viz.: Dr. C. W. Spalding, president; Mrs. Dr. William Tod Helmuth, treasurer; and Dr. E. C. Franklin, secretary. The board of trustees consisted of Drs. C. W. Spalding, E. C. Franklin, and T. J. Vastine, Mrs. T. G. Comstock, Mrs. W. T. Helmuth, Mrs. G. S. Walker, and Mrs. John T. Temple. A charter of incorporation was procured from the Circuit Court in March, 1866, and a constitution and by-laws were adopted during the same month. Dr. S. B. Parsons was appointed attending physician for the first year. In 1868, Dr. E. C. Franklin was appointed to the entire charge of the dispensary, the duties of which position he faithfully performed for a number of years. The dispensary has been carried on in the building of the Homœopathic Medical College of Missouri, and large numbers have been treated daily by the different members of the faculty. At this free dispensary, during the college term, clinics are held daily, and

patients are examined and prescribed for before the classes.

THE CHILDREN'S HOSPITAL was organized by certain benevolent ladies and gentlemen of St. Louis, with Dr. W. A. Edmonds at the head of the medical department.

HOMŒOPATHIC SOCIETIES.—There are two organizations of homœopathic physicians in St. Louis which are specially worthy of mention, the Hahnemann Club and the St. Louis Society of Homœopathic Physicians and Surgeons. The former is intended for social as well as literary purposes. The latter, which is composed of physicians in the city and vicinity, elects its officers quarterly, except the secretary, who is elected annually. The present secretary is Dr. W. B. Morgan.

Of works by homœopathic practitioners we find the following from the pens of St. Louis physicians:

Helps to Hear. By James A. Campbell, M.D. 12mo, pp. 108. Chicago: Duncan & Brothers, 1882.

Diseases of Infants and Children. By W. A. Edmonds, M.D., etc. 8vo, pp. 293. New York: Boericke & Tafel, 1881.

Richardson's Obstetrics. By William C. Richardson, M.D.

Diseases of the Brain and Nervous System. By J. M. Kershaw, M.D.

A Complete Minor Surgery, the Practitioner's Vade-Mecum, including a Treatise on Venereal Diseases. By E. C. Franklin, M.D., 1882.

The *St. Louis Clinical Review* is the principal homœopathic journal of the city, edited by Dr. Philo G. Valentine.¹

The Eclectic School of Medicine.²—Eclecticism as a distinctive branch of medical practice may be said to have first presented itself for public recognition in St. Louis with the incorporation of the American Medical College of St. Louis in May, 1873. The first session of the college was held in the fall of that year and the spring of 1874. The following gentlemen compose its board of trustees: J. S. Merrell, president; N. C. Hudson, vice-president; Dr. P. D. Yost, secretary; Dr. E. Younkin, treasurer; Dr. Albert Merrell, A. Sumner, Dr. W. V. Rutledge, Dr. John W. Thrailkill, Dr. George C. Pitzer, Dr. W. W. Houser, and B. H. Dye, B.L. The faculty consists of the following members: George C. Pitzer, M.D., dean, Professor of Theory and Practice of Medicine, and Clinical Lecturer at City Hospital and the College; Albert Merrell, M.D., Professor of Chemistry, Pharmacy, and Toxicology, and Clinical

¹ The writer of the foregoing outline of homœopathy in St. Louis is largely indebted to Vol. II. of "Transactions of the World's Homœopathic Convention of 1876" for facts, as well as to various individuals for information furnished.

² The material for this sketch was furnished by Dr. A. B. Merrell.

Lecturer on Diseases of Children at the College; P. D. Yost, M.D., Professor of Obstetrics and Diseases of Women and Children, and Clinical Lecturer on Diseases of Women at the College; E. Younkin, M.D., Professor of Principles and Practice of Surgery and Clinical Surgery, and Clinical Lecturer on surgical cases at City Hospital and at the College; W. V. Rutledge, M.D., Professor of Materia Medica and Therapeutics; T. B. Owens, M.D., Professor of Anatomy and Physiology; John W. Thraillkill, M.D., Professor of Ophthalmology and Otology, and Clinical Lecturer on Ophthalmic and Aural Surgery; J. H. Wright, M.D., Professor of Microscopy and Histology; B. H. Dye, B.L., Professor of Medical Jurisprudence.

Professor Thraillkill came to the city in 1861, and has enjoyed a lucrative practice up to within a year, when failing health compelled his retirement from active professional life. Professor Rutledge came to the city in 1868, and has been in active practice ever since. Professor Merrell moved to St. Louis from Cincinnati in 1871, and Professor Yost came at the time the college started. These gentlemen have been identified with the college since its foundation, and Professors Pitzer and Younkin joined them shortly after the first course of lectures.

The American Medical College has enjoyed uninterrupted prosperity since its foundation, and its graduates now number but a few less than three hundred and fifty. The college was first located on the southeast corner of Olive and Seventh Streets, afterwards at 913 Pine Street, and now occupies a building erected by the faculty expressly for the purpose at 310 North Eleventh Street in 1878, the corner-stone having been laid July 15, 1878.

Among the practitioners of the eclectic school, Dr. John W. Thraillkill published in 1869 a small volume entitled "Essay on the Causes of Infant Mortality;" and Dr. George C. Pitzer published last year one on "Electricity in Medicine and Surgery."

The Dental Profession.¹—The early history of the dental profession in St. Louis is involved in considerable obscurity. From the very nature of the calling, especially when St. Louis was in its infancy, it attracted but little public attention. The profession itself was only in embryo; the individual members of which it was finally composed were only slowly gravitating towards each other, and had not as yet felt the effects of organization and associated action. But the spirit of inquiry had taken strong hold of the in-

dividual members, and where societies and associations had been formed for mutual consultation and improvement they were stimulated to new exertions in the direction of dental progress. The enthusiasm of the leading members of the new profession knew no bounds. No specialty of the healing art had more earnest or more able seekers after truth in its ranks than this.

The earliest regular practitioner of whom any record remains is Dr. Paul, who published the following card in the *Missouri Gazette* of Dec. 21, 1809:

"A well-bred surgeon dentist, Dr. Paul, has the honor of informing his friends in particular, and the public in general, that he is prepared to practice in all the branches belonging to his profession, viz., extracting, cleaning, plugging, and strengthening the teeth, also making artificial ones."

On the 28th of December, 1830, Dr. D. T. Evans informed "the citizens of St. Louis and its vicinity that he has established himself in this place for the purpose of devoting himself to the practice of dental surgery."

When Dr. Isaiah Forbes settled in St. Louis in 1837 there were ten dentists in the city, including Dr. Forbes. Most of these, however, seem to have been transient practitioners, as the next year found them all gone but three, Dr. Forbes, Dr. Edward Hale, Sr., and Dr. B. B. Brown. Drs. Hale and Brown both remained long enough to build up lucrative practices. These three dentists were the only ones who achieved any considerable degree of success in the next seven years, and in them the dental fraternity were well represented. Affable and courteous in their department, skillful in all that pertained to dental operations, and warmly attached to the calling which they had chosen, they exerted a benign influence upon the future of the profession, which has reached down to this day. Dr. Brown left for California in 1849, during the gold mania, and died in Sacramento about 1875. Dr. Hale became known as one of the best practitioners in the Mississippi valley, and remained in practice till about 1864, when failing health compelled him to give up his profession, and a few years afterwards he died in New Jersey. About 1840 Dr. A. M. Leslie located in St. Louis. Although a dentist, he had also been trained as a gold-beater, and he soon turned his attention to making gold foil. Not long afterwards he established a dental depot, having purchased a small stock of goods in the dental line which had been sent out to St. Louis from Troy, N. Y. That was the beginning of the extensive establishment long known in the entire West as A. M. Leslie & Co.'s Dental and Surgical Depot, which has but re-

¹ This sketch of the dental profession of St. Louis was prepared by Dr. Homer Judd, of Upper Alton, Ill.

cently been transferred to the St. Louis Dental Manufacturing Company. Alexander Heburn established a dental depot in St. Louis in 1877 or 1878, and the St. Louis Dental Manufacturing Company has the consolidated stocks of the two former companies, making one of the largest dental establishments in the West. Between 1840 and 1845 the number of dentists in the city was increased by the arrival of Drs. Aaron Blake, Isaac Comstock, J. S. Clark, and Edgerly, and in the next few years Dr. Potts, Dr. Samuel B. Fithian, Dr. H. J. McKellops, Dr. C. W. Spalding, and a little later Dr. H. E. Peebles and Dr. Dunham. Many others in the mean time had made more or less persistent efforts to establish themselves, but failing to meet with sufficient encouragement sought other fields of labor. Drs. Potts, Blake, Comstock, Peebles, Edgerly, Dunham, Barron, and Clark have all passed away, while Drs. McKellops, Spalding, and Forbes are still practicing their profession in St. Louis. These were for the most part men of sterling worth, and it was to a great extent through their efforts, and especially through their liberal and enlightened views as regards the amenities and responsibilities of professional life, that the St. Louis dentists came to be held in so high repute among their *confrères* in the profession throughout the United States. Among them, Dr. John S. Clark was somewhat prominent in the advocacy of new methods of practice. If not the first who made use of rolled cylinders of gold foil for filling teeth, he was certainly entitled to the credit of bringing the new method into general use and carrying it up to a high degree of perfection, but he conferred a much greater boon upon the profession by his investigations in relation to the treatment of teeth with dead pulps. He claimed that he first made use of barbed broaches for the removal of dead and decaying pulps, and for carrying disinfecting agents into the pulp canals, thus preparing them for being filled in such manner as to avoid subsequent inflammation and formation of alveolar abscess. Dr. Clark spent several years in New Orleans, where he published a dental journal, but subsequently returned to St. Louis, where he died in 1866. Dr. Forbes is at this time the oldest practitioner in the city, having been identified with nearly all of the beneficent and progressive efforts of the profession for forty-six years. He had constructed, upon plans furnished by himself, a dental chair in 1838, which is still in existence, and which shows unmistakable evidences of constructive ability, and adaptation to the purposes for which it was intended. It is now in possession of Dr. Fisher, on Washington Avenue.

Dr. C. W. Spalding reached St. Louis April 4,

1849. He was an earnest advocate of the use of cylinders in filling teeth, and had for a long time a lucrative practice; was for several years a professor in the Ohio College of Dental Surgeons at Cincinnati, and was president for one year of the American Dental Association during its early history.

Dr. McKellops was energetic and tireless in his efforts to attain a high position as an operator, and at an early period of his professional career acquired an enviable reputation among his St. Louis associates, which gradually extended throughout the United States.

He has been for many years an active member of the American Association, of which he has been elected president. Although Dr. McKellops was closely associated with the group which has just been considered, he is no less closely identified with the next group, which comprises the active members of which the profession is now composed.

The period from 1840 to 1865 was one during which were wrought many changes of the most vital character in the dental profession, and in no other place were these changes more marked than in St. Louis. Before the commencement of this period dentists were to a great extent unassociated, and, as an almost necessary consequence, selfish and reticent, each one claiming that he was in possession of the knowledge which enabled him to perform many important operations which others could not perform. Operating-rooms and laboratories were closed with the most sedulous care against all intruders, lest some less enlightened practitioner should avail himself of the opportunity of inspecting instruments, and perhaps also gain some knowledge of methods of manipulation, and thus become more formidable as a competitor in business.

The St. Louis dentists, almost to a man, discarded these narrow and unprofessional views, and no body of practitioners in any country exerted a greater influence in bringing about those radical changes which resulted in a complete revolution in sentiment and practice throughout the whole profession. Organization into associations, thereby bringing the members into closer relationship with one another, aided these beneficent movements, and the formation in 1850 of the St. Louis Dental Society was an important step in the development of the profession.

This society was organized with Dr. Dunham as presiding officer, and has ever since numbered among its members the leading practitioners of the city. In 1858 the *American Dental Review* was established by A. M. Leslie, and was edited by C. W. Spalding, Isaiah Forbes, and Henry E. Peebles. The *Review*

was at first a quarterly, and did good work until 1863. It was conducted with ability, and exerted a powerful influence for good upon the mass of the profession. For about a quarter of a century the standing of the dental fraternity was determined by those who have been already mentioned, but about 1865 the influence of a younger class of practitioners began to be felt, which has steadily increased as the years have passed by. Of these some have attained a degree of excellence and skill in their operations which cannot be surpassed by any other operators wherever found, and although the number of those who have reached the goal which is nearest to perfection is small, it is not relatively smaller than in the most favored cities of this or any other country. At the commencement of this epoch in the history of the profession, or shortly afterwards, societies of dentists had been formed in nearly all of the States and cities in the Union, the members of which met at stated periods, when every practitioner freely imparted what he had gained by experience and observation to his fellow-members, in the true spirit of professional fraternity. The St. Louis dentists took an active part not only in the city and State societies, but also in the American Association, the Western and Mississippi valley societies, and the State associations of the neighboring States. The Missouri State Association was organized in 1865 in St. Louis, principally through the efforts of St. Louis dentists, and it is still wielding a great influence for good upon the profession through the State.

The Missouri Dental College, of St. Louis, was organized in July, 1866, chartered the following month, and reincorporated April 21, 1881. The present officers are H. H. Mudd, president; A. H. Fuller, secretary; G. Baumgarten, treasurer. The location of the college is on the northeast corner of Seventh and Myrtle Streets, in the building of the St. Louis Medical College, and the infirmary is situated on the adjoining lots on Myrtle Street. The plan of organization in this school differed somewhat from that of other dental schools in that it was more closely connected with the medical system of education, the students being required to take the regular medical course of the St. Louis Medical College, so far as the chairs of anatomy, physiology, chemistry, materia medica, and surgery were concerned, while the peculiar training which was necessary to fit them for the special practice of dentistry was furnished by a corps of professors and demonstrators who were dental practitioners.

The dental school, however, was a separate organization, and managed its own business concerns, the occu-

pants of the medical chairs named above being also members of the dental faculty. The theory upon which the school was founded was that the proper basis of a dental education was the same as of a medical education; that a knowledge of anatomy, physiology, chemistry, materia medica, and surgery was necessary in both; that the best possible opportunity for obtaining a knowledge of these branches was found in a medical school, and that the special instruction should commence where the divergence from the courses in general medicine took place which led to the studies that were required by the special dental practitioner. The importance of this "new departure" will be more clearly appreciated when we turn for a moment to the history of the dental schools which have been subsequently established.

A few years after the Missouri School had commenced its operations, the Harvard Dental School was established upon a similar basis in connection with the Medical Department of Harvard University, another essentially upon the same principle at Ann Arbor in connection with the Medical Department of Michigan University, and soon another connected with the Medical Department of the University of Pennsylvania, at Philadelphia, besides schools connected with medical colleges and essentially upon the same plan established at Indianapolis, Iowa City, Kansas City, Chicago, and San Francisco. Since then a majority of the dental colleges in this country have followed to a greater or less extent the example set them by the Missouri Dental College. The high prices charged for admission to the Missouri School, together with the rigid examinations to which students are subjected before they can obtain a degree, are not favorable to the production of large classes, but no school has turned out a larger proportion of good operators or more judicious practitioners than this. The first faculty of the Missouri Dental College was made up of the incumbents of the five chairs of the St. Louis Medical College mentioned before, while the three special chairs were filled by Drs. Henry E. Peebles and William H. Eames, and Dr. Homer Judd, who was also dean of the faculty.

The first president of the college was Dr. Isaiah Forbes, who filled that position for fifteen years. His successor, the present incumbent, is H. H. Mudd, M.D. The present dean is H. H. Mudd, M.D. The first secretary was Frank White, M.D.; the present secretary and treasurer have already been named.

The faculty is constituted as follows: Isaiah Forbes, D.D.S., Emeritus Professor of Institutes of Dental Science; A. Litton, M.D., Professor of Chemistry and Pharmacy; J. S. B. Alleyne, M.D., Professor of Ther-

apentics and *Materia Medica*; G. Baumgarten, M.D., Professor of Physiology; H. H. Mudd, M.D., Professor of Anatomy; W. H. Eames, D.D.S., Professor of Institutes of Dental Science; A. H. Fuller, M.D., D.D.S., Professor of Operative Dentistry; W. N. Morrison, D.D.S., Professor of Mechanical Dentistry; J. G. Harper, D.D.S., Demonstrator of Operative Dentistry; C. Mathiason, D.D.S., Demonstrator of Mechanical Dentistry; J. Friedman, M.D., Demonstrator of Chemistry; H. H. Mudd, M.D., Demonstrator of Anatomy.

The new infirmary erected one year ago, in connection with the dispensary of the medical college, affords every facility for practical laboratory work; and a dental clinic has been organized, which has already become a valuable means of instruction, besides affording relief to a large number of charity patients.

The curriculum is so arranged that the dental student can, by the study of a few additional subjects, put himself in a position to enter, at the completion of his dental course, the third or senior class of the St. Louis Medical College, and eventually obtain the degree of Doctor of Medicine by one additional year's work.

In 1869 the *Missouri Dental Journal* made its first appearance. It differed somewhat from other dental journals in that each number was divided into three separate departments, each one of which was under the supervision of one or more members of the editorial corps. It was hoped that by this method each department would receive adequate attention, and that none would be neglected, as had too often been the case with the older journals. The success of the *Missouri Dental Journal* in finding favor with the profession was demonstrated by the rapid increase in the number of its subscribers, as in a few years its patrons were found in nearly every State in the Union, as well as in South America, Europe, Asia, and elsewhere. The *Journal* was edited by Dr. Homer Judd, assisted in the operative department by Drs. Henry S. Chase and Edgar Park, and by William H. Eames and William N. Morrison in the mechanical department.

Most prominent as an inventor of useful implements in the profession of St. Louis stands the name of Dr. James Morrison, the senior member of the former firm of Morrison Brothers. After practicing a few years in St. Louis, he turned his attention to the construction of dental chairs and other dental appliances. He went to England, where he remained six years, during which time he invented and patented a dental chair, which was admirably adapted to meet the wants

of the dental practitioner. He then returned to St. Louis, and from 1869 to 1873 was engaged in constructing an iron chair, for which it is claimed that it has the greatest range of motions of any chair brought out before or since, and which is now in very general use. His next effort was to construct a dental engine, by means of which a rotary motion could be conveyed to a variety of instruments from a fixed lathe, making use of a flexible shafting and jointed arm, with belts and pulleys, in order to enable the operator to use the engine in his operations within the mouth. This effort was a complete success, and a dental engine constructed essentially upon the Morrison plan is now considered an almost indispensable appliance in every dental office. Seven different patents were obtained by Dr. Morrison upon his various improvements. Dr. William N. Morrison claims to have constructed the first gold crown of a tooth from heavy plate gold, and he has also been much interested in testing the feasibility of replanting and transplanting teeth, which has attracted considerable attention during the last ten or twelve years in this country.

Dr. Bowman has been quite prominent among the dentists of the West as an earnest advocate of the use of gutta-percha dissolved in chloroform for filling pulp canals, especially when the canals are very small.

Dr. Homer Judd, whose name figures prominently in the history of the dental profession of St. Louis, was born at Otis, Berkshire Co., Mass., March 29, 1820, the son of Asa and Ada Judd. The Judd family emigrated to Massachusetts from England at an early period, and a genealogical record of the family has been published which embraces more than eighteen hundred names, and extends down to the year 1845. Dr. Judd's father, Asa Judd, was a farmer of respectable standing, and represented his town several years in the General Assembly of Massachusetts. Homer attended the common schools of the neighborhood, and afterwards enjoyed the higher advantages of Lee and Worthington academies. In 1847 he graduated from the Berkshire Medical College at Pittsfield, Mass. He was a good student both at the academies and at college, and in addition to the Greek and Latin learned during his scholastic course, has since acquired a knowledge of the French, Spanish, German, and Italian languages, and some acquaintance with Hebrew and Sanscrit. His tastes, in fact, have always had a literary cast, and he has spent much time in study and research.

Dr. Judd commenced the practice of medicine and dentistry at Ravenna, Ohio, but after two years' residence at that place he removed to Santa Fé, New Mexico, and was the first professional dentist to fill

a tooth in that Territory. After remaining there one summer he returned to Ohio, and subsequently moved to Warsaw, Ill., where he practiced medicine and dentistry for twelve years. At Warsaw he served as a member of the school board for several years, and one year as superintendent of the public schools. In 1847 he became a member of the Independent Order of Odd-Fellows at Ravenna, Ohio, passed through the chairs of his lodge at Warsaw, and was chosen as its representative to the Grand Lodge which met at Chicago in 1859. He then removed to St. Louis, where for many years he was actively engaged in the practice of dentistry, and was looked up to as one of the leaders in his profession. Dr. Judd has been called upon by his brethren to fill a number of important positions, among them those of president of the American Dental Association, Missouri State Dental Association, and St. Louis Dental Society, dean of the Missouri Dental College for seven years, and editor of the *Missouri Dental Journal* for five years.

During the civil war he served as acting assisting surgeon, United States army, on the hospital steamers running to Vicksburg; and after the battle of Shiloh, Dr. Judd offered his services and was employed as one of the four surgeons charged with the care of five hundred wounded soldiers on board a hospital steamer. His labors in this connection were so arduous that his health became impaired, and he was compelled to visit Minnesota for rest and recreation. Subsequently he was appointed surgeon of the Fortieth Regiment Missouri Volunteers, and served with them at the battles of Franklin, Nashville, and Spanish Fort. For some months after the close of the war he remained in the service, being stationed at Huntsville, Ala. In August, 1865, he was honorably mustered out of service, and returned to St. Louis, where he resumed the practice of dentistry.

Dr. Judd now resides at Upper Alton, Ill., and is justly regarded as being one of the most distinguished men in his profession. He is a member of the American Medical Association, St. Louis Medical Society, St. Louis Academy of Science, American Dental Association, St. Louis Dental Society, and various other associations, being also an honorary member of the California, Illinois, Iowa, Sixth District of New York, and other dental societies. In March, 1853, he was married, in Pittsfield, Ill., to Miss Emily F. Hodgen, of that place. They have had three children,—one son, who died at the age of six years, and two daughters.¹

Public Health in St. Louis—the Epidemics of the City.—St. Louis has become a very healthy city from a very unhealthy one, and this change, which has taken place since the adoption of a system of general drainage, is probably due to the fact that the porous underlying rock on which the city stands is dry and permits foul matters and poisonous moistures to filter through it speedily. There seems to be a general consent of opinion as to the wholesomeness of the Mississippi River water for drinking purposes, and the climate of the city, although changeable and subject to sudden and extreme periods of heat and cold, does not appear to be provocative of pulmonary affections. Malarial and intestinal disorders have very generally been ameliorated with improved sewerage and good water, and these facts represent probably about the sum of the advantages which St. Louis has over competing cities from a sanitary stand-point. Of course more is claimed, as, for example, this, from a newspaper in April, 1880,—

“Dr. J. Berrien Lindsley, of Nashville, Tenn., member of the sanitary council of the Mississippi valley, asks the very pertinent question, ‘How is it that St. Louis is, by its mortality reports, shown to be the most healthful large city in the world?’

“The question of Dr. Lindsley, so often asked, is certainly capable of an answer which will perfectly elucidate the causes, and it is worth being answered. In the first place, the geographical position of the city favors its sanitation. Near the centre of a valley extending from the Northwest mountains to the Gulf of Mexico, traversed by an immense and rapidly-moving current of water, which occasions a constant series of atmospheric currents of frequent alternation and in velocity of from five to seventeen miles per hour, weekly mean, the pure, almost frosty air of the mountains sweeps to the gulf, alternating with the breezes from that warm sea backwards to the north, thus preventing, as a usual thing, any prolonged season of very high or extremely low temperature. It is exceptional that we suffer from prolonged hot or cold seasons, although we may at times have to contend for a short space with both extremes. While this constant aerial movement tempers the atmosphere, it serves also to remove constantly the exhalations of a large city, replacing the foul with fresh air, which, by our system of streets and alleys, permeates every nook of our domiciles.

“Our streetage is in excess of any other city. The squares or blocks are small, few larger than three hundred feet square, each square or block intersected by broad paved alleys, which secure free ventilation to the rear of all dwellings.

“Secondly, the topographical features of the city are, in the main, most favorable both to underground artificial and surface natural drainage. From the river-front westward the ground rises in gradually increasing series of undulations, the surface of porous clay resting, at varying depths, upon a limestone substratum. The elevations permit of an admirable system of sewerage, which extends to a length of about two hundred miles (the last official report is 195.26 miles), being daily extended. The law requires, and the requirement is complied with, that every house shall be connected with the sewer wherever it can be reached, so that with few exceptions, and these in the outskirts of the city, all foul matter is washed directly to the river by

¹ The above sketch of Dr. Judd was prepared by a friend of that gentleman, at the request of the author of this work.

twenty-five million gallons of water, which is daily furnished by the water-works, in addition to the varying rainfall.

“The natural drainage is favored by our lack of what is called good paving, the loose macadam allowing rapid penetration to the porous clay, through which the water finds ready underground access to the neighboring streams. Besides favoring water drainage, the configuration of the city site, as shown by a physician of the city, favors another very important drainage in the form of surface air-currents, diurnal, and especially nocturnal, when the heavier air, falling to the ground, occasions movements which simulate those of fluids, creating, even without wind, constant change, as the heavier atmosphere, sinking toward the lower outlets, is replaced by the lighter, newer air. St. Louis has no need for crowding its population, and does not. There are no underground tenements, those lurking-places and breeding-nests of diseased minds, morals, and bodies, and indeed but very few above-ground tenements such as most large cities are cursed with. Thousands of the laboring class own their homes, and, with few exceptional localities, dense crowding is unknown, and even then it does not compare with what is considered crowding in other cities.

“Another most important factor in causing good health is an abundance of water unequalled for healthfulness. It is a common joke for the citizens of the North and East to ridicule the hue that our drinking-water at times possesses, but it is a fact well known to seamen that no water throughout the world is as self-preservative as that which stains the blue waters of the gulf for miles beyond the jetties. A cask of Mississippi water may travel a year, and at the last be sweet, pure, and wholesome. It is consumed at the rate of more than fifty gallons per diem to each person, estimating the population at half a million.”

To these things must be added good food, abundant, cheap, and various; a frugal working class, having good wages, steady and constant employment, temperate habits, and the domestic ways of the Germans, and thus securing a good degree of exemption from the nervous afflictions of the average American people.

The claim that a vastly improved condition of the public health of St. Louis has resulted from a more effective sanitary and drainage system is certainly substantiated by the results of the following tables, when we eliminate from them the vitiated figures which prove nothing whatever. It is to be observed that each of the census years happens to be bad for comparison, showing a heavier mortality bill than the years preceding and succeeding it:

Year.	Population.	Mortality.
1847.....	47,974	2400 ¹
1848.....	2425 ²
1849.....	63,471	8423

1877.....	500,000	5560

Here is the evidence of a very substantial, not to say remarkable improvement, and it accords with the development of the sanitary improvements. The returns of mortality statistics only begin in 1847, in which year we have the data for eight months, on the basis of which the deaths for twelve months that year were 3600 in a population of 48,000, in round numbers, equal to a rate of 75 in the 1000. In 1848 the rate was about 41.6 in a thousand; in 1849 (the cholera year) it was 132.7 per thousand, or 13¼ in a hundred. In 1850 (reflex cholera year) the rate was 58.5; 1860, it was 38.5; 1870, for population returned, 21.5, for actual population, 26.67; 1880, the total was 7035 in a total of 350,000, equal to 20.1 per thousand. The steady and persistent ratio of amelioration is very apparent in these figures, in which, besides, we have presented the maximum of adverse circumstances and the minimum of population.

The proper mortality statistics of St. Louis, as has been observed, do not begin until 1847, and we have only fragmentary data relating to antecedent periods, such as may be gleaned from the meagre chronicles and from the newspapers. The only great epidemic that has visited St. Louis was the cholera in 1849, when the disease more than decimated the people. The cholera was severe also in 1866, and its effects were felt at two or three other dates. Of other epidemics we have no certain data, but on several occasions a bilious form of malarial fever appears to have prevailed with great severity, and to have been very fatal. This was the case probably in 1821, and the Spanish garrison seems to have suffered considerably at times.

The smallpox has visited St. Louis at regular intervals, and once or twice has been epidemic. This seems to have been the case in 1801, which year is known in the annals of the village as “*l’annee des picotés, or de la picoté*” (year of the pitted, or smallpox year). There are no details of this visitation, but it was repeated several times, the Mississippi River providing a thoroughfare for its travel, such as

this loathsome disease likes to take possession of. Inoculation began to be superseded by vaccination about the time that St. Louis became an American town. In 1803 the doctors of Philadelphia had issued a circular to the whole profession, inculcating the virtue and duty of vaccination. That circular is as follows:

“PHILADELPHIA, April 12, 1803.

“We, the subscribers, physicians of Philadelphia, having carefully considered the nature and effects of the newly-discovered means of preventing, by vaccination, the fatal consequence of the smallpox, think it is a duty thus publicly to declare our opinion that inoculation for the kine or cowpox is a certain preventive of the smallpox, that it is attended with no danger, may be practiced at all ages and seasons of the year, and we do, therefore, recommend it for general use. John Redman, A. Kuhn, Benjamin Rush, Benjamin Say, C. Wistar, Jr., John R. Coxe, S. F. Conover, E. Perkins, M. Leib, F. Pascalis, James Dunlap, T. T. Hewson, Charles Caldwell, W. P. Dewees, Isaac Sermon, J. P. Minnick, Adam Seybert, W. J. Jacobs, Isaac Cathrall, John Kmeele, J. C. Rousseau, René La Roche, Elijah Griffiths, G. F. Alberti, Joseph Strong, W. Shippen, Samuel Duffield, Thomas Parke, P. S. Physiek, S. P. Griffiths, J. Woodhouse, P. E. Glentworth, William Currie, John Porter, James Stuart, James Proudfit, James Gallaber, Thomas C. James, B. S. Barton, George Pfeiffer, William Barnwell, James Mease, John C. Otto, J. Reynolds, J. Church, A. Blayne, William Budd, Joseph Pfeiffer, Edward Cutbush.”

“*Philadelphia Dispensary*.—The attending and consulting physicians have informed the managers ‘that they had for these eighteen months past inoculated for the cowpox, and found it mild, unattended with danger, and a full security against the smallpox, and expressing their wishes that the superior advantages of the cowpox may be fully experienced by the objects of this charity.’ Therefore, *Resolved*, That we do entirely accord with the sentiments of the physicians, and earnestly recommend to the poor of the city to embrace the means now offered of preserving themselves and families from a dangerous and loathsome disease by the newly-discovered and happy mode of inoculation for the cowpox, which will be daily performed by the physicians at the dispensary.

“Published by order of the board of managers,

“WM. WHITE, *Pres.*

“Aug. 25, 1803.”

Not long after the establishment of the *Missouri Gazette*, as heretofore stated, Dr. Saugrain, the leading physician of St. Louis, a man of great scientific attainments and liberal culture, published a card, offering his services in vaccination, and alluding to the above-quoted circular as if it were indeed (as it was) a convincing and final argument.

On the 30th of October, 1822, the *Missouri Gazette* published the following mortuary statistics of St. Louis, the first we have been able to come across:

“The number of interments in this town from the 17th of March last to the 29th inst., in the several burying-grounds, amounts to one hundred and three, as appears by the following statement:

“Number of interments in the Catholic burying-ground from the 17th of March to the 29th of October:

Male adults.....	16
Female adults.....	9
Children.....	28
	— 53

“In the burying-grounds out of town:

Male adults.....	33
Female adults.....	11
Children.....	2
	— 46

“From the hospital:

Age and sex not specified..	4
	— 4
Total.....	103

“It is worthy of remark that most of the adults buried in the Catholic churchyard were of an advanced age. Of twenty-five, the whole number, two, a man and his wife, were considerably over ninety, three over seventy, and several over sixty. It is observable also that a majority of burials in that ground were children.

“In the other burying-grounds it seems that almost the whole number of burials during the time above specified were of grown persons, and two-thirds of them males.”

These are pretty good data, and they do not show by any means a good bill of health. The population of the town in 1822 did not exceed 4500. It was estimated at 4000 in 1820, and 103 deaths for seven months and a half means 165 deaths per annum, equal to 36.66 per 1000 of population.

On Aug. 20, 1823, was passed the first ordinance of the new city looking to an effectual mode of gathering the actual statistics of mortality. The title of this is sufficiently definite,—

“An ordinance to compel a report of the deaths in the city of St. Louis.” In this ordinance it was provided that every practicing physician or association of physicians within the city shall, on the Monday of each week during the months of June, July, August, September, and October, and the first day of every other month in each year, make a report in writing to the mayor of the city of each death happening under his or their immediate notice, stating in such report as accurate as may be the disease or cause of death, age, sex, name, and length of residence of deceased within the city.

This was intended to give fuller effect to a previous health ordinance looking to the annual appointment of a health commissioner for each ward, “whose duty it shall be, under the direction and superintendence of the mayor, to watch over the health of the city, and to carry into effect” the various ordinances relating to their functions.

In 1832 the cholera made its first appearance in this country, and after devastating the Eastern seaboard, traveled westward to the Mississippi. Its dreaded approach was not unheeded by the citizens of St. Louis, who, on September 10th of that year, convened in town-meeting, with the following result:

“Town-meeting, Monday evening, Sept. 10, 1832. Pursuant to public notice previously given, a large and respectable meeting of the citizens of St. Louis assembled at the town hall for the purpose of taking into consideration measures for cleaning the city, to avert as far as possible the dreadful disease called cholera.

"Gen. Bernard Pratte was called to the chair, and Dr. H. L. Hoffman appointed secretary. On motion of Dr. H. Lane, an address from the special medical Board of Health of New York was read for the information of the meeting.

"Mr. Cohen, Col. Strother, Mr. Rule, N. Newman, Esq., Mr. Grimsley, and Dr. H. Lane severally addressed the meeting, when, on motion of J. Newman, Esq., the following resolutions were unanimously adopted:

"Resolved, That the chair appoint a committee of ten to report to the Board of Aldermen such measures as they may deem necessary for cleaning and purifying our city, and such other measures as they may think requisite to avert the dreadful disease now raging in our Eastern cities, and that Gen. Pratte be chairman of said committee. Thereupon the chairman appointed the following gentlemen: Dr. William Carr Lane, Dr. C. Campbell, T. Grimsley, Edward Tracy, Thomas Cohen, John Newman, Esq., Col. Strother, N. Ranney, and William K. Rule."

In a short time the disease invaded the town, and the *Missouri Republican* said, about a month after the town-meeting, that,—

"we had hoped to be able to furnish a complete report of the number of cases and deaths since our last publication, but we find it impracticable. The physicians, whose duty it is to report daily, cannot obtain time from their professional duties to attend to this requisition. All of them are unwittingly engaged in the discharge of their cheerless labor. The whole number of cases reported since the 9th instant up to last evening is 93, of which 33 have terminated fatally."

On the 6th of November we find the following happy report:

"The cholera is rapidly disappearing from among us, very few cases having occurred in the past week, and those few in a comparatively mild and mitigated form. Many of our citizens fled from the disease, and are scattered throughout the surrounding country. We hope they will find themselves in as much safety at home. Some of our city officers have thought it best to retire to the country and take care of number one. As they no doubt take a lively interest in the welfare of their constituents, and will be glad to hear how we get along without them, it is proper to state that the people of the city have borne the deprivation of their services with fortitude. The remaining public authorities, aided by the zealous charity of the reverend clergy and of private individuals, have done much for the interest of the city and for the cause of humanity. The sick have been 'visited,' tho dying comforted, and the dead decently buried.

"The clergy have been active and zealous in relieving the sufferers, and especially the Catholic priests have been untiring in the work of kindness. Day and night they followed close upon the track of the destroyer, ready to administer to the sufferers the comforts of both worlds. But, above all, that pious and self-devoted band, the Sisters of Charity, deserve and will receive the thanks of the community. In addition to the regular hospital in their care, they have volunteered to take care of the cholera patients, and while many others, much more responsible to society, thought only of their own safety, these excellent persons courted the danger and labor and privation, and all for 'the luxury of doing good.' Truly their reward is not here.

"We should be doing injustice to our own feelings, we should do injustice to the feelings of our whole community if we were to pass unnoticed the excellent conduct of the medical faculty

throughout this trying emergency. They were incessantly engaged in the duties of their profession, and most of them were allowed but little rest during the two weeks in which the disease prevailed with the greatest violence. They as cheerfully visited the abodes of infamy and misery as the residence of the more wealthy citizen, and to all who asked their time and talents were assiduously devoted, without the prospect of fee or reward. Their services will long be remembered by our citizens."

And at the end of the next week the last vestige of the disease had disappeared.

But St. Louis did not escape so lightly when visited by the cholera in 1849. The epidemic of that year was terribly fatal, and we do not think that even the records of mortality from yellow fever in New Orleans can show a parallel degree of severity in an attack of pestilence. This year was one which "old inhabitants" will not soon forget, for it was fraught with peculiar disasters. In London the great fire followed the plague and did service as a purifier, thus making amends in some degree for the havoc, ruin, and calamity it wrought. But in St. Louis, in 1849, the plague followed the fire. At least, although the cholera had begun to rage before that disaster, it did not rise to its greatest height until several weeks after. The day of the fire was the 17th of May; the cholera had made its first appearance in the last days of December, 1848. The first week of January, 1849, there were 8 deaths from cholera reported, one-eleventh of the total mortality. In the week ending July 2d there were 903 deaths, 619 from cholera, showing a very sickly season independent of the epidemic. For the week ending July 16th the deaths were 867; from cholera, 639. On the 10th of July the deaths from cholera alone were 145, a very high death-rate indeed, if it was ever equaled in any city of the same population outside the tropics. The large increase of deaths from other causes besides cholera proceeded from malaria, nervous and physical exhaustion in consequence of anxiety, loss of rest, and nursing, and from what the doctors called bilious diarrhœa, doubtless the well-known choleraic disorder of the bowels, modified by climatic and malarious complications, which always seem to attend upon an epidemic of cholera. During the week of the maximum intensity of the disease—that ending July 16th—the deaths from cholera alone were at the rate of 36,400 per annum, 57.3 per cent. of the entire population. The deaths from all diseases were at the rate of 47,944 per annum, 75.5 per cent. of the entire population.

The contemporary journals give what is probably the best, certainly the most graphic, history of the ravages and desolations of this epidemic. But, preliminary to quoting these, it will be best to give an

abstract of the corrected mortality statistics as they are given, in a revised form, in the *Western Journal* for 1851, pp. 264-65:

The first mention of the appearance of the disease is in a journal of the date of January 19th, in which we are told that,—

"Since our last we have ascertained that five deaths from this disease have occurred in this city during yesterday and the evening previous, and one new case on Collins Street, reported to the health officer. Two of the deaths were in a family on Sixth Street, between Locust and St. Charles, one at the corner of Eighth and Wash, one on Wash, between Eighth and Ninth, and one at the Sisters' Hospital. From two of the families whose death occurred several members were sent to the hospital, prestrated with the disease; these, we are informed, are cases of local cholera. In view of the appearance of this disease in our city four additional street inspectors were yesterday sworn in by the recorder."

But there was no panic; the disease was allowed to run along. There is no further mention of it until

May 5th, when it is simply said that the sexton of a single cemetery reported to the register ten interments of persons dead of cholera in twenty-four hours. On May 11th the fact that the disease was making progress was recognized:

"The physicians report to the register the existence of twenty-six new cases of cholera from seven o'clock P.M. of Wednesday to six P.M. of Thursday. During the same time nine deaths from cholera were reported to the register, but we are inclined to believe the entire return at the end of the week from the several places of interment will show a greater mortality than is here set down."

May 13th,—

"Forty-seven cases were reported to the city register yesterday, of which twelve proved fatal. Nine of the above cases were taken from the boats, of which three have died."

May 14th,—

"At six o'clock last evening twenty-four cholera cases had been reported at the register's office, six of which terminated fatally. This is a falling off from the average mortality of last week of four per day.

"The city having purchased of John A. Stephenson the steamer 'Hannibal' for the purpose of using her as a quarantine or a hospital boat, she was towed down to the quarantine station on Wednesday evening by the steamer 'Whirlwind.' One great difficulty which has heretofore been much complained of has been the trouble of landing steamboats at the island, and on this account boats have sometimes violated the quarantine regulations. This move on the part of the city will obviate this difficulty entirely, as it will be as easy to land beside the quarantine boat as at the wharf. It is intended, we are informed, to use the boat as a hospital in case of an epidemic. She is to be moored at a point near the foot of Dunan's Island, where there is plenty of water for the largest class boats at any season of the year. The price paid for the 'Hannibal' was ten hundred and fifty dollars, which, in addition to the expense of towing her down and mooring her, will make her cost about eleven hundred dollars. The machinery of the 'Hannibal' had been removed previous to the purchase. Dr. Leavenworth, quarantine physician, is having his laboratory and lodgings removed to the boat, so that at all hours of the night and at all times of the day he will be on hand for the examination of arriving steamers."

May 16th,—

"The city register makes the following statement in regard to the health of the city:

"The whole number of deaths from all causes for the seven days ending Sunday night, the 13th inst., was 273, of which 181 were from cholera. The interments daily from the last disease were as follows:

Monday, May 7.....	16
Tuesday, May 8.....	36
Wednesday, May 9.....	25
Thursday, May 10.....	30
Friday, May 11.....	33
Saturday, May 12.....	19
Sunday, May 13.....	22

Total in seven days.....	181
From other diseases.....	92

Whole number..... 273

"The number of deaths reported for Monday, the 14th inst., was twenty-one, being eleven less than on the 8th, the heaviest

day, showing a decrease in this particular disease. The entire number of deaths on Monday was thirty-six. This is really frightful mortality, and although it may be argued that the pestilence is abating in the number of its victims and in its virulence, it still has terrors enough to alarm most any one."

Next day after this, May 17th, the great fire took place, and public attention was so exclusively directed to that as to leave the cholera out of sight. Indeed, in a narrative written next year, it was said that,—

"As at the battle of Aboukir the blowing up of the 'L'Orient' had the effect of causing an utter suspension of hostilities for the space of half an hour, only to be resumed with increased fury, at least on the part of the British, so this conflagration had the effect, for a few days, of so far drawing public attention from the presence of the cholera as almost to cause it to be generally believed to have been actually superseded by the fire. But this delusion was of but short duration. In a few days, the excitement caused by the fire having subsided, the cholera again began to command the public attention by, not a return (for it had not disappeared, being only temporarily merged and lost sight of in the accompanying great calamity), but an increase of virulence."

The next current mention of the progress of the disease is on June 15th:

"The sexton of seven cemeteries, viz.: the City, Catholic, Methodist, Holy Ghost, Christ Church, German Protestant, and Lutheran, reported fifty-nine interments during Tuesday, forty-seven of which were reported as having died of cholera."

On the 19th of June the following was the report:

"For the week ending Sunday the number of interments, as reported to the register, was as follows:

"Monday, 8 cemeteries reported 48 in all, 40 of the cholera.

"Tuesday, 7 cemeteries reported 60 in all, 47 of the cholera.

"Wednesday, 9 cemeteries reported 83 in all, 65 of the cholera.

"Thursday, 10 cemeteries reported 68 in all, 58 of the cholera.

"Friday, 9 cemeteries reported 74 in all, 62 of the cholera.

"Saturday, 9 cemeteries reported 74 in all, 61 of the cholera.

"Sunday, 8 cemeteries reported 85 in all, 69 of the cholera.

"Total, 492; 402 of the cholera."

There was complaint at the showing of these figures, and a disposition to charge neglect. It was said that,—

"The cholera is still sweeping off its scores of victims every day, and this at a time when the atmosphere is pure and elastic, and there appears to be no good reason for the prevalence of the mortality. It seems to be well ascertained, however, that the epidemic is confined to particular localities, and that efforts of a sanitary kind must be directed to these districts, if anything is to be done at all, to arrest the progress of the malady. St. Charles Street and Washington Avenue, west of Eighth, parts of North St. Louis, and some localities in the southern part of the city are represented to be the principal seats of the pestilence. Efforts should now be directed to the purification of these quarters."

June 24th,—

"The week previous to this the mortality was 224, and the deaths by cholera 173, showing an increase of 49 on the whole number, and 26 on deaths by cholera.

"The cholera proper appears to confine itself entirely among the newly-arrived immigrants, who are compelled by their restricted means to lodge in the city suburbs or in low, unhealthy places in the city, where disease very naturally is most readily contracted. The strangers who visit us from the neighboring States may, if they take the ordinary precautions, do so with impunity. Nearly one-third of the deaths, it will be seen by the above table, occurred among children five years of age or under."

But this did not satisfy the citizens. They determined to take things in their own hands, called a public meeting, and appointed a committee to look after the proper sanitary measures which should be adopted in an emergency of this sort. On June 26th, as the current report informs us,—

"The committee appointed by the chairman of the mass-meeting, at least a portion of them, met yesterday morning at the Planters' House, and an address to the mayor and City Council, and an ordinance embracing the provisions of the recommendations of the mass-meeting were adopted, and forthwith the committee in a body waited upon the mayor at the town hall and laid them before him. In response to the address, the mayor assured the committee of his hearty wish and entire willingness to co-operate with the citizens and the Council in any measures that might be adopted to stay the ravages of the disease, or mitigate the sufferings of the destitute who might be attacked with it. He gave some painful and frightful accounts of what he had already witnessed, and his inability to do more than he had done. The two boards of the City Council having adjourned over until Wednesday evening, the mayor instantly summoned them to meet at four o'clock P.M. yesterday.

"Said ordinance was then taken up for consideration, and after slight amendment, read three several times and passed, the vote being ayes eight, noes one. The ordinance as passed by the aldermen is in substance as follows:

"First, that in order to check the future spread of the cholera now raging among us, and to carry into effect in the best manner the views of our citizens, as expressed by them in public meeting, touching said disease, a committee shall be and hereby is appointed, to be termed 'the Committee of Public Health,' consisting of the following-named persons, heretofore named at said public meeting, to wit: T. T. Gantt, R. S. Blennerhassett, A. B. Chambers, Isaac A. Hedges, James Clemens, Jr., J. M. Field, George Collier, L. M. Kennett, Trusten Polk, Lewis Bach, Thomas Gray, William G. Clark."

But nothing could arrest the headway of the disease now. On June 28th the report said,—

"The official reports of interments for the week ending Monday last, and including all the cemeteries in the neighborhood of the city, shows the total number for that period to be 763, of which 164 were children from the age of five and under. The deaths from cholera for the same period are reported at 539.

"In view of the terrible pestilence now prevailing in our midst, the officers of Washington University have deemed it expedient to bring their scholastic year to a rather sudden and premature termination, and permit those students residing at a distance to return to their homes.

"The clergy of the Presbyterian Church in this city have set apart this day (Thursday) as a day of public fasting, humiliation, and prayer. All persons are affectionately invited to join with them in the religious services of the day.

"At a meeting of the committee designated by the ordinance passed by the City Council, held yesterday evening at the Planters' House, were present Messrs. Gantt, Chambers, Clark, Field, Hedges, Gray, Polk, and Blennerhassett. Absent, Messrs. Clemens, Collier, Kennett, and Bach. On motion, T. T. Gantt, Esq., was called to the chair, and J. M. Field appointed secretary.

"The meeting being informal, they not having been officially advised of the passage of the ordinance, the following address and proceedings were had:

"Resolved, That the public school-house on Seventh Street, in the First Ward; the public school-house in the Fifth Ward, on the corner of Ninth and Wash; public school-house near Mound Market, in the Sixth Ward; and the St. Vincent school-room (Catholic), in the Fourth Ward, be and they are hereby set apart as temporary hospitals, and we request that all destitute poor be sent to those places. Arrangements will be made in the other wards as soon as the city can procure proper tenements.

"Resolved, That Messrs. Blennerhassett, for the First Ward; Polk, for the Fifth Ward; William G. Clark, for the Sixth Ward; Thomas Gray, for St. Vincent's school-room, in the Fourth Ward, be appointed to carry out the above resolutions, and provide for the temporary accommodations of patients until other provisions are made.

"Resolved, That two physicians be appointed to attend to each of the temporary hospitals hereby established, and that they be empowered to procure all the medicine and attendance necessary, and establish a medical depot not only for the sick in the hospitals, but also for all destitute poor in the ward."

This was the way to fight the epidemic, but it would not yield to any such measures at present. On June 29th we read,—

"We have been flattering ourselves that the prevailing epidemic was abating, but on collecting the facts our hopes are dissipated. It is, in fact, on the increase, and now becomes a serious, and the only question, 'What shall be done to stay it?' By the report below it will be seen that, according to the returns of eleven cemeteries, there were on Wednesday 132 interments, of which 109 were from cholera, only 23 from other causes. These returns do not include the Methodist cemetery in an authentic shape, nor the Hebrew. We learn indirectly that there were interments in the Methodist cemetery, 6 of which were from cholera, and 2 from other causes. If this be true, it gives a total for Wednesday of 140 deaths, of which 115 were by the prevailing sickness, considerably exceeding the reported mortality of any other day. Even if the report from the Methodist be not correct, those which are known to be so show that this disease is on the increase, and give just and sufficient cause to awaken all good and humane men to prompt and efficient action."

June 30th there was a wail of querulous despondency,—

"An examination of the daily reports which have been published for some weeks past of the ravages of the cholera in this city presents the melancholy fact that at least three-fourths of the mortality is confined to emigrants from foreign countries. We think that this is quite a reasonable estimate, and we call attention to it now with the hope of inducing some effort to improve the condition of those who seem, from local or other causes, doomed to the grave.

"At least one-third of the population of St. Louis is composed of foreigners. They have been increasing every year,

bringing much wealth to the city, improving their own condition, and enhancing the value of everything around them, contracting too many of the habits and enjoying the comforts of Americans. Within the last few months, however, a greatly increased number of foreigners, principally from England and Germany, have arrived, and thus they have unfortunately brought disease and death with them to such an extent as to carry alarm whenever an arrival is announced."

July 1st the Committee of Public Health was vigorously at work, employing every means in its power, as evidenced by the following:

"Resolved, That the special block inspectors observe the following regulations:

"1. To visit and thoroughly examine each tenement and the premises in their several districts at least once every day, and notify the occupants, and also the owners thereof, forthwith to remove to the most convenient street or alley anything that they may deem injurious or offensive, or that ought to be removed. And if the same shall not forthwith be removed, then they will immediately remove the same, and charge the expenses thereof to the occupants first, if they be able to pay them; if not, then to the owners; and if neither the occupants nor the owners can pay the same, then shall the same be paid by the city.

"2. That such examination be made at least once every day.

"3. That they procure a sufficiency of scavenger- and slop-carts to remove all the filth from every part of their district once each day.

"4. To examine and ascertain the number of persons occupying any tenement and their condition; and whenever the number and condition is such as in the opinion of the inspector endangers the health of the occupants or the neighborhood, to report immediately the facts to the president of the committee, or to the members of the committee from the ward in which it exists.

"5. To cause forthwith all sick, destitute persons to be removed to some one of the hospitals selected and designated by this committee.

"6. Keep a strict account of every expense necessarily incurred in removing nuisances or sick persons, and report the same to this committee.

"7. They shall have power to engage the necessary vehicles and means for carrying the sick to the hospitals above specified.

"8. That all the matter carried off by the scavenger- and slop-carts be hauled to the scavenger-boat near the foot of Walnut Street.

"9. That such inspectors immediately report to the members of the committee for their ward all such persons as may either neglect, refuse, or oppose any order or step given or taken to effect the objects of their appointment, in order that the members of this committee may effectually enforce the provisions and objects of the ordinance of the 27th June inst.

"NOTICE.—The attention of the block inspectors and citizens generally is particularly directed to the order with regard to the disinfecting fires to-night, so that the whole city may be thus purified at once. The materials should be procured by the block inspectors to-day, and deposited in prescribed quantities at the proper places ready for use at 8 o'clock P.M.

"NOTICE.—The Committee of Public Health hereby give notice that they have made arrangements for the immediate reception of all indigent persons suffering with cholera at the Hotel for Invalids, corner of Second and Walnut Streets; at

the St. Louis Hospital, corner of Spruce and Fourth Streets; at the City Hospital, and at the public school-houses in the First and Sixth Wards.

"Suitable cars for the conveyance of the sick will be kept in waiting at the various hospitals, and also at the public school-houses in the Fourth and Fifth Wards, and will be sent immediately on application to the parties in need of them. The block inspectors and all friends to humanity are requested to use their endeavors to have all indigent persons attacked with the epidemic removed from their dwellings to the hospitals at the earliest possible moment, as upon this depends the greatest chance of relief being afforded.

"The Committee of Health have recommended that Monday (to-morrow) shall be observed as a day of humiliation, fasting, and prayer. As a Christian community, and recognizing the overruling power of Providence, this recommendation will not be disregarded. Never was there a time in the history of any city that more imperiously demanded a humble and contrite appeal to the interposition of the Almighty than now exists in St. Louis. The churches and all religious denominations, we have no doubt, will cordially and zealously unite in observing the recommendation. All must admit its propriety and necessity.

"Every good and right-thinking man will, out of respect to the religious opinions and belief of his neighbors, give it his acquiescence. He will close his store or place of business and surrender the day to the purposes indicated, and permit those in his employ to participate in devotional exercises, and to enjoy some relaxation from toil. The prompt and hearty co-operation of the citizens thus far in all the recommendations and suggestions of the committee gives assurance that this request will be strictly observed by all.

"In compliance with the recommendation of the Committee of Health, we will not issue a paper on Tuesday morning. Advertisers for that day will please send in their favors to-day."

On July 4th there was the following mortality:

"Total, one hundred and sixty in all, one hundred and twenty-eight of cholera. This report shows five more deaths from cholera than has occurred any day since the epidemic has prevailed in our city."

And new and greater additions were made to the authority of the Committee of Public Health:

"Yesterday evening the City Council passed an ordinance vesting in the mayor and Committee of Public Health the necessary powers to enforce quarantine regulations on all emigrants from shipboard, and on all sick, diseased, infectious, or unclean persons. The ordinance, we have no doubt, will receive the sanction of the mayor."

The weekly report at this time was enough to cause a panic:

"By the daily report made to the register's office, for the week ending Sunday last, it appears the total number of interments was as follows:

	In all.	Cholera.
Monday	127	99
Tuesday	114	94
Wednesday	140	115
Thursday	155	123
Friday	162	119
Saturday	122	83
Sunday	125	100
Total for the week.....	945	733

On July 6th we are told,—

"Yesterday afternoon His Honor the mayor, Dr. Barret, the visiting physician, and several other gentlemen visited the quarantine grounds, and were well satisfied with the arrangement and condition of the persons there. As yet the committee have not been able to perfect their arrangements, but in the course of to-day and to-morrow they will have accommodations erected on shore sufficient for any present probable demand.

"There are now at the quarantine ground one hundred and one persons, all of whom are comfortably provided for on board the steamboat 'St. Louis.' These are all Germans, of whom there were yesterday evening only four sick, two women and two children. An Englishman landed at the quarantine ground died yesterday, the only death that had occurred up to a late hour last evening. Dr. Haussler, a German, is resident physician at quarantine. Dr. Carrow continues to perform the duties of health officer. He is stationed at the Montesano House with a boat and crew, and boards all boats from the South."

The point selected for quarantine was the lower end of Arsenal Island. July 16th the following is reported:

"The following shows the number of interments daily for the week ending yesterday:

	In all.	Of Cholera.
Monday.....	125	101
Tuesday.....	184	145
Wednesday.....	144	115
Thursday.....	136	105
Friday.....	110	87
Saturday.....	131	89
Sunday.....	92	58
	922	700

July 19th,—

"The total number of interments in the several cemeteries of the city for the week ending Monday, July 16th, is shown by the following table, copied from the register's official report:

Cemeteries.	Of Cholera.	Of other Diseases.
City.....	150	47
Holy Ghost.....	66	28
Lutheran.....	26	12
St. Vincent.....	39	19
German Protestant.....	63	31
Catholic (old).....	94	39
Catholic (new).....	64	15
Wesleyan.....	52	9
Methodist.....	38	15
Christ Church.....	26	9
Presbyterian.....	10	4
Baptist.....	9	0
United Hebrew.....	2	0
	639	228

"Total for the week, 867.

"Of the above number, 197 were children of the age of five years and under."

July 22d,—

"The following table shows the number of interments each day for the week ending Saturday, the 21st:

	Of Cholera.	Other Diseases.
Sunday.....	58	34
Monday.....	61	27
Tuesday.....	61	23
Wednesday.....	50	34
Thursday.....	36	30
Friday.....	37	29
Saturday.....	33	20
	336	197
Cholera.....	336
		533

"For the same period last week there were 722 deaths from cholera and 215 from other diseases. Compared with the same period the previous week, the above table shows a decrease of 386 deaths from the cholera and 18 from other diseases."

The disease now suddenly lost its terrors, and the mortality fell off at once almost to nearly normal rates. The causes of this were (1) the new quarantine arrangements; (2) a general betterment in the state of the atmosphere and temperature; (3) a general flight of citizens from the place. This last cause probably was much more efficient than the others in checking the ravages of the pestilence. The proof that there was such a general expatriation at this time is found in the sudden drop in the number of deaths from other diseases besides cholera between the middle of July and the middle of August.

On August 8th, the journal heretofore quoted said,—

"The following report is copied from the statements of the several sextons, made to the register, for the week ending Monday, the 6th. It exhibits a greatly reduced mortality in this city, and the almost total disappearance of the cholera from among us. It justifies us, also, in inviting the return of our own citizens, and the visits of all who have business or desire intercourse with us. The re-establishment of quarantine regulations and proper attention to cleanliness of our streets will insure us against any further disease during the present season :

Cemeteries.	Total.	Cholera.	Under Five Years.
German Protestant	18	5	12
Baptist	5	1	3
Methodist	6	2	3
Christ Church	9	3	4
Wesleyan	6	3	1
St. Vincent	11	1	7
Presbyterian	9	1	5
Lutheran	4	0	4
Holy Ghost	16	3	7
Catholic (old)	20	3	14
" (new)	20	5	3
City	28	7	9
United Hebrew	0	0	0
	152	34	72"

The same paper reviews the facts and points the moral of the epidemic in the excellent article which follows :

"We have taken the trouble to procure from the register's office an authentic statement of the whole number of interments in the cemeteries of this city from the 23d day of April to the 6th day of August, 1849. The laws of this State in regard to interments in public burial-grounds are very severe, and we have no reason to suppose that they have been disregarded in any instance. In some cemeteries it is understood that they report a greater number of deaths, for two or three weeks, than is here set down, amounting to some fifty or sixty, but we account for the discrepancy by supposing that there were cases of interments of persons dying at the coal-mines, several miles from the city, and in which no regular certificates, such as the law requires, were furnished. It has been stated that large numbers of persons dying in St. Louis have been interred in Illinois and in the surrounding country, of which no note has been taken. We do not believe this is true to any considerable extent, and we are quite certain that more persons have been

brought to the city graveyards from abroad, for the purpose of interment, than have been taken from the city with a view to interment elsewhere.

"What a fearful tale is told in this chronicle of death's doings! In a little over one hundred days six thousand persons have been committed to the grave, and this out of a population of less than sixty thousand! This is an awful mortality, perhaps greater than has ever occurred in any city of the United States with the same population. It is to be observed, however, that a good many hundreds of these persons were not really citizens of St. Louis, but had just landed here, bringing the seeds of death within them, and, still more unfortunate, carrying death into whatever quarter they went. To this cause, indeed, is to be attributed a vast portion of the mortality which has been recorded; and if the people are wise they will avoid, as far as possible, contributing to similar epidemics hereafter, by insisting upon greater regard to cleanliness and the proper ventilation of the houses occupied by these people, and by compelling the owners of all such places as 'Shepard's Graveyard' to fill them up and put the houses in proper and healthy condition. There are numberless such places in the city, and we only specify this one because the people are more familiar with it than with others.

"TABLE OF INTERMENTS in the several public cemeteries attached to St. Louis from the 23d day of April to the 6th of August, 1849.

	Total.	Cholera.	Under Five Years.
For the week ending April 30.....	131	41	50
" " May 7.....	135	78	28
" " " 14.....	273	185	46
" " " 21.....	192	127	24
" " " 28.....	186	115	44
" " June 4.....	144	75	34
" " " 11.....	283	191	72
" " " 18.....	510	404	106
" " " 25.....	163	589	164
" " July 2.....	903	619	230
" " " 9.....	773	591	192
" " " 16.....	867	639	197
" " " 23.....	442	269	140
" " " 30.....	225	93	94
" " Aug. 6.....	152	34	72
	5989	4060	1493"

These figures, in fact, were below, not above the frightful aggregate, as the revised table given in a preceding page proves. The results of this terrible pestilence, which retarded the city's progress temporarily, were important in their bearing upon the improvements made in the city's sanitary condition. Better quarantine arrangements were at once made; better provision for cleanliness in streets and high-ways, and improvements in every other sanitary regard. But, more than all, the determination to give St. Louis a thorough and effective sewer and drainage system was a consequence of this epidemic.

The cholera could not be completely got rid of for several years. In January, 1852, the following table was made up from the register's records :

Table showing the weekly mortality of St. Louis during the years 1849-51.

	Total.	Cholera.
Deaths in 1849.....	8431	4144
" " 1850.....	4595	872
" " 1851.....	4377	791

There was a slight outbreak of the cholera in 1855, but the disease did not again visit St. Louis with any violence until 1866. In that year it became epidemic once more, and threatened at one time to get beyond control, as it had done in 1849.

The approach of the disease, slow and gradual, was not unheeded by the citizens who bore 1849 still fresh in their memories. The newspapers recited the history of that stricken year as an example, and some of the articles written on the subject have a positive value, for example,—

“As early as 1847, the first year of that decade so remarkable for the vast immigration from Europe, there were numerous cases of ship fever, some of which were brought to St. Louis, and communicated the contagion of that disease to some of our citizens. The next year, cholera prevailing in Europe, the emigrant ships brought over a great deal of disease, which was pronounced cholera; and in the latter part of the year infected New Orleans, where, before January, 1849, cholera had assumed an epidemic form. The *New Orleans Picayune* of Dec. 14, 1848, noticed the arrival of the ship ‘Swinton,’ from Havre, with German emigrants, after a passage of only thirty-nine days, and sixteen deaths on the passage, which were subsequently acknowledged to have been of cholera. On the 27th of that month there was an alarm in St. Louis on account of deaths supposed to be from cholera, on board the steamer ‘Alton,’ from New Orleans. The cholera prevailed through the winter months in New Orleans, and on all the boats from thence going up the Mississippi and Ohio there were cases of it. On the 17th of January the St. Louis board reported six cases of local origin, though it was doubted whether so early as this there were any cases not traceable to communication with New Orleans. An ice-blockade in February stopped navigation, and little mention of the disease was made until its reopening. On the 28th of March the St. Louis Board of Health reported twenty-four cases of cholera for the week before, mostly from New Orleans. On the 9th twenty-six cases for the week were reported, but only four residents of the city. During April and May the cholera broke out at several points on the Missouri River, and was on every boat on the Mississippi and Missouri. On the 8th of May, in St. Louis, the weekly deaths by cholera had gone up to one hundred and seventy-eight, and on May 14th to one hundred and eighty-five, but fell off for two weeks after the great fire.”

And so forth, the article concluding with a pretty complete account of the course and progress of the pestilence by way of warning. This article was written in April, but the disease did not break out until July. On the 9th of August one of the daily journals reported the progress it had made in the following terms, which, though calm and cautious, give evidence of the little under-current of alarm:

“As was to be anticipated from the prevalence of the disease throughout the country and the unusual heat of the weather, some cases of sporadic cholera have occurred in this city. So far, however, the cases have been comparatively few and isolated, and have mostly occurred among persons whose constitutions were weakened and deteriorated by vicious or irregular habits, or whose residence and modes of living were unfavorable to health.

“Since the appearance of the disease the members of the Board of Health, the mayor, and other city officers connected with the health department, have been actively engaged in taking precautionary measures, and endeavoring to improve the somewhat objectionable sanitary condition of the city, and to this end, at a recent meeting of the Board of Health, the following address to the citizens was promulgated:

“ST. LOUIS, Mo., Aug. 8, 1866.

“TO THE CITIZENS OF ST. LOUIS:

“As it is now fully ascertained by the Board of Health of the city of St. Louis that there are some cases of cholera among us, and having taken all the precautions in our power, we would most earnestly request of the citizens of St. Louis to assist us in carrying out the sanitary regulations of the city.

“JOHN FINN,

“President of Board of Health.

“I hereby cordially concur in the above recommendations.

“JAMES S. THOMAS,

“Mayor of St. Louis.”

The disease made progress, but active steps were taken to meet it. Under date of August 11th we read that,—

“The sudden and unusual coolness of Thursday night, followed by the close murky atmosphere of yesterday, resulted, as might be expected, in a somewhat increased number of cases of cholera. Forty-three cases were reported at the health office. Many of these, however, were of a mild character, yielding easily to medical treatment.

“The following are the names of the physicians appointed by the board to attend to those unable to pay:

“First District, D. A. Roach. Orders can be left at the drug store on Carondelet Avenue between Russell and Anne.

“Second District, Dr. William S. Golding. Leave orders at his office, corner Fourth and Walnut.

“Third District, Dr. S. T. Newman, corner of Washington Avenue and Fifth Street.

“Fourth District, Dr. R. B. McAuliff, corner of Broadway and Carr.

“Fifth District, Dr. James O. Gallaher. Orders can be left at 722 Broadway, Tenth Ward, and at James McBride’s drug store, on Fifth between O’Fallon and Biddle.

“They also resolved to appoint two drug stores in each ward at which medicines can be obtained by poor people free of charge.”

On the 16th, the following was issued:

“MAYOR’S PROCLAMATION.

“MAYOR’S OFFICE,

“ST. LOUIS, Aug. 15, 1866.

“Whereas, It has been represented to me that the wants of those suffering from cholera might be alleviated and the sanitary condition of the city more fully attained by the appointment of a number of citizens in each ward, whose duty it should be to inquire into the condition of the infected neighborhoods, to use such remedies as necessity demands by supplying to the poor medical advice, having medicines made up for them, and using disinfectants.

“Now, therefore, I, James S. Thomas, mayor of the city of St. Louis, do hereby appoint the following citizens, and request them to carry out the objects above set forth:

“First Ward, Col. Koehler, Col. Vahlkamp, John C. Finck, Charles Strittwetter, Toney Faust, George Meisbach.

“Medicines will be supplied at drug store 259 Carondelet Avenue; also at Mol’s drug store, Carondelet Avenue.

"Second Ward, Col. Chris. Ploeser, Julius Conrad, Charles W. Gottschalk, Phil. Michel, Capt. Chris. Overbeck, John Pultis, Henry Amburg, Charles R. Fritsch.

"Medicines will be supplied at Geniff's drug store, 35 Carondelet Avenue; also at H. Distlehorst's, corner of Seventh and Souldard.

"Third Ward, William Rumbold, Amadee Vallé, C. C. Simmons, William H. Maurice, Edward Mead, John G. Copelin, Dr. William Taussig, E. P. Rice, R. C. Rennick, Frederiek Heitkamp, Emile Winter, Herman Schepmann, Dr. T. F. Rumbold.

"Medicines to be supplied at drug store corner Seventh and Chouteau Avenue.

"Fourth Ward, William H. Godfrey, G. W. Dreyer, Tony Niederweiser, George Walbrecht, Frank Boehm, D. C. L. Lips, — Limberg, Dr. Thousas Scott, J. C. Barlow, P. Wiles, W. Vanzandt.

"Medicines will be supplied at drug store of Enno Sanders, corner of Fourth and Walnut Streets, and at drug store corner of Seventeenth and Market.

"This committee is requested to convene at Tony Niederweiser's at ten o'clock A.M. to-day.

"Fifth Ward, Erastus Wells, John Cairns, Joseph Conn, A. J. P. Gareschè, James Quigley, John McBride, John Jackson, L. Burns, John Ivory, Hampton Woodruff. Medicines can be supplied at drug store corner of Fifth and Market, and at drug store corner of Seventeenth and Market Streets.

"The committee is requested to meet at the hall of the Board of Aldermen at ten o'clock to-day.

"Sixth Ward, William G. Eliot, B. R. Bonner, Joshua Cheever, James Blakely, Charles G. Ramsey, John S. Thompson, Levin Baker, Jacob Merrell, James Seollay, William H. Benton. Medicines to be supplied at Crawford's drug store, corner of Eighth and Washington Avenue, and McGintie, corner of Olive and Fifteenth Streets.

"Seventh Ward, James T. Mercer, C. F. Walther, J. H. Gerdemann, Anson Comstock, John O'Brien, William Lanmann, H. Steinberg, A. Heute, Ernst Krepper. Medicines to be supplied at Walton & Co., Morgan and Third Streets, and at the drug store corner of Seventeenth Street and Franklin Avenue.

"This committee is requested to convene at J. H. Gerdemann's, corner Seventeenth and Franklin Avenue.

"Eighth Ward. The committee of this ward will be appointed by Dr. Horatio Wood, and will receive instructions from him. Medicino will be supplied at drug store corner of Washington Avenue and Broadway, and at drug store corner of Seventeenth and Franklin Avenue.

"Ninth Ward, M. W. Hogan, P. Driscoll, D. McAuliffe, John H. Neirmeyer, William Powers, John Amende, William Stenkemeyer, Edward Quinlivan, H. J. Shauhoest, Phil. McDonald, Casper Stalle. Medicines will be supplied at James J. McBride's drug store, on Fifth Street, between Biddle and O'Fallon, and at Knawb's drug store, corner of Fifteenth and Cass Avenue.

"Tenth Ward, Charles W. Irwin, Joseph Hodgeman, John McGuire, E. P. Gray, Frank Overstolz, Samuel Gaty, Charles R. Anderson, L. Garnett, Levy Ashbrook, J. O. Coddling, L. Vanderwater, N. Madden, E. D. Jones. Medicines will be supplied at corner of North Market and Broadway, at drug store corner of Ninth and Chambers Streets, and at drug store corner of Broadway and Salisbury.

"The committee is requested to convene at National Hall, corner of Chambers Street and Broadway, at ten o'clock A.M., 16th inst.

"The citizens named in the above will act under the direction of the gentleman first named in their respective wards,

and his action in the premises will be sustained by the chief executive.

"In testimony whereof, I have hereunto set my hand and caused the seal of the city of St. Louis to be affixed this 15th day of August, 1866.

"JAMES S. THOMAS,
"Mayor of St. Louis.

"J. W. HEATH,
"City Register."

At that time the Board of Health was proceeding with energy, suppressing nuisances and promoting hygienic measures of every kind. The commissioners, Messrs. Belt, Stifel, King, Finn, Krieger, and the health officer, made short work of everything prejudicial to hygiene that was brought to their attention. Stagnant ponds, offal, garbage, public and private nuisances of all sorts were dealt with by the strong hand. One of the hotels was declared a nuisance, and so were slaughter-houses, alleys, and everything that was malodorous. Many donations were received; much gratuitous advice likewise. It was all gravely reported, for example,—

"Communication of James Lyttle, in regard to a cheap and simple preventive of cholera, received and read.

"This disease will never spread among people with sulphur in their stockings. Put half a teaspoonful of flour of sulphur into each of your stockings and go about your business; never go out with an empty stomach; eat no fresh bread nor sour food.

"Not one of the many thousand who have followed this, my advice, has been attacked by cholera. So says the celebrated Dr. Hering in his medical work published some years ago.

"The most powerful disinfectant is sulphuric acid gas (the fumes of melted sulphur)."

Meantime the disease had become quite severe.

"The following is the mortuary report for the week ending Friday, 17th of August, so far as included in the reports from the different cemeteries :

Whito males.....	386
White females.....	365
Colored males.....	6
Colored females.....	11
Total	768

Nativities.

United States.....	434
Germany.....	110
Ireland	188
France.....	6
Italy	7
Switzerland.....	5
Canada	4
England	13
Nova Scotia.....	1
Total	768

"Of the above, 241 were children under five years of age, and 2 still-born. Deaths from cholera, 532.

"Owing to the press of business at the health office, the regular mortuary report has not been made up, and the above

figures comprise only the cemetery returns, without including deaths at City Hospital, quarantine, and smallpox hospital. Subsequently we were informed that the report from the city cemetery was 127 deaths, of which all but 11 were of cholera. We were unable to ascertain whether this includes the deaths occurring at quarantine and the smallpox hospital. The total number treated at the City Dispensary during the week by Drs. Folsom and Grissom was 489 cases. The various committees still prosecute their labors energetically, and lime, coppers, and other disinfectants were liberally distributed."

Among those whom the pestilence carried off were Col. I. Weidemeyer, county auditor. He was fifty-three years old, and had served the Union cause efficiently during the civil war, being colonel in command of the Forty-first Missouri Infantry. On September 24th, Hampton Woodruff succumbed to the plague. He was a member of the Board of Delegates in the City Council, and highly esteemed. Since the outbreak of the cholera he had done great service as an active member of the sanitary committee of his ward. He was forty-eight years old at the time of his death, a native of Baltimore, Md., but for twenty-five years a citizen of St. Louis. He was a butcher and wholesale cattle-dealer, president of the Butchers' Association, a "bright" Mason, and a man of honorable prominence for scrupulous integrity and exemplary business capacity.

For the week ending August 24th the death table was as follows :

Cemeteries.	Total Burials.	Of Cholera.
Arsenal Island, from City Hospital.	123	108
Holy Ghost.....	130	112
Rock Spring.....	177	106
Calvary.....	182	148
Wesleyan.....	38	28
Lutheran.....	9	9
Bellefontaine.....	123	118
Salem.....	6	6
St. Mark.....	1	1
St. Peter.....	55	44
St. Peter and Paul.....	69	45
Beni el Hebrew.....	5	3
United Hebrew.....	8	6
St. John.....	9	4
Holy Trinity.....	216	175
Concordia.....	1	1
Friedens.....	4	4
Total.....	1156	918

"Nativities.—United States, 526; Ireland, 260; Germany, 297; England, 17; Belgium, 2; France, 22; Canada, 14; Switzerland, 6; Italy, 8; Sweden, 4. Total, 1156.

"Sexes.—White males, 647; white females, 470; colored males, 28; colored females, 11. Total, 1156. Of this number 206 were children under five years of age.

"Admissions to the City Hospital during the week, 275; ditto to quarantine, 2; treated at the dispensary by Drs. Folsom and Grissom during the week, 290.

"The above total of the deaths is somewhat below the actual aggregate, inasmuch as the returns from Arsenal Island are only partial, including only those persons who died in the City Hospital, no return being made as to the number of poor persons interred on the island during the week who died in other

parts of the city. The number of interments of this nature must at least be over one hundred, which will increase the total mortality to nearly thirteen hundred. This is somewhat a startling aggregate when compared to the weekly returns we are accustomed to see published, which rarely exceed one-fifth of the above number, but now that the mysterious and merciless epidemic, which has caused so much sorrow and desolation, is rapidly subsiding, it is comparatively easy to contemplate the fact with calmness, and to realize that after all the cholera has paid us but a flying visit, far less destructive and prolonged than its former well-remembered visitations.

"By one of the strange fluctuations common to our anomalous climate, the usually hot, sultry weather incident to August has been exchanged for the cool atmosphere and cloudless skies of the Indian summer. Within the last few days thin coats and light pants have been at a discount; people have ceased to sit on their door-steps in the evening, or to lie uncovered under breezy mosquito-bars, while some have twinges of rheumatism, and others gloomy intermittents and chills. We are not disposed, however, to quarrel with the weather just now. Who knows how much these clear, cool breezes have assisted in expurging from the air the invisible blight which has shed the gloom of the 'shadow of death' round so many households? Certain it is that the decrease of mortality and the cool weather were simultaneous in their commencement."

The press and the people consoled themselves with the reflection that things were not nearly so bad as they had been in 1849. They said,—

"The cholera this year broke out on the 29th of July, the first case of which proved fatal.

"The mortality report for the week ending July 6th of the present year was: Total number of deaths, 135, of which 89 were children under five years of age. Friday, July 13th, 122; Friday, July 20th, 183; Friday, July 27th, 190; Friday, August 3d, 208. No cholera cases as yet officially reported.

"On the 10th instant no report was furnished. For the week ending Friday, August 17th, there were 895 deaths, of which 648 were from cholera; for the week ending Friday, August 24th, there were 1156 deaths, of which 918 were reported as cholera cases.

"During the month of December, 1848, the census of the city was taken preliminary to a revision of the wards for the adjustment of ward representation in the City Council. It was then found to be 63,781, and the highest number of deaths from cholera for one week during 1849, by the above table, is found to be 639.

"The census, which has lately been completed, gives us a population of over 204,000. The deaths from cholera during the past week, being but 918, in proportion to the population of the city as compared with that of 1849, would show that as yet there is no reason for alarm, and the more especially so as will be seen from the above table that we are rapidly approaching the season when the cholera ceased to be an epidemic in 1849. Severe as has been the visitation upon our city, it has been far less destructive than at the time above alluded to. Vigilance should not as yet be relaxed; sanitary measures should still be enforced with rigor until the frosty nights come.

"During the past day or two the cholera seems to be far less malignant and deadly than during the early part of the week, and we have good reason to believe that it will soon disappear altogether, notwithstanding the mortuary report for this week shows an increase over the past week."

The disease now began to subside, as the report for September 9th shows:

Cemeteries.	Total Interments.	Cholera.
Arsenal Island, from City Hospital.....	63	27
Rock Spring.....	81	47
Calvary.....	85	51
Wesleyan.....	24	14
Lutheran.....	7	4
Bellefontaine.....	60	43
Salem.....	4	3
St. Peter.....	52	31
SS. Peter and Paul.....	56	27
Beni el Hebrew.....	5	2
United Hebrew.....	8	4
St. John.....	4	2
Holy Trinity.....	131	73
Total.....	580	329

"Nativities.—United States, 349; Belgium, 2; Sweden, 1; England, 11; Canada, 2; Germany, 80; Ireland, 122; Italy, 1; Norway, 2; France, 10. Total, 580.

"Sexes.—White, males 271, females 282; colored, males 17, females 10. Total, 580. Of these 209 were children of five years and under, and 13 infants still-born.

"Deaths at City Hospital during the week, 61; St. Louis, 2; Good Samaritan, 1.

"Admissions to City Hospital, 132; Quarantine, 12.

"Treated at City Dispensary during the week by Drs. Folsom and Grissom, 235.

"The above report is complete, with the exception of the returns of a few of the cemeteries which had not been received at the health office up to a late hour Saturday evening. It also does not include the full number of interments at Arsenal Island. The interments on the island from the City Hospital are given, but owing to some confusion on the island, the old clerk having been discharged, no return was made on Saturday as to the number of those who died on the island during the week, or of those bodies sent there for interment from various parts of the city. In the absence of the actual figures, the health office estimates the number of interments on the island, irrespective of those from City Hospital, given above, as 158, of which about 100 were of cholera. This increases the total mortality arising from the epidemic during the week to 429, which, even allowing for the incompleteness of the cemetery returns, must be considered as a very satisfactory total as compared with that of the preceding.

"The cemetery returns for Friday are embodied in the above report, and hence it is unnecessary to give the details. The total number of deaths from cholera was 27, indicating, as on previous days, the rapid decrease of the disease. The police reports for the twenty four hours ending Saturday morning at eight o'clock show 29 cases and 23 deaths."

The subsidence of the epidemic was officially announced by the mayor, who issued the following address:

"MAYOR'S OFFICE,
"St. Louis, Sept. 13, 1866.

"Whereas, from information received from various sources, and also a resolution from the honorable the Board of Health, and from my own knowledge, I am gratified in being able to proclaim to our citizens that the cholera no longer prevails as an epidemic in our midst.

"I desire to return the sincere thanks of myself and the citi-

zens of St. Louis to the honorable the Board of Health, and to the several ward committees, for their efficient action in assisting the sick, aiding in the burial of the dead, and disinfecting the houses, yards, and alleys throughout the city.

"I request the committees not to desist from their labors, but continue for a while longer, and desire the citizens to continue to be watchful in regard to the cleanliness of their premises and in their diet.

"In testimony whereof I have hereunto set my hand and caused the seal of the city of St. Louis to be affixed this 13th day of September, A.D. 1866.

"Attest:

"J. H. HEATH,
"City Register.

"JAMES S. THOMAS,
Mayor."

ABSTRACT OF DEATHS IN THE CITY OF ST. LOUIS FOR THE WEEK ENDING SEPT. 14, 1866.

Cemeteries.	Total.	Cholera.

Ireland.....	108
Germany.....	125
United States.....	218
France.....	3
Scotland.....	7
Unknown.....	47
Total.....	522

Deaths at the City Hospital, 33; at the St. Louis Hospital, 15; at the Good Samaritan Hospital, 2.

Admissions to the City Hospital, 102; to the Quarantine Hospital, 2.

Treated at the City Dispensary by Drs. Folsom and Grissom, 213; treated at the Third District Health Office by Dr. Gill, 89.

Next week there was a still further reduction of the death rate:

"The following is an abstract of deaths in St. Louis for the week ending Friday, September 21st:

Total Number of Deaths.	Cholera Cases.
Total.....	381
	202"

The city in a short time returned to its customary salubrity.

The following are the mortality returns for St. Louis according to the census of 1880 :

MORTALITY BY AGE, SEX, AND COLOR.

Among the annual reports to the mayor and Council of St. Louis in May, 1882, none are more full and interesting than those of the clerk to the health commissioner, from which we abstract the following matters of durable interest:

“During the year 1881 there occurred in St. Louis 8410 deaths from all causes, which sum total was exceeded in the last fifteen years only by that of 1873, when the deaths aggregated a sum of 8551, and the annual death-rate was 30.5 per thousand. In that

year 837 deaths occurred from smallpox, and the deaths from the seven principal zymotic causes were 29.7 per cent. of the total mortality. In the preceding year, with 1591 deaths from smallpox, a total of 8047 deaths occurred, and the annual death-rate was 29.8 per thousand. It will become apparent from a consideration of the tables which will follow, that the advance in the number of deaths and the annual death-rates has been universal throughout the land.

COMPARATIVE MORTALITY IN ST. LOUIS DURING FOURTEEN YEARS.

YEAR.	Population.	Total Deaths.	Death Rate per Thousand.	Deaths under Five Years.	Per Cent. of Total Deaths.	Smallpox.	Measles.	Scarlatina.	Diphtheria.	Group.	Whooping-Cough.	Typhus and Typhoid Fever.	Diarrhoeal Diseases, under Five Years.	Other Diarrhoeal Diseases.	Total from Foregoing Causes.	Per Cent. of Total Deaths.	Malarial Fevers.	Per Cent. of Total Deaths.	Phthisis Pulmonum.	Per Cent. of Total Deaths.	Pneumonia.	Per Cent. of Deaths.	Still-Births (not included in Mortality).

“The relative percentages of the deaths by classes for the past three years is as follows:

	1879.	1880.	1881.
Zymotic diseases.....	30.1	27.6	31.7
Constitutional diseases.....	21.6	20.4	18.8
Local diseases.....	38.9	40.0	37.6
Developmental diseases.....	5.0	7.0	7.1
Violence.....	4.0	4.8	4.6

“It will be seen that the zymotic deaths have advanced four per cent. in the year 1881 over that of 1880. This increase is due in special to the heavy mortality in 1881 from cerebro-spinal fever, from which cause 314 deaths occurred. The mortality from diarrhoeal diseases in children under five years of age also largely increased, being 686 against 488 in 1880.”

CHAPTER XXXVI.

CULTURE AND LITERARY GROWTH IN ST. LOUIS.¹

HENRY M. BRACKENRIDGE, in his charming little work, so often quoted in this volume,² speaking of his renewal of intimacy with the friends of his childhood, the Beauvois family, in Ste. Genevieve, relates that he was "much amused one evening with the tartness of Madame Beauvois," when a young European merchant, whom she had taken as a boarder, "adapting his discourse to the ignorance of his hearers, informed them 'there was once a certain man called Mohammed who pretended to have received direct revelations from heaven, who wrote a book called the Koran, but that he was a great impostor.' 'My friend,' said the old lady, 'I believe you Europeans look upon us Creoles (country born) as no better than savages, as you regard the savages as baboons. As you have given us a piece of news, I must return the favor by informing you that there is such a place as Rome, somewhere on the other side of the great ocean, and that a person called the pope, of whom, I presume, you have never heard, resides there, and is considered by all good Catholics as the head of their church.' Monsieur Beauvois and I laughed heartily at this little sally, while the coxcomb was not a little mortified."

It is not to be wondered at that in some parts of the country the opinion should exist that there never has been any culture nor literary activity until very recently in St. Louis, yet it is surprising that such views should be held by a considerable body of people

to the manner born. Such seems to be the case, however, and it will be a pleasing task to prove their error. The mistake probably would not exist were it not for narrow and fallacious opinions in regard to what constitutes culture and literature. These cannot properly be restricted within one class of thoughts in regard to speculative science, morals, and art, and yet there have been times when it was pretended that all philosophy was bounded by the limits of Aristotle and Aquinas, and other times when it was asserted that there could be no poetry except such as was written by the rules of Horace and Monsieur Boileau. Today, in St. Louis, the philosophical school of Aquinas has a distinct and coherent existence alongside the school of Hegel and Schelling and Kant, and the comedy of the situation is that each of these schools ignores and denies the existence of the other with perfect sincerity and good faith.

The professors of the St. Louis University, progressive as they are in other respects, will probably tell you, if you press them hard, that philosophy cannot go beyond that dictum of Anselm, "*credo ut intelligam*," upon which rests the system of scholasticism perfected by Aquinas and Duns Scotus.³ On the other hand, the school which has grown up around the *Journal of Speculative Philosophy* looks for truth in the absolute consciousness, the thought knowing itself, and demands understanding as the root of belief. It is not necessary to assume that either school is entirely right or entirely wrong, or that the ex-

³ See that excellent manual, "Ethics; or, Moral Philosophy," by Walter H. Hill, S.J., Professor of Philosophy in the St. Louis University. Professor Hill says in his preface that "those venerable philosophers of the olden times reached their conclusions by rigorous logic, and their conclusions were right and true because derived by necessary sequence from matter not subject to mutation. . . . Indeed, there is little doubt that nothing is gained by theorists who reject the teachings and the axioms received as certain among those sagacious thinkers."

¹ The author is indebted to Professor H. H. Morgan for that portion of this chapter, indicated in the text, which treats of the contemporary period of literary growth and culture in St. Louis, beginning about 1857.

² Recollections of the West.

istence of the one demands the extinction of the other.

As with philosophy, so with culture, literature, and art. The modern evolution does not make it necessary to assume an utter absence of progress in the past. "There were brave men before Agamemnon," and there was culture in St. Louis before the foundation of the schools of philosophy which originated with Professor William T. Harris. It is true the culture of old St. Louis was not very productive in the limited direction of book-making and lecturing; its motto was *prodesse quam conspici*, but it was a genuine, solid culture nevertheless, and in some respects of a very exquisite quality, the culture of the *ancien régime* of France. It did not produce nor aspire at production, because its modesty was satisfied with the masterpieces of French, Latin, and Greek literature. Why should one attempt to produce inferior prose and poetry when he had the classics and Racine, Corneille, Voltaire, Rousseau, Pascal, Molière to turn to? Why seek deeper depths in philosophy, science, and art when he could consult the memoirs of the Institute and the Academy, the works of the encyclopædists and philosophers, all at his elbow? The student, the inquirer, the gentleman of leisure, all found enough to satisfy them in their libraries and in the books sent to them by their correspondents in Paris.

Nor were these libraries inferior or insignificant. H. M. Brackenridge, when preparing his papers for the *Missouri Gazette* (1811-12), which were afterwards gathered in the volume called "Views of Louisiana," had access to the library of Auguste Chouteau. "Here I found," said he, "several of the early writers of travels, and descriptions of Louisiana and Illinois, such as La Houton, Lafiteau, Hennepin, Charlevoix, etc., which I took to my lodgings to read at night, being always a night-student; but I spent some hours in the day in examining and in perusing this fine collection." Some of the chapters in his "Glimpses of Louisiana" show that this collection, which, it has been conjectured, included the remains of the library of the Jesuit College at Kaskaskia, embraced, in adding to patriotic writers, a line of contributions to "Americana" such as were not known at all in New England at that time, were not studied by Irving and Prescott, only imperfectly examined by Bancroft, and never completely brought to the front of appreciation by English-speaking students until unearthed by Dr. O'Callaghan, and expounded by John Gilmary Shea and Francis Parkman.

In fact, in Upper and Lower Louisiana, in the period between 1760 and 1830, there was a very fine quality of culture among the people of the leisure

classes. We only have glimpses of this, because, as we have said, it was a culture which did not produce, but contented itself with having information and knowledge for its own use. But these chance glimpses reveal its fine quality. Note the instances above, and the fact that Brackenridge studied Louisiana law from a manual (in two volumes, quarto) of the "Cou-tume de Paris," which he found in Mr. Beauvais' two-roomed "house of posts" in Ste. Genevieve. So, when James H. Lucas went to Arkansas Post from college, he found there a highly-educated and accomplished French gentleman, whose influence probably saved him from going to the bad, and whose books and knowledge made a lawyer of him.

Such gentlemen were found throughout the country, and there were many such in St. Louis, scholarly and highly-educated French and Spanish gentlemen, and professional men from the United States colleges, whose intercourse could attract and charm a man so accomplished as J. B. C. Lucas. The odd, eccentric doctor and professor, Shewe, the Prussian, of whom Brackenridge delights to tell, was "a scholar, a chemist, a painter, a divine, a philosopher, a professor of languages," with six diplomas, four in Latin,—"von from de Eleziac Academy from Baris, von from de Gollege aus Berlin, von from der School of Mines in Saxony," etc. Dr. Saugrain, another of his friends, both in Gallipolis and St. Louis, was a man of fine scholarship and science, and an original microscopist. Gen. William Clark was a man who had made great progress in the pursuit of Indian archæological subjects, as the unique museum gathered by him witnessed sufficiently well. What a pity and what a reflection it is upon the generation that succeeded these early settlers that that museum, which attracted the inquiries of both hemispheres, was not retained in St. Louis! Brackenridge has put on record the fact that Mr. Bates (Frederick, the secretary of the Territory) was a man who "had an extensive library, and whose mind was richly stored with literature." He speaks, too, of the elder Charles, the founder of the *Missouri Gazette*, as a man capable of appreciating and forwarding his literary pursuits.

Nor is this all. As he goes up the Missouri River, beyond the limits of civilization, we have glimpses of him and the trapper and hunter, Manuel Lisa,—the man of action *par excellence*,—reading "Don Quixote" together, with the yells of the wild Arrapahoes ringing in their ears. In Moses Austin's house at Mine à Breton he came across copies of Cuvier's "Theory of the Earth" and Sir Humphry Davy's "Agricultural Chemistry," books which presuppose both knowledge

and taste. In New Madrid he lodged at the house of Madame Peyroux, widow of a former commandant of the place, and here was also a fine library, Peyroux having been a man of literary standing. "Monsieur Peyroux was the author of several publications, chiefly geological, of considerable merit. In one of his essays he maintains the opinion, with much ingenuity, that the northern lakes formerly discharged themselves into the Mississippi, by the Illinois as well as by the St. Lawrence."

It was in St. Louis that Brackenridge met the botanists Bradbury and Thomas Nuttall. The latter, one of the most enthusiastic and distinguished men in his science, came to this country from Yorkshire, and made St. Louis his headquarters while examining and classifying the flora of the regions west of the Mississippi. His "Geological Sketch of the Mississippi Valley," and his "Travels in Arkansas," etc., are only two of the several works which he here found materials for writing. At Baton Rouge, again, our author came across "an enlightened Spaniard, Don Juan Lopez, an old bachelor, who resembled Don Quixote in person, and had the same passion for spending a considerable portion of his income in the purchase of books, not of knight-errantry, but embracing general literature in its various branches." Here he found the works of Feejoo, Mariana, Ercila, Cervantes, and all the Spanish and Latin writers on the civil law and the Spanish codes and institutes.

Other similar glimpses might be afforded of this high culture of the leisure classes in Upper Louisiana, but enough has been given to illustrate the proposition. The early French inhabitants of St. Louis and vicinity, in fact, maintained a close and constant intercourse with France, and French culture in its highest types was reflected in their thought and speech. They were contemporary with some of the most active and burning epochs of the French intellect, beginning with the scientific and politico-economical revolt of the encyclopædists, and ending with the literary rebellion of the romanticists under Hugo and Dumas, and it took active, fresh, inquiring minds like those of these quick Frenchmen—men like Lucas and Gratiot—to keep abreast of such a rushing tide. The early American inhabitants, on the other hand,—army officers, and college youths just endowed with their professions and with fortunes and reputations both to make,—were thoroughly imbued with the spirit of English literature before there was any American literature to speak of. Easton, Dr. Simpson, Col. Hammond, the Bateses, Bartons, Bentons, Riddicks, Hempsteads, Tuckers, Lanes, Charless, and the circle in which they moved, having classical tastes and a thorough acquaintance

with the English literature of Queen Anne and the Georges, were eager to welcome everything new which fell from the pen of Byron, Scott, Campbell, Edgeworth, Wordsworth, and their followers and satellites.

In addition to this, St. Louis was a focal point for distinguished European travelers, from Chateaubriand and Talleyrand to Lafayette and the Grand Duke of Weimar. These travelers, after traversing the East, came to St. Louis as to a place where they might refresh themselves once more with a not faint reflection of continental manners and culture, nor did they (if we may believe their own testimony) go away unrewarded. The mental activity of at least the early lawyers of St. Louis was prodigious. They were giants, earning large fees, taking a large and liberal interest in affairs, and studying hard in order to be able to cope with one another. We find Senator Benton taking French lessons from Herr Shewe, and giving more time to the midnight lamp than to the midnight caucus. Dr. Linn, his colleague in the Senate, a man of very broad and generous culture, pursued his profession as a science, and made curious studies into the natural phenomena of the strange region (New Madrid) in which was his home. The eccentric Judge N. Beverley Tucker, of St. Louis County Court, who had his office, his library, and his study in the stump of a hollow tree, did not waste the intervals of leisure which were spared him from the bench. It was in this stump that he wrote "George Balcombe," one of the best novels extant descriptive of Western border life,—"one of the most vigorous of American novels," says Gilmore Simms, "as a narrative of action and the delineation of mental power." Here, too, he wrote "The Partisan Leader," truly what may be styled "an epoch-making book," for, published in 1837, it yet anticipated and mapped out, so to speak, the entire programme of the secession of 1861 as clearly and accurately as if he had been in the confidence of the leaders who conducted affairs at Montgomery, Ala., in the winter of 1861. This book, always a favorite at the South and much read, did a great deal towards inclining, shaping, and moulding the Southern mind to secession, familiarizing two generations with the idea, the expediency, and the practicability of such a last political resort. It crystallized and gave a concrete form and body to the abstract speculations of John C. Calhoun, Robert Y. Hayne, and others of their opinions. Probably no single work of fiction, except "Uncle Tom's Cabin," ever accomplished so much in paving the way for revolution. Judge Tucker, who lived in Missouri from 1815 to 1830, always on his farm in Florissant, St. Louis Co., was a half-brother to John Randolph, eccentric as he, a

States' rights *doctrinaire*, but a man of remarkably clear, logical mind, and of singularly fine reasoning powers. "In his style," says Mr. Simms, "I regard him as one of the best prose writers in the United States, at once rich, flowing, and classical; ornate and copious, yet pure and classic; full of energy, yet full of grace; intense, yet stately; passionate, yet never with a forfeiture of dignity." After he returned to Virginia from St. Louis he became Professor of Jurisprudence in William and Mary College.

In a school where men like Judge Tucker, Rufus Easton, John Scott, Edward Hempstead, and Carr Lane were teachers, and where such talents and such rivalry existed as at the St. Louis bar, it was natural, nay more, it was imperative, that a strong tendency towards high and ornate culture should exist among the members. Other things being equal, the best-read and most polished orator bore off the palm. Accordingly we find what, for a new and wild Western community, must be regarded as a surprising amount of literature among the earlier and later members of the St. Louis bar, not only a superficial smattering for convenience of ready use, but deep draughts at the fountains undefiled of pure literature, and those special studies of particular authors and branches which ordinarily only exist in communities where there is a very advanced state of culture. Here and there would be a lawyer or a doctor who turned his special attention to Horace, or Homer, or Catullus, or the Greek tragedians or comic writers; here one who had read all the epigrammatists and satirists; another who was a specialist in the works of the Greek and Latin fathers; a third who had made a study of the whole Spanish comedy; a fourth with a critical knowledge of the Elizabethan and Jacobean drama; and a fifth with an exhaustive apprehension of the philosophy of Bacon and Locke and the whole sensationist school. One had a gift at quoting from the Latin poets in his addresses to court and jury, another had Sheridan, the Colmans, Cibber, Otway, and all the dramatists of Charles and Anne at his tongue's tip.

This sort of thing gave a zest to the oratory of the bar, and influenced it and the society collected about it very sensibly. No one can pick up Hon. Thomas Hart Benton's "Thirty Years' View" without detecting the fact that the author, without being a very exact or profound scholar himself, was one who looked upon the possession of scholarship as the greatest of treasures, and was willing to toil unceasingly and bestow immense pains to bring himself within the magic circle. His work is elaborated as carefully as William Wirt's (another self-educated man), who thought culture a gem more precious than diamonds. So Hon.

Henry S. Geyer, a lifelong lawyer, and scarcely aspiring to become anything else, used to polish all his speeches as if they were cameos. Mr. Geyer, by the way, was one of the earliest persons in St. Louis to publish a book, his compilation of the statutes of Missouri Territory having come out in 1817. We discover the same scholarly tendency and desire for classical decoration in the false and egotistical memoirs of Gen. James Wilkinson, and in the valuable Tennessee Reports of Return Jonathan Meigs, both of them men intimately identified with St. Louis, where both lived, and they are apparent also in Brackenridge's "Views of Louisiana" and Stoddard's "Sketches of Louisiana," as if they knew that the people of and for whom they wrote were at once scholarly, critical, and capable of criticising severely what was offensive to their good taste.

This period of fine culture among the leisure classes, in the literary history of St. Louis, under ordinary circumstances and in an average state of society, would have been succeeded by a period of literary production and creation. But neither the circumstances nor the state of society were ordinary.

The material and actual crowded in and pressed the intellectual and spiritual into the background; flood after flood, wave after wave of population and material progress swept over the germs of culture and smothered them out of sight under masses of the alluvion of wealth fructifying substance, and the plants did not seem to grow at all, for they were covered under faster than they could shoot up. It was a period of physical growth and of the coarse-fed toil which makes muscle swell and welter like the tight, constricted fold of the python, and this was swiftly succeeded by the volcanic period of intense political excitement, burgeoning forth into civil war and the thrilling strain of a four years' struggle for national existence. This whole period of forty years, therefore, from 1825 to 1865, was unfavorable for the efflorescent and fruit-yielding stage of literary development, which demands comparative restfulness, ease, and quiet. The plowman in the field does not carve and engrave his plow-handles, nor does the soldier in the battle-front or the bivouac engrave his sword-blade. It was time for felling the forest, for preparing the glebe; it was seed-time, but not yet harvest.

The first part of this epoch was the period of the great irruption of immigration, and of the intense and mighty toil necessary to clear the woods away and prepare homes for population in the wilderness. This immigration came from the South, from Kentucky, Tennessee, Virginia, and Maryland, from Indiana,

Illinois, Ohio, New England, Pennsylvania, and New York. There were plenty of educated people, younger sons of cultivated families, old merchants and planters who had failed in the East and who now essayed the virgin West, which offered them a fair chance to "pick flint and try it again;" but the backwoods people exceeded those of education and culture, and the backwoods manner, with axe and saw and plow and steamboat, overcrowded all culture and education, for it was what the times and the situation demanded. If a man could not put his education and culture in his pocket and go to work with his hands with all his might, he would expose himself to what was witnessed a thousand times in the flush days of the early gold excitement in California and Australia, where the "navigators" and convicts and mechanics got out the gold, and the scholars, divines, lawyers, doctors, and statesmen waited upon them and did menial service.

Necessarily and essentially it was a period of work, of physical toil, of the exhaustive labor of building an empire and digging out roads to connect it with the rest of the world. Yet this labor was sweetened and this time of toil prevented from degenerating into the mere animalism of the drudge and the beast of burden by the strong, steady influence of the educated, professional classes, so largely represented at all times in the history of St. Louis,—a body always influential, even by mere force and weight of numbers, but trebly so by force of strong, vigorous intellect and fresh, original characters.

After a generation had passed away, and the city began to be strong in numbers and solidly built, there was a sufficient accumulation of wealth in the hands of the commercial and professional classes to encourage the cultivation of leisure and the arts and amenities which wait upon it. The foundations began to be laid of American literary institutions, scholarship, and culture to supply the place of the last expiring embers of the old European culture of early St. Louis. Schools, colleges, libraries, historical societies, academies of science and galleries of art, the germs of all these were being planted in a purely American way. At this time, however (1848), the great German immigration to St. Louis began, in consequence of the general failure of the revolutionary upheaval in Europe. The first consequence of the introduction of this new element was disturbance, in consequence of a want of coalescence between the new and old factors in St. Louis society. The original St. Louis people were essentially and strongly conservative in politics, opinions, and morals. Pioneers in enterprise and industry and all material objects of human effort, they

were anything but pioneers in thought and speculation. They would not venture to lead here, and they would only consent to follow upon beaten and well-known tracks. The German refugees, on the other hand, were exacting and offensive in the temerity of their radicalism.

To make things worse and widen the gulf separating the two classes of the population, the anti-slavery agitation began to culminate soon after, the Germans all taking sides with the abolitionists, while three-fourths of the remaining inhabitants at first were pro-slavery, or at least opposed to the methods and the propaganda of abolitionism. As this agitation increased and intensified, there was a serious widening of the breach between the two classes of the community, and a coalition, political but not social, was formed between the Germans and what may be termed the New England element in St. Louis, consisting of either natives of the Eastern States or their descendants, immigrants into St. Louis from every part of the West north of the Ohio River. These, with some ideologues and fanatics among them, included many of the thriftiest, most enterprising, and most useful citizens of the place, the men who put up the work-shops and built the railroads, who fostered industry and developed trade in every direction,—men like Thomas Allen, for instance.

The breach widened, the bitter feelings deepened and intensified, and when at last the coalition secured control of the city government, there was almost practical non-intercourse between the two elements. Political violence culminated in physical violence and civil war, and during four bitter years there was almost an entire suspension of all intellectual action and growth, all energies concentrated upon doing and feeling, all brain and nerve-force directed to the one end of co-operation with muscular force.

But it was only a suspension, not a paralysis of intellectual power, and when the war ended and all the new and fully-developed energies of the community were turned back into the old normal and peaceful channels, a new epoch was found to be inaugurated,—that of the present,—one of the strongest elements of which was an energetic and virile mental vigor which demanded and even clamored for expression. It may not have cried always articulately at first, but there can be no mistake about its crying loudly. This epoch has been characterized by a vast and remarkable material and financial development in St. Louis, splendid rivalries, grand conquests over time and space, far-reaching connections, and ambitious international alliances. Intellectual growth and expansion have attempted to keep pace with this great material

growth and expansion, and thought, despising the old grooves and refusing to work in the used, familiar traces, has tried to shake itself free from tradition and leap at once upon the new plane of absolute originality. This we believe to be a fair presentation of what is sometimes called the "St. Louis movement," an attempt, naturally not always successful, to give the schools the go-by, and ally the thinking classes of St. Louis with the most radical opinion-founders of New England and Germany. The attempt is entirely sincere and earnest in its purposes and honestly original in its methods, and nothing but good can finally come out of it, though in its present stages it is hampered by crudities and too much absorbed in self-contemplation. But of this more presently.

We have preferred rapidly to sketch the outline of this literary progress of St. Louis before descending to the details. Let us now go back and glance at some of the writers whose names can be fairly mentioned in connection with the second period,—that of material growth and of the sweat and toil of building up the city. Neither the names nor the written works are very numerous,—people had no time to spare. Yet in this period the St. Louis University and the Washington University were founded, the Historical Society and the Mercantile Library and the Academy of Science. The public school system was wrought out upon a definite and comprehensive plan, and all the germs planted which are now beginning to show such an orderly and stately growth. Of authors proper, the name of Timothy Flint must always be associated with that early tide of immigration from the East, of which he was a pioneer and the earliest chronicler. Born and reared in Massachusetts, his Missouri residence was St. Charles, and yet all he wrote from the West was imbued with the true St. Louis local flavor. He and the Rev. Dr. J. M. Peck were St. Louisian authors by the law of natural selection, just as Drake and Hall were Cincinnatians. Hall lived at Shawncetown, and wrote most pleasantly of old and new Illinois, but Cincinnati was the hub of his thought, and so Timothy Flint's and John Mason Peck's cargoes of fact and fancy all broke bulk at St. Louis. Peck lived at Rock Spring, Ill., but St. Louis was his centre, and his best work was done for St. Louis journals.

The place was so active and energetic, so entirely honest and *naïve* in those early days, that it had a great attraction for fresh minds bent upon frank and free inquiry. All Illinois at that time was just "over the river," and Kaskaskia, Belleville, Edwardsville, Alton were tributary to St. Louis. Robert Owen used to come here to escape from the stagnant pessi-

mism of his impossible perfection at New Harmony, and here he and Madame D'Arusmont (Fanny Wright) used to lecture and have seances, at which the most advanced radicalism was disseminated without hurting any one or even disturbing the general good humor, any more than if rose-water had been sprayed abroad upon the tolerant air. Here, too, Governors Tom Ford and Tom Reynolds and Ninian Edwards used to come, in search of breezes that the flat prairie did not afford. St. Louis was vacation to them after Illinois. John James Audubon used to stroll in too, when he could escape from Louisville, or had time to come out of the woods long enough to gaze and see what civilization looked like. There was a magic charm about the town, and it has not even yet been civilized out of that charm. It abounded in original characters, such as the active mind delights to study. It was here that "Mark Twain" picked up his Col. Sellers, in "The Gilded Age," and gave immortality to John T. Raymond. Sellers was a steamboat captain, and "Twain" probably clerked for him. Mrs. Farnham here got the characters for her speaking portraits of emigrant life, and Mrs. C. M. Kirkland also picked up some of the *floriture* which she needed to embellish her comic pictures from the Michigan flats.

Frederic L. Billon has recorded the fact that he had no sooner arrived here in 1818, with his father, than he began to think of getting materials together for a portrait of the picturesque old town, and he has been employed upon that labor of love ever since, giving to it all the antiquarian's patient research, until he is almost as familiar with the ancient population as he was with his own contemporaries, and far more so than with the present generation. We look upon Mr. Billon's work as almost unique of its kind, and it is so positively un-American. Who else in all this land has done, or attempted to do, such work, except Peter Force, of Washington, D. C.? It must be in his blood,—the patient, careful devotion to minute, microscopic detail of the hereditary Swiss watch-maker,—for while Mr. Billon's mother was French, and a refugee from insurgent San Domingo, his father was Swiss, and a watch-maker, though born in Paris.

Mr. Billon was born in the city of Philadelphia, at the southeast corner of Third and Chestnut Streets, on Thursday, April 23, 1801. He lived in and about that locality, then the business centre of the city, for more than seventeen years. During his youth he went to school for some seven or eight years to Peter Widows, an Irish gentleman of thorough education, a Free Quaker, who taught his school in Church Alley, adjoining Christ Episcopal Church, and just opposite

to another school, under the charge of Capt. Talbot Hamilton, formerly of the British navy, who had served with Nelson in the Mediterranean. At that day there were but few schools in the large cities of the United States taught by Americans, the popular belief then prevalent among all classes being that thorough information could only be obtained from those of foreign birth.

When a school-boy he cared little for such sports as marbles, tops, kites, and balls, etc., but delighted in athletic recreations, such as running and jumping, swimming, skating, rowing, or any amusement that required activity of body or limbs, long walks, etc. During his boyhood, he was frequently indulged in holidays, and made many excursions into the country adjacent to the city in all directions, even to the adjoining counties, from which he became familiar with the surroundings of Philadelphia in almost every direction to the distance of some thirty or forty miles from the city.

During the progress of the war with England in 1812-15, he spent many evenings at home, reading to his father, an indifferent English scholar, from the papers of the passing occurrences of the day. When, in 1814, the British took Washington, and attempted the capture of Baltimore by their attacks on North Point and Fort McHenry, and ascended Chesapeake Bay to its head, although but a lad of fourteen years, he was one of those detailed by the authorities of Philadelphia to work on the fortifications erected southwest of the city, below Gray's Ferry, on the Baltimore turnpike-road, and was on several occasions a visitor at the encampments of volunteers at Kennett Square, Chester Co.; at Camp Dupont, on the Brandywine; and at Marcus Hook, Delaware Co., where some ten thousand men were concentrated.

Leaving school upon the conclusion of the war, in 1815, at the age of fourteen years, he assisted in his father's business, that of an importer of watches and clocks from his native country, Switzerland, and on the occasion of his father's last visit to his native place, in the summer of 1815, following the battle of Waterloo and the second abdication of the first Napoleon, he was left in sole charge of his father's business during his absence of some six or eight months in Europe, as also during his father's frequent business trips to New York, and south as far as Charleston, S. C.

In the summer of the year 1818, business being completely prostrated in all the principal cities at the East, and many turning their attention to the "Far West" beyond the Mississippi, his father, with nine children to set afloat in the world, falling in with the

popular sentiment of the day, concluded to abandon the city with which he had been identified for nearly a quarter of a century and seek a new home for his infant colony in the West beyond the "Father of Waters."

Accordingly, on the morning of Sunday, Aug. 30, 1818, accompanied by his oldest son, the subject of

FREDERIC L. BILLON.

this sketch, then a young man in his eighteenth year, they left Philadelphia in the mail-stage for Pittsburgh, three hundred miles, which place they reached on Friday, September 4th, in six days. From this point they descended the Ohio in a keel-boat, reaching Shawneetown, one thousand miles from Pittsburgh, about the middle of October. Thence they proceeded by land through Illinois to Kaskaskia, crossing the Mississippi to Ste. Genevieve in a canoe, and thence to St. Louis, which point they reached on Wednesday, October 28th, having consumed just sixty days on the route, about the usual time required for the trip at that day.

After spending the winter of 1818-19 in the place selected for their future domicile, and purchasing the old stone mansion of the Labadies, at the northeast corner of Main and Chestnut Streets, for the reception of his family when he should arrive with them in the ensuing fall, his father set out on his return to Philadelphia on horseback in April, 1819, leaving Frederic in charge of his business, and to attend to the alterations and improvements necessary to make his purchase habitable. He reached Philadelphia in

May, remained there a couple of months, and left with his family in July, arriving in St. Louis in September. The family were domiciled in their new home at the close of the month.

The summer of 1819 was a noted one in the annals of St. Louis, for, notwithstanding the great sickness and mortality of that particular year, in the shape of bilious and intermittent fevers, which prevailed to a great extent throughout the settlements on the Western waters, it was the year of extensive military operations on the part of the United States in extending their outposts far beyond their former limits, the old frontier post at Bellefontaine, on the Missouri. Maj. Stephen H. Loug's scientific expedition to the Yellowstone in the "Western Engineer;" Col. Henry Atkinson's ascent of the Missouri with the Sixth Regiment United States Infantry, to establish Fort Atkinson, Council Bluffs; Col. Josiah Snelling's expedition with the Fifth Regiment to establish Fort Snelling at St. Peter's, and other movements of minor importance, requiring the use of numerous steamboats and paddle-wheel barges, of which a number were lost in the Missouri, are vividly impressed upon the memory of Mr. Billon, that being his first summer in the then remote West.

Late in the year 1819 the first "uniformed" company of volunteer infantry west of the Mississippi, styled the "St. Louis Guards," was raised in St. Louis, of which Mr. Billon became a member in the following year, and in 1824 received his commission as ensign of the same from Gen. William H. Ashley, Lieutenant-Governor.

In 1820 he witnessed the excitements attending the adoption of the State Constitution and the establishment of the State government. In September, 1822, his father, Charles F. Billon, Sr., died, leaving the charge of his widow and children to his oldest son, F. L. Billon, who had just attained his majority.

His first vote was cast for the acceptance of the city charter in February, 1822, from which date he has been a voter at every city and State election down to the present day, as also at every Presidential election in the State from the first in 1824, and was an eye-witness and participant in many interesting events and occurrences connected with the town, city, and State governments in that early period of St. Louis' history.

In the year 1827, while absent on business in Philadelphia, he was elected an alderman from the central ward of the three into which the city was then divided, and in 1828 was re-elected to the same position.

On May 20, 1829, his brothers and sisters being

mostly grown to maturity and disposed of, he himself entered the married state with Miss E. L. Genereley, like himself a native of Philadelphia of French parentage. With this lady he passed thirty-six years of wedded life until her death, Feb. 4, 1865. He was the father of twelve children, but three of whom survive.

In the year 1834, his health being materially impaired by his constant devotion to business, he, by the advice of his physician, the late Dr. William Carr Lane, made a trip to Santa Fé and the Rocky Mountains, then not a trifling undertaking, requiring some ninety to one hundred days in crossing the plains with wagons and ox-teams, and returned in the fall much improved in health.

In 1851-52 he was twice nominated by Mayor Luther M. Kennett to the position of city comptroller, and on each occasion unanimously confirmed by the board.

In 1853 he was appointed the first auditor and general book-keeper of the Missouri Pacific Railroad, filling the position for five years, and then succeeded, in 1858, to that of secretary and treasurer of the same company, resigning the office at the close of the year 1863, after some eleven years in the service of the company. Since that period he has devoted much time to literary matters, more particularly to the task of gathering up the data and materials for an early history of the country bordering the Mississippi in its entire course, in the pursuit of which he is still occupied at the age of eighty-two years.

Lewis C. Beck came to St. Louis in 1820 from Albany, N. Y., looked around him and took notes, and then returning, published in 1823 the first gazetteer of the State, and the pioneer of many other publications of this hard-working compiler. Senator Benton, besides his self-drill in his library and that of Congress, had a practical training as editor before he began to write that "Thirty Years' View," that ponderous royal octavo, of the first volume of which sixty-five thousand copies were sold almost on the day of publication. He used to write the notices of his own speeches, but besides that he was an editor in his own person.

Sergeant Hall, lawyer, came from Cincinnati early in 1817, and assumed charge of the paper gotten up two years previously in opposition to Charles' *Missouri Gazette*, the first number of which had been issued by Joshua Norvell, from Nashville, Tenn., in May, 1815, under the title of the *Western Journal*. Hall issued his first number on May 17, 1817, under the title of the *Western Emigrant*, and two years later still, in the summer of 1819, it was again changed to the *St. Louis*

Inquirer, under the management of Col. Thomas H. Benton. After the charge of the paper passed from Mr. Hall he returned to Cincinnati.

Edmund Flagg, born in Wicasset, Me., can show one of the most industrious and reputable literary careers in the country. Graduating at Bowdoin College in 1835, he removed to St. Louis and established a school, but subsequently studied law in the office of Hon. Harrison Gamble, and in 1837 was admitted to the bar. Throughout this period he wrote for the *Republican*, and at the request of A. B. Chambers made a stenographic report of the speech of Daniel Webster, delivered at a barbecue in Lucas Grove in 1837. He also wrote an ode which was sung at the Fourth of July celebration of that year. The "New Year's Address" of the *Republican* carriers for 1838 was written by Mr. Flagg, and in the same year a series of articles on Western life and scenery, which he had contributed to the *Republican*, were compiled and published by the Harpers, of New York, in two volumes, under the title of "The Far West, or a Tour Beyond the Mountains."

During 1838, Mr. Flagg became associated with Col. S. B. Churchill in the editorial management of the *St. Louis Bulletin*. Subsequently he edited the *News-Letter*, published by George D. Prentice, at the office of the *Louisville Journal*, in 1840; the *Whig*, published at Vicksburg, where he was severely wounded in a duel with Dr. James Hagan, editor of the *Sentinel*, the *Gazette* at Marietta, Ohio, and the *Evening Gazette* at St. Louis. While at Marietta, in addition to the discharge of his editorial duties, he wrote a series of "Tales" and political papers for the *New York New World*, published by Park Benjamin, in 1842 and 1843. After his removal to St. Louis he became agent of the Home Mutual Insurance Company, and in 1845 was appointed reporter for the State Constitutional Convention of Missouri. During all this time (subsequent to the termination of his connection with the *Evening Gazette*) he continued to contribute articles to the *Republican*. In 1847 he was appointed official reporter of the courts of St. Louis, and afterwards wrote several plays, one of which, "Mary Tudor," was adapted to the stage for Mrs. Farren, and was produced by Sol Smith at New Orleans and elsewhere with marked success.

In the spring of 1848, in conjunction with Pierre C. Grace, he wrote the address for a mass-meeting of the citizens of St. Louis to the revolutionists of Europe, and about the same time produced the "Howard Queen," a prize tale for the *St. Louis Union*. Soon after this he went abroad as secretary to Hon. Edward A. Hannegan, minister to Berlin.

During his stay at Berlin he corresponded for New York papers, and wrote a sequel, entitled "Edmond Dantes," to Dumas' novel "Monte Christo." In 1850 he wrote a prize tale for the *Louisville Courier*. For this and an address for the opening of Bates' new theatre and the amphitheatre he received three prizes in one month, aggregating three hundred dollars. In 1851 he was appointed consul to Venice, and on his return became the editor of the *St. Louis Times*. During this year (1853) he wrote "Venice, the City of the Sea," which was published by Scribner, of New York, in two finely illustrated volumes, and in the following year furnished a series of articles for Myers' "United States Illustrated." About this time he was appointed superintendent of statistics in the State Department by Secretary Marcy, and while occupying that position prepared four quarto volumes on the commercial relations of the United States. In 1860 he resigned his position, and became the Washington correspondent of the *New York Tribune*, *Louisville Journal*, and *St. Louis Democrat*. He was afterwards appointed librarian of copyrights in the Interior Department, and on the transfer of the collection to the Congressional Library retired to private life. Mr. Flagg wrote the novels "Carraro, the Prime Minister," "Francis of Valois," "The Howard Queen," "Blanche of Artois," and several other romances and plays, all in print.

James D. Nourse, who, while editor of the *St. Louis Intelligencer*, died of cholera, in 1854, was an author of prominence and a contributor to many periodicals. He was born in Bardstown, Ky., in 1816, studied both law and medicine, and had a wide and varied editorial experience. His two novels, "The Forest Knight" and "Leavenworth," have both been praised by Dr. R. W. Griswold for their accuracy and spirit in the delineation of Western life; his "Philosophy of History" won the commendation of so fastidious a critic as H. T. Tuckerman, and Horace Binney Wallace found weighty and original thinking in his last work, "Remarks on the Past, and its Relations to American Society, or God in History."

Another of the newspaper *literati* of St. Louis was John S. Robb (the "Solitaire" of the *St. Louis Reveille* and of the *New Orleans Picayune*), the humorist, who, in conjunction with Madison Tensas, wrote "The Swamp Doctor," a book famous in its day, and which still holds its own with Drake's "Mike Fink," Thorpe's "Tom Owen, the Bee-Hunter," and Hooper's "Simon Suggs." Charles D. Drake, by the way, was a St. Louis editor himself, besides being one of the original founders of the St. Louis Law Library. The brothers, Joseph M. and M. C. Field, were prominent

writers for the brilliant *Reveille*, of which Joseph was one of the editors. Both were poets of no common order, and their verses had a very wide circulation. There was a certain mingled grace and fire in their *timbre* which was exceedingly attractive. Joseph Field was one of the favorite writers of the *New Orleans Picayune*, in which his well-known *nom de plume* was "Straws." He was a dramatic writer of skill, and many of his plays were successful upon the boards. He was very fond of the theatre, and was, indeed, the first manager of the old "Varieties." It was through him that Solomon Franklin ("Sol") Smith first came to write for the press and became a regular contributor to the *Reveille*.

John Hogan (Rev.) used to be one of the best-known and most useful writers for the press in St. Louis. He was a native of Ireland, born in 1805, and came to this country in 1817, making his first home in Baltimore, where he was apprenticed to a shoemaker. He taught himself to read by spelling over the columns of the old *Federal Gazette*, and so may be said to have taken naturally to newspapers. When he grew up he became an itinerant Methodist preacher, and drifted westward to the Illinois Conference. After engaging in business in Edwardsville and Alton, he removed to St. Louis in 1845, clerked, was in the grocery business, and then insurance agent. He began at this time to write those studied and thoughtful papers on the resources of St. Louis which attracted such attention and did the business interests of the town so much good. The merchants presented him with a testimonial service of silver, and his political friends secured for him from Mr. Buchanan the appointment of postmaster. Mr. Hogan's "History of Methodism in the West" is a careful and useful compilation, prepared in his customary painstaking way.

The history of the press of St. Louis is given so fully and completely in another place that, to avoid repetition here; we are able to say but little concerning the writers who have contributed to its resources. Joseph Charless, the founder of the *Gazette*, not content with being a simple editor, with patient toil and study, sought to grasp at his ideal of literary excellence in scholarship and style. His successor, Nathaniel Paschall, had the same thirst for letters, and studied as patiently to excel. No editor ever wielded the leading writer's pen for a longer time or to a better purpose than Mr. Paschall. He was a recognized force, an embodied influence in the community, and always for the community's advantage and betterment, writing solid argument on the truth's side, for the truth's sake, and without abuse or per-

sonality. In this good work George Knapp has always been by his side,—a man, self-made, who deserved all his successes and prosperity.

Charles Keemle, born in Philadelphia in 1800, was as early as 1817 in charge of the *St. Louis Emigrant*, the second journal west of the Mississippi, afterwards merged in the *Inquirer*. Keemle's life bristled with adventure. He went to the Rocky Mountains as clerk to the American Fur Company before he had attained his majority, and fought a desperate battle on the Yellowstone fifteen years before Custer was born. He had half a dozen newspapers in St. Louis at different times, and filled many public offices. He, with J. M. Field and his brother, founded the *Reveille* in 1845, and during the five years of its existence it was undoubtedly the best literary paper in the West.

The late Thomas Allen was what might be called a born newspaper man, and if his fortunes had required it he could readily have made his living as editor, leader-writer, correspondent, or literary contributor. He had the talent, the aptitude, the training, and the taste which go to make the first-class utility man for the press. Part of one of his letters to Andrew Jackson Downing, of the *Horticulturist*, quoted in another part of this work, reveals what must be considered as a rare faculty for the delicate and difficult parts of authorship. He was in boyhood a pupil of Mark Hopkins, and that great teacher never had better material put under his hands to shape. Allen began to write from the jump, and edited a juvenile *Miscellany* before he was sixteen. While studying law his pen earned his support, and he edited a family magazine so well that he ran it up to twenty thousand subscribers. In 1837 he started a newspaper in Washington City, and got the public printing, in spite of Blair & Rives and Gales & Seaton. In 1842 he came to St. Louis. Here, without identifying himself with the press, he wrote much, and his pamphlets are notable for the apposite manner and force with which the marrow of a subject is probed. None ever knew better than Mr. Allen how to say the right thing in the right place, and to say it forcibly without offense, and genially without dulling the edge of the argument.

Hon. John Fletcher Darby rounded up the leisure and slipped ease of a long and useful life in St. Louis by contributing his "Personal Recollections" to the press. These were collected into a neat and comely volume before he died, and this kindly and single-hearted old gentleman could not have a more appropriate or better monument. The book is as unpretentious as it is valuable, such a fund of rem-

iniscence as each succeeding age will treasure the more dearly as it recedes from the present.

Dr. M. L. Linton, a professor in the St. Louis University, medical department, and a leading physician, established the *St. Louis Medical Journal* in 1843, and has written professional works which bear the stamp of great ability. Of such is his "Outlines of Pathology," a text-book in several colleges, and consulted both East and West. Dr. Charles A. Pope, Linton's colleague, classmate, and contemporary, is at least his equal in literary ability, and his superior in wide-spread surgical renown. As the eighth president of the American Medical Association, he took a position which was national in its prominence.

It was in the school of Benton, Geyer, Easton, and the other brilliant luminaries of the St. Louis bar that Judge Wilson Primm learned to embellish his legal attainments with the decorative apparatus of literature. Well did he weave the ornamental and the useful together, so that one could scarce distinguish the essential from the non-essential in his speeches and addresses, full of fire and flow, full of scholarship, and full, also, of quaint antiquarian lore, such as only the enthusiast would think of gathering together from the disjointed memories and babbling lips of granddames and nurses. Out of these, however, Primm was skillful to frame a connected and coherent narrative, and capable to launch it with sensational effect upon his roused and excited audiences. Probably nothing ever did so much towards rousing a genuine inquiry and a sympathetic interest in the eradle period of St. Louis as the several commemorative addresses of Wilson Primm, which, in addition to their sincerity and fire, are literary productions of merit and value, embellished with neat classical touches, and not too florid in style for the theme and the occasion. It was upon one of these very occasions, by the way, if we mistake not, or a nearly similar one, that the Abbé Adrian Rouquette, of Louisiana, seminarian of New Orleans, and recluse of Mandeville, St. Tammany, delivered his animated and eloquent French discourse at the St. Louis Cathedral, keeping up and renewing, with singular appropriateness and excellent effect, the old connection and kinship between Upper and Lower Louisiana. Judge John Marshall Krum, one of Primm's associates and contemporaries, was the author of a most laborious work, "Missouri Justice." Mann Butler, the original and vigorous historian of Kentucky, was practicing law in St. Louis at the time he began the preparation of his work, to complete which he had to remove to Louisville, in order to consult the State's records.

Right Rev. Cicero Stephens Hawks, D.D., Bishop of Missouri of the Protestant Episcopal Church, was another scholar of comprehensive and signal ability, worthy representative of a family eminent in literature and the church. He was consecrated Bishop of Missouri at the early age of thirty-two years, and he wrote some things which make us regret that the church had superior claims upon him to literature. Two of the brightest of our early juvenile series, quite the pioneers in that difficult but most fascinating walk of letters, were edited by him,—Harpers' "Boys' and Girls' Library" and Appleton's "Library for my Young Countrymen," the latter one of the best of the kind ever published anywhere. Dr. Hawks also wrote several of the volumes of "Uncle Philip's Conversations," and was the author of "Friday Christian, the First-Born of Pitcairn's Island." Old boys of fifty will remember these books with the kindest and most friendly interest, as the friends whom they took to bed with them that they might hold converse together by surreptitious candle-light.

Rev. N. L. Rice, D.D., was pastor of the Second Presbyterian Church of St. Louis. Dr. Rice wrote many tracts and pamphlets, revealing profound acquaintance with theology, skill in dialectic fence, and that *gaudia certaminis* which drives so many of his brethren to plunge to the neck in the hot waters of polemical controversy. His "Debates on Baptism," his "Debates on Slavery and Universal Salvation," and his tract against "Romanism" are still remembered by persons of his way of thinking. Rev. William Stephen Potts, pastor of the First Presbyterian Church, president of Marion College, etc., whose connection with St. Louis began in 1828, published many sermons and addresses, and he is ranked very high among divines of literary ability by Dr. Sprague in his "Annals of the Pulpit."

In 1867 died Edward William Johnston, a *litterateur* and newspaper writer of very rare and unusual talent and experience. He was sixty-eight years old, native of Virginia, brother of Gen. Joseph E. Johnston, and a man of very high culture and delicate literary perceptions. In early youth he was Professor of History and Belles-Lettres in the University of South Carolina, but abandoned the professor's chair for journalism. He was first associated with John Hampden Pleasants in the editorial management of the *Richmond Whig*. Afterwards, for ten years, he was associated with the *National Intelligencer* as literary editor of that journal. He was subsequently connected with the editorial staff of the *New York Times*, and is remembered for his brilliant correspondence with the *Philadelphia North American* and the

Louisville Journal. In 1855 he came to St. Louis, and was associated with Mr. Mitchell in the editorial direction of the *Intelligencer*. When the *Leader* was established, Mr. Johnston was invited to take the place of associate editor of that journal. He continued in that relation till the paper closed its career, when he was elected librarian of the Mercantile Library in 1858, occupying that post for three years. In that capacity his rare knowledge of books and his familiarity with the whole range of literature, his judgment and taste made him a most valuable auxiliary in building up that magnificent library, and establishing its character as one of solid and substantial value in the various departments of science, philosophy, history, and general literature. A catalogue of the library was compiled by him, the principle of its arrangement and classification being his own.

Mr. Johnston was conspicuous for the versatility and range of his knowledge, for his refined, discerning taste, and his ripe, masculine judgment. He thought robustly, had the courage of his opinions, and could state them with suave courtesy in a style as correct and graceful as it was brilliant and vigorous.

The history of St. Louis University is elsewhere written, but it deserves mention here in connection with the development and promotion of literature and culture in the city. The people who founded this university were highly educated, and as capable of appreciating the value of education as any religious denomination in the world. The Jesuit, indeed, counts upon ruling the world as much by force of superior knowledge and wisdom as by the superior quality of his faith. St. Louis was the Western outpost of civilization, and the church and it should be strongly guarded. Bishop Dubourg, Bishop Rosatti, the neighboring bishops, Flaget, of Bardstown, and Bruté, of Vincennes, and Fathers Van Quickenbourne, Verhaegen, Vandervelde, Ellet, Carroll, Van Assche, and De Smet, who were all associated with the foundation of the university, were men of exceptional learning and culture, well bred, highly educated, and many of them born to affluence and rank. Who does not know the history, the labor, the toils and triumphs of De Smet, a Jesuit worthy to be the successor of Brébauf and L'Allemand, of Jogues and Marquette? His simple and *naïve* account of his mission work has all the attractiveness of a romance. Is it not a romance,—the romance of religious devotion? De Smet sleeps and is at rest in beautiful Florissant, but his work goes nobly on. We will not pretend to enumerate the literary achievements of the professors and graduates of St. Louis University.

Does Oscar W. Collet, now the genial secretary of the Missouri Historical Society, recollect the speech which, in 1837, while he was still a student, he fired off at Daniel Webster when that statesman visited the University? It was young then, like Mr. Collet. It has reached a grown age now, like Mr. Collet, and doubtless can look back upon its past career with a satisfactory amount of complacency. To-day the institution is doing very good work, never better, and it deserves the esteem in which it is held.

Among the fine scholars who have taught in this university we may name Professor Rudolph Leonard Tafel, Ph.D., who emigrated to the United States in 1847, and became Professor of Modern Languages and Comparative Philology in the university. He has written an "English Pronunciation and Orthography," translated Le Bois de Guays' "Letters" into German, and written a volume on Emanuel Swedenborg. In conjunction with his father, he published in 1860 a work on "Latin Pronunciation and the Latin Alphabet," and he has written several articles for the "Bibliotheca Sacra." John Frederick Leonard Tafel, his father, has a still more considerable record. He too lived in St. Louis, after having been Professor of Languages at Urbana (Ohio) University. Before emigrating to the United States he taught in the Gymnasiums of Ulm and Stuttgart and the Academy of Schorndorf, being an alumnus of Tübingen. In 1836 he wrote a book in defense of the Hamiltonian system of teaching, and he published many text-books on the modern languages in accordance with this system. The subject of school reform and radical changes in all the principles and practices of pedagogy engaged his earnest attention. He edited and published a complete edition of Livy, and made German translations of Xenophon's *Anabasis*, Dio Cassius, the greater part of Scott's novels, with one each of Cooper's, Dickens', and Thackeray's. He also wrote two theological works, "Staat und Christenthum" and "Der Christ und der Atheist," and at different times was editor of the *Ausland* (published by Cotta), the *Reichstag Zeitung*, and the *Beobachter*. To crown all, he published a "New and Complete English-German and German-English Pocket Dictionary."

We have already alluded indirectly to some of the work of Professor Walter H. Hill, S.J., who fills the chair of moral philosophy in the St. Louis University. He has written a treatise on "General Metaphysics, or Logic and Ontology," in addition to his "Moral Philosophy," and is, moreover, the historiographer of the institution,—a man profoundly read in the works upon the scholastic philosophy, and

with quite a faculty for direct logical statement. Indeed, it would be impossible for any one to reason more close to the line. He follows the syllogism as closely as the plowman follows the plow in the newly-opened furrow. It is seldom that we come across text-books so learned as those two tractates of Professor Hill. They are founded upon Aristotle, to the Latin versions of whom there are continual marginal references; but the references do not stop here. They show an acquaintance with all the commentators and with all the shining lights of the scholastic philosophy. Irenæus, Billuart, Suarez, Lessius, Mill, Blackstone, St. Augustine, Becanus, Gonat, Des Charmes, Gotti, St. Thomas Aquinas, Gregory Niensis, Jeremy Bentham, Brande, Aulus Gellius, Sir John Fortescue, Kent, Sir Francis Palgrave, Justinian, Tacitus, Plato, Seneca, Isidore, Paley, Bartolus, Cajalan, Cardinalis, Toleti, Wheaton, Vattel, Judge Dillon, Timothy Walker, De Maistre, Hobbes, Rousseau, Monbodo, Cornelius à Lapide, Bellarmine, Bishop Ullathorne, Orestes A. Brownson, Publius Syrus, Cardinal Manning, each in his turn, ancient or modern, renowned or obscure, is made to contribute something to strengthen the learned author's argument or illustrate his position.

It must be confessed that the above is a rather meagre record to cover the literary performances of nearly forty years. But it was, as we have said before, the period of action and muscular growth, and not the period of brain-work, and especially the reflective work of the brain. As the eloquent William Henry Milburn, the blind preacher, said in one of his lectures; "The demands upon American mind have been of too pressing and urgent a character to allow it to devote much time or attention to the specific pursuit of letters. Here was a continent to subdue; a wilderness to be reclaimed; mountains to be scaled; lakes, oceans, and gulfs to be joined together; and meantime the supplies for daily necessity and daily consumption to be raised and conveyed to market. Men must have bread before books. Men must build barns before they establish colleges. Men must learn the language of the rifle, the axe, and the plow before they learn the lessons of Grecian and Roman philosophy and history; and to these pursuits was the early American intellect obliged to devote itself by a sort of simple and hearty and constant consecration. There was no possibility of escape, no freedom or exemption from this obligation."

This exactly fits the case of the transition period we have been describing in the history of the literature of St. Louis. For the period which succeeded it, the modern and contemporary period, we present

the following record, prepared for the present work by Professor H. H. Morgan, of St. Louis. We must say that in many instances we do not accept Mr. Morgan's conclusions, and are far from approving his judgments, though we do not for a moment question his sincerity. But his facts have been carefully gathered, and are laboriously put together and skillfully grouped, and with these facts before him (the essential matter, after all) the reader will easily be able to form his own conclusions.

Mr. Morgan thinks and contends that "the literary interests of St. Louis are recent. For a long period politics, the press, and occasions of ceremony absorbed all the energies of our writers. To be sure, there have always been individual citizens who, like Dr. Eliot, have kept alive their enthusiasm for literature and the other fine arts; but the influence of these individuals, while uniformly great, could not make short the period which elapsed before the results of their labors should become manifest. Continuous progress began about 1857, when Dr. W. T. Harris removed to St. Louis and formed the acquaintance of Governor Brockmeyer, whose stimulating influence has counted for so much in our city, while at the same time his written work has been anything but voluminous. This acquaintance led to an active interest in metaphysics, and was directly productive of the Philosophical Society. The original membership of this body embraced Governor Brockmeyer, Dr. Harris, D. J. Snider, Judge Jones, Dr. Hall, Dr. Walters, C. F. Childs, Professor Howison, Dr. Hammer, and B. A. Hill, and their efforts had sufficient validity to justify visits from Ralph Waldo Emerson, A. Bronson Alcott, Mrs. Julia Ward Howe, and others of the speculative *illuminati* of the East. Out of this society there naturally grew the publication of *The Journal of Speculative Philosophy*, the earliest Western periodical of more than local reputation and influence. Through his work upon the *Journal*, and his addresses and reports while acting as superintendent of our public schools, Dr. Harris gave to much of the literary effort of St. Louis a distinctive character, and drew around him, either for co-operation or opposition, almost all who were interested in intellectual activity. The third step was the publication of *The Western*, in 1875, a miscellaneous magazine, begun by those who recognized Dr. Harris as the most eminent figure in our local life. The welcome given both by the *Journal* and by the *Western* to sterling contributions, irrespective of the section from which they proceeded, soon made St. Louis known to students throughout the country.

"The fourth step in this movement was the establishment of clubs, which drew together men like Governor Brockmeyer, W. T. Harris, F. L. Soldan, Professor Howison, D. J. Snider, A. E. Kroeger, Thomas Davidson, B. V. B. Dixon, F. E. Cook, H. H. Morgan, William M. Bryant; and from among the ladies of the city, Miss Mary E. Beedy, Miss A. C. Brackett, Miss Grace C. Bibb, Miss Fannie M. Bacou, Miss Sue V. Beeson, Miss Julia A. Dutro, Mrs. E. S. Morgan, Miss Gertrude Garrigues, and Miss Hope Goodson. The fifth stage was the formation of classes of ladies by Dr. Harris, D. J. Snider, F. L. Soldan, W. M. Bryant, B. V. B. Dixon, Professor J. K. Hosmer, and Rev. J. C. Learned. These classes, having chosen one of these gentlemen as director, studied the philosophy of history, the philosophy of art, Shakespeare, Greek poetry, or German, French, and Italian literature. Simultaneous with this period was the beginning of clubs which do or do not represent the direct influence of Dr. Harris and his co-laborers. The Novel Club flourished for several years, and, under the leadership of Rev. John Snyder, Professor J. K. Hosmer, Professor M. S. Snow, Judge Thayer, and Mrs. Hope Goodson Reed, accomplished much of value. Subsequently, but sufficiently near in time to find this a proper place for mention, there were formed numerous clubs of ladies, who met to pursue some study. A club met at the house of Mrs. Charles Nagel and pursued the study of Greek history, specially Greek literary history. Another group of ladies gathered around Mrs. Dr. W. E. Fischel and took up the mediæval history. Other associations of similar character were carried on at the homes of Mrs. Nathan Stevens, Mrs. Dr. Briggs, and Mrs. William Ware.

"The sixth stage introduced classes which met under the special conduct of gentlemen such as Dr. Harris, D. J. Snider, William M. Bryant, Professor J. K. Hosmer, F. L. Soldan, and B. V. B. Dixon. Miss Susie Blow, Mrs. J. W. Noble, and Mrs. R. J. Lackland were the most earnest movers for this special activity. The seventh and present stage has introduced the formation of similar classes upon the part of gentlemen, and these classes include many of our most capable students as well as large numbers of our most promising young men.

"These stages represent what has sometimes been called the 'St. Louis movement.' To Governor Brockmeyer is due the honor of its inauguration and the responsibility for its special characteristics; to Dr. Harris is due the credit of working out in concrete form and upon a large scale an influence which in its inception was wholly individual. The 'St. Louis movement' may be sufficiently characterized as

an attempt to find the idea which inspires and controls all rhetorical and literary forms which are not empty, and this characteristic will be traceable in the writings of all the co-laborers, no matter how diverse the nature of their specialties.

"The educational efforts to which also St. Louis owes much of its literary activity began earlier than the period which we are considering, but owe much of their value to Dr. Harris and the others whom we have had occasion to mention.

"The earliest name of note in our educational history is doubtless that of the Rev. W. G. Eliot, whose direct efforts began during his connection with the Board of Public Schools, and have since been continued through his services in connection with the university of which he is the chancellor. While this is not the proper place for the full discussion of our educational history, yet as to an unusually large extent the laborers in the fields of literature and art have been found among our professors and teachers, the most eminent must receive mention. Beginning with teachers such as Dr. Eliot, J. H. Tice, Ira Divoll, W. T. Harris, Miss Mary E. Beedy, Miss Sue V. Beeson, W. M. Bryant, T. R. Vickroy, Miss A. C. Brackett, Miss Grace C. Bibb, Miss Kate Wilson, Miss Hope Goodson, Miss Fannie M. Bacon, Miss Julia A. Dutro, F. L. Soldan, Thomas Davidson, B. V. B. Dixon, E. H. Long, D. J. Snider, George B. McClellan, W. H. Rosenstengel, William Deutsch, Chancellor Hoyt, Chancellor Chauvenet, Professor Waterhouse, and Professor Howison, the incitements to intellectual efforts were communicated first to those who were affected by these teachers, and later to those outside of their direct influence.

"More recently, as the Washington University has matured, it has contributed much through the efforts of Professors Hosmer, Snow, Woodward, Ives, Nipher, Engler, and Curtis. Popular lectures have been inaugurated by the university, and for three years our Public Library has maintained a free lyceum.

"The activity represented by Dr. Harris and those who have gathered around him has been literary, philosophical, and æsthetic, dominated, as has been said, by one leading idea. It is probably no overstatement to say that by this activity St. Louis is known away from home. The services rendered by Professor Hosmer, Professor Woodward, and others are, like those of Judge Holmes, special, and can be most fitly discussed each by itself.

"To this there must be made the exception of Dr. Eliot and of Professor Waterhouse, for in time they antedate Dr. Harris, and share with him the credit of exciting all the activity which has taken place since they

began their labors. Dr. W. G. Eliot has, during his long residence in our city, unremittingly sought to build up all interests, moral and intellectual. To him directly is due the residence of many of our brain-workers and their constant incitement to labor.

"Professor Waterhouse has not only felt an absorbing interest in political economy, or social science, but through a long period of years he has, by his profound comprehension of his subjects and his clear presentment of his views, been an influence as strong as he has been individual.

"To conclude this general survey, it may be said that the past twenty-five years have, in spite of the interruptions caused in our city by the civil war, comprised an intellectual history of which any city might be proud; and the future can but add to the influences which must make St. Louis well known in circles other than those of commerce.

"Separate mention is due to such of the gentlemen and ladies who most specifically represent the activity whose history has been recited. For this purpose it will be convenient to arrange the names in the order of the several movements.

"Dr. W. G. Eliot's activity has been so incessant and so varied that his ready sympathy with the claims of higher culture has been but a phase of his life. His own literary efforts have mostly taken the form of sermons and addresses, although he has drawn upon his scanty leisure to prepare for publication several miscellaneous works. Through his care as chancellor of the university he has gathered around him a number of earnest, capable, and indefatigable workers, who have in various ways contributed to the intellectual development of our city.

"Since his residence in St. Louis, Dr. Eliot has been prominently identified with movements looking toward the betterment of the community to which he belonged. It was in connection with him that Mr. Wayman Crow and his associates sought to realize in the Washington University facilities for an education for our boys and girls higher than could be afforded by the public schools. As Dr. Eliot's name must occur in various parts of the history, it is unnecessary to repeat his personal biography, and we may more profitably characterize his services in the direction of literary effort. His peculiar contribution has been the exciting and directing of intellectual activity and an unusual perception of the fitness of instrumentalities. Notwithstanding the fact that he has contributed several works to our literature, yet his sermons and addresses have absorbed more of his energy, while he has found his most constant field of effort in inaugurating beneficent enterprises and in stimulating

specialists to devote their energies to the maintenance of institutions thus begun.

"Professor Sylvester Waterhouse is confessedly one of our most arduous and successful brain-workers, and the services rendered by him to the city of his adoption are inadequately represented by a recital of his writings or an enumeration of the positions of honor and trust which he has been invited to fill. It may in all sincerity be said that his many acquaintances consider him equal to any responsibilities which he might choose to assume, and know by experience that when he has felt at liberty to serve in various commissions that he has brought to his task rare qualifications. Apart from an unusually clear and analytical mind and a command of diction which enables him to express concisely and lucidly any conclusions at which he may have arrived, Professor Waterhouse has an unusual share of that intellectual integrity which constitutes the chief grace of exceptional men. From 1857 to 1883, Professor Waterhouse has labored persistently, not even stopping to lay claim to projects originated by himself and accredited to others. While many a man possessing his opportunities would have confined his labors to departments which were directly remunerative, or would at least have used his legitimate opportunities to extend his personal reputation, Professor Waterhouse has been too much possessed by the spirit of the investigator to delay for any personal considerations.

"Born in Barrington, N. H., in 1830, he was the victim of an accident, and when but ten years of age lost his right leg. The effect of this upon the life of a man of active temperament can easily be imagined, but there was too much sturdy manhood in the sufferer to admit of his being discouraged, even though the conditions for fair competition had become so burdensome. Persisting, in spite of the adversity of fortune, in his determination to acquire an education, he graduated with high honors from Phillips' Exeter Academy in 1850, and matriculating at Dartmouth College, soon changed to Harvard, from which institution he graduated in 1853. His collegiate course, as well as his academic, was marked by proficiency in scholarship. The ensuing two years were occupied in completing the course in the Harvard Law School.

"In 1856 he was appointed Professor of Latin Language and Literature in Antioch College, whence in 1857 he removed to St. Louis to begin his long career of educational usefulness as Professor of Greek in the Washington University. He is now the senior professor in actual service, though not in appointment, although younger in years than others of the faculty. Very frequently professors and teachers, like men in

all other callings, find the routine of their lives sufficient for their energies. Far otherwise has it been with Professor Waterhouse, who has almost disregarded the fatigue of his regular work, and pursued his special investigations as though there were no other strain upon his strength. It is to his quiet, unconscious influence that St. Louis owes much of the activity that seems most directly to proceed from other sources.

"In 1867, Professor Waterhouse was a member of the Mississippi River Improvement Convention, and rendered invaluable service. In 1871 he was appointed by Governor Brown a member of 'The Bureau of Geology and Mines' for Missouri. In 1872 he was elected secretary of the St. Louis Board of Trade.

"In 1873 he made a trip around the world, and increased his profound acquaintance with the subjects which had occupied his interest. In 1875 he was a member of the National Railroad Convention. In 1877 he was again sent as a member of the Mississippi River Improvement Convention, became the secretary of its executive committee, and prepared the memorial to Congress. We in St. Louis believe that to this memorial, which was widely circulated, is due the change of sentiment, and the consequent appropriation of amounts more adequate for the performance of work much needed. In 1878 he was appointed United States commissioner to the Paris Exposition. During the civil war Professor Waterhouse's pen was constantly in requisition, as he was an active participant in the labors of the Western Sanitary Commission.

"For many years the professor was called upon to co-operate with the Missouri State Board of Immigration. In 1863 he was requested to pronounce a eulogy upon Chancellor Hoyt, and acquitted himself with his customary ability.

"Professor Waterhouse's interest in our industrial affairs, while by no means absorbing all of his energies or narrowing his sympathies, has in the main dominated his written work. His articles upon iron manufacture in Missouri were partly at least the cause precedent, if not the cause efficient, of the great industries which have since been developed. His articles upon the cultivation of jute in the United States have been honored by the highest recognition upon the part of the United States commissioners of agriculture. A very wide circulation, their translation into French and German, and the utilization of his ideas by various individuals and corporations are public proofs of their value. All this manifold labor Professor Waterhouse has done without compensation, and frequently at his own personal expense.

"Lieutenant-Governor Henry C. Brockmeyer is, as has been already stated in brief, one who has powerfully influenced the turn of thought upon the part of many who have been largely responsible for St. Louis' intellectual activity. Governor Brockmeyer would be noticeable anywhere for clearness, profundity, and sanity of thought, and for a remarkable power over words that burn. While his written work is so small in quantity, no one can come in contact with him without being sensibly stimulated. Born in Winden, Prussia, in 1828, he left home when sixteen years of age for New York. He first visited St. Louis in 1848, but did not at that time make the city his permanent residence. In 1857 he returned to St. Louis, and since 1858 has been identified with it. His energies have been mostly exercised in political life.

"Dr. W. T. Harris has been, as already said, the most prominent factor in our intellectual development. The incessant activity of his mind, his fertility of resource, and his unquenchable enthusiasm entitle him to a lasting and prominent place in any local history. Apart from the activity which Dr. Harris' efforts excited, his work may be summarized as the giving to St. Louis a high reputation in all educational circles, and the earning of foreign recognition for the metaphysical work of American students. In the conduct of the *Journal of Speculative Philosophy*, Dr. Harris has opened generously its pages to views however different from his own, and has thus done much towards the creation of a sodality among the students of mental philosophy. Born in Connecticut in 1835, he came to St. Louis in 1857, and while a resident was always connected with the public school system, as assistant teacher, principal of a district school, assistant superintendent, and finally as superintendent. Finally he changed his residence to Concord, Mass., and his departure was made the occasion of the handsomest honors, paid him by leading citizens, who appreciated his uninterrupted and invaluable services to the city. Dr. Harris has achieved a national (if we may not say an international) reputation, and his friends expect much from the greater leisure which his present life affords. His annual lecturing tours are looked forward to by many zealous students in Missouri, Indiana, Illinois, Tennessee, and Georgia, and identify him still with the intellectual life of the Southwest.

"Denton J. Snider has stood next to Dr. Harris, and has done much to further interests already sufficiently presented in our discussion of Dr. Harris' services. Since Dr. Harris' removal, Mr. Snider has specially represented the metaphysical interest, al-

though, in addition to this, he has found time to contribute to various kinds of literature works whose value will be more and more appreciated. His 'System of Shakespeare's Dramas' is a work similar in general aim to those of Gervinus, Ulrici, Guizot, and takes rank with these. His study of the American state goes in quite a different direction, but can detract nothing from his reputation as a successful student. His 'Delphic Days' presents in poetical form and with remarkable effect the attempt of the modern consciousness to recreate the old Greek idyllic life. His other works in prose and verse, for our present purpose, need no special description. Apart from his connection with the various associations, such as the Philosophical Society, the High School Society, the Concord School of Philosophy, Mr. Snider has had all of his leisure occupied by classes of ladies and gentlemen, who have desired to have his conduct in their study of Homer, Herodotus, Greek history, Roman history, Shakespeare, and Goethe. His impress upon St. Louis thought is increasingly great.

"Born in Ohio in 1841 and graduated at Oberlin College, he came to St. Louis in 1864, and taught first in the College of the Christian Brothers, subsequently in the High School. After passing two fruitful years in European travel, Mr. Snider returned to St. Louis and resumed his position in the High School, until the pressure of his literary work and the numerous demands upon his time for the conduct of special classes caused him to devote himself entirely to the pursuits of the student.

"A. E. Kroeger was an indefatigable and successful student and *littérateur*, and was identified with the same set of gentlemen and ladies. His work on the 'Minnesingers' is recognized as a standard by Longfellow in his 'Poets and Poetry of Northern Europe,' and his other publications not only merited but received recognition as valid. Through the press, through the magazines, through separate publications, and above all, the irresistible force of example, Mr. Kroeger aided the intellectual development of St. Louis to an extent not to be measured by the shortness of his life.

"Born in Schwabstedt, duchy of Schleswig, in 1837, his father was a Lutheran minister, who, with his family, emigrated in 1848. Mr. Kroeger closed his school life when only eleven years of age; at fifteen was employed in a bank at Davenport, Iowa; went thence to New York, and began his residence in St. Louis in 1859, at which time he was the correspondent of the *New York Times*. In 1861 he was adjutant on the staff of Gen. Fremont; in 1863 assistant treasurer

of the city of St. Louis; 1865-67, city treasurer; after which he devoted himself to literature, so far as time was spared by the demands of the daily struggle for existence. Apart from the 'Minnesingers,' Mr. Kroeger's most noticeable literary work was his studies in German history ('Frederick Barbarossa, The Hohenstauffen'), 'History of the War,' and 'Essay on Chatterton.' Mr. Kroeger's literary and personal friendship with Henry W. Longfellow, Ralph Waldo Emerson, and William Cullen Bryant may indicate the esteem in which his work was held, and the loss to St. Louis when, in 1882, he died at the early age of forty-five.

"Mrs. Ella S. Morgan, while finding in other directions the field of her greatest intellectual activity, was nevertheless an important contributor to what may distinctively be called 'the St. Louis movement.' Through her translations for the *Journal of Speculative Philosophy*, through her interest and personal participation in all the associations for mental improvement, through the stimulus which she was able to afford, both by precept and by example, she merits the honor of mention as one of the first of the St. Louis ladies to appreciate and seek higher cultivation than was demanded by the local social life, and the additional honor which belongs to persistent pursuit of these interests. 'Her literary taste,' says one both able and discriminating in his judgment, 'was very superior. As a critic of books, her opinions had great value. Through her reviews of books in various journals and periodicals, and especially in *The Western*, she rendered most useful service. She possessed an intellectual insight quite unusual, and an excellent power of presentment. These qualities, combined with her thorough mastery of German, give to her translations from the great German metaphysicians a value quite extraordinary. She grasped their meaning with rare penetration, and often gave a clear interpretation to the most abstruse and involved discussions.'

"Miss Anna C. Brackett, now a resident of New York, and well known as an educator and as a successful writer for our leading magazines, began her greatest activity in St. Louis, and belonged to the set which gathered around Dr. Harris. Directly through her work in the Normal School, and indirectly through her unremitting labors outside of her school, Miss Brackett left an indelible impress upon St. Louis, and is entitled to much of the credit of work since done by those whose enthusiasm she roused and whose energies she directed.

"Miss Mary E. Beedy, for many years connected with the High School, did much through her interest

in mental improvement to awaken and strengthen our general activity. Her writings have mostly taken the form of lectures, and have been confined to few topics, but her influence in causing others to appreciate intellectual activity entitles her to a permanent place in our local records.

"Miss Sue V. Beeson, who began her career in our public schools as a pupil, and who, after the completion of her school education, entered upon her career as a teacher in the schools in which she had received her instruction, has always been prominent among the ladies interested in the speculative movement. For several years, in addition to her responsibilities as a teacher in the High School, and to that quiet but marked influence which belongs to those whose spiritual nature is so strong as to at once impress even a casual acquaintance, Miss Beeson has devoted much of her time to work in the classes conducted by Dr. Harris, Mr. Snider, and Mr. Bryant, and to the mutual improvement associations inaugurated by Mrs. Dr. Fischel and others. Miss Beeson's period of direct literary contribution has but begun, but the beginning promises much for the future.

"Professor George H. Howison, during his connection with the Washington University, was also an associate of the gentlemen already named, and his clear intellect, scholarly attainments, and persistent earnestness, added to the tone of this literary circle and strengthened its influence.

"Thomas Davidson, while his *floruit* belonged to the intermediate period of Dr. Harris' labors, represented the literary rather than the philosophical element. By his reputation as a classical scholar and a linguist, by the lucidity of his literary style, and by his incessant activity in the lecture field, Mr. Davidson did much to excite and encourage intellectual activity.

"F. Louis Soldan came into the service of the public schools in 1868, and from that time to the present his activity has been as increased as varied and valuable. Associated with the intermediate period of the movement which we are describing, Mr. Soldan not only sympathized actively with any concrete forms of activity, but, in addition, pursued other investigations, and through his work in the Aristotle Club, his papers in the High School Society, his addresses, educational and other, vindicated his claim to an eminent place among our local brain-workers. Later, Mr. Soldan has acted as director in numerous classes for the study of philosophy and German and Italian literature, while always responding cheerfully and ably to the frequent appeals for special papers, lectures, and addresses. His publications have been numerous,

though mainly taking the shape of monographs. When we consider that Mr. Soldan has the responsibilities of our Normal School and the cares of directorship in many associations, we can appreciate the earnestness, persistency, and strength which alone can enable him to accomplish undertakings so numerous and so varied.

"Mr. B. V. B. Dixon's activity has been varied and constant. Apart from his daily work as instructor in the High School, he has manifested his intelligent interest in the claims of higher culture, first, by his lectures and addresses; second, by his monographs, contributed to magazines and journals, literary and scientific; third, by contributions of money and labor towards the support of enterprises which sought to promote our literary and art interests; fourth, by personal participation in the various discussions, associations, and classes which have been the manifestation of much of our intellectual effort; fifth, by his intelligent interest in our industrial life, and his work as an analytical chemist and metallurgist; sixth, by the inspiration of his example and by a rare ability to win the interest of others, and to present the claims of our higher nature in a way to stimulate others.

"Miss Grace C. Bibb, while in St. Louis, was connected as teacher with the Normal School, and through her efforts for the improvement of education gained a reputation such as to be invited to occupy the chair of pedagogics in the State University, a position which she still acceptably fills. Miss Bibb contributed to the furtherance of our mental activity by her example, by her essays and lectures, and by her personal enthusiasm.

"William M. Bryant came to St. Louis mainly because of the facilities offered by the city for the further pursuit of studies already more than begun. Becoming identified in interest with the circle represented by Dr. Harris, he became at once a marked factor in all of its intellectual progress. Through the formation of classes for the study of art and philosophy, through the efforts made for the higher education of those associated with him as assistant teachers, through his ready response to any calls upon his services as teacher, conductor, or lecturer, through his published works, and through his unremitting zeal and enthusiasm in the pursuits of the student, Mr. Bryant has been, and still continues to be, one of the most potent influences in St. Louis life. His distinctive claims are similar in kind to those of Mr. Denton J. Snider, although æsthetics has more peculiarly been adopted as his province.

"Rev. R. A. Holland, for many years rector of St. George's Episcopal Church, was not only an en-

thusiastic student with Dr. Harris and D. J. Snider, but also an effective writer and speaker, whose labors were not only an addition to the reputation of our city, but a perceptible influence in exciting general enthusiasm in study.

"Francis E. Cook, though belonging to the younger generation of students, has always displayed an intelligent interest in the various intellectual activities of our city, and has contributed to these not only a warm sympathy, but the aid of his own special labors, which he has rendered available to others through his contributions to our local magazines, and by his lectures and addresses.

"T. R. Vieckroy, who has for many years been identified with our public school system, was, like Mr. William M. Bryant and others, drawn to this city by the facilities which it afforded for the pursuit of congenial studies. In addition to his efforts for a new phonetic system, his papers, lectures, and addresses, Mr. Vieckroy has been prominently identified with the Kant Club, the Society of Pedagogues, and with other enterprises which represented the mental activity of our city, and in each of these he has borne his full share of the burden.

"James S. Garland was born in New Hampshire in 1842, removed to St. Louis in 1856, and has since been identified with all that is best in our city. When Dr. Harris formed a Kant Club, Mr. Garland became one of its earliest, most active and valuable members, and when Dr. Harris was engaged upon his translation of Hegel's Logic, he could find no more acceptable or capable coadjutor than Mr. Garland, to whom, in recognition of his services, the book was dedicated. Apart from the influence of his own career as a busy lawyer who still finds time to cultivate the amenities of life, and in addition to his personal identification with the various manifestations of the 'St. Louis movement,' Mr. Garland is entitled to be considered an important factor in our literary life through the unostentatious but always rationally generous aid which he gives to all literary and æsthetic interests, and to his personal efforts in behalf of the educational institutions of the city and State.

"William R. Walker has found time amid the cares of a constantly busy legal life to retain his interest in literature, and while his essays have been few, they have been of an excellence that most decidedly added to the reputation of St. Louis.

"Horace Hills Morgan¹ was born at Auburn, N. Y., on Jan. 22, 1839. Five years later his father re-

moved with his family to St. Louis. At the age of sixteen he was matriculated as a student in Hobart College, Geneva, N. Y., but one year later gave up his connection with that institution and entered Williams College, where he was graduated with classical honors in 1859. In the autumn following Mr. Morgan was appointed to the position of assistant teacher in the St. Louis High School. In 1862 he was promoted to the position of first assistant, and in 1866 was made principal of the school, which place he has filled ever since with great acceptance and ability.

"Such is the brief story of a life that has been thus far outwardly uneventful, but yet filled, in these latter years especially, with varied and unremitting activity.

"His best thought and energy have been given to his vocation, and the high character and standing of the school of which he has been for seventeen years the head show how efficient his labors there have been. In his educational methods and the quality of the work produced he has always manifested an enlightened and progressive spirit, and has thus kept the school abreast of the most advanced educational movement of the time. On many occasions, with tongue and pen, he has ably vindicated the claims of the High School in general to its crowning position in our system of public education, but the admirable management of his school in this city has furnished his best argument in that behalf.

"While performing the engrossing and laborious duties of his profession with rare fidelity and devotion, Mr. Morgan has not been content to play the rôle of the mere pedagogue, but has addressed himself with nearly equal zeal to those problems of culture and society which ever claim the attention of the earnest student and public-spirited citizen. As the *New York Nation* very justly observes, in a notice of one of his books, 'Mr. Morgan is one of that group of devoted students and men of culture who have done so much to elevate the character of society and tone of thought in St. Louis.'

"He has taken a leading part in the organization and management of clubs and societies in this city, formed for the study of art and philosophy, during the past twenty years. A director of the Public School Library for many years, he has rendered most efficient service in building up an institution of inestimable value to the community.

"Amid these manifold professional and public engagements, however, his pen has not been idle. He has published several works upon literary topics.

"But the more permanent productions of his pen

¹ This sketch of Professor Morgan was prepared by James S. Garland.

by no means make up the sum of his literary activity. He has found time to contribute to the pages of the *Journal of Speculative Philosophy*, the *Southern Law Journal*, *Education*, *American Journal of Education*, *The Western*, and other periodicals. The last-named magazine was for a long time under his editorial management, and to him chiefly was due the large measure of success and reputation which it achieved. Its publication was suspended in 1882.

"Lectures, essays, and addresses without number upon a great variety of topics have won for him a still wider hearing in this and other communities.

"These are some of the results of the labor of a man yet in the beginning of his literary prime. It is safe to say that, if life and strength are vouchsafed to him, the future has much more and greater achievements in store.

"Charles Louis Bernays was born in the city of Mentz in 1815, and after the fullest education which could be furnished by wealthy and intelligent parents, he threw aside the profession of law for that of journalism. While still in Germany he made a reputation by his contributions to the *Allgemeiner Augsburger Zeitung* and the *Deutsch-Französische Jahrbücher*, whose editor at that time was our own Dr. Henry Boernstein. Together with Dr. Boernstein, he founded the *Vorwaerts*, but this being promptly suppressed by the French minister, the two gentlemen occupied their time as correspondents of the German newspapers, and had the honor of being the first to inaugurate this phase of journalism. In 1848, Col. Bernays concluded to emigrate to Missouri, but reaching St. Louis during the cholera season of 1849, he and Boernstein located themselves at Highland, Ill. Upon the purchase of the *Anzeiger des Westens* by Dr. Boernstein, Col. Bernays became its editor-in-chief. During the war Col. Bernays served as paymaster, and increased the number of those who had had experience of his ability and sterling probity. Returning after the war to his journalistic career, Col. Bernays became the best known of our newspaper men, using the columns of the *Republican* as well as those of the *Anzeiger*. His writings have been collected, and are to be republished by so competent an editor as his lifelong friend, Dr. Boernstein. Col. Bernays died in June, 1879.

"Col. Bernays, being a profound scholar with a natural taste for scholarship, did not confine his interest to journalism, but was always actively engaged in any gatherings that brought together earnest men and women whose object was intellectual culture. It was in the rôle of one whose own education was both profound and thorough, and who was ever alive to the

value of earnest workers, that Col. Bernays, apart from his journalistic services, was specially helpful to our city.

"Professor J. K. Hosmer was born in Northfield, Mass., Jan. 29, 1834, graduated at Harvard College in 1855, and came to St. Louis in 1874. From 1860 to 1866, Professor Hosmer was in charge of the Unitarian Church at Deerfield, Mass. In 1866 he became connected with Antioch College as one of its professors. In 1872-74 he formed one of the faculty of the University of the State of Missouri, and in 1874 he accepted a professorship in the Washington University of this city. From 1862 to 1863, Professor Hosmer was corporal in the color-guard of the Fifty-second Massachusetts.

"Professor Hosmer, as an element of St. Louis life, has been with the foremost in his interested activity, but he has represented abilities peculiar to himself. His 'Short History of German Literature,' although appearing in a Western city and at about the same time as the one by Bayard Taylor, took at once so high a rank as to be adopted as a book of reference by Harvard and other leading colleges. His abilities have been so appreciated that the *New York Nation* keeps his name enrolled among those whom it mentions as its contributors. At home, his services are in constant requisition for the delivery of lectures and for the conduct of special classes of ladies and gentlemen. Apart from his scholarly attainments, Professor Hosmer has a singular power as a *raconteur*, if we may be permitted to use such a term with reference to a quality of written style. At home, Professor Hosmer's gifts are enhanced by the rare kindness and helpfulness which is so much a part of his nature as probably to be unknown to himself.

"Professor C. M. Woodward was born in Fitchburg, Mass., in 1837. After completing the High School course he entered Harvard College, from which he graduated in 1860. From 1860 to 1865, Professor Woodward was principal of the Newburyport High School, except for a year, during which he was in the army. In 1865 he entered the service of the Washington University as assistant in the academic department. At the present time he is Thayer Professor of Higher Mathematics and Applied Mechanics, as well as dean of the Polytechnic Department, and director of the Manual Training School. Professor Woodward's vigorous enthusiasm in the subjects which specially absorb his interest is recognized by all with whom he comes in contact.

"Professor M. S. Snow was born at Hyannis, Mass., in 1842, and received his collegiate education at Harvard. Subsequently he carried on a school at Nash-

ville, Tenn., whence, in 1870, he was called to a professorship in the Washington University, of whose collegiate department he is now the honored dean. His published literary work has taken the shape of lectures and contributions to the more sterling magazines. Professor Snow, as an element of the intellectual life of St. Louis, is not to be judged by the volume, or even by the quality, of his written work, for there has been no literary assembly since his residence in our city without his contributing personal sympathy and encouragement or else active effort.

"William B. Potter, born at Schenectady, N. Y., in 1846, and completing his technical course in 1869, has since been connected with the Washington University as Professor of Metallurgy. Professor Potter's attainments have caused his services to be sought by those who control many of our large industries, and the accuracy of his analyses has earned for him a high reputation. Quiet and unobtrusive, Professor Potter has the faculty of winning the kindly regard of those who come in contact with him, and his intelligent sympathy with any efforts towards rational progress gives him a marked influence in circles to whom the interests of metallurgy are wholly unknown.

"Professor Charles A. Smith, though occupied with investigations which directly belong to the industrial world, has been one of our most energetic and successful brain-workers. Born in the city, where he still resides, Professor Smith became connected with the Washington University in 1868. His papers upon subjects belonging to civil and mechanical engineering have been both numerous and valuable, while his own inventions have been of the greatest value.

"Francis E. Nipher was born at Port Byron, N. Y., 1847, and came to St. Louis in 1874. Professor Nipher's publications have been numerous and of great value, but they represent the least part of an incessant activity in his speciality of meteorology. It is impossible to characterize the work of the specialist, except by the respect paid to his work by other specialists, and a judgment formed in this way must give Professor Nipher high rank.

"Miss Annie Wall has found time not merely to win success as an instructress, to carry her own education in many directions, and to publish many valuable magazine articles, besides the two books which bear her name on their title-pages, but also to take an active and efficient part in the various literary gatherings of our city.

"Judge Nathaniel Holmes has always been a scholar, and while most of his work has been done through the Academy of Science, he has been no unimportant factor in our intellectual life.

"Albert Todd moved to St. Louis in 1839, and through his generous enthusiasm has participated in nearly all of the public movements of the city. To the literary development Mr. Todd has contributed by his lectures, his writings for the city press, and even more than by these through the warm interest which he always takes in the efforts of others.

"A. J. Conant was born in Vermont in 1821, and first came to St. Louis in 1857. As Mr. Conant is primarily an artist, and must receive his fullest consideration when we come to the art interests of the city, we make mention of him here only because of his study and articles upon archæology. To Campbell's 'Commonwealth of Missouri' Mr. Conant contributed the very able chapter on the archæology of Missouri, and during the meeting of the American Society for the Advancement of Science it became evident that Mr. Conant's labors had had not only interest for himself but value for the scientific world.

"Maj. J. B. Merwin has for many years been known as the editor of the *American Journal of Education*, and through this instrumentality he has done much towards elevating and rationalizing the educational thought of the Southwest. In addition to constant, ardent, and effective support of the interests of general education, the major has by his lectures and addresses manifested his active sympathy with movements which sought to promote the best interests of the community.

"Rev. J. C. Learned, the pastor of the Church of the Unity, has been so much to our city, that when, at one time, it seemed probable that he would remove, there was a feeling almost of consternation among those who are interested in the intellectual life and progress of the city. Apart from the labors of his own calling, Mr. Learned has found time always to be noticeable as a student, and to give freely of time valuable to himself in answer to appeals from our local lyceums and from classes of ladies and gentlemen who desired to study Emerson, Greek poetry, or other subjects under his guidance. His intellectual liberality and sympathy have made him an active supporter of any effort promising to advance mental development.

"Rev. W. Pope Yeaman was born in Kentucky in 1828, and accepted a call from the Third Baptist Church of St. Louis in 1870. In addition to his responsibilities as minister and pastor, Dr. Yeaman gave much time and aid to the interests of education, religious journalism, and missions.

"Rev. John Snyder was born in Philadelphia in 1842, graduated at Meadville in 1869, and had charge of the Second Unitarian Church in Hingham, Mass.,

1869-73. In 1873, Dr. Snyder removed to St. Louis and became pastor of the Church of the Messiah. During the ten years of his residence in this city Dr. Snyder has been unremittingly active in promoting all efforts to secure a higher general culture, and his success has been such as to promise yet larger results in the future.

"Rev. T. M. Post was in 1847 called to the pastorate of the Congregational Church, from whose active ministry he has but just resigned. Dr. Post's ministerial record can find no place here, but it may be remarked that his pastorate has been sufficiently long to enable him to see the results of his labors. To our literature Dr. Post has been a constant contributor, but as literary fame has in no sense been his motive, it has been found impossible to procure a satisfactory list of his publications.

"Dr. Post has always actively sympathized with all efforts at intellectual development, and a strong and active mind, joined to a peculiarly fine imagination, and these rare powers tempered by the most healthy and sweetest of human sympathy, has rendered his work at once unique and invaluable.

"George E. Seymour, who was born in Ohio in 1833, and who removed to St. Louis in 1862, has always been a student, as well as a man engaged in active life. His work in various educational positions can receive no notice here, but his own mental power and activity entitle him to individual mention.

"F. F. Hilder has won a well-deserved reputation as an archæologist and a man of general information. His contribution to 'The Premium Essays upon the Three Americas' Railway' is perhaps his most characteristic work, and is possessed of remarkable interest and power. Mr. Hilder is one of the number who are always appealed to for lectures, addresses, and 'papers.'

"Rabbi S. H. Sonnenschein is one of the most active of our citizens, and is distinguished by an unusual elóquence, which is not the possession of many whose work is very valuable. In addition to his duties in connection with his congregation, Rabbi Sonnenschein is constantly occupied with literary work, much of which takes the form of lectures.

"W. Gilbert, one of the most enterprising of our successful business men, was born in Columbus, Ohio, in 1835. Coming to St. Louis in 1867, after ten years' experience in the book business, Mr. Gilbert was for a year the general manager of the St. Louis Book and News Company. In 1868 he began his career as a publisher of law-books,—a business which he has conducted with noticeable energy and success. Apart from his active business, Mr. Gilbert has always manifested an interest in the intellectual growth of the

city, and has since the destruction of his fine library in 1873 again brought together a collection of four thousand volumes, one of the largest and most valuable of our private libraries.

"George E. Leighton is one of our capitalists whose naturally good intellect has been strengthened by education, and whose prominence in enterprises of public moment is due less to his financial standing than to the broad intelligence with which he deals with questions of social importance. His inaugural address as president of the Historical Society well illustrates the peculiar claims which he has already established upon the community.

"Miss Charlotte Smith, now a resident of Chicago, established and conducted the *Inland Monthly*. While it was intended to be local in the interests represented, it received the support of many of our best citizens, and Miss Smith has the respect and esteem of all who had occasion to know her work.

"Henry W. Williams was born at Williamsburg, Mass., 1816, and came to St. Louis in 1844. Previously Mr. Williams had practiced as a lawyer, and was at one time an editor in Michigan. Among the first to organize the legal specialty of the examination of land titles, Mr. Williams has during forty years been actively conversant with much of our local history. From time to time Mr. Williams has contributed to our city papers articles upon various subjects, some of which, written in 1877-78, found realization in the subsequent financial action of the United States Congress. Mr. Williams, in spite of his business cares, has preserved his literary tastes, and has collected one of the most valuable of our private libraries. He is one of the many people who, prevented by the cares of their daily life from creative contribution to literature, must yet outrank those whose only service has been the publication of a valueless pamphlet or book.

"W. H. Pulsifer is still too much engrossed with business interests and too modest to admit that he has a literary biography. At the same time, by his own success in the study of physical science, by his participation in efforts to sustain and improve our libraries, by his intelligent encouragement of any rational efforts, Mr. Pulsifer must receive mention, even against his will.

"Any summary would be incomplete if it failed to mention those who have encouraged and sustained our literary enterprises, although these co-laborers may have contributed nothing to our published works.

"Gentlemen such as James S. Yeatman, Wayman Crow, M. J. Lippman, James Richardson, Col. Thomas Richeson, Henry T. Blow, W. J. Gilbert,

Thomas Allen, George E. Leighton, A. J. P. Gareschè, George T. C. Reynolds, John Collier, Henry Hitchcock, Albert Todd, Silas Bent, E. A. Hitchcock, Dr. Walker, Gen. J. W. Noble, John C. Orrick, and James S. Garland; ladies such as Mrs. R. J. Lackland, Mrs. J. C. Learned, Mrs. William Ware, Mrs. Charles Nagel, Mrs. Dr. W. E. Fischel, Miss Susie Blow, Mrs. Beverly Allen, Mrs. D. Robert Barclay, Mrs. Isaac Cook, irrespective of their own direct literary labors, have been markedly important factors in the increase of our city's literary and æsthetic development.

"A very continuous and considerable activity has always been created and sustained by the Jesuit Brothers in charge of the St. Louis University, but as it has not specially challenged public attention, many are not aware of the source of a movement whose effects they feel. Of the young men educated at this institution many have attained distinction in the church, at the bar, in the profession of medicine, and in the less individualized fields of rational activity. During the past few years, under the auspices of Father R. J. Meyer, president of the faculty, there have been inaugurated courses of post-graduate lectures, and the attendance upon these has done much to incite the younger men to an intellectual activity which shall not be wholly absorbed by the cares of every-day life.

The following is a list of St. Louis authors and their contributions to literature:

Alexander, A. W. Contributor to the *Inland Monthly*.
 Allen, Lyman W. Cont. to *The Western*; cont. to Princeton Poets.
 Allen, Thomas; born in Massachusetts, 1813; St. Louis, 1842; died 1882. *Family Magazine* (N. Y.); *Madisonian* (D. C.); cont. *Western Journal*, *Valley Monthly*; Address to University Club, 1876; Proposed Expedition to Japan; Address on History and Resources of Missouri.
 Allen, Mrs. L. B. G. Bobs and Nabobs, and other plays.
 Amson, Arthur. Cont. *Journal Speculative Philosophy*.
 Ashworth, T. M. Tom Chips.
 Bailey, George W. A Private Chapter of the War.
 Bailey, John J. Art, a Poem; cont. to *The Western*.
 Bateman, W. O. Constitutional Law of the United States.
 Bakewell, E. A. Addresses.
 Barclay, D. Robert. Lectures.
 Barret, Richard A. Cont. *Inland Monthly*.
 Bay, W. V. N. Reminiscences of the Bench and Bar of Missouri.
 Benton, Thomas H.; born in North Carolina, 1782; St. Louis, 1813; died 1858. Editor *St. Louis Enquirer*; Thirty Years' View; Abridgment Debates in Congress.
 Beck, James P. The Doctor and the Lawyer.
 Berg, Franz. Fisel.
 Beedy, Mary E. Lectures.
 Beeson, Miss Sue V. Cont. to *Journal Speculative Philosophy* and *The Western*.
 Bernays, C. L.

Bent, Silas. Thermal Paths to the Pole; cont. *Inland Monthly*; Lectures.
 Bernard, E. F. R. Xenophanes.
 Bibb, Miss Grace C. Lectures; cont. to *The Western American*.
 Blow, Miss Susie. *Journal of Education*; Addresses on Kindergarten System.
 Block, Lewis J. Exile, a Poem; cont. to *The Western, Journal Speculative Philosophy*, and *Inland Monthly*.
 Bland, Peter E. Cont. *Western Journal*, 1849; Speeches on Finance and Currency.
 Blewett, Benj. Cont. *The Western*.
 Boutwell, Mrs. Helen Willis. Cont. *The Western*.
 Boyd, Rev. W. W. Lectures.
 Bowman, Bishop. Lectures and Addresses.
 Boudreaux, Father Florentin. Ascetical works.
 Brown, B. Gratz. Lectures; Gradual Emancipation in Missouri; The Reform Movement.
 Brockmeyer, H. C.; born in Prussia, 1828; St. Louis, 1857. A Foggy Night at Newport; letters on Faust in *Journal Speculative Philosophy*; Lectures.
 Brookes, Rev. J. N. Is the Bible True? How to Read the Bible; Marantha, or the Lord Cometh; *Central Christian Advocate*.
 Brackett, Miss Anna C. The Education of American Girls; Poetry for Home and School; Rosenkranz's Pedagogics; cont. to *Journal Speculative Philosophy*, *Atlantic*, *New England Journal of Education*, *American Journal of Education*.
 Bryant, William M.; born in Indiana, 1843; St. Louis, 1873. Hegel's Æsthetics; Philosophy of Landscape Painting; Lectures; associate editor of *The Western*; cont. to *Journal Speculative Philosophy*, *American Journal of Education*.
 Bryan, W. J. S. Associate editor *The Western*; Addresses.
 Blackwood, W. Gardner. Cont. *Western Journal*.
 Buell, James W. A Short Tour of St. Louis; Life of Jesse James; Legend of the Ozarks.
 Burlingham, Rev. A. H.; born in New York, 1822; St. Louis, 1866. Lectures.
 Byers, W. N. Cont. *Valley Monthly*.
 Calmer, Father H. M. Lectures on History and Anthropology.
 Carter, J. H. Cont. city press; Rollingpin's Almanacs; Lectures.
 Campbell, R. A. Commonwealth of Missouri; Missouri State Atlas; The Four Gospels in One; Gazetteer of Missouri; Chiromancy.
 Caselberry, Evans. Cont. *Western Journal*.
 Castlehur, F. K. Palms.
 Childs, C. F.
 Chauvet, Regis. Chemical Analysis of the Coals, Iron Ores, etc., of Missouri.
 Chauvet, William. Manual of Spherical and Practical Astronomy; Treatise on Elementary Geometry; Treatise on Plane and Spherical Trigonometry; Inaugural Address, Washington University.
 Clements, Miss Hilda C. The Song of Steam, a Poem.
 Clarke, Enos. Lectures.
 Conant, A. J. Archæology (Switzer's History of Missouri); Archæology (Commonwealth of Missouri); Transactions St. Louis Academy of Science; Lectures.
 Cooper, Isaac J. Cont. *Western Journal*.
 Cook, Francis E. Associate editor of *The Western*; Songs, Poems, etc.; Readings; Lectures.
 Collet, Oscar W. Cont. *The Western* and city press.
 Cole, Miss S. E. Cont. *The Western*.

- Cobb, H. Cont. *Western Journal, Western Journal and Civilian, Inland Monthly*.
- Crane, Newton. Cont. *Scribner's Monthly*.
- Crunden, F. M. Lectures; Readings; cont. *The Western, American Library Journal, Missouri Democrat*.
- Davidson, Thomas. The Pantheon and other Essays; editor *Western Educational Monthly*; cont. *The Western, The Nation, The Boston Advertiser, Journal of Speculative Philosophy*, city press, *American Journal of Education*; Lectures.
- Darby, John F.; born in North Carolina, 1803; St. Louis, 1827; died 1882. Personal Recollections; cont. city press.
- Dacus, J. A. A Tour of St. Louis; Annals of the Great Strikes in the United States; cont. city press, *Valley Monthly*.
- Davis, T. G. C. Cont. *Inland Monthly*.
- D'Arcy, H. I. Associate editor *The Western*; Lectures; cont. *Journal of Speculative Philosophy*.
- De Smet, Father.
- Deutsch, William. Exercises for Allen's New Method; cont. *The Western*.
- Dixon, B. V. B. Selections in Appleton's Reader; associate editor *The Western*; Lectures.
- Diehl, Conrad. System of Drawing.
- Diekenga, I. E. The Worn-Out Shoe, a Poem; Between Times; Tom Chips; cont. *Valley Monthly, Inland Monthly*.
- Des Montaignes, Francis. Cont. *Western Journal*.
- Eads, Jas. B. Cont. Transactions St. Louis Academy of Science; Report on Mississippi Jetties; Protest against Bill for the sale of Bank Stock; On the Jetty System; Physics and Hydraulics of the Mississippi River.
- Edwards, Richard. The Great West.
- Eliot, Miss Ida M. Cont. *Journal of Speculative Philosophy*; Poetry for Home and School.
- Eliot, Rev. W. G. Early Religious Education; Emancipation in Missouri; Great Social and Moral Questions of the Day; Woman's Work and Education in America; Discipline of Sorrow; Home Life and Influence; Dignity and Moral Uses of Labor; Discourse before the Old Guard of Missouri; Doctrine of Christianity; Lectures and Addresses.
- Ellis, Miss Anna C. Unforgiven.
- Engler, E. A.; born in St. Louis, 1856. Cont. *American Journal of Mathematics, Hardy's Elements of Quaternions, Popular Science Monthly*, Transactions St. Louis Academy of Science, *Kansas City Review of Science and Industry*; Time-Keeping in London.
- Engelmann, Dr. Geo.
- Eyser, John. Liebestrange.
- Fastré, Father Joseph. Translations.
- Finkelnburg, G. A. Lectures.
- Fitzgibbon, J. H. Cont. *Western Journal*.
- Foy, Jas. H. Moody vs. Christ and His Apostles.
- Foy, Peter L. Lectures.
- Frings, Chas. H. Die Behandlung der Amerikanischen Weine.
- Fulton, Rev. John. Lectures.
- Garland, Hugh. Cont. *Western Journal*.

¹ To the above list may be added the names of Henry Boernstein, publisher of the *Anzeiger des Westens*, who has been quite prominent in connection with the German stage, both in Europe and in this country, having written many successful plays, and Laura C. Redden, who, under the pseudonym of "Howard Glyndon," has an extensive reputation as a magazine and newspaper writer. Miss Redden was born in Somerset County, Md., but came to St. Louis early, assisted in editing the *St. Louis Presbyterian*, and wrote much for the *Missouri Republican*. Two of her books, "Notable Men of the Thirty-seventh Congress" and "Idyls of Battle," are well and favorably known.—J. T. S.

"The private libraries of St. Louis have only recently begun to be considerable, either in extent or in character. This fact is largely due to the mixed character of our population. While the French element predominated, business, political life, and social affairs elicited the chief interest. The German element has to a great extent been composed of men and women whose energies were absorbed by industrial pursuits, and their artistic sympathies found the most satisfactory expression through music. Hence, while in our musical history the Germans lead in representation, and while names like Boernstein and Bernays are eminent in the ranks of our local writers, yet the sympathy through literary forms has not been the commonest manifestation. The other elements of a primarily foreign population would naturally find their time sufficiently occupied without the devotion of much time to special literary culture. The native American population has largely consisted of those to whom the struggle for existence was too immediate to leave leisure for extensive reading.

"The few individuals who had accumulated private libraries were most frequently men of retired lives, and the dispersion of their effects by death or removal has destroyed all but the recollection of their collections. In some cases, as in that of Governor Reynolds, valuable libraries were confiscated or destroyed during our civil war.

"Using library as a word intended to express a reasonable number of valuable books, collected with reference to some rational and distinctive aim, private libraries are owned by the following ladies and gentlemen:¹

Mrs. Beverly Allen, *Gerard B. Allen, Mrs. Thomas Allen, Mrs. D. Robert Barelay, *Dr. G. Baumgarten, Mrs. Francis P. Blair, *A. F. Blaisdell, Miss Susie Blow, Rev. W. W. Boyd, *Maj. Bryan, W. J. S. Bryan, Mrs. J. J. Cole, E. C. Coleman, D. F. Colville, *Newton Crane, *F. M. Crunden, *Eugene Cuendet, H. I. D'Are, H. A. Diamant, *John A. Dillon, B. V. B. Dixon, *William R. Donaldson, W. B. Douglas, *H. L. Dousman, George D. Drake, John N. Dyer, James B. Eads, *Lucien Eaton, *George S. Edgell, *Dr. W. E. Fischel, Rev. John Fulton, Rev. Dr. Ganse, *Col. T. T. Gantt, *James S. "The publishing business in St. Louis has neither employed large capital nor been of more than individual importance. To this there are notable exceptions in the direction of law, which, through the efforts of F. H. Thomas & Co., George I. Jones, and W. J. Gilbert, has become an interest of magnitude, while the publications have a high reputation. Mr. Jones has, furthermore, done much for the city by the high character of his miscellaneous publications, such as Hosmer's "History of German Literature," Snider's "System of Shakespeare's Dramas," Morgan's "Topical Shakespeariana," Woodward's "History of the St. Louis Bridge," and in the direction of educational publications, Henry W. Jameson has done enough to entitle him to personal mention."

Among the publishers, David B. Gould¹ has achieved a well-earned reputation as the directory-maker of St. Louis. He was born in Caldwell, Essex Co., N. J., Sept. 7, 1844. He appears to have inherited his faculty for book-making, for his grandfather, Stephen Gould, is said to have been the first publisher of law books in America. The house which he founded in New York City is still in existence, being now conducted by Banks Brothers, his great-nephews. The Goulds settled in New Jersey as early as 1700, and were prominent and public-spirited people of that region.

Young Gould received the usual common-school education, and attended college, but did not graduate, being impatient to mingle in the active affairs of life. In 1864 he went West as clerk of the Ordnance Department of the United States army, and was located at Fort Scott, Kan., where he remained until the close of the war, when he returned to his old home; but finding the sphere too contracted for one of his enterprising disposition, again removed to the West, and in 1866 began at Chicago the compilation of directories. In connection with this business he was identi-

fied for some years with some of the most important places in the West and South.

In September, 1871, he located permanently in St. Louis, and commenced the publication of the "St. Louis City Directory," which he has issued annually ever since. Mr. Gould has given this work his entire time and attention, and for completeness, correctness, careful attention to details, etc., his publications are not surpassed by any similar works in America. He employs such system and energy in the business that, although the growing population of St. Louis compels the yearly addition of from five thousand to seven thousand names to the directory, the period employed in getting out the work has, during the past ten years, been shortened thirty days. In addition to this great undertaking, he publishes a "St. Louis Business Men's Directory," a "Blue-Book of St. Louis," and a "Map of St. Louis." Mr. Gould has also published directories of Peoria, Springfield, and Bloomington, Ill., and it is his intention to cover, as rapidly as practicable, every important point in the West and South.

Of his standing as a business man it may be said that he very early secured the confidence and good will of the people of St. Louis, and has retained them ever since. He at once identified himself with the city, and there has hardly been a public movement of any kind since he established his residence in which he has not taken a prominent and active part. Questions of transportation, both by rail and river, have engaged much of his attention. He was a delegate from St. Louis to the River Improvement Convention at St. Paul, and was secretary of that body, which did more for the improvement of the upper Mississippi than all previous agencies. Upon this and kindred topics he has written much for the public press. There is hardly a citizen who has devoted more time and money, proportionately to his means, to advance the interests of St. Louis, and there is certainly none who has exhibited such implicit and enthusiastic faith in the future of the city, as is shown by his large investments, made from the profits of a prosperous business. He is an ardent promoter of the pending scheme to reconstruct the streets of St. Louis with granite, and in this, as in all things else, displays the earnestness of a man of liberal and enterprising views, who has not only the courage to express them, but the energy to carry them out.

Innumerable enterprises claim and receive Mr. Gould's support. He was the founder and father of the St. Louis Club, and for three years was a director and chairman of its house committee. He is a director in the Provident Savings Institution,

David B. Gould

LIBRARY
OF THE
UNIVERSITY OF ILLINOIS.

one of the enterprising and flourishing banks of the city. He is also a member of many fraternities, but while willing to do his share of the work, has preferred that others should fill the offices and enjoy the honors.

Mr. Gould's wife is Emma E., the only daughter of Dr. M. V. Allen, of Chicago, and a direct descendant of Gen. Ethan Allen, the Revolutionary hero. They have three interesting children.

Mr. Gould has a beautiful residence at 3457 Chestnut Street, St. Louis, and an elegant summer house at Oconomowoc, Wis., where in the intervals of business he enjoys life rationally, finding no greater pleasure than in the society of his family and friends.

"The following is a list of the publishers of St. Louis :

"Advocate Publishing House, American Baptist Publication Society, American School Book Company, M. S. Barnett, C. R. Barnes, Beektoold & Co., Belford, Clark & Co., Bollman & Son, W. S. Bryan, R. A. Campbell, James H. Chambers, Christian Publishing Company, Norman J. Coleman, Concordia Publishing Company, Charles B. Cox, Logan D. Dameron, Everts & Co., P. J. Fox, Gilbert Book Company, David B. Gould, Historical Publishing Company, E. F. Hobart & Co., G. I. Jones & Co., Journal of Commerce, Moses King, J. J. Lawrence, J. C. McCurdy & Co., National Publishing Company, Parson & Co., Review Publishing Company, Scammell & Co., J. T. Smith & Co., Spectator Publishing Company, St. Louis Magazine Company, St. Louis Religious Press Association, W. H. Stevenson, Sun Publishing Company, F. H. Thomas & Co., Thompson, Tice & Lillington, N. D. Thompson & Co., William F. Wernse & Co., Charles F. Anderson, E. F. Gambs, Harker & Pritchard, Charles Jennings, Ferd. P. Kaiser, W. H. Kerns, Louis Lange, John B. Lee & Bro., Frank McDavitt, James H. Matthews, George W. Matthews, McClelland & Winter, Samuel H. Soyster, St. Louis Baptist Publishing Company, St. Louis Board of Publication, Thomas & Stone."

CHAPTER XXXVII.

ART AND ARTISTS.¹

THE art history of St. Louis has passed through two distinct phases. This has followed naturally from the peculiar characteristics of the inhabitants. The earlier settlers were mainly French. These brought with them the inborn refinement belonging to people who have grown up in the midst of a cultivated society, and who have inherited through many generations a genuine taste for and lively appreciation of works of art.

Such people, though doubtless for the most part

¹ This chapter is the joint work of Professor H. H. Morgan and W. M. Bryant. In giving it without material alteration, the author does not wish to be held responsible for all its conclusions, nor for the tone of some of its criticisms.

unable to analyze and give an explicit account of their preferences, must still possess, in the form of taste, a discriminative judgment that would well-nigh unfailingly select intrinsically valuable, and as unfailingly reject valueless productions. They thus without hesitation preferred a fair copy of a really significant work to an original one that possessed no vital meaning. In this way, it is well known, there grew up in Europe at an early period a demand for copies of the better class of paintings.

Of copies thus called into existence many were brought to St. Louis and the surrounding region by the earlier French settlers. It doubtless happened also that an occasional original picture by a really great artist found its way over, though the fact that few specially wealthy families were counted among these early immigrants reduces such probability to the minimum.²

At the present day many of these old paintings have fallen into the hands of people who, for one or another reason, do not care to retain them. It often

² This scarcely does justice to the earlier inhabitants of St. Louis. They did not practice art to any great extent, but they did encourage it by securing pictures abroad and by having portraits painted at home. There were a number of very good portrait-painters in the country, who every year made winter tours to the South, and it was a favorite route with several of these to pass up the Hudson to Albany, across country to Olean, down the Allegheny to Pittsburgh, and thence to Cincinnati, Louisville, St. Louis, and New Orleans. A great number of the old portraits in St. Louis were painted by these itinerant limners. The first directory, that of 1821, mentions the fact that the town at that time contained "one portrait-painter, who would do credit to any country."

Gabriel Paul was then the architect and building the Cathedral, and the compiler of the directory takes great pride in claiming that "the Cathedral of St. Louis can boast of having no rival in the United States for the magnificence, the value and elegance of her sacred vases, ornaments, and paintings, and indeed few churches in Europe possess anything superior to it. It is a truly delightful sight to an American of taste to find in one of the remotest towns of the Union a church decorated with the *original* paintings of Rubens, Raphael, Guido, Paul Veronese, and a number of others by the first modern masters of the Italian, French, and Flemish schools. The ancient and precious gold embroideries which the St. Louis Cathedral possesses would certainly decorate any museum in the world. All this is due to the liberality of the Catholics of Europe, who presented these rich articles to Bishop Dubourg on his last tour through France, Italy, Sicily, and the Netherlands. Among the liberal benefactors could be named many princes and princesses, but we will only insert the names of Louis XVIII., the present king of France, and that of the Baroness La Candele de Ghysegham, a Flemish lady, to whose munificence the Cathedral is particularly indebted." Of course the paintings of the old masters are *copies*, not originals. The directory also makes mention of the fact that even at that early day drawing was part of the regular curriculum of St. Louis University (then called College).—J. T. S.

happens, therefore, that one of these is brought to light and offered for sale. Some of them bear the signatures of artists more or less celebrated. These, which from the nature of the case in most instances must be, and very likely in all cases are, copies, together with many more altogether without signature, are often confidently claimed to be original works of the or that great master, on no other ground, it would seem, than that there is no longer any clew whatever to their origin! At the same time, it is not to be denied that many of these works have genuine merit; some of them, indeed, a high order of merit.

It is to be observed, however, that during this entire earlier period the absorbing interests were those of a community struggling to develop the resources of a country as yet in its primitive condition. It was impossible, therefore, that the art interests of the time should be such as to develop any productive activity in the field of art.

The second phase of the art history of St. Louis presents characteristics no less marked than those of the first. The growth of the city involved the infusion of elements other than French, so that in course of time the latter became wholly subordinated, both in numbers and in influence. The transition period, indeed, is one well-nigh destitute of art interest of any kind. The new elements entering into the population of the city brought energy, enterprise, thrift, but all this was concentrated almost wholly in the direction of accumulating property in its most abstract form,—*i.e.*, in the form of wealth, money as wealth.

This stage, however, was not, as it could not be, a permanent one. Those who had accumulated wealth began to feel the necessity of its being realized in other forms than in that of mere money, if it was to be wealth in any true sense; and no very extended research was required to make clear to them this fact, that wealth has from time immemorial unfailingly sought realization in works of art.

Nevertheless, people without art-culture, and even wholly destitute of traditions concerning art, cannot, from the very nature of the case, safely rely upon their own judgments in the choice of works of art. It happened, therefore, that the earlier collections in this second phase of our art history were of exceedingly varying merit. The tendency was, and in some degree still is, to decry the art of the *renaissance*, and to insist upon the immeasurable superiority of the art of the present over the art of all former time. Pictures were purchased rather from the celebrity of the artist than from any clear conception of the significance or value of the pictures themselves.

At the same time, while the distance of an artist in time was held to be proof of his inferiority, the distance of an artist in space was but too likely to be taken as fairly conclusive evidence of his superiority. Nor does there appear to have been the slightest suspicion of the necessary incongruity existing between these two tacit assumptions, the former of which was but one with the light opinion entertained of the *renaissance* art, an incongruity sufficiently apparent when one considers that those most distant and therefore greatest artists are found in France and Italy, the very countries where the richest traditions of the *renaissance* centre, and without which the great art of the present would have been simply impossible.

It must, however, be borne in mind that this was but a preliminary stage. With increase of inquiry has come increase of knowledge, so that the purchases of works of art have been steadily more and more discriminating, while the evidences of defective judgment in the determination of earlier acquisitions are gradually disappearing from our galleries.

The influences leading to this marked improvement in the art interests of the city have been many and various. Among these influences the art exhibitions held from time to time must be counted as highly significant. The first was held in Oak Hall in 1857, and this may be regarded as the date of the revival, or, in an important sense, as the date of the origin of a genuine art interest in the city.

For a number of years past art exhibitions have constituted a special feature of the St. Louis Annual Fair and Exposition. These have generally been made up mainly of paintings, representing the best class of work of many of the foremost artists of both Europe and America.

Besides these, other occasional exhibitions have been held in the Mercantile Library rooms, in the reading-room of the Public School Library, and latterly two specially noteworthy ones in the new Museum of Fine Arts. These have all been "loan exhibitions," the pictures being supplied from the private galleries of the city. Much credit is due to H. L. Dousman and other collectors named below for their public-spirited liberality on these occasions, which has been of great value in educating the public taste.

Again, the collections that came to be formed, as a result of the newly-awakened interest, gave by reflex influence a strong stimulus to that interest. The earliest of these collections worthy of mention began to be formed in the years immediately succeeding the close of the war. A number of these have come to include not merely an extended array of pictures for which large sums of money have been paid, but pic-

tures which, with very few exceptions, are genuine works of art of a high order of merit. Such are the collections of H. L. Dousman, Charles Parsons, Daniel Catlin, F. O. Day, John J. O. Fallon, S. A. Coale, J. G. Chapman, Benjamin W. Clark, Edwin Harrison, George E. Leighton, F. L. Ridgeley, John A. Scudder, John R. Shepley, and W. S. Stuyvesant, which contain good and important examples of the work of nearly two hundred of the most celebrated of modern painters. The works in these collections have been chiefly, though not entirely, selected because representative of artists of high repute, and together afford the means of study of much of the best of modern art.

Others, guided in many instances by knowledge born of real study of art, and in other instances by a well-defined and cultivated taste, have made collections which may be said to exhibit more of the individuality of the owners, notably H. C. Ives, G. Baumgarten, Martin Collins, S. M. Dodd, W. W. Harris, Henry Overstolz, E. A. Hitchcock, Frank Desloge, W. J. Gilbert, Horatio M. Jones, H. T. Simon, J. B. Henderson, Thomas E. Tutt, G. O. Carpenter, A. B. Thomson, L. M. Rumsey, G. S. Walker, M. Rumsey, H. C. Wilson, B. H. Brownell, E. S. Warner, and D. F. Colville. Some of these collections are the expressions of taste or feeling in a special direction, as for engravings or etchings, and some are composed exclusively of the works of local artists.

Hercules L. Dousman,¹ who has perhaps the finest private art collection in St. Louis, is the only son of Col. Hercules L. Dousman, who, as one of the leading minds of the Northwestern Fur Company, contributed largely to the opening up to settlement and civilization the vast territories that lie west and northwest of Prairie du Chien, Wis., as far as the boundaries of the British dominions and the mouth of the Columbia River. Col. Dousman was born in 1800, in the island of Mackinac, and after receiving a thorough commercial training in New York, became, while still quite a young man, connected with the Northwestern Fur Company, of which John Jacob Astor, its founder, was then manager, and in which Pierre Chouteau, of St. Louis, was subsequently one of the controlling spirits. In 1826, Col. Dousman was stationed by his employers at Prairie du Chien, under the nominal control of Joseph Rolette, a gentleman who speedily comprehended the great abilities of his youthful friend and coadjutor, and yielded to him the administration of the affairs of his company in that region. Thus at an age when most men are deliber-

ating on the choice of a career, Col. Dousman became the practical Governor of a territory larger in area than France and Germany combined, and the potent agent through which civilization has supplanted barbarism throughout a section which bids fair to become the richest and most populous in the republic. He was one of the most remarkable men of his day, and among the wild tribes of the Northwest his control was unhesitatingly admitted. A friend of his, Gen. Henry H. Sibley, in a paper read before the Historical Society of Minnesota, speaking from long years of personal knowledge, bore testimony to the extraordinary power he wielded among the Indians, who, while they feared and respected the determined will of Col. Dousman, revered him as a man whose justice was equaled by his kindness, and whose word could be relied on implicitly in all transactions. Indeed, he was their friend as well as their law-giver, and his rule was acknowledged with a hearty loyalty that could only spring from warm personal affection.

In 1844, Col. Dousman married the widow of Joseph Rolette, who died in 1842. This lady was born in 1804, at Prairie du Chien, where she resided, with some trifling temporary absences, until her death, which occurred Jan. 13, 1882. She survived her three children by her first marriage, and on April 3, 1848, her only surviving child, Hercules L. Dousman, was born. Throughout all her long residence in her Northern home Mrs. Dousman led a life of piety and charity, which endeared her to the people among whom her lot was cast, and caused her decease to be mourned with a genuineness and spontaneity of feeling such as made it seem that every family felt the loss as that of one of its individual members.

Col. Dousman died Sept. 12, 1868, when his son was less than twenty-one years of age. During his business career he had acquired vast possessions, including property lying at various points along the banks of the Mississippi, from Carondelet, where he owned thirty acres of city property, to Prairie du Chien, where his lands faced for three miles along the river bluffs, and stretched far inland. But for the civil war, during which he raised and equipped at his own cost large bodies of troops, these estates would have been much more valuable; but, notwithstanding, at the time of their owner's death they were valued at several millions of dollars. All these estates are now the property of his son.

Hercules L. Dousman married in November, 1873, the eldest daughter of Gen. Samuel D. Sturgis, an officer who distinguished himself on several occasions in important operations during the war, and who as colonel of the Seventh Cavalry won an en-

¹ This sketch was contributed by F. H. Burgess.

viable record as one of the best Indian-fighters the United States army has produced. He is at this writing governor of the Soldiers' Home at Washington. Shortly after his marriage, and early in 1874, Mr. Dousman accompanied his wife to St. Louis on a visit to her father, who was then commandant at Jefferson Barracks. This visit led to his permanent settlement in St. Louis, the decision being reached in the fall of that year. In 1877 he purchased a handsome mansion, which he remodeled, adding to it a gallery for a collection of paintings. Mr. Dousman had long been a consistent and liberal patron of the arts, purchasing pictures and statuary whenever opportunity served, and gradually educating his judgment up from plane to plane, each step being taken with characteristic caution and forethought, but all tending towards the one general purpose of making a collection which should comprise specimens of the best efforts of modern genius. Long before his gallery was completed the principal dwelling-rooms of his residence were crowded with the paintings he had accumulated. Subsequently, from time to time, additions have been made, and always with a close regard to the principle on which the collection was begun, until now, although there are more extensive, there are few choicer collections in the country.

As soon as his collection had approached its present degree of excellence, Mr. Dousman notified all interested in art, whether resident in the city or visitors, that the treasures he had gathered were at their service for either enjoyment or study. Artists were especially invited to make use of the opportunity thus afforded, and the Dousman residence came to be daily thronged with visitors whose only introduction was a taste for works of art. In time this was found to be too great a tax to be permitted without restriction, and a regulation was made which proved beneficial to all. One day in the week was set apart as a general visitors' day, admission being by card, obtainable by any one of respectability on application, the gallery being reserved on the other days for the use of the family and intimate friends.

Probably one of the most remarkable of the works in Mr. Dousman's gallery is the famous "Temptation of St. Anthony," by Louis Leloir.

Gabriel Max is represented by two superb works, "Maternal Happiness" and "The Reverie," both of them perfect specimens of the best style of this great figure-painter.

Bouguereau's work is seen in a magnificent full-length, life-size painting, "Les Jeunes Bohemiennes," sometimes called "Les Sœurs." and in a cabinet picture of extreme delicacy of sentiment, entitled

"L'Ange Gardien," where a young mother is breathing a soft prayer over her sleeping infant.

Victor Bachereau has a fine historical work, showing the last hours of Francis of Lorraine, Duke of Guise, the dying hero pardoning his assassin, who has been captured and brought to his tent for condemnation.

"The Roll-Call of the Reign of Terror," by Charles Louis Müller, the original of the great canvas which stretches over one of the walls of the Palace of the Luxembourg, shows with awful skill all the horror of a morning in the conciergerie when the officer of the revolutionary tribunal is calling out the daily list of the victims of the guillotine.

Pierre Jean Clays is represented by a scene in the harbor of Ostend, painted in the best style of that great marine artist.

Benjamin Constant's work appears on two canvases,—"*Cæsar's Daughter*," haughtily treading the steps of the Roman amphitheatre, and "*The Sultan's Favorite*," a strong piece of Eastern light, color, and grace.

Corot's "*Morning*," one of the best works of the great landscape-painter, is another feature of the collection.

Among the other artists represented are E. J. Aubert, Czachorski, De Haas and Van Marcke, who appear at their best in two magnificent cattle pieces; William Kray, of Vienna, who is represented by the famous "*Lorelei*," and by "*The Swimming Lesson*" and "*The Fisherman*;" Jacquet, whose work appears in exquisitely painted portraits of Mr. Dousman's two eldest daughters; A. Vély (Salon picture of 1880), "*Le Cœur S'Eveille*," a life-size, full-length work, showing a young maiden listening to her grandame's reading of some story of heroic deeds; Lecompte du Nouy, represented by his famous Salon picture, "*Christian Pilgrims at the Tomb of the Virgin*;" Casanova, Madrazo, Mesgrigny, Meissonier, Adrien Moreau, Pierre Outin, Palmaroli, Perrault, Pinchart, Richter, Rico, Rossi, Schenck, Schreyer, Alvarez, Amberg, Chelmonski, Chlebowski, Carolus Duran, Jules Dupré, Diaz, De Neuville, Coomans, Heilbuth, Alfred Guès, Hagborg, Indoni, Ziem, Villegas, Simoni, Sjamaar, Terrassa, and a score of others.

The citizens of St. Louis fully appreciate the value of such an acquisition to their city as the Dousman family. Its head is always ready to promote public enterprises with both purse and influence, and his home, under the cultured management of Mrs. Dousman, is the centre of the most graceful and refined society the city can boast.

In addition to the works of art belonging to the St.

H. L. Dinsman

Louis School of Fine Arts, the St. Louis University, the Mercantile Library, and the Public School Library, the city contains a score or more collections of paintings worthy of mention in this connection, five well advanced collections of engravings, three of etchings, and one of photo-gravures and autotypes.

Co-ordinate with the influences already mentioned tending to improvement in the art interests of the city have been the organizations and institutions devoted exclusively to the fostering of this special class of interests.

The earliest of these appears to have been the Western Academy of Art. This was established in 1860, with great promise of permanence and usefulness. Hon. Henry T. Blow was its first president and the leading spirit throughout. It had purchased an extensive collection of casts of statuary, and had made arrangements for the establishment of a School of Design. With the opening of the war, however, the existence of the academy speedily came to an end. The military authorities took possession of the building, and what the organization had collected was quickly scattered abroad. The casts from the antique works now in the reading-room of the Public School Library are all that remain of its possessions.

The Art Society was established in 1872, for the express purpose of cultivating a taste for art, and one means adopted for the attainment of this end was the formation of a collection of works of art that should be open to the public. The first president of the Art Society was Thomas Richeson, after whom, for several terms of office, came J. R. Meeher, H. H. Morgan, and Thomas Davidson. Dr. W. T. Harris also took an active interest in the organization and contributed much to its success. During the first four or five years of its existence, with such men as its supporters, the society exhibited great vigor and exerted a marked influence upon the community. Dr. Harris, Dr. C. L. Bernays, D. J. Snider, and others infused a strong element of philosophical criticism, directing attention specifically to the thought element in works of art.

It was this influence especially that led to the purchase of a large collection of autotype reproductions of celebrated works of art, and the placing these on permanent exhibition in the reading-room of the Public School Library. The result has been to familiarize the whole community in greater or less degree with the typical productions of the great epochs of art activity in the history of the world. The collection is especially rich in works of the *renaissance* period, the selections being made evidently with reference to the culmination of the expression of the fundamental conceptions of Christianity, and therefore

the fundamental conceptions of the modern world in art-forms.

Unfortunately, however, in the year 1878 the management was changed, and the real purpose of the organization quite lost out of sight, the natural result being the speedy dissolution of the organization itself. But this fact could not invalidate the work actually accomplished by the society that has a permanent value, and to its promoters is due the gratitude of all genuine lovers of art in the community.

The St. Louis Sketch Club originated with J. R. Meeher in 1877. Its aim was primarily a professional one, viz., the cultivation of the inventive and creative powers of its members, who were, of course, artists, either professional or amateur. A further purpose was to promote a professional spirit among the artists of the city. It began with but three members, and met in turn at their respective studios. For a time the jovial artists found the meetings occasions of genuine relaxation and mirthful enjoyment, no less than of free mutual criticism. With increase of numbers, however, there has been a manifest tendency towards reserve and "decorum," until, with an active membership of twenty-five, and an associate membership of seventy-five, its gatherings have become somewhat staid social occasions. The rooms of the club are well appointed, and its monthly receptions are occasions of special interest. At these receptions are exhibited sketches by the active members, illustrating some appointed theme. The influence of the club upon its members has been very great and altogether valuable, as it promises to be for the future.

The School of Design was established by Mrs. John B. Henderson in 1878. The aim of this organization was mainly to give opportunity for learning the methods and fundamental forms of decorative art, though afterwards instruction was also given in painting, both figure and landscape. For a time the school was popular, and seemed to meet a real demand. At length, however, the public-spirited lady who established it, and who from the first had supported it almost unaided, gave it over to other management. Support failed, and the school shortly came to an end.

There remains to be noticed the School of Fine Arts connected with the Washington University. In a prospectus of the school for 1881-82 it is stated that "the establishment of an art school upon a broad and permanent basis has always been part of the plan of Washington University." It is also intimated that art instruction had been embodied in the course of study for nearly twenty-five years. It would seem, however, that it was not until 1875 that anything very definite was done to put in force this part of the

general plan. In that year "students were admitted to the drawing department," and class and public lectures were given in art history. During the same year, too, an evening school was opened.

This initiatory step, properly speaking, in the realization of what had so long been included in the ideal of the university was taken by Halsey C. Ives, who, in the face of much discouragement and opposition, organized a free evening class in a room of the university and became its sole teacher. The class numbered eighteen the first evening, and increased to forty-three within two months. During the second year the numbers were such as to require an assistant, and the year following three assistants became necessary. At the same time a course of lectures was given on Architecture, Sculpture, Art History, and Music. These lectures were open to the public, as well as to students, and were largely attended.

It soon became evident that there was demand for day classes as well, and accordingly provision for such was made. Many at once availed themselves of the opportunity thus offered, and the numbers have steadily increased to the present time. During the past year two hundred and eighty-eight persons have received instruction in the school, exclusive of students from other departments of the university. About one-third of the students thus far have been ladies.

During the first years of the work the instruction given was for the most part unpaid. It was an experiment, and largely the experiment of the one man, who looked steadfastly through all discouragement to the success which he saw as well as felt to be certainly awaiting his efforts.

The success that followed his conviction was followed by the conviction of others, so that "on May 22, 1879, the directors of the university adopted an ordinance establishing a Department of Art in Washington University," to be known as "The St. Louis School of Fine Arts." The objects of the department were appropriately defined, and work was begun at length upon a thoroughly secure basis.

Of course the man who had proven the practicability and made certain the success of the school was now formally appointed its director. Nor could a more fortunate selection have been made. Professor Ives has already brought the school to a degree of maturity that gives it rank among the foremost of such institutions in the country. Altogether clear in his convictions, unswerving in his purpose, familiar with the art and art schools of both Europe and America, and enthusiastic in his devotion to art, his management promises to give to the very liberal pro-

vision now made for the school the utmost degree of efficiency in the promotion of the art interests of St. Louis and the West.

But any notice, however brief, of the St. Louis School of Fine Arts would be incomplete without some mention of the splendid gift of its most recent and most liberal patron. On the 10th of May, 1881, as elsewhere more fully stated, Mr. Wayman Crow formally delivered by gift to the authorities of Washington University the title of a large, substantial, and handsomely-furnished structure, under the name of "The St. Louis Museum of Fine Arts." This consists of five large galleries, besides a number of classrooms, three large studios, and a beautiful auditorium capable of seating nearly a thousand people. With its galleries once properly filled, we have here the predestined focus of all the genuine art interests of the city.

Here again, indeed, the energy of Professor Ives has not been wanting. Two of the galleries were immediately filled with a fine collection of casts, which he had already secured, representing the great typical works in sculpture, from the colossal Egyptian statues to the marvelous Gates of Ghiberti. A number of paintings of a high order of merit are already on the walls, together with engravings, etchings, and autotype reproductions of many great works of art. Of these, indeed, he has already secured a rare collection for the school, so that students have constantly before them both excellent original works and also faithful reproductions of many of the finest creations in the entire range of art.

There can be no question that the establishment of the St. Louis School and Museum of Fine Arts marks one of the most important epochs in the art history of St. Louis.

Finally, it ought not to entirely escape notice that some very intelligent and effective work in the direction of cultivating a taste for and developing a rational judgment of art and art history has for a number of years been going forward in the Central High School, at first under the direction of Miss Mary E. Beedy, and more recently in the hands of Miss Sue V. Beeson.

Two publications specifically devoted to art have been published in St. Louis. One of them, under the title of *Art and Music*, was begun in 1881. It gave illustrations of the work of local artists, and reproduced a number of works in local collections. It failed to reach a very high standard of work, met with very unsatisfactory support, and after about eight months of precarious existence its office of publication was moved to Chicago, where it is now issued as a weekly.

A smaller one is published by the students of the School of Fine Arts, under the name *Palette Scrapings*. It has been in progress but little more than a year, and is, of course, to be judged of from its own stand-point. As students' work it is very creditable.

Two other publications, the *Journal of Speculative Philosophy*, under the editorship of Dr. William T. Harris, and *The Western*, under the editorial management of H. H. Morgan, have devoted much space to the philosophical discussion of art, both in its general compass, and also in the special interpretation of individual works of art, both ancient and modern. These interpretations have been the outgrowth of attempts to discover and to formulate in reflective language for the reason the thought element involved in given works of art which, as such, of course appeal directly to the imagination.

We come, finally, to give some brief indication of the actual productive work accomplished in the field of art in St. Louis, and of those by whose hands this work has in the main been done. And it is worth remarking that the very fact of so large a number of artists finding support here is itself the best evidence of the rapid growth in the appreciation of art in the community.

Of architecture there is little to be said from the point of view of art. Of church architecture there are comparatively few specimens of really fine design. One of these is the Episcopal (Christ) Church at Thirteenth and Locust Streets. Though still unfinished, the structure is altogether imposing. The plan, as a whole, is marked by a pleasing degree of harmony, which is greatly heightened by the sense of repose given by the appearance of massive solidity. It is a good example of the early English Gothic style.

The Presbyterian Church, Fourteenth and Lucas Place, bears a specially fine spire, illustrating the best phase of the true pointed style.

SS. Peter and Paul's (Catholic) Church, South St. Louis, is a fine large edifice in stonework of the Gothic style, the external appearance of which, however, is seriously marred by the unfinished state of the spires. The Church of St. Alphonsus, on Grand Avenue, is also a fine structure externally, though the interior is not sufficiently high to prevent a certain sense of oppression.

St. Joseph's (Catholic) Church, Eleventh and O'Fallon Streets, is specially noticeable on account of its interior decoration, as is also the much smaller Church of the Annunciation, Seventh and Labadie Streets, which is nearly on the plan of the Sistine Chapel in Rome.

The Church of the Messiah, recently erected on the

corner of Garrison Avenue and Locust Street, is a beautiful example of the early English style of architecture. It has a number of memorial windows, which are considered the best specimens of stained-glass work in the city. The perfect adaptation of means to ends of use, without in any degree sacrificing any part of the artistic motive of the whole, is realized in this structure to a degree seldom attained.

On the other hand, examples are but too numerous of large sums of money expended only to render bad taste the more conspicuous. This is especially true of a number of churches but recently completed at great cost, the interior decorations of which are altogether unfortunate, both in design and in combination of colors.

The Public Buildings of the city present few artistic features to detain us. The old court-house, Fourth and Market Streets, has a really good dome. The Four Courts, Twelfth Street and Clark Avenue, is a huge pile, gaudy, French, and flimsy.

The new custom-house, again, occupying an entire square between Eighth and Ninth Streets and Olive and Locust, is a building of immense cost, and not altogether destitute of pleasing points. Viewed as a whole, however, it is impossible to deny that it lacks unity. On the contrary, it is cut up into details so as to lose fatally in mass and solidity.

The Museum of Fine Arts, Eighteenth and Lucas Place, mentioned elsewhere, may be classed among public buildings in the more general sense. The main portion is of stone, the auditorium in the rear being of brick. The effect of the whole is unique and pleasing, while the interior finish is rich and faultlessly elegant.

One other building also may be included here, and also serve as transition to the class of commercial buildings. It is the new Chamber of Commerce, Third and Chestnut Streets. It is massive, symmetrical, beautiful. Unfortunately, however, its location renders a good view of it well-nigh impossible.

The number of commercial buildings noticeable for their architectural design is rapidly increasing. One of the earlier and one of the finest of these is the Equitable building, Sixth and Locust Streets, with its admirable provision for light. Among others are the Gas building, Third and Pine, brick finish, and the Bridge building, Eighth and Washington Avenue, with its handsome front in stone, each representing a special style.

Among hotels, the Lindell, Sixth and Washington Avenue, is doubtless the finest from the artistic point of view, while of the theatres the new Olympic is regarded as by far the handsomest.

The number of really handsome residences is also rapidly increasing. Among many others may be mentioned that of J. L. D. Morrison, Twenty-eighth and Locust Streets, entirely of stone, large, finely proportioned, and in refined taste; and those of John Whittaker, Garrison and Franklin Avenues, P. L. Foy, Grand and Lindell Avenues, and J. D. Perry and others on Vandeventer Place. It would indeed be impossible, as it would be undesirable, to catalogue all the residences whose owners have shown their appreciation of the value of the art element in a dwelling. Many, indeed, present little that is noticeable externally, but are specially elegant within, following the fashion of the ancient Greeks.

In short, there can be no doubt of the genuine and rapid increase of interest in architecture as an art in all its branches on the part of the citizens of St. Louis.

Among local architects, F. D. Lee, by whom, aided by Thomas B. Annan, the Chamber of Commerce was planned, and George I. Barnett, have done much thoroughly artistic work.

Charles E. Illsley has also done good work in the line of domestic architecture.

In sculpture there is still less that calls for notice. In some sense Miss Harriet Hosmer may be claimed as belonging to the art history of St. Louis, seeing that in 1850 (at nineteen years of age) she became a student in a medical college of this city, where she acquired a knowledge of anatomy that has been of special service to her in her later artistic labors. Two beautiful specimens of her work, *Ænone* and *Beatrice Cenci*, are now in the city, one owned by the Mercantile Library, and the other by the Art Museum.

Howard Kretschmar, a native of St. Louis, became conscious of his vocation as a sculptor through carving a set of chessmen in wood. He afterwards modeled in clay a bust of Mayor Joseph Brown, which attracted attention, the result being that he went to Europe and remained there four years, first in the Academy of Munich, and afterwards as an independent student at Rome. Since his return he has been actively engaged in his profession. Among his recent works is a marble bust of Hon. Thomas Allen. He is at present a teacher in the School of Fine Arts, Washington University.

Pietro Perrin also worked as a sculptor in St. Louis from 1860 to 1870.

J. Wilson McDonald commenced practicing his profession as a sculptor about 1860, and executed models for the statue of Thomas H. Benton which was to be placed in Lafayette Park. But he was not successful in the competition, as the award was made

to Harriet Hosmer. He afterwards executed marble busts of Benton and Mr. Harrison, the iron merchant, both of which now adorn the large room of the Mercantile Library. He removed to New York after the close of the war, and has resided there ever since, executing various commissions for Eastern and Western patrons. A work which brought him fame in the East was the colossal bust of Washington Irving, which was placed in one of the parks of Brooklyn. He was commissioned to execute a colossal statue in bronze of Attorney-General Bates, which was erected in Forest Park, St. Louis, and afterwards competed for the statues of Gen. Custer and Gen. Francis P. Blair.

W. H. Gardner adopted the profession of sculptor in St. Louis, and commenced working in the studio of Howard Kretschmar about 1880, assisting that artist in the execution of the colossal busts now in position on the front of the Museum of Fine Arts. In 1881 he exhibited a bust of President Garfield at the Fine Arts Hall in the St. Louis Fair-Grounds, which was much admired, and for which he very justly received a first prize. In 1882 he competed for the Blair monument, for which prizes had been offered by the Blair Monument Association. In this competition he carried off the first prize, and was commissioned to execute a colossal statue in bronze of Gen. Francis P. Blair, which he is now working upon.

Robert Bringham, a young sculptor of decided ability, was one of the students at Washington University, and a pupil of Kretschmar. He went to Europe to pursue his studies, but was only able to stay one year. Since his return he has executed medallions and statuettes which have attracted attention and placed him in the position of one who has talents of a high order. He received the first and second prizes at the fair in 1882, and has since exhibited some ideal modeling at the St. Louis Sketch Club which displayed considerable imagination and excellent anatomical knowledge.

Painting has been much more widely appreciated than either of the other forms of art. And as there is nothing in which man has so direct and deep an interest as in himself, it is but natural that the portrait-painter should have been the first to receive cordial greeting and profitable employment.

Among the earliest of the portrait-painters connected with the history of art in St. Louis was Chester Harding, father of Gen. Chester Harding and of the wife of Hon. J. M. Krum, of this city. He was born in 1792, and made his first visit to St. Louis about the year 1820. With rare energy he had struggled through the most adverse circumstances into an acknowledged position as an artist. In one of his West-

ern journeys he painted the portrait of Gen. Clark (of Lewis and Clark's expedition to the Rocky Mountains), and also that of Daniel Boone. The latter is understood to be now in the possession of James Bissell, of this city. In Boston, as early as 1823, he was overrun with commissions, and finally broke off his stay there abruptly, with nearly a hundred applications still awaiting him, in order to make the visit to Europe which he had been long and eagerly looking forward to. In England his power was very soon recognized, so that he was shortly occupied in painting the portraits of a number of more or less celebrated personages, among them the Duke of Sussex and Alison, the historian. There are also several portraits by him of Daniel Webster, and these are regarded as being of high merit.

During his last visit to St. Louis, in 1866, he painted the portrait of Gen. W. T. Sherman. This is one of his latest, as it is also one of his best works. He died in Boston within the same year. A brief account of his life is given in the *Atlantic Monthly* for April, 1867. He himself also left a volume with the quaint title "Egotistography," in which he gave an account of his own life and works.

About 1840, Emanuel de Franca came to St. Louis from Philadelphia. He soon acquired great popularity as a painter of portraits, and for a time did good work.

Ferdinand T. L. Boyle, another portrait-painter, came to St. Louis about the year 1838. He was distinguished for his intelligence and fine social qualities. Among the portraits he painted were those of Governor Gamble and Gen. Francis P. Blair, the former of which is in the collection of the Mercantile Library.

Wilkins was active in the same field about the same period. He was an exponent of the English school, in which ladies were habitually represented as shepherdesses.

It was not far from the year 1858 that St. Louis was visited by a portrait-painter who is regarded by good judges familiar with the whole course of the development of art in St. Louis as the best of all this class of artists who can claim a place in the present history. This was W. Cogswell, who, though he remained here but two or three years, did much valuable work, including the portraits of such citizens as Joseph Charless and Peter Lindell. On quitting St. Louis he went first to Chicago, and afterwards to California, where he now resides.

A. J. Conant, born in 1821, took up his residence in St. Louis in 1857, and is still in our midst. He has long been highly esteemed both as a man and as an artist. He is specially successful in his portraits of

mature men. His strength lies in the decidedly realistic character of the likenesses he produces.

Madame Subit has followed the profession of portrait-painting in St. Louis for many years, and has received many commissions, which have been filled quite to the satisfaction of those giving them. She works very minutely, paying great attention to the elaboration of laces and drapery.

A number of other portrait-painters are deserving of mention, though it will be impossible here to give them extended notice. Col. Waugh, of early date, was not only a painter, but also made portrait busts in marble. John Reid, Brewer, G. Mueller, and Powers also did good work of this class.

Latterly, Miss Georgie Campbell, who was for a time a pupil of J. R. Meeker in landscape, has been specially successful in portrait-painting. In this field she has gained much from the instruction of Healy. She is now in Chicago.

It should be mentioned, too, that Miss Sarah M. Peale was a popular painter of portraits in St. Louis from 1847 to 1878. Portraits by her of Daniel Webster and Thomas H. Benton are in the collection of the Mercantile Library.¹

¹ Miss Sarah Middleton Peale lived in St. Louis for over thirty years, until 1878, when she returned to Philadelphia, in order to be near her surviving kinsfolk.

Miss Peale belongs to the historical family of that name, so prominent in the art history of the United States. She is the daughter of James Peale, the brother of Charles Wilson Peale, the founder of Peale's Museum in Philadelphia. Her uncle painted the first picture of Washington in 1772 as a Virginia colonel. He opened the first picture gallery in Philadelphia, and was for fifteen years the only portrait-painter in North America. On her mother's side Miss Peale's great-grandfather was a Claypole, and the grandson of Oliver Cromwell. John Claypole was one who came over with William Penn to America in 1682, and his son, James Claypole, built the first brick house in Philadelphia.

Miss Peale arrived in St. Louis in 1847, from Baltimore, where she had spent several years with a cousin. She came to St. Louis at the request of Mr. Nathaniel Child, who had relatives in Baltimore. She visited Washington several times, and painted the portraits of Lafayette, Caleb Cushing, Dixon H. Lewis, of Alabama, Hon. Lewis F. Linn, of Missouri, Judge Abel P. Upshur, William R. King, Henry A. Wise, Senator Benton, and others. The portrait of Benton was purchased by a gentleman and presented by him to the Mercantile Library. The portrait of Dr. Linn was purchased by Mrs. Capt. Sears, a niece of the senator.

During her long sojourn in St. Louis, Miss Peale was devoted to her brush, and painted the portraits of several distinguished characters, among them that of Father Mathew, while on his visit here. She painted the portrait of Dr. J. B. Johnson and other leading citizens. The walls of her studio were hung with a number of original portraits and copies made by herself. Among them were Caleb Cushing, Dixon H. Lewis, and a few others. Latterly her skill was more especially devoted to the painting of fruit pieces.—*J. T. S.*

A number of figure-painters of much merit have also found a congenial field for their labors in St. Louis. Among these, Deas lived and worked here during the years 1840-45. Besides figure-pieces he painted animals and landscapes. He exhibited a number of works in the American Art Union. Among these was one representing frontier life, the scene being a struggle between a white hunter and an Indian. An "Irish Stag-Hound" by him is owned by Gen. Sibley, of St. Paul.

Thomas S. Noble came to St. Louis about 1860. He studied in Paris under Couture. On his return he painted a large composition entitled "The Last Slave-Sale in St. Louis." During the war he joined the Southern army. Afterwards he went to New York, where he was elected an associate of the National Academy. Among works executed in that city were a number the themes of which were drawn from slave-life in the South. Later he went to Cincinnati, where he was given charge of the McMicken School of Design. There he painted "The Price of Blood" and "John Brown led to Execution." He is a good draughtsman, and some of his work shows superior strength in color.

Charles F. Wimar, born in 1829, in Germany, gave evidence even in childhood of absorbing artistic instincts. At the age of fifteen he emigrated with his parents to America and settled in St. Louis. Shortly afterward he attracted the attention of the artist Pomarede, who inquired the name of the boy, sought out his parents, and secured him as a pupil. In 1849, Pomarede undertook the task of painting a panorama of the Mississippi River. Wimar accompanied him on the journeys necessary to sketch these scenes. Here he became intensely interested in the characteristics of Indian life. His portrayals of these were so faithful and full of vigor that Pomarede at once advised him to devote himself exclusively to such work. This he did, though not till he had spent five years in diligent preparation for the task in Dusseldorf, under the instruction of Leutze. Nor did he fail to make trial of his powers upon his favorite theme during these years of preparation. The result was the execution of a number of important works, among which was one representing an emigrant train attacked by Indians. The design was boldly conceived and finely wrought out, the completed picture creating great interest in Europe, and being bought on its arrival in this country by the late Governor Gamble. Wimar also painted, while still at Dusseldorf, a series of pictures representing the abduction by the Indians of Daniel Boone's daughter. One of these is now in the collection of the Mercantile Library of this city. On

his return to St. Louis, Wimar at once set about his central task, and traveled among the Indians, making sketches, taking photographic views, studying in minutest detail their characteristics, and afterward portraying on canvas in finished form the completed conceptions he had thus worked out with so much enthusiasm and labor. He also painted many pictures representing buffaloes. His last work was the painting of the historical scenes in the dome of the court-house of St. Louis. Consumption had developed, and in 1863, at the age of thirty-four years, his work and his life ended together, as he himself had predicted. Wimar's gifts were of a high order, as his works testify, and yet during his lifetime he failed to receive the appreciation that was his due. Now that he is dead all do him honor, and we cannot without the deepest regret think of a life like his, cut short while yet so much remained for him to do, and just when he seemed on the point of realizing the outward as well as the inward fruits of the success he had so manfully achieved in art. The greater part of his works are owned in St. Louis.

Conrad Diehl, a pupil of Kaulbach and Foltz at Munich, and afterward of Gerome in Paris, became actively related to the art interests of St. Louis directly after the great fire in Chicago. He was very soon enabled, through the timely aid of James E. Yeatman, to offer to his pupils the advantages of day life-study, an advantage which drew a number of his former Chicago pupils to St. Louis. Upon the merits of the work of this school the *Boston Globe* of July 4, 1878, commented as follows: "These are perfectly marvelous in the beauty of their execution, the firmness of touch, the perfect drawing, the wonderful relief, and the superb breadth and masterly vigor that characterize them all. We are the more surprised at these drawings as there are but few masters who can produce such thoughtful, brilliant, and faultless work. The drawings of the New York Art School, lately exhibited at the same rooms, are childish and almost ridiculous by the side of these productions of a young school of which we have never before heard." This school, which he conducted with such signal success, was but the carrying out of the determination with which he returned from his European studies. That purpose was nothing less than to hasten the time when the art student of America should no longer find it necessary to seek in a foreign land the education he desired. We will not here be able to trace his efforts in Chicago, cut short by the great fire, nor to specify the untoward circumstances by which the fruits of his labors here were turned into other channels, nor to recount his prolonged and

intense labors in the direction of securing a rational method of instruction in drawing in the public schools of St. Louis and ultimately in the whole country. In all these efforts indeed he met with partial defeat; and yet in the best sense he was truly successful, for the principles he at first seized only in a general way were, through this intense and prolonged activity, worked out in detail and formulated into what may with justice be styled the first *reasoned system* of elementary instruction in drawing thus far presented. This system the author himself significantly styles "form study." Just when this system was fairly matured the opposing forces succeeded in depriving our schools of further benefit from it. At the same time (1880) the authorities of the State University at Columbia, Mo., recognizing the high value of the system, as well as the superior gifts of its author, called him to a chair in that institution, where he has since been devoting his energies to the perfecting in detail and to the practical application of his method, which he has admirably summarized under the title of "Grammar of Form-Language" in a work still in manuscript.

Meanwhile he has not allowed his work as artist in the more precise sense to stand still. Besides designs for arabesque decorations, he has produced, among other works, a design for a monument representing Christ at the Resurrection, which was pronounced to be the best of a number of competing designs, most of which were by professional sculptors. At present he is engaged in the preparation of cartoon studies for what he styles his "two first pictures," as he regards all his former large paintings in the light of studies merely.

George C. Eichbaum, portrait and *genre* painter, came to St. Louis from Pittsburgh in 1859. He is especially successful in portraits of women and children. Latterly he has painted a number of pictures of the *genre* type that have been well received, among them especially "Pickwick and Sam Weller," and another entitled "Whistle and I'll come to you, my lad;" this was exhibited in New York at the Academy, and sold for a high price on the opening day of the exhibition.

W. M. Chase, now well known throughout the country, began work in St. Louis in 1870 as a fruit-painter. In 1872 he went to Europe, where he was under the instruction of Pilotz, at Munich. On his return to America he chose New York as his field of labor, and has there gained an enviable reputation.

J. W. Pattison took up landscape-painting about 1867. He was for a time in Mr. Conant's studio, after which he became a teacher in the Mary Institute, and later took charge of the art department in

Washington University. In 1872 he went to Europe, studied in the schools of Dusseldorf and Paris, changed his style to *genre*, and has produced a number of very pleasing pictures. He returned from Europe in 1882.

Paul Harney commenced his artistic career in St. Louis. He spent two years in Munich, and is now a teacher in the School of Fine Arts, Washington University. His duties allow him little time for original work, though what he has done indicates the possession of genuine talent.

Carl Guthertz has also for several years been connected with the School of Fine Arts, where his services have been invaluable. Besides acceptable portraits, he has exhibited a marked talent for ideal compositions, such as the "Awakening of Spring" and "Midsummer Night's Dream." He spent four years as a student in Paris, Antwerp, and Rome.

John Fry, a young man, has recently developed in this school unusual powers as an artist, and has been added to the corps of teachers. He has shown rare ability as a colorist, and with the seriousness of purpose and definiteness of conception characterizing his work there is reason to hope for much that is excellent from him in the future.

George W. Chambers, a former student of the School of Fine Arts, has spent two years in Paris adopting the *genre* style. He has already done creditable work, but has recently returned to Paris to pursue his studies there further.

Charles E. Moss came to St. Louis from Nebraska in 1877, entering Meeker's studio at the age of sixteen. He made rapid progress there, and at the end of two years went to Paris, where he became a pupil of Bonnat. His progress there has been altogether remarkable. At the age of twenty-one he painted his first large canvas, which was accepted at the Salon, and has since been on exhibition in St. Louis. The subject is the "Prodigal Son," which is treated with perfect seriousness and with great strength. His second large canvas was accepted at the next year's Salon, and found a purchaser before the close of the exhibition. He is counted as one of the most vigorous and promising of the American colony of artists in Paris.

J. R. Meeker, beyond question the leading landscape-painter of the West, came to St. Louis in 1859. Here he has worked continuously up to the present time, with the exception of three years spent during the war in the capacity of paymaster in the United States navy. These three years, however, proved to be peculiarly fruitful to him as an artist. During his leisure voyages on the lower Mississippi and other streams of that region he discovered the art possi-

bilities of the semi-tropical swamps ; and how great the discovery was none can rightly estimate save those who have had opportunity of enjoying the exquisitely beautiful dreams of the primeval world which he creates betimes out of the material thus discovered. Other and charming work he has produced indeed, representing scenes in the Rocky Mountains, in the Green Mountains, in Minnesota, in Wisconsin, in New York, and in Missouri. But the work of his that will live longest is the work that is peculiarly and solely his own.

Louis Schultze began work as an artist about 1855. He assisted De França for several years. His work includes figure-painting as well as landscape, in which he uses sometimes oil paints, sometimes water colors.

Ritter was the first teacher in the Art Department of the Washington University. He was a skillful draughtsman, though his work was somewhat labored and over-minute. He had made many elaborate studies of mountain scenery in Germany and Switzerland, and painted several large pictures now owned in St. Louis.

Thomas Allen, Jr., commenced the study of landscape-painting with Pattison about 1872. Afterwards he went to Dusseldorf and studied there two or three years. On his return he made special studies of the characteristic scenery of New Mexico, resulting in a number of works. He is now a resident of Paris.

Since 1879, W. L. Marple has spent the greater part of his time in St. Louis. A number of his best pictures show evident traces of the influence of French landscapes exhibited here. He has recently gone to Chicago.

Henry Chase was born in St. Louis, and early evinced a fondness for art. He went to Europe in 1872, while still very young, and returned thither in 1877. He was a pupil of Mesdag, at the Hague. His specialty is marine views, and latterly ships. Among his earlier works is a specially fine large one entitled "Taking the Wreck in Tow," which is in the possession of Hon. Henry Overstolz, of this city. He is at present in New York.

Mrs. Augusta S. Bryant, for five years a pupil of J. R. Meeker, has adopted landscape-painting as a profession. Her work has received much favorable notice. Among her works, "Pilot Knob" is a strong piece of realistic painting, while the "Road to the Meadows" and a "View on the Meramec" show a fine sense of the great beauty of summer days, with their shimmering atmosphere and tender foliage and grass. Quite recently from a well-observed reflected sunset she has developed an ideal scene of marked

character, whose mysterious light awakens a thought of the Norse legends concerning Valhalla and the twilight of the gods. These indications give clear promise of valuable work yet to be done by this artist.

James M. Barnsley, a young man of excellent ability, received his art education mainly in the School of Fine Arts, and gives promise of marked success as a landscape-painter. He is an earnest student of nature, and has a keen insight into its beauties. He is now studying in Paris.

J. M. Tracy was for a number of years a pupil in the schools of Paris. In 1878 he established himself in St. Louis as a portrait-painter. He, however, painted landscapes and pictures of the *genre* type as well. Several small cattle pieces by him attracted special attention, the result being that he presently devoted himself to animal painting as a specialty. In this field he has been increasingly successful, his pictures of dogs and hunting scenes commanding good prices. His work exhibits marked improvement since his adoption of this special field. He removed to New York in 1881.

W. H. Howe, while clerk in a dry-goods house, began to occupy his leisure hours in painting, with no other teacher than pictures and occasionally observing artists at their work. In 1880 he went to Dusseldorf, where he remained about one year. He is now in Paris, where he is a pupil of Otto Van Thoren.¹

CHAPTER XXXVIII.

MUSIC AND MUSICIANS.

IN 1837 there came to St. Louis Professor Wilhelm Robyn, a young German musician, who had been educated at Emmerich, in lower Holland, his instructor having been Bolde, a most capable musician, and the contemporary and acquaintance of Mozart, Beethoven, Haydn, and Hummel. Robyn had expected much of St. Louis, having heard it to be a place of thirteen thousand people, with many Germans, and was greatly disappointed to find that there was but little taste for music. There was only one music-teacher here, a man named Cramer, who taught the piano, and of whom little is now known, except that he was doing a poor business, and soon

¹ We wish to acknowledge our indebtedness for many important suggestions to Mrs. A. B. Thompson, and also to Mr. J. S. Garland, two of the most intelligent friends of art in the city.

after left the place. Pianos were very scarce in St. Louis in those days, and only a few of the rich old Creole families had them.

Professor Robyn is full of sprightly recollections of those days, and from him we have obtained a sketch of the development of music in St. Louis.

Up to 1839 the musical recreations of the people had been restricted to a concert, usually given by some stray singing-school teacher or little band of strolling musicians, with some local favorite, perhaps, as the star. The only music in the churches worthy of mention was at the Cathedral, which had for organist an Italian named Marilano, brought to this country by Bishop Rosatti, who returned to his native land. There was a very good choir at the Cathedral, and among the prominent members were Mrs. Henry Chouteau and her daughter, Mrs. Mary Vallé; Mrs. Bogy, a sister of Gen. Pratte; Judge Wilson Primm and his sister, and Britton A. Hill, the well-known lawyer, who is still living. Judge Primm was a fair violin-player, and Robyn relates that they formed an acquaintance and played together, the one his violin and the other the piano, and although Primm knew no German and Robyn no English, they conversed readily by means of music, the "universal language."

In December of 1837 Ludlow & Smith's theatre company arrived at St. Louis from New Orleans, and musicians were wanted for the orchestra. Mr. Robyn, rather than starve, as he says, engaged to play the double bass at twelve dollars a week. A complete orchestra was organized, with Herr Mueller as leader. Mueller was an accomplished musician, having been leader of a band for many years in London. There was a young Englishman named Trust, who was a fine solo trombonist and harper, and a German, Louis Schnell, who was a skillful performer on the horn. Among the others were John Brown and Henry Berg and his brother, well-known musicians, who played at balls, etc. Mr. Robyn says that the performance of this orchestra was never excelled by any similar organization subsequently.

In 1838, the theatre company having left, a small orchestra was organized under the leadership of Mr. Wells, a dancing-master and a good violinist. René Paul was president of the society. A few concerts were given, and resulted in the expression of a general desire for a concert hall. Subsequently the concert hall still existing on Market Street, between Second and Third Streets, was erected. During the same year Prof. Robyn was appointed teacher of music in the University of St. Louis, and soon organized the Philharmonic Society, which is still a flourishing

appendage of that institution. He had thirty-five pupils, and his monthly recitals were attended by the *élite* of St. Louis. He was the organist in the chapel, and when the church was built he produced all the great masses of Haydn, Mozart, etc., and created quite a sensation in musical circles.

The same year (1839) Charles Balmer, still a resident and a well-known music publisher here, came to St. Louis. That year Robyn organized and led a brass band, no slight undertaking, as he was obliged to write and arrange all the music himself. Balmer was pianist at a concert given by the band for the benefit of the new hall, and among the artists who assisted were Carrière, a graduate of the Paris Conservatory, who was teaching the flute at the university; Farrell, an Irishman, who played the violin; and Martinez, a Spaniard, who played the guitar. Miss Theresa Weber was the soprano on these occasions. These concerts were a financial failure, but similar entertainments were given for some years afterward.

Miss Weber and her brother Henry were members of the immortal Weber family of musicians in Germany; she subsequently married Mr. Balmer, and Henry became his partner in the music trade. In 1840, Henry established a "Singakademie."

In 1842, Nicholas Lebrun came to St. Louis, and was appointed leader of the band of the German military corps which was organized in the following July. He was a Frenchman, and arrived in St. Louis when only twenty-three years old. For several years he traveled with leading circuses, and his compositions attracted much attention. From 1848 he resided in St. Louis, and became the band-leader of most of the popular military organizations. He is now in the music trade in St. Louis.

In 1845 occurred a marked event, the founding of the *Polyhymnia* by Dr. Johann Georg Wesselhoeft, one of the most remarkable Germans who had yet come to America. In 1834 he was one of the founders of the *Alten und Neuen Welt*, of Philadelphia, certainly the best German paper up to that time published in America, and while a resident of that city actively assisted in organizing the German settlement at Hermann, Mo. After a varied career in the East, he came to St. Louis in 1844-45, and bestirred himself actively among the Germans of the place. The "*Polyhymnia*" was organized for the practice of vocal and instrumental music, but chiefly the latter was undertaken, for singers were scarce, and it was next to impossible to collect a chorus. Among the vocalists still remembered is a German lady named Hoeffel, who occasionally appeared as a soloist; Christian Kribben,

a German lawyer, who subsequently was a prominent politician, and Mr. Romeyn, also a lawyer. For lack of a chorus, the vocal performances of the society were mostly limited to solos, duets, and quartettes; but under the leadership of Professor Robyn it brought out many overtures, symphonies, and other orchestral works, and its concerts were well attended. It lasted some ten years and then broke down. Among those living who still recall their membership in the "Old Polyhymnia" with pleasure are Drs. Engelmann and Wislizenus, Dr. S. Gratz Moses, and Mr. Karst, the French consul. The "Polyhymnia" gave choice programmes, and afforded the people of St. Louis the first classical music they had ever heard to any considerable extent. One of its customs was to extend courtesies and assistance to visiting artists. It often rendered them invaluable orchestral assistance, and frequently "went shares" with them in the proceeds of the entertainment. Among those who visited St. Louis during this period were Ole Bull and Max Bohrer, the violinists, Thalberg, Leopold de Meyer, Madame Anna Bishop, and Jenny Lind. For several years Heinrich Kayser, a German politician, prominent in city affairs, was president of the "Polyhymnia." Among the other members W. A. Bode, Charles Balmer, and E. Nennstiel.

In 1845, Henry Robyn (brother to Wilhelm) came to St. Louis. Although never prominent like his brother as a leader, he took high rank among the musicians of the city, and was for many years organist at the Cathedral, and St. Patrick's Church. For a long time he was musical instructor at the Institution for the Blind, and invented and published a method (still in use) by which music for the blind could be printed. This gifted man was lost in the sinking of the "Pomerania," some four or five years ago.

During the early years of the Polyhymnia, Mr. Balmer established an "Oratorio Society," composed of singers from all the choirs, and gave several performances. At one of them he brought out the whole of the "Creation," and although his chorus was not large, and his orchestral aids were meagre, he produced an effect which has never since been equaled in St. Louis, even with the most elaborate accompaniments. Between the years 1840 and 1850 the musical societies were represented by "The Cecilian" and "The Oratorio." R. Fuchs was the director of the former, and C. Balmer of the latter. Later the French musicians of noteworthy ability were connected with local musical interests; these were Miguier, Fallon, and Carrière.

The next important musical venture was the estab-

lishment of the "Philharmonic Society" in 1859. The chorus numbered about one hundred from the various choirs, and there were fifty or sixty pieces in the orchestra. It brought out some very important works,—"Creation," "Seasons," "St. Paul," "Elijah," Schumann's "Die Rose," etc. It was first under the leadership of Sobolewski, an eccentric but profound musician. The "Amphions," a glee-club of society young men, and the "Orpheus," a male quartette, often assisted at the Philharmonic concerts.

Sobolewski deserves an additional word. He was the author of several works, including a classic opera, which Liszt highly praised. It was named "Courola," after his daughter, who is still a resident of St. Louis, and is a well-known teacher of vocal music. Most of his family of ten children still live here.

To Mr. Sobolewski is due the credit of first gathering into close and really harmonious relationship whatever was of real worth in our musical circles. His selections of musical compositions were guided by sound judgment and refined taste, while the performances themselves became genuine artistic unities through the inspiration of rare directive power.

Sobolewski was a man of rare genius as well as of the most refined artistic taste, and with him in the lead there was the greatest promise for the society, a promise which, however, was not to be realized. Sobolewski, notwithstanding his enthusiasm for the interest of the highest art elements in music, and his unremitting and intelligent labors, still failed of the hearty appreciation to which his excellences would seem to have entitled him.

Dissatisfaction led to Sobolewski's resignation, and to the transfer to other hands of the management. After a period of decline, another conductor was sought in Germany, and Egmont Froehlich's services having been secured, the society, under his management, showed signs of revival. The musical elements of the city, however, proved to be not yet ready for fusion, and the society was dissolved about 1870.

After the dissolution of the Philharmonic Society, the Germans and the Americans became mutually exclusive in matters of music. Among the Germans there was found the Arion Society, of which Sobolewski was for a time the director. The Arion constituted a male chorus of large membership, with Von Deutseh as conductor. During the period of its real activity many fine choruses, as well as compositions for mixed voices, were admirably rendered. After a time many members withdrew from the Arion and organized the Liederkrantz Society, with Egmont Froehlich as director; subsequently the Arion became merged in the Liederkrantz. The Liederkrantz, after

several years of more strictly musical effort, has become an association in whose social enjoyment music is a pronounced feature rather than the chief end. The society possesses a large and commodious hall, situated at Thirteenth Street and Chouteau Avenue. There have been also a number of other male chorus organizations, notably the Saengerbund and the Orpheus, but these have specially embodied the individual character of the German element. The Musical Union, organized by Dabney Carr, has for two years represented American musical effort. In addition to this there have been given this season Memorial Hall Concerts, which have afforded special opportunities for listening to talent not local. Simultaneously with these larger organizations a number of trios and quartettes were formed by some of the best musicians. These in their weekly reunions have rendered acceptably much "chamber music," selected with taste and judgment from the great masters. Of such organizations the Philharmonic and the Mendelssohn Quintette Clubs are specially worthy of mention.

The Philharmonic has given a series of concerts, whose programmes for the most part consisted of very choice classical music, and these were rendered in a highly acceptable manner. The members of the Philharmonic are Messrs. Spiering, Anton, Boehmen, Meyer, and Hammerstein.

The Mendelssohn is still young as a society, having given but two public performances. On the other hand, the ability and enthusiasm of its members gives the organization a well-defined standing. Messrs. Heerich, Schopp, Schoen, C. Froehlich, and Alfred Robyn constitute the membership.

As a matter of course, the usual song concerts have occurred, and have found special patronage among the Americans. In these concerts in St. Louis, as elsewhere, the musical element has too frequently been subordinated to the idea of securing the largest possible amount of applause.

Regarding this as a period of mere transition, we may assert that it is passing away. While the lighter operas are still popular, and the night of the great singers rather than the night of great musical compositions is still provocative of the most strenuous struggle for seats, yet such musical dramas as "Lohengrin" are with each repetition more generally and heartily appreciated. There is, therefore, unmistakable evidence that a taste for genuine music in its truly artistic significance is rapidly growing.

The reaction of this developing taste of the public upon local musicians could not long be delayed, and, indeed, is already manifest. The impossibility of bringing musicians together into permanent and effi-

cient organizations is giving way before a truer professional spirit, and there is every reason to look with confidence to the early organization of societies capable of rendering in a worthy manner great works requiring large choruses. On the other hand, church music both vocal and instrumental is rapidly improving.

It is to be noted that among our local musicians a number have found time and vindicated their ability to compose original works of much merit. Sobolewski undoubtedly stands at the head of local composers, although his greatest works belong to his pre-American period. Wm. H. Pommer, a young man of marked ability, both as a pianist and as a composer, is the author of many songs and of several comic operas. Goldbeck's vocal music, especially his quartettes, is widely known and highly appreciated. J. M. North, C. Balmer, A. G. Robyn, and E. R. Kroeger have also been noticeable as composers of songs. Waldemar Malmène is a composer of oratorios and ballads, and E. M. Bowman of pleasing church quartettes. H. Strachauer is a composer of classical music; he was a pupil of Bode's, and his fine abilities caused his removal to Boston to be regretted. Wayman McCreery has also composed some songs and a light opera. The Kunkel brothers have had some local reputation from their compositions.

Among interpreters (of instrumental music) specially worthy of mention are W. A. Bode, Mrs. Dr. Strotholte (a specialist in Beethoven's sonatas), Lawitzky, Miss von Hoya, Spiering, Waldauer, Schoen, Meyer, Anton, and Heerich (violinists); Bowman, A. G. Robyn, Hammerstein, Miss Lina Anton, Miss Nellie Strong, E. Froehlich, and A. Grauer (pianists).

Among those who have been prominent as directors are, in addition to those previously named, Waldauer, C. Froehlich, Poppen, Hans Balatka, and Otten.

A very strong influence has been exerted by several non-professional musical organizations. The Quartette Club, which meets at the residence of Mrs. Charles Nagel, has attained rare excellence, and is to be counted as a decided factor in the development of local musical taste.

Another private organization has included many of our best students of vocal and instrumental music, and while seeking nothing but the improvement of the ladies who compose it, has had a marked effect upon the intelligence of the audiences which assemble to listen to the efforts of professional musicians.

The Meysenberg Quartette Club has for years met regularly and worked industriously, and has had a manifest influence in elevating the musical taste of the community.

The work done first by Henry Robyn and later by Egmont Frochlich in the High School is also worthy of mention, inasmuch as many singers have found their first strong impulse while pupils; the number of pupils and the fact that the school furnishes a mixed chorus have much bearing upon the character of the work, and consequently upon the nature of its influence in our musical history.

In addition to individuals already mentioned, there are teachers of music whose services entitle them to special notice. Such are Henry Robyn, Mrs. Brainerd, H. M. Butler, Charles Green, M. Epstein, A. Epstein, Mrs. Ralston, Carl Richter, Madame Petipas, Madame Caramano.

The Polyhymnia Society was organized in the summer of 1845, and for several years was, as we have already stated, well and favorably known in art and musical circles. Many gentlemen, musicians, artists, and others favorable to the encouragement of the arts, were engaged in its organization. Among the most active of these were Alexander Kayser, Dr. Pollak, William and Henry Robyn, and Messrs. Beneke, Obert, Ringling, Burke, Schnell, and Kribben. The obstacles of comparatively empty coffers, of occasional dissensions among the members, and of inexperience were surmounted by the strenuous exertions on the part of those who had the objects of the association most at heart. In the early part of the society's existence, some serious misunderstanding among a portion of its members on one or two occasions nearly brought it to a sudden close. The first president of the Polyhymnia was Mr. Wesselhoft, who retained the office during a period of two and a half years. The society gave its first concert at Concert Hall on the 27th of November, 1845. Its success induced renewed energy, and a year after that time the society numbered nearly two hundred members. The orchestra consisted of twenty or twenty-five performers. As heretofore stated, the society went out of existence in 1870.

The Socialer Saengerchor.—After the failure of the revolution in Germany, in 1848 a large number of those who had taken part in it fled to the United States and many settled in St. Louis. These emigrants at once proceeded to organize societies for intellectual and bodily culture and social recreation. The very earliest of these associations was doubtless the St. Louis Saengerbund, organized in 1849, which after an honorable career of some twenty-five years was merged in the Orpheus Saengerbund and ceased to exist. The next was established Sept. 13, 1850, as the "Saengerchor des Arbeiterbildungsverein," or the song section of a union for the improvement of workingmen. The next January it took the name of

"Socialer Saengerchor," by which it is yet known, and is recognized as the oldest singing society in St. Louis. It also enjoys the honor of being about the only surviving Saengerbund of the hundreds which were established during that period throughout the country, and is certainly the only one that remains of those in the West.

The first meeting of the infant society was held in Kossuth Hall, on South Second Street, and Herr Holzmann was the first president. The first concert was given Nov. 30, 1850. In the winter of 1851 a library was established; on the Fourth of July, 1852, the society took part in the usual celebration, and in October, 1852, a debating club was formed. In January, 1855, the society gave a masked ball, the first ever given by a German society in St. Louis, which was the event of the season in German circles.

The society prospered, and was a representative German institution until the war, when, in common with its sister societies, it lost largely through the enlistment of many of its members in both armies, but chiefly under the Union flag. Since the war its career has been without special incident. It has been subjected to the friendly rivalry of younger organizations, but has maintained its place as one of the leading German singing organizations of the city. In April, 1868, it was incorporated, the incorporators being Clemens A. Schnake, Conrad Kellerman, Henry Thon, Philip A. Nolting, Wilhelm Polting, Jacob Eckhardt, Wilhelm Dentz, Henry Meyer, Charles Roock, and Anton Helle. Since 1875 it has been under the efficient leadership of Professor A. Willhartitz. It has taken the following prizes:

First prize at the Westliche Saengerbund of North America in June, 1854.

A silk banner at the fest at Highland, Ill., May, 1855.

First prize at the St. Louis Agricultural and Mechanical Association, 1856.

First prize at the Saengerfest at Highland, Ill., May, 1880.

The membership numbers about five hundred and fifty, of whom eighty are active. The library, started in 1851, has been well cared for, and numbers nearly four thousand books. The society owns a piano, etc., and has a reserve fund of several thousand dollars. The present officers are as follows: President, August Blittersdorf; Vice-President, Charles J. Bremer; Secretary, William Oyentrop; Corresponding Secretary, William Vogel; Financial Secretary, John Tighman; Treasurer, Henry Trieselmann; Musical Director, Max Ballmann.

Germania Saengerbund.—This excellent German

singing society was organized March 19, 1859, by the two brothers, William and Adolph Reisse, under the name of "Berg Saengerbund," or "Mountain Saengerbund." The society was formed at Yaeger's Garden, now Anthony & Kuhn's, in South St. Louis. The first president was William Reisse; the first leader, F. Glaser, who was succeeded by F. Bochmann, Egmont Froehlich, Charles Gottschalk, Herr Sabatzky, and Theodore Abbath. The society has been prominent at several fests, and always won a prize. It has brought out the following operas: "Die Weinprobe;" "Die Gerichtssitzung;" "Die Vier Glatzkoepfe;" "Der Vetter aus Amerika;" "Incognito; oder, Der Fuerst wider Willen."

The society numbers thirty-two active members, one hundred and forty-five passive members, and five honorary members, embracing many of the best German citizens of South St. Louis.

For ten years past the society's hall has been in the building of the Lafayette Bank, corner Carondelet Avenue and Second Street. On the 19th of March, 1882, it celebrated its twenty-fifth anniversary in the same garden where it was organized.

The Saengerbund has property representing a capital of two thousand five hundred dollars. It has also a select library for the benefit of its members. The present officers are: President, Frederick Schroeder; Vice-President, A. Loux; Recording Secretary, Wilhelm Meyer; Financial Secretary, F. Vischwitz; Manager, F. Themeyer; Leader, Theodore Abbath.

St. Louis Philharmonic Society.—In pursuance of a notice previously given, a meeting was held in the rooms of the Missouri State Mutual Insurance Company, June 21, 1860, at which the constitution of the "St. Louis Philharmonic Society" was read and adopted, and the following officers and board of directors were chosen: James E. Yeatman, president; Charles Balmer, vice-president; John J. Anderson, treasurer; George W. Parker, recording secretary; Thomas Marston, Jr., corresponding secretary; Board of Directors, L. A. Benoist, William Robyn, William H. Benton, E. C. Catherwood, Henry T. Blow, Dabney Carr, James B. Eads, B. A. Bode. The object of the society was to encourage the study and elevate the taste of music among the citizens. The civil war came on soon after the organization of the society, and put an end to its existence.

Musiker Unterstuetzungs Verein.—This society was organized in 1863, and was incorporated in 1864. The first officers were: President, J. H. Keller; Secretary, Louis Schnell; Treasurer, Charles Gebhardt. It was originally designed as a protective union, to enable the musicians of the city to obtain

better prices for furnishing music at concerts, balls, etc., but eventually was changed into a beneficiary society. It pays six dollars per week sick benefits and thirty-five dollars for funeral expenses. There are about sixty members, and the officers are: President, Nicholas Lebrun; Vice-President, Michael Ensinger; Secretary, George Zaenglein; Treasurer, Charles Gebhardt. Herr Gebhardt has been treasurer continuously since the organization.

Orpheus.—The Orpheus Singing Society was organized July 16, 1867. The first president was William Homann. In 1875 it was enlarged by the accession of the Saengerbund. It has been one of the most efficient of the numerous German singing societies of St. Louis, and in the various musical contests has taken its fair share of prizes. It has sixty active members and one hundred and ninety passive members. The present officers are as follows: President, Nicholas Christman; Vice-President, John Schorr; Recording Secretary, Louis Stockstrom; Corresponding Secretary, William H. Lahrmann; Financial Secretary, George R. Kramer; Treasurer, Charles Schweikardt.

The Liederkrantz.—In 1870 a disagreement among the members of the Arion des Westens, a German singing society of some note, resulted in the secession of sixteen members, among whom were Eugene Haas, Ferdinand Diehm, and Rudolph Schulenburg, who immediately issued a call for a new singing society, and on the 27th of November, 1870, thirty-six united in forming the Liederkrantz. The first directors of the new society were Eugene Haas, Edmund Wuerpel, Theodore Kalb, Dr. Nagel, A. Link, Ferdinand Diehm, and A. Laeffler, and the first officers were: President, Eugene Haas; Secretary, A. Link; Treasurer, Ferdinand Diehm; Musical Director, Egmont Froehlich. The latter was also director of the Arion des Westens, but during the year he resigned, and has continued uninterruptedly as the director of the Liederkrantz.

For some years the society met in the building of the People's Savings Institution, Park and Carondelet Avenues; then it went to Freemasons' Hall. From 1877 to 1880 it met at the Annunciation school-house, at Chouteau Avenue and Sixth Street, and Dec. 22, 1880, it occupied its present elegant quarters.

From its inception the Liederkrantz was conspicuously prosperous, and rapidly drew to itself the finest musical talent among the Germans. It has always enjoyed a high degree of popular favor. In 1879 the Arion des Westens, which had two hundred and fifty members, joined the Liederkrantz, and added one hundred voices to it. This accession emphasized the need of more commodious quarters, the want of which had

long been felt, and at last it was decided that the society might safely undertake the erection of a hall of its own. In August, 1879, therefore, the Liederkrantz Building Association was organized. The capital was placed at fifty thousand dollars, and the Liederkrantz Society took three thousand five hundred dollars of stock, and every member of the society became also a member of the building association, which was managed by the following officers: President, F. W. Sennewald; Vice-President, Charles Wezler; Secretary, A. Link; Treasurer, Ferdinand Diehm; Directors, Louis Gottschalk, Lorenz Lampel, W. J. Lemp, Eugene Haas, Status Kehrmann, Ferdinand Herold, Joseph Emanuel, Emil Donk, and Egmont Froehlich.

The building association bought an eligibly situated lot at Chouteau Avenue and Thirteenth Street, and on the 31st of July, 1880, laid the corner-stone of the new hall. On the 22d of December, 1880, the building was dedicated with appropriate ceremonies. The hall was erected by Messrs. Wilhelm & Janssen, after plans procured from abroad. It has a frontage of ninety-four feet on Chouteau Avenue and one hundred and forty feet on Thirteenth Street, and is two stories high. The style of architecture is the *renaissance*. A handsome entrance at the intersection of these streets conducts to the interior. The completeness of the appointments and the entire absence of any glaring or "loud" details are the conspicuous features which first strike the eye. The special characteristics of the structure are solidity and safety, combined with beauty and a complete adaptability to the objects for which the building was erected. The grand hall is sixty-five by eighty-one feet, and there is a refreshment-room one hundred and five by twenty-four feet, besides a number of toilet-rooms and apartments for billiards and other games. The stage is thirty by twenty-five feet, and is shaped like a shell in order to secure the best musical effect. The acoustic properties of the hall are very fine. The lot cost eight thousand dollars, the building thirty-six thousand dollars, and the furniture six thousand dollars. The building, in spite of its simplicity and modesty of style, is one of the most imposing and beautiful in the city, besides serving as a cheerful home for the society and its friends.

The Liederkrantz has six hundred members, of whom one hundred and thirty are active. It is the largest singing society in the city, and its success is due chiefly to the high standard which it has applied to its own performances, and to its aim to introduce and familiarize the best work of the most eminent composers. Under the direction of Herr Froehlich, it

has gained recognition as one of the best and most proficient singing societies in the West. Among the great works which it has brought out with distinguished success are Verdi's "Requiem," Schumann's "Pilgrimage of the Rose," Mendelssohn's "Walpurgis Night," Gade's "Erl King's Daughter," Vierling's "Rape of the Sabines," Becker's "Die Zigeunerin," Gade's "Zion," Bruch's "Odysseus," Hoffman's "Die Schoene Melusine," Haydn's "Seasons," Moehring's "Auff Offner See," Erdmannsdoerfer's "Princessin Ilse," etc.

The officers for 1882 were: President, F. W. Sennewald; Vice-President, O. J. Wilhelmie; Secretary, M. Klaus; Treasurer, Fred. Aberold; Corresponding Secretary, F. W. Meyer; Cashier, E. P. Olshausen; Musical Director, Egmont Froehlich.

Schweitzer Maennerchor.—This was originally the Gruelti Singing Society, a song section of the Gruelti Verein, the Swiss Benevolent Society; but in February, 1874, it was chartered as the "Schweitzer Maennerchor," with the following incorporators: Ulrich Schwendener, Francis Romer, John Jacklin, Henry Hotz, August Wildberger, J. J. Kiburz, Samuel Putscher, F. X. Siedler, Adolph Walsler, John Boerdin, and others. It has about forty members. The present officers are: President, Albert Bugg; Vice-President, Rudolf Bollinger; Treasurer, J. J. Martin; Musical Director, J. B. Trumbi.

West St. Louis Liederkrantz.—In 1871, Anton Huber, Frank Wieser, August Gruenewald, Louis Schaefer, A. Meyer, Henry Pohlmann, and Louis Wiesler organized the West St. Louis Liederkrantz, with headquarters near Spring and Easton Avenues. Henry Pohlmann was the first president, A. Meyer the first secretary, and John Oberreiter the first treasurer. Herr Haar was musical director. The society prospered, and gained an enviable reputation for good music, and in 1880 took the second prize at Highland, Ill., competing with fifteen clubs from St. Louis and Southern Illinois. It has a membership of two hundred and twenty, of whom twenty are active. Quite a number of ladies belong to the society, and are its most energetic members. Frederick Partenheimer has been director for five years. The present officers are: President, Otto Keil; Secretary, Carl Golschen; Treasurer, William Schroeder; Musical Director, Frederick Partenheimer; Trustees, Louis Schaefer, August Gruenewald, George Kramer, Theo. Hoell, William Koehler.

There are many other German song unions of somewhat lesser note. Many of them are simply song sections of German clubs, turnvereins, etc. Among them may be mentioned the Rock Springs Saenger-

bund, Camp Spring Leidertafel, Apollo Gesangverein, Teutonia Gesangverein, Rheinischer Frohsinn, Maennerehor der Hermann Soehne, etc.

The **St. Louis Choral Society** was organized Sept. 1, 1880, by Professor Joseph Otten. The first officers were: President, L. L. Tebbetts; Vice-President, R. Chauvenet; Secretary, Thaddeus Smith; Librarian, A. A. Schnuck; Conductor, Professor Joseph Otten. During the first year four subscription concerts were given, and the works rendered were "The Messiah," "The Fair Melusine," by Hoffman; "Dettingen Te Deum," by Handel; and fragments of "Tannhäuser," Beethoven's Mass in C, etc. The society has a chorus of one hundred and thirty voices, and is regarded as a promising young organization. The present officers are: President, Nathaniel P. Hazard; Vice-President, S. S. Leach; Secretary, Richard Fenby; Conductor, Professor Joseph Otten.

Musical Union.—In November, 1881, Professor A. A. Waldauer and Dabney Carr organized the St. Louis Musical Union, an orchestra of nearly sixty pieces, which for two seasons past has given concerts of a very high order of merit, having performed with great acceptability the most difficult works of most of the great composers.

Henry Shaw Musical Society.—In the fall of 1882 was organized a society with this name, under the lead of Professor R. S. Poppen. Its first season's performances were highly creditable.

CHAPTER XXXIX.

RELIGIOUS DENOMINATIONS.¹

The Catholic Church.—The Catholic missionaries were the first to preach the gospel in the territory now known as the State of Missouri, and, indeed, in

¹ For material assistance in preparing the sketches of the churches of St. Louis the author is greatly indebted to Rt. Rev. C. F. Robertson, D.D., Bishop of the Protestant Episcopal Diocese of Missouri; Rt. Rev. P. J. Ryan, D.D., Coadjutor Bishop of the Catholic archdiocese; Rev. Walter H. Hill, S.J., of St. Louis University; Lewis E. Kline, of the Baptist Depository; Rev. J. W. Allen, D.D., of the Presbyterian Depository; Rev. Timothy Hill, D.D., of Kansas City, author of a "History of Presbyterianism in Missouri;" Rev. Benjamin St. James Fry, D.D., editor of the *Central Christian Advocate*, and his assistant, W. E. Barns; Rev. John E. Godbey, D.D., editor of the *Southwestern Methodist*; as well as to a "History of Methodism in Missouri," by Rev. Dr. D. R. McAnally; "Pictorial St. Louis," by Camille N. Dry, published by Compton & Co., 1876; and the *St. Louis Spectator*, in addition to the pastors of the various churches.

that now actually comprised in the United States. Long before the "Mayflower" entered Massachusetts Bay the Franciscan missionaries had commenced their sacred labors on the coast of Maine. Side by side the cross and the *fleur-de-lis* moved into the wilderness, marching not to the sound of the drum, but to the solemn tones of the Gregorian chant. The Jesuits, succeeding the Franciscans, carried on the holy work, unchecked by snows or forests or torrents, until within a few years the vast basin of the St. Lawrence, from Quebec to Lake Superior, was dotted with rude chapels, in which the sacred wafer, "all that the church offered to the princes and nobles of Europe, was shared with the humblest savage neophytes."² And five years before Eliot, the Indian apostle of New England, had commenced his labors among the red men in the vicinity of Boston, the cross of the Catholic Church overlooked the valley of the Mississippi. The Indian proselyte loved the Catholic missionary. The man of learning, the scholar, and the gentleman became as a brother to the children of the wilderness. He lived in their wigwams, smoked their pipes, and ate of their venison. He shared their hardships and sympathized with their joys. In a word, acting upon the apostolic rule, "with the weak he became as weak, in order that he might gain the weak."

But it is not alone because the missionary adopted the Indian habits and became as one of the tribe he was proselyting that he was blessed with success. This but furnished him with his moral lever. Instead of demolishing the natural religion of the Indians, he directed its energy and inspired it with an object. In his eyes it was the rough block which he was to chisel into life and beauty. Nature furnished him with materials; it was his business to produce the image. And with true knowledge of the world and the human heart, he saw that the savages, possessing uncultivated intellects, could only be thoroughly impressed through the medium of their senses. Accustomed as they had been to the greatness of the material world, they could not at once become spiritual in their aspirations. He therefore charmed them with the fascinating powers of music, and took extraordinary pains in the embellishment of the church and the altar. Fragrant woods of the forest furnished materials, which his own ingenuity carved into seraphs and saints. Fields which had never been broken by the plow surrendered to his pious exertions wild flowers and evergreens. Sweet-smelling gums exuded from trees, "which spread an odor equally agreeable with that of

² Bancroft.

incense." Simple art and more simple nature combined to decorate the log-built temple; and the rays of the morning sun, pouring through the window of the little chancel, both gilded and sanctified the holy work. "The Indians," says an eminent Protestant writer, "felt that the place was sacred; that the Great Spirit, though everywhere present in his creations, was peculiarly present here, invisible and holy; and that the cross, which was the soul of baptism and the sign of devotion, which was symbolized in every moment of danger or deliverance, on lying down and on rising up, which sparkled in every constellation of the heavens, was indeed a holy emblem, significant of the Great Sacrifice made far away in that Eastern land, from which they derived light both for body and soul. In this way the Jesuits succeeded in teaching European virtues, and not teaching European vices."¹

The same writer adds,—

"Let all honor, then, be paid to the memory of the Jesuit missionaries in America. They have set a noble example to their fellow-laborers in God's vineyard. They have illustrated by their lives the force of that thrilling command, 'Go ye into all the world, and preach the gospel to every creature;' and the promise which accompanied the command was faithfully kept in every instance. Though 'most of them were martyrs to their faith,' God was with them in all their sufferings and trials, and their deaths were scenes of peaceful triumph. But the monuments of their labors are fast passing away. Where are the Hurons, the Mohawks, and the Abenakis? Where are the mighty war-chiefs of the Five Nations? The sun shines upon their graves; their tomahawks are forever buried; the fire of their calumets forever extinguished. The wild forests of America no longer resound with hymns to the Virgin, chanted in languages unknown to civilization. The little bell of the chapel no more rings matins and even-song by the shore of the inland lake. They have all fled, and with them has fled away the glory of the Jesuit missions. But wherever history is read, the names of Brebœuf and Jogues, Raymbault, Rasles, Marquette, Joliet, and Lallemand shall be mentioned with honor, and wherever the Catholic faith is promulgated these heroes shall have what they never sought, an earthly immortality."²

As early as 1512 the Spanish missionaries preached the gospel to the Indians of Florida, but Father Marquette had the honor of first planting the cross in the Illinois country, after he had, in 1673, discovered and explored the Mississippi River. For two months he

sailed down the river in his bark canoe, and the narrative of his extraordinary voyage, revealing to the world the fact that the St. Lawrence could communicate with the Gulf of Mexico by an almost uninterrupted chain of lakes, rivers, and streams, gave France the first idea of colonizing Louisiana. The

MARQUETTE ON THE MISSISSIPPI RIVER.

Mississippi valley soon beheld missions rise among the Illinois, Miami, Yazoo, Arkansas, Natchez, and other tribes. Jesuits, Recollects, and priests of the foreign missions here shared the rude toil of converting the Indians, and the French missions of North America mingled and blended with those of the Spaniards of the South.

Marquette was succeeded in the Illinois country by Father Claude Allouez, who labored under the direction of the Bishop of Quebec. He died about August, 1690. He was followed in 1680 by Father Gabriel de la Ribourde, the first Superior of the Recollects, who was slain by Kickapoo Indians, Sept. 19, 1680. Father Ribourde labored with Father Zenobius Membré, who arrived in June, 1675, and preached in the Illinois country in 1680. He was also murdered by the Indians in 1686 or 1687. The Jesuits now began their missions in the country, and Father James Gravier, S.J., who was killed about 1706, commenced his labors. He was in Illinois in 1687, and was followed by Father Sebastian Rale, who set out from Quebec in 1691, but who it is believed did not reach the country until the spring of the following year. After

remaining two years he was transferred to the Abenakis, his original charge, and Father Gravier took his mission. Father Gravier was very successful with his missionary labors, but was soon recalled to Mackinaw.

He was succeeded by Fathers Julian Binnoteau and Francis Pinet, the latter of whom founded the mission of Tamaroa, or Cahokia. In 1700, Father Gravier descended to the mouth of the Mississippi in order to obtain supplies from French vessels for the Kaskaskia mission, and apparently then returned to the mission. Father Lymoges, stationed at first among the Oumas in the lower Mississippi, is supposed to have ascended the river with Father Gravier. Fathers Pinet and Bovic also labored at the mission, but all of them, except Father Pinet, disappeared about 1703, and Pinet died in 1704. Gravier returned to Peoria and labored there, but descended to Mobile, where he died in January, 1706. About 1700 the care of the Illinois mission devolved upon Fathers Marest and James Mermet. In the previous year Francis J. de Montigny, vicar-general of Quebec, and Antoine Davion had proceeded to the Mississippi, and Tamaroa, or Cahokia, the mission of Father Pinet, was placed under their charge. The first of the clergymen sent to Cahokia was the Rev. John Bergier, but his health having failed, Father Marest, who was then stationed at Kaskaskia, joined him. Father Bergier soon afterwards died. In addition to the Kaskaskia and Cahokia missions, there was one on the St. Joseph's River, of which Father John B. Chardon took charge in 1711.

At this time four missions were in active operation,—one on the St. Joseph's, one at Peoria, one at Kaskaskia, and one at Cahokia. At the last of these, Father Dominic Mary Varlet succeeded Father Bergier, about 1712, and remained for nearly six years, laboring zealously among the Illinois. On his return to Europe, about 1718, Father Varlet was made Coadjutor Bishop of Babylon, but having avowed Jansenistic opinions, was deposed and excommunicated by three successive popes. Contemporaneously with Father Varlet, the Rev. Philip Boucher is said to have labored in Illinois, chiefly at Fort St. Louis.

The influence of the missionaries upon the Indians was widespread and highly beneficial. "Before their conversion," writes Shea, "cruel and licentious to the most frightful degree, the Illinois had, under the influence of religion, softened their savage customs and became so pure in morals that the French settlers frequently chose wives from the Indian villages. These intermarriages are, indeed, represented as so frequent that we must consider the present French

families of Indiana and Illinois as to some extent representing the Illinois Indians, whose blood flows so freely in their veins. The labors of the missionary here, as among the Abenakis of Maine, had two fields,—the villages at one season, the hunting- or fishing-ground at others, being thus partly fixed and partly nomadic."

In the mean time Spanish missionaries had been approaching from the southwest. Cabeza de Vaca, of the Narvaez expedition, succeeded in reaching the outposts of the Spaniards of Mexico in Sonora, and his accounts of the Indian tribes excited the religious zeal of Friar Mark, of Nice, who in 1539 determined to undertake a mission to them. His experiment failed, but in 1542 another expedition set out from Mexico, taking a course towards the northeast. After having reached the head-waters of the Arkansas River, the commander, Coronado, decided to turn back, and on reaching the Rio Grande to return to Mexico. Two Franciscan missionaries, Father Padilla and Brother John of the Cross, had accompanied Coronado, and they determined to remain in the country and undertake the conversion of the Indian tribes. While on their way to the town of Quivira they were both slain by the savages, and it was not until forty years later that the Franciscans penetrated into New Mexico, now the diocese of Santa Fé. De Courey, in his sketch of the Catholic Church in the United States, says, "Before the English had formed a single settlement, either in Virginia or New England, all the tribes on the Rio Grande were converted and civilized; their towns, still remarkable for their peculiar structure, were decorated with churches and public edifices, which superficial travelers in our day ascribe to the everlasting Aztecs." Gradually the French and Spanish missionaries drew nearer to each other, until at length their efforts mingled and blended. In 1721, Father Charlevoix visited the missions on the Mississippi River. He found the Miamis and Pottawatomies nearly all Christians. Father Marest appears to have been recalled about this time, and his death occurred some years later. The chief missions were now established on the banks of the Mississippi River,—the Cahokias and Tamaroas under the priests of the foreign missions, the Kaskaskias, Peorias, and Metchigameas, the latter a tribe which Marquette had seen near the Arkansas, under the priests of the Society of Jesus. The mission of Cahokia was located on a small river, about a mile from the Mississippi, at a large Indian town, in which two tribes dwelt. At the time of Charlevoix's visit it was in charge of Fathers Dominic Thaumur de la Source and Le Mercier. The Kaskaskia mission had been divided into

two distinct charges. One, said to have been the more numerous, was "about half a league above old Fort Chartres, within gunshot of the river," and was under the direction of Father Joseph Ignatius le Boulanger. The latter translated into the Illinois dialect the catechism and instructions for hearing mass and approaching the sacraments, and added for the use of the missionaries a literal translation into French of the Illinois versions. In 1721 he was assisted by Father De Kereben. At the French village below the fort Father De Beaubois was parish priest, and the second Kaskaskia mission, located at an Indian village about six miles inland, was under the charge of Father John Charles Guymonneau, who apparently was at that time Superior of the mission.

"Almost all the Illinois," we are told, "were now Christians, and greatly attached to the French. They cultivated the ground in their own way, and had become, under the influence of religion, very industrious, raising poultry and live-stock to sell to the French. The women were adroit, weaving of buffalo hair a fine glossy stuff, which they dyed of various colors and worked into dresses for themselves, manufacturing a fine thread with great ingenuity." About 1722 the Illinois of the Rock and Pimiteony, owing to the harassing attacks of the Foxes, determined to abandon their villages and join the other Illinois tribes on the Mississippi, where they were converted to Christianity. In the mean time the Jesuits had established themselves at New Orleans, and their Superior there, to whom it was transferred from the Superior at Quebec, had the superintendence of the Illinois mission. Priests were thenceforth supplied from New Orleans. In 1725, Fathers De Beaubois and De Ville ascended the river, followed in 1727 by Fathers Dumas, Tartarin, and Droutrelau. The Illinois mission now began to decline, owing to the mismanagement of the French government of Louisiana and the sale of liquor to the Indians at the fort in the Illinois country. In 1750 but two Indian missions remained, one of them embracing six hundred Indians, under Fathers Francis Xavier de Guienne and Louis Vivier, and the other, not so large, under Father Sebastian Louis Meurin, probably at Vincennes. The priests of the Seminary of Foreign Missions no longer ministered to the Indians, but remained at Cahokia as pastors for the French. In 1757 the French government expelled the Jesuits from their colleges, and subsequently the possessions of France were surrendered to England and Spain. The centre of the Illinois mission at New Orleans was suppressed in 1762, and the mission was thenceforth deprived of all external aid. A portion of the Jesuit property in the Illinois country was sold

by the French government, and the means of the missionary priests were thus still further reduced. The Fathers generally remained at their missions as secular priests under the authority of the Bishop of Quebec until their death. Father Peter Potier, said to be the last survivor of the Jesuit missionaries in the West, was at St. Joseph's in 1751, and frequently visited the Illinois missions up to the time of his death, which occurred at Detroit in 1781.

The last of the Jesuit missionaries who resided regularly in the Illinois country was Father Sebastian L. Meurin, who arrived at Post Vincennes in 1749, and died after 1775. Father Meurin held services at the then recently founded town of St. Louis from May, 1766, to Feb. 7, 1769. Father Meurin's body was removed to St. Louis at a comparatively recent date. He was one of the most zealous and devoted of the early missionaries, who, if their labors were not crowned with that success for which they had so ardently striven, had the satisfaction of witnessing a great and beneficial change among the Illinois. "More than in any other part," writes Shea, "the settlers intermarried with the Indians, and there are few of the French families in Illinois and Missouri that cannot boast their descent from the noble tribe which has given its name to the former State." The Osages were frequently visited by the Illinois missionaries, and, as we have seen, Father Gravier was invited to labor among them. In 1720 some of the Missourians went to France, and the chief's daughter embraced Christianity and married Sergeant Dubois. Soon after their return, however, they attacked a French post and massacred all its inhabitants. Father Meurin's successor at Vincennes was Father Vivier, after whom came Father Pierre Gibault, who officiated at St. Louis from June, 1770, to January, 1772, and who was present at the capture of Kaskaskia by Gen. Clark, on the 4th of July, 1778. Father Gibault was "vicar-general of the Bishop of Quebec for Illinois and the adjoining counties," and therefore had the supervision of all the missions in the Illinois country, including the French settlement of St. Louis. He appears to have returned to Canada about 1789. When Laclède and Chouteau arrived at the site of St. Louis, in 1764, Father Meurin was stationed at Cahokia. He crossed the river in a canoe, and having offered mass in the forest, blessed the settlers and their work. Laclède's companions were mostly French or of French descent, and subsequently were augmented by the immigration of Canadians, Spaniards, Italians, and other nationalities. The population, therefore, was made up of people from Catholic countries, and the established religion, both under French and Spanish

rule, was the Catholic. The slaves, both negroes and Indians, and the free Indians living in the town were also brought up in the Catholic Church. For some time after the settlement of Laeledc's party at St. Louis the parish or mission was supplied by priests from Vincennes, Cahokia, and Kaskaskia, through the instrumentality most probably of St. Ange, the French commandant. Father Meurin, priest of "Our Lady of the Kahokias," it is said, while officiating at St. Louis, baptized three whites, twelve negroes, and five Indians. The first baptism by Father Meurin occurred in the early part of May, 1766. The record (in French) is partly obliterated, but in substance it reads as follows:

"In the year one thousand seven hundred and sixty-six, on the — undersigned, missionary priest in the county of the Illinois — St. Louis, in a tent, for want of a church, have baptized, under condition, Mary — day of the month of September, one thousand seven hundred and sixty-five of the law — John Baptist Deschamps and of Mary Pion, her father and mother. The godfather is Mr. René Tiercerot (Kiercereaux), and the godmother Mary — —.

"In faith whereof, I have signed with the godfather.

"J. S. MEURIN, Priest."

The second child baptized by him was Antoine, son of Lisette, a Pawnee slave. This baptism was on the 9th of May, 1766. Owing to the non-residence of the priest in St. Louis, there is no record of his having officiated at interments, which appear to have been attended to by René Kiercereaux, the godfather of Mary Deschamps, a man of note in the community, whose name appears frequently in the French and Spanish civil records. After the first church was built he was for a long time "*chantre*," or singer of the church, and to the subsequent interments recorded by him he signed his name as "*Chantre de cette église*" ("chanter or singer of this church"). From October, 1770, to the 17th of March, 1772, Kiercereaux recorded the burial of nineteen whites, ten negroes, and five Indians. The next priest who visited St. Louis was Father Pierre Gibault, previously of Vincennes, who styled himself "Priest-Curate of the Immaculate Conception of Our Lady of the Kaskaskias, and Vicar-General of my Lord the Bishop of Quebec," who remained from June, 1770, to January, 1772. From February, 1772, until May of the same year Father Meurin also occasionally visited St. Louis, and during that time baptized two whites and three negroes.

Until 1770 the country was supposed to belong to France, and the clergy continued to act under the direction of the French Bishop of Quebec, but upon the arrival in that year of the Spanish Lieutenant-Governor, the ecclesiastical jurisdiction was trans-

ferred to the Spanish Bishop of Havana. The first priest who resided permanently at St. Louis seems to have been Father Valentin, a Capuehin friar, who in his official acts styled himself "priest of the parish of St. Louis and its dependencies." He remained from May, 1772, to June, 1775, and during that period baptized sixty-five whites, twenty-four negroes, and eighteen Indians. He also solemnized four marriages of whites, and officiated at the interment of forty-two whites, eleven negroes, and nineteen Indians. During Father Valentin's incumbency the body of the commandant, St. Ange, was buried, and the record, translated into English, reads,—

"In the year 1774, 27th December, I, the undersigned, have interred in the cemetery of this parish the body of Hon. Louis de St. Ange, captain attached to the battalion of Louisiana, administered of the sacraments of the church.

"FR. VALENTIN."

From June, 1775, to May, 1776, there does not appear to have been any stationary priest, but the parish was occasionally visited. During two days, the 4th and 5th of October, 1775, Father Meurin again officiated, and baptized four whites. On the 19th of March, 1776, Father Hilaire, a priest of the order of Capuehin friars, and apostolic prothonotary, baptized six whites and solemnized one marriage. In the absence of a priest, René Kiercereaux, "singer of the church," recorded from July 7, 1775, to March 2, 1776, the burial of twenty-nine whites, five negroes, and two Indians. The certificate was subsequently attested and approved by Father Bernard de Limpach, who succeeded Father Valentin in the spring of 1776.

Father Bernard had been transferred from Cuba by Father Dagobert de Longwy, vicar-general of Louisiana. His appointment to the church at St. Louis reads as follows:

"Father Dagobert de Longwy, principal Capuehin priest and vicar-general of the mission of Louisiana, in the diocese of Havana de Cuba, to our very dear brother, the Reverend Father Bernard, de dix par, a professed friar of that order, in the province of Liege, and apostolic missionary of this mission, greeting:

"Well and sufficiently knowing your good habits and capacity, desirous also to conform in all things to the commands of his very Christian Majesty, by his letters patent, registered at the registry of the Superior Council of this colony to grant, in proper and due form, appointments as curate to our missionaries who merit it to those parishes and posts which the mission had formerly been deemed as entitled to, and to place them in legal possession, the patronage, emoluments, and all other arrangements being reserved to our position as the head until his Catholic Majesty should otherwise direct, we have therefore given and conferred, and by these presents do give and confer on you the curacy or parish church of St. Louis, of Illinois, post of Pain Court (short-bread), with all its rights and appendages, upon condition of actual personal residence there, and not otherwise, until a change or revocation by

us or our successors; requiring in consequence the services of the deputy of the king's attorney to see you placed in actual possession of said curacy of the parish of St. Louis, of Illinois, in accordance and with the usual solemnities.

"Granted at our parsonage, under the seals of office, the 18th of February, in the year of grace one thousand seven hundred and seventy-six.

"FRIAR DAGOBERT, *Vicar-General.*

"NEW ORLEANS."

"I certify that this present document is an exact copy of the original appointment presented to us by the Reverend Father Bernard de Limpach, to be deposited for safe-keeping in the archives of this government office in St. Louis of the Illinois.

"FRANCO CRUZAT.

"May 19, 1776."

Father Bernard was placed in possession of the parsonage and formally installed on the same day, as the following translation of the Lieutenant-Governor's certificate shows:

"In the town of St. Louis, at nine o'clock of the morning of Sunday, the nineteenth day of the month of May, in the year one thousand seven hundred and seventy-six, before me, Don Francisco Cruzat, captain of infantry and Lieutenant-Governor of these settlements of the Illinois, and the most distinguished parishioners of the parish of said town, all assembled together in church, the Reverend Father Friar Bernardo de Limpach, Capuchin priest, in virtue of the dispatch which he has brought and delivered from the Most Reverend Father Dagobert de Longwy, Capuchin priest, Superior and Grand Vicar-General of the mission of this province of Louisiana, bearing date the eighteenth of February last passed, and the letter of direction which I, the said Lieutenant-Governor, have received from the Senor Don Luis ne Unzaga y Ameraga, brigadier of the royal armies and Governor-General of this province, bearing date the 28th of February of the current year, in which he commands me to recognize the above-named Father Friar Bernard de Limpach as the curate of the said town of St. Louis. After having performed all the ceremonies that are usual and prescribed by his said Superior, the Most Reverend Father Dagobert, he has entered into and taken legal and formal possession of the cure of this parish of St. Louis of the Illinois; and I, the said Lieutenant-Governor, have caused him to be recognized publicly, as he is recognized by all the parishioners of said parish, and in order that the same may more fully appear and that no obstacle may at any time hereafter be interposed to the exercise of his ministry, there shall be deposited in the archives of this government under my charge the copy of this dispatch, together with this act, which the said Father Friar Bernardo de Limpach has signed with me, the said Lieutenant-Governor, and the most distinguished persons of this town, who by my command were assembled for this purpose, the same day, month, and year above mentioned,—P. F. Bernard, Dubreuil, Perrault, Benito Basquez, Hubert, Sarpy, Laclede Ligest, A. Berard, Ene. Barre, Labuscière, Chauvin, Conde, Jh. Conand, Francisco Cruzat."

Father Bernard officiated as priest from May, 1776, to November, 1789, during which time he baptized four hundred and ten whites, one hundred and six negroes, and ninety-two Indians; solemnized marriages of whites, one hundred and fifteen; negroes, one; Indians, two; mixed white and Indian, one; and buried two hundred and twenty-two whites, sixty negroes, and forty-four Indians.

On the 17th of April, 1780, during the administration of Leyba, he blessed "the first stone of the fort on the hill back of the church, and it was named Fort St. Charles, in honor of Charles III., king of Spain." This was the stone martello fort which stood as late as 1820 at the southwest corner of Walnut and Fourth Streets, where the Southern Hotel now stands. The barracks for the Spanish troops was a long low stone building on the north side of Walnut Street and immediately opposite the location of the hotel. After the change of government from Spain to the United States, the old fort was for a long time used as a jail.

On the church register, under date of June 28, 1780, appears the record of the burial of Fernando de Leyba, Lieutenant-Governor. The English version reads,—

"In the year 1780, the 28th of June, I, priest, Capuchin missionary, curate of St. Louis, country of the Illinois, province of Louisiana, bishopric of Cuba, have interred in this church, in front of the balustrade on the right, the body of Don Ferdinand Leyba, captain of infantry in the battalion of Louisiana, actual commandant of this post, administered of all the sacraments of our mother the Holy Church. In faith whereof, I have signed the day and year as above.

"F. BERNARD, *Miss.*"

Father Bernard was much beloved by his congregation, and traditions are still preserved of his piety and zeal. His successor was the missionary priest Ledru, who continued to officiate from November, 1789, to September, 1793, during which period he baptized one hundred and sixty-eight whites, fifty-five negroes, and nineteen Indians; solemnized twenty-nine marriages of whites and two of Indians and whites, and officiated at the interment of seventy whites, thirty-five negroes, and three Indians.

On the 14th of March, 1792, he interred the bone of Pierre Gladu, whom he describes in the certificate of interment as "a Canadian, before then buried in the Little Prairie, killed by the Indians, 'l'année du coup' (in 1780), a good man and of known probity, according to public statement and report."¹

¹In Hon. Wilson Primm's address before the Missouri Historical Society, delivered Sept. 7, 1867, to which the author is indebted for much valuable material concerning the early history of Catholicism in St. Louis, the following paragraph occurs:

"In connection with this interment, it was said by the old inhabitants who lived at the time and knew the facts that shortly before a man named Duquette came from Canada, sought out the grave of Gladu in the Little Prairie, and caused the remains to be disinterred. He then caused them to be buried in the graveyard of the town with all the solemnities and ceremonies of the Catholic Church. There was a large procession from the Prairie to the cemetery, Duquette walking near the coffin, bareheaded, and with a lighted taper in his hand. After

Father Ledru was succeeded by Pierre Joseph Didier, a priest of the religious order of the Benedictines, of the congregation of St. Maur. He officiated from December, 1793, to April, 1799, during which period he baptized two hundred and twenty whites, seventy-nine negroes, and sixteen Indians. He solemnized seventy-three marriages of whites and one marriage of white and Indian, and buried eighty-five whites, sixty-one negroes, and nine Indians.

From October, 1793, to March, 1794, the interments were made by Jacques Clamorgan, who was acting charge warden, and René Kiercereaux. These, which are exclusive of the interments at which Father Didier officiated, numbered seven whites, four negroes, and two Indians. During the latter part of Father Didier's connection with the parish it appears that he did not officiate regularly, for the register shows that Leander Lusson, priest of "St. Charles of the Little Hills of the Missouri," and Jacques Maxwell, priest of Ste. Genevieve, occasionally officiated at St. Louis from July, 1798, to May, 1799, during which period there were baptized eight whites, one negro, and there was solemnized one marriage of whites. Father Lusson appears to have become the regular priest, serving from May 23, 1799, to March 23, 1800, during which time he baptized twelve whites, eight negroes, and five Indians, and solemnizing five marriages of whites. He was succeeded by Father Pierre Janin, who officiated from April 6, 1800, to Nov. 12, 1804, during which time he baptized two hundred and twenty-five whites, one hundred and fifteen negroes, and fifty-nine Indians; solemnized the marriages of thirty-four whites, and two whites and Indians, and buried one hundred and thirty-eight whites, fifty-eight negroes, and nineteen Indians.

The large number of interments recorded during Father Janin's pastorate is accounted for by the fact that the smallpox made its first appearance in St. Louis on the 15th of May, 1801. From the fact that no record of baptisms appears from Nov. 12, 1804, to March 2, 1806, it is to be presumed that the parish had no pastor during that period. Interments, however, were recorded by Jean Baptiste Trudeau. He was the schoolmaster of the village, and locally noted as a stern disciplinarian, and succeeded René Kiercereaux as singer of the church. The interments recorded by him numbered forty-five whites, sixteen negroes, and twelve Indians. After November, 1806, the church

the reinterment he caused to be placed at the head of the grave a large cross bearing the name of the deceased, and having fulfilled the last sad duties to the deceased he quit the country, leaving his connection with the deceased a mystery which the inhabitants never could solve."

was supplied by priests from other parishes. From March 2, 1806, to the 29th of May of the same year Father Maxwell officiated, and on the 14th and 15th of September of the same year, Father Donatien Olivier, "missionary priest to the Illinois," officiated for baptisms only. Father Maxwell baptized forty-five whites, sixteen negroes, one Indian, and solemnized three marriages of whites. Father Olivier baptized eleven whites, five negroes, and one Indian.

The next registry of baptisms is dated Nov. 9, 1806, and the entry is made in a new volume, on the first page of which is the following :

"This register, containing ninety-two pages, including this one, marked and numbered, is intended for the inscription of the baptisms of the parish of St. Louis, country of the Illinois, under the domination of the United States of America, and of the bishopric of Baltimore. In faith whereof, we, Amos Stoddard, civil commandant of said place, have signed said register, the year and day 26th September, 1804.

"AMOS STODDARD,
"Capt. and First C. Comdt. U. Louisiana."

Thomas Flynn, of the religious order of Capuchins, exercised the functions of parish priest from Nov. 9, 1806, to June 2, 1808, during which time he baptized eighty-eight whites, eleven negroes, and one Indian, solemnized eleven marriages of whites, and buried thirty whites and nine negroes. From the 2d of June, 1808, to May, 1813, no regular priest was stationed at St. Louis, but the parish was visited by the following clergymen :

Father Maxwell, from 5th to 8th of June, 1808, baptizing 23 whites and 9 negroes.

Father Urbain Guillet, a Trappist of the monastery of "Notre Dame de Bon Secours, near Kahokias, in the Territory of Illinois," from 20th July to 26th of August, 1808, baptizing 15 whites and 5 negroes.

Marie Joseph Dunand, priest and prior of the order of La Trappe, from 25th December, 1808, to January, 1809, baptizing 11 whites, 7 negroes, and 1 Indian.

Father Guillet again, from 24th to 31st December, 1809, the parish having been without a priest for nearly a year. He baptized 9 whites and 2 negroes.

Father Bernard, of whom mention has been made before, officiated from 6th February to 13th July, 1810, baptizing 49 whites and 9 negroes.

Father Maxwell again on the 30th of July, 1810, baptizing 3 whites and 1 negro.

Father Dunand again on the 5th August, 1810, baptizing 2 whites and 2 negroes.

Father Maxwell again, from 12th to 15th August, 1810, baptizing 12 whites and 1 negro.

Father Guillet again, from 2d November, 1810, to 23d June, 1811, baptizing 27 whites and 9 negroes.

Father Dunand again, from 30th July to 2d August, 1811, baptizing 6 whites.

Father Guillet again, from 9th August to 1st December, 1811, baptizing 15 whites, 8 negroes, and 1 Indian.

Father Savigne, from 11th December, 1811, to 15th December, 1812, baptizing 76 whites and 19 negroes.

Father Dunand again on the 10th November, 1812, baptizing 2 whites.

Father Savigne again on the 11th February, 1813, baptizing 1 white.

Father Dunand again, and also Savigne, on the 14th March, 1813, each baptizing 1 white.

Father Dunand again on the 16th March, 1813, baptizing 2 negroes.

From the 18th of December, 1810, to the 12th of April, 1813, in the absence of officiating priests, Trudeau, as singer of the church, Jean Louis Marc, as sacristan, Samuel Solomon, Patrick Lee, and others, as church wardens, superintended and certified to the burial of the dead. The number of these interments was 165 whites, 61 negroes, and 11 Indians.

Father Savigne again appears to have exercised permanent functions as curate of St. Louis from the 12th of May, 1813, to Oct. 3, 1817, during which time he baptized 130 whites, 48 negroes, and 1 Indian; solemnized the marriages of 90 whites and 2 negroes, and interred 135 whites, 40 negroes, and 3 Indians.

It was during the ministry of Father Savigne that St. Louis was visited by Benoit Joseph Flaget, Bishop of Bardstown, Ky., who was received with great rejoicing by the Catholic population. During his stay he baptized the children of many of the leading families, among them Joseph Simpson, son of Dr. Robert Simpson. Father Savigne was the last priest of the Canadian mission sent to St. Louis by the Bishop of Quebec. He is described as having been "a man of fine presence, of amiable disposition, zealous in the performance of his duties, and especially kind to the poor and those in distress."

On the 5th of January, 1818, Louis Guillaume Valentin Dubourg, Bishop of Louisiana, accompanied by Bishop Flaget, of Kentucky, and a number of missionary priests, arrived at St. Louis, which was made the episcopal seat for the Territory of Missouri. Bishop Dubourg determined to remain in St. Louis until affairs had become settled in New Orleans, which was then in a disturbed condition. He continued to reside in St. Louis until 1824, and was actively assisted in the work of building this portion of his diocese by the priests who had accompanied him, Fathers De Andreis, Rosatti, Acqueroni, Ferrari, and Caretti, the first three of the Congregation of the Missions.

Louis Guillaume Dubourg was born at Cape François, island of San Domingo, Feb. 14, 1766, was educated in France, and studied theology at the Seminary of St. Sulpice. Subsequently he was placed in charge of a new Sulpitian institute at Issy, near Paris, but was driven from France by the revolution of 1792, and fled to Spain, whence he went to Baltimore, where he arrived in December, 1794. In the following year he became a priest of the Order of St. Sulpice, and in 1796 was made president of St. Mary's Ecclesiastical Seminary in Baltimore, which, in Janu-

ary, 1805, he raised to the rank of a university, having also previously established colleges in Havana and New Orleans, which were broken up by political disturbances. He established the Sisters of Charity in Baltimore in 1809, and in 1811 founded what is still the mother-house of the order for the United States at Emmitsburg, Md. In October, 1812, he was appointed administrator apostolic of the Territory of Louisiana, and arrived in New Orleans towards the close of the year. In 1815 he went to Rome, and was there consecrated Bishop of Upper and Lower Louisiana, Sept. 24, 1815. On his return he brought with him five Lazarist priests (among whom were Fathers De Andreis and Rosatti) and twenty-six young men belonging to the same order. He arrived in the United States Sept. 14, 1817, and proceeded to St. Thomas' Seminary at Bardstown, Ky., where the priests remained until they had acquired proficiency in the English language. He reached Ste. Genevieve Dec. 27, 1817, in company with Bishop Flaget, who had previously visited Ste. Genevieve and St. Louis for the purpose of determining which was the more eligible site for a seminary. It was finally decided that St. Louis should be made the seat of the episcopal residence, and on the 5th of January, 1818, the two bishops reached St. Louis. Bishop Dubourg at once established his episcopal residence in St. Louis, and continued to live there until 1824, on March 25th of which year he consecrated Father Rosatti Coadjutor Bishop of St. Louis, after which he went to New Orleans to reside. In 1815 he founded in America the Society for the Propagation of the Faith, and in 1818 established, under the charge of the Lazarist Fathers, St. Mary's College and Seminary at the Barrens, which in 1838 was transferred to Cape Girardeau, where it still flourishes. Before leaving Europe in 1817 he had applied to the Superior-General of the Order of the Sacred Heart, Madame Barat, for a colony of religious ladies to establish a house of the order at St. Louis. The request was complied with, and in August, 1818, the ladies of the order arrived in St. Louis. During Bishop Dubourg's administration the Sisters of Loretto organized schools in Missouri, and in 1819 the College of St. Louis, attached to the Cathedral, was established. He was also active in establishing missionary schools among the Indians, and introduced Jesuits from Maryland into his diocese for that purpose. In June, 1826, Bishop Dubourg left New Orleans for the See of Montauban, in France, and in February, 1833, was made Archbishop of Besançon. He died Oct. 10, 1833. It is said by his biographer that he was a San Domingan by birth, a Frenchman in education, an American in principle,

and a priest by vocation. Bishop Dubourg was a man of singular energy and untiring zeal, and contributed greatly to the growth of Catholicism in the West and Southwest.

At this time (1818) there were in the whole of Upper Louisiana only four priests and seven chapels and about eight thousand Catholics. The chapels were at Ste. Genevieve, Kaskaskia, St. Louis, Florissant, Prairie du Rocher, Cahokia, and New Madrid. During Bishop Dubourg's connection with the St. Louis Church, from 1818 to 1826, Fathers Pratte, De Neckere, De Andreis, Cellini, Rosatti, Acqueroni, Ferrari, Saulnier, Niel, Dahmen, Tichitoli, Jean-Jean, and others officiated at the Cathedral. Of these, Father De Andreis was retained as vicar-general in St. Louis by Bishop Dubourg, and died in 1820, and Father De Neckere became Bishop of New Orleans in 1829, succeeding Bishop Dubourg. He died in 1833 of yellow fever.

Joseph Rosatti was born at Sora, kingdom of Naples, Jan. 30, 1789, and entered, at Rome, the novitiate of the "Congregation of the Priests of the Mission of St. Vincent de Paul," commonly known as the Lazarists. He was induced by Bishop Dubourg to come to America, whither he preceded the bishop, and arrived in Baltimore July 26, 1816. He then repaired to St. Joseph's College, at Bardstown, Ky., to perfect himself in the knowledge of English, and arrived in St. Louis Oct. 17, 1817. In the year following he took charge of St. Mary's College, which had just been established by Bishop Dubourg at what was then known as "the Barrens," in Perry County, Mo. This region had originally been settled in 1797 by Catholics from Maryland and Kentucky, who gave it the name "Barrens," applied to the prairie land of Southwestern Kentucky, but which did not imply an absence of fertility in the soil in Perry County. Here the Lazarist Fathers with their own hands built themselves a rude home, and founded St. Mary's College, which was transferred to Cape Girardeau in 1838, when the establishment in Perry County was made a preparatory seminary. In 1820, Father De Andreis died, and was succeeded as superior of the Lazarists by Father Rosatti, who had been his pupil in Rome. Father Rosatti was consecrated Bishop of Tenegra *in partibus*, March 25, 1824, and made coadjutor to Bishop Dubourg, being left in charge of Upper Louisiana, with his residence in St. Louis, when Bishop Dubourg left for New Orleans. Bishop Rosatti transferred his residence to New Orleans in 1826, when Bishop Dubourg left for France, but returned to St. Louis in 1827 as Bishop of Upper Louisiana. He established in St.

Louis the Jesuits, from Florissant, in 1829; the Sisters of St. Joseph, in 1836, from Lyons, France, the first of their order in America; the Ladies of the Sacred Heart, in 1827; the Sisters of the Visitation, and the Sisters of Charity, for whom he founded St. Louis Hospital. He also established two colleges for young men, three academies for young ladies, and the first orphan asylum in the city. He was an active member of the first four Provincial Councils of Baltimore, held in 1829, 1833, 1837, and 1840, and his pastoral letters and sermons there awakened wide admiration in Europe as well as America by their learning and eloquence. In 1840 he was called to Rome, and sent to Hayti by the Holy See on a diplomatic mission to settle questions growing out of the Haytien revolution. Before his departure for Rome, Bishop Rosatti consecrated, in 1841, Archbishop Kenrick, and settled him as coadjutor over the diocese of St. Louis. Bishop Rosatti's diplomatic success in Hayti was so signal that he was reappointed on other missions, in the discharge of which he continued until his death in Rome, Sept. 25, 1843. He was buried at Monte Citario, in a chapel dedicated to St. Vincent de Paul, whose order he had so highly adorned, in the Church of the Lazarists.

In 1843, Rt. Rev. Peter Richard Kenrick, D.D., succeeded as bishop of the diocese. Archbishop Kenrick was born in Dublin, Ireland, in 1806, and was educated at Maynooth College, near that city. He was ordained in Dublin in 1831, by Archbishop Murray, and served as curate in Dublin, and subsequently as president of the Theological Seminary, and vicar-general in Philadelphia. On the 9th of December, 1841, he was consecrated at St. Mary's Church, St. Louis, Bishop of Drasis, and coadjutor to the Bishop of St. Louis. There were four bishops present,—Bishop England, Bishop Rosatti, Bishop Kenrick, and Bishop Lefevre,—besides Archbishop Dubois, of Baltimore. Bishop Rosatti officiated as consecrator, and Bishop England preached the sermon. Bishop Kenrick succeeded Bishop Rosatti in 1843, and on the erection of the diocese of St. Louis into an archdiocese became archbishop.

Archbishop Kenrick is one of the most distinguished prelates in the American Church, a learned theologian, an able administrator, and a man of the greatest generosity and benevolence. In 1858 he received a handsome bequest, but used it, or a great part of it, in endowing the hospital of the Sisters of Charity, and making it free to all, regardless of creed or color. At the Ecumenical Council of 1868 he took strong ground against the definition of papal infallibility, and his speech, prepared for the occasion, was pub-

lished in Naples in 1870, and in New York in 1872. He subsequently, however, acquiesced in the dogma, and promulgated it in his archdiocese. He is the author of a work on "Anglican Ordinations," which is regarded as the leading authority on the subject, also of the "Month of Mary," which has been republished in London, with an introduction by the celebrated Father Faber, besides translations and devotional works. He is an accomplished linguist, knowing well the Hebrew, Greek, Latin, French, German, Italian, and Spanish languages, and an excellent scientific scholar. During his administration of the diocese, and subsequently of the archdiocese of St. Louis, he has been called upon to deal with three great crises,—the cholera epidemic of 1849, the civil war, and the Fenian agitation of 1865. His course throughout all these trying periods was courageous, but conservative and prudent, and his guidance, both of clergy and people, firm and unflinching. On the 12th of January, 1861, the following notice was published:

"To the Roman Catholics of St. Louis: Beloved brethren, in the present distressed state of the public mind, we feel it our duty to recommend you to avoid all occasions of public excitement, to obey the laws, to respect the rights of all citizens, and to keep away, as much as possible, from all assemblages where the indiscretion of a word or the impetuosity of a momentary passion might endanger public tranquillity. Obey the injunction of the Apostle St. Peter, 'Follow peace with all men, and holiness, without which no man can see God.'

*"PETER RICHARD,
Archbishop of St. Louis."*

The archbishop's course with regard to the Fenian movement was outspoken and unequivocal, as is shown by the following:

"To the Roman Catholics of St. Louis: The undersigned has read in the Republican of this morning an announcement of a funeral to take place next Sunday from St. Patrick's Church, in

this city, of a deceased member of the Fenian Brotherhood, who died at St. Paul, Minn., on the 24th instant. The occasion is evidently made for a display on the part of those in St. Louis who are members of that association, hence the deferred interment, and the pageant which is to accompany the burial. The connection of St. Patrick's Church, where the religious service is announced as to take place, and where, without any authority from the pastor of that church, it would appear, an oration, by a gentleman of this city, is to be delivered, imposes on me the obligation of forbidding, as I have done, the pastor of that church to permit any funeral service or other religious ceremony to take place on that occasion. I have furthermore directed the superintendent of the Calvary Cemetery not to admit any procession of men or women bearing insignia of Fenianism within the gate of the cemetery. I use this occasion to state publicly, what I have uniformly stated in private conversation, that the members of the Fenian Brotherhood, men or women, are not admissible to the sacraments of the church as long as they are united with that association, which I have always regarded as immoral in its object, the exciting of rebellion in Ireland, and unlawful and illegal in its means, a quasi military organization in this country while at peace with England, to be made effective in the event of war with that power.

*"PETER RICHARD,
Archbishop of St. Louis."
"St. Louis, Aug. 30, 1865."*

ARCHBISHOP KENRICK.

In 1868, during the absence of the archbishop at the Ecumenical Council, Father Patrick J. Ryan, then pastor of St. John's Church, was appointed by the Holy See to take temporary charge of the diocese, with the

title of Bishop of Tricomia, and in April, 1872, he was consecrated in St. John's Church, and has continued to act ever since as coadjutor bishop.

Right Rev. P. J. Ryan was born at Thurles, Tipperary County, Ireland, in 1831, and attended a school in Dublin. At an early age he evinced a predilection for the sacred calling, and in 1847 he entered Carlow College, near Dublin, where he received a thorough ecclesiastical training. At this institution he filled the position of prefect of the lay house, and was ordained a sub-deacon while still very young. After leaving college his attention was attracted to the

United States as being a promising field of labor, and he determined to emigrate to this country. He arrived in St. Louis in 1852, and for some three months was stationed at St. Patrick's Church with Father Wheeler, but his rare oratorical powers procured him an invitation to preach at the Cathedral, though not then in priestly orders. About this time he was appointed Professor of English Literature and Elocution in Carondelet Theological Seminary, a position which he filled with remarkable success until in 1853, shortly after attaining his majority, he was ordained priest and appointed assistant pastor at the Cathedral, being associated with Fathers Heims, A. S. Paris, E. Saulnier, James Duggan, and P. R. Donnelly. He remained at the Cathedral until 1860, when he took charge of the Church and Parochial School of the Annunciation, which were erected through his exertions. While pastor of the Church of the Annunciation, during the war, he was appointed by Archbishop Kenrick chaplain of the Gratiot Street military prison, where he labored earnestly, ministering to the prisoners and baptizing as many as six hundred of them.

Through the recommendation of Gen. Blair to the authorities at Washington, Father Ryan and Rev. Dr. Schuyler (rector of Christ Protestant Episcopal Church) received commissions as chaplains in the United States army. Father Ryan declined the appointment, but continued to perform the labors of a chaplain at the prison. Subsequently he was transferred from the Church of the Annunciation to St. John's Church, as successor to Rev. P. T. Ring, who had had charge of that church after the departure of Father Bannon for the South, to act as chaplain in the Confederate army. Subsequently Father Ryan visited Europe, and spent a year in Ireland, France, Germany, and Italy. He was in Rome during the celebration of the papal centenary, and during the following Lent was invited by the Pope to preach the English sermon, an honor which had been bestowed upon Cardinal Wiseman, Archbishop

Hughes, the celebrated Father Burke, and other prominent divines. In 1866 the University of New York conferred on him the degree of LL.D., and during the same year he preached before the second Plenary Council, at Baltimore, on "The Sanctity of the Church." Two years later (1868) he was appointed vicar-general of the archdiocese, and during the absence of Archbishop Kenrick acted as bishop, having previously been made Bishop of Tricomia *in partibus*. On the 14th of April, 1872, he was consecrated bishop in St. John's Church (his former pastoral charge), and made coadjutor of Archbishop Kenrick. Bishop Ryan is one of the most eloquent

prelates of the Catholic Church, and as an administrator is careful, painstaking, and indefatigable.

The growth of the Catholic Church under a succession of able and energetic bishops has been healthful and rapid, and from the nucleus of Father Meurin's mission has sprung a great and flourishing diocese. In the city of St. Louis there are now thirty-six parish churches, twenty-seven parish schools, five Catholic hospitals, six convents, three Catholic colleges, seven Catholic orphan asylums, three female protectorates and reformatories, with about sixty secular priests and forty-five priests belonging to orders, all actively at work; and there are thirteen female and

P. J. Ryan

seven male religious orders, and twenty-four Conferences of St. Vincent de Paul, numbering over twelve hundred active members, and distributing each year in systematic and judicious charity nearly thirty thousand dollars; the Catholic population now numbering over one hundred and fifty thousand. The archdiocese of St. Louis, comprising all that part of Missouri east of Chariton River and of the west line of Cole, Maries, Pulaski, Texas, and Howell Counties, was created in 1847, and Bishop Kenrick was made its first archbishop.

The ecclesiastical government of the archdiocese is composed of Most Rev. Peter Richard Kenrick, archbishop; Right Rev. Patrick J. Ryan, coadjutor

bishop; Very Rev. H. Muhlsiepen, vicar-general; Council of the Archbishop, Right Rev. P. J. Ryan, Very Rev. H. Muhlsiepen, Rev. C. Ziegler (secretary), Rev. H. Van der Sanden (chancellor).

The Jesuits in Missouri.—One of the first steps taken by Bishop Dubourg after assuming charge of the diocese of Upper and Lower Louisiana was to secure missionaries for the religious and secular instruction of the Indian tribes. The whole of the country west of the Mississippi was in his jurisdiction, and consequently the Indians were especially within the purview of his efforts. Soon after reaching St. Louis he applied to Father Anthony Kohlmann, at that time provincial of the Jesuits in Maryland, to send out Fathers to establish a college and act as missionaries to the Indians. Owing to the fact that there were not more members of the society than were needed for the work in that State, Father Kohlmann was not then able to comply with the request. Early in 1823, Bishop Dubourg had an interview at Washington with President Monroe and the Secretary of War, John C. Calhoun, on the subject of educating and civilizing the Indians, and at Mr. Calhoun's suggestion he requested Father Charles Neale, provincial of the Jesuits of Maryland and the District of Columbia, to supply him with missionaries. Two years before, in 1821, Rev. Charles Nerinckx, founder of the Loretto Society of Nuns in Kentucky, had returned from a trip to Belgium, accompanied by a company of novices who intended to devote themselves to the work of the Society of Jesus. Among them were F. J. Van Assche, P. J. de Smet, J. A. Elet, F. L. Verreydt, P. J. Verhaegen, J. B. Smedts, and F. De Maillet, all of whom with the exception of De Maillet were Belgians. These young men, who, with other novices, had received a course of instruction at the Jesuit Seminary at White Marsh, Prince George's Co., Md., decided to accept the invitation of Bishop Dubourg.

On the 11th of April, 1823, they set out under the charge of Rev. Charles Van Quickenborne, Superior, and Rev. Peter J. Timmermans, his assistant, accompanied by three lay brothers,—Peter de Meyer, Henry Reisselman, and Charles Strahan. They made the journey on foot to Wheeling, with wagons to transport their effects, and to rest such as should become ill or disabled. They carried their own bedding with them, lodging at night where they best could, and generally cooked their own meals. Father Van Quickenborne was the only exception; he rode a handsome roan horse that had been presented to him by Father McElroy, of Frederick, Md. At Wheeling they purchased two flat-boats and floated down the Ohio, the

boats lashed together, and drifting day and night. At Shawneetown, a small village below the mouth of the Wabash River, they sold their flat-boats, sent their heavy baggage by steamboat to St. Louis, and started, accompanied by a light spring-wagon, on foot across the prairies. They reached St. Louis Saturday, May 31, 1823, and on the day after their arrival, being Sunday within the octave of Corpus Christi, Father Van Quickenborne carried the Blessed Sacrament in procession through the streets, with music and firing of cannon. In June following the Jesuits took possession of the farm near Florissant which had been tendered them by Bishop Dubourg, it having been ceded to them by Mr. O'Neil, magistrate of Florissant, although his lease was yet unexpired. In the mean time they had been hospitably entertained by the Sisters of the Sacred Heart at Florissant, who lodged and fed them in their school-house.

Florissant, or St. Ferdinand township, seventeen miles northwest of St. Louis, had been settled shortly after the founding of St. Louis, and the adjacent country was beautiful and fertile. In extending the invitation to the Jesuits of Maryland, Bishop Dubourg had proposed not only to give them his farm at Florissant, but also his own church and residence in St. Louis. The latter offer, however, had been declined. The houses on the farm were merely log cabins, small, and of the rudest construction, and the first efforts of the missionaries were directed to the enlargement of their quarters. For this purpose they hewed the timber, going for it to an island in the Missouri River, which, on the night after they had hauled the last load needed, was totally washed away, not a vestige of it being left.¹

Shortly after the mission had been established, Rev. Charles Delacroix, who was then stationed at Florissant, made over the church there to Father Van Quickenborne, and departed for Louisiana. About the same time Father Van Quickenborne was made spiritual director of the Community of the Sacred Heart. An incident of the early days of the mission was a visit from the venerable Father Nerinckx, who had brought the young missionaries over from Europe, and who spent some days with his Belgian friends at Florissant. Father Nerinckx

¹ The island stood a short distance above the Charbonnière, a bluff on the Missouri River some three hundred feet high, and so called from a layer of coal that underlies it, but which, being nearly on a level with the surface of the water and of inferior quality, has been little worked. Above the bluff there is visible, in low water, a bed of reddish stone, which extends far out into the river, and may have been the seat of the island. Possibly the concussions and disturbances caused by felling the trees precipitated the washing away of the land.

died at Ste. Genevieve on the 12th of August, 1824. Francis De Maillet and Charles Strahan, of the original band, had separated from the Jesuit society shortly after their arrival in Missouri, and had engaged in other occupations. By the death of Father Timmermans the community was still further reduced, and now numbered nine members. In 1825, Father De Theux and lay Brother O'Connor arrived from Maryland and joined the mission, the former as assistant to Father Van Quickenborne. In the same year the missionaries opened a school for Indian boys, and induced the Sisters of the Sacred Heart to establish a similar school for girls. Despite their persevering labors, however, the attendance did not increase beyond fourteen children at either school. In 1830 the school for boys was finally closed. In the mean time, J. B. Smedts and P. J. Verhaegen were, about the beginning of 1825, raised to the priesthood, and in 1827, P. J. de Smet, J. F. Van Assche, J. A. Elet, and F. L. Verreydt were ordained, Bishop Rosatti officiating on both occasions. Fathers Verreydt and Smedts were transferred to St. Charles, and Father Van Quickenborne made an excursion to the Osage Indians. He subsequently (in 1829 and 1830) paid other visits to the same tribe, but it was not until 1847 that the Jesuit mission among the Osages was established. Having satisfied themselves that they could labor much more profitably and accomplish more tangible results among the white population than with the savages, the Jesuit Fathers, upon the invitation of Bishop Rosatti, in 1828 removed to St. Louis and established the St. Louis University. On the 24th of March, 1836, Father Verhaegen, who had been chosen first president of the university, was made Superior of the Jesuit mission in Missouri, as it was then called,—a branch of the province of Maryland,—and resigned to Father Elet the presidency of the university. The mission-house at Florissant was now abandoned as the residence of the Superior, who thenceforth lived in St. Louis.

The Florissant institution is now known as St. Stanislaus Novitiate. On the 3d of December, 1839, the mission was raised to the rank of a vice-province, and Father Verhaegen to that of vice-provincial; he became provincial of Maryland, and was succeeded in St. Louis by Rev. James Van de Velde, Sept. 17, 1843. Father Van de Velde was made Bishop of Chicago, and subsequently transferred to Natchez, where he died of yellow fever on the 13th of November, 1855. His remains were removed to St. Stanislaus Novitiate, near Florissant, and reinterred there on the 20th of November, 1874. Rev. John

A. Elet became vice-provincial June 3, 1848; Rev. William S. Murphy, Aug. 15, 1851; Rev. J. B. Druyts, July 6, 1856 (he died of softening of the brain June 18, 1861); Rev. W. S. Murphy, temporarily, February, 1861; Rev. Ferdinand Coosemans, July 16, 1862. On Dec. 3, 1863, the vice-province was elevated to the rank of a province, and Father Coosemans became provincial. Rev. Thomas O'Neil succeeded July 31, 1871; Rev. Edward A. Higgins, Jan. 1, 1879; Rev. Leopold Bushart, May 4, 1882.

The original intention of Indian missions was never wholly abandoned, but was pursued actively by Father Van Quickenborne and others after him through many years; but when in 1837 Father Van Quickenborne returned from the Kickapoo mission, near Fort Leavenworth, which he had started the year before, he succumbed to the hardships he had endured, and died Aug. 17, 1837. His remains were interred in the garden of the novitiate, near Florissant, where they are now surrounded by those of all but one of his early companions in Missouri.¹ From the mother-

¹ Charles Van Quickenborne, one of the prominent missionaries of Missouri, was born in the diocese of Ghent, Belgium, Jan. 21, 1786. He joined the Jesuit Society April 14, 1815, came to Maryland in 1817, and to St. Louis in 1823, and in the same year was made spiritual director of the Sacred Heart community at Florissant and pastor of the church there. Father Van Quickenborne died at Portage des Sioux, Aug. 17, 1837. Peter J. Timmermans was born in Belgium, July 20, 1783; joined the Jesuits Aug. 18, 1817; was made pastor of the churches at St. Charles and Portage des Sioux in June, 1823, and died June 1, 1824. Judocus F. Van Assche was born May 29, 1800, at St. Amand, near Antwerp. He came to Maryland and entered the Jesuit Novitiate at White Marsh, Oct. 6, 1821, an elder brother having preceded him thither in 1817. He remained at St. Stanislaus Novitiate, near Florissant, when the other priests removed to St. Louis to establish their college, and after his ordination became pastor of the church there, continuing in its charge, excepting short absences, until he died, June 26, 1877. John A. Elet was born Feb. 19, 1802; was president of St. Louis University, and later of St. Xavier College, Cincinnati, and vice-provincial of Missouri, which position he resigned on account of ill health, and died Oct. 2, 1851. Peter J. Verhaegen was born June 21, 1800, and he was the most thoroughly educated of the original band of novices. He was pastor at St. Charles' in 1826, and successively the first president of St. Louis University, Superior, then vice-provincial of Missouri, provincial of Maryland, and president of St. Joseph's College in Kentucky. He died at St. Charles, Mo., July 21, 1868. Felix Verreydt was born Feb. 19, 1798; went to Portage des Sioux in 1831; to the Kickapoo mission near Fort Leavenworth in 1837; began a mission among the Pottawatomie Indians at Council Bluffs in 1838; went to Sugar Creek Indian mission in Kansas in 1841; moved with the Indians to St. Mary's mission in Kansas in 1848; was transferred to St. Louis in 1859, and resided at College Hill, North St. Louis, until 1869, when he went to St. Xavier College, Cincinnati, where he still lives (October, 1882), being now nearly eighty-five years old and the sole survivor of the original band. John B. Smedts was born April 11, 1801, and was stationed at St. Charles' from 1827 until Oct. 3,

house near Florissant have sprung eight colleges, one boarding-school in the country, twelve churches in the West and Northwest, with their attached parochial schools, eight churches, with residences, besides mis-

1843, when he was made master of novices at St. Stanislaus Novitiate, near Florissant, where he remained until July 23, 1849, after which he resided successively at St. Charles', Florissant, and St. Louis University, where he died Feb. 19, 1855. Peter de Meyer was born Nov. 30, 1793; came to America with Father Nerinckx, and entered White Marsh Novitiate Aug. 5, 1817. He continued to reside as a lay brother at St. Stanislaus until he died there, Sept. 1, 1878. Henry Reisselman, also a lay brother, was born March 12, 1784, and came to the United States in 1807, and joined the Trappist monks in Casey County, Ky. He removed with them to Missouri in 1809; resided one year at Florissant, then moved to Monk's Mound, on Cahokia Creek, and when this station was abandoned joined the Jesuits at Georgetown, D. C., Nov. 5, 1813, and removed to Missouri in 1823. Subsequently he spent some time in Maryland, but returned to Missouri, and died at St. Stanislaus Novitiate, June 21, 1857.

Of all the little band of missionaries the most illustrious perhaps, and certainly the best known, was Peter J. de Smet, eminent alike as a missionary of undaunted energy and zeal, and as a scholar of varied learning and many accomplishments. He was born at Dendermonde, in Belgium, on the 31st of January, 1801, and was educated with the view of devoting himself to the priesthood. In July, 1821, in company with a number of other novices, under the charge of Father De Nerinckx, he left his native land for the United States. By agreement they all met at Amsterdam, and having eluded the vigilance of the authorities, who had given strict orders for their arrest, they left Amsterdam in a small boat, and succeeded in reaching Texel, where they procured lodging in the house of a Catholic who had been notified of their coming. At last, on the 15th of August, they got on board the brig "Columbia," having gained the open sea in a small pilot-boat, which had passed out of the harbor without being observed by the police. After a voyage of forty days, De Smet and his companions arrived at Philadelphia, whence they proceeded to Baltimore and then to White Marsh, Maryland, where they began their novitiate. As previously stated, he formed one of the party of missionaries, led by Van Quickenborne, who in 1823 established the colony of Florissant, and immediately after their arrival at St. Louis, De Smet entered actively upon a career of missionary labors which, with brief intervals, were destined to extend over nearly half a century. After toiling at Florissant, and subsequently assisting in the founding of the St. Louis University, he was compelled in 1832 to return to Belgium for the benefit of his health. While in Europe he procured a number of valuable instruments for the department of physics in the St. Louis University, together with many volumes for the library, and a collection of minerals, which he presented to the college. His health having been restored he returned in 1837 to St. Louis, which he made his home for the remainder of his life. In 1838, Father De Smet began his wonderful career as a missionary among the Northwestern Indians. He first established a mission among the Pottawatomies, who then dwelt in the neighborhood of Council Bluffs, Iowa, opposite the city of Omaha. Two years later (1840) he made his first journey to the Rocky Mountains and through Oregon, preparing the way for the missionaries who were to take up his work in later years. Among both the Pottawatomies and the Sioux De Smet was received with kindness, but his journeys through the wilderness were marvels

of ardent zeal and patient devotion. His progress among the Pottawatomies was particularly gratifying. A little chapel twenty-four feet square, with a steeple, was soon erected, and near by log huts were built for the residences of the missionaries. A school was opened, and the building, which could only accommodate thirty pupils, was soon thronged with Indians. In the first three months one hundred and eighteen were baptized. During his expedition to the Rocky Mountains he accompanied Gen. Harney on an expedition to the Flathead and Shoshone Indians on the Columbia River. The Indians had been committing depredations, and Gen. Harney's expedition was sent out with the expectation that war would ensue. Through the mediation of Father De Smet, however, the Indians were placated and peace was assured.

His journey to the Rocky Mountains in 1840 was made in connection with the annual expedition of the American Fur Company, which started from Westernport, Mo., and from this time until within a year of his death he continued to labor among the savage tribes, including among others the Shoshones, Blackfeet, Pawnees, Mandans, Pottawatomies, and Sampeetches. In Oregon, among the Flatheads, his mission was conspicuously successful. In the camp of Peter Valley sixteen hundred Flatheads and Ponderas assembled to receive him, and at the close of the day two thousand Indians congregated before the missionary's tent to recite an evening prayer and chant a hymn. On the second day of his sojourn among them, De Smet, with the assistance of an interpreter, translated the Lord's Prayer, the Creed, and the Commandments, and in two weeks the Flatheads had all learned to recite the prayer. Within two months six hundred of the tribe were baptized. On his return to St. Louis the dauntless missionary passed through the country of the Blackfeet, Gros Ventres, and Sioux, all of whom were hostile to the Flatheads. Upon one occasion he and his party were surrounded by a fierce band of Blackfeet, who, however, on seeing his crucifix and gown, expressed their joy at beholding a missionary, and carried him in state to their village. He was treated with great kindness, and permitted to resume his journey unmolested. In the spring of 1841, Father De Smet returned to Oregon, accompanied by two other priests and three lay brothers, and established the mission of St. Mary's among the Flatheads. He then labored among the Cœur d'Alenes, Kalispels, and Kootenays, baptizing one hundred and ninety persons, twenty-six of whom were adults. His work at the Flathead mission was then resumed with encouraging results, and when he started on the return to St. Louis sixteen hundred and fifty-four savages had been baptized. On reaching St. Louis, De Smet was instructed by his Superior to proceed to Europe in order to obtain assistance in the work of civilizing and Christianizing the Indian tribes. His success in Europe was unequivocal, and on the 12th of December, 1843, he sailed from Antwerp, accompanied by several priests and six Sisters of the Congregation of Our Lady, who had volunteered to assist him in his missionary work, and arrived at Fort Vancouver in 1844. The Oregon mission expanded rapidly, and De Smet transferred his labors to the water-shed of the Saskatchewan and Columbia, and obtained many converts among the far Northwestern tribes. Father De Smet made five journeys to the Rocky Mountains in the course of his eventful career, and crossed the ocean seven times to obtain in Europe assistance for his missionary work. On his last trip to Belgium he was cre-

band of 1823, numbering twelve persons, the Jesuits in the Missouri province have increased to three hundred and thirty-five, of whom seventy-six are members of the community near Florissant.¹

St. Louis Cathedral.—The first church erected by the Catholics of St. Louis was evidently built soon after the arrival of Laclede and his companions, and probably at an early period of Father Meurin's pastorate, which extended from 1764 (irregularly) to February, 1769. Father Gibault, the successor of Father Meurin, records that on the 24th of June, 1770, the feast of St. John the Baptist, he blessed "the church, built of wood," and in 1774 Father Valentin made an entry in the register, of which the following is a translation :

"In the year 1774, the 24th of December, I, the undersigned, have baptized with the ordinary ceremonies of the church a new bell, which was named Pierre Joseph Felicité, and the godfather of which was the honorable Pierre Joseph de Piernas, captain in the Louisiana battalion and Lieutenant-Governor of the Illinois, and the godmother, Lady Felicité de Piernas de Portneuf, who have signed with me, the day and year as above.

"PEDRO PIERNAS, FELICITÉ PORTNEUF PIERNAS, BAROY, BENITO BASQUEZ.

"FR. VALENTIN, Priest."

Prior to this time the congregation had been called to their devotions by means of a large iron mortar, which was beaten with a heavy iron pestle, producing a sound loud enough to be heard by most of the parishioners.

In the contract for the construction of the presby-

ated a knight of the Order of Leopold as a recognition of his great merits, the decoration of the order being bestowed by King Leopold the Second. For some years, and up to the time of his death, he held the position of treasurer of the province, which included all the Jesuit houses from the Alleghenies to the Rocky Mountains.

Father De Smet was a graceful and vigorous writer, and his letters giving an account of his adventures and labors among the savages are marked by great simplicity of style and force of expression. He published several works on the subject of Indian missions, the principal of which are "Western Missions and Missionaries," "Oregon Missions," and "Letters and Sketches." He was familiar with science and a proficient in botany, having classified the plants of St. Louis many years ago. He was also an excellent draughtsman and topographical engineer, and executed a number of maps and surveys of the Oregon and Rocky Mountain regions. While returning home from Europe in 1872, Father De Smet fell on shipboard and was injured internally, three of his ribs also being broken. He succeeded in reaching St. Louis, and lingered for more than a year, dying at the St. Louis University on the 23d of May, 1873.

¹ The author is indebted to the "Historical Sketch of the St. Louis University," by Rev. Walter H. Hill, S.J., for valuable information concerning the labors of the Jesuit missionaries in Missouri.

tery, or priest's house, which it was determined at a meeting of the congregation held Sept. 1, 1776, to erect, it was provided that the materials of the old house should be used in building the new one, showing that there was a parochial residence and, presumably, a church. Tradition asserts that the first church was a small wooden chapel, with a presbytery attached.

On the 26th of December, 1774, the inhabitants of St. Louis assembled in the government chamber, in the presence of Don Pedro Piernas, the Lieutenant-Governor, Father Valentin, pastor, and Mr. Sarpy, church warden, and determined upon the erection of a new church. It was decided that the dimensions of the building were to be sixty by thirty feet, and that it was to be constructed of white-ash posts eighteen feet long, and hewed on both sides above ground, to the width of six inches. The inhabitants were to furnish all the wood and materials "according to an assessment to be made on each white and black person of the age of fourteen years and upwards, excepting widows and persons of sixty years of age, who shall be exempt as to their persons only." Pierre Baron, who was present, accepted the position of "superintendent of the building and of the assessment," and promised "to do his duty." Associated with him in the direction of the work were René Kiercereaux, Antoine Rivière, dit Bacanet, Joseph Taillon and Jacques Noise, "who must be present at the assessment and at the furnishing of the materials."

The proceedings of the meeting were signed by René Kiercereaux, Cotte, Jean Tardif, Amable Guion, Laclede L. Liguist, Lardoise, Becquet, Du Breuil, Sarpy, Baron, Benito Basquez, Labuscière, Sans Soucy,² Bagnete,² Bizet,² Bacaliot,² Gamscha, Jacques Noise,² Duffand,² Joseph² Taillon, Francis² Bissonet, Ride,² Louis Chancelier, Jacob² Marechal, Laurant,² Hunan,² Picart,² Fr. Valentine (curé), Pedro Piernas.

Nothing further appears to have been done during that winter beyond maturing the plans for the construction of the building, but on the 19th of April, 1775, the contract for the work was awarded, as the following translation of the original document attests :

"Agreement of the inhabitants of St. Louis to build a church, and the contract and specifications therefor. April 19, 1775, the third festival of Easter.

"Before me, Don Pedro Piernas, Lieutenant-Governor of the establishments of the Illinois and its dependencies, belonging to His Catholic Majesty, in presence of the Reverend Father Valentin, Capuchin missionary, curate of the parish of St. Louis, and of Messrs. Sarpy and Benito Basquez, wardens of said parish of St. Louis, at the conclusion of the parochial mass of said place, all the artisans and inhabitants composing the said

² "His mark."

parish assembled to award to the lowest bidder the contract for the workmanship on the projected church at this post. Said inhabitants and artisans being all assembled, and having maturely deliberated among themselves, agreed that said church should be constructed as follows, to wit:

"The church to be sixty feet long, of posts planted three feet in the ground, and to be thirty feet wide, with a gallery or porch six feet wide all around, with a pent-house ten feet wide the length of the gable end, two church doors, and two windows to the pent-house, with shutters, and sash of four lights high and three wide.

"The church to have fourteen windows of twenty-eight lights, arched three inches at the top, seven lights high by four wide, with their shutters, the contractor to put in all the iron-work. At the other gable, in the inside of the church, a lobby or gallery ten feet wide, the length of the gable, with stairs and a door to the lobby. The front entrance door to the church to be twelve feet high, arched, and six wide, the floors above and below to be well jointed, the sanctuary to be raised six inches above the floor, the two doors of the sanctuary to be dovetailed, and that of the lobby plain, the large door paneled. The belfry to be a St. Andrew's cross, shingled, the church to be shingled in six-inch courses. Windows four feet above the floor, the two front ones eight feet high. The rafters on the girders at ten feet apart, with ridge-pieces above and below, a bracket at each of the four corners and cross-pieces to support the gables. The joists from five to six feet apart.

"All the materials to be delivered to the contractor on the ground of the above church, who is to furnish all the labor only. The inhabitants are to furnish, also, the iron-work, nails, and mud-walling, and to assist the contractor in raising the heavy wood-work and timbers, the foregoing work to be subject to an examination by skilled persons.

"The aforesaid church is to be completely finished for service by the month of _____ of this present year, under the penalty of forfeiting all pay for the work he may have done if not completed in the time specified, nor will it be received from him until completely finished.

"The inhabitants to supply him the materials as fast as needed, so as not to delay him in the work, under the penalty of paying him for the time he may have lost through their delay, the contractor to engage himself all the workmen he may find necessary, who are to be paid first out of the contract price.

"And after the above specified conditions were read and proclaimed in a loud and intelligible voice, and clearly explained to the assembled people, the above work was awarded to Pierre Lupien, *alias* Baron, carpenter and joiner, at the price of twelve hundred livres, in deer-skins at the current value.

"This bid having been cried out at several different times, and no one proposing to underbid him, after waiting until sundown, the same Lupien demanded his right, and that the work he awarded him for the said sum of twelve hundred livres, according to the above specified conditions, which was granted him by Don Pedro Piernas, in the presence of as before stated witnesses, and with the approval of all the inhabitants, said contractor binding himself to execute all the stipulations of the contract, and, as security for the same, mortgaging all his property now and in future.

"Done and executed at the room of the presbytery the 19th day of April, third feast of Easter, in the year seventeen hundred and seventy-five, which we have all signed, those not knowing how to write having made their crosses after being read to them, before me, the Lieutenant-Governor.

"PEDRO PIERNAS."

The signers of the agreement to build the church included nearly all the householders in St. Louis at that day; they numbered seventy-nine, all told, and it will be observed that only thirty-five signed their names, all the rest (those inclosed in parenthesis) affixing their marks,—fifty-five per cent. of these best citizens being illiterate. The names are

Antoine Béreda, Alexis Cotté, John B. Becquet, (Jacques Labbe), (Chausel), Amable Guion, Pothier, (Kierq Desnoyer), (Amable Brunet), (Jean B. Deschamps), (François Liberge), René Kiercereaux, (Joseph Fayon), (Toussaint Hunot), (François Bissonnet), (Langevin, *dit* Baguette), (Francis Delén), (Joseph Dechenes), (Pepin Lachance), Louis Chancelier, Larche, (John B. Savoie), (John B. Gamache), (August Karcelet), John Baptiste Tardif, Louis Dubreuil, Rouqueer, Antoine Bernard, (Daniel), (Antoine Rivière), (Jacques Marechal), (John B. Dufaux), (Joseph Moreau), (Nicholas Guion), Joseph Segond, Cottin, Benito Basquez, Joseph Labrosse, Petil, Michel Rollet de Laderout, J. J. A. Motard, (Simon Coussotte), (Nicholas Beaugenou), (Pierre Caillon), Gilles Chemin, (Pierre Roy), Belisle, (François Henrion), (Louis Ride), S. S. Martigny, (John B. Provercher), François Denoyers, (Joseph St. François), (Charles Routier), (Louis Bissonnet), (Alexis Picart), (Antoine Roussel), John Baptiste Ortes, Joseph Chancelier, G. R. Gemme, (Ignace Laroche), (Francis Hebert), (Falardeau), Michel Lamq, Louis Vaclard, A. A. Condé, (Pierre Lapointe), (Nicholas Royer), (Antoine Ladouceur), (Joseph Chartrand), (Paul Getard), (Joseph Calvé), J. B. Sarpy, Alexis Marie, Laclede Liguest, Jacques Chauvin, Antoine Reehle, Laville, Pedro Piernas.

Pierre Baron, the contractor, died on the 10th of October following, and as there was no one to represent him in the continuation of the work, the inhabitants assembled at the Government Hall, by order of the Lieutenant-Governor, Francisco Cruzat, on the 28th of January, 1776, to award the contract. At this meeting it was unanimously agreed that the work already begun should proceed, and that it should be let out to the lowest bidder, who was to be bound by the original specifications. Juan or Jean Cambas proved to be the lowest bidder, at the sum of fourteen hundred and eighty livres, in shaved deer-skins, with the condition that the building should be completed by the end of the month of May of the current year. The contract was signed by — Tardif, J. B. Ortes, A. Bernard, Sarpy, Condé, Dubreuil, Benito Peril, Amable Guion, René Kiercereaux, Ene. Barre Lajoy, William Duralde, Cambas, J. Motard, Francisco Cruzat.

Exactly at what time the work was finished does not appear, but the building was evidently occupied not long after the date set for its completion. It stood very near the site of the present Cathedral, on what was then "the north half of the church block (No. 59)," and attached to it was a cemetery. Speaking of the old church and parsonage, Judge Wilson

Primm, in an address before the Missouri Historical Society, said,—

“My recollection of these buildings is very distinct. The gallery around the church, supported by cedar posts, notched and whittled by the village urchins, the swallow’s nest under the eaves, the little belfry and its bell, always rung by old Alexis Lalande (the *bedeau*), bell-ringer, at morning, noon, and sunset, all these are at this moment as present to me as they were nearly half a century ago.

“When that old church was demolished in 1820, I think its bell was sent to Carondelet, for the use of the church there, and is still to be found there in the belfry of the school-house of the Christian Brothers. In St. Mary’s Church at Carondelet can still be found the remains of the pews and benches which were used in the old church at St. Louis.”

In the summer of 1776 a project for the erection of a parochial residence was set on foot, and on the 1st of September of that year a meeting of the inhabitants was held for the purpose of deciding on the character of the structure, its cost, etc. The official record of this meeting, translated from the Spanish archives, is as follows :

“Agreement of the inhabitants of St. Louis to build a permanent residence for the curate of the parish, Sept. 1, 1776.

“On this day, the first of the month of September, one thousand seven hundred and seventy-six, at the close of the high mass at this parish of St. Louis, the inhabitants thereof assembled in the old parsonage house, in the presence of the Lieutenant-Governor Don Frans. Cruzat, to consider the expediency of building a new residence for the occupation of the reverend father officiating in this parish.

“Being assembled, they agreed unanimously that said new residence should be built of stone, of the dimensions of forty-five feet in length by twenty-seven feet in width, to be commenced in the coming spring and carried on without interruption to its completion, the Reverend Father Bernard, the present incumbent of the parish, offering to contribute the sum of four hundred and thirty-seven livres in peltries to aid in its construction, which sum had been furnished him at New Orleans in the payment of his passage from that place to St. Louis. Jean Cambas and John Ortes, carpenters, were appointed as trustees to receive the materials and make such equitable assessments upon each person according to his ability to pay, and to give to each individual a receipt for his assessment, which he must produce to avoid being called upon a second time; said house to be built with mortar made of clay, and all the timbers in the old house shall be used in the construction of the new one so far as they are suitable for the purpose.

“The assessment to be made, as in the case of the church, upon all persons exceeding the age of fourteen, without any exception.

“It is so understood and ordered. St. Louis, this 1st day of September, 1776. L. Chevalier, Labuscière, S. Labbadie, Tayon, A. Condé, Peret, Motard, Barada, Benito, Terraute, J. Conaud, Becquet, Hebert, Poure, A. Berard, Joseph Labrosse, Dubreuil, Picote de Belestre, Pothier, Chauvin, Law Gagner,¹ Sans Souey,¹ Rondeau,¹ Baccanuet,¹ Jacques Labbe,¹ François Bissonnet,¹ Am. Guion, Laelete Liguest, Father Bernard, curate.

“FRANCISCO CRUZAT.

¹ “His mark.”

“*Specifications in the Contract.*—The house, thirty-eight feet long by twenty-seven wide and thirteen high, to be built of stone with earth mortar, one and a half feet in the ground; a pent-house or shed at end of ten feet wide and of the length of the gable end, twenty-seven feet, to be six and one-half feet high; the floor to be four feet above ground, and the upper floor eight and one-half feet above the lower, with a partition wall, to make a parlor and a chamber; the walls of the house to be two feet thick below the floor, and eighteen inches above, the partition wall one foot thick; a front and rear door to the parlor and two windows, two doors between the parlor and chamber, and three windows in the chamber, one front, rear, and end; two cellar doors and a small window in the loft; a double chimney between the parlor and shed, and a flue in the partition wall; a door and two windows to the pent-house; square gables with a small window. After the floors are laid the house to be rough-cast and whitewashed, and the hearth laid by the contractor for the stone-work, who will furnish his own help and deliver it ready to receive the roof by the 8th day of September next, under the penalty of forfeiting two hundred livres of his compensation; and if before the expiration of the said term he should abandon the contract, he will forfeit all his labor done to that period, except in case of sickness, to be certified by the surgeon. The contractor is also to furnish himself with everything necessary, his own tools, scaffolding, ropes, barrels, mortar, picks and shovels, in a word, all he may require to complete his job. Payment will be made in the course of the next spring (1778), in peltries at the current rate, and will also receive from the Reverend Father Bernard one hundred livres in peltries at the completion of his work, part of the amount he is to contribute.”

According to the custom of the day, the letting of the work was proclaimed at the church door, after high mass at noon, for three successive Sundays, June 15, 22, and 29, 1777, and on this last day was awarded to the following parties as the lowest bidders for the same :

“The stone-work as described in the specifications, to Benito Basquez for.....	1400 livres.
“The carpenters’ work, including the timber and lumber, joists, rafters, shingled roof with iron nails, frames for eight doors, eight windows, etc., to François Delan for.....	550 “
“The joiners’ work, laying floors, two board partitions, doors, windows with sashes and shutters, putting on fastenings, etc., to Joseph Verdan for	299 “
Total.....	2249 “

“In presence of FRANCISCO CRUZAT.
 “ANTOINE CUTIAN,
 “ROQUES JACINTO, *Corporals*.
 “COTLIN, *Constable.*”

It will be noticed that the name of Chouteau does not appear in the list of signers to the agreements for erecting the church, nor in that for building the parsonage. He was probably away among the Indians.

On the arrival of Bishop Dubourg at St. Louis in 1818, he found the wooden church in a dilapidated condition, or, to quote the language of Father De Andreis, one of the priests who accompanied him, “falling into ruins.” He determined at once to begin the construction of a new church of brick, the first Cathedral of St. Louis, and on the 29th of

March, 1818, less than three months after the bishop's arrival, the first stone was laid by Bishop Dubourg. This stone is described as having been "hollowed in the form of a chest to contain and preserve to the latest generations the names of benefactors, coins of various descriptions, and some memoirs of the present time." Notice had previously been given (March 6th) to stone-masons, bricklayers, and carpenters that the work was about to be begun, and the construction of the edifice proceeded until its completion in the spring of 1820, announcement being made on the 15th of March of that year that the Cathedral would be opened for divine service in April, probably at Easter. On the 27th of August, 1823, an advertisement appeared in the *Missouri Republican*, in which it was stated that John K. Walker had been appointed trustee to conduct the sale of so much of that part of the ground on which the Catholic Church stood, situated south of the church and south of the graveyard appurtenant thereto, as would be needed to raise the sum of four thousand five hundred dollars, for the purpose of repaying to Auguste Chouteau and others, commissioners of the Catholic Church, money which they had advanced on account of the church.

The new church was located south of the present Cathedral, and had considerable pretensions to architectural effect. It was first used for service on Christmas-day, 1819, though not then finished. During his European tour in 1815, Bishop Dubourg had been presented by generous Catholics with many rich and rare gifts, among which are mentioned a large painting of St. Louis, the tutelary saint of the Cathedral, a gift from Louis XVIII. of France; ancient and precious gold embroideries, and a large and handsome organ, sent to the church by the Baroness Le Caudele de Ghysegheru, a Flemish lady.

The present Cathedral, situated on the north side of Walnut Street, between Second and Third Streets, Rev. Miles W. Toby, pastor, was erected at the suggestion and mainly through the efforts of Bishop Rosatti, who, on Sunday, March 28, 1830, requested from the pulpit that the congregation should hold a meeting at an early day and adopt measures for building a new church. Accordingly, on the 4th of April, 1830, a meeting was held, at which the bishop presided, and Marie Philip Leduc acted as secretary. Among those present were Judge Wilson Primm, Capt. Elihu H. Shepard, and Hon. John F. Darby. A subscription was immediately raised, Bishop Rosatti contributing eight thousand dollars. The dead having been removed from the old cemetery in order to provide a site for the building, the corner-stone was

laid on the 1st of August, 1831, and on the 26th of October, 1834,¹ the edifice was consecrated "to the honor of the most Holy Trinity, under the invocation of Saint Louis of France," by the Right Rev. Joseph Rosatti, Bishop of St. Louis, assisted by the Bishops of Bardstown and Cincinnati.²

Though erected almost in the infancy of the diocese of St. Louis, the Cathedral is a noble and imposing structure, conspicuous for the symmetry and beauty of its architecture. The length of the whole building is one hundred and thirty-six feet and its breadth eighty-four. The front is of polished freestone, and rises to a height of fifty feet, the façade being broken by a portico forty feet wide, supported by four Doric columns, with corresponding entablature, frieze, cornice, and pediment. On the frieze is the following inscription in bas-relief: "In honorem S. Ludovici. Deo Uni et Trino. Dicatum, A.D. MDCCCXXXIV." On each side of the porch is inscribed, both in English and French, "My house shall be called the house of prayer." There are three entrances from the porch, and between the three doors and three corresponding windows are three slabs of Italian marble, with the inscription, *Ecce tabernaculum Dei cum hominibus, et habitabit cum eis*, a text taken from the twenty-first chapter of the Apocalypse, and which is also inscribed in French and English. Originally the porch was inclosed by an iron railing, and was reached by flights of steps rising from the east and west, but subsequently this arrangement was changed, and a flight of steps was constructed rising from the pavement the whole length of the porch. The cornice, with its frieze and entablature, together with the battlements, extends along the front to the corners and about twenty feet along the sides, and the battlements are surmounted by six candelabra about nine feet in height.

The effect of this façade is simple but imposing. On a stone tower, forty feet in height above the pediment and twenty feet square, rests the spire, an octagon in shape, surmounted by a gilt ball five feet in diameter, from which rises a cross of brass ten feet high. In the steeple there is a chime of six bells, the three larger ones weighing respectively two thou-

¹ The last stone on the belfry tower is said to have been placed in position by a colored man named William Johnson. None of the workmen cared to run the risk of performing this dangerous feat, and Johnson volunteered to undertake it. He accordingly ascended the tower and fixed the stone in its place, receiving on his descent the congratulations of the bishop.

² The musical portion of the services was under the direction of Professor Marallano, then a famous teacher in St. Louis, who set an ode, composed by one of the city priests, and a hymn, "written by a local bard," to music for the occasion.

sand six hundred, nineteen hundred, and fifteen hundred pounds, having been made in Normandy, and a large clock, constructed in Cincinnati, which indicates the hours on the four sides of the tower and strikes them on the bells. The interior is divided into a nave and two aisles by two rows of five columns each on either side of the nave. These columns are in the Doric style, four feet in diameter and twenty-six feet high, and built of brick covered with stucco. The ceiling is elliptic, and is divided into eighteen richly-decorated panels. The width of the centre aisle is forty feet and that of each side aisle twenty feet. Above the front doors are two galleries. Beneath one of them are the baptismal fountains, and here also hangs a beautiful painting of the Saviour's baptism. The sanctuary is forty by thirty feet in size, and is elevated nine steps from the floor. Its sides are adorned with pilasters painted in imitation of marble, and with panels decorated with festoons of ears of wheat and vines, symbolic of the Holy Eucharist. The spaces between the pilasters are occupied by arches, two of which have galleries, one for the use of the Sisters of Charity and the other for the use of the choir. In the centre of the sanctuary is the altar, which is richly and beautifully decorated. The altar-piece is a large painting, representing the Crucifixion, on either side of which are two fluted Corinthian columns of blue marble, with gilt capitals supporting a rich entablature, which is surmounted by a pediment, broken in the centre to admit before a window, elliptical in shape, a transparent painting representing the dove, the emblem of the Holy Ghost, surrounded by a glory, and cherubs appearing in the clouds. On the top of the pediment, at either side, the figure of an angel supports the tables of the old law and of the gospel. On the western side of the sanctuary, in an arch near the balusters, is the bishop's chair, with a handsome mahogany canopy, and in a similar arch just opposite is a valuable painting,—a portrait of St. Louis, titular saint of the cathedral,—which was presented to the diocese by Louis XVIII. of France.

At the extremity of each side aisle is a small chapel, both of which are elevated five feet above the floor of the church. The eastern chapel is adorned by an altar-piece representing St. Patrick in pontifical robes. Above the altar-piece are two paintings, one representing the centurion kneeling before the Saviour, and said to be by Paul Veronese; the other the marriage of the Virgin with Joseph. The western chapel has for its altar-piece a picture of St. Vincent de Paul, founder of the Order of Sisters of Charity, rescuing an abandoned child. Near the side doors are two other valuable paintings, one representing

the martyrdom of St. Bartholomew, the other the Virgin Mary holding the infant Jesus in her arms. Beneath the side altars two flights of steps descend to the lower chapel, whose dimensions are eighty-four by thirty feet. The organ was constructed in Cincinnati at a cost of five thousand dollars, and is placed in a loft behind the altar of St. Patrick, communicating with the choir gallery on the eastern side of the sanctuary. On either side of the church are seven arched windows eighteen feet high, adorned with scenes from the life of the Saviour. The interior decoration of the Cathedral is warm and attractive, and the appearance of the ancient edifice on festival occasions is always gorgeous and imposing. In the rear of the Cathedral is a free school building under the charge of the Sisters of Loretto. On the 28th of April, 1871, the preliminary steps were taken for the incorporation of a society having for its object the erection of a new Cathedral. The movement was inaugurated under the auspices of Archbishop Kenrick, Bishop Ryan, and Vicar-General Muhlsiepen, and was supported by prominent capitalists. The ground upon which it was contemplated to erect the building was City Block 915, between Twenty-second and Twenty-third Streets and Chestnut and Pine Streets, which was secured for the purpose by the archbishop. The association was composed of the following members: Most Rev. Archbishop Kenrick; Very Rev. P. J. Ryan, coadjutor bishop; Very Rev. Henry Muhlsiepen, vicar-general; James H. Lucas, Henry S. Turner, Joseph O'Neil, John Withnell, Nicholas Schaeffer, H. J. Spaunhorst, J. B. Ghio, Bernard Crickhard, M. B. Chambers, Julius S. Walsh, John Byrne, Jr., Bernard Slevin, Charles P. Chouteau, Charles Slevin, James Maguire, and Joseph Garneau. A certificate of incorporation was granted to these gentlemen by Judge Lucas, and the association was incorporated under the name of the St. Louis Cathedral Building Association. Pending the erection of the new building, however, the venerable edifice of 1834 continues to rear its massive front, and with the alterations and repairs which were made in 1876 the Cathedral is still a noble and imposing house of worship.¹

¹ The Cathedral was entered by burglars early on the morning of Aug. 27, 1845, but they only succeeded in securing the contents of several charity boxes, amounting in all to about twenty-five dollars.

On the first Sunday of October, 1855, the first Provincial Council of St. Louis was opened at the Cathedral with imposing ceremonies. The bishops composing the Council were Archbishop Kenrick, of St. Louis, and Bishops Miles, of Nashville, O'Regan, of Chicago, Henni, of Milwaukee, Cretin, of Minnesota, and Loras, of Dubuque. After the mass, the music being

In 1876 the Cathedral was repaired and the interior redecored under the direction of T. W. Brady, architect. The exterior, with the exception of the steeple, which underwent extensive improvements, was left unchanged. The entire interior was painted and frescoed by George Couch and Charles F. Krueger, gray being the prevailing tint of the background, relieved by rich but quiet ornamentation. The spaces between the windows were adorned with figures (more than life-size) of St. Malachi, St. Boniface, St. Patrick, St. Ignatius, St. Francis de Sales, St. Kevin, St. Lawrence O'Toole, and St. Bridget. The walls of the sanctuary were likewise adorned with figures of St. Louis, St. Vincent de Paul, and other saints. The old paintings, "The Descent from the Cross," and "St. Louis at his Devotions," which had been familiar to frequenters of the church for many years, remained in their accustomed places, and were brought out in clearer relief by the added freshness and brightness of their surroundings. The year 1876 being the centennial year of the foundation of the parish, a meeting was held at the parochial residence July 11th, and the following resolution was adopted:

"Whereas, Our country is ringing throughout its length and breadth with the shouts of our citizens for this, the hundredth anniversary of our political independence; and, *whereas*, this year is the hundredth anniversary of the foundation of the Cathedral parish; *therefore be it Resolved*, That in this two-fold centennial we celebrate with all the pomp we can the feast of our church on August 27th."

rendered by a choir whose leading members were Miss Julia Pratte, Mrs. Ringling, Miss Maginnis, Dr. Boislinière, and Mr. Young, Rev. Father Murphy, vice-provincial of the Society of Jesus, preached the sermon.

The promoter of the Council was Very Rev. J. Duggan, V. G.; notary, Rev. E. Saulnier; secretary, Rev. J. Banmo; master of ceremony, Rev. P. J. Ryan; theologians of the archbishop and bishops, Rev. P. Patschouski, Rev. E. Rolando, Rev. Father Feehan, Rev. P. O'Brien, Rev. P. J. Ryan, Rev. E. Vignonet, Rev. J. Higginbotham, Rev. P. de Smet, Rev. A. Damen, Rev. P. Larkin, Rev. J. Heiss, Rev. W. Wheeler, Rev. J. Villars, Rev. P. R. Donnelly.

Very Rev. D. Masenou represented the Lazarist religious congregation; Very Rev. Father Murphy, the Jesuits; Rev. Vincent Smyth, the Trappists; Rev. E. Jarhoe, the Dominicans; and Rev. S. A. Paris, the Sisters of St. Joseph.

On the 3d of May, 1857, the Cathedral was the scene of another imposing ceremony, the consecration of the Right Rev. James Duggan, Bishop of Antigonish *in partibus infidelium*, to be Coadjutor Bishop of Chicago, with right of succession, and the Right Rev. Clement Smyth, Bishop of Appanasia *in partibus*, to be coadjutor of the Bishop of Dubuque; and again in May, 1859, the occasion being the consecration of Right Rev. Dr. Whelan as coadjutor to the Bishop of Nashville, and Right Rev. Dr. O'Gorman as Vicar Apostolic of Nebraska. The ceremony was performed by Archbishop Kenrick, assisted by Bishops Miege, of Kansas, and Junker, of Alton. Bishop Smyth, of Dubuque, preached the sermon. Bishop Duggan, of Chicago, also participated in the services.

A committee consisting of Rev. David J. Doherty and John H. O'Neill was appointed at the same meeting for the purpose of preparing from such data as were procurable an address to the parishioners and people of St. Louis, which should embody a history of the Cathedral parish, and which should be published in pamphlet form. In accordance with these instructions the address was prepared and published, and the centennial services at the Cathedral were held Aug. 27, 1876. The front of the building was trimmed with evergreens in honor of the occasion, and an immense assemblage was attracted to the scene. Among those present inside the building, to which entrance was only to be obtained by means of cards of admission, were Judge Wilson Primm, who many years before had been leader of the Cathedral choir, Senator Bogy, Col. J. O. Broadhead, Hon. Thomas E. Reynolds, Capt. Thorwegen, John F. Gibbons, and Col. A. W. Slayback. The altars were ablaze with light, and the decorations unusually rich and brilliant. High above the altar, in letters formed by gas-jets, was the inscription, *Gloria in Excelsis Deo*. The orchestra opened the services with the prelude to a mass by Giorza, and the procession of clergy marched into the sanctuary. It was composed of three acolytes, twenty-five priests and monks, and three bishops. The grand high mass was celebrated by Right Rev. Bishop Ryan, with Very Rev. H. Muehlsiepen, V. G., as archdeacon of honor; Rev. Joseph Henry, of St. Lawrence O'Toole's, as deacon; Rev. P. L. McEvoy, of St. Kevin's, as sub-deacon; and Rev. C. Smith as master of ceremonies.

In the sanctuary were the following clergymen: Right Rev. Bishop Hennessy, of Dubuque, attended by Rev. Andrew Eustace, of St. Michael's; Right Rev. Bishop Hogan, of St. Joseph, attended by Rev. William Walsh, of St. Bridget's; Very Rev. P. J. O'Halloran, V. G., of East St. Louis; Rev. T. M. Keilty, of the Holy Angels; Rev. P. P. Brady, of the Annunciation; Rev. M. Reilly, of St. Columbkil's; Rev. R. Hayes, of St. Lawrence; Rev. T. Hanlon, of St. Michael's; Rev. M. W. Tobyn, pastor of Cathedral parish; Rev. George Watson, Rev. D. S. Phelan, of St. Aloysius; Rev. Father Maurice; Rev. Fathers Rosenbauer, Murphy, and Luytelaar, of St. Alphonsus'; Rev. E. Fenlon, of St. Bridget's; Rev. H. Kelly, of Cheltenham; Rev. T. Burke, of St. Vincent's; Rev. G. Powers, of St. John's; Rev. M. Brennan, of St. Malachi's; Rev. P. Morrissey, of the Annunciation; Rev. F. Ward, S.J., College Church; Rev. Father Servatius, O.S.F.; Brother Virgil, of the Christian Brothers.

The music, under the direction of Professor Campi,

was very fine, the choir being composed of the following: Misses Peake, Pomarede, Overstolz, Whipple, E. Schumacher, B. Schumacher, De Kalb, Mulholland, De Campi, and Keller, Mrs. Coester, Mrs. Kreiter, and Mrs. Johnson, and Messrs. Allman, Diehm, A. Wiseman, J. Wiseman, Singer, Dierkes, Schraubstadter, Sexton, Overstolz, and Field.

Just before the delivery of the sermon, Father Doherty read a statement of the cost of the repairs to the Cathedral, which had just been completed. The renovation of the roof and steeple, he said, had cost \$2618, the remodeling and repair of the windows \$1100, the renovation and fresco-work in the interior \$2600, making a total of \$6318. The amount already paid on this score, together with the cash still on hand for that purpose, was \$3300, leaving the considerable sum of \$3000 still to be raised. It was this fact which led to the adoption of the plan of selling seats for the celebration, and it was this which also determined the finance committee to take up a collection. They did this, added Father Doherty, with a full realization of the fact that there were few St. Louisans, either Catholic or Protestant, who did not love the very stones of which the old Cathedral was built.

Rev. G. Powers, of St. John's Church, then delivered the sermon, his text being taken from the twenty-first chapter of St. John's Apocalypse, in which occur the words, *Ecce tabernaculum Dei cum hominibus, et habitat cum eis* ("Behold the tabernacle of God with men, and He will dwell with them"), inscribed on the mural slab over the main entrance to the church. After the sermon the collection referred to by Father Doherty was taken up.

At the close of the mass the altar was rearranged and the service of the benediction followed, Bishop Ryan still officiating. After the benediction the orchestra and chorus rendered with grand effect Haydn's "Te Deum Laudamus," with which the exercises closed.

PASTORS OF CATHEDRAL PARISH.—On a previous page we have given the succession of early pastors and priests who officiated in the Cathedral parish, but for purposes of reference we recapitulate them here.

List of priests who officiated in St. Louis from the foundation of the city up to about the time of Bishop Dubourg's arrival:

Fathers Meurin, from May, 1766, to Feb. 7, 1769; Gibault, June, 1770, to January, 1772; Valentin, May, 1772, to June, 1775; Meurin, Oct. 4 and 5, 1776; Hilaire, March 19, 1776; Bernard, May, 1776, to 1789; Ledru, November, 1789, to September, 1793; Didier, December, 1793, to April, 1799; Lusson and Maxwell, July, 1798, to May, 1799; Lusson, March 23,

1799, to March 23, 1800; Janin, April 6, 1800, to Nov. 12, 1804; Maxwell, March 2 to May 29, 1806; Olivier, Sept. 14 and 15, 1806; Flynn, Nov. 9, 1806, to June 2, 1808; Maxwell, June 5 and 8, 1808; Guillet, July 20 to Aug. 26, 1808; Dunand, Dec. 23, 1808, to Jan. 18, 1809; Guillet, Dec. 24 to 31, 1809; Bernard, Feb. 6 to July 13, 1810; Maxwell, July 30, 1810; Dunand, Aug. 5, 1810; Maxwell, Aug. 12 to 15, 1810; Guillet, Nov. 2, 1810, to June 23, 1811; Dunand, July 30, 1811, to Aug. 2, 1811; Guillet, Aug. 9, 1811, to Dec. 1, 1811; Savigne, Dec. 11, 1811, to Sept. 15, 1812; Dunand, Nov. 10, 1812; Savigne, Feb. 11, 1813; Dunand and Savigne, March 14, 1813; Dunand, March 17, 1813; Savigne, May 12, 1813, to Oct. 3, 1817.

In January, 1818, there arrived, in company with Bishop Dubourg, Rev. Fathers De Andreis, Rosatti (afterwards Bishop of St. Louis), Acqueroni, Ferrari, and Carretti, and these priests officiated at the Cathedral and labored in the parish. Up to 1826 the following additional clergymen officiated from time to time at the Cathedral: Fathers Pratte, De Neckere (afterwards Bishop of New Orleans), Cellini, Saulnier, Neil, Damen, Titchitoli, and Jean-Jean. During the administration of Father Rosatti, from 1824 to 1843, many priests officiated at the Cathedral, among them being Fathers Timon (afterwards Bishop of Buffalo), Lutz, Loisel, Verhaegen, S.J., Doutrelingue, Paguin (afterwards sent to the mission of Texas, where he died of yellow fever), Roux, Condamine, Borgua, Lefevre (afterwards Bishop of Detroit), Tucker, St. Cyr (now over seventy-two years of age, blind, and an inmate of the Convent of St. Joseph, in South St. Louis), Fontbonne, Jamison, Fischer, Odin (later Archbishop of New Orleans), P. R. Donnelly, Hamilton, and others.

In 1847 the Cathedral received its crowning honor by being made a metropolitan church, Bishop Kenrick being raised to the archiepiscopacy. Under him, during the earlier days, served Fathers Lutz, Saulnier, Carroll, Cotter (who was killed while attending a sick call in Washington County), Paris, and Heim. The epitaph on the grave of Father Heim in Calvary Cemetery tells that he was "The Priest of the Poor." In 1861 the Redemptorist Fathers arrived in St. Louis on invitation of the archbishop, and had charge of the Cathedral until 1868, when they removed to their own beautiful St. Alphonsus Church.

In addition to those already mentioned who have left the Cathedral to become bishops are Fathers Feehan, Hennessy, Duggan, Hogan, and Ryan.

The first St. Vincent de Paul Society on the banks of the Mississippi, and perhaps the first in America, was organized Nov. 20, 1845, the first meeting being held in the little school-house on Second Street, attached to the Cathedral, a building afterwards destroyed by the great fire of 1849. The second meeting was held on the 27th of the same month. Among

the first members were Bryan Mullanphy, Father Heim, Father John O'Neil, John Haverty, John Everhart, John Ennis, John Dorack, Robert Mitchell, Joseph O'Neil, Michael O'Keefe, Dr. Linton, Dr. O'Loughlin, James Maguire, John Byrne, Jr., Dennis Galvin, John Amend, Francis Saler, and Joseph Murphy. Prominent among these were the venerable Father Heim and Judge Mullanphy, who were practically the founders of the organization. John Haverty and Robert Mitchell also became very active in the subsequent work of the society.

St. Francis Xavier Church, otherwise known as the "College Church," was the sixth in the series of structures erected by the Jesuits in charge of St. Louis University. It was located on the lot originally given by Jeremiah Conner to Bishop Rosatti for college purposes, and made over by the bishop to the Jesuits in 1828. The corner-stone was laid in the spring of 1840, Rev. G. A. Carrell, afterwards president of the university, addressing the people from the eastern balcony of the college, and the building was dedicated and occupied on Palm Sunday, 1843. It is a substantial brick structure, Romanesque in style, with sixty-seven feet front on Ninth Street by one hundred and twenty-seven feet on Christy Avenue, extending back to the eastern end of the old college building. It has a large basement, in which the parochial school was conducted until its removal, in 1846, to a house built expressly for it. On the 19th of May, 1851, the church was transferred by the vice-provincial of the Society of Jesus in Missouri to the control of the St. Louis University, which assumed an uncanceled debt on the building of thirty-eight thousand seven hundred and fifty dollars. The church has a seating capacity of three thousand, and is often filled to its utmost capacity, people from all parts of the city making up the congregations. The interior is imposing and richly decorated, and its walls are hung with paintings, many of which are considered to be of great value. Among the interesting incidents connected with the history of this church were the consecration, Feb. 11, 1849, of Father J. Van de Velde, Bishop of Chicago, on which occasion the officiating clergy were Archbishop Kenrick, Bishop Loras, of Dubuque; Bishop Mills, of Nashville; and Bishop De St. Palais, of Vincennes, and the consecration, March 25, 1851, of Father Meige, Bishop of Kansas. At the latter ceremony Archbishop Kenrick and the Bishops of Vincennes and Chicago officiated.

The services in commemoration of the Golden Jubilee of the university on the 26th of June, 1879, were also conspicuous among the imposing ceremonies which have been held from time to time in this church.

The rectors or presidents of the university have always been *ex officio* pastors of the church. They have had for assistants, since 1843, Fathers George A. Carrell (afterwards Bishop of Covington, Ky.), Arnold Damen, Cornelius F. Smarius,¹ John O'Neil, Michael Corbett, Edward Higgins, Patrick J. Ward, the present assistant pastor. The principal societies connected with the church are the Young Men's, St. Joseph's, Young Ladies', and St. Ann's Sodalities. There are two Sunday-schools, attended, in the aggregate, by twenty-eight teachers and eight hundred scholars.

THE YOUNG MEN'S SODALITY was instituted by Rev. Arnold Damen, S.J., in 1846, under the protection of the Virgin. The first sodality, after which all the others are patterned, was organized in Rome in 1563, by Father John Leonius, S.J., then a teacher in the Roman College. It consisted at first of youths, who were placed under the special protection of the Blessed Virgin, but it found favor with Pope Gregory XIII., who by an encyclical letter in 1584 gave it the papal sanction, and commended its example to the Catholic world, vesting powers of direction and indulgences in the Jesuits who should establish branches. From this beginning sodalities have been organized wherever the Society of Jesus has colleges or churches, while the mother or Roman Sodality has numbered in its membership popes, cardinals, bishops, priests, and saints, as well as temporal princes, magistrates, and distinguished men in every class of society. The sodality attached to St. Francis Xavier's Church has for its object the promotion of sociability and brotherly love, and the practice of virtuous principles among its members. It meets every Sunday morning at a quarter past nine, except on the last Sunday in the

¹ Father Cornelius F. Smarius was born on the 3d of March, 1823, in Tilburg, province of North Brabant, Holland. When yet a child his parents died, and his education was undertaken by his relatives, who at the proper time placed him in the smaller seminary of St. Michael's, Gestel, where he pursued his classical studies with zeal and industry. He early gave token of his wonderful oratorical powers, which appear to have been hereditary, his father having been an eminent speaker. The young student was even more distinguished for his piety and missionary zeal than for his genius. He was at the head of every pious association, and often gathered his fellow-students around him and exhorted them to the practice of virtue. Having completed his classical studies, he came to this country in 1841 to devote his life to missionary labor. After the customary trials of the Jesuit novitiate, he filled the office of a college professor in Cincinnati, and at the St. Louis University. Between these duties and the completion of the longer course of studies usually performed by the Jesuits he spent his time up to 1858, when he was made pastor of St. Xavier's (College) Church. In 1860 he was sent to the missionary house of the Society of Jesus at Chicago, and died on the 1st of March, 1870.

month, when it meets at seven o'clock and proceeds in a body to St. Xavier's Church to partake of the Communion. Frequent social gatherings are held at stated times. Sodality Hall, on the southeast corner of Ninth Street and Christy Avenue, was erected by St. Louis University in 1855, and besides rooms for meetings, contains a library of two thousand volumes and a reading-room supplied with local and Catholic periodicals. In 1880 a new class of members, known as the Veteran Corps, was organized within the sodality, its object being to recall such of its earlier members as had withdrawn from active fellowship. Fifteen years' membership constitutes eligibility to the corps, and it has now about two hundred names on its roll. The total present active and honorary membership of the sodality numbers six hundred and thirty-four, and its officers are a spiritual director, prefects (first and second), secretary, treasurer, librarian, and twelve consultants, all of whom form the council of the sodality.

ST. JOSEPH'S SODALITY, for married men, was organized by Father O'Neil about fifteen years ago. It meets in Sodality Hall at two o'clock on Sunday afternoons.

THE YOUNG LADIES' SODALITY of the Blessed Virgin Mary was organized by Rev. A. Damen, S.J., Aug. 15, 1848, with twenty-eight members. Since then fifteen hundred names have been enrolled, and the present active membership numbers five hundred. On the first Sunday of every month the members approach the Holy Communion in a body, their average attendance being three hundred and fifty. On other Sundays they meet to recite the offices of the Blessed Virgin Mary, with an average attendance of three hundred. The sodality occupies one story of Sodality Hall, and possesses a fine library of over eighteen hundred volumes. It also has a burial lot in Calvary Cemetery. A Mutual Benevolent Association, which is very flourishing and productive of great good, is sustained by its members. Rev. F. J. Boudreaux is the present director.

ST. ANNE'S SODALITY for married women was organized under the title of the Immaculate Conception Sodality, Dec. 8, 1875, by Rev. P. J. Ward, S.J., who was chosen at the time, and has since remained its spiritual director. St. Anne was selected as secondary patron, hence the name afterwards adopted. The officers at first consisted of prefect, first and second assistants, secretary, sacristan, treasurer, and twelve consultants; but the growth of the sodality rendering others necessary, there are now in addition to the above three assistant secretaries, an assistant sacristan, assistant treasurer, two medal-bearers, and

six regulators. These officers are elected by the vote of the whole sodality at the annual meeting in April. The regular meeting takes place every Sunday afternoon (except the third Sunday) for reciting the offices of the Blessed Virgin and instruction. On every third Sunday the sodality attends the Holy Communion. An annual retreat of one week is also given, and all who attend it are admitted to membership, dispensing with the three months' probation usually required of postulants. The retreat is closed by mass and Communion, followed by the act of consecration for postulants, and its renewal for old members, with closing instruction and benediction. High masses of requiem for deceased members are said both during retreat and as soon as possible after the death of any member. The average monthly number of communicants during the past year has been three hundred and five. The sodality began in 1875 with ninety-six members, and on the 1st of January, 1882, numbered five hundred and sixty-five members. Several, however, have since been dropped for non-attendance, leaving the actual membership four hundred and fifty. Since the beginning there have been twenty-seven deaths.

St. Joseph's Church, at the northeast corner of Eleventh and Biddle Streets, Rev. Lambert Etten, S.J., pastor, was established for the use of German Catholics by the members of the Society of Jesus attached to the St. Louis University. The congregation first met for worship in 1840, in St. Aloysius Chapel, on the grounds of the university on Washington Avenue, and when St. Francis Xavier Church was finished this chapel was given up to them. The ground for St. Joseph's Church was given by Mrs. Ann Biddle, and work was begun March 1, 1844. The corner-stone was laid in April, 1844, and the building, which was eighty by one hundred and twenty feet, was finished and dedicated Aug. 2, 1846. The building was in the Ionic style of architecture, and was surmounted by a spire one hundred and fifty feet in height. The interior was divided into a nave and two aisles, and was finished after the Corinthian order. George Purves was the architect. The parish grew very rapidly, and under the pastorate of Father Weber, S.J., the church was greatly enlarged and improved. The corner-stone of a new building was laid in the latter part of June, 1865, and the completed structure was dedicated Dec. 30, 1866. In 1880 the present front with the steeples was added, making the dimensions of the whole edifice one hundred and twelve by one hundred and eighty feet. As it now stands, with its massive proportions and lofty towers, it is one of the most spacious and imposing

church edifices in the country. It will seat two thousand six hundred persons, but as many as four thousand five hundred have been contained within its walls. The exterior is in the Romanesque style of architecture, and the interior is magnificently decorated, the grand altar having cost ten thousand dollars. In the semi-dome are five panels, each of which contains colossal figures in natural colors, representing the Virgin Mary, SS. Ann and Joachim, Abraham and David, surrounded by appropriate emblems. These are again crowned by another composition, as is seen through the eye of the first dome, representing the Holy Trinity. The diffused light produced by mechanical combinations reflected on these figures has a magnificent effect.

The nave is separated from the aisles by a range of Corinthian columns of Sienna marble supporting semi-circular arches, and terminating with a semi-dome, or apse, inclosing the high altar. These columns and arches support a clear-story, which is perforated by windows, and separated from the arches by a crowning entablature, which forms the base sustaining the semi-circular arches spanning the nave. The spaces or bays between the columns and walls forming the side aisles are covered by small domes, giving to each section a separate compartment. On south end of the interior is the styolite sustaining the choir and galleries. The parochial schools are located in three brick buildings, three stories high, on Eleventh Street, between Cass Avenue and O'Fallon Street, built in 1857, 1860, and 1862, and are under the charge of the Sisters de Notre Dame and of secular teachers. The buildings and ground cost about sixty thousand dollars; and the schools are conducted by eleven teachers, and attended by nine hundred pupils. The successive pastors of the church have been Rev. Fathers J. Cotting, 1840; Hofbauer, 1846; Seisl, 1847; Patschowski, 1851; Joseph Weber, 1859; Tschieder, 1870; Fr. Hagemann, 1876; L. Etten, 1881, all of the Society of Jesus; Fathers Joseph Weber (who has been attached to the church for twenty-nine years), F. X. Whippert, and Francis Braun, all of the Society of Jesus, are assistant pastors. The parish comprises eight hundred families and two thousand communicants, and the Sunday-school has four teachers and four hundred pupils. The congregation is exclusively German, and has connected with it a Young Men's Sodality of two hundred members; Young Ladies' Sodality, two hundred and thirty members; Married Men's Sodality, organized 1881, one hundred and twenty members; St. Joseph's Benevolent Society, two thousand members; St. Vincent de Paul Society, and others.

St. Mary of Victories, another German Church, was organized by the Rev. Peter Fischer, its first pastor, in 1843, its original members being a portion of the Cathedral congregation. The deed of the church property bears the date of Feb. 8, 1843. The corner-stone of the present church, which is located at the northeast corner of Third and Mulberry Streets, was laid June 25, 1843, and the building was blessed on the 15th of September, 1844. In 1859-60 an addition to the church on the east side, increasing it more than one-half its former size, and the tower were built, and on the 13th of May, 1860, the church was consecrated. Archbishop Kenrick officiated, assisted by Rev. R. Niederkorn, S.J., of St. Joseph's Church; Rev. Dr. Salzman, of Milwaukee; Rev. Mr. Golter, of the Church of SS. Peter and Paul; and Rev. Mr. Ziegler, Fathers De Smet, S. J. Bannon, and others. The second pastor was Very Rev. Joseph Melcher, V. G., 1847 to 1868; the third, Very Rev. Henry Muhlsiepen, V. G., March to August, 1868; the fourth and present pastor, Rev. William Faerber, S.J., was appointed August, 1868. The church owns the west half of the block on which it stands (except twenty-two feet on the northwest corner), or two hundred and twenty-five by one hundred and fifty feet. The parochial school, a two-story brick building, eighty-two by seventy-six feet, adjoins the church on the north. It was established in 1855, and is under the charge of one secular teacher and five Sisters of Notre Dame. It is attended by four hundred pupils. About two thousand persons (adults and children) are connected with this congregation. The Sisters of Notre Dame, of whom there are several in the city, in charge of different parish schools, have a small convent or residence at 742 South Third Street, on a part of the church lot.

St. Patrick's Church.—The corner-stone of St. Patrick's Church, situated at the northwest corner of Sixth and Biddle Streets, was laid in 1843, and the building was dedicated in 1845. It is a Gothic brick structure, seventy-five by one hundred and twenty feet, with a spire one hundred and ninety feet high, and its interior is highly decorated. The main altar, of Italian marble and highly artistic workmanship, is one of the costliest and handsomest in America. The parochial schools are located on the west side of Seventh Street, between Biddle and Carr, on a lot one hundred and twenty by one hundred and twenty-seven and a half feet. The building is a large three-story brick structure, the corner-stone of which was laid Oct. 29, 1871. The cost of erection was seventy-five thousand dollars. The schools are conducted by the Christian Brothers and Sisters

of St. Joseph. This parish is the largest in the city, and contains nineteen hundred families, fully eight thousand people attending the different Sunday services. The successive pastors have been Revs. Fathers Lutz, Hamilton, William Wheeler, P. A. Ward, John Higginbotham, William Wheeler (again), James Fox, James J. Areher, James McCaffrey, assisted by Fathers Healy and J. R. Hayes.

Father Wheeler, who is conspicuously identified with the history of St. Patrick's parish, died at Munich, Bavaria, Feb. 27, 1870. Father Wheeler was born a short distance from Dublin, Ireland. His father was an Englishman, a convert to Catholicism, and his mother of Irish parentage. He came to this country about the year 1845, with a band of students, and landing in New York, repaired to St. Louis, where he was subsequently ordained. The first ministerial charge of Father Wheeler was in connection with St. Patrick's Church, and with the exception of a few brief interruptions, he was identified with this parish for twenty-two years. He first discharged the duties of assistant, and then became pastor of the church. During the interruptions alluded to in his connection with St. Patrick's Church he officiated at the Cathedral for a short time, and subsequently acted as pastor of St. Michael's Church. These, however, were but episodes in his career, which was mainly associated with St. Patrick's parish. Previous to his connection with the Cathedral he visited Europe, in company with Father Higginbotham, who, however, did not return with him.

In November, 1870, Father Wheeler again left for Europe to attend the Council of the Vatican. His position in that body was that of theologian for Bishop Fechan, of Nashville, whom he accompanied to Rome. He left St. Louis about the 1st of February, and in a letter to Father Ryan stated that he proposed making a short tour through Germany and other portions of Continental Europe, and expected to return to St. Louis about the 1st of May. Previous to his departure for Rome his parishioners gave him a banquet, and otherwise expressed their respect and esteem. Father Wheeler was a hard-working and devoted divine, and during the cholera epidemic of 1849 he labored ceaselessly in his ministrations among the sick and dying. He was between fifty-five and sixty years of age.¹

¹ A meeting of the Catholic societies was held in St. Patrick's school-house adjoining the church June 18, 1870, to arrange for the celebration on the following Sunday of the twenty-fifth anniversary of the coronation of Pope Pius IX. D. Donovan was president of the meeting, M. H. Phelan was secretary, and the following societies were represented: Holy Trinity Parish

St. Vincent de Paul's Church, for both German- and English-speaking congregations, is situated at the southwest corner of Deatur Street and Park Avenue, and the pastor is Rev. James McGill, C.M. The parish was founded by Rev. John Timon, afterwards Bishop of Buffalo, N. Y., and is presided over by the priests of the Congregational Mission, established by St. Vincent de Paul. The building was begun in 1843, and consecrated in 1845. It is a massive brick edifice of Roman architecture, with a large cupola in the centre of the roof, and is sixty-four by one hundred and fifty feet. The total cost of construction was thirty thousand dollars. The congregation is composed of English and Germans, and separate masses are said for each. Both languages are taught in the parochial schools, of which that for boys, under the charge of the Christian Brothers, is held in a brick building, corner of Park Avenue, adjoining the church, which was erected in 1859 for fourteen thousand dollars, and has over five hundred pupils. The girls' school is situated on the northwest corner of Marion and Eighth Streets (one block east of the church), and is conducted by the Sisters of St. Joseph, who reside in the building. Father James McGill is Superior and pastor of the English-speaking portion of the congregation, and Rev. J. G. Uhland, C.M., is pastor of the Germans; Rev. D. W. Kenrick and A. P. Kreuz, C.M., are assistants. The parochial residence is just south of the church. About six thousand persons attend worship regularly at St. Vincent de Paul's.

Church of SS. Peter and Paul.—The congregation of SS. Peter and Paul was organized in 1848 by its first pastor, Rev. Simon Sigrist. Its first church was a frame building on the site of the present church, at the corner of Allen Avenue and Seventh and Eighth Streets, and the second, situated on the same lot, was of brick, with a seating capacity of seven hundred. Its corner-stone was laid Oct. 1, 1851, and the building was dedicated in October, 1854. On the 17th of June, 1873, the demolition of the structure was begun, and on the 12th of April, 1874, was laid the corner-stone of the present edifice, which was consecrated Dec. 12, 1875. It fronts eighty-three feet on Eighth Street, and extends two hundred and four feet from Seventh to Eighth, the entire depth of the block, with a transept ninety feet

Benevolent Society, Young Men's Sodality of the College, St. Joseph Sodality of St. Xavier Church, Shamrock Benevolent Society, Father Mathew Young Men's Total Abstinence and Benevolent Society, Roman Catholic Total Abstinence and Benevolent Society, Hibernian Benevolent Society, United Sons of Erin Benevolent Society, St. Bridget's Young Men's Sodality, and St. Aloysius' Society of the Annunciation Church.

in length. It is of uncut Grafton limestone, of the fourteenth century Gothic style, and is one of the most beautiful and imposing churches in the city. The structure is surmounted by a steeple three hundred and fourteen feet high. The building is constructed in the most substantial manner, and with studied care to secure the best effects of interior decoration. The church is well lighted with stained-glass windows, and the three altars are exceedingly beautiful, the altar to St. Mary having figures of the Virgin, St. Catherine, and St. Elizabeth. The altar of St. Joseph has also figures of St. Boniface and St. Francis de Sales. The church will seat three thousand people, and cost two hundred thousand dollars. It was built without assistance from any fair, picnic, dance, or other festival, although the congregation (all Germans) was almost exclusively of the working classes. The consecration services were conducted by the Right Rev. Bishop P. J. Ryan, D.D., assisted by Rev. Father Groembaum, deacon; Rev. William Kleibighaus, sub-deacon; Rev. H. Groll, assistant deacon; Very Rev. H. Muhlsiepen, V. G., master of ceremonies; also Rev. Father Ruesse, Rev. C. Wahpelhorst, Rev. H. Vandersauten, chancellor; Rev. William Faiber, of St. Mary's; and Rev. H. Krabler, C.M. Pontifical high mass was conducted by the Right Rev. Bishop Heiss, D.D., of La Crosse, Wis., assisted by Very Rev. H. Muhlsiepen, V.G., archdeacon; Rev. Father Hoeynek, of St. Liborius, deacon; Rev. Father Schilling, of Lowell, sub-deacon; Very Rev. C. Wahpelhorst, master of ceremonies. A sermon in English was delivered by the Right Rev. Bishop Fitzgerald, D.D., of Little Rock, and one in German by the Right Rev. Bishop Krautbauer, D.D., of Green Bay, Wis.

Pastor Sigrist was succeeded by Rev. Francis Goller on Jan. 1, 1858, and since 1870 he has had for assistants Rev. Fathers H. Groll, W. Klevinghaus, and F. Ruesse. The parochial school is conducted under the charge of the Sisters of Notre Dame, in a large three-story brick building adjoining the church on Eighth Street; it has sixteen teachers and twelve hundred pupils. The entire church property is valued at three hundred thousand dollars. The principal societies connected with the congregation (which numbers about one thousand families) are the St. Paul's Benevolent Society, of six hundred members, with a cash capital of twenty thousand dollars; the Young Men's Sodality, of two hundred members; and the Young Ladies' Sodality, of three hundred members. The pastoral residence adjoins the church on South Seventh Street. The cemetery belonging to the church is situated on Gravois road.

St. Michael's Church, northeast corner of Eleventh and Exchange Streets, Rev. Andrew Eustace, pastor, was founded by Rev. Father Hogan, afterwards Bishop of St. Joseph, Mo., and the present brick building, forty-five by ninety feet, which was built in 1855, at a cost of twenty thousand dollars, took the place of an old building that had been occupied by the congregation for many years previous. The parochial school is located at the northwest corner of Eleventh and Benton Streets, in a large brick building erected in 1859, at a cost of thirty thousand dollars, which will accommodate five hundred pupils. It is conducted by the Sisters of Loretto. About four hundred families (two thousand persons) are connected with the congregation.

Holy Trinity (German) Church, situated at the southwest corner of Mallinckrodt and Eleventh Streets, Rev. Frederick Brinkhoff, pastor, was organized, and its first house of worship built in 1851, by Father Lorenz, its first pastor. In 1858 the church was demolished and the present structure erected. It is a large brick structure of the Romanesque style of architecture, fifty-four by one hundred and twenty feet, and the church lot, which is one hundred and seventy feet square, also contains a fine parochial residence. The parish school, a three-story brick building sixty by fifty feet, on a lot eighty by one hundred and thirty-five feet, stands on the corner opposite to the church. It was built in 1871, the school having previously been conducted in the basement of the church. Father Devanny succeeded the first pastor and preceded the present; Rev. Paul Weis is assistant pastor. The parish comprises four hundred and fifty families, with fifteen hundred communicants; and there are seven teachers and four hundred and fifty pupils in the Sunday-school.

St. Bridget's Church.—The first St. Bridget's Church was erected in 1853, and the corner-stone of the present building, which adjoins it, and which is situated at the northeast corner of Carr Street and Jefferson Avenue, was laid by Archbishop Kenrick on the 7th of August, 1859. The building was finished during the pastorate of Rev. David Lillis, its first rector, at a cost of thirty-five thousand dollars. It has a front of seventy-five feet on Jefferson Avenue, with a depth of one hundred and thirty-five feet, and its architecture is a mixture of the Gothic and Byzantine orders. The old church, erected in 1853, is now used as the boys' parochial school, in charge of the Christian Brothers. The parochial school for girls is situated on the northwest corner of Jefferson Avenue and Carr Street, in a handsome-brick building of four stories and a basement, which contains

twelve rooms, and is capable of accommodating seven hundred scholars. The school is in charge of the Sisters of St. Joseph. The parish contains about five thousand persons, and nearly twelve hundred children attend the Sunday-schools. The pastor of St. Bridget's is Rev. W. Walsh, and his assistants are Revs. F. R. Gallagher and J. J. Hartly.

St. John of Nepomuk (Bohemian) Church was established in 1854 by the first pastor, Rev. Henry Lipoosky, who was succeeded by the Rev. Francis Trojan in 1856, and by the present pastor, Rev. Joseph Hessoun, in 1865. A frame building, thirty-five by seventy feet, was erected on the site of the present church (northwest corner of Soulard and Rosatti Streets), and dedicated in 1854. In the spring of 1870 the frame structure was torn down, and a church erected after plans prepared by Adolphus Druiding, architect. The corner-stone was laid May 15, 1870, and the building was dedicated Nov. 27, 1872. It is a handsome brick structure of the Gothic order, sixty by one hundred and fourteen feet, and is capable of seating five hundred and twenty persons. The ground on which the church stands was presented to the congregation by Father Renaud, a French priest. The church now owns seven lots, and its property is valued at sixty thousand dollars. The parochial school was organized in 1866, and the school buildings (two in number) are located on Rosatti Street near the church. Six Sisters of Notre Dame and one secular teacher have charge of the school, which numbers five hundred and twenty pupils. Connected with the church are the following societies: St. Wenceslaus Benevolent Society, with two hundred and fifty-two members; St. John of Nepomuk Benevolent Society, one hundred and four members; St. Joseph Benevolent Society, seventy-six members; Knights of St. John of Nepomuk, forty-six members; St. Vincent Conference for the Poor, fifty-eight members; St. Aloysius Young Men's Benevolent Society, sixty-seven members; St. Stanislaus Young Men's Society, sixty-five members; St. Ann's Ladies' Benevolent Society, one hundred and seventy-five members; St. Ludmilla's Ladies' Benevolent Society, one hundred and fourteen members; St. Mary's Young Ladies' Society, one hundred and two members; St. Agnes Young Ladies' Society, seventy members. About five hundred families are connected with the parish, and the actual membership numbers one thousand six hundred persons, but the church is attended largely by Bohemian families beyond the limits of the parish.

St. Liborius (German) Church, Nineteenth and Monroe Streets, Rev. E. Hocynek, pastor, was erected

in 1855, at a cost of fifty thousand dollars, by Rev. Stephen Schiveihoff, founder of the parish, who died in 1869, and was succeeded by the present pastor. The church is a fine Romanesque brick structure, sixty by ninety feet, but is becoming too small for the rapidly increasing congregation, which contemplates the building of a larger and finer edifice. The parochial schools, which occupy a three-story brick building on Nineteenth Street near the church, erected in 1856, at a cost of ten thousand dollars, are under the charge of the Sisters of Notre Dame (who reside in the building) and of one secular teacher. Rev. Henry Schrage is the assistant pastor. The congregation comprises about six hundred families and thirteen hundred communicants. Fully two thousand persons attend the regular Sunday services.

St. Lawrence O'Toole's Church.—Rev. James Henry, the present pastor of St. Lawrence O'Toole's Church, was appointed on the 7th of February, 1853, assistant pastor of St. Patrick's Church, and while serving in that capacity carried on mission work in the outlying districts of the parish, which extended to the old reservoir, and which in those days were an open prairie and almost a wilderness, Seventeenth Street being then the limit of the city. In April, 1855, he was authorized by Archbishop Kenrick to organize a congregation and establish a new parish, to be taken from St. Patrick's, and to be known as St. Lawrence O'Toole's. A lot, eighty-four feet three inches by one hundred and twenty-five feet, at the northwest corner of O'Fallon and Fourteenth Streets, was presented for the purpose by Miss Jane Graham, a member of the Mullanphy family, and upon this site a church thirty-eight by eighty-six feet was erected and dedicated Dec. 16, 1855. Mrs. Jane Chambers, only surviving child of John Mullanphy, gave an additional lot in the rear of the church lot, thirty-five feet on O'Fallon Street by eighty-four feet three inches in depth, on which was erected a building (still occupied), twenty-nine by seventy-four feet, for the parochial school, which was opened under the charge of the Sisters of St. Joseph in 1858. Father Henry slept in the basement of the church, in a small space, hardly to be called a room, under the bell-tower, considerably exposed to the elements. The tower was open, and the boys of the neighborhood were much addicted to ringing it at night, startling good Father Henry and the whole neighborhood with false alarms of fire.

In 1864 the church lot was exchanged for the one now occupied on the southwest corner of Fourteenth and O'Fallon Streets, and the old church was demolished and its materials used in the construction of a new edifice. The corner-stone was laid by Archbishop

Kenrick on the 31st of January, 1864, and the occasion was made memorable by the presence of Gen. Rosecrans, who had just been appointed to the command of the Department of the Missouri, and who, in the presence of the ten thousand spectators assembled, knelt down to receive the archbishop's blessing. The building had progressed to the roofing, when it was entirely destroyed by a cyclone. Work was at once begun anew, and the completed structure was consecrated by Archbishop Kenrick in the summer of 1865. Its dimensions are seventy-five by one hundred and fifty feet, and it has held two thousand five hundred persons sitting and standing. The main altar, of white, blue-veined marble, beautiful in itself, is still further embellished by three medallions of white marble (executed by a sculptor who accompanied Maximilian to Mexico), the central one of which is the head of Christ crowned with thorns in high relief, and deserving to rank among the most exquisite gems of modern art. There are two altars, one on each side of the main altar, and similar to it in style and material, both of which were erected by Mrs. Hudson as memorials of her husband, Thomas B. Hudson, and of her niece, Lizzie Hudson Thatcher. A fourth altar, dedicated to St. Joseph, was also a gift of Mrs. Hudson. The size of the present church lot is one hundred by one hundred and eighty-six feet, and on the rear portion, adjoining the church, stands a commodious parsonage. Another lot, eighty-two by one hundred and twenty-five feet, on Fourteenth Street near Biddle, is owned by the church, and upon it a new parochial school, sixty by one hundred feet, is in course of construction. The parish contains a population of thirty thousand, of which five thousand are connected with this church. Its Sunday-school is attended by thirty-five teachers and eleven hundred scholars, and the parochial school has seven teachers and four hundred and fifty pupils. Connected with the church are a number of religious and benevolent societies.

St. Malachy's Church.—The congregation of St. Malachy's Church, southwest corner of Clark and Summit Avenues, Rev. Charles Zeigler, pastor, was organized on the 30th of October, 1859, by Rev. John O'Sullivan, its first pastor, who received his appointment Oct. 23, 1858, and was succeeded by Rev. M. W. Tobyn, April 26, 1862, and by the present pastor Oct. 20, 1869. The corner-stone of the church was laid Oct. 24, 1858, and it was occupied Oct. 22, 1859, and dedicated Sept. 2, 1860. It is English Gothic in style, and built of brick and stone, with fifty-five feet frontage on Clark Avenue by one hundred and twenty feet in depth. The interior, richly

frescoed, is of very imposing appearance, the vaulted roof being supported by a double row of fluted columns. The church lot measures one hundred and thirty by one hundred and sixty feet, and contains, adjoining the church on Clark Avenue, the parochial school for boys, a two-story brick building, fifty by one hundred and twenty-nine feet, with a seating capacity of six hundred. The school is under the charge of the Christian Brothers, and has six teachers and four hundred pupils. The parochial school for girls is conducted in St. Philomena's Orphan Asylum and School, opposite the church, and is attended by four teachers (Sisters of Charity) and three hundred scholars. The schools are supported by voluntary contributions, and the tuition is free. The societies connected with the congregation are St. Malachy's Total Abstinence and Benevolent Society, organized in 1870, now numbering one hundred and thirty-two members; St. Vincent de Paul Society, organized in 1864, fifty-seven members; Young Men's Sodality, sixty-two members; Boys' Sodality, eighty-three members; and eight other exclusively religious associations. About six hundred families are connected with the church, the actual membership, largely composed of single men, numbering five thousand. The Sunday-school is attended by twenty-seven teachers and nearly eight hundred scholars. Rev. M. S. Brennan is assistant pastor.

Church of St. John the Evangelist.—The corner-stone of the first church of St. John the Evangelist, at the corner of Sixteenth and Chestnut Streets, was laid on the 22d of August, 1847, Father Timon officiating. On the 2d of February, 1859, the construction of a new church was begun, and on the 1st of May following the corner-stone was laid by Archbishop Kenrick. The building was completed in October, 1860, and was dedicated on the first Sunday of the following month. Its architecture is of the Romanesque order, and its dimensions sixty-six and a half by one hundred and thirteen feet. The height of the structure is sixty-four and a half feet, and the front is flanked by two towers of five stories, fifteen feet square, rising to a height of about one hundred feet. The interior was frescoed by Mr. Hoffman with scenes from the Apocalypse, and is otherwise richly adorned. The parochial residence adjoins the church on the east. Bishop Ryan was pastor of the church for some time prior to his consecration, and still preaches in it frequently. The regular pastor, Rev. John J. Hennessey, has for assistants Revs. M. J. Gleeson and Francis Jones. The parochial schools are situated at the southeast corner of Sixteenth and Walnut Streets, in a three-story brick building, with

accommodations for seven hundred scholars, and are conducted by the Christian Brothers and the Sisters of St. Joseph. The building, which stands on a lot valued at ten thousand dollars, was erected in 1874, at a cost of twenty-seven thousand dollars. The parish is one of the most numerous in the city, containing about eighteen hundred families, or nearly nine thousand persons. Six hundred children attend the Sunday-school.

Annunciation Church.—Annunciation parish was organized in 1859 by Rev. (now Bishop) Patrick J. Ryan, by whose personal exertions the funds for the erection of a church were raised. The corner-stone of the structure, which is one of the finest in the city, was laid Nov. 27, 1859, and the building was dedicated Sunday, Dec. 16, 1860. The exercises on this occasion were conducted by Archbishop Kenrick, assisted by Bishop Juncker, of Alton, Ill. The dedicatory sermon was delivered by Father Ryan. The dimensions of the church, which is situated at the northwest corner of Sixth and Labadie Streets, are sixty by one hundred and thirty-six feet, and the total cost was about one hundred thousand dollars. Its architecture is of the Roman order, and the appearance of the building is massive and imposing. The interior is richly frescoed and adorned by costly paintings, one of which, the "Marriage of Joseph and Mary," was presented by Louis XVIII. of France to Bishop Dubourg in 1818. A colonnade of Corinthian pillars supports the arched roof, and the altars, three in number, are of the purest Italian marble and very costly. The successive pastors of the church have been Revs. P. J. Ryan, David S. Phelan, and the present pastor, Rev. Philip J. Brady, who is assisted by Rev. David J. Dougherty. The Annunciation Free School for boys is conducted under charge of the Christian Brothers in a two-story brick building on the southeast corner of Sixth Street and Chouteau Avenue (nearly opposite the church). The girls' free school is conducted by the ladies of the Sacred Heart in their convent near by. There are about five hundred families or fourteen hundred persons in the parish, two hundred and ten communicants and over three hundred children in the Sunday-school. Identified with this church there are two benevolent societies, three purely religious societies, an orphan association, two temperance organizations, and the St. Vincent de Paul Society, a benevolent organization.

Church of the Assumption.—The parish of the Assumption was organized in 1862 by Rev. Bernard O'Reilly, and the corner-stone of the present Church of the Assumption, at the northwest corner of Sidney

and Eighth Streets, was laid early in May, 1862. The dimensions of the building are forty by one hundred feet, and its cost was about nine thousand dollars. The architect was Robert S. Mitchell. Rev. Bernard O'Reilly was succeeded in the pastorate by Rev. F. O'Reardon in 1864; Rev. F. Kavanaugh, 1866; Rev. James Fox, 1868; Rev. Edward Shea, 1870; and Rev. C. A. Smith, the present pastor, in 1873. The church property has a front on Sidney Street of one hundred feet, on which are erected the church edifice, the parsonage, and the parochial school. It is valued at thirty thousand dollars. The school is taught by the Ursuline nuns, and has an average attendance of three hundred pupils. The congregation numbers fifteen hundred persons, an increase of five hundred in the last three years. Connected with it are two societies, both organized by the present pastor,—the St. Vincent de Paul (charitable and benevolent), organized in 1873, present membership, twenty-five; and Branch No. 169 of the Catholic Knights of America, organized in 1880, and now numbering seventy members.

Church of St. Anthony of Padua.—On the 5th of February, 1863, the Franciscan Fathers or Friars Minor, called Recollects, organized the parish of St. Anthony of Padua, in connection with their monastery in the suburbs of St. Louis, near the Workhouse Station, Iron Mountain Railroad. Divine service was held at first in a frame house belonging to John Whitnell, who presented to the order the ground upon which their buildings now stand. The monastery was completed and services held in its chapel Aug. 2, 1863. The corner-stone of the present church, at Meramec Street and Kansas Avenue, was laid by Archbishop Kenrick, April 10, 1864, and that part of the church which is now used as the sanctuary and oratory of the monastery was completed June 24, 1865, and services were thenceforth held in it until the main church was built and consecrated, Oct. 10, 1869, the rite of consecration being performed, in the absence and with the consent of Archbishop Kenrick, by Right Rev. John J. Hogan, Bishop of St. Joseph, Mo., assisted by Father Kilian, Provisional Superior of the Order of Franciscan Fathers. The building was erected at a cost of fifty-six thousand dollars, and its external dimensions are: Length, one hundred and forty-three feet; width, forty-five feet. Internal: auditorium, length, one hundred and five feet; width, forty-five feet; height, fifty feet. Sanctuary, length, thirty-eight feet; width, thirty feet; height, forty-three feet.

The pastors, with the dates of their appointment, have been Rev. Servatius Altmicks, O.S.F., who or-

ganized the parish Feb. 5, 1863, and who is now superior of the Indian Mission at Keshina, Wis.; Rev. Alardus Andrescheck, O.S.F., Dec. 5, 1869; Rev. Ferdinand Bergmeyer, O.S.F., Sept. 2, 1871; Rev. Vincent Halfas, O.S.F., Jan. 14, 1877; and the present rector, Rev. Liborius Schaefermeyer, appointed July 2, 1879. The church building (including the steeple) is of stone, in pure Gothic style, and is one of the largest and handsomest church edifices in the city. The parochial school for boys was established when the parish was organized, but the building in which it is now held was not completed until 1870. The parochial school for girls is at present conducted by the ladies of the Sacred Heart, Maryville. In 1872 the monastery adjoining the church was enlarged and made a theological seminary for the students of the order. The number of students varies from twenty to thirty, the number of priests from fifteen to twenty, including such students as towards the close of their studies are ordained, although not invested with full priestly functions, and there are about ten lay brothers. Since 1879 this monastery has been the ordinary residence of the Superior Provincial of the newly-formed Franciscan province of "The Sacred Heart of Jesus" in the United States, comprising about one hundred priests in the various monasteries and residences of the Western States and the Indian missions in Wisconsin. The present provincial is the Very Rev. Vincent Halfas, O.S.F. The Fathers of this monastery perform divine service and attend to spiritual wants for the novitiate of the Christian Brothers, the convent and academy of the Sisters of St. Joseph in South St. Louis and at Nazareth, and the convent of the Sacred Heart, Maryville, as well as for the Catholic inmates of the various city institutions, the sick at the Marine Hospital, etc. They also furnish retreats to various other religious societies, and missions to Catholic congregations in several parts of the United States. Connected with the congregation are the following societies: Society of the Sacred Heart of Jesus, for boys and girls who have made their first communion; St. Aloysius' Young Men's Society, St. Clare's Young Ladies' Society, St. Mary's Ladies' Society, St. Anthony's Men's Society, and St. Anthony's Orphan Society. There are over three hundred families and nine hundred communicants in the parish, and about one hundred children attend the Sunday-school.

St. Elizabeth's Church, for colored people, is situated at the corner of Fifteenth and Gay Streets, and the pastor is the Rev. Ignatius Panken, S.J. The building, which is a small Gothic structure of brick,

was erected about 1849, by the Southern Methodists, and was known as Asbury Chapel. It was sold in December, 1864, to the Jesuits, who devoted it to the use of the colored Catholics. The building was renovated and refitted, and will now seat about three hundred persons. The pastor resides at St. Louis University, but devotes his whole time to the duties of his parish and its schools. About eight hundred persons compose the congregation, and all attend the Sunday services with considerable regularity.

St. Teresa's Church, Grand Avenue, between North Market and Summer Streets, Rev. W. H. Brantner, pastor, was organized in October, 1865, by Rev. F. P. Gallagher, its first pastor, who was appointed Oct. 1, 1865, with Rev. E. J. Fitzpatrick as assistant. The corner-stone was laid on the 14th of May, 1865, and the building was dedicated Sept. 23, 1866. It was thirty-two by sixty-five feet in size, and had a capacity of three hundred sittings. An addition, forty-eight by sixty-five feet, was subsequently built, and dedicated Dec. 22, 1878, raising the seating capacity to seven hundred. The building is of brick, in the Byzantine style, and the church lot is two hundred and thirty-six by three hundred and fifteen feet. The church property is valued at fifty thousand dollars. Father Brantner succeeded the first pastor Sept. 1, 1875. On the 1st of August, 1876, the congregation was incorporated under the laws of Missouri as "St. Teresa's Roman Catholic Parish Association," with nine trustees. The societies connected with the church are the St. Teresa's Conference; St. Vincent de Paul Society, organized in 1868, and now numbering forty members; Young Ladies' Sodality of the Blessed Virgin Mary, organized Dec. 8, 1881, ninety members; Holy Name Society, organized May, 1879, sixty-five members; Married Ladies' Sodality, organized Feb. 2, 1882, forty-two members; Confraternity of the Holy Rosary, organized Oct. 1, 1875, one hundred and seventy members; Confraternity of the Sacred Heart, organized June 1, 1878, one hundred and eighty members; St. Teresa's Branch, No. 99, Catholic Knights of America, organized Dec. 1, 1879, one hundred and thirty-one members; St. Teresa's Council, No. 7, Knights of Father Mathew of Missouri, organized Aug. 10, 1881, seventy-five members; St. Teresa's Altar Society, for providing all things pertaining to the altar and sanctuary, organized November, 1875, two hundred members; St. Teresa's Purgatorian Association, organized Nov. 2, 1875, one hundred and fifty members. The parochial school was organized in 1870, and is conducted by four teachers. It is located in a building, thirty-

five by seventy feet, which is situated in the rear of the church, and which accommodates three hundred pupils, the number now attending the school. Since the organization of this parish four other parishes have been formed within its boundaries,—St. Augustine's (German), Church of the Holy Ghost (German), St. Alphonsus' (Redemptorist), and Church of the Visitation. The present boundaries of St. Teresa's parish are from Natural Bridge road and Salisbury Street on the north to Lucas and Easton Avenues on the south, and from Jefferson and Garrison Avenues on the east to Goode Avenue on the west. On the 15th of October, 1882, the church celebrated the tri-centenary of the death of St. Teresa, its patroness, in the presence of a vast concourse of Catholics from all parts of the city. About two hundred and sixty families are connected with the congregation, and the Sunday-school is attended by twenty-one teachers and four hundred and fifteen children. The present officers of the board of trustees are Hon. Henry F. Harrington, president; John L. Zwart, secretary; John Staunton, treasurer. They reported \$6923.45 as the amount of church collections for 1882, and a church debt of \$9245.85.

Church of the Holy Angels.—The congregation of the Church of the Holy Angels, St. Ange Avenue, between Chouteau Avenue and La Salle Street, Rev. Francis M. Keilty, pastor, was organized by Rev. M. Welby, its first pastor, under direction of Archbishop Kenrick, in 1866. The corner-stone was laid on the 1st of July, 1866, and the building was dedicated by Archbishop Kenrick on the 1st of January, 1867. It is a neat brick structure of Gothic architecture, and will seat four hundred and fifty persons. The dimensions of the church lot are one hundred and eighty-nine feet eight inches by one hundred and thirty-six feet. The congregation numbers about thirteen hundred persons, and the Sunday-school is attended by twelve teachers and one hundred and eighty scholars. No parochial school has as yet been established in the parish.

St. Nicholas Church.—The corner-stone of St. Nicholas (German) Church, northeast corner of Twentieth Street and Lucas Avenue, Rev. Joseph J. Schaefer, pastor, was laid by Archbishop Kenrick on the 29th of April, 1866, and the building was dedicated on the 19th of May, 1867, in the presence of an immense concourse of people, including the different Catholic societies in regalia. The architecture of the church is in the early English Gothic style, and the building is of brick, its dimensions being eighty by one hundred and forty feet. From a tower one hundred and thirty feet high rises a spire to an altitude

of one hundred feet. The interior is divided into a nave and aisles by a series of clustered columns, from which spring moulded Gothic arches, and is beautifully finished. The architects were Mitchell & Deslonne. The building and ground are valued at one hundred and ten thousand dollars. The parochial schools are located on Christy Avenue, between Twentieth and Twenty-first Streets, in a brick building of two stories and basement, which, with the grounds, cost twenty-four thousand dollars, and are under the charge of the Sisters of St. Joseph, who live in the building, and a secular teacher. Rev. Charles Brockmeier is assistant pastor. The congregation numbers about four hundred families, or two thousand persons, and three hundred and fifty children attend the Sunday-school.

St. Alphonsus Church, Grand Avenue, between Finney and Cook Avenues, Rev. Michael Müller, pastor, is one of the stateliest and most imposing buildings in the city. It was erected under the direction and is still in charge of the Redemptorist Fathers, by one of whom, Father Louis Dold, the original plans for the structure were prepared. Subsequently these plans were modified by the architect, Thomas Walsh. The corner-stone was laid Nov. 3, 1867, by Very Rev. Joseph Melcher, vicar-general of the archdiocese of St. Louis, and the building was first occupied, although in an unfinished condition, Nov. 30, 1868. About this time Rev. L. Dold, its first rector, with three lay brothers, removed from the Cathedral, of which they had charge since 1861, and occupied temporary residences which had been erected on the site. On the 4th of August, 1872, the church was dedicated by Bishop Ryan, in the presence of many priests and an immense concourse of people from all parts of the city and surrounding country. It remained a mission church until Sept. 1, 1881, when it was erected into a parish by Most Rev. Archbishop Kenrick. Its pastors have been Revs. L. Dold, E. Grimm, W. Meredith, and (since July, 1880) Michael Müller. The ground on which it stands fronts three hundred and eighty-nine feet on the east side of Grand Avenue, with a depth of four hundred and thirty feet on Cook Avenue, and three hundred and ninety-six feet on Finney Avenue. The building is eighty feet in width, and one hundred and eighty feet in length to the sanctuary, and has a seating capacity (including the gallery) of thirteen hundred and fifty. It is pure Gothic in style, built of rough-dressed white limestone (whence its popular name of the "Rock Church"), and above the principal entrance rises a main tower two hundred and twenty-five feet in height, flanked by two smaller towers, each

seventy-five feet in height, above the entrances to the aisles. The main entrance under the middle tower is a Gothic arch twelve feet wide and forty feet high. The church contains five altars, the most important of which are the main or high altar, under which rests the body of St. Abundius, a Roman martyr, and the altar of "Our Lady of Perpetual Help." The entire cost of the structure amounted to about two hundred thousand dollars. As soon as the mission became a parish it was determined to build a parochial school, and the corner-stone of a school building (not yet finished) was laid on the 6th of August, 1882. The building (of brick) will be fifty-nine by one hundred and twenty-nine feet, three stories in height, will contain on the lower and second floors each six rooms, twenty-two by thirty-six feet, and on the third floor a hall the full size of the building. It stands thirty feet back from Grand Avenue, and forty feet from the church, and will be one of the largest parochial schools in the city. The cost of its construction will amount to about forty thousand dollars. The school will probably be under the charge of the Christian Brothers for the boys' department, and of the Sisters of Notre Dame for that of the girls. There are now about three hundred families in the parish, and the average attendance at masses and at evening service on Sunday is about four thousand. Many of the congregation come from other parishes. The Sunday-school, of which Rev. Jos. Distler is director, is attended by twenty-four teachers and four hundred children.

THE REDEMPTORIST FATHERS, or Congregation of the Most Holy Redeemer, established a branch of their order in St. Louis in 1861. The order, founded by St. Alphonsus de Liguori in 1732, and approved by Pope Benedict XIV. Feb. 25, 1749, has for one of its principal objects the giving of retreats and the holding of missions for priests, religious communities, and the people, but in this country the members of the order have also charge of parishes and perform the work of secular priests. From Naples, where it originated, the order has spread in every direction, and has attained gigantic proportions. The first Fathers to settle in America came to this country in 1832, and established houses in Baltimore, Rochester, New York, New Orleans, Philadelphia, Pittsburgh, Chicago, etc., and in 1861, at the invitation of Archbishop Kenrick, visited St. Louis in order to hold a mission in the Cathedral. The archbishop was so well pleased with their labors that he offered them a foundation in St. Louis and requested them to take temporary charge of the Cathedral, which they did, remaining there until their removal to their own (St. Alphonsus') church. Until 1875 all the houses of

the order in the United States and Canada formed but one province, but in that year the province was divided into the Eastern and Western Provinces, with Baltimore as the residence of the provincial of the Eastern, and St. Louis of the Western Province. To the latter belong St. Louis, New Orleans, Chicago, Kansas City, and Detroit. Very Rev. Nicholas Jaeckel was the first provincial in the West, and has twice been reappointed for terms of three years each. The convent of the order stands in the rear of the church, and is a large building, having twenty-two dwelling-rooms, a library, recreation hall, refectory, kitchen, etc. Its cost was thirty thousand dollars. There are continually from ten to twelve Fathers attached to the house, and from five to six lay brothers.

St. Francis de Sales Church, northwest corner of Gravois road and Ohio Avenue, Rev. P. J. Lotz, pastor, was organized in 1867, as an offshoot from SS. Peter and Paul parish, by a number of families resident near the present location, and was for a time without a priest and struggling under the pressure of a heavy debt, which is now being gradually reduced. The property, comprising about one-fourth of the entire block, was purchased at the time of the organization of the parish, and the church was erected before a pastor had been appointed. Rev. L. Lay, the first pastor, added the pastoral residence in the rear of the church, and Rev. P. Wigger, his successor, built and organized the parochial school in 1874, which is now taught by one secular teacher and four sisters, and has three hundred scholars. The building stands north of the church, and is a fine brick structure with accommodations for three hundred and fifty pupils. The third and present pastor took charge in 1878. He enlarged the church and added to it a spire and a new slate roof, at a cost of seven thousand dollars. Rev. F. Reuther is his assistant. The parish contains about three hundred and fifty families and seven hundred communicants, and connected with the church are the St. Joseph's Benevolent Society, Society of Christian Mothers, St. Mary's Sodality for Young Men, and Young Ladies' Sodality.

St. Bonaventura's Church, devoted to the use of the Italian Catholics of St. Louis, is situated on the southeast corner of Sixth and Spruce Streets, and the pastor is the Rev. Nazareno Orfei. The building was purchased in 1871 by Vicar-General Muhlsiepen from the congregation of St. John's Protestant Episcopal Church, by whom it had been erected in 1853. At the time of its purchase there were about five thousand Italian Catholics in St. Louis. The amount paid for it by Vicar-General Muhlsiepen was fifteen thousand dollars. It is a handsome structure of brick,

forty-three by one hundred and ten feet, and after being adapted to the uses of the congregation was blessed by the vicar-general on the 21st of April, 1872. At that time Rev. John B. Salvatelli, of the Black Franciscan Brothers, was the pastor, with Rev. N. Graziani as assistant. The church did not prosper under their charge, and in 1877 the building was closed and trustees made over the property to the archbishop, who called the present pastor from New Orleans to revive the enterprise. Father Orfei arrived in St. Louis July 14, 1877, and by his exertions soon restored the activity of the church. The sum of twenty thousand dollars (in addition to the purchase-money) was expended in preparing the church for Catholic worship. The building is modeled after the Church of St. Lawrence, outside the walls of Rome, and has a seating capacity of eight hundred. Father Orfei has organized in connection with his congregation a society known as the Third Order of St. Francis, now composed of sixty members of both sexes, which meets on the last Sunday of every month at four P.M. The congregation is composed of about three thousand persons, and there are two teachers and fifty scholars in the Sunday-school. The present location of the church became unsuitable long since, owing to its remoteness from the centre of residence of the parishioners, and a removal to a more eligible site is contemplated.

Church of the Immaculate Conception.—The original Church of the Immaculate Conception stood at the corner of Eighth and Chestnut Streets. The corner-stone was laid on the 8th of December, 1854, and the church was dedicated by Archbishop Kenrick in 1855. The work of construction was conducted by Fathers Bannon and Duggan, the latter of whom was afterwards Bishop of Chicago, and subsequently by Fathers Feehan (afterwards Bishop of Nashville), Keilty, Cronin, and O'Reilly. In 1874 the congregation removed to the southeast corner of Jefferson Avenue and Locust Street, where a frame chapel capable of seating five hundred persons was erected and dedicated on the 7th of June of that year. The parish comprises about two thousand persons, and the Sunday-school is attended by two Sisters of Loretto and one hundred and seventy-five scholars.

Church of the Sacred Heart.—In 1871 a brick chapel was erected for the use of the then newly-organized Church of the Sacred Heart, at the southeast corner of University and Twentieth Streets, and was dedicated on the 28th of May, 1871, the sermon being preached by the pastor, Rev. J. J. McCabe. In 1882 the chapel was enlarged, and it is intended ultimately to build a large church of stone. The parochial

residence adjoining the church is an elegant stone structure of Gothic architecture. The parish school is located temporarily in the old Reservoir Market building, on Eighteenth Street, near Warren, and is under the charge of the Sisters of Loretto. There are about one hundred families in the parish, embracing three hundred regular communicants. The pastors are Revs. J. J. McCabe and J. M. McCabe.

Church of Our Lady of Mount Carmel.—In October, 1872, the Church of Our Lady of Mount Carmel was organized by the present pastor, Rev. D. S. Phelan, for the English-speaking Catholics of the northern portion of the city. The corner-stone of the church, which is situated on the east side of Church Street, near north city limits, was laid on the 16th of October, 1872, and the building was dedicated on the 4th of May, 1873. It is a Gothic brick structure, fifty by seventy-five feet, and stands upon a lot containing about half an acre, the property being valued at fifteen thousand dollars. The parochial school, organized in September, 1874, is conducted in a brick building thirty-five by fifty feet, situated near the church, and has two teachers and ninety scholars. There are four societies (religious or benevolent) connected with the church, having from thirty to seventy-five members each. The congregation numbers about one hundred families and four teachers, and about one hundred pupils attend the Sunday-school. Rev. William Noonan is assistant pastor, and also chaplain of Calvary Cemetery.

St. Agatha's German Church; northwest corner of Utah and Eighth Streets, Rev. William Hinssen, pastor, was dedicated by Bishop Ryan on the 14th of July, 1872, mass being celebrated by Very Rev. H. Muhlsiepen, S.J. It is a brick structure forty by one hundred feet, with two stories and basement, the first story being used as the parish school, which is conducted by four Sisters of the Precious Blood and one secular teacher, and numbers about four hundred scholars. The main auditorium on the second floor will seat about four hundred and fifty persons, and is filled every Sunday beyond its seating capacity. There are about seven hundred communicants in the parish. The church lot comprises about one-fourth of the block, and its northeastern extremity is occupied by a substantial parochial residence.

Church of Our Lady of Perpetual Succor.—The congregation of Our Lady of Perpetual Succor (Fourteenth Street and Linton Avenue, North St. Louis, Rev. A. Schilling, pastor) was organized in 1873 by forty families from Holy Trinity parish. The corner-stone of the present building was laid Oct. 6, 1873, and the church was dedicated May 17,

1874. It is a brick building, of Romanesque architecture, eighty by forty feet, with four basement-rooms, in which the parochial school is conducted by five Sisters of Notre Dame. The school was established Sept. 1, 1873, and has now two hundred and twenty-five pupils. The church has a seating capacity of five hundred, and, with the pastoral residence, is valued at thirty thousand dollars. The congregation is growing so rapidly that it is proposed to erect in a few years a second building, with a front of two hundred and sixty-three feet and a depth of one hundred and thirty-eight and a half feet, at a cost of not less than fifty thousand dollars. There are several social and benevolent societies connected with the congregation, which has increased from the original forty to one hundred and sixty families.

St. Augustine's Church (southeast corner of Twenty-second and Hebert Streets, Rev. H. V. Kalmer, pastor) is a German congregation, and was organized in 1874. The corner-stone of the building was laid Oct. 4, 1874, and the church was dedicated June 6, 1875. It is of brick, forty-seven by eighty-five feet, with two stories and a basement, the latter being used as a play-room for the pupils of the parochial school, which is conducted in four class-rooms on the first floor. The school was organized in September, 1875, with seventy-five pupils, and now numbers two hundred pupils, under the charge of three Sisters of the Precious Blood and one secular teacher. A two-story brick parsonage, eighteen by thirty-two feet, was built in 1875. The church property measures three hundred and seventy-five feet on the south side of Hebert Street. The first pastor was Rev. H. Jaegering, who was succeeded by Father Kalmer June 15, 1881. Connected with the congregation, which numbers about six hundred persons, are the St. Augustine's Benevolent Society (organized 1880), Orphan Association (organized 1882), St. Aloysius Society (organized 1875), Ladies' Altar Association (organized 1876), Young Men's Sodality (organized 1876), and Ladies' Sodality (organized 1876). There is no Sunday-school conducted by the church.

St. Kevin's Church.—The congregation of St. Kevin's Church, Compton Avenue and Sarah Street, Rev. Edward J. Shea, pastor, was organized in January, 1876, by Rev. P. L. McEvoy, its first pastor, who was succeeded by the present incumbent, Aug. 1, 1879. The church owns five lots, with a total front of one hundred and twenty-five feet by one hundred and twenty-five feet in depth. The church building is eighty by forty feet, and has a seating capacity of three hundred and twenty. The parochial school building is a two-story structure, has five large class-

rooms, and can seat three hundred and fifty scholars. The school, established at the organization of the parish, is under the care of the Sisters of Loretto, and has four teachers and one hundred and sixty pupils. The Sunday-school is attended by seven teachers and two hundred scholars. The value of the entire church property is estimated at twelve thousand dollars. There are one hundred and fifty families, or about six hundred persons, in the parish, and five hundred communicants.

The Church of the Holy Name, Grand Avenue near Fourteenth Street, Rev. Thomas Bonacum, pastor, was established about 1876 by Rev. P. J. Gleason, its first pastor, mainly with a congregation that had some years before been organized by the Jesuits as St. Thomas' Church, and had had a house of worship on O'Fallon Avenue, but had dispersed. The church is a Gothic brick structure, sixty by one hundred and thirty feet, and will seat one thousand persons. The church lot is two hundred by one hundred and fifty feet, and on it is situated a commodious parochial residence of two stories and basement, comprising eight rooms. The total cost of the ground and buildings was about twenty-seven thousand dollars. About three hundred families are connected with the congregation, and two hundred and twenty-five children attend the Sunday-school. No parish school has yet been organized. Rev. George A. Watson is assistant pastor.

St. Stanislaus Kostka (Polish) Church, Twenty-third Street, between Cass Avenue and O'Fallon Streets, is the first Polish congregation in the city. It was organized in St. Joseph's Church in 1879, and worshiped in the basement of St. Patrick's School until the erection of the present building, which was consecrated by Bishop Ryan on Sunday, Nov. 12, 1882. It cost thirteen thousand dollars, and has a front of seventy-five feet. The first floor is occupied by school-rooms, the church services being held on the second floor. Adjoining the church is the parochial residence. The congregation numbers one hundred and forty families, besides a number of unmarried persons.

St. Thomas Aquinas is a new parish, the forty-fifth organized by Catholics in St. Louis. The congregation worshiped for some time in St. Joseph's Chapel, Alexian Brothers' Hospital, but on Sunday, Oct. 8, 1882, the corner-stone of a church was laid at the northwest corner of Osage Street and Iowa Avenue, in the presence of an immense assemblage. The building is of Gothic architecture, and its dimensions are forty-two by seventy-five feet.

St. Boniface (German) Church, Carondelet.—

The corner-stone of St. Boniface (German) Church, on Fourth Street near Schirmer, Carondelet, was laid on the first Sunday in September, 1860, by the Bishop of Minnesota, attended by Father Ryan, of the Cathedral, and Vicar-General Muhlsiepen. There were also present Rev. J. Gamber, pastor, Rev. T. Hendericx, pastor of the English congregation of Carondelet, Father Smarius, S.J., Rev. F. Bruhl, S.J., Rev. F. Tobin, and Father Meester, S.J. Addresses were delivered by Fathers Smarius and Bruhl. The church is in the Romanesque style of architecture, one hundred and twenty-five by twenty-six feet, with two towers each one hundred feet high, and its estimated cost was sixteen thousand dollars. The architect was Thomas W. Brady. About three hundred and fifty families (seventeen hundred and fifty persons) are connected with the church.

St. Mary's and St. Joseph's Church is situated on Third Street near Kansas, Carondelet, and the pastor is Rev. Thomas G. Daley, his assistant being Rev. W. T. Stackast. The corner-stone was laid on the 29th of May, 1859, and the sermon was preached by Father (afterwards bishop) Ryan, of the Cathedral. There are about two hundred families in the parish, and the parochial schools, numbering about three hundred and fifty pupils, are conducted by the Christian Brothers and the Sisters of St. Joseph.

St. Columbkille's Church was organized in 1872, at Fourth and Davis Streets. The corner-stone was laid June 23, 1872, and the church was dedicated in February, 1873. Rev. M. O'Reilly has had charge of the church since its organization.

There are a number of suburban Roman Catholic Churches in the vicinity of St. Louis, the principal being St. James', Cheltenham, Rev. T. A. Butler, pastor; Holy Cross, near Calvary Cemetery, Rev. Hermann Wigger, pastor; Holy Ghost, Ellearsville, Rev. M. Busch, pastor; St. Bernard's, Tesson near Sarpy Avenue, Rev. Henry Willenbrink, pastor; Our Lady of the Visitation, southwest corner St. Charles Rock road and Taylor Avenue; and St. Gornan's, at the junction of the Manchester and Chouteau Avenue Rock road.

In addition to the parish churches enumerated there are a number of chapels, which are attended as follows: Christian Brothers, attended from the Cathedral; Sisters of Charity, Father Wachter, chaplain; St. Joseph's Chapel, Alexian Brothers Hospital, Rev. George A. Watson; Ursuline Convent, Very Rev. H. Muhlsiepen, V. G.; Sacred Heart Convent, Fifth Street, from Annunciation Church; Convent of the Visitation, from St. Bridget's Church; Loretto Convent, from St. John's; Good Shepherd Convent, by

the Jesuit Fathers; Male Orphan Asylum, from Holy Angels' Church; German Orphan Asylum, from St. Joseph's; Carmelite Convent, from Mount Carmel; Notre Dame Convent, from SS. Peter and Paul; St. Joseph's Convent, from St. Columbkille's; Sacred Heart Convent, Maryville, by Franciscan Fathers; Widows' Home, from St. Lawrence O'Toole; Female Orphan Asylum, by Jesuit Fathers; Little Sisters of the Poor, from the Church of the Sacred Heart; St. Vincent's Institute, by the Lazarist Fathers; Half-Orphan Asylum, by Jesuit Fathers; House of the Angel Guardian, by Lazarist Fathers; Sisters of Mercy, by Jesuit Fathers.

BAPTIST CHURCHES.

The First Protestant Congregation.—To the Baptists belongs the credit of having organized the first Protestant society and of having built the first Protestant house of worship west of the Mississippi River. The first Baptist minister who preached in Missouri appears to have been the Rev. John Clark. This pioneer preacher was born in the parish of Petty, near the city of Inverness, Scotland, Nov. 29, 1758. His father worked a small farm, which, later in life, having become intemperate, he neglected. In 1778 John Clark went to sea in a transport ship, and subsequently served in American privateers. He rose to the rank of mate, was taken prisoner, and exchanged after nineteen months' duress, was twice impressed into the British naval service, and finally escaped. After having suffered almost incredible hardships, he succeeded in passing the British lines and obtained the protection of Gen. Francis Marion, the famous Revolutionary leader in South Carolina. He again went to sea, but in 1785 abandoned this calling and engaged in teaching school in the back settlements of South Carolina. In 1786 he became a member of the Methodist denomination in Georgia, where he again taught school and became a class-leader. In 1788 he visited his birthplace in Scotland, and found all the family except one sister dead. He then studied under Wesley, returned to Georgia in 1789, was received on trial, and appointed a circuit by the Conference of 1791, and in 1793 was fully ordained. In 1795 he was ordained elder, and in 1796 dissolved his connection with the Conference and started on foot for Kentucky, and thence, always on foot, for Illinois, where he finally settled. In 1807-8 he went down the Mississippi alone in a small canoe, camping in the woods at night, on a mission to the territory now known as Louisiana, and returned home, still alone and on foot, through a country infested by hostile Indians and white marauders. During this journey he

preached wherever he found a settlement. Mr. Clark continued to labor as a missionary until his death, making during the last ten years of his life a monthly circuit of two hundred and forty miles, always on foot, though his friends made several unsuccessful attempts to induce him to accept and use a horse. He died in 1833, at the age of seventy-five, and was buried in the Cold Water neighborhood, the scene of his first missionary efforts in Missouri, where a modest gravestone marks his resting-place. Mr. Clark organized a number of Baptist congregations in St. Louis County, Mo., and in St. Clair, Madison, and Greene Counties, Ill.

Mr. Clark arrived in Missouri in 1798, and established himself near Bridgetown, St. Louis County. He became a Baptist, and a Methodist named Talbot having adopted the same opinions, they immersed each other. Mr. Clark presided and taught school in the "American Bottom," Illinois, about 1796, but afterwards removed to New Design, situated on an elevated plateau, about thirty miles above Kaskaskia. When he first came to Missouri the country west of the Mississippi was under the control of the Spanish authorities, who did not tolerate the Protestant religion. It was his custom to ascend the eastern shore to nearly opposite what was called "Wood River," and wait there until night, when a man from the western shore would cross the river in a canoe, and transport Mr. Clark to the opposite side. During the night meetings would be held at one or another of the small settlements, and Mr. Clark would return in the same manner to the eastern bank before daylight. In the latter days of Spanish rule, however, less caution was needed. Commandant Trudeau was a man of liberal mind, and while the laws required every new settler to be "*un bon Catholique*," would content himself with catechising new-comers as to their belief in the main tenets of Christianity, and these satisfactorily answered, would pronounce them "good Catholics," and admit them to citizenship. It is stated that he would pay no attention to Clark's visiting and preaching in the province until his tour for the occasion was nearly completed, when he would send him a message to the effect that if he did not leave the Spanish territory within three days he would be imprisoned, and this message, always in the same or similar language, is said to have been repeated so often that it became a pleasant jest with Clark and his friends. On one occasion Abraham Musick, a Baptist, who was well acquainted with the commandant, asked permission to have meetings held at his house by Clark. The commandant replied that his petition was contrary to the laws, and could not

be granted. "That is, I mean," said he, "you must not put a bell on your house and call it a church, nor suffer anybody to christen your children except the parish priest, but if your friends choose to meet at your house, to sing, pray, and talk about religion, you will not be molested, provided you continue, as of course you are, 'a good Catholic.'"

In 1801 the Rev. Thomas R. Musick, of Kentucky, visited his relatives in Missouri and preached a series of sermons. He was born Oct. 17, 1756, and spent his early life in North Carolina. In 1803, after the acquisition of the country from France, he came to Missouri with his family and took up his residence in St. Louis County. In 1807 he organized the Fee Fee Church in St. Louis County, among the constituent members of which were Adam Martin and his wife Mary, Richard and Jane Sullens, Thomas R. Musick and his wife Sarah. Elder Brown, from Kentucky, and John Clark labored with Mr. Musick, who died in 1842. He is buried in the church grounds at Fee Fee, and the old people who remember him still cherish his memory. Fee Fee is now the oldest Protestant Church in Missouri. Cold Water, the next church in the county, was organized by Musick in 1809.

FIRST BAPTIST CHURCH BUILDING IN MISSOURI.

During 1807 an organization of Baptists was perfected near Jackson, Cape Girardeau Co., and a church was built through the instrumentality of David Greene. The building was a one-story log cabin, the corner log of which had been laid in 1806.

Zion Church, in Howard County, was formed about 1810, near Loutre Island, Montgomery Co., but the inhabitants moved farther west in 1815, and it was reorganized. The Indians were very troublesome during the war of 1812, and no others were formed for some years. In 1818, five churches with five ministers were constituted into Mount Pleasant Association, in what was called "Boone's Lick country." Several of the leading men in this region had re-

moved from Kentucky. Col. Benjamin Cooper, afterwards a member of the Territorial Council, and chosen commander-in-chief to fight the hostile Indians, Capt. Callaway, a grandson of Daniel Boone, and Stephen and William T. Cole, in memory of whom Cooper, Callaway, and Cole Counties were named, were active and influential members of the community. A brother of Col. Cooper and Callaway and Cole, together with many other persons, were afterwards slaughtered by the Indians. In June, 1816, Bethel Association was organized at the Bethel Church, near the present site of Jackson. It comprised six churches and seven ministers. Most of the members had removed from the Carolinas, and had been several years in the country. The churches were located in Perry, Cape Girardeau, Washington, and Wayne Counties.

In November, 1817, the Missouri (now St. Louis) Baptist Association was formed, with the following as constituent churches: Fee-Fee, Cold Water, Boeuf, and Negro Fork, in St. Louis County, and Femme Osage, St. Charles Co., and Upper Cuiver, in Lincoln County, with an aggregate membership of one hundred and forty-two persons.

In 1811, Stephen Hempstead, one of the pioneers of Presbyterianism in Missouri, heard a sermon preached by a Baptist minister, the occasion being the funeral of a child. From these facts it is evident that the Baptist denomination was established in St. Louis at a very early day, and that its organization there was perfected prior to that of any other Protestant congregation. Its growth appears to have been slow at first, for when in the fall of 1817 the Rev. John M. Peck and James E. Welch, missionaries sent out by the Baptist General Convention, arrived in St. Louis, they found only seven Baptists in the village. They at once began holding services in the stone house of Joseph Robidoaux, on the east side of Main, north of Myrtle Street. In a year their congregation had increased to thirteen, just one-half of all the professed Protestants in the village. On the 18th of February, 1818, they organized the First Baptist Church, with eleven members. In 1818 the church began the building of the first Protestant house of worship erected in St. Louis, which was situated at the southwest corner of Market and Third Streets. It was never fully completed, but was occupied for worship and was also used for a time as a court-house. On the 10th of November, 1819, the Rev. Mr. Ward, an Episcopalian minister, was announced to preach the annual sermon of the Missouri Bible Society, "in the Baptist meeting-house this evening at early candle-light."

The building was forty by sixty feet, and three stories in height. It was entered in the second story from Market Street, and was the only building on the south side of Market Street from the river to Fourth Street. It cost six thousand dollars, of which sum Mr. Welch advanced twelve hundred dollars, and John Jacoby, the treasurer, six hundred dollars. In 1821 the city decided to widen Market Street, a measure which would cut off twelve by eighty feet of the church lot. The congregation endeavored to have the portion condemned assessed at a fair valuation, but did not succeed in doing so. Soon afterwards a furious hail-storm broke all the windows on the Market Street side, and the mayor would not permit the glass to be put in, because that portion of the church had been condemned as public property. The building was thereupon abandoned and sold for twelve hundred dollars, of which Mr. Jacoby's widow received six hundred dollars, and Mr. Welch six hundred dollars, half the amount loaned by him.

At a meeting held Aug. 29, 1830, Rev. J. M. Peck reported that in consequence of the death of Mr. Jacoby, one of the trustees of the church, the title had become involved, and that the city had taken to widen the streets twelve feet off the building, and, as the church was not known in law, the trustees could not recover damages. Consequently they had been left without funds to repair the building, and under these circumstances had sold the property to pay the debts. A part of the debt, however, appears to have remained, and to have assisted in the rapid decline of the society, which in 1832 was reduced to seventeen members, and in 1833 became extinct, transferring all but its debts to the Second Church, then newly organized. There are now seven white and eight colored Baptist Churches in the city, with a total membership of nearly five thousand.

In 1831 a three days' meeting was held by the Baptist Church, commencing on Friday, April 1st, aided by the Rev. J. E. Welch. Rev. John Mason Peck, D.D., who did so much to build up the Baptist Church in St. Louis, spent nearly forty years of his life in missionary work in the West, and was one of the most prominent citizens of St. Louis. He was born in the parish of Litchfield, South Farms, Conn., Oct. 31, 1789. He first united with the Congregational Church in Litchfield. In 1811 he removed to Windham, Greene Co., N. Y., and became acquainted with the Baptists through the church at that place, and Rev. H. Harvey in the adjoining town of New Durham. He united with the Baptist Church in New Durham on Sept. 14, 1811, and preached his first sermon, and was immediately licensed. In 1813

he was ordained as pastor of the Baptist Church in Catskill, but after a brief pastorate there and another at Amenia, in Dutchess County, N. Y., he accepted an agency in behalf of foreign missions, laboring under the guidance of Rev. Luther Rice. He then, 1816-17, had a year of study under Dr. Staughton, of Philadelphia. He was then appointed a missionary of the board of the Triennial Convention to labor in St. Louis and vicinity. On July 25, 1817, he set out with his wife and three children, in a covered wagon, upon the long western journey of twelve hundred miles to his field of labor, and on the 1st of December reached St. Louis. His associate, Rev. James E. Welch, had reached the field before him. In 1822, Rev. Mr. Peck became a resident of Rock Spring, Ill., and this remained his home until his death.

At Rock Spring, Dr. Peck, in connection with his missionary labors, now under the appointment of the Massachusetts Baptist Missionary Society, established a seminary for general and theological education, being aided in his enterprise to some extent by Eastern friends. The seminary was a success, and at one time contained over one hundred students. In due time the seminary became united with the one at Upper Alton, now known as Shurtleff College. In addition to his ministerial labors, Dr. Peck contributed frequently to newspapers and other periodicals, and published several works on the West.

On April 25, 1828, he began the publication of a newspaper called the *Western Pioneer and Baptist*. Aside from other labors, he also wrote "A Biography of Father Clark," "Emigrant's Guide," "Gazetteer of Illinois," "Annals of the West," and other works. He frequently visited the Eastern States in the interest of his church, and was throughout his ministerial career one of the most active and energetic of the ministers of the Baptist denomination. His publications in the East concerning the resources of the Western country attracted many persons thither, and materially aided its development. He was a recognized authority as to the local history of the Western communities, and collected a great mass of material, much of which was subsequently destroyed by fire. Some of it was left at his death in such a fragmentary condition that it could not be utilized. He died at Rock Spring, Ill., March 24, 1857, in the sixty-eighth year of his age.

The Rev. James Eley Welch, Dr. Peck's colleague, was born near Lexington, Ky., Feb. 28, 1789. In October, 1810, he was baptized by Rev. Jeremiah Vardeman, and taken into the fellowship of the Baptist Church at Davis' Fork. In 1815 he entered the

ministry, and in the following year studied theology with Rev. Dr. William Staughton, of Philadelphia, and acted as pastor of the church in Burlington, N. J., where he was eminently successful. In 1817 he tendered his services to the Board of Missions at Philadelphia, and in May of that year they were accepted as a missionary to St. Louis, Mo. He reached his destination after more than two months' travel. St. Louis then contained about fifteen hundred inhabitants. The only paved sidewalk at that time was on Main, between Chestnut and Market Streets. The pavement was of brick. The only house west of Fifth Street was Judge Lucas', on the spot where the First Presbyterian Church on Fourteenth Street now stands. The old First Presbyterian Church then stood on the ground where Philharmonic Hall was afterwards situated, on the corner of Washington Avenue and Fourth Street. The whole square was offered in 1818 to Mr. Welch by the owner, Mr. Conner, for one hundred dollars. On the southeast corner of Chestnut and Fourth Streets a small frame building was standing, which, with the lot, was offered for two hundred dollars. Mr. Welch commenced his missionary work by erecting, in 1818, a brick meeting-house at the corner of Third and Market Streets, on the site of the St. Clair Hotel, which was opened for service in July, 1819, but after three years of laborious struggles and varied success the board discontinued the mission, and Mr. Welch returned to Burlington, N. J. For more than twenty years he was agent for the American Sunday-School Union. He removed from Burlington in September, 1848, to Warren County, Mo., where he labored constantly for the promotion of the interests of the Baptist Church until 1875, when he settled at Warrensburg, Mo. In 1876 he revisited his old home in Burlington, N. J., and on the 18th of July, while with an excursion party of Baptists at the sea-shore, he was seized with apoplexy, which ended a long and useful life.

The Baptist Headquarters, St. Louis Branch House and General Depository of the American Baptist Publication Society, 1109 Olive Street, Lewis E. Kline, manager, is one of the most flourishing institutions of its type in the country. The St. Louis Baptists having paid to the General Publication Society \$5000 towards the purpose, the St. Louis Branch was opened about Nov. 1, 1868, with Rev. G. J. Johnson, D.D. (for five years previously Western agent of the society), as manager. It was located at 209 North Sixth Street, and proved successful from the start. During the first four months the sales amounted to \$2356.38, and in the following year to \$24,373.-

Lewis E. Klind.

75; in 1870-71 to \$32,562.83; 1871-72, \$32,920.96; 1872-73, \$30,851.53. In 1873-74 (being the jubilee, or fiftieth year of the society) the sales were the largest ever known, aggregating \$36,140.72. In ten years the sales have amounted to over \$300,000, and the grants for publications alone that have passed through this branch amount to over \$25,000. This branch is the centre and headquarters of a district, and the district, churches and individuals, have contributed over \$50,000 (to which the parent society has added \$50,000) towards the benevolent and missionary work of the association, colportage, and Sunday-schools. The branch has supported as many as twenty-five colporteurs and Sunday-school missionaries at one time. Dr. Johnson resigned Jan. 1, 1876, and

was succeeded as manager of the branch by Lewis E. Kline, a son of Rev. Peter Kline, who had been for seven years his chief clerk and book-keeper.¹ On the 1st of May, 1882, the branch was removed to its present location, in what was formerly known as "Dorris Row," having leased the entire three-story building. The ground-floor is occupied by the branch and depository, and is elegantly furnished in

AMERICAN BAPTIST PUBLICATION SOCIETY.

unpainted Arkansas yellow-pine, highly polished, the carvings being inlaid with blue. On the second floor are the offices of *The Central Baptist* newspaper, Ford's *Christian Repository*, and Rev. S. W. Marston, secretary of the Home Missionary Society for the West. The rooms on the third floor are occupied by the Baptist Ministers' Conference, which meets every Monday morning at eleven o'clock, the Ladies' Missionary Society, etc.

Lewis E. Kline is known in St. Louis and through-

out the Southwest as the manager and district secretary of the American Baptist Publication Society.² He was born in Washington, Ill., March 18, 1843, and is of German descent, his parents having been born in Wiesbaden, Prussia. They arrived in St. Louis about 1833. The residence in Washington was only temporary, and three weeks after his birth his parents returned to St. Louis, so that Mr. Kline has practically been a lifelong resident of the city. At the age of seventeen, being of a delicate constitution, he was sent in company with an older brother to the country, and placed upon a farm, in the hope that his health might be improved. To the two brothers was committed the sole management of the property; and the novelty of the life, the laborious occupation, and the invigorating air transformed the puny stripling into the strong and hardy man. He was nineteen years of age when the civil war began, and becoming restless amid the excitements of the day, he returned to St. Louis, and during that year (1862) enlisted in the Merchants' Regiment, the Thirty-third Missouri Volunteer Infantry, Col. Clinton B. Fisk commanding, with which he served two years. On June 6, 1864, he was severely wounded in the right arm and shoulder, in an ambush at Fish Lake Bayou, near Lake Village, Ark.

Amputation of the arm was regarded as necessary by the surgeons, but he refused to submit to the operation, and after a long period of suffering he at last grew strong enough to be moved from the hospital at Memphis, Tenn., to Jefferson Barracks, St. Louis. Here he received treatment for a little over a year, and while at the Barracks, in order to occupy his mind, he served as librarian and supervising sexton of the chapel. In December, 1865, at his urgent request, he received an honorable discharge, and Drs. Pope, McDowell, and Hodgen, the best surgeons in the West, took his case in charge. They frankly told him that he was a badly-mutilated man, almost beyond the help of medical skill, and that his only hope lay in his own force of will. Without giving up hope, he submitted for two years more, twice each day, to surgical treatment, and finally saved both his life and his arm.

On his discharge from the United States service, he went with his arm in a sling from store to store and from street to street in search of employment. But no

¹ We are indebted to Mr. Kline for much valuable material in the preparation of this sketch of the Baptist denomination in St. Louis. In his "History of Missouri Baptists," R. S. Duncan accords to Mr. Kline the credit for the erection of the present headquarters, and also speaks in warm terms of his successful administration of the affairs of the depository.

² This sketch and the portrait which accompanies it are a tribute of love and esteem from the personal friends of Mr. Kline, who have known him for years, who have watched his ever-growing influence with pride, and who sympathized with him in his manly efforts to overcome well-nigh insurmountable obstacles.

one seemed desirous of having a man without the use of his right arm. He thereupon entered a commercial college, and studied telegraphy and book-keeping, at the same time seeking work.

At length, in 1866, his perseverance was rewarded with a position as cashier and book-keeper in the then largest religious publishing house and bookstore in the city. For three years he performed the various duties of his place with his left hand, with which he had learned to write, working hard by day and studying at night. He succeeded beyond his most sanguine expectations; but it was at the expense of his general health. A brief vacation in the East became a necessity, and on his return, with improved health, two places were open to him,—one a position in the Treasury Department at Washington, D. C., the other as chief clerk and book-keeper of the American Baptist Publication Society. He accepted the latter place in 1869, and was appointed manager Jan. 1, 1876. He still retains this position, and during the past six years has performed in addition the duties of district secretary of the society. His position during the last fourteen years has been one requiring unusual tact, good judgment, perseverance, and close application. Under his management the business of the house has increased with great regularity and steadiness. Although he has had the hardest field to cultivate in the interests of the Publication Society, owing to the fact that both the Northern and Southern elements of the Baptist denomination come into contact in St. Louis, and must be harmonized and conciliated, he has succeeded, without loss of principle or self-respect, in winning the confidence and esteem of all classes of his patrons.

Although the youngest manager in the service of the society, he has developed a business equaled by no other depository, and now superintends the finest building and equipments, as well as the largest trade, to be found in any of the branch establishments. His store, No. 1109 Olive Street, is the "Baptist Headquarters" not only for St. Louis, but the entire Southwest. In the management of his business his distinguishing characteristics are promptness, punctuality, systematic attention to details, scrupulous honesty, and generous treatment of all his patrons alike. In religion, Mr. Kline is a strict Baptist, having united with the Second Baptist Church in 1866, and has filled in different churches the various offices in the Sunday-school, in the church, and in the local and State boards of denominational work. He is an active member of the board of trustees of Shurtleff College, Upper Alton, Ill., in whose prosperity he is greatly interested, and whose museum he has enriched

with a most valuable collection of ancient coins and curios, gathered in his tours in this country and through Europe in 1871. In the local affairs of St. Louis he is deeply interested, and has filled with honor to himself and profit to those whom he has served the offices of secretary of various institutions and orders, and of Generalissimo in the commandery of Knights Templar.

The estimation in which he is held by his fellow Knights Templar is shown by the fact that he was presented by them with an engrossed and illuminated testimonial of rare design and great beauty, a compliment seldom bestowed upon a member of that order. Mr. Kline has also been president in the Temple of Honor, Good Templars, and Band of Hope. Benevolent institutions and enterprises have been aided by him with a liberal hand.

On his return from a vacation in Europe in 1871, Mr. Kline was married to Miss Sallic E. Mason. In domestic as in public life, he is true and upright, and his career throughout has been singularly pure and simple. Deprived in youth by ill health of the advantages of early education, he has by close study of men and books acquired a thorough training and exceptional readiness in the application of his knowledge. Mr. Kline is in the best sense of the term a self-made man, and one who, having risen from the lowest round of the ladder by his own rare determination, is both sympathetic in helping those who are working their own way up in life, and worthy of the highest confidence and regard of all who reverence honest merit and genuine success.

Fee-Fee Baptist Church is situated on the St. Charles Rock road, fourteen miles west of St. Louis, in St. Louis County. Rev. Luther Green is the pastor. Of this, the oldest Protestant organization west of the Mississippi River, the early records down to 1834 were unfortunately burned while in the possession of Rev. John M. Peck. What follows, to that date, has been mainly gathered from the memories of the original members and from Mrs. Catharine Martin, who joined the society in 1815 and is still living. The church, as heretofore stated, was organized in 1807 at the residence of one of its members, near where the first meeting-house was built, by Rev. Thomas R. Musick, with the following members: Adam and Mary Martin, Abraham, Terrell, and Prudence Musick, John, Jane, Richard, and Susan Sullens, John and Joyce Howdershell. The first house built for worship was a log cabin, situated on a lot of three acres deeded by James Richardson for church and cemetery purposes, on the old St. Charles road. It was replaced by a brick house built on the same lot

in 1828, which still stands in the midst of the old Fee-Fee Cemetery, which has been much enlarged, and which, in 1876, was conveyed to a board of trustees composed of four members of the Mizpah Presbyterian Church, four from the Bridgeton Methodist Church, and four from the Fee-Fee. The first grave was dug in 1822. The cemetery has recently been greatly improved and adorned. In 1870 the third and present house of worship was built, under the ministry of Rev. John Hickman, on a lot of five acres, situated on the St. Charles Rock road, one quarter of a mile north of the old church, and given to the congregation by Erastus Post. It is a brick structure, forty by sixty feet, with a seating capacity of three hundred and sixty, and a basement for the Sunday-school. It cost thirteen thousand dollars, and was dedicated July 24, 1870, Dr. W. Pope Yeaman preaching the sermon. The succession of pastors cannot be accurately given, but among them are named Rev. John Clark, the pioneer of Protestantism in Missouri, and Rev. John M. Peck, the first Baptist missionary to Missouri. The membership of Fee-Fee Church now numbers seventy-two, and its Sunday-school is attended by forty children.

Second Baptist Church.—This church, the parent of the Baptist congregations in St. Louis, is situated at the northwest corner of Locust and Beaumont Streets. Rev. W. W. Boyd, D.D., is the pastor. In September, 1832, the American Baptist Home Mission Society sent to St. Louis Rev. Archer B. Smith, of the District of Columbia, who obtained a room on Market Street below Second and began holding meetings. He found the society of the First Church utterly disorganized, only seventeen members remaining, six of whom obtained letters of dismissal, and, joining with six others, met Jan. 6, 1833, in the school-house of Elihu H. Shepard, on Fourth Street, opposite the court-house, and organized "The Second Baptist Church of St. Louis," so styling the new society, in order not to be saddled with the debts of the First. Among the original members were H. Budlony, C. W. Cozzens, Moses Stout, Archer B. Smith, Sarah Orme, E. Williams, Edith Kerr, M. A. Francis, Emily W. Cozzens, and others. Their number were soon after augmented by the remaining members of the First Church, who on the 10th of February, 1833, voted themselves letters of dismissal and disbanded, transferring to the new society the money and subscriptions that had been obtained for erecting a new church. Rev. William Hurley had conducted the organization of the new congregation, but Rev. Archer B. Smith was chosen pastor. He resigned and returned East in September, 1833, and Rev. W. Hurley sup-

plied the pulpit until, in March, 1835, an application was made to the Home Missionary Society for a pastor, and for aid to sustain him. In June, 1835, the society sent Rev. Thomas P. Greene, of North Carolina, who remained one year. During his pastorate a lot at the northwest corner of Morgan and Sixth Streets was purchased, on which a foundation was laid before the winter rendered further work impossible; but in the spring of 1836 the lot was sold, and in June, 1836, the society purchased the Episcopalian Church building, situated at the northwest corner of Third and Chestnut Streets, for twelve thousand dollars, the understanding being that possession was to be given within one year from the date of sale. During this interval the congregation worshiped at Shepard's school-house, but in May, 1837, it took possession of the building, which it had purchased from the Episcopalians. While services were being held in the school-house sermons were preached occasionally by the Rev. Dr. Baker.

On the 6th of August, 1839, the public were notified that the choir of the Baptist Church would give a grand sacred concert at the First Presbyterian Church on the evening of the 7th of August, the proceeds to be applied to the purchase of an organ. Rev. B. A. Brabrook, of Newton Theological Seminary, served as pastor from May, 1837, to August, 1839, resigning on account of ill health, and the pulpit was supplied by different preachers until February, 1840, when Rev. R. E. Pattison, D.D., of Providence, R. I., became pastor. At the end of the year he was recalled to his former charge, and Rev. John M. Peck, D.D., of Rock Spring, Ill., and Rev. E. Rogers, of Upper Alton, Ill., alternately supplied the pulpit. Rev. Isaac Taylor Hinton, of Chicago, Ill., was pastor from July, 1841, to December, 1844. Under his ministrations the church grew so rapidly that in 1842 the seating capacity of the building was nearly doubled by throwing a portion of the vestibule into the audience-room and erecting galleries. During Mr. Hinton's pastorate one hundred persons were added to the membership by baptism, and nearly two hundred by letter. Mr. Hinton died of yellow fever in New Orleans in 1847, and his remains were removed to Bellefontaine Cemetery, St. Louis. He was succeeded by the Rev. Dr. Peck (supply) for one year. Rev. S. W. Lynd, D.D., of Cincinnati, Ohio, assumed the pastorate in December, 1845, and resigned December, 1848, to take charge of the Baptist Theological Institution at Covington, Ky. Rev. Dr. Peck again took charge of the church as supply, and continued to officiate until the Rev. J. B. Jeter, D.D., of Richmond, Va., assumed the pas-

torate. Dr. Jeter was called April 30, 1849, and entered upon the discharge of his duties on the first Sunday in October following. He resigned in July, 1852, and in May, 1853, the Rev. Daniel Read, D.D., of Medina, N. Y., was called to the pastorate. Dr. Read resigned in October, 1856, to become president of Shurtleff College, at Upper Alton, Ill., and was succeeded by the Rev. E. H. Page, of Massachusetts. In January and February, 1858, Elder Jacob Knapp, the famous revivalist, labored with success, and in May, 1858, the Rev. Galusha Anderson, D.D., of Zanesville, Wis., was called to the pastorate. He took charge on the second Sunday in September, 1858, and resigned in July, 1866, on account of ill health. During a portion of Dr. Anderson's pastorate the Rev. Dr. Kendrick was associated with him. Dr. Anderson's successor was the Rev. A. H. Burlingham, D.D., of New York, who took charge in December, 1866, and resigned in April, 1877, in order to become pastor of a congregation in New York City. Rev. W. W. Boyd was called to the pastorate in 1877, and commenced his ministration on the 1st of June in that year.

From the church at Third and Chestnut Streets the society removed to a second edifice erected by it on the corner of Sixth and Locust Streets, which cost, with the site, nearly forty thousand dollars, and was dedicated Aug. 13, 1848. The dimensions of the building were fifty-six by ninety feet, and the material was brick, with a cut-stone basement in front. The audience-room seated seven hundred persons, and the basement from three hundred to four hundred. On the 11th of March, 1849, in the presence of thousands of Germans, Dr. Peck baptized sixteen Hollanders, who had seceded from the Presbyterian faith. During the pastorate of Dr. G. Anderson (1858-66) great activity prevailed in the church, and one hundred and forty-nine persons were added by baptism and two hundred and ninety-seven by letter. Dr. Anderson devoted much of his time and attention to the cause of church extension. He organized the Church Extension Society in 1865, which furnished material aid in building new churches and relieving others from debt, and assisted largely in promoting the growth of Baptist congregations in St. Louis. The church record states that "he was the organizer of the Baptist forces of the city; he was their great leader, and his retirement was regretted by all." The present site of the church was selected by William M. McPherson, E. G. Obear, D. B. Gale, Thomas Pratt, and Nathan Cole, a committee chosen for the purpose. It was purchased on the 10th of July, 1872, is one hundred and eighty by one hun-

dred and thirty-five feet in area, and cost about thirty thousand dollars. Ground was broken June 19, 1873. The chapel was occupied on Christmas-day, 1874, but was not dedicated (owing to the pastor's illness) until a month later. On Dec. 17, 1877, it was decided to erect at once the main edifice, and it was nearly ready for occupancy when (Jan. 3, 1879) it was destroyed by fire. The work of rebuilding was begun at once, and the chapel was again occupied Aug. 10, 1879. In the mean time the congregation had worshiped in the Jewish synagogue, or Temple of the Gates of Truth, at Seventeenth and Pine Streets, by invitation of the rabbi, Dr. Sonnenschein. The completed edifice was dedicated Nov. 26, 1879, with services of a very interesting and impressive character. Hon. Nathan Cole, one of the deacons, presided, and Rev. George B. Taylor and Rev. Dr. J. B. Jeter conducted the preliminary service. William M. Page, another deacon of the church, then delivered an historical discourse, tracing the growth of the church up to that period, and was followed by the Rev. A. H. Burlingham, of New York, former pastor of the congregation, who described the embarrassments and difficulties which had attended the erection of the building. Dr. J. B. Jeter, of Richmond, Va., who had also been pastor of the church, Rev. George B. Taylor, of Rome, Italy, Rev. Dr. Boyd, Rev. J. F. Cook, president of Lagrange College, Rev. J. V. Schofield, D.D., and Rev. J. L. Burrows, D.D., of Cincinnati, also delivered addresses. Another session was held in the evening, at which the more formal dedication services were held. George T. Cram rendered the report of the building committee, and transferred the new church formally to the possession and control of the board of trustees.

The trust was accepted by the Hon. Nathan Cole, president of the board, who made a few remarks, in the course of which he mentioned in terms of warm commendation the munificence of Samuel C. Davis, of Boston, "who had at a critical moment come forward with a donation so liberal that it lightened their anxieties, and made easy that which seemed almost impossible." The 122d Psalm was then read by the Rev. Dr. Sawyer, after which the dedicatory sermon was preached by the Rev. John A. Broadus, D.D. The prayer of dedication was offered by the Rev. Dr. A. H. Burlingham, and the benediction was pronounced by the Rev. C. L. Goodell. The building was modeled after that of Emanuel Baptist Church, at Albany, N. Y., the architect being C. C. Nichols, of that city. The total amount expended upon it was two hundred and sixty-seven thousand eight hundred and thirty-four dollars and forty-eight

cents. The main building is seventy-one by one hundred and eight feet, and has a tower and spire two hundred feet high. The ceiling of the audience-room is fifty-two feet high. The chapel is forty-six by one hundred and sixteen feet, and contains a lecture-room,

the style is a highly ornate English Gothic. The organ was contributed, at a cost of ten thousand dollars, by Mrs. D. B. Gale as a memorial to her husband, who was for many years treasurer of the church. The organist is Professor E. M. Bowman, and the

SECOND BAPTIST CHURCH.

Sunday-school rooms, pastor's reception-room, parlors, baptistery, reading-room, etc., with a dining-room and kitchen in the basement. The material of the building is St. Louis limestone, laid up in ashlar, trimmed with Missouri gray sandstone from Warrensburg, and

singers composing the choir are among the leading musicians of the city. The present membership of the church numbers nine hundred persons, and the membership of the various Sunday-schools connected with the church numbers fifteen hundred.

Rev. W. W. Boyd, D.D., pastor of the Second Baptist Church, was born in Chemung, Chemung Co., N. Y., Nov. 22, 1843. When he was about two years old his parents removed to Saco, York Co., Me., where for many years his father was superintendent of the York Manufacturing Company, an extensive establishment for the manufacture of cotton goods. Being an extremely sensitive child, he was put under a tutor, instead of being sent to the public schools, until he was fitted to enter the High School. At the age of thirteen he was ready for college, but his health being delicate he relinquished study for several years. In 1858 he united with the First Congregational Church in Saco on profession of faith.

In 1859 his parents moved to Spring Vale, Me., and in 1861, on the death of his father, he was put in his place as superintendent of the Spring Vale Manufacturing Company. Although a youth of eighteen, he succeeded in conducting the business to the entire satisfaction of the corporation, most of the members of which resided in Boston, Mass.

To afford the operatives of the mills some opportunities for religious cultivation, he reopened a little Baptist Church in the village, long closed for want of a minister, and began on Sunday mornings to conduct a Sunday-school and read a sermon from Spurgeon or Beecher to the congregation. At their solicitation he soon began to address them in his own thoughts, and for nearly three years preached regularly both morning and evening on Sundays.

A deep religious interest was awakened, a new church was erected, and many persons asked to be baptized. He was still a Congregationalist, and felt unwilling to forsake the church of his parents, in which he had been reared, but after mature deliberation he united with the little Baptist Church, in company with thirteen others, who had been won to the faith by his sermons.

In 1866 his mother, a most estimable woman, died, and the way now being open to pursue his long-cherished desire for a collegiate education, he resigned his business position, reviewed his studies, and in 1867 entered the freshman class of Harvard College. For four years, by preaching and teaching, he succeeded in paying his expenses, and was graduated in 1871, with special honors in philosophy. In his sophomore year he received the first prize for excellence in oratory.

Immediately upon his graduation he went to Germany, spending one semester in Berlin University, one in Heidelberg, one in Göttingen, and two in Zürich, pursuing special courses in theology, Greek, and philosophy.

On his return he was appointed a proctor of Harvard College, where for a year he taught as a private tutor, continuing his special studies in Hebrew and theology.

In 1873 he was ordained pastor of the First Baptist Church of Charlestown District, Boston, Mass., in which pastorate he continued until called to St. Louis in June, 1877. His work in Charlestown resulted in the addition of nearly four hundred members to the church.

On his arrival in St. Louis he found the Second Baptist Church worshiping in a chapel, and immediately began to agitate the question of erecting the main edifice. The large increase of the congregation soon made this movement a necessity, and on Jan. 3, 1879, the magnificent building, nearly ready for occupancy, took fire from the carelessness of a workman, and with the exception of the walls was completely destroyed. On the very afternoon of the fire, while the ruins were yet burning, the building committee voted to rebuild and gave out two of the contracts, and on Nov. 26, 1879, the reconstructed edifice, free of debt, was dedicated.

In June, 1878, Shurtleff College, Upper Alton, Ill., conferred upon him the honorary degree of Doctor of Divinity. He is a trustee of Shurtleff College, and of La Grange College, La Grange, Mo., and holds many official denominational positions.

June 2, 1880, he was married to Miss Cora A. Dunham, daughter of Mr. and Mrs. John S. Dunham, of St. Louis.

Dr. Boyd's pastorate in St. Louis has been one of great and uniform success, the membership having increased from about four hundred to one thousand. He is a gentleman of great energy and executive ability, and as a pulpit orator is conceded a foremost rank among the array of able clergymen now officiating in St. Louis. His congregations are uniformly large, and, as pastor of the largest white Baptist Church in the State, no man occupies a more honorable or responsible position in the Baptist denomination of Missouri. Still a young man himself, his influence with the young is very great, and he is in the full enjoyment of all his youthful energies. Although, as a Baptist, he holds strongly to the cardinal doctrines of the faith, he manifests in matters not essential the utmost catholicity, and crosses denominational lines with the greatest freedom, if by any means he may do good. He takes an active interest in the affairs of the community, and is frequently summoned to address his fellow-citizens on matters of a public character. During his residence in St. Louis he has made a deep impression, not only upon the religious thought of the city, but also upon its intellectual life and spirit.

Sincerely Yours
W. W. Boyd

North Baptist Church.—On the 20th of July, 1842, another Baptist Church was organized in St. Louis. The council consisted of Rev. I. T. Hinton, of St. Louis; Rev. Dr. G. B. Perry, of Alton, Ill.; and Rev. J. C. Herndon, of St. Louis County. Dr. G. B. Perry delivered the sermon and charge to the church, and Rev. I. T. Hinton gave the hand of fellowship to the new body. Rev. J. C. Herndon delivered the concluding prayer. A church building was erected on what is at present Christy Avenue, and the congregation was known as the North Baptist Church. Rev. Gideon B. Perry was the pastor. He was succeeded by Elder S. H. Ford, who was followed by Elder W. F. Nelson, Professor in Covington Theological Seminary. In 1846, however, this church merged back into the Second, in view of the movement to erect a new building in the vicinity.

The First German Baptist Church, southwest corner of Fourteenth and Carr Streets, Rev. J. M. Hoefflin, pastor, was organized in January, 1850, by Elder S. H. Ford, D.D., Rev. J. B. Jeter, D.D., Rev. A. Sherwood, D.D., and Rev. John M. Peck, D.D., with nineteen members from the Second Church, the majority of whom were Hollanders, and the remainder Germans. Of these two were at once ordained to the ministry,—C. Schoemaker for the Dutch, and F. W. Glatfeld for the Germans. The church building was erected in 1863, but was not finished and dedicated until May, 1865, the congregation having had a hard struggle against debt and difficulties. It has a seating capacity of five hundred, and cost fifteen thousand dollars. Rev. Mr. Glatfeld resigned soon after his appointment, and Rev. Mr. Schoemaker preached to both Dutch and Germans until the fall of 1852. Rev. S. E. K  pfer served the church for six months in 1850, and in May, 1853, Rev. C. West became pastor. From March, 1855, until May, 1857, the church was without a pastor. In 1857, Rev. A. H  usler was appointed, but for two years subsequent to the fall of 1860 the pastorate was again vacant. Rev. J. S. Gubelmann, under whose leadership the church was built, took charge in that year, and remained until September, 1868. Rev. J. C. Haselhuhn assumed the pastorate in January, 1869, and resigned December, 1871, to take charge of the Baptist journal *Der Sendbote*; the church was then successively supplied by Revs. C. Koos, W. C. Kahe, E. Tschirch, and H. Gellert. Rev. C. Ohlgart was pastor from June, 1876, until September, 1879, and the present pastor took charge on the 1st of April, 1881. The present membership of the church numbers one hundred and forty-two persons, and it is doing extensive mission work, having two mission

stations and three Sunday-schools, with about four hundred scholars.

The Third Baptist Church, Fourteenth Street and Clark Avenue, Rev. J. P. Greene, pastor, was organized, Dec. 29, 1850, as a colony from the Second Church (then situated at the corner of Sixth and Locust Streets), whose pastor, Rev. J. B. Jeter, D.D., thought that there ought to be a Baptist Church "in the western part of the city." It is a significant fact in the history of the growth of St. Louis that when, a quarter of a century later, the Second Church decided to remove to a more central part of the city it chose a site some ten or twelve blocks west of where the Third Church planted itself and still remains at this location. At first the new colony, composed of thirty members, with Rev. Joseph Walker as pastor, met for worship in a hall on Market Street, between Centre and Thirteenth Streets, and was sustained during the first three years of its existence by the joint aid of the Southern Baptist Convention and the General Association of Missouri.

Samuel C. Davis was the first superintendent of the Sunday-school. The first baptism was performed on the evening of Feb. 7, 1851.

The second pastor was Rev. John Teasdale, who succeeded in April, 1854, after a vacancy of nine months (Rev. J. Walker having resigned to accept a call as secretary of the Board of Missions). Mr. Teasdale was a man of great earnestness and power, and was among the most regretted of the victims of the Gasconade disaster. He raised the money with which was purchased the ground on which the church now stands, and of which (besides what was purchased) about fifty feet front on Clark Avenue was given by Judge Marshall Brotherton, D. B. Gale, and Hon. W. M. McPherson. During his pastorate was built what is now the chapel, Sunday-school, etc., which was dedicated for worship Dec. 31, 1854. Rev. William Crowell became the church supply fifteen months later, and served for ten months. Rev. Washington Barnhurst became pastor in October, 1856. Failing health caused him to resign July 8, 1860, and he died April 29, 1862. Rev. Elias John Foote began to supply the church in August, 1860, and on Feb. 17, 1861, became pastor. He resigned in April, 1862. Rev. J. V. Schofield (now pastor of the Fourth Church) was called June 20, 1862. During his pastorate the present church edifice was erected. It was dedicated May 12, 1866, and cost forty-five thousand dollars. It was dedicated on the 15th of April, 1866. Its seating capacity was about eight hundred, and the lecture-room accommodated two hundred and fifty persons. Mr. Schofield resigned in

1869. Rev. W. Pope Yeaman, D.D., served as pastor from April, 1870, until October, 1876. Rev. George A. Lofton, D.D. (now pastor of Park Avenue Church), was his successor, and preached his farewell sermon July 16, 1882, in which he said, "During the less than six years of my pastorate I have attended over one hundred funerals, married one hundred and sixty couples, baptized over two hundred converts, welcomed as many into your midst by letter. When I came you were struggling with the trials of division, debt, and declension; you have paid off over ten thousand dollars indebtedness, and we have grown in every form of active development." Rev. J. P. Greene began his pastorate Nov. 1, 1882. The present membership of the church numbers five hundred, and about six hundred scholars and teachers attend the Sunday-schools, which are held morning and afternoon.

The Fourth Baptist Church is situated on Twelfth Street, between Benton and North Market Streets. Rev. J. V. Schofield is the pastor. The society had its origin in the missionary efforts of Rev. Dr. J. B. Jeter and the members of the Second Baptist Church. On the 26th of January, 1857, the members of the Second Church selected Rev. J. B. Jeter and Messrs. S. C. Davis, P. G. Camden, D. J. Hancock, and A. P. Coons as a committee to choose a missionary for the northern part of the city. In July, 1851, Rev. E. J. Owen was employed as a missionary, at a salary of seven hundred dollars per annum, two-sevenths of which he gave to the society for church-building purposes. He preached his first sermon July 3d. On the 19th of September of that year twenty-four persons withdrew from the Second Baptist Church to constitute the new society. Only sixteen were admitted, namely, Robert S., Elizabeth, and Harriet Graham, Mary Beach, Sylvanus and Margaret Harlow, Caroline Tice, Charlotte A. Boggs, Sarah Henderson, David, Martin, David L. and Emma Latour-ette, Phoebe Twigg, Nathan and Rebecca Cole.

The permanent organization was effected on the 21st of September, 1851, and was styled "Zion Baptist Church," but subsequently the name was changed to that of the Fourth Baptist Church. The constituent members of the organization were William Jones, Mr. Graham, Dr. Martin, Miss Mary Martin, Mrs. Eleonora Caymore, Dr. Claggett, Mrs. Gordon, Miss Harriett Graham, Charles Conway, Mrs. E. Conway. For the first seven years the society worshiped in Sturgeon Market. The Second Baptist Church assisted the enterprise as far as practicable, but the congregation experienced several nearly fatal financial struggles, from which it was rescued by the perseverance of the lady members of the society, in

consequence of which it was known as "the Sisters' " Church. The corner-stone of the church building was laid on the 7th of July, 1858, and the basement story was dedicated April 24, 1859. On the 1st of January, 1861, the two Sunday-schools connected with the church were consolidated, and were thenceforward known as the Benton Mission, E. D. Jones being the superintendent. The main building was dedicated on the 9th of November, 1862. The lot has a frontage of ninety feet on North Market and Benton Streets, and a side front of one hundred and thirty-five feet on Twelfth Street, and is among the lots which surround one of the three circles in North St. Louis. The dimensions of the building are seventy by eighty-five feet. The main audience-room seats six hundred persons, and the conference-room four hundred. The structure is of brick, substantially built, with a large wooden stairway leading to the audience-room in the second story.

The pastors have been Revs. Edward J. Owen, October, 1851, to March, 1855; Thomas Morton, December, 1855, to February, 1856; George Howell, for eight months from June, 1856; George Mitchell, December, 1857, to May, 1859; E. G. Taylor, for five months from October, 1860; W. B. Bolton, August, 1861; Thomas Morton, October, 1861, to May, 1862; A. C. Osborn, December, 1862, to February, 1869; D. T. Morrill, May 9, 1869, to 1875; H. M. Pogson, 1875 to 1876; J. V. Schofield, appointed November, 1876. Connected with the church are a Ladies' Aid Society, organized in 1879; Ladies' Missionary Society, organized in 1880; and a Young Ladies' Society, organized in 1881. The present membership numbers about three hundred persons. The average attendance is two hundred and fifty, of whom two-thirds are females. The Sunday-school, of which Hiram H. Post is superintendent, was formerly held in the afternoon, with an average attendance of three hundred and twenty-five. A change to morning sessions resulted in a falling off in numbers, there being now somewhat less than two hundred children, with twenty-five to thirty teachers. A regular Sunday evening collection realizes three hundred dollars. During the past five years the church has been relieved of a heavy mortgage.

The Beaumont and Bernard Streets Baptist Churches.—In 1859, Dr. Galusha Anderson, pastor of the Second Church, and the zealous promoter of church extension, established the Jefferson Mission at Twenty-fifth Street and Franklin Avenue, out of which grew the Beaumont Street Church, organized in 1866, with fifty-seven members, of whom fifty-five were dismissed for the purpose from the Second Church.

It met for several years in a chapel on the northeast corner of Morgan and Beaumont Streets. Rev. A. A. Kendrick, D.D., president of Shurtleff College, Upper Alton, Ill., was its first pastor, and under his ministry it attained a large membership. Rev. J. C. C. Clarke was the pastor two years. The congregation was without a pastor in 1876, and was soon after merged into the Second Church. The church edifice was a small one-story brick building, seventy by forty feet, and seated about five hundred persons. The building was rented on Jan. 1, 1878, to the congregation of Bethlehem Evangelical Church, and in 1879 was sold to the Turners, who now occupy it as their hall.

Bernard Street Church was organized in 1868, and occupied a small frame chapel on the southeast corner of Bernard and Emily Streets. Rev. J. C. Hickman was its pastor in 1875. The church has since ceased to exist.

Park Avenue Baptist Church is situated on the north side of Park Avenue, between Stoddard Avenue and Morton Street. Rev. George A. Lofton, D.D., is the pastor. In 1867 the Baptist Church Extension Society purchased from the Presbyterians the property now occupied by this church, and, after enlarging the building, established, in June, 1867, the Park Avenue Mission Sunday-school, with A. J. Conant as superintendent. At the end of the first year it numbered three hundred scholars. In the fall of 1868, Rev. J. M. C. Breaker, of South Carolina, began preaching, and shortly after organized the present church, with seven members from the Second Church (Messrs. A. J. Gonsalves, W. P. Hancock, E. H. E. Jameson, John W. Allen, Mrs. Allen, Miss Mary Kelley, and Mrs. Margaret W. Jameson) and five converts from the mission. Col. E. H. E. Jameson was for many years superintendent of the Sunday-school, and was subsequently licensed to preach, and supplied the Park Avenue pulpit for several years. In the spring of 1876 he was ordained and became pastor of the church, but resigned May 1, 1876. Assisted by Messrs. D. B. Gale, William M. Page, D. J. Hancock, and a few others, he kept the church alive through many seasons of trial and despondency. The Church Extension Society went out of existence before the property was paid for, and the latter was sold to D. B. Gale, who gave its use, rent free, to the society until his death, since which time it has continued to occupy it at a nominal rent. The pastorate of the church has been successively filled by the Revs. J. M. C. Breaker, George Kline, M. L. Laws, E. H. E. Jameson, J. V. Schofield (supply), D. T. Morrill, after whom, for two and a half years, the pulpit was supplied by William E.

Stephens, a lay preacher, and others until the appointment, in July, 1882, of the present pastor. The church now reports one hundred members, and the Sunday-school has sixteen officers and teachers, and an average attendance of nearly two hundred and fifty scholars. The superintendent is W. L. C. Brey, who has been connected with mission Sunday-school work since 1856, when Rev. George Kline started such a school at Soulard Market.

Carondelet Baptist Church.—The Carondelet Church is situated at the corner of Fifth and Taylor Streets, South St. Louis. Rev. G. L. Talbot is the pastor, and C. S. Purkitt is the clerk. It was organized as the First Baptist Church of Carondelet, Nov. 3, 1867, at the residence of Deacon C. S. Barrett, corner of Second and Taylor Streets, Carondelet, by Rev. Adiel Sherwood, D.D., and Rev. J. V. Schofield, D.D., of the Third Baptist Church of St. Louis, now of the Fourth Church. The organic members were C. S. Purkitt, M.D., Nathan B. Jones, Mrs. Meroe Andrews, Mrs. Charlotte P. Purkitt, and Miss Antoinette Purkitt. The corner-stone was laid in October, 1871. The building was first used July 4, 1872, and was formally dedicated Dec. 15, 1872, by Rev. Dr. Burlingham, of the Second Church, and the Rev. W. Pope Yeaman, of the Third Church of St. Louis. The pastors have been Revs. Frederick Bower, appointed April, 1868; J. H. Luther, D.D., appointed March, 1869; Thomas Hudson, appointed July, 1871; John Seage (*pro tem.*), appointed March, 1873; J. H. Breaker, appointed Nov. 2, 1873; T. J. Koetzi (*pro tem.*), appointed Sept. 15, 1875; A. F. Randall, appointed Feb. 4, 1876; E. L. Schofield, appointed Sept. 23, 1877; G. L. Talbot, appointed Jan. 1, 1882. In August, 1874, the church sent out a colony of about thirty members to form a new church called the Welsh Mission, or Second Baptist Church, which flourished for about two years and then dissolved, most of the members returning to the Carondelet Church. Connected with it are the Sunday-school, organized four or five years earlier than the church and now having nine teachers and over one hundred scholars; a Ladies' Industrial Society, organized April 1, 1869, and still flourishing and steadily increasing in usefulness; a Ladies' Foreign Missionary Society; the Baptist Literary Society, organized in December, 1877; and the Mite Society, organized in January, 1882. A Young Ladies' Pastoral Aid Society was organized Feb. 9, 1876, but only remained in existence one year. The congregation numbers about forty families, or one hundred and fifty-seven persons. In May, 1882, there were one hundred and six communicants.

Garrison Avenue Baptist Church, corner of Morgan Street and Compton Avenue, Rev. J. H. Curry, D.D., pastor, was organized March 29, 1877, with Rev. W. Pope Yeaman, D.D., as pastor, by thirty-nine members, most of whom had obtained letters of dismissal from the Third Baptist Church. Their first place of worship was on Garrison Avenue, between Lucas Avenue and Morgan Street (hence the name of the church), and in it on the 8th of April, 1877, the dedicatory services were held. In the early part of 1879 the church building was removed to its present site at a cost of five hundred dollars. Dr. Yeaman resigned the pastorate Dec. 22, 1878, to accept an appointment from the General Baptist Association of Missouri, after which the church depended upon supplies until Jan. 26, 1879, when Rev. J. C. Armstrong became the pastor. He resigned Dec. 1, 1881, to take editorial charge of the *Central Baptist*. Dr. Curry, the present pastor, who was visiting the city at the time, was invited to occupy the pulpit on the 2d of April, 1882. Two weeks later he received a unanimous call to the pastorate of the church, and resigned the charge of a flourishing congregation at Dallas, Texas, in order to accept it. The first deacons of the church were George L. Babington and William H. Curtis, chosen at the time of organization, and M. S. Clemens and John Herget, appointed later. Gabriel Long was the first clerk, and James S. McClellan, Gabriel Long, Mr. Stilwell, and Samuel V. Monks composed the first board of trustees. The Sunday-school was organized at the same time as the church, with fifteen scholars, and William H. Curtis as superintendent. It now numbers one hundred children, and the membership of the church has increased from thirty-nine to ninety.

Colored Baptist Churches.—The colored Baptists of St. Louis organized themselves into a congregation about 1833, and the establishment of their church was almost contemporaneous with that of the Second Baptist Church. They adopted the name of the First Baptist Church (the white congregation under that title having become extinct). The pastor of the Colored Baptist Church was Rev. Berry Meacham, an energetic colored man. He was formerly a slave in Virginia, and having purchased his freedom, removed to St. Louis, where he followed the occupation of cooper. He bought the freedom not only of himself, but as he prospered in business that of his wife, children, and father. In the same way he secured the liberation of fifteen slaves, who worked for him in his cooper-shop until they had paid the money thus advanced. In 1836, Berry Meacham was the owner of two brick houses in St. Louis, a

farm in Illinois, the estimated value of which was ten thousand dollars, and two steamboats.

THE FIRST AFRICAN CHURCH, Almond, between Fourth and Fifth Streets, Rev. J. R. Young, pastor, now has now a membership of six hundred and twenty-four.

THE EIGHTH STREET (OR SECOND) CHURCH is situated on the southwest corner of Eighth Street and Christy Avenue. Rev. S. P. Lewis is the pastor. On the 22d of March, 1846, Elders Richard Sneethen and J. R. Anderson commenced preaching in a hall adjoining Liberty Engine House, and in June following petitioned for letters of dismissal from the First African Church. These were granted, and on the 3d of August, 1846, the Second Church was organized with twenty-two members dismissed from the First. It was recognized by the council Oct. 24, 1847. On the 17th of June, 1851, the present lot was purchased for four thousand five hundred dollars, and the erection of the building was begun Aug. 1, 1851. The basement was first occupied in October following, and the building was completed and dedicated Aug. 22, 1852. It was enlarged by an addition of twenty-five feet, in accordance with a vote of the congregation taken Feb. 5, 1858. Its present membership is five hundred and fifty.

UNIVERSITY CHURCH.—On the 11th of December, 1867, Elder Edward Wills¹ began to preach in a small room on University Street, between Twenty-second and Twenty-third Streets, and in 1869 organized the present church at University Street and Jefferson Avenue. He continued pastor until the close of 1881, when the church became involved in legal difficulties, and sued its pastor, as trustee, for possession of the property. The church was closed during the first four months of 1882, and reports only forty-five members to the Association. The other Colored Baptist Churches are the Chambers Street Church, at the corner of Tenth and Chambers Streets, Rev. W. B. Jones, pastor, membership 160; Mount Zion Church, Papin Street, between Pratte Avenue and High Street,

¹ Edward Wills, one of the oldest preachers in St. Louis, was born of a slave mother in 1811, on the farm of Willis Wills, in Logan County, Ky. In 1836 he was removed to Virginia and hired out to work, and two years later was brought to St. Louis. In 1853 he was licensed to preach, and officiated at different times at seven different churches,—the Garrison, Concord, Cold Water, Musick's, Kirkwood, Gravois, and Belleville (Ill.). He was fully ordained in September, 1866, and organized successively the Platte Creek Church, at Fish Lake, Ill.; Elder Wills' Church, in the American Bottom; University Church, St. Louis; and others in St. Charles and Brigham, Mo. After a pastorate of fourteen years the church in St. Louis not only turned from him, but sued him for possession of the property which he held as trustee.

Rev. Lewis Lane, pastor, the membership numbering 70 persons; Antioch, Edwardsville, membership 65; Bethel, North St. Louis, membership 33; South St. Louis, Carondelet road, near River des Peres, Rev. T. Jackson, pastor, membership 54; St. Paul, Rev. C. Landers, pastor, which meets in the Jewish Synagogue, membership 43; Rock Spring, Rev. William J. Brown, pastor, membership 80; Compton Hill, Compton Avenue and Caswell Street, Rev. C. Decatur, pastor, membership 138.

METHODIST CHURCHES.

Methodism in Missouri.—Rev. John Clark was the first Methodist minister to settle in Missouri. He arrived about 1798, but soon after became a member of the Baptist denomination and organized a number of congregations under the auspices of that church. When the territory was ceded to the United States (in 1804) and restrictions on Protestantism removed, missionaries turned their attention to Missouri, and Joseph Oglesby in 1805 reconnoitred the Missouri country to the extremity of the settlements, and “had the pleasure of seeing Daniel Boone, the mighty hunter.” In 1806 the Western Conference (embracing the entire Mississippi valley, from the Alleghenies westward) appointed William McKendree (afterwards bishop) to the presiding eldership of Cumberland District (which included Indiana, Illinois, West Tennessee, Missouri, and Arkansas), and John Travis to the Missouri Circuit, a sparsely-settled region, extending from Pike County on the north to Pemiscot County on the south, and from thirty to fifty miles westward of the river. McKendree and Travis traveled over their territory on horseback, and carried their provisions in their saddle-bags. They often slept on the ground, and swam or forded rivers. Travis divided Missouri into two circuits, the Missouri River being the dividing line, and reported fifty-six members in the Northern (or Missouri) Circuit, and fifty in the Southern (or Meramec). In 1809, Cold Water Circuit was added; it included St. Louis, and contained thirty-nine members. In 1821, St. Louis became a separate circuit, with two hundred and fifteen members, and Rev. Isaac N. Piggot as minister. Missouri, as stated, was in 1807 a circuit of Cumberland District, Western Conference; in 1809 its circuits belonged to Indiana District; in 1812 to Illinois District; in 1813 they became part of the Tennessee Conference; in 1814, Missouri became a district; in 1816 it was attached to the Ohio Conference; in May, 1816, the Missouri Conference was created by the General Conference sitting in Baltimore, and embraced Missouri, Illinois, and a large part

of Indiana. Its first session was held, commencing Sept. 23, 1816, at Shiloh meeting-house, in Illinois,—the first church built by Methodists so far West. It consisted of nine members, and there were twenty-two preachers to be stationed, of whom twelve were in Illinois and ten in Missouri. There were eight hundred and seventy-five white and fifty-nine colored members in the Missouri District, which was then divided into seven circuits. In September, 1820, at the fifth meeting of the Missouri Conference, Missouri was divided into two districts,—Missouri and Cape Girardeau; St. Louis Circuit being in the former, which was divided into eight circuits, with a total membership of seven hundred and sixty-three, of whom two hundred and fifteen were in St. Louis Circuit. On the 24th of October, 1822, the Missouri Conference met for the first time in St. Louis, where the building of the First Methodist Church had just been completed, and the town of St. Louis was made a separate station, with Rev. Jesse Walker as the minister.

In 1824, Illinois and Indiana were organized into a new Conference, and the Missouri Conference was made to include the State of Missouri and Arkansas Territory. In 1836 the Arkansas Conference was organized, and the Missouri Conference was made to include the State of Missouri and that part of Missouri territory which lies north of the Cherokee line. At the fifteenth session of the Missouri Conference, held in St. Louis, beginning Sept. 16, 1830, it was re-districted into four districts,—Missouri, St. Louis, Cape Girardeau, and Arkansas; the St. Louis District being divided into St. Louis station and seven circuits. The latter were Union, Gasconade Mission, Salt River, Palmyra, Buffalo, and Missouri. Prior to 1822 the congregations were served by missionaries or circuit-riders. These, with the dates of their appointment, were John Travis, 1807; Edward Wilcox, 1808; John Crane, 1809; Isaac Linsey, 1810; George A. Collins, 1811; Daniel Fraley, 1812; John M. McFarland, 1813; Richard Conn, 1814; Jacob Whitesides, 1815; Benjamin Proctor, 1816; John Scripps, 1817; John Harris, 1818; Samuel Glaze, 1819; Thomas Wright, 1820; Isaac N. Piggot, 1821; Jesse Walker, 1822. The presiding elders since the establishment of St. Louis District have been Andrew Monroe, 1830, 1832–36; Alexander McAllister, 1831; Silas Comfort, 1836–37; James M. Jameson, 1838–40; Wesley Browning, 1841–43; William W. Redman, 1844. The bishops presiding at the Missouri Conference since its organization have been William McKendree, 1816, 1818, 1823; Robert R. Roberts, 1817, 1820–22, 1824–27,

1830-31, 1834-36, 1842; Enoch George, 1819; Joshua Soule, 1828-29, 1832, 1837-38; Thomas A. Morris, 1839-40; Beverly Waugh, 1840; James O. Andrew, 1843.

In 1844-45 occurred the great secession of the Southern Methodists, which left the Northern members for a time without "a local habitation or a name" in Missouri, and without a Conference in the State or a church in the city. A few ministers, however, the more prominent of whom were Rev. Anthony Bewley (who in 1860 was hung by a mob at Fort Worth, Texas), Rev. Mark Robertson, Rev. Nelson Henry, Rev. Peter Akers, and Rev. Joseph Tabor, continued to labor in connection with the old denomination. In 1845 a small church, called Ebenezer, was erected, which, in 1862, became the Union Methodist Church of St. Louis. In 1848 the Missouri Conference was reorganized, meeting with the Illinois Conference at Belleville, and was made to include Kansas and Arkansas. In 1852 the Arkansas Conference was set off, and in 1856 the Kansas Conference was formed. In 1861, when the civil war commenced and the fate of Missouri, as to its connection with the Union or the Southern Confederacy, trembled in the balance, the Northern Methodists were again disorganized, many of the ministers being compelled to leave their posts throughout the State. In May, 1861, their services were suspended everywhere except in St. Louis, and Ebenezer Chapel (St. Louis) was seized for debt and closed, Hedding Chapel was dissolved, and only a nucleus of worshipers remained at Simpson Chapel. During this period presiding elders and ministers either left the State or entered the army as chaplains or soldiers. In the latter part of 1861, owing to the occupation of the State by the Northern troops, the Southern wing of the church in turn became disorganized and scattered. On the other hand, the old Methodist organization began to recover its lost ground, and has continued to flourish ever since. The Missouri Conference was reorganized in May, 1862, as the Missouri and Arkansas Conference. In 1868 it was divided into the Missouri Conference (north of Missouri River) and St. Louis Conference (south of the river and including Arkansas), and in May, 1872, the Arkansas Conference was cut off and established as a separate body.

The first church of the denomination established in St. Louis was organized by the Rev. Jesse Walker in the fall of 1820, and the first systematic preaching was begun about the middle of December of that year. The first Sunday-school was commenced in December of the following year, and its first superintendent was Col. John O'Fallon. In 1845, owing

to the dissension which had arisen concerning the question of slavery, the congregation separated from the regular Methodist organization and joined the Methodist Church South. It then became known as the First Methodist Episcopal Church South, and consequently there is nominally no "First Church" of the old organization in St. Louis.

The bishops of Missouri Conference from 1849 until 1868, and of St. Louis Conference since, have been as follows: E. S. Janes, 1849, 1852, 1858, 1869; C. J. Houts, *pro tem.*, 1850; B. Waugh, 1851; T. A. Morris, 1853, 1861; E. R. Amcs, 1854, 1857, 1860, 1863, 1867, 1871; Matthew Simpson, 1855, 1862, 1877; O. C. Baker, 1856, 1864; Levi Scott, 1859, 1865, 1872; C. Kingsley, 1866; E. Thomson, 1868; Davis W. Clark, 1870; Thomas Bowman, 1873, 1878; Edward G. Andrews, 1874; Stephen M. Merrill, 1875; Jesse T. Peck, 1876; Isaac W. Wiley, 1879; Randolph S. Foster, 1880; John F. Hurst, 1881; Henry W. Warren, 1882. The St. Louis Conference is now divided into St. Louis, Sedalia, Kansas City, Springfield, and Missouri Districts. St. Louis District has twenty stations or circuits, the presiding elders over which since the reorganization in 1848 (with the dates of the Conferences appointing them) have been George W. Robbins, 1848; J. J. Buren, 1849-50; David N. Smith, 1851; C. J. Houts, 1852-54; J. H. Hopkins, 1855-56; Nathan Shumate, 1857; Samuel Huffman, 1858-61; J. C. Smith, 1862-64; M. Sovin, 1865-68; J. L. Walker, 1869-71; A. C. George, 1872; T. H. Hagerty, 1873-75; C. A. Van Anda, 1876; F. S. Beggs, 1877-80; T. H. Hagerty, 1881-82. The reorganized Missouri Conference started in 1848 with 1538 members and 26 traveling and 24 local preachers, Arkansas being included in these figures. The St. Louis Conference held in March, 1882, reported 18,080 members and probationers, 168 local preachers, 171 Sunday-schools, with 1562 teachers and 13,169 scholars, 191 churches, and 65 parsonages. St. Louis Station (or City) reported 1187 members and probationers, 8 local preachers, 7 churches, 7 Sunday-schools, with 158 teachers and 1655 scholars.

The **Western Methodist Book Concern**, 1101 Olive Street, was organized in 1865, with Rev. Benjamin St. James Fry, D.D., as manager, in rented rooms at No. 413 Locust Street, and later removed to 913 North Sixth Street, which property had been bought and is still owned by the concern, being now used for manufacturing purposes. John H. Cameron was manager from 1872, when Dr. Fry took the editorial management of the *Central Christian Advocate* until 1880, and was then succeeded by the pres-

ent manager, Samuel H. Pye, from the Cincinnati Book Concern. In the third story of the present quarters are the editorial office of Dr. Fry, and the room where, every Monday morning, are held the meetings of the Methodist Episcopal Ministers' Association. The Book Concern moved into its present quarters in 1881.

Benjamin St. James Fry, D.D., was born in Rutgers, East Tennessee, in 1824, but spent his childhood and early manhood in Cincinnati. He was educated

subsequently re-elected, and continues to hold that position. He was a reserve delegate of the General Conference of 1868, and served part of the session, and was secretary of the Committee on Sunday-schools. At the General Conference of 1876 he was the secretary of the Committee on Education. Dr. Fry has been a frequent contributor to periodical literature, and is the author of several volumes of Sunday-school books, including lives of Bishops Whatcoat, McKendree, and Roberts. He was also

BISHOP MCKENDREE.

at Woodward College, Cincinnati, and was received into the Ohio Conference in 1847. Among his appointments in that Conference were Portsmouth, Newark, Chillicothe, and Zanesville. He was president of the Worthington Female College for four years, and served three years as chaplain in the Union army. In 1865 he was placed in charge of the depository of the Methodist Book Concern at St. Louis, and conducted its business until, in 1872, he was elected editor of the *Central Christian Advocate*. He was

the author of "Property Consecrated," one of the prize volumes issued by the church on systematic beneficence.

William McKendree, one of the early bishops of the Methodist Episcopal Church, was born in King William County, Va., on the 6th of July, 1757. He was a soldier during the Revolutionary war, entering the army as a private, and rising to the rank of adjutant. He was placed in the commissary department, and was present at the surrender of Cornwallis at

Yorktown. In 1787 he was converted to religion, and soon began to take a prominent part in public meetings. In 1788 he was received on trial for the ministry, and continued to labor in his vocation until November, 1792, when, having been influenced by Mr. O'Kelly to join in certain measures of alleged reform, he was greatly disappointed by their failure at the General Conference. Mr. O'Kelly withdrew from the church, and Mr. McKendree sympathizing with him, sent in his resignation as a minister, but the Conference agreed that he might still preach among the societies. Mr. McKendree soon obtained leave to travel with Bishop Asbury, in order that he might ascertain for himself whether his impressions had been well founded. In a short time he became satisfied that he had been deceived. In 1796 he became presiding elder, and in 1801 was sent to the West to take the supervision of the societies in Ohio, Kentucky, Tennessee, Western Virginia, and part of Illinois. In 1806 he was appointed to the Cumberland District, embracing Arkansas, Missouri, Illinois, and half of Tennessee, and during the same year traveled extensively in Illinois. He himself records that in 1807 "we attended a camp-meeting across the Mississippi River, which was the first meeting of the kind ever held on that side of the river, and we walked about forty miles to get to it." In 1808 he was called to preach before the General Conference, and discharged this task so ably that Bishop Asbury said at its close, "That sermon will make McKendree bishop." This prediction was realized by his election as bishop by the same Conference (1808). In 1816, during which year he presided at the first session of the Missouri Conference, he became the senior bishop. He died on the 5th of March, 1835, at the residence of his brother, near Nashville, Tenn. Bishop McKendree was a popular preacher, and a zealous and laborious minister. He was careful in the administration of discipline, and introduced system into all the operations of the church. His influence was potent everywhere, but especially was he regarded as the father of Western Methodism, to which he had given years of earnest labor, and in the success of which he felt a deep and abiding interest.

Jesse Walker was born in North Carolina (the exact date is uncertain), and was admitted as a traveling preacher in 1802. Subsequently, for four years, he traveled in Kentucky and Tennessee. In 1806 he was appointed missionary to Illinois, and at the end of his first year of labor reported that he had secured two hundred and eighteen members to the church in that region. He continued his missionary labors in Illinois and Missouri until 1812, when he

was made presiding elder over the church in both those Territories. In 1820 he was appointed Conference missionary, with leave to select his own field of work, and chose St. Louis, where he established the First Methodist Church, of which he remained pastor for two years. On the 24th of October, 1822, he again obtained the appointment of Conference missionary, and in 1823 began to labor among the Indians. In 1834 failing health compelled him to retire to his farm in Cook County, Ill., where he died on the 5th of October, 1835.

John Travis was born of Presbyterian parents, in Chester District, S. C., Nov. 3, 1773. He was appointed to Missouri Circuit in 1806, at which date he was first received on trial by the Western Conference, and traveled from five to seven hundred miles on horseback to reach his circuit. Two years later he was received into full connection, and in 1812 was ordained as elder. He remained in charge of different circuits, nearly as wild and thinly settled as the first, until 1815, when he married, and retired to a farm in Livingston (now Crittenden) County, Ky., where he studied and subsequently practiced medicine. He preached occasionally until his death. He became totally blind fourteen years before his death, which occurred in his eightieth year, Nov. 11, 1852.

Among the early ministers of the Methodist Church in St. Louis, Rev. John W. Springer and Rev. Joseph Boyle, D.D., were also prominent. Mr. Springer was born in Fayette County, Ky., in 1808, and arrived in St. Louis in 1848, and took charge of the St. Louis mission. Besides the mission, he had charge of a number of circuits. He was married three times, his first wife being Eliza Pilcher, of Fayette County, Ky., the second Eliza Lueller, and the third Minerva D. Pilcher, sister of the first Mrs. Springer. He was a faithful and active minister, and labored industriously for many years, but at the time of his death, which occurred on the 17th of October, 1879, was on the superannuated list.

Joseph Boyle was born in Baltimore on the 12th of May, 1812. The field of his first ministerial labors was Pittsburgh, but in 1842, at his request, he was transferred to St. Louis, and became pastor of the First Church. He was a delegate to the Louisville General Conference of 1844, at which the Methodist Church was divided into two bodies, the Methodist Episcopal Church and the Methodist Episcopal Church South, and labored earnestly for reconciliation. Until his death, which occurred on the 3d of May, 1872, Dr. Boyle continued in the active discharge of his ministerial duties. In 1870 he was placed upon the retired list as a supernumerary at the First

Methodist Church, on Eighth Street. He did not, however, relax his ministerial labors, but continued to preach and work for the cause to which he had devoted his energies. He preached his last sermon at Lexington, Mo., on the Sunday preceding his death.

Dr. Boyle was distinguished by his learning and eloquence, as well as by the elevated tone of his character and the simplicity of his life. He was extremely popular with the citizens of St. Louis, and for a number of years was one of the most prominent and useful members of the community.

Trinity Methodist Episcopal Church.—This church, situated at the southwest corner of Tenth and North Market Streets, Rev. R. R. Pierce, pastor, had its origin in Simpson Chapel, which was organized about 1857. Simpson Chapel was the only Northern Methodist Church that continued to hold services in St. Louis during the stormy period at the beginning of the war, when all the kindred Methodist congregations in Missouri became disorganized. When, however, toward the close of the year 1861, the Northern Methodist Church in Missouri began to revive, Simpson Chapel shared in its prosperity and increased rapidly in numbers and influence. Its pastors were J. L. Conklin, appointed in 1858; Thomas H. Mudge, 1859; J. C. Smith, 1860; Wm. C. Stewart, 1861; (the church was "supplied" by different ministers in 1862) L. M. Vernon, 1863; supply, 1864–65; T. J. Williams, 1866; R. R. Pierce, 1867–68; J. N. Pierce, 1869. In 1870 it became Trinity Church, whose pastors have been J. N. Pierce, 1870–71; J. L. Walker, 1872–73–74; O. M. Stewart, 1875–76–77; H. R. Miller, 1878; G. W. Hughey, 1879–81; R. R. Pierce, 1882. Simpson Chapel reported fifty-seven members in 1858, and Trinity Church had in the first year of its organization one hundred and sixty members. Connected with the Sunday-school were twenty-five teachers and one hundred and eighty scholars. In March, 1882, it had a membership, including probationers, of two hundred and eighty-eight, and there were thirty-eight teachers and four hundred scholars in the Sunday-school.

Union Church (southwest corner of Garrison and Lucas Avenues, Rev. C. E. Felton, D.D., pastor) was the first fruits of the reorganization of the Northern Methodist Church, after its dispersion on the breaking out of the war in 1861. Prior to that time the Methodists (North) had had three congregations in St. Louis, known as Hedding, Ebenezer, and Simpson Chapels. Ebenezer Chapel had been organized in 1852, and was served by Rev. L. B. Bemis, appointed 1852; Rev. T. I. R. Davis, 1853; Rev.

N. Shumate, 1855; Rev. Thomas Williams, 1858; Rev. William Hanley, 1860; Rev. Joseph Brooks, 1861. During Dr. Brooks' pastorate the church was closed on account of a debt due for rent, and was never reopened. In 1852 there were one hundred and thirty-five members, but at the close of 1861 not more than thirty members of the congregation remained in the city. On the 2d of January, 1862, a meeting was held at the office of Rev. Dr. Charles D. Elliott, editor of the *Central Christian Advocate*, by a few Methodists whom business had brought to St. Louis, and they, uniting with the remnants of Ebenezer Church, organized a new society and invited Rev. Dr. Henry Cox, of Chicago, to become their pastor. Dr. Cox was a man of great zeal and energy, and the congregation prospered under his care. The Union Presbyterian Church (an independent organization) had built the church (now occupied by the Young Men's Christian Association) at Eleventh and Locust Streets; and this building was purchased by the Union congregation for thirty-seven thousand three hundred dollars on the 14th of March, 1862. Before that date, however, Dr. Cox had succeeded in raising six thousand dollars, by the payment of which, on the first installment of the purchase-money, the Missouri Conference was enabled to hold its session in the building, beginning Feb. 26, 1862. In the following summer Dr. Cox visited the East and obtained six thousand dollars towards reducing the church debt. In 1865 the indebtedness was entirely canceled. In 1863 the membership had grown to two hundred and seventy-five persons, and at the beginning of 1865 it was reported at four hundred, together with an attendance of four hundred in the Sunday-school. Dr. Cox was an uncompromising advocate of Northern principles, and made it a condition of church membership that candidates should take the oath of allegiance to the United States, swearing them in with the Stars and Stripes floating over them and an open Bible before them. The church was dedicated by Bishop Simpson, March 16, 1862. It was at that time one of the most capacious churches in the city, and seated about sixteen hundred persons,—a substantial brick building one hundred and four feet long, sixty-eight feet wide, and seventy-five feet high to the centre of the nave.

The succession of pastors, with the dates of their appointment, has been as follows: Henry Cox, 1862–63; supply, 1864; A. C. George, 1865–67; J. W. Langley, 1868–69; B. St. J. Fry, 1870; C. E. Felton, 1871–73, and again in 1880–82; C. A. Van Anda, 1874–76; R. C. Houghton, 1877–79. On the 14th of May, 1880, the church on Eleventh Street was sold to the Young Men's Christian Association, and in the

following June the present lot, ninety-five by one hundred and thirty-four feet, was purchased. Ground was broken July 12, 1880, and the corner-stone was laid Oct. 26, 1880. The Sunday-school room was first occupied Oct. 30, 1881, and the church was dedicated May 18, 1882, by Bishop Simpson. It is of modified Gothic architecture, and cruciform in shape, and is built of rubble-stone and brick. Its dimensions are eighty by one hundred and one feet. In the basement are a kitchen and dining-rooms, and on the ground-floor are the office of the church, parlor, and Sunday-school rooms, the latter with a seating capacity of six hundred. The main auditorium contains seats for one thousand persons, and is amphitheatrical in shape. In the rear of the auditorium are the pastor's study and the music-room. The total cost of the church was \$75,527.16, of which \$11,685 was paid for the lot and \$63,842.16 for building and furnishing. This sum was realized from the following sources: Sale of old church, \$37,500; subscriptions and interest, \$35,898.66; Ladies' Aid Society, \$2069.51; Young Men's Union, \$466.85,—a total of \$75,935.02, or \$407.86 more than the property cost. August Beincke was the architect. The Young People's Lyceum of the Union Methodist Episcopal Church, organized by the pastor in 1871 for purposes of literary and social intercourse, was the first society of its kind established in St. Louis. The membership of the church numbers four hundred and forty persons, and there are thirty-one teachers and three hundred and fifty-four scholars connected with the Sunday-school.

Central Church.—In the minutes of the Missouri Conference for 1865 appears for the first time the name of the Second Union Church, with Rev. Henry Cox, D.D. (the organizer of Union Church), as pastor. In 1866 it reported one hundred and thirteen members, and forty teachers and five hundred pupils in the Sunday-school. Dr. Cox was reappointed in 1866, and N. P. Heath succeeded him in 1867, in which year its name was changed to that of Sixth Street Mission. This mission occupied the publishing-house at 913 North Sixth Street, and reported, in 1868, one hundred and eighteen members, and five hundred and forty children in the Sunday-school. Rev. A. C. George was pastor in 1868, and Rev. J. W. Johnson in 1869–70, after which date the name of the organization disappeared from the minutes, Central Church (which was organized in 1869, in a hall on Eighteenth and Wash Streets) having grown out of and absorbed it. The new organization reported in the spring of 1870 a membership of seventy persons, and an attendance at the Sunday-school of twenty teachers and

one hundred and twenty children. It continued to meet in the hall at Eighteenth and Wash Streets until February, 1871, when its present church building, situated at the northeast corner of Twenty-fourth and Morgan Streets, was dedicated. The foundation stone of this edifice was laid on the 2d of September, 1869, and the exercises were witnessed by a large assemblage. Hon. Nathan Cole, mayor of the city, presided. On the 1st of February, 1871, the edifice was used by the congregation for the first time. It has a front of fifty-seven feet on Morgan Street, and a depth of ninety-three feet on Twenty-fourth Street, and is a substantial brick building, with lecture-room, classrooms, and pastor's study on the first floor, and on the second floor the main audience-room, with a seating capacity of six hundred. The church lot measures sixty-five by one hundred and ten feet, and the property is valued at thirty-five thousand dollars. The pastors have been Revs. A. C. George (who organized it), 1869–71; J. J. Bentley, 1872; A. C. Williams, 1873–75; J. W. Bushong, 1876–78; W. K. Marshall, 1879–81; F. S. Beggs, 1881–82. The church reports a membership of two hundred and twenty persons, with twenty-eight teachers and two hundred and seventy-five pupils in the Sunday-school.

St. Luke's Church grew out of a mission Sunday-school which was organized by Rev. R. S. Stubbs at the residence of Mrs. Dr. Brock, May 20, 1874, and which then numbered fifteen scholars. The church was organized with twelve members, Jan. 17, 1875, in the chapel of the mission, a frame building on Jefferson Avenue, between Chippewa and Keokuk Streets, which was purchased by the congregation. This building was twenty-five by forty feet in size, and seated one hundred and seventy-five persons. Rev. R. S. Stubbs, Rev. B. St. James Fry, Rev. C. A. Van Anda, and other ministers participated in the organization. The building was sold in November, 1881, and was converted into a shoe-store. The present building stands upon a lot one hundred and one by one hundred and eighteen feet, at the northeast corner of Potomac Street and Texas Avenue. Its corner-stone was laid Sept. 15, 1881, and the completed structure was dedicated by Rev. C. E. Felton, D.D., on the 5th of March, 1882. It is built of brick, with stone trimmings, and its dimensions are forty by sixty feet, its seating capacity being three hundred and fifty persons. The architecture is semi-Gothic. The church has had four pastors, Rev. R. S. Stubbs, 1874–76; Rev. L. Hallock, 1876–79; Rev. J. F. Corrington, 1879–82; and Rev. A. Jump, 1882. Connected with the congregation are a Ladies' Aid Society, organized in 1875, and a Woman's For-

eign Missionary Society, organized in 1881. Each of them has about twelve members. There are now forty-one families (about two hundred persons) connected with the church, and of these, thirty-four persons are communicants. The Sunday-school has twelve teachers and one hundred and twenty pupils.

Water-Tower Church.—Hedding Chapel, established in 1852 with twenty-five members, survived until 1861, when, owing to the political troubles of that period, the congregation became disorganized and finally extinct. The first regular pastor was the Rev. Daniel H. May, appointed in 1853, and his successors were Rev. J. M. Chevington, 1854; Rev. J. L. Conkling, 1855; Rev. John Hageman, 1858; and Rev. A. C. McDonald, 1860–61. Different ministers officiated as supplies during the years not named. The church building was a small structure, situated in the northern part of the city. In 1879 some of the former members of the congregation, with other Methodists, organized a mission in the vicinity of the water-tower. At first the congregation worshiped in the German Presbyterian Church, Grand Avenue and Thirteenth Street, but it subsequently purchased a lot at the northwest corner of Fourteenth Street and Obear Avenue, one block north of and opposite the water-tower, from which the congregation takes its name, and erected a neat Gothic structure of brick, forty-eight by twenty-five feet, which will seat two hundred persons. The dimensions of the lot are fifty by one hundred and forty feet, and the property is valued at two thousand five hundred dollars. The congregation occupied the church for the first time in March, 1881, and the building was dedicated on the 27th of that month. The successive pastors have been Rev. L. Hallock, 1879; Rev. J. W. Newcomb, March, 1880; Rev. Cyrus Brough, assistant, March, 1880; pastor, March, 1881; Rev. J. F. Corrington, March, 1882. The church reports seventy-five members and probationers and twenty teachers, and an average attendance of one hundred and seventy-five pupils in the Sunday-school. The usual devotional, missionary, and charitable societies are maintained by the congregation.

Goode Avenue Church.—This church, situated at Goode Avenue and North Market Street, Rev. M. B. Wood, pastor, was organized by Rev. R. S. Stubbs in 1875, and the corner-stone of the church building was laid Oct. 1, 1875. The church, a small frame structure, with a seating capacity of one hundred and seventy, was dedicated Nov. 15, 1875. The lot is fifty by one hundred and thirty-five feet in size, and the property is valued at two thousand dollars. The pastors have been Revs. R. S. Stubbs, C. A. Van Anda, J. W. Bushong, A. H. Parker, J. W. New-

comb (1879–81), M. B. Wood, 1882. The church has a membership of fifty-six persons, and the Sunday-school numbers sixty pupils.

Goode Avenue Mission first appears on the Conference minutes in 1877, with Rev. A. H. Parker as supply. Mr. Parker was reappointed in 1878. Rev. J. W. Newcomb was appointed to this charge, in conjunction with that of Rock Spring, in 1879, and that of Tower Grove mission in 1880–81. Rev. M. B. Wood was appointed in 1882. The mission has a membership of forty-four persons, with eight teachers and sixty children in the Sunday-school.

METHODIST EPISCOPAL CHURCH SOUTH.

In the General Conference of the Methodist Episcopal Church of 1844, attention was called to the fact that Bishop James O. Andrew, of Georgia, had married a lady who was the owner of slaves. As no bishop in the Methodist Church had ever been connected with slavery, this fact produced great excitement. According to a law of the church adopted in 1800, it was provided that when any traveling preacher became an owner of a slave or slaves by any means he should forfeit his ministerial character in the church, unless he executed, if it were practicable, a legal emancipation of such slaves conformable with the laws of the State in which he lived. The committee of the Conference on episcopacy waited upon the bishop, who informed them that his wife had inherited slaves from her former husband, who had secured them to her by a deed of trust, and that she could not emancipate them if she desired to do so. The embarrassments of the case were deeply felt by all parties, but after a protracted discussion the General Conference, by a vote of one hundred and ten to sixty-eight, adopted the following resolution: "*Resolved*, That it is the sense of this General Conference that he desist from the exercise of his office so long as this impediment remains."

The prevailing opinion in the Conference was that it was possible for the bishop to remove from Georgia, where manumission was impracticable, to a State where emancipation might be made. Bishop Andrew would willingly, it was understood, have yielded to the opinions of the General Conference, but his brethren in the South thought it his duty to stand by them on a question which they considered to be one involving their rights, and he accordingly acquiesced in their desire. Soon after this action of the Conference resolutions were framed proposing a separation between the free and slave States, and were adopted by a vote of one hundred and forty-two to twenty-two. A conference of Southern delegates was

called, and held in Louisville May 1, 1845. It was composed of one hundred and two delegates, who, with only three dissenting voices, voted for the proposed separation, and organized the General Conference South. The Missouri Conference sent as delegates to the convention Andrew Munroe, Jesse Green, John Glanville, Wesley Browning, William Patton, John H. Linn, Joseph Boyle, and Thomas Johnson, and the Fourth Street (now the First) Church of St. Louis, by resolutions bearing date Jan. 12, 1845, gave emphatic utterance against the division. When the almost unanimous action of the Louisville Convention was learned, however, the Fourth Street Church, at a meeting held July 30, 1845, determined to join the Southern Conference by a vote of one hundred and thirty-two, subsequently increased to two hundred and six, a majority of all the members, who then numbered three hundred and eighty-seven, thus determining the status of the Methodists in St. Louis, and therefore in Missouri, and leaving the Northern Methodists for several years without a Conference, and almost without a church. The Church South continued for fifteen years to prosper and increase. In 1858 the State was divided into two Conferences,—the Missouri, north of the Missouri River, and the St. Louis Conference, south of it. In 1861 the Southern proclivities of the church exposed its organization to the hostility of the Federal authorities, and its organ, the *St. Louis Christian Advocate*, was suppressed, and its editor, Dr. McAnally, imprisoned. Outside of St. Louis, its members were dispersed and many of its ministers were compelled to leave the State. The work of the church in Missouri, in fact, was almost wholly suspended during the war.

The St. Louis Conference assembled at Arrow Rock, Mo., Sept. 25, 1861, and, there being no bishop present, called Rev. Daniel A. Leeper to the chair. It was forced to adjourn to Waverly, and there finished its session. No record of its proceedings was published, and no further attempt to hold a Conference in Missouri was made until after the war, when the *Advocate* was revived and the church reorganized. In 1870, St. Louis Conference was subdivided and made to consist of that part of the State which lies south of the Missouri River and east of the Gasconade and Big Piney Rivers and the eleventh meridian. It is divided into St. Louis, Charleston, Salem, and Poplar Bluffs Districts, and St. Louis District is sub-divided into twelve stations and circuits. The bishops presiding at the Missouri and St. Louis Conferences, so far as their names appear on the general minutes, have been Joshua Soule, 1845; H.

H. Kavanaugh, 1854, '60, '68; John Early, 1855; George F. Pierce, 1856, '58, 69, '72, '79, '81; James O. Andrew, 1857; Robert Paine, 1859; Enoch M. Marvin, 1867, '77; H. N. McTyeire, 1870, '76; D. S. Doggett, 1871, '78; W. M. Wightman, D.D., 1873; John C. Keener, 1874, '75, '80. The presiding elders of St. Louis District have been William W. Redman, 1845; Newton G. Berryman, 1846-48; James Mitchell, 1849-50; Wesley Browning, 1851-54; Robert A. Young, 1855-56; John R. Bennett, 1857-59; Joseph Boyle, 1860, '68, '69; Thomas M. Finney, 1866-67; J. W. Lewis, 1870, '76, '77; William M. Leftwich, 1871-73; A. T. Scruggs, 1874-75; W. V. Tudor, 1878-79; J. G. Wilson, 1880-82.

The Woman's Missionary Society of the Methodist Episcopal Church South was organized in 1878, and its St. Louis local conference in 1879. It is now represented by 2 stations in China, 1 in Brazil, and 2 in Mexico, and maintains 5 boarding and 10 day schools. It has under its charge 31 conference societies, 932 auxiliary societies, and 180 young people's and juvenile societies, with a total membership of 26,556. The total collections in the four years of its existence have amounted to \$62,761.78. The St. Louis local conference has 15 auxiliary societies with 404 members, and 3 juvenile societies with 142 members. The officers of the society are Mrs. George Baker, president; Mrs. Samuel Cupples, first vice-president; Mrs. Dr. Walker, of Salem, Mo., second vice-president; Mrs. John Garton, Longtown, Mo., third vice-president; Mrs. John Robinson, fourth vice-president; Mrs. Lanus, recording secretary; Mrs. E. Avis, corresponding secretary; and Mrs. J. W. Lewis, treasurer.

First Methodist Episcopal Church South.—This church is the oldest Methodist organization in St. Louis, and was formerly known as the First Methodist Episcopal Church. In 1845, however, it withdrew from the General Conference and attached itself to the General Conference, then newly organized, of the Methodist Episcopal Church South. The Missouri Conference, which met at Shiloh, St. Clair Co., Ill., Sept. 13, 1820, appointed Elder Jesse Walker Conference missionary, with liberty to select his own field for work. He chose St. Louis, and proceeded thither at once, accompanied by two young ministers. Their reception was so discouraging that they set out almost immediately for different points, but Walker, after having ridden eighteen miles, determined that he would go back alone and "take the town." He accordingly returned and obtained a lodging in a cheap tavern, and afterwards preached once or twice

in the Baptist meeting-house. He succeeded in renting an unfinished house on Fourth Street for ten dollars a month, and having obtained some benches that had been removed from the court-house to make way for new ones, fitted up the largest room for meetings and resided in the others. He proceeded at once to organize a congregation, of which the original members were Amariah Burns and wife, John Finney, John Armstrong, and Joseph Piggott.

Mr. Walker began preaching in December, 1820, and permanently established the church early in January, 1821. He invited the children of the poor and servants to come on week-days and evenings to learn to read and spell, and by means of this and similar expedients, supplemented by his earnest and arduous labors, he succeeded in laying broad and deep the foundations of Methodism and of the First Methodist Church in St. Louis. The owner of the house in which the meetings had been held having died, Mr. Walker was forced to vacate the premises. Meetings were then held in the old court-house, situated on Third Street below Elm, and the early growth of the congregation appears to have been rapid. Mr. Walker set to work at once to procure the erection of a house of worship. He was allowed to cut logs without paying for them on the eastern side of the river, and with the timber thus secured began the construction of a church near what is now the corner of Fourth and Myrtle Streets. The ladies of the congregation defrayed the cost of building the pulpit, and the Episcopalians, who had disbanded as a congregation, gave the church their Bible, cushions, and seats. As the result of his first year's work, Mr. Walker reported to the Conference that a chapel had been erected and paid for; that he was maintaining a flourishing school, and that the membership of the church numbered eighty-seven persons. The chapel is described as having been a neat frame structure, thirty-five by twenty-five feet, with side galleries, and capable of holding nearly five hundred persons. The Missouri Conference assembled in it on the 24th of October, 1822, and the congregation continued to occupy it until the 20th of September, 1830, when it removed to a new brick church which had been erected on a lot (given, together with five hundred dollars, by Col. John O'Fallon) on Fourth Street and Washington Avenue. The dimensions of this building were fifty by sixty feet, with a basement story ten feet in the clear. The dedicatory sermon was preached by the founder of the congregation, Rev. Jesse Walker.

At this time the pastor of the church was the Rev. Andrew Monroe. Mr. Monroe was appointed to the St. Louis District by the Missouri Conference in July,

1824. At first, owing to the poverty of the congregation, he was compelled to reside alone in a lodging, but subsequently a house was rented for him and he was joined by his family. It was known as the rector's house, and the rent was five dollars per month. It contained but one room, about sixteen feet square. Before the expiration of the first month of his occupancy, however, the congregation decided that this sum was more than it could afford to pay, and Mr. Monroe's wife determined to remove to Main Street and open there a boarding-house. At that time the membership comprised forty-three white and forty-four colored persons.

In December, 1852, a lot, ninety-five by one hundred and sixteen feet, situated on the northwest corner of Washington Avenue and Eighth Street, was bought from Silas Wood, of New York, for thirteen thousand dollars, and in April following the Fourth Street property was sold to W. G. Clark for fifty thousand dollars. The building on the new site seats nine hundred persons, and was dedicated Dec. 31, 1854, by Rev. C. B. Parsons. On the 2d of July preceding the congregation had met in the old Fourth Street Church for the last time. On this occasion Rev. John Hogan, who had been among the most active of the members of the church, delivered an address, after which the congregation and Sunday-school formed in procession and marched to the basement of the new church. Services preliminary to the dedication were performed by the Rev. R. A. Young, after which Mr. Hogan read a communication from Col. John O'Fallon, first superintendent of the Sunday-school, expressing regret at his inability to be present and participate in the exercises. Rev. Dr. Cummings introduced the dedicatory exercises by reading a selection from chap. viii. of 1st Kings, and offered the dedicatory prayer and pronounced the benediction. The dedicatory sermon was preached by the Rev. Charles B. Parsons, D.D., of Louisville, Ky. The building was of brick, and its dimensions were one hundred and six by sixty-five feet. It was forty-five feet in height, and had a tower one hundred and forty-three feet high. In the basement there was a large room, used for holding minor services, society meetings, etc., three class-rooms, and the minister's office. The architect was G. I. Barnett, and the building committee John Finney, Levin A. Baker, and J. T. Dowdall. The ground, church, and parsonage cost about fifty-five thousand dollars.

The congregation, which had previously been known as the Fourth Street Church, adopted the designation of the First Methodist Episcopal Church. An adjoining lot, fronting twenty-seven feet on Wash-

ington Avenue, was subsequently purchased and a parsonage erected on it. In 1874-75 the vacant space around the church was built up for business purposes, the additions, in the Tudor style, becoming part of the edifice and giving it a castellated appearance. Early in 1882 the property was sold to Messrs. Leighton & Chapman, who began in March, 1882, to tear it down for the purpose of erecting on its site a number of warehouses. The congregation met for a time in Dr. Post's old church, now occupied by the Young Men's Temperance Union, at Tenth and Locust Streets, and afterwards in the Young Men's Christian Association's church at Eleventh and Locust Streets. The construction of a handsome stone edifice for the use of this congregation, situated at the corner of Glasgow Avenue and Dayton Street, was commenced in 1882.

The successive pastors of the church,¹ with the dates of the Conferences appointing them, have been :

Jesse Walker, 1821; William Beauchamp, 1822; John Scripps, 1823; Andrew Monroe, 1824-25; John Dew, 1826; Alexander McAlester, 1827; Andrew Monroe, 1828-29; Joseph Edmondson, 1830; John S. Barger, 1831; Joseph Edmondson, 1832; Edmund W. Sehon, 1833; Thomas B. Drummond,² L. B. Stateler, 1834; George W. Bewley, L. James, 1835; Thomas Wallace, 1836; Edward R. Ames, 1837; Silas Comfort, William M. Dailey, George Smith, 1838; George C. Light, William M. Dailey, 1839; Wesley Browning, James L. Forsythe, 1840; William Patton, 1841; Joseph Boyle, D. W. Pollack, 1842; Joseph Boyle, George Smith, 1843; Wesley Browning, E. M. Marvin, 1844; C. B. Parsons, 1845-46; J. H. Linn, W. T. Cardwell, 1847; J. H. Linn, 1848-49, succeeded by J. A. Henning, June, 1849; F. A. Morris, Abraham Milice, 1849; Joseph Boyle, J. N. W. Springle, 1850-51; W. R. Babcock, 1852; R. A. Young, 1853-54; C. B. Parsons, 1855-56; Enoch M. Marvin, 1857; E. M. Marvin, William F. Compton, 1858; F. A. Morris, 1859-63 (served supply as the first year); Joseph Boyle, 1864-66; W. F. Camp, 1867; George H. Clinton, 1868-69; W. M. Leftwich, G. H. Clinton (supply), 1870; J. W. Lewis, 1871; L. M. Lewis, 1873; T. M. Finney, 1874-76; J. E. Godbey, 1877-78; E. M. Bounds, 1879; W. G. Miller, 1880-81; J. C. R. Hicks, 1882.

The church reported to the Conference which met in the fall of 1881 that its membership, including probationers, numbered one hundred and eighty-eight persons, and that there were twenty-four teachers and two hundred and twenty-five scholars connected with the Sunday-school. The latter was organized in 1822 by Rev. Jesse Walker, John and William Finney, Mrs. Kells, R. D. Sutton, and several others. The value of the church property, as reported to the Conference of 1881, was one hundred thousand dollars.

¹ Where two names appear in the same year the second is that of the pastor of the African Church, which was regarded as part of the Fourth Street charge.

² Mr. Drummond died soon after taking charge of his work. He was a man of brilliant talents and fervent zeal.

St. Paul's Church.—On the 2d of March, 1838, the trustees of the Fourth Street (First) Methodist Episcopal Church resolved "that it is expedient to build two new Methodist Churches in St. Louis," and appointed two committees to select sites. Of these churches the first erected was afterwards known as St. Paul's, and the second as the Centenary. St. Paul's, then known as Mound Chapel, was built in 1839, and was situated "a little north of the mound" on Broadway. Previous to this the congregation had worshiped in Mound Market. In 1850 the second church, located at Tenth and Chambers Streets, and known as Mound Church, was erected, but in 1865 the property was sold, and a lot at Twelfth and North Market Streets was purchased, but no church was built on the proposed site. A chapel was subsequently erected at the northeast corner of Tenth and Benton Streets, and the name of the congregation changed to that of St. Paul's. The building was a one-story brick structure, and seated about three hundred persons. The site of the present church, on St. Louis Avenue near West Sixteenth Street, was purchased about 1871 for five thousand dollars. It fronts one hundred feet on St. Louis Avenue, and has a depth of one hundred and forty feet. The erection of the building was commenced in 1874, and the completed edifice was dedicated in June, 1875, by Rev. Dr. Young, of Nashville, Tenn. It cost about fifteen thousand dollars, and its dimensions are forty by eighty feet, the seating capacity being three hundred and eighty persons. The first regular pastor of St. Paul's Church, as appears by the minutes of Conference, was Rev. W. T. Ellington, appointed in 1868, the congregation having in previous years been served by supplies. Since 1868 its pastors have been Revs. E. M. Bounds, 1873, 1875-78, 1880-82; W. M. Leftwich, 1874; B. W. Key, 1879. The present pastor is Rev. E. M. Bounds. The membership of the church numbers one hundred and thirteen, and the Sunday-school has sixteen teachers and one hundred and fifty scholars.

Centenary Church.—This church was one of the two congregations organized in accordance with the action of the trustees of the Fourth Street Church, taken on the 2d of March, 1838. At the meeting of the trustees on this occasion committees were appointed to select sites for two new Methodist Churches, one of these committees being instructed to choose a location on Fifth Street, not farther south than Poplar. In the autumn of 1839 the centenary of Methodism was celebrated by the Methodists of St. Louis, then numbering three hundred and thirty-five white and one hundred and forty-eight colored

members, embraced in three stations,—Fourth Street, Mound (afterwards St. Paul's), and African. The exercises were held at the Fourth Street Church, and on this occasion the sum of three thousand dollars was subscribed for the erection of a new church to be known as the "Centenary," in commemoration of the event. On the 9th of November, 1841, Rev. Wesley Browning, then presiding elder of the St. Louis District, appointed William Burd, John H. Gay, Trusten Polk, James Tabor, and John and David Goodfellow trustees to conduct the management of the enterprise. The amount originally subscribed was found to be inadequate, and in order to raise an additional sum the ladies of the congregation organized "The Female Centenary Society of the Methodist Episcopal Church." Through the efforts of this association two thousand dollars was secured and expended in part payment for a lot, sixty-five by eighty-five feet, at the southwest corner of Fifth and Pine Streets, the total cost of which was ten thousand five hundred dollars. On this site was erected a brick building with a cut-stone basement, the latter devoted to school purposes. The corner-stone was laid on the 10th of May, 1842, with Masonic rites, and the officiating ministers were Bishop Roberts and Rev. E. R. Ames. While the building was in course of construction services were held in a small frame house which had been purchased by the congregation. The basement of the new edifice was first occupied Dec. 31, 1843, watch-night services being held, and the structure was completed and dedicated in 1844.

At a meeting of the members of the congregation in the spring of 1867, it was decided to dispose of the church property and select a more eligible site. The lot at the northwest corner of Sixteenth and Pine Streets, on which the church now stands, was finally chosen and purchased for thirty-eight thousand dollars. In October, 1868, the old church and grounds were sold to J. J. Roe & Co. for one hundred and forty-two thousand dollars, but the congregation retained the use of the buildings until the new church was ready for occupancy. The board of trustees at that time was composed of Trusten Polk, John Hogan, John Kennard, John W. Burd, W. H. Markham, Mr. Maxwell, C. C. Anderson, W. C. Jamison, and P. M. Lockwood. The building committee consisted of Trusten Polk, John Hogan, W. H. Markham, John Kennard, and John W. Burd. The corner-stone was laid on the 10th of May, 1868, and the building was dedicated on the 28th of May, 1871. Bishops C. K. Keener, of New Orleans, and E. M. Marvin, of Missouri, and Rev. D. McAnally and the pastor, Rev. C. D. N. Campbell, took part in the exercises. Bishop

Keener preached the sermon. The total cost of the structure was one hundred and twenty-five thousand dollars. The building is of Gothic architecture, and the material composing the walls is St. Louis prairie limestone, with De Soto stone trimmings. The main entrance is on Sixteenth Street, where there are five large doorways. The entrance is through a vestibule fourteen feet wide by ninety long, containing four stairways. Black walnut, oak, ash, and yellow-pine are the woods principally used in fitting up the interior, which has a very elegant appearance. The auditorium is sixty feet wide by one hundred and six long. Under this there is a lecture-room and a school-room. Adjoining the church on Pine Street there are two other buildings, containing the pastor's office, library-rooms, and a young men's Methodist room for literary purposes. The pastor's residence is west of these, and contains sixteen rooms. The church and parsonage cover an area of one hundred and nine feet by one hundred and sixty. Thomas Dixon, of Baltimore, was the architect, and J. B. Legg, of St. Louis, superintended the erection of the building.

The first regular pastor was the Rev. John H. Linn, who was transferred in the autumn of 1842 from the Kentucky Conference and appointed to the charge of Centenary Church. Mr. Linn was succeeded by the Rev. John T. W. Auld, who was followed by the Rev. Joseph Boyle, appointed in 1844, who remained until 1846. In that year Mr. Boyle was succeeded by the Rev. Thomas H. Capers, who had been transferred from South Carolina. The other pastors have been Rev. Messrs. W. H. Lewis, appointed in 1848; W. M. Prottzman, 1849; J. C. Berryman, 1850; D. R. McAnally, 1851; M. F. Treslow, 1855; E. M. Marvin, 1858; C. B. Parsons, John Whittaker, Evan Stephenson, E. M. Marvin, W. Anderson, and Jesse H. Cummins acting as "supplies" during 1858, 1859, and 1860; J. Boyle, 1861; T. A. Morris, 1863; W. A. Smith, 1865; C. N. D. Campbell, 1868-69; J. H. Linn, Joseph Boyle (supply), 1870; J. H. Linn, 1873; W. V. Tudor, 1874-77; J. W. Lewis, 1878-81; W. V. Tudor, 1882. The church reported to the Conference of October, 1881, a membership of five hundred and ten persons, with thirty-five teachers and four hundred and twenty-five pupils in the Sunday-school.

St. John's Church is situated at the northwest corner of Ewing Avenue and Locust Street, and its pastor is the Rev. J. W. Lewis. In 1844 the Fourth Street Church appointed a committee to select a lot for a new church in Christy's addition, and on the 19th of May, 1845, instructed the committee to build a church as soon as their means permitted. The result

was the erection, some three or four years later, of Asbury Chapel, at the corner of Fifteenth and Gay Streets. About the year 1864, Nathan Coleman organized a Sunday-school in Stoddard's addition, and of this St. John's Church is the outgrowth. On the 5th of December, 1864, the Quarterly Conference of the First Church ordered the sale of Asbury Chapel, the proceeds to be placed in the hands of a joint committee to be appointed by the Quarterly Conferences of Asbury Chapel, First and Centenary Churches. Subsequently, during the presiding eldership of the Rev. T. M. Finney, a congregation of seventy-five persons was organized as St. John's Church, and the chapel was sold for the use of the colored Catholics, and is now St. Elizabeth's Church. The money thus obtained, supplemented by large subscriptions, was used in the erection of a church and chapel on the present site. The corner-stone of these buildings was laid June 26, 1867, with Masonic ceremonies, and the chapel was completed and dedicated on the 9th of May, 1869. Bishop Pierce preached the sermon on that occasion, and the Hon. John Hogan and the venerable minister, Andrew Monroe, delivered addresses. At this time the congregation had increased to two hundred members.

In the winter of 1879 extensive alterations and improvements were made, and on the 6th of April of that year the church was re-dedicated and used for the first time. Its site has a frontage of one hundred feet on Locust Street and a depth of one hundred and thirty-four feet eight inches on Ewing Avenue, and it has a seating capacity of eight hundred persons. The pastors have been Revs. T. A. Morris, 1868-71; J. W. Lewis, 1872-75; J. G. Wilson (now presiding elder), 1876-79; W. V. Tudor, 1880-81; J. W. Lewis, 1882. Connected with the congregation are a Ladies' Sewing Society; the "Busy Bees," composed of young ladies and children; the Women's Missionary Society, and other organizations. The membership in October, 1881, was reported at three hundred and sixty-five, with thirty-three teachers and four hundred and ten scholars in the Sunday-school.

First Church, Carondelet.—The First Methodist Episcopal Church South in Carondelet, known also as the South St. Louis First Church, is situated at the southwest corner of Fifth and Nebraska Streets. It was organized by Rev. D. R. McAnally, D.D.,¹

¹ D. R. McAnally was born in Granger County, Tenn., Feb. 17, 1810, and is descended from an old Scotch family which came to this country before the Revolution, and settled in Tennessee when it was still a wilderness. He worked occasionally on his father's farm, but received a good education at a private school. He commenced the study of law, but abandoned it for

with nine members, in June, 1857, in the present building, which had been erected and dedicated on the 17th of May, 1857. The rules of the church Conference require that pastors of churches shall be changed at least once in four years, but to this church no pastor was appointed by the Conference for twelve years, it being left from year to year "to be supplied." It thus happened that Dr. McAnally's connection with the church, as virtual though not nominal pastor, remained unbroken during the whole period, his name meanwhile only appearing in the Conference minutes as editor of the *St. Louis Christian Advocate*. In 1869, when Rev. T. M. Finney succeeded him as editor of the *Advocate*, Dr. McAnally was appointed pastor of the church, and was successively reappointed until, in 1872, he again became editor of the *Advocate*. He "supplied" the church until 1874, when the Conference appointed J. W. Robinson to its pastorate. The congregation had become deeply attached to its pastor, and was loth to sever a connection that had lasted continuously for over seventeen years and to be brought under the rule of itinerancy. In 1875 the Conference appointed

that of the ministry, and on the 31st of August, 1829, he was authorized to preach. In December, 1829, he was received on trial by the Annual Conference, and appointed to a circuit. In November, 1831, he was ordained with full powers of the ministry, and preached in Virginia, North Carolina, Tennessee, Georgia, South Carolina, and other States until 1843, when he was appointed president of the East Tennessee Female Institute, at Knoxville. In 1851, at the invitation of the St. Louis and Missouri Annual Conference of the Methodist Episcopal Church South, Dr. McAnally removed to St. Louis in order to conduct the *St. Louis Christian Advocate*, and to take charge of the book publishing interests of his church. Dr. McAnally remained in the editorial management of the *Advocate* until the outbreak of the war in 1861. In May of that year the *Advocate* was suppressed and its editor imprisoned, as being inimical to the Union, by the military authorities. In July, 1861, he was tried by a court-martial, the verdict of which was sent to Washington but never returned, and during the remainder of the war he was kept on parole and forbidden to leave St. Louis County. He was frequently rearrested, imprisoned, and released. After the war the *Advocate* was revived, with Dr. McAnally in the editorial chair, and he remained in charge of the paper until just previous to the formation of the Southwestern Book and Publishing Company in 1869, when he resigned and engaged in an educational enterprise in Carondelet. The academy he established there proved successful, and assisted by several other teachers he maintained it for nearly four years. Dr. McAnally's successor in the editorship of the *Advocate* was the Rev. T. M. Finney, but in 1872 the Southwestern Book and Publishing Company recalled Dr. McAnally to the editorship, and he has remained in charge ever since. Dr. McAnally celebrated the fiftieth anniversary of his entrance into the ministry at the Carondelet Church on the 31st of August, 1879. He has written a number of works, among them being a biography of "Martha Lawrence Ramsay," "Life and Times of Mr. William Patton," "Sunday-School Manual," etc.

Wesley Browning pastor, and in 1876, John Garton, but the congregation refused to recognize the last appointment or to support the minister. Consequently in 1877 the church was cut off from its connection with the Conference, and continued as an independent organization, with Dr. McAnally as pastor. The church lot measures one hundred and ten by one hundred and fifteen feet, and the church building twenty-six by forty-five feet. The property is valued at three thousand dollars, and the membership is reported at three hundred persons. The Sunday-school is attended by from eight to ten teachers and from eighty to one hundred and thirty scholars.

Chouteau Avenue Church.—In September, 1841, a class-meeting was organized at the house of Reuben Russell, on Convent Street, and this formed the nucleus of Wesley Chapel. In 1842, Wesley Browning being then the presiding elder of the St. Louis District, the extreme northern and southern portions of the city were formed into a station, which was placed in charge of Rev. T. W. Ould, and in the following year the southern charge was constituted a separate station and designated as the South St. Louis Church, Rev. W. M. Rush, pastor. In 1844 a church building known as Wesley Chapel was erected on Paul Street, between Chouteau Avenue and Hickory Street, and was dedicated by the Rev. Jonathan Stamper. The pastor, according to the Conference reports of 1844, was the Rev. John A. Tutt. In 1848 the congregation removed to a lot at the northeast corner of Chouteau Avenue and Eighth Streets, and began the erection of another building, which, however, before being completed was demolished by a storm. The structure was rebuilt and dedicated by Rev. D. S. Doggett in 1850. It was a plain two-story brick building forty by seventy feet, and seated about three hundred persons. The building was demolished in 1873, and the present edifice, a neat brick structure, with a capacity for seating three hundred and fifty persons, was erected at the same locality. The name was changed at this time from Wesley Chapel to that of Chouteau Avenue Methodist Episcopal Church South. The pastors since then have been Revs. J. H. St. Clair, 1873; F. A. Owen, 1874-75; W. M. Williams, 1876; J. J. Watts, 1877-79; B. W. Key, 1880; W. R. Mays, 1881-82. The report of October, 1881, showed that the congregation then numbered seventy-three members, and that there were thirteen teachers and one hundred and twenty-five pupils in the Sunday-school.

Marvin Mission, 2629 Menard Street, Rev. D. Q. Travis, pastor, grew out of a Sunday-school organized by a Mr. Ray in a blacksmith's shop in 1859.

A room was afterwards rented, and the school continued for four years under the care of its founder and Simon Boogher. It had a checkered career, being frequently closed for months at a time and reopened, until the formation of the present organization. The mission now owns a lot fronting thirty-five feet on Menard Street, and a frame building for worship with a seating capacity of two hundred and sixty-five, which was dedicated Dec. 29, 1874. The property is valued at three thousand dollars. The pastors have been Revs. Wesley Browning, J. W. Robertson, — Staunton, J. J. Watts (appointed September, 1875), W. R. Mays (appointed September, 1877), D. Q. Travis, appointed September, 1881. The membership of the church is one hundred and forty; the Sunday-school has nineteen teachers, and an attendance of between two hundred and three hundred scholars.

Page Avenue Church was organized in 1877 with twelve members. J. T. Dowdall, E. S. Greenwood, and Rev. J. T. Watson were the first official board, and Rev. R. F. Chew was the first pastor. Rev. B. F. Key succeeded him in 1878, and was followed in 1879 by Rev. J. E. Godbey, who has been pastor since. The erection of a church building is contemplated, but in the mean time the congregation occupies a chapel on Page Avenue near Grand Avenue. The membership numbers seventy-four persons, and the average attendance at the Sunday-school, of which R. M. Seruggs is superintendent, is two hundred and forty.

THE GERMAN METHODISTS.

Prior to 1841 there was no organization of German Methodists west of Indiana, but in that year the Missouri Conference of the Methodist Episcopal Church established the Belleville mission in Illinois, and the St. Louis and Pinckney missions in Missouri. Rev. L. S. Jacoby was appointed to the St. Louis mission, and took charge of it in August, 1841. He rented a meeting-house from a Presbyterian organization, and commenced preaching with great success. At the close of his first year's labors he reported one hundred and fourteen members, besides numerous others who had joined the society but had removed to other places. He was reappointed for a second year, during which he greatly strengthened the foundations of the prosperous German societies, of which there are now four in the city. St. Louis District was in 1845, with the other missions in Missouri and Illinois, transferred from the Missouri to the Illinois Conference, with L. S. Jacoby and William Nast as presiding elders.

Dr. Nast was extensively known as the father of German Methodism, and labored with great success in St. Louis. He was a native of Germany,

where he had been highly educated, and as a young man emigrated to America. His attention was attracted to the subject of religion by the preaching of the Rev. Mr. Romer on the banks of the Hudson River. He was then teaching in West Point, and subsequently became a professor in Kenyon College, Ohio. After three years of mental conflict he was converted in January, 1835. Through the agency of Dr. Adam Poe he was induced to become a minister, and in the same year was sent as missionary to Cincinnati. Through his efforts German Methodist publications were commenced, the first issues being the General Rules, Articles of Faith, and the Wesleyan Catechism. The *Christian Apologist* was soon issued under his editorial supervision, and he remained the editor for more than forty years. Under his preaching in Cincinnati John Swahlen was converted, becoming afterwards an efficient and successful evangelist, and Dr. Jacoby, who subsequently associated with him in the missionary work in Missouri and Illinois, was also among his early converts. Dr. Nast organized the first German Methodist Society in 1838, and reported to Conference thirty members.

Ludwig S. Jacoby, D.D., was born on the 21st of October, 1813, in Old Strelitz, Mecklenburg, Germany, and died in St. Louis on the 21st of June, 1874. He received a good education, especially in the ancient languages, and in 1835 was baptized by a Lutheran clergyman. In 1839 he emigrated to America, and located in Cincinnati as a physician. He also devoted himself to teaching. While attending the religious services held by Dr. Nast on Christmas-day his interest in religion was awakened, and he was converted on the following watch-night. In August, 1841, he was sent to St. Louis by Bishop Morris to start the first German mission in that city, and his labors were rewarded with great success. In 1849, owing to his desire for the conversion of his native countrymen, Bishop Morris, with the co-operation of the Missionary Board, sent him to Germany to begin evangelistic work in Bremen. His labors there resulted in the formation of a Methodist Episcopal Society. In his work in Germany he labored faithfully as presiding elder, pastor, editor, book agent, and superintendent. Having spent twenty-two years in that work he returned to the United States, and was transferred to the Southwestern German Conference, and stationed at the Eighth Street German Church, St. Louis. He was a delegate from the Germany and Switzerland Conference to the General Conference of 1872.

In 1864 three German Conferences were established, called the Central, Northwestern, and Southwestern,

St. Louis District being included in the Southwestern. In 1879 the St. Louis Conference was organized, comprising St. Louis, Belleville, and Quincy, Ill., and Burlington, Iowa, Districts. It reported 8344 members, 130 churches, 112 local preachers, 67 parsonages, 157 Sunday-schools, with 1555 officers and teachers and 8471 scholars. The value of the church property was estimated at \$400,000. The presiding bishops of the Southwestern Conference were: Edmund S. Jancs, 1864, 1868, 1871; Edward R. Ames, 1865, 1875; Matthew Simpson, 1866, 1870; Levi Scott, 1867, 1874; Edward Thompson, 1869; Gilbert Haven, 1872; Thomas Bowman, 1873; Isaac W. Wiley, 1876; Jesse T. Peck, 1877; Stephen M. Merrill, 1878; of St. Louis Conference, Thomas Bowman, 1879; Edward G. Andrews, 1880; John F. Hurst, 1881. The presiding elders of St. Louis District since 1864 have been Revs. Philip Kuhl, 1864; John Kost, 1865; Gerhard Timkin, 1866; Frederick Stoffregen, 1867-70; Henry Pfaff, 1871-72; L. S. Jacoby, 1873; Wm. Schwind, 1874-77; J. M. De Wein, 1878-81.

First German Church.—The First German Methodist Episcopal Church, situated at the southwest corner of Sixteenth and Wash Streets, Rev. Charles Holtkamp, pastor, was organized in 1841 by Rev. L. S. Jacoby, who was its pastor during the first two years of its existence. His successors since 1864 have been Revs. John Schlagenhaut, 1864-65; Henry Pfaff, 1866-68; Charles Heidel, 1869-71; supply, 1872; Henry Pfaff, 1873-75; Charles Heidel, 1876; Henry Schuetz, 1877-79; Charles Holtkamp, 1880-82. The church is in a prosperous condition, the average attendance being about seven hundred. The first place of worship built by the congregation stands on Wash Street, between Tenth and Eleventh Streets. It was sold to the colored Methodists, and is now occupied and known as Wesley Chapel. It is a two-story brick building, forty by seventy feet, and seats about two hundred and fifty persons. The present church building was erected in 1872. It is a two-story structure, sixty by one hundred and ten feet, with lecture- and class-rooms on the first floor. The main auditorium, including the gallery, will seat eight hundred persons. The church lot measures seventy-five by one hundred and fifty feet. The cost of the property was for lot, sixteen thousand dollars; for church, fifty thousand dollars; and for parsonage, nine thousand dollars.

Benton Street German Church.—This church was organized in 1854, and since 1864 has had for pastors Revs. Henry Waumann, 1864-66; Aug. Korf-

hage, 1867-68; Henry Ellenbeck, 1869-71; Henry Schuetz, 1872-74; George Buehner, 1875-77; H. Lahrmann, 1878-80; and Charles Rodenberg, 1881-82. The church building is situated at the southwest corner of Thirteenth and Benton Streets. It was erected in 1850, and seats about two hundred persons. There are seventy-five families and two hundred and twenty members connected with the congregation, and twenty-six teachers with over two hundred pupils in the Sunday-school.

Eighth Street German Church was organized about 1864, since when the pastors have been Revs. J. M. Winkler, 1864-65; R. Havighorst, 1866; Jacob Feisel, 1867-68; Henry Pfaff, 1869-70; supply, 1871; L. S. Jacoby, 1872; Charles Heidel, 1873-75; Henry Pfaff, 1876; J. P. Miller, 1877-78; Frederick Stoffragen, 1879; Henry Schuetz, 1880-82. The membership numbers two hundred, and the morning Sunday-school is attended by nine teachers and about eighty scholars. The building, situated at the southwest corner of Eighth and Souard Streets, is a two-story brick, with lecture- and class-rooms on the first floor. St. Paul's Church, on Sophia Street, between Pestalozzi and Arsenal Streets, which was established in 1874, and had Rev. J. Louis Kessler for pastor in 1876-78, is now used exclusively as the afternoon Sunday-school of the Eighth Street Church, under the supervision of Henry Meyer, with ten teachers and an average attendance of one hundred scholars.

AFRICAN METHODIST EPISCOPAL CHURCHES.

Up to 1816 the colored Methodists had no separate organization, but in April, 1816, a convention of colored delegates was held in Philadelphia, and the African Methodist Episcopal Church was formed. Richard Allen, the first colored minister ordained in the United States (ordained by Bishop Asbury in 1799), was consecrated bishop of the new church on the 11th of April, 1816. The General Conference of the African Methodist Episcopal Church is now divided into nine Episcopal districts, the fourth of which includes the Missouri, North Missouri, Kansas, and Illinois Conferences, and is presided over by Bishop T. M. D. Ward, D.D., who was elected and consecrated to that office at the General Conference sitting at Washington, D. C., in May, 1868. In 1866 the General Conference of the Methodist Episcopal Church South established several colored Annual Conferences, which organized a colored General Conference, which first met at Nashville, Tenn., Dec. 16, 1870. There were at the time some colored churches in St. Louis in connection with this General Conference South, but they have dwindled away, and now

all the colored Methodist Churches in the city (with one exception) belong either to the African Conference above named or to what is known as the Zion Conference.

Wesley Chapel (Colored), 1008 Wash Street, Rev. J. W. Hughes, pastor, was organized in 1858 with seventy-five members, and its pastors since 1866 (up to which time it depended on supplies) have been Revs. E. W. S. Peck, 1867-69; E. Pitts, 1871-72; F. H. Sinall, 1873-75; R. H. Smith, 1876-78; E. Pitts, 1879; J. W. Hughes, 1880-82. This is the only colored church in St. Louis that is connected with the St. Louis Methodist Episcopal Conference (white). It reports four hundred and thirty members, one hundred and four probationers, fifteen teachers, and one hundred and eighty children in the Sunday-schools, and a church and parsonage valued at about three thousand dollars.

St. Peter's Church.—The corner-stone of St. Peter's African Methodist Episcopal Church, situated at the corner of Elliott Avenue and Montgomery Street, was laid on the 18th of May, 1874, and the building, a one-story brick structure, was completed in 1865. On the 29th of October, 1882, the corner-stone of a large building to occupy the same lot was laid. The church is well attended, and attached to it is a flourishing Sunday-school. The pastor is the Rev. J. I. Lowe.

St. Paul's Church, situated at the corner of Eleventh Street and Christy Avenue, is the largest colored Methodist congregation in the city, and worships in a large and handsome brick building which was erected in 1872, under the pastorate of Rev. John Turner. It is of St. Louis brick, ninety-seven by fifty-eight feet, and reflects great credit on the architect, A. T. Berthe, a colored man. The building, which cost twenty-eight thousand dollars, was dedicated on the 4th of August, 1872. The congregation embraces five hundred families, with two thousand two hundred names enrolled on the church list and twelve hundred communicants. There are thirty-two teachers and four hundred scholars in the Sunday-school, and the pastor is the Rev. T. M. Henderson.

Quinn Chapel, Market and Third Streets, Carondelet, Rev. B. W. Stewart, pastor, has an average congregation of about one hundred and fifty.

Washington Zion Chapel.—This congregation, situated at 2627 Morgan Street (Rev. A. J. Warner, pastor), has in its connection three hundred and fifty families, about one thousand attendants, and one hundred and fifty communicants. There are twenty-five teachers and nearly two hundred scholars in the Sunday-school.

Washington Zion, St. Mark's Branch, Morgan Street, between Eighteenth and Nineteenth Streets, Rev. Anthony Bunch, pastor, has a membership of fifty families, sixty communicants, and seven teachers and fifty scholars in the Sunday-school.

PRESBYTERIAN CHURCHES.

Early History.—Among the American Protestants who emigrated to St. Louis after the cession of the territory to the United States was Stephen Hempstead, of New London, Conn. He arrived in St. Louis on the 12th of June, 1811, with his family, and settled on a farm which is now part of Bellefontaine cemetery. He was in his fifty-eighth year, and had been a soldier in the war of the Revolution, and a member of the Presbyterian Church for twenty-four years. The first sermon heard by him in his new home was preached, seven months after his arrival, by a Baptist minister. In 1812, Revs. S. J. Mills and J. F. Schermerhorn were sent out by the missionary societies of Massachusetts and Connecticut on an exploring expedition to the South and West, and from Fort Massac, near Shawneetown, Ill., they wrote to Mr. Hempstead, who, in reply, spoke so confidently of the prospect for ministerial labor, that in 1814 Mr. Mills, with Rev. Daniel Smith, repaired to St. Louis as agents of the Philadelphia Bible and Missionary Societies. They remained a short time, during which they preached frequently. They organized a Bible society, and collected some three hundred dollars for it, and their labors marked the beginning of Presbyterianism in Missouri. Hempstead soon after wrote to Dr. Channing, of Boston, earnestly entreating that ministers be sent to Missouri. "I think," he says, "the number of families in the Territory which removed from the States that have been born and educated in the Presbyterian Church is not less than one thousand, and not a Presbyterian minister or society in the country." In the autumn of 1816, Dr. Gideon Blackburn visited St. Louis, and remained a short time, preaching in the theatre on Main Street below Market. But the real pioneer of Presbyterianism in Missouri was Salmon Giddings, who was induced by the reports of Mills and others to choose Missouri as his field of missionary labor. He was commissioned for this work by the Connecticut Home Missionary Society, and left Hartford in December, 1815. He made the journey of twelve hundred miles on horseback in the winter, and on April 6, 1816, reached St. Louis, where he found no Protestant Church of any kind in existence. He administered the Lord's Supper, July 21, 1816, to Stephen Hempstead and

his wife and daughter, and probably to Thomas Osborne, as the latter and Hempstead were in the following year made elders of the first church organized in the city. This was the first time the rite had been administered by Presbyterian hands west of the Mississippi. At Bellevue settlement, Washington Co., about eighty miles from St. Louis, four Presbyterian elders from North Carolina had maintained religious service since 1807, and here Mr. Giddings organized, Aug. 2, 1816, the first Presbyterian congregation in Missouri. It was called Concord Church, and numbered thirty members. To this little congregation, and a large concourse of persons who did not belong to it, he preached in the open air on Sunday, August 4th. In two years the communicants had increased in number to forty-eight. In the autumn of 1817 the Rev. Thomas Donnell removed to the Territory from Kentucky, and received a call from the church to become the pastor. On the 25th of April, 1818, he was installed, with the understanding that he was to divide his time in ministering to this congregation and to adjacent settlements. During his ministry many additions to the church were made. Mr. Donnell died on the 8th of February, 1843. Owing to frequent removals of members to other portions of the Territory, the congregation in 1823 numbered only forty-five persons.

On the 16th of October, 1876, Mr. Giddings organized a church of seventeen members at Bonhomme, St. Louis Co. One of the constituent members was Stephen Hempstead, Sr. For some years the church was without a regular pastor, receiving only occasional visits from different ministers. Among these the most frequent in attendance was the Rev. Mr. Giddings. Meetings were usually held in the log cabins of the settlers, and, owing to the unsettled state of the country, the early growth of the congregation was not encouraging. In two years four persons were received on profession of faith, and five were dismissed, owing to their removal. Up to 1824 ten persons had been received, yet owing to deaths and removals only ten remained. During 1824 and 1825, Rev. John Ball preached occasionally for the congregation.

Rev. Timothy Flint, the second Presbyterian minister who settled in Missouri, arrived at St. Charles Sept. 10, 1816, and remained there several years. Rev. John Matthews was the next, who arrived in May, 1817. He established himself near the site of the present city of Louisiana, and organized the Buffalo Church.

Mr. Matthews had previously been a resident of Erie County, Pa. With his duties as minister of the

church he combined those of an itinerant missionary, under the patronage of the Connecticut Missionary Society (Congregationalist) and the General Assembly of the Presbyterian Church. In 1821 the church had increased to thirty members. In March, 1825, Mr. Matthews removed from that region to Cape Girardeau County, and from thence to Illinois. Subsequently he became pastor of the church in Bonhomme settlement.

The fourth Presbyterian Church established west of the Mississippi was the First Presbytertian Church of St. Louis, which was organized on the 15th of November, 1817, by the Rev. Salmon Giddings. The congregation consisted of nine members, of whom the ruling elders were Stephen Hempstead and Thomas Osborne. The church at St. Charles was established Aug. 29, 1818, by Rev. S. Giddings and Rev. John Matthews. On the 18th of December, 1817, the Presbytery of Missouri (organized by the Synod of Tennessee), consisting of the four ministers and four churches just named, held its first meeting in St. Louis. Its territory comprised all that portion of Illinois west of a meridian drawn through the mouth of Cumberland River and running north, nearly the whole State, together with all Missouri. The first sermon printed in Missouri was preached by Mr. Giddings, on the death of Edward Hempstead, Territorial representative in Congress, and son of Stephen Hempstead. The second was by the same minister, on the first installation west of the river, that of Thomas Donnell as pastor of Concord Church, April 25, 1818. During the nine years that followed, Presbyterian ministers labored industriously and organized churches throughout the State as far north as Louisiana, as far west as Chariton, and as far south as Apple Creek, while Giddings continued his work of organizing churches throughout Missouri and Illinois. On the 7th of December, 1818, he installed as pastor of the church at St. Charles the Rev. C. S. Robinson, who had come from Massachusetts as a missionary in 1816, and of whom it is related that he was at one time "entirely out of money and out of food for his family, but just when his need was greatest he found a silver dollar imbedded in the earth, which sufficed for all his wants until a more permanent supply came,"—a picture of the trials and difficulties of the pioneer preachers of those days. During the same year the Territory was visited by two young missionaries, Nicholas Patterson and a Mr. Alexander, who had been sent out under the patronage of the Board of Missions of the General Assembly of the Presbyterian Church. They traveled extensively in the counties along the Missouri River. Union Church of Richwoods, Jefferson Co., was or-

ganized by Mr. Giddings on the 17th of April, 1818, but in a few years became extinct. The church at Dardenne was constituted Sept. 19, 1819, by the Rev. Charles S. Robinson.

An interesting episode in the denominational history of this period is the organization of a mission to the Osage Indians, which was established in 1820 at Harmony, near the line of Vernon and Bates Counties. The company, consisting of three ministers, a physician, farmers, mechanics, a schoolmaster, and twelve ladies, had to ascend the Arkansas River and pass through the Cherokee country to reach their destination. Two of the ladies died on the way. Two years later a church was organized with twenty members, to which only two others were added in ten years. In April, 1821, the Rev. Edward Hollister organized a church at Franklin, opposite Boonville, which survived only a few years. The church of Apple Creek, in Girardeau County, was constituted May 21, 1821, by the Rev. Salmon Giddings. In 1825 the congregation had increased from forty-one (the original number) to fifty-four members, and the Rev. John Matthews became the pastor.

The first ordination in Missouri was that of the Rev. W. S. Lacy, March, 1824, by the presbytery, which held its sessions in the Baptist Church in St. Louis, the Rev. Messrs. Charles S. Robinson, Jesse Townsend, Salmon Giddings, and Thomas Donnell taking part in the exercises. The second ordination was that of John S. Ball, a State senator, who, having been converted, resigned his position, received instruction from Mr. Giddings, and was licensed in 1824 and ordained June 12, 1825, being then fifty-two years of age. The officiating ministers at the ordination were Rev. John Matthews, of Pike County, Rev. Salmon Giddings, and Rev. W. S. Lacy.

Mr. Giddings died Feb. 1, 1827, in the forty-fifth year of his age. Salmon Giddings, as we have seen, was the pioneer of Presbyterianism in Missouri, and for many years a conspicuous minister and educator in St. Louis. He was born in Hartford, Conn., on the 2d of March, 1782. His parents were Congregationalists by education and habit, though not regular members of the church. In January, 1807, he united with the Congregational Church in his native parish, and soon afterwards entered Williams College. After graduating he remained for some time at that institution in the capacity of tutor, and then repaired to Andover Theological Seminary for the purpose of completing his theological studies. He left the seminary in September, 1814, and was ordained to the ministry on the 20th of December following. During 1815 he served as an itinerant minister in Massachu-

setts and Connecticut, and in December of that year received a commission from the Missionary Society of Connecticut to labor in the Western country, but more particularly in St. Louis and its vicinity. He arrived in St. Louis on the 6th of April, 1816, and, as previously stated, was the first Presbyterian minister who established himself west of the Mississippi. Two Presbyterian ministers had visited the country and had preached six times, but neither of them had remained permanently.

As we have seen, Mr. Giddings organized on the 2d of August, 1816, the congregation at Bellevue settlement, and on the 15th of November, 1817, the First Presbyterian Church of St. Louis. For more than a year previous to this he had conducted a school (opened Oct. 12, 1816) "in the two-story frame (house) on the hill, built by James Sawyer, south side of Market, above Fourth, just opposite the south entrance to the present court-house, subsequently used for long years as the county court and clerk's office." On the 3d of January, 1818, he was also conducting a school for girls, which was situated, apparently, on the same location, the south side of Market Street, above Fourth. In the *Republican* of Nov. 16, 1816, appeared the announcement that Mr. Giddings would preach at the theatre on the following day, but it would seem that services were also held at his school-room, for on the 23d of October, 1818, notice was given that the Rev. Green P. Rice would deliver a sermon at the school-room on the following Sunday. On the 20th of September, 1818, a meeting was held at the residence of Mr. Giddings, "to take into consideration the expediency of erecting a Protestant house for divine worship." The building was dedicated on the 26th of June, 1825, and on the 19th of November following Mr. Giddings was installed as pastor. He did not, however, restrict himself to this field of labor, but worked diligently on both sides of the Mississippi, and established twelve churches, six in Missouri and six in Illinois. His longest and most arduous journey was that which he made as the agent of the missionary society to the Omaha, Pawnee, and other Indian tribes, and which consumed three months. Mr. Giddings was also an earnest and active agent in the distribution of Bibles and Sunday-school and tract publications. The preliminary meeting to form the first society for the circulation of the Bible west of the Mississippi was held in his school-room on the 8th of December, 1818. Mr. Giddings died on the 15th of February, 1828. He was a man of untiring energy, lofty purity of character, and indomitable zeal in the cause of his religion. He was succeeded

as pastor of the First Church and leader of the Presbyterian movement by William S. Potts, D.D.

In 1830 a band of seven young men, graduates of Auburn Seminary, repaired as missionaries to Missouri, and settled at various points. In the same year also Dr. David Nelson, author of "The Cause and Cure of Infidelity," appeared as a worker in the field of Missouri Presbyterianism. Dr. Nelson settled in Northeastern Missouri, but owing to his opposition to slavery was compelled by a mob to flee from the State. A similar fate befell Rev. Elijah P. Lovejoy, who was ordained by the St. Louis Presbytery in June, 1834. Mr. Lovejoy was for some time pastor of the Des Peres Church, and afterwards editor of the *St. Louis Observer*, the first religious journal started west of the Mississippi. He was a bitter and uncompromising opponent of slavery, and in 1837 his press was destroyed, and himself driven out of the city by a mob. Before the end of the year he was killed by another mob at Alton, Ill. Dr. W. W. Hall, better known as the editor of *Hall's Journal of Health*, was, about this time, pastor of the St. Charles Church for two years. The colored people received earnest attention from the first missionaries and their successors. Meetings were held, and churches and schools organized especially for them. The schools met with some opposition, but not of a serious nature. The cause of temperance also received its share of attention. The congregation of the Second Church in St. Louis, under Dr. Hatfield, was pledged to entire abstinence, and in a district in Southeast Missouri, where there were forty distilleries, many of the latter were speedily closed, and one of them was transformed into a church. In 1831 the presbytery was divided into three distinct organizations,—Missouri, St. Louis, and St. Charles,—and these in 1832 were erected into a Synod, there being then in the State twenty-three churches and eighteen ministers, of whom thirteen were in the pay of the American Home Missionary Society, although most of them had been sent out by the Presbyterian Board of Missions. The reason for the change was that the former fixed their salaries at four hundred dollars, whereas the board paid its agents one hundred dollars a year, with the understanding that they were to obtain whatever additional compensation they could from the little mission churches to which they preached.

In April, 1838, Dr. Artemas Bullard arrived in St. Louis to assume the pastorate of the First Church, *vice* Dr. Potts, then president of Marion College. He at once took a front rank among the Presbyterian ministers of the West. The controversy which led to the division of the church into

Old and New School was raging in the Eastern States, and making itself felt throughout the West, although the actual separation did not take place in Missouri until 1841. At this time Dr. Potts was recognized as the leader of the Old School and Dr. Bullard as the leader of the New. Each of the two schools went on its own way, organizing new churches, forming new presbyteries, and carrying on missionary work,—the Old School through the Board of Missions, and the New through the American Home Missionary Society. Between the years 1830 and 1840 a remarkable religious agitation occurred in the western part of Germany, especially in the duchy of Lippe-Deimold. In nearly every village and town the people left the established Lutheran Church and formed themselves into conventicles, prayer-meetings, and worshipping assemblies. They were severely persecuted by the ruling clergy, and in 1849 a number of peasant families emigrated and settled in Gasconade County, Mo. They were not acquainted with the character of the religious denominations in the country, but were at length directed to the Presbyterian Church as the one with which they most nearly affiliated. Soon afterwards they were organized into the Bethel Church by the Presbytery of St. Louis, Old School. Since then they have grown to large proportions as a denomination.

In 1857 began the long series of troubles growing out of the question of slavery, to which institution the New School was known to be opposed, whereas in the Old School there was but little discussion on the subject. Hence, in Missouri, many persons left the New School for the Old, and the New School was gradually cut off from all missionary work. During the war it dwindled to such insignificant proportions that the total extinction of its Synod in Missouri was generally expected; but when the war had ended it was still intact, and started anew with fresh life and undiminished zeal. When the secession of the Southern States from the Union took place the Presbyterians in those States organized a Southern General Assembly, and in 1866 the Missouri Presbyterians of Southern sympathies separated from the Old School Synod and organized the Independent Synod of Missouri, which is now connected with the Southern General Assembly. In 1870 the Old and New School branches of the General Assembly came together and reorganized as one body, and in the same year the same reunion was effected in the Missouri Synod. The Synod of Missouri is now divided into the following presbyteries: St. Louis (southeastern part of the State), Ozark (southwestern part), Osage (central part), Jefferson City to Kansas City), Platte

(northwestern part), and Palmyra (northeastern part). According to the last report this Synod has 215 churches, 134 ministers, 11,667 members, and 15,702 Sunday-school members, and had expended during the year \$19,657 for congregational, and \$37,336 for benevolent and other uses. The Presbytery of St. Louis reported 50 churches, 44 ministers, 4183 members, 6714 Sunday-school members, \$88,126 spent for congregational, and \$27,293 for benevolent and missionary uses. The Independent (or Southern) Synod reported 129 churches, 74 ministers, 7761 members, 4100 Sunday-school members, \$52,316 for congregational, and \$15,672 for benevolent uses. It is divided into the St. Louis, Lafayette, Missouri, Palmyra, and Potosi Presbyteries. St. Louis Presbytery reported 24 churches, 17 ministers, 1513 members, 902 Sunday-school members, \$19,297 for congregational, and \$5387 for other uses.

An important institution of the denomination in St. Louis is the Depository of the Presbyterian Board of Publication, 1107 Olive Street, which was established as a missionary department of the board in 1874 under charge of Rev. R. Irwin, D.D. Dr. Irwin was succeeded, Sept. 1, 1880, by the Rev. J. W. Allen, D.D., up to that date editor and publisher of the *St. Louis Evangelist* (which he established in 1874), and of which he continues to be the publisher. At the Synod which met in October, 1882, the scope of the institution was enlarged, and from a missionary department it was raised to the rank of a branch depository of the board of publication, with a capital stock of fifteen thousand dollars. In the upper rooms of the spacious building are held the Monday morning meetings of the Presbyterian Ministerial Association, and the meetings of the Woman's Presbyterian Board of Missions for the Southwest, which was organized about six years ago and has now about two hundred and fifty auxiliaries.

The First Presbyterian Church, situated at the northwest corner of Fourteenth Street and Lucas Place, Rev. Hervey D. Ganse, D.D., pastor, was organized by Rev. Salmon Giddings, Nov. 15, 1817, at which date the following document was drawn up and signed: "Being desirous of enjoying the benefits of the ordinances of religion which God has instituted, and in order to maintain divine and public worship, live more to His glory, and promote each other's grace and spiritual comfort, we, the undersigned, mutually unite together in church relation and covenant, known by the name of the First Presbyterian Church of St. Louis. We also solemnly covenant, before God, to be the Lord's; to watch over each other in the Lord; to conduct as God shall give us grace, in the spirit of

Christian meekness; to walk as becometh saints before the world; to maintain the worship of God in our families, and to attend to all the ordinances and means of grace which God hath appointed to be observed in His church. We take the Scriptures of the Old and New Testaments for the rule of our faith and practice, and the Confession of Faith, as revised and adopted by the Presbyterian Churches in America, as the best summary and explanation thereof." The paper was signed by ten persons: Stephen Hempstead, Mary Hempstead, Britannia Brown, Chloce Reed, Mary Keeny, Magdalen Scott, Thomas Osborne, Susanna Osborne, Susan Gratiot, and Sarah Beebe. Hempstead and Osborne, the only male members, were ordained ruling elders on November 23d, and the services of the church were thenceforth regularly held in Rev. Salmon Giddings' school-room, on Market Street opposite the court-house.

On the 20th of September, 1818, a meeting was held at the residence of Mr. Giddings to take into consideration the expediency of building a Protestant house of worship, and on the 11th of January, 1819, another meeting was held to devise means for erecting the proposed building. Stephen Hempstead was chosen chairman, and Thomas H. Benton, clerk. Col. Alexander McNair, Rev. Salmon Giddings, and Nathaniel Beverly Tucker were appointed a committee to draft a subscription paper, which was circulated not only in St. Louis, but also in New York, Philadelphia, and Washington. John Quincy Adams contributed twenty-five dollars, and subscriptions were received from people of all denominations, including several Catholics. The heaviest contribution was that of two hundred dollars from Matthew Kerr. The total subscription was three thousand dollars.

The enterprise thus begun was not completed for many years, notwithstanding strenuous exertions on the part of the pastor, who made its completion a personal matter, collecting funds, laboring with his own hands, and borrowing money on his personal security for its completion. His untiring efforts were at last successful. The lot on which "Veranda Row" was subsequently built, extending on Fourth Street from St. Charles Street to Washington Avenue, was bought for three hundred and twenty-seven dollars, and the building was erected at what was then the enormous cost of eight thousand dollars (leaving a debt of five thousand dollars), and was dedicated on the 26th of June, 1825. It was a brick building, forty-six by sixty-five feet, two stories in height, with a cupola and spire.

On the 19th of November, 1826, Mr. Giddings was formally installed "over the Presbyterian Church and

congregation of St. Louis" by the Presbytery of Missouri. The introductory prayer was offered by the Rev. Hiram Chamberlain, and the call of the congregation was read by the Rev. John S. Ball. The sermon was then delivered by the Rev. Charles S. Robinson. The charge to the pastor was made by the Rev. John Matthews, and the charge to the congregation by the Rev. Thomas Donnell. The concluding prayer and benediction were delivered by the Rev. William S. Lacy. Mr. Giddings died, as heretofore stated, Feb. 1, 1827, and his funeral was attended by a concourse of persons numbering two thousand.

His successor was the Rev. William S. Potts, D.D., who reached St. Louis on the 14th of May, 1828, and was ordained by the Presbytery of Missouri, and installed as pastor Oct. 26, 1828. On this occasion the sermon was preached by the Rev. William S. Lacey, and the ordination prayer was offered by the Rev. John Matthews. The charge to the pastor was pronounced by the Rev. John S. Ball, and the charge to the people by the Rev. Solomon Hardy.

Next to the Rev. Mr. Giddings, Dr. Potts was more prominently identified with the cause of Presbyterianism in Missouri than any other minister. He was born at Trenton, N. J., in 1804. His parents, members of the Society of Friends, desired that he should learn the trade of printing, but before finishing his apprenticeship he turned his attention to the study of the law. Soon after this, however, he determined to devote himself to the ministry, and in 1825 entered the Theological Seminary at Princeton, N. J. In 1828 he was licensed as a probationer, and, being in delicate health, determined to go South, in the hope not only of being benefited by the less rigorous climate, but of performing effective work among the Indians. He remained in this field of labor but a short time, and in May, 1828, by direction of the Board of Missions, under whose supervision he then acted, he repaired to St. Louis and preached for the First Presbyterian Church, over which he was installed pastor by the Presbyterian Mission the autumn following. Dr. Potts remained in charge of the First Church, which developed rapidly under his active and efficient ministrations, until the 26th of June, 1835, when he resigned the pastorate in order to assume the presidency of the newly-organized Marion College. This institution was established for the purpose of training young men for the ministry. A charter was obtained and the college organized at Marion City, Mo., but it did not prove successful, and Dr. Potts accepted a call to the pastorate of the Second Presbyterian Church, and was installed Oct. 5, 1839. He

remained in charge of the church until his death, which occurred on the 28th of March, 1852, after a lingering illness, and while the church bell was calling the children to Sunday-school.

Dr. Potts was a man of great learning and exalted piety, and enjoyed the respect and confidence not only of his own denomination, but of the community at large. His successor at the First Church was the Rev. Dr. William Wisner, who was called July 23, 1835, but was never formally installed, and resigned on account of ill health in May, 1837. Dr. Artemas Bullard (than whom no minister ever exerted a more widespread influence in the Presbyterian Church in Missouri) was called April 2, 1838, installed June 27, 1838, and perished in the Gasconade disaster in 1855. Dr. Henry A. Nelson, who took charge in October, 1856, was installed Nov. 23, 1856, and resigned in the spring of 1868 to accept the chair of pastoral theology in Lane Theological Seminary, Cincinnati, Ohio. Rev. Charles A. Dickey, of Allegheny City, Pa., who began his pastoral work in May, 1869, was installed July 4, 1869, and resigned in October, 1875, to accept a call to Philadelphia. Dr. H. D. Ganse, of New York City, was called in December, 1875, and is still the pastor. In 1832, John Shackford, of Washington, who styled himself "a friend of missions," wrote to Dr. Peters, then secretary of the American Home Missionary Society, saying, "I wish to add to the laborers already in the field in Missouri. I have concluded to devote to that purpose one hundred and four dollars per quarter, however much my circumstances may be thereby straitened or my deprivations increased. I have determined to preach the gospel by proxy for two years, if not for life, and I am unwilling to be persuaded, however avarice, ease, cupidity, comfort, or convenience may plead, to accept a proposition by which the sum furnished would be reduced. I desire you to send the missionary to St. Louis." In consequence of this offer, Rev. E. F. Hatfield was sent out, and organized Nov. 23, 1832, the Second Presbyterian Church of St. Louis, for which purpose a colony of twenty-nine members was dismissed by the First Church, the membership of which had increased to two hundred and fifty. Mr. Hatfield remained two years and a half, when, in consequence of the death of his wife, he returned East, and as it was not convenient for him to resume his labors in St. Louis, the church became disorganized and was dissolved, reuniting with the First Church in February, 1837, and bringing back fifty-four members in place of the twenty-nine who had been dismissed.

Subsequently other churches were formed as colo-

nies of the First that have had a longer existence, to wit: the Second (in October, 1838), Walnut Street, Third (now the First Congregational), Washington Avenue (now the Pine Street), North, High Street (now Grand Avenue), and others.

The building now occupied by the congregation, opposite Missouri Park, is a memorial of the foresight and great executive ability of Rev. Dr. Artemas Bullard. It was dedicated on Oct. 21, 1855, although the lecture-room had been occupied for some time previous. Rev. Dr. Beeman, Rev. Mr. Wisner, and Rev. Dr. Bullard took part in the exercises. After the sermon, preached by Dr. Beeman, a funeral hymn was sung, and during the singing the remains of the first pastor of the congregation, the Rev. Salmon Giddings,

FIRST PRESBYTERIAN CHURCH.

were taken into the church, and deposited in a vault immediately before the pulpit. Among the pallbearers were Col. John O'Fallon, Asa Wilgus, Jesse Lindell, Matthew Carr, and George K. Budd, members of the First Church in its early days. The building, which is of brick and stone, cost over one hundred thousand dollars, and its dimensions are eighty-four by one hundred and thirty feet; the tower is two hundred and twenty-five feet high; the main audience-room contains one hundred and fifty pews, and there are attached to the church a chapel, Sunday-school rooms, a pastor's study, and ladies' parlors. There is also a parsonage (No. 1413 Lucas Avenue), valued, with the lot on which it stands, at

about fifteen thousand dollars. In 1855 the lot on Fourth Street, which cost in 1825 three hundred and twenty-seven dollars, was sold for sixty-two thousand dollars, and the proceeds helped to defray the cost of the new edifice. Dr. Ganse, the present pastor, says, "No history of the First Presbyterian Church of St. Louis would be at all complete which should not commemorate, in connection with all its direct religious work, the influence which, under its patriotic pastor, Dr. Nelson, it exerted for the Union during the civil war." Connected with the church are a Ladies' and a Young Ladies' Missionary Society, a Sunday-school, and the Tabernacle Mission School. About one hundred and seventy-five families are actively connected with the church, and there are three hundred and ninety-seven communicants, and the Sunday-schools are attended by thirty-five teachers and about five hundred scholars. On the 15th of November, 1867, the semi-centennial anniversary of Presbyterianism in St. Louis was celebrated in this church with appropriate exercises.

The Second Presbyterian Church, northwest corner of Seventeenth Street and Lucas Place, Rev. Samuel J. Nicolls, pastor, was organized Oct. 10, 1838, by sixty members from the First Presbyterian Church and two from other churches. Its first elders were Hamilton R. Gamble, Wyllys King, and William Holcombe. A temporary building was erected for worship at the corner of Pine and Fifth Streets, but the lot on the northwest corner of Fifth and Walnut Streets (where the Temple building now stands) was bought soon after from Pierre Chouteau for \$10,800, and in March, 1839, the erection of a permanent house of worship was begun. In January, 1840, the lecture-room of the new building was hastily fitted up, and the congregation abandoned the temporary edifice. The completed building was dedicated Oct. 11, 1840. Rev. C. W. McPheeters, Rev. J. F. Cowan, and Rev. W. P. Cochran took part in the services, and the dedication sermon was preached by the Rev. H. P. Goodrich, D.D. The dedication prayer was offered by the Rev. Nathan A. Hall, and the benediction was pronounced by the Rev. W. S. Potts, pastor of the church. The cost of the building was about forty-two thousand dollars. It was occupied for the last time on June 28, 1868, having been sold to David Nicholson. For some months the congregation worshiped with that of the First Church. The lot on which the church now stands costs thirty thousand dollars, and the erection of the building was begun in 1857, and the corner-stone was laid on the 23d of March, 1869.

The board of trustees consisted of Sullivan Blood,

chairman; James E. Yeatman, A. M. Gardiner, Geo. S. Drake, C. S. Greeley, secretary and treasurer; and the building committee of C. S. Greeley, chairman; George S. Drake, Rev. S. J. Nicolls, James E. Yeatman, Daniel B. Clark, William Downing, Samuel Bonner, Thomas Lowery, Henry Hitchcock, and Samuel Copp. The chapel was completed and first occupied Dec. 27, 1868. The main building was dedicated Dec. 25, 1870. It is an elegant structure of rough, unhewn stone, and cost one hundred and sixty thousand dollars.

On the organization of the church the pulpit was first supplied by Rev. A. T. Norton, then a city missionary in St. Louis. In February, 1839, Rev. William S. Potts, then president of Marion College (an institution that had proved a failure), who had formerly been pastor of the First Presbyterian Church, was called to the pastorate. He entered upon his duties in July, was regularly installed Oct. 5, 1839, and died March 28, 1852. During the thirteen years of Dr. Potts' charge upwards of nine hundred persons united with this church, four hundred and seventy of them on profession. Rev. Robert P. Farris (since of Peoria) supplied the pulpit during the year following. Rev. Nathan L. Rice, D.D., of Cincinnati, was unanimously called Jan. 26, 1853. The call was opposed by the Cincinnati Presbytery, but was unanimously repeated March 9th, and finally accepted. Dr. Rice entered upon his duties April 25, 1853, was installed October 9th following, and resigned Sept. 15, 1857, to take the chair of theology in the Theological Seminary of the Northwest. Rev. James H. Brooks, D.D., though never installed as pastor, served as such from February, 1858 (having been called two months previous), until July, 1864, when he became pastor of the colony that formed the Walnut Street (now Compton Avenue) Church. Rev. Samuel J. Nicolls, of Pennsylvania, was called October, 1864, began his labors January 1st, and was installed March 5, 1865. This church has sent out the following colonies: Central (or Fourth) in 1844; Westminster (afterwards Pine Street), 1846; Park Avenue (afterwards Chouteau Avenue); First German, 1863; Walnut Street, 1864; and Grace Church (afterwards united with Chouteau Avenue), 1868. It has also contributed largely to the membership of churches in Carondelet, Kirkwood, and elsewhere.

This church supports four Sunday-schools,—a morning school, Henry T. Nash, superintendent; an afternoon school, E. Anson More, superintendent; the Memorial Tabernacle, or Biddle Market Mission, a gift from Carlos S. Greeley, Thomas Morrison, superintendent; and Kossuth Avenue Mission, near the

Fair Grounds, Henry A. Smith, superintendent. These schools have an aggregate attendance of about two thousand children. It also supports a foreign mission at Siam and a city missionary, Rev. William Porteus. Altogether the church contributes about forty thousand dollars annually to benevolent and congregational uses. A Ladies' Aid Society and Young People's Working Society are connected with the congregation. The congregation numbers nearly eight hundred active members, with a connection of two hundred and twenty families, or twelve hundred persons, among whom are many of the most prominent and influential members of St. Louis society.

Grand Avenue Presbyterian Church.—In February, 1844, Washington Avenue Church, New School, was organized, under the direction of Rev. Dr. Bullard, by a colony of fifty members from the First Presbyterian Church, who first met for worship in the State tobacco warehouse on the northeast corner of Sixth Street and Washington Avenue. Rev. James Gallaher first supplied the pulpit for about one year, when Rev. J. B. Townsend was installed as pastor. Mr. Gallaher died in the autumn of 1853. A church was subsequently built on the southwest corner of Eighth Street and Washington Avenue, and was occupied until the removal of the society to a second edifice on the northwest corner of Eleventh and Pine Streets, the ground for which was bought in 1849. The basement of the new building was occupied in 1851, and the church was dedicated in 1853. The first pastor, Mr. Townsend, resigned on account of ill health in the fall of 1850. Rev. Mr. Long took charge in 1851, and remained about a year. Rev. J. W. Hall, D.D., of Alabama, assumed the pastorate in April, 1853, but only remained six months. After his departure the church was left without a pastor. During the summer of 1853 the church building was completed and dedicated, under the eldership of John Whitehill and Martin Simpson.

Westminster Church, Old School, was organized on April 25, 1846, by the Rev. Dr. Potts, with eighteen members, and Rev. H. P. Goodrich, D.D., as "stated supply." The first place of worship was the hall of the medical college, on Washington Avenue opposite Tenth Street.

The church was originally known as the Westminster Mission. Its first elders were Thomas Cannon and Leverett Mills. In the latter part of 1846 the congregation moved from the medical college to the basement of Benton Public School house on Sixth Street, near St. Charles. Thence it removed to the Odd-Fellows' Hall, at Fourth and Locust Streets,

which it occupied jointly and alternately with St. George's Episcopal Church until October, 1848, when it purchased an edifice at the corner of Locust and Fifth Streets, erected by the Associate Reformed Presbyterians in 1841. Dr. Goodrich resigned July 1, 1848, and Rev. James A. Lyon, D.D., became pastor Nov. 15, 1848. A number of the members of the Second Presbyterian Church transferred their membership to the Westminster, and Thomas Cannon, Joseph Charless, Leverett Mills, David Keith, and Alexander C. Donaldson were appointed elders. Rev. Dr. Lyon resigned the pastorate on the 10th of November, 1850, and Rev. S. B. McPheeters, of Virginia, was called Jan. 31, 1851. He accepted, and was installed Dec. 14, 1851, at which time the congregation numbered thirty-four families and eighty-nine communicants.

In November, 1853, a union of the Pine Street and Westminster Churches was suggested. The former was without a pastor, and both organizations were struggling with debt. The proposal commended itself to the members of both, and on the 30th of November, 1853, the Pine Street Church united with the Westminster Church in accordance with an agreement adopted by W. W. Greene, Theodore Poindexter, D. K. Ferguson, G. Gorin, John Whitehill, and Robert Dougherty in behalf of the Pine Street Church, and Joseph Charless, Robert M. Henning, and George P. Strong in behalf of the Westminster Church.

The congregation adopted the name of Pine Street, and in accordance with a condition of the union identified itself with the Old School Presbytery and Synod. Rev. Dr. McPheeters was elected pastor, and Joseph Charless, W. W. Greene, David Keith, Wm. Low, Alexander Marshall, Leverett Mills, Martin Simpson, George P. Strong, and John Whitehill were chosen elders of the new organization.

The Westminster Church property was sold in the spring of 1854, and the proceeds went to the united congregation. In April, 1854, there were reported two hundred and thirty-one members, and in 1861 three hundred and twenty-seven members, with one hundred and sixty pupils in the Sunday-school and seven hundred in Biddle Market Sunday-school, established by this church. During the war the church was agitated by political strife, and the Union members removed Mr. McPheeters from the pastorate,¹ after which the church remained for several years without a minister, and was often closed. At last the difficulty was settled by the withdrawal of three of

¹ In January, 1866, a call was again extended to Rev. Dr. McPheeters, but, greatly to the regret of the congregation, was declined by him, owing to his illness.

the ruling elders. In 1872 the church united with the Independent or Southern Synod of Missouri. The pastors since the reopening of the church have been Revs. J. C. Thorn, of Waynesburg, Pa., appointed July, 1865, died November 28th following; Rev. B. T. Lacy, D.D., appointed in 1866, resigned November, 1870; Rev. A. P. Foreman, D.D., 1871-72; Rev. E. H. Rutherford, D.D., of Petersburg, Va., installed in May, 1874. Just previous to Dr. Rutherford's installation, the presbytery and Synod with which the church was connected formed ecclesiastical relations with the Southern Presbyterian Assembly. Dr. Rutherford resigned the pastorate of this church in March, 1881, to accept a call to the Presbyterian Church at Paris, Ky. By invitation of the session, Rev. Francis L. Ferguson supplied the pulpit for six months from May, 1881.

In January, 1882, Rev. A. Nelson Hollifield, pastor of the Presbyterian Church in Huntingdon, Pa., was called to the pastorate, and was installed in the month of April by a committee of the Presbytery of St. Louis.

In 1879 the congregation purchased a site for a new church on the west side of Grand Avenue, opposite Washington Avenue, on an elevation about seventy-five feet higher than Washington Avenue, at Third Street, and from which a beautiful view of that portion of the city is obtained. The site is about one hundred and fifty feet square. In March, 1880, the erection of the chapel was begun in accordance with plans prepared by the architect, Francis D. Lee. The chapel was completed within six months. It is of limestone with white sandstone trimmings, and is constructed in the pure English Gothic style. It is located at the west end of the lot, and fronts on the western extension of Washington Avenue.

The chapel has a seating capacity for four hundred persons, and is still occupied by the congregation, pending the completion of the church. The building was dedicated on the 7th of November, 1880, the officiating ministers being the Rev. Dr. Rutherford, pastor, Rev. R. P. Farris, Rev. G. H. Rout, and Rev. Dr. Brank. On this occasion the name of the church was changed from that of Pine Street to that of Grand Avenue Presbyterian Church. Its officers at that time were: Pastor, Rev. E. H. Rutherford, D.D.; Elders, William G. Clark, D. K. Ferguson, John J. Holliday, James McQ. Douglas, Isaac B. Kirtland, Dr. William M. McPheeters, Dr. H. N. Spencer, William Webb, and James H. Wear; Deacons, Elliott W. Douglas, Edward F. Chappell, Hugh Ferguson, James Rosebrough, J. W. McLanahan, J. M. Cooper, and A. N. Craig. The corner-stone of the main

building was laid Oct. 14, 1882. The new church will be a superb Gothic structure of St. Louis limestone, with five gable-ends, one hundred feet high, and large windows of stained glass. The main entrance will be ornamented with moulded arches and columns of cut stone. The auditorium will be in the form of an amphitheatre, and will accommodate twelve hundred persons, its size being one hundred and fifteen by one hundred feet. It is expected that the building will be ready in the summer of 1883, and will cost one hundred and ten thousand dollars. The architect is Francis D. Lee. The church reports a membership of two hundred and eleven, with two hundred and thirty-eight in the Sunday-school.

The officers of the church at present are Rev. H. Nelson Hollifield, D.D., pastor; Elders, W. G. Clark, D. K. Ferguson, E. S. Frazer, James McQ. Douglass, I. B. Kirtland, W. M. McPheeters, H. N. Spencer, William Webb, James H. Wear; Deacons, J. T. Chappell, Archibald Crary, Elliott W. Douglas, Hugh Ferguson, J. W. McLanahan, James Rosebrough.

Among the ministers prominently identified with the old Pine Street Church was the Rev. Charles D. Simpson. Mr. Simpson was a native of St. Louis, and received his early education at St. Louis University. He pursued a course of study at Illinois College, Jacksonville, and received from that institution the degrees of Bachelor and Master of Arts. He then studied theology at Lane Seminary, Cincinnati, under the instruction of Lyman Beecher, D.D., and Professor Stowe. He was regarded as an exceptionally close and thorough student, and his attainments in mathematical science were remarkable. He was ordained a minister of the Presbyterian Church in 1843, and at once entered upon the duties of his clerical life at Glasgow, Mo. Subsequently he became a professor in the City University, and also officiated at Pine Street Church. Mr. Simpson died early in September, 1866.

Central Presbyterian Church.—This congregation was organized April 18, 1844, by Dr. William S. Potts and Rev. William Gilbreath, as the Fourth Presbyterian Church (Old School), with thirty-two members, nearly all of whom had obtained letters for the purpose from the Second Church. On the following day the first session was elected, consisting of Philip Skinner, George W. Meyers, and John Suydam, and on the following Sunday, April 21st, Messrs. Meyers and Suydam were ordained, and the session was installed. The first communion of the church was celebrated on the same day. The congregation met in a small frame building on the southeast corner of Sixth and St. Charles Streets. Rev. Joseph Tem-

pleton first supplied the pulpit, but on May 12, 1845, Rev. Alexander Van Court was chosen pastor. He began his duties in July following. He labored with great diligence and success, and during his ministry the church grew and prospered. In July, 1849, he suddenly fell a victim to the cholera which raged in that year. In 1845 the church elected as its first board of trustees John M. Wimer, John Huyman, and Taylor Blow, to whom, in 1846, were added David W. Wheeler, Oliver Bennett, and S. Ridgely. Thomas Osborne and Dr. Thomas Barbor were also added to the session, and in November, 1846, Othneil Cannon and Charles N. Lewis were elected the first deacons. In the spring of 1846 the name was changed by the presbytery to that of the Central Presbyterian Church of St. Louis. About the same time a lot at the northwest corner of Locust and Eighth Streets was purchased, whither the congregation removed in the fall of 1848. It worshipped at first in the basement. During the following winter Rev. Dr. Hall held a series of protracted meetings which added largely to the membership. The building was finished in 1849. It had two stories, with rooms for the pastor's use and for other purposes in the basement. The audience-room, eighty-five by fifty feet, seated about six hundred persons. After the death of Mr. Van Court the church remained for eighteen months without a pastor. Revs. Samuel Pettigrew, John N. Hall, and William M. Ruggles served as stated supplies, and the congregation was greatly troubled by dissensions among its members and other causes until (Dec. 11, 1850) Rev. S. J. P. Anderson, of Virginia, was called. Mr. Anderson entered upon his duties Jan. 20, 1851. He at once restored harmony to the church, which under his pastorate soon became prosperous. In March, 1851, its membership had increased to two hundred and forty-three, and all who were officially connected with the society labored zealously for its welfare. In 1858 nearly one hundred new members were added, but during the civil war the church declined. The pastor was arrested and tried by the military authorities, and the congregation diminished in consequence. The return of peace, however, brought a return of prosperity, but on the 25th of May, 1868, Mr. Anderson's failing health compelled him to resign, and the church remained again without a pastor. For some time it was served by Rev. Henry Branch as stated supply.

Dr. Brank, of Lexington, Ky., the present pastor, was called in January, 1869, but did not signify his acceptance until May 31, 1869. Soon after the present site was purchased, and a temporary chapel

erected, in which an afternoon Sunday-school was opened in the spring of 1870. Weekly prayer-meetings were held in the same building during the winter of 1871-72. In the spring of 1873 the congregation removed to this chapel, their building on Locust Street having become unsafe owing to the construction of a tunnel under it. Soon after this the structure was demolished. On June 8, 1874, a building committee was appointed consisting of Messrs. B. H. Batte, I. M. Veitch, S. N. Holliday, D. P. Rowland, Dent G. Tutt, and Samuel Barron, and a plan prepared by C. K. Ramsey, architect, was accepted. The chapel was removed to an adjoining lot, and the erection of the present edifice was begun. It was finished in 1876. It is built in strict accordance with the early English style, with two towers in front, one at each corner, the first one hundred and ninety-two, and the other one hundred and twenty feet in height. The transepts are each twenty-six feet wide, with ten feet projection. The roof is open-timbered, richly decorated with trusses supported by stone corbels, constructed of broken ashlar, with cut-stone trimmings from Warrensburg. The building occupies a lot one hundred and nine by one hundred and thirty-five feet. The auditorium is fifty-eight by ninety feet. At the rear is a chapel, with lecture-room, class-room, library, parlors, etc. The construction of this edifice involved the church so heavily in debt that in the summer of 1879 it found itself in great difficulties. Propositions were made to sell the church and abandon the enterprise, and the pastor tendered his resignation, which was not, however, accepted. Early in 1880, one Sunday morning the pastor made an earnest appeal for aid to the congregation, and the sum of twenty-one thousand dollars was subscribed on the spot, and afterwards punctually paid. There are at present about one hundred and thirty families and three hundred and fifty communicants connected with the congregation, and twenty-seven teachers, with nearly three hundred pupils in the Sunday-school. The present church edifice is situated at the northeast corner of Lucas and Garrison Avenues, and the Rev. Robert G. Brank, D.D., is the pastor.

The North Presbyterian Church was organized by a colony of nine members from the First Presbyterian Church, together with nine others, on the 27th of March, 1845. The present church, situated at the northwest corner of Eleventh and Chambers Streets, was built in 1857. It was a two-story brick building, sixty by ninety feet, the upper story being used as a church, and the lower story for the purposes of the Sunday-school. It seated about eight hundred persons. During the summer of 1882 the interior

was entirely remodeled and redecored, the seats were rearranged in amphitheatrical form, the organ was removed to the back of the auditorium and enlarged, and stained glass replaced the former plain panes of the windows. The church thus renovated was rededicated Oct. 15, 1832. The congregation numbers about five hundred persons, actual members two hundred, and the Sunday-school has twenty-five teachers and three hundred and seventy scholars. The pastor is the Rev. S. H. Williams.

Carondelet Presbyterian Church, Fourth and Market Streets, South St. Louis, Rev. James H. Shields, pastor, was organized about 1850 by Hon. Henry T. Blow and wife, Dr. Ashbel Webster and wife, Francis Quinnette and wife, and others. The first house of worship was located on Main Street between Kansas and Illinois Streets. It was sold in 1864 and converted into a dwelling, and the society removed to its present quarters. The successive pastors have been Revs. Hiram P. Goodrich, D.D., R. S. Finley, John T. Cowen, S. A. Mutchmore, 1862-65; C. H. Dunlap, 1867, '68; Samuel Hay, 1868, '69; R. A. Condit, appointed November, 1869; Henry S. Little, appointed September, 1874; James H. Shields, appointed November, 1879. Hope Mission Chapel, corner of Third and Taylor Streets, is an offshoot of this church. It has a congregation of six hundred persons, and a Sunday-school attended by four hundred and twenty scholars. The present officers of the church are: Session, or Board of Elders (in charge of spiritual interests), the pastor, chairman, *ex officio*, Leonard R. Woods, William D. Starke, Frederick H. Williams, James M. Gayley; Board of Deacons (in charge of the poor and of benevolent work), J. P. Richardson, John Fitzpatrick; Board of Trustees (in charge of temporal concerns), Charles A. McNair, S. M. Bayless, Dr. E. E. Webster, F. W. Mott, J. P. Richardson, Leonard R. Woods, Frederick H. Williams, James M. Gayley. Connected with the congregation are a Ladies' Missionary Society, organized in 1874, of which Mrs. A. Shawk has been president, and Miss R. Woods, secretary, from the beginning to date; also a Young People's Literary Society, organized in 1881; R. A. Hill, president; H. A. Chapin, secretary. About one hundred and sixty families constitute the parish, of whom one hundred and sixty persons are communicants. The morning Sunday-school is attended by twenty teachers and two hundred and fifty scholars.

Des Peres Presbyterian Church was organized in the latter part of March, 1833, by Rev. William S. Potts and Dr. Ingraham, in the dwelling-house of Rev. Mr. Granville (Methodist), which was rented

for the occasion. The members of the congregation at that time were Thomas D. Yeates, Matilda Yeates, Amanda Yeates, Rebecca McCutchan, George Reed, Mary Reed, James Reed, Thomas Reed, Ellen Parks, Mary Parks, George Y. Andrew, Ann, Mary, and Baldwin King. The elders were Thomas D. Yeates, George Reed, and George Y. King. During the next year (1834) three acres of land were given—one acre each by David Small, David Hartshorn, and Stephen Maddox—for a building site for a church and a graveyard. A building of stone was commenced the same year and progressed so far as to be inclosed, in which condition it was used for public worship until 1840. In the troubles that divided the church into the Old and New School bodies, this church cast its lot with, and has recognized the ecclesiastical authority and control of, the Old School Church. Of the records of this church from its organization down to Sept. 6, 1837, none remain or are known of to the present officers of the church. Between the years 1833 and 1837 the pulpit was filled by Rev. William S. Potts, Dr. Ingraham, and Rev. Mr. Lovejoy. Gary Hickman, a licentiate, was in charge of the pulpit when the present records commence. In 1840 the present building was completed. Since Mr. Hickman left, the pulpit has been filled by the following ministers: M. Hodges, John N. Gilbreath, H. A. Booth, Joseph Fenton, William J. Lapsley, H. T. Morton, William C. Claggett, William H. Parks, A. Shotwell, and J. A. Smith. Rev. J. N. Gilbreath was pastor more than thirty years.

The elders elected since its organization have been Zachariah Barron, Jonas Geyer, Ninian B. Barron, William B. Harwood, Frederick Des Combes, William McKnight, Ralph Clayton, Henry Barron, Ottawa B. Harwood, Edward Fitzgerald, Charles Snyder, and Charles R. Black.

The deacons have been Cornelius D. Demorest, Thomas M. Barron, Charles Lovercheck, Thomas H. Ennis, and David L. Des Combes. Since 1837 the church has received by letter and on profession of faith one hundred and sixty-one members.

Providence Presbyterian Church.—In 1859 the Rev. William Parks organized an Old School congregation, known as Providence Presbyterian Church, which worshiped for some time in a hall on Broadway between O'Fallon and Cass Avenues. Subsequently it removed to a hall over what was known as the Mound Market, standing in the middle of Broadway near Howard Street. In the fall of 1859 a church organization was effected by the committee of the presbytery, consisting of Rev. Dr. McPheeters, Rev. Dr. Brooks, and Mr. Parks. Subsequently Mr. Parks

was forced on account of ill health to relinquish the pastorate, and was succeeded by the Rev. Mr. Sluder, under whose administration a lot at Webster and Twelfth Streets was purchased, and a two-story brick building erected. The lower story was used for the Sunday-school, and the congregation also worshiped there until the church was completed.

Washington and Compton Avenues Presbyterian Churches.—The Second Presbyterian Church, then located at Fifth and Walnut Streets, decided in 1859 to send out a colony to establish a church in the western part of the city, and for this purpose bought a lot on the northeast corner of Walnut and Sixteenth Streets, and commenced building thereon. The lecture-room was still unfinished in 1861, when the war came on and funds gave out, necessitating the stoppage of the work. The Union Presbyterian (Independent) Church sold, in March, 1862, to the Union Methodist Church its building at Eleventh and Locust Streets, and leased for two years, from July 1, 1862, the unfinished building at Walnut and Sixteenth Streets. This congregation completed the lecture-room at a cost of six thousand dollars, which was repaid when, on the expiration of its lease, it vacated the premises. From this time the Union Church ceased to exist as a separate organization. It had been organized twelve years previous (in January, 1849) with about thirty-five members, and worshiped for some time in Wyman's Hall. In 1852 the congregation determined to erect a church at the corner of Eleventh and Locust Streets, and in a little over a year, Jan. 8, 1854, the building was completed and dedicated. Its dimensions were sixty-nine by one hundred and fourteen feet, but the extreme measurements, including the towers, were eighty by one hundred and twenty-one feet. At the southeastern corner was a tower fifteen feet square, which ascended to the height of one hundred and forty-five feet, having a massive projecting base of cut limestone. At this time the Rev. William Homes was the pastor.

In June, 1864, the original idea of a colony was revived. Dr. Brookes, then pastor of the Second Church, and one hundred and fifty of its members withdrew, and on July 4, 1864, were organized by a committee of the St. Louis Presbytery (in connection with the Northern General Assembly) as the Walnut Street Presbyterian Church, the Second Church making over to them the property which they then began to occupy. Within three months one hundred members of the Second Church joined them, and on the 25th of December, 1864, they first occupied the completed church, the erection of which they had begun immediately after their organization.

The lot, which is one hundred by one hundred and twenty feet in extent, cost, with the church included, about eighty thousand dollars. It will seat about fifteen hundred persons. The congregation also had a chapel on the corner of Twenty-second Street and Gamble Avenue, a frame building seventy by forty feet. The church was a two-story brick building. In 1866, owing to certain political action of the Northern General Assembly on the subject of slavery, the Walnut Street Church united with others in organizing the Independent Synod of Missouri, but in May, 1874, the Northern General Assembly took such steps as led to a reunion with it of this church, which has since remained connected with it.

In process of time the location of the church became unsuitable, owing to the removal to western and southwestern parts of the city of the bulk of its members, and by 1878 this unsuitableness had led to the organization of Lafayette Park Church, which went out as a colony from Walnut Street. In 1877 the present site, southwest corner of Washington and Compton Avenues, was bought from Mrs. Edgar Ames for fifteen thousand dollars. The lot is one hundred and forty by one hundred and fifty-two feet. Ground was broken July 4, 1877, the corner-stone was laid Oct. 27, 1877, and the lecture-room was occupied May 1, 1879. On the 5th of December, 1880, the first services in the completed edifice were held. This building is ninety-four by one hundred and thirty-six feet, English Gothic in style, and of St. Louis limestone, pitch-faced broken ashlar, trimmed with sandstone, with stone towers at the four corners, and an imposing entrance, embellished by moulded and polished columns of Maine granite and buttresses and steps of the same. The architect was John H. Maurice, and the building committee was composed of Thomas E. Tutt, president; John R. Lionberger, vice-president; J. L. Sloss, treasurer; and William T. Barron. The main auditorium is eighty-four by eighty-eight feet and forty-one feet eight inches high. The pews are arranged in amphitheatrical form, and the seating capacity, including a gallery at the front end, is fifteen hundred. The windows are of large cathedral style, rich in decoration, and several are memorial. The organ is set in a deep recess back of the pulpit, under which are the pastor's study and reception-room. The lecture-room, under the main floor, is sixty-one feet square and fourteen feet high, with a seating capacity of five hundred. It can be enlarged to dimensions of eighty-five by eighty-three feet by opening folding-doors and throwing into it the two rooms used for Bible classes. The infant Sunday-school class-room and the ladies' parlors are on this

floor. The building on Walnut Street is still owned by the church, though offered for sale, and is used for Sunday-school purposes and religious meetings. The church, through its pastor, Rev. J. H. Brookes, D.D., reported to the Synod of 1882 a membership of five hundred and twenty-seven, with five hundred and fifty-four pupils in the Sunday-school, an expenditure for the year of ten thousand six hundred and twenty-two dollars for congregational and five thousand two hundred and eleven dollars for benevolent uses, and an average congregational attendance of about seven hundred.

Glasgow Avenue Presbyterian Church.—This congregation, whose present church edifice is situated at the southeast corner of Glasgow Avenue and Dickson Street, Rev. William R. Henderson, pastor, grew out of a conversation held at Webster Groves, Sunday, May 11, 1873, between Rev. Thomas Marshall, visiting that place on ministerial duty, and L. E. Alexander, a resident there, who called the minister's attention to the field now occupied by this church and assured him of his support in case the enterprise should be attempted. Thursday evening prayer-meetings were established soon afterwards at the "old Garrison mansion," corner of Page and Easton Avenues, and a little later Laeclde Hall, corner of Garrison and Easton Avenues, was rented, the first services being held there on June 22, 1873, with a congregation of forty persons. About the same number also attended the Sunday-school in the afternoon. On the 22d of March, 1874, the church was organized, with thirty-seven members, as the Garrison Avenue Church by a committee of the presbytery, consisting of Revs. Thomas Marshall, J. J. Marks, D.D., C. H. Foote, D.D., and Elders E. A. Moore and George W. Shaw. Rev. Thomas Marshall, the first pastor, was installed July 5, 1874. He resigned November, 1881, having been elected synodical missionary for the State of Missouri. Rev. William R. Henderson, of Harrodsburg, Ky., was called as his successor in March, 1882, and duly installed May 21st. On the 2d of August, 1874, the congregation assembled on the lot it now holds, and which it had bought for four thousand nine hundred and fifty dollars from Charles Morgan, of New York City. Services were held and the work of building was commenced by the pastor turning the first spadeful of earth, and on Dec. 19, 1875, the church removed from Laeclde Hall and held services in the basement of the present chapel, the name of the church being then changed to its present designation. On the 14th of November, 1880, the completed chapel was dedicated, Revs. Dr. Ganse, Nicolls,

Marquis, Rhodes, Brank, Brookes, Porteus, and Allen, in addition to the pastor, taking part in the exercises. The church lot is eighty by one hundred and eighteen feet in area. The basement, chapel, and furniture cost thirteen thousand dollars. The main edifice will occupy the corner of the lot, and will probably be built within the next two or three years. The number of communicants now connected with the church is about one hundred and twenty-five, and the Sunday-school has an enrolled attendance of about three hundred. Connected with the regular church organization are a Ladies' Missionary Society, a Children's Missionary Society, called "Seed-Sowers," a Young People's Prayer-Meeting, etc.

Westminster Presbyterian Church, southeast corner of Pestalozzi and James Streets, Rev. J. G. Reaser, pastor, was organized Dec. 31, 1873, by Revs. A. Van der Lippe and I. N. Cundall, and Elder J. E. Cowan, assisted by Rev. J. W. Allen. The congregation worshiped in rented rooms at No. 3500 Carondelet Avenue until their removal to their present church edifice, the corner-stone of which was laid Aug. 10, 1875. Rev. W. Howell Buchanan was the first pastor, the present incumbent succeeding him April 1, 1880. The building is of brick, about forty-five by seventy feet, and with the lot is valued at ten thousand dollars. The Sunday-school was organized Oct. 19, 1873, and is now attended by two hundred and twenty scholars. There are a Ladies' Aid Society and Young People's Society connected with the church. The congregation numbers two hundred and fifty persons, and the communicants one hundred and thirty. Since 1880 fifty-four new members have been added, and the attendance at worship has doubled.

South Presbyterian Church.—In 1868 a mission Sunday-school was established at No. 1322 South Second Street, and a chapel was erected, which is still used by the congregation. The church, now known as the South Presbyterian, Rev. H. B. Holmes, pastor, was organized in May, 1875. It is a chartered corporation and owns its chapel, which, however, occupies leased ground. The church has never had a regularly settled pastor, but has been supplied by several ministers, notably by Rev. James R. Dunn, who remained four and a half years, and the present minister, who has had charge nearly two years. A. S. Pettigrew, the leading elder of the society, has been from its inception the main prop of the struggling organization, defraying its expenses, paying the minister's salary, etc. The membership is reported at about sixty, and the Sunday-school is attended during the winter by from two hundred to two hundred and fifty scholars, and by half that number in summer.

The Second German Presbyterian Church, Grand Avenue and Thirteenth Street, Rev. Frederick Auf der Heide, pastor, was organized in 1876, and worships in a brick chapel. It reports a congregation of about thirty-six men, women, and children, a membership of twelve, and a Sunday-school enrollment of one hundred.

Lafayette Park Presbyterian Church (Lafayette Church), situated on Missouri Avenue, between Park and Lafayette Avenues, Rev. D. C. Marquis, D.D., pastor, was organized in 1878 as a colony from Walnut Street (now Washington and Compton Avenues) Church by one hundred of its members who lived too far from the parent church to attend its services. The congregation worships as yet in the lecture-room of its unfinished church, and numbers over six hundred members. The Park Avenue Presbyterian Church, organized as a colony from the Second Church, sold its property (now the Park Avenue Baptist Church) in 1867, and was merged into the Chouteau Avenue Church, worshipping at the northeast corner of Chouteau Avenue and Eleventh Street. The church building was erected in 1867. It was forty by seventy feet in size, built of brick, and very neat and attractive in appearance. Its seating capacity was about four hundred. Grace Church, organized in 1868 as a colony from the Second Church, was also consolidated with the Chouteau Avenue Church. In 1875 the property was sold to the B'nai El Hebrew congregation, and the society dissolved. Its members worshiped at different churches until the organization of the Lafayette Park Church, with which most of the members of the three short-lived churches became affiliated. The membership of this church numbers three hundred and three, and its Sunday-school six hundred scholars. Its expenditures for 1881 amounted to twenty thousand nine hundred and twenty-three dollars for congregational, and six hundred and ninety-seven dollars for benevolent uses. The main church building is in process of erection.

First German Presbyterian Church.—This church, situated at Autumn and Tenth Streets, Rev. Adalbert van der Lippe, pastor, was organized May 18, 1863, in the basement of the Second Presbyterian Church, on Fifth and Walnut Streets, where the Temple building now stands, by Rev. J. H. Brookes, Rev. W. H. Parks, and Elder A. G. Edwards. The congregation held its meetings at first in the South Mission Sabbath-school, on Marion and Ninth Streets. The corner-stone of the lecture-room of the present edifice was laid Oct. 14, 1866, and of the church itself March 1, 1871. The latter was dedicated Sept.

17, 1871. The first and only pastor was elected Oct. 23, 1863. A Ladies' Sewing Society was organized March 1, 1864, and a Young Men's Christian Association Oct. 1, 1872. The parish contains about fifty families and two hundred and seventy-five people. There are one hundred and twenty-five communicants. The Sunday-school has seventeen teachers and over one hundred and fifty scholars.

Memorial Tabernacle.—The Protestant Free School Association, composed mainly but not exclusively of Presbyterians, was organized in 1840, with five teachers and twenty scholars, Thomas F. Webb, superintendent, and met in a small frame house at Sixth and Carr Streets. From this germ sprang the Biddle Market Mission. In 1846, the owner of the land on which it stood having objected to its use, the building was placed on trucks and removed to a lot at Fourteenth and Carr Streets, belonging to Judge Carr, and was enlarged to a seating capacity of three hundred and fifty. On the 11th of July, 1848, Thomas Morrison was made superintendent, and under his zealous care the mission increased to such proportions that larger accommodations were rendered necessary, and Biddle Market Hall, Thirteenth and Biddle Streets, was secured for the use of the mission. The hall was enlarged and adapted to its new purpose at a cost of five thousand dollars. After the removal to this location the school continued to grow until the average attendance of scholars numbered one thousand. On the 12th of July, 1864, a congregation was organized by Rev. H. C. McCook, known as the "First Independent Church of St. Louis," the constituent members being, by certificate from other churches, Thomas Morrison, Mrs. Eliza Morrison, Jennie Morrison, J. Burt Turner, Mrs. Mary R. Turner, John Ifinger, Mrs. L. Becker, Mrs. M. Coburn, Elizabeth Ferguson, Mrs. A. Kelly, Mrs. S. McLean, Mrs. W. Noerr, Ann M. Palmer, Mattie Palmer, Mrs. J. L. Smith, Mrs. M. Urquhart; by profession of faith, Mrs. D. Dickinson, John D. Eves, Emma Fontanna, Frederick B. Haus, J. M. Key, Mary Lowney, Fannie Marsh, Allen A. Watkins, Mrs. Amanda McClure, Jennie McFadden, Frederick Plitsch, Mrs. Henrietta Plitsch, Mrs. Elizabeth Schott, John Wallace, Mrs. Catherine Wallace.

Mr. Morrison subsequently sold his dwelling-house for six thousand dollars, and having added two thousand dollars to this sum, purchased the lot at the northwest corner of Sixteenth and Carr Streets, on which the Tabernacle now stands. The corner-stone was laid about May, 1865, but after Mr. Morrison had expended thirty-seven thousand dollars in the erection of the building it was sold, while still unfin-

ished, under foreclosure of a mortgage, for twenty thousand dollars. At this juncture Carlos S. Greeley purchased the property from the mortgagee, and headed a subscription to finish the building. The congregation of the Second Presbyterian Church and others made up the remainder. On Sunday, Nov. 28, 1880, the Sunday-school met for the last time in Biddle Market Hall, and proceeded thence to the completed Tabernacle, where Mr. Greeley presented to the trustees of the mission a deed of gift of the property. Dr. Niccolls, of the Second Presbyterian Church, at the same time gave it its present name, in memory of the donor's deceased wife. It is, perhaps, the largest and finest building for Sunday-school purposes in the United States, and is modeled after the famous Spurgeon Tabernacle in London. The building is of brick, one hundred by sixty feet, and will seat two thousand people. The dimensions of the lot are one hundred by seventy-five feet, and the church property is valued at forty thousand dollars. The congregation comprises about one hundred families, with one hundred and fifty communicants, and the average attendance at the morning Sunday-school is one hundred and sixty, and that at the afternoon Biddle Market Mission from one thousand to twelve hundred. A Young People's Union meets every Monday evening, and a prayer-meeting is held every Friday evening. The pastors have been Revs. H. C. McCook, elected Feb. 28, 1865; Lemuel Jones, elected Nov. 7, 1865; — Gillum, date of election unknown; Dr. Langdon, elected in 1868; William Porteus, elected Jan. 1, 1869, and remained until July 1, 1881; and the present incumbent, Rev. William H. Clagett, who took charge July 1, 1881.

In addition to the foregoing, several mission Sunday-schools are conducted by the Presbyterians, notably the Kossuth Avenue Mission, two blocks west of the Fair Grounds, Henry A. Smith, superintendent, supported by the Second Presbyterian Church, where Rev. William Porteus, city missionary, holds Sunday services. The Bethel, at Main and Commercial Streets, where the Sunday-school is attended by twenty-two teachers and two hundred scholars, is largely supported by Presbyterians, and there are other missions at Souard Market and elsewhere.

The First United Presbyterian Church, situated at the northwest corner of Twentieth and Morgan Streets, was organized in March, 1840, and its first place of worship was at the southwest corner of Fifth and Pine Streets. The first church edifice, a brick structure of the Ionic order, fifty by seventy-five feet, with a seating capacity of five hundred, was erected about 1841 at the northeast corner of Fifth and

Locust Streets, and was subsequently sold to the Singer Sewing-Machine Company. The present church at Twentieth and Morgan Streets was erected in 1873, and is a handsome structure of brick, the dimensions of the lot being one hundred and five feet six inches by one hundred and forty-four feet seven inches. The total cost of the church property was fifty-five thousand dollars. There are seventy-five families connected with the church, embracing one hundred and eighty-six communicants, and the average attendance at Sunday-school is eighteen teachers and one hundred and seventy scholars. A Woman's Missionary Society and a Pastor's Aid Society are maintained by the congregation. Rev. John A. Wilson, appointed July 28, 1876, is the present pastor of the church, and his predecessors have been Revs. Henry M. Johnston, appointed in 1845; Thomas M. Cunningham, appointed Oct. 12, 1852; John McLean, appointed Sept. 30, 1857; James G. Armstrong, appointed Dec. 3, 1863; and Henry W. Crabb, appointed July 6, 1869.

In December, 1881, the church established a mission Sunday-school on Grand Avenue near Clark, in a building thirty-one by fifty-six feet, which is capable of seating two hundred and fifty persons. The average attendance is nine teachers and seventy scholars. The First United is the only congregation in the city connected with the United Presbyterian General Assembly of the United States, a large and influential body differing in minor matters of faith and forms of worship from other Presbyterians.

The Cumberland Presbyterians commenced work in St. Louis in 1848, an organization being effected by Rev. J. G. White, under appointment of the Board of Missions of the denomination. He was succeeded in 1860 by Rev. L. C. Ransom. The church building was situated at the corner of Eleventh and St. Charles Streets, but it passed out of the hands of the denomination during the war, and the congregation of about two hundred persons was dispersed. In 1866, under the leadership of Rev. F. M. Gilliam, a second effort was made to establish the church. A small congregation was gathered, and subsequently a consolidation was effected with a body of independents, who had built up a large Sunday-school, conducted by Thomas Morrison, at Biddle Market, making a membership of about one hundred and twenty-five. Mr. Gilliam was succeeded by Rev. W. L. Langdon. In 1868 the independent element, being in the majority, seceded and placed themselves under the control of the Northern Presbyterians. The building which had been occupied by the congregation was subsequently sold to pay a debt of twenty thousand dollars, and the Cumberland Presbyterians lost over eight thousand

dollars. The Northern Presbyterians still control the seceding congregation, which occupied the building now known as Memorial Tabernacle.

Lucas Avenue Cumberland Presbyterian Church.—In 1874 a third attempt on the part of the Board of Missions resulted in the organization of this church, with Rev. C. H. Bell as pastor. Friends of the enterprise in the city and surrounding country contributed seventeen thousand dollars, and the present lot, situated on Lucas Avenue, at the corner of Channing Avenue, was purchased and the building erected. The latter, all the property being free from debt, was consecrated Dec. 2, 1877. The organization, consisting of twenty-eight members, was perfected Feb. 6, 1878. Mr. Bell, owing to impaired health and the necessary duties of his office as president of the general Board of Missions, resigned the pastorate Feb. 1, 1881, and the Rev. W. H. Black was called in his place. The church is self-sustaining and prosperous, and the enrolled membership numbers eighty-eight. The pupils enrolled in the Sunday-school number one hundred and thirty-five.

First German Cumberland Presbyterian Church (Gethsemane Congregation).—This congregation was organized Dec. 13, 1857, in Biddle Market Hall, by its present pastor, the Rev. Frederick Lack. The first church building stood on the northwest corner of Fourteenth and Chambers Streets, and was dedicated Dec. 25, 1857. In August, 1866, the congregation removed to the northwest corner of Jefferson and Wash Streets, and erected a one-story brick building seating about three hundred persons. In August, 1879, having sold this property, the congregation established itself at the northeast corner of Sullivan Avenue and Twentieth Street. There are fifteen families in the parish and sixty regular communicants. The Sunday-school is attended by seven teachers and over one hundred pupils.

The Second German Cumberland Presbyterian Church.—This congregation, which worships at the southwest corner of Eighteenth and Montgomery Streets, was organized during the civil war. Rev. Charles Landel having been forced to leave his charge in the interior of the State, owing to the condition of affairs there, removed to St. Louis and established a school in the market-house at Eighteenth and Warren Streets, now the parochial school of the Catholic Church of the Sacred Heart. In 1867 he organized the present congregation. After a time the school was abandoned. The congregation is composed of about ten families, with eighteen regular communicants. The Sunday-school, which is

known as the Anchor Band of Hope, No. 5, is conducted by Messrs. Frederick Ingalls and H. Baker, with fifty scholars. Rev. William Goessling is pastor of the church.

Reformed Presbyterian Church.—This church, situated at the northwest corner of Twenty-first Street and Gamble Avenue, Rev. J. R. Hill, pastor, is the only representative in St. Louis of this wing of the denomination. The building, a two-story brick structure forty-five by ninety feet, was erected in 1854 and seated about three hundred and fifty persons. The Rev. Joseph McCracken was pastor of the church in 1868. The services are attended by about sixty men, women, and children, and the Sunday-school by about fifty scholars. The church also supports the McKee Mission, on New Manchester road, and a colored mission at Nineteenth and Morgan Streets, which is attended by eight teachers and one hundred and twenty-five pupils.

PROTESTANT EPISCOPAL CHURCHES.

Diocese of Missouri.—The first Protestant Episcopal parish organized west of the Mississippi River was founded by the Rev. John Ward, of Lexington, Ky., in the autumn of 1819. Mr. Ward arrived at St. Louis in the latter part of September, but having been prostrated by sickness was unable to officiate until some weeks later. In the *Missouri Gazette* of October 6th it was announced that Mr. Ward would preach at the Baptist Church on the following Sunday, but the first regular service was held on the 24th of October, in a one-story frame building on the southwest corner of Second and Walnut Streets, which was also occasionally used as a court-house and as a dancing-room. Mr. Ward officiated, and six persons composed his congregation, only two of whom are said to have been supplied with prayer-books and prepared to respond. These two individuals were James Clemens, Jr., and Joseph V. Garnier, both of whom were made members of the first vestry that was formed. This was the first public service by a clergyman of the Episcopal Church west of the Mississippi of which any record remains.

A subscription-paper, drawn up by Col. Thomas F. Riddick, and bearing date Nov. 1, 1819, was soon after circulated. It read as follows: "We, the undersigned, taking into view the great benefits that ourselves and our families would derive from the establishment of an Episcopal Church in the town of St. Louis, do hereby form ourselves into a congregation, and bind ourselves to pay over to such person or persons as shall be appointed by the vestry, hereafter to be chosen, all such sums of money as shall be found

opposite to our names, to be applied towards the support of the church for one year from this date." This document obtained forty-seven signatures. These, with the amount subscribed by each, were the following :

Thomas F. Riddick, \$100; S. Hammond, \$100; John Hall, \$100; A. Nelson, \$50; D. B. Hoffman, \$50; J. Clemens, Jr., \$100; F. Dent, \$50; Clement March, \$50; J. R. Ober, \$50; R. Wash, \$50; Wilson P. Hunt, \$50; William Rector, \$50; Henry Von Phul, \$50; William Stokes, \$50; J. V. Garnier, \$50; W. Christy, \$50; M. Wherry, \$15; R. H. Price, \$60; Theo. Hunt, \$50; A. Rutgers, \$50; D. C. Boss, \$30; W. Carr Lane, \$10; Abijah Hull, \$15; William S. Hamilton, \$25; Josiah Bright, \$25; J. W. Hoyt, \$10; Peter Ferguson, \$10; Rufus Pettibone, \$10; James Kennerly, \$25; John Nicholson, \$10; William H. Ashley, \$20; A. McNair, \$50; Thomas H. Benton, \$50; J. G. Lindell, \$10; A. V. Vaughan, \$10; H. L. Hoffman, \$10; Nathaniel Sandburn, \$5; James Loper, \$10; Joseph M. Yard, \$10; I. Eekstein, \$5; Theo. L. McGill, \$5; D. V. Walker, \$10; William Clark, \$34; B. G. Farrar, \$50; John O'Fallon, \$50; Elias Rector, \$20; Peter Haldeman, \$20.

Among these are many names that are prominent in the history of the city and State. The movement led to the organization of the parish of Christ Church, of which the Rev. Mr. Ward continued in charge a little over one year, after which, for several years only irregular services were held. In 1824-25, Rev. Thomas Horrell visited and held services in Madison, Washington, Jefferson, and Cape Girardeau Counties, and reported that "respectable congregations attended, and many came to partake of the sacraments." In December, 1825, he became rector of Christ Church. In 1831, Rev. L. H. Corson held services in Manchester and other places in St. Louis County, and reported that he had found a number of church people, and had baptized many children.

In 1835 the attention of the vestry of Christ Church was directed to the fact that the Rev. Jackson Kemper, of Connecticut, had been selected as the missionary Bishop of the Northwest, comprising the States of Missouri and Indiana, and as it seemed probable that St. Louis would be chosen as his place of residence, it was decided to call him to the rectorship of Christ Church. A call was therefore extended to him on the 20th of September, 1835, and he was consecrated bishop on the 25th of the same month. In their letter to Bishop White, of Pennsylvania, announcing the decision of the vestry with regard to Bishop Kemper, the wardens of Christ Church, Wilson P. Hunt and Christopher Saunderson, stated that they had invited the bishop to become their rector with the understanding that the General Missionary Society would furnish him an assistant minister. They requested that the Rev. Mr. Minard be appointed such assistant. This request was granted,

and Mr. Minard reached St. Louis a month in advance of Bishop Kemper. On the 5th of October, Messrs. Doan and English were appointed a committee to provide suitable lodgings for the accommodation of the rector and his assistant upon their arrival. Bishop Kemper, accompanied by his friend, the Rev. S. R. Johnson, started from Philadelphia on the 3d of November, and arrived in St. Louis some time in December. Soon after the bishop took charge of this portion of his extensive diocese services were begun at St. Charles, Boonville, Jefferson City, Fayette, Lexington, Palmyra, and Hannibal, in several of which places parishes were organized and clergymen settled. At a meeting of the vestry in 1838 a resolution was offered by Josiah Spalding to the effect that "the vestry highly appreciate the services of Bishop Kemper at the West, and particularly in this church, and that they should deeply regret his removal from this station should he accept of his appointment as Bishop of Maryland." Bishop Kemper remained at his post, but on the 21st of September, 1839, he tendered his resignation as rector of the parish in consequence of the pressure of his episcopal duties. This resignation was respectfully declined by the unanimous vote of the vestry. At this time a second parish (St. Paul's) had been established in St. Louis. On the 20th of April, 1840, Bishop Kemper renewed his resignation, which was accepted with expressions of regret by the vestry, who thanked him "for his unwearied endeavors to promote the welfare and prosperity of our parish in a season of much difficulty and embarrassment," and assured him "that as churchmen we do entertain the most lively sense of the self-denying devotedness of Bishop Kemper to the great cause of the church, and that with pleasure we do attest her gradual and effectual growth under his auspices." In March, 1840, just previous to Bishop Kemper's resignation, at an informal meeting of a few clergymen and laymen, it was determined to call a primary convention for the purpose of organizing the different parishes of the State into a regular diocese. On Monday, Nov. 16, 1840, the convention assembled at Christ Church. Bishop Kemper presided, and eight clergymen were reported as entitled to seats, all of whom were present. Four parishes were represented by lay delegates also,—Christ Church and St. Paul's, St. Louis; St. Paul's, Palmyra; and St. Paul's, St. Charles. At this time Grace Church, Jefferson City, and Christ Church, Boonville, were organized. A constitution and canons were adopted, and the diocese formally established.

Bishop Kemper continued to administer its affairs

until 1843. His duties had then become so extensive and burdensome that he was compelled to ask that a portion of the field be assigned to another. He proposed that the clergy of the diocese and the vestry of Christ Church should select a clergyman agreeable to them respectively as bishop and rector of the church, and then petition the General Convention to appoint him bishop for the diocese of Missouri. In accordance with this plan the Diocesan Convention which met at Christ Church parsonage Sept. 27, 1843, decided to recommend the Rev. C. S. Hawks, of Buffalo, N. Y., for bishop. Dr. Hawks, the first Bishop of Missouri, was consecrated Oct. 20, 1844. Having been elected rector of Christ Church, he assumed the pastorate in January, 1844, and continued to act as rector in addition to the exercises of his episcopal functions. Bishop Hawks remained in pastoral charge until Feb. 1, 1854. When he assumed charge of the diocese there were in the State only seven resident Episcopal clergymen and only three church buildings,—Christ and St. Paul in St. Louis, and one at Jefferson City. When Bishop Hawks died (April 19, 1868) there were in the diocese twenty-four clergymen canonically resident, nineteen church buildings, and six parsonages, and there had been confirmed during his episcopate three thousand and sixty-one persons. On May 29, 1868, the Diocesan Convention elected as bishop of the diocese Right Rev. D. S. Tuttle, D.D., then missionary Bishop of Montana, but he declined the office. At a special convention called Sept. 4, 1868, and held in St. George's Church, Rev. Charles F. Robertson, D.D., of New York, was elected. He was consecrated second Bishop of Missouri, Oct. 25, 1868, and officiated for the first time in the State in Christ Church, Nov. 8, 1868. There were at that time reported eighteen hundred communicants in the diocese. The years since have been marked by great vigor and growth. In the spring of 1869 was purchased, at a cost of about eighteen thousand dollars, the handsome episcopal residence at No. 2727 Chestnut Street. In 1882 there were sixty-five clergymen and nearly six thousand communicants in the diocese, seventy-one church buildings, and eleven rectories. There have been five thousand nine hundred and six confirmations. In St. Louis there are fifteen parishes and missions and fourteen church buildings. The church property in the diocese is valued at something more than one million dollars. During the last few years between two and three hundred thousand dollars of church debts have been paid off, and about one hundred thousand dollars are annually raised for church purposes. There are two general charitable institutions under the care of the church (both in St.

Louis),—the Orphans' Home and St. Luke's Hospital; there are also the School of the Good Shepherd for girls in St. Louis, and St. Paul's College, Palmyra. The latter owed its origin to George R. H. Clark, a parishioner of Christ Church, who in 1844 presented to the diocese three hundred and thirty-three acres of land in Montgomery County, Mo., for the purpose of establishing a mission, which was named after the father of the donor, "The Governor Clark Mission." A mission school was established in 1848, and was subsequently transformed into St. Paul's College. During the civil war (in 1862) the college passed out of the hands of the diocese, but was repurchased by the church authorities in 1869, and the preparatory department was carried on until 1879, when the school was sold, to be continued as a private enterprise. St. James' Academy, Macon, established in 1876 by the Rev. Ethelbert Talbot, is also conducted under church auspices, and there are several parochial schools.

Jackson Kemper, D.D., was the first missionary bishop of the Protestant Episcopal Church. He was born in Pleasant Valley, Dutchess Co., N. Y., Dec. 24, 1789, and died at Delafield, Waukesha Co., Wis., May 24, 1870. He was ordained deacon in 1811, and priest in 1812. For twenty years after his ordination he labored in the ministry in Philadelphia, but subsequently removed to Connecticut, and while rector of a church at Norwalk, in that State, was consecrated (Sept. 25, 1835) missionary Bishop of the Northwest (Missouri and Indiana). For many years he resided at St. Louis, acting until April 20, 1840, as rector of Christ Church, but his diocesan charge having developed more rapidly than was expected, he requested the Diocesan Convention to relieve him by the erection of Missouri into a separate See and the appointment of another bishop. Accordingly on the 27th of September, 1843, the convention of the diocese determined to request the General Convention, "by and with the consent of the Right Rev. Jackson Kemper, D.D., to appoint a bishop for the diocese of Missouri." This request was granted, and the Rev. Cicero S. Hawks, of Buffalo, N. Y., as heretofore stated, was appointed bishop. After Bishop Hawks took charge of the diocese Bishop Kemper was transferred to the missionary See comprised in the States of Wisconsin, Iowa, Minnesota, Kansas, and Nebraska. In 1854 he was elected Bishop of Wisconsin, and in 1863 he attended the General Council of bishops in London.

Rev. Cicero S. Hawks, D.D., first Bishop of Missouri, was born in Newbern, N. C., May 26, 1812, and was the youngest of nine children. He graduated from the University of North Carolina with the de-

gree of A.B., and studied law in Newbern, and later in New York, but decided to abandon the law and enter the ministry. He studied theology under his celebrated brother, Rev. Dr. F. L. Hawks, of New York; was ordained deacon in December, 1834, by Right Rev. B. T. Onderdonk, D.D., Bishop of New York; was soon after ordained priest by the same bishop, and was appointed rector of Saugerties parish, Ulster Co., N. Y., where he remained two years. He was next rector of Trinity Church, Buffalo, until December, 1843. On Sept. 27, 1843, the convention assembled in Christ Church parsonage, St. Louis (Bishop Kemper, of Missouri and Indiana, presiding), adopted resolutions asking the General Convention to give Missouri a bishop. It was also decided that the following communication should be addressed to Bishop Kemper, and signed by all the clerical and lay delegates present: "We, the undersigned, members of the convention of the diocese of Missouri, take the liberty of making known to you our preference for the Rev. Cicero S. Hawks, rector of Trinity Church, Buffalo, N. Y., as bishop of the said diocese, and request that you will inform the General Convention that he, the said Cicero S. Hawks, is one whom the said diocese would prefer for that office."

This action was taken in the convention in answer to a communication from the vestry of Christ Church, presented by Alexander Hamilton, which read as follows:

"Resolved, That, as a measure of expediency, and one which is highly desirable under the peculiar circumstances in which this church and the diocese are at present situated, we, the vestry of Christ Church, are perfectly willing, and do hereby consent to call as rector thereof the Rev. Cicero S. Hawks, of Buffalo, N. Y., provided, however, that the convention of this diocese, now in session, shall unite in procuring or applying for his appointment to the episcopate thereof, under the canon for that purpose, Sec. 1, Can. 1, of 1833."

Accordingly, Dr. Hawks assumed the rectorship of Christ Church on Jan. 1, 1844, and at the next meeting of the General Convention was consecrated and appointed Bishop of Missouri, Oct. 20, 1844.

In his first report to the convention Bishop Hawks said,—

"I took charge of this parish on the 1st of January, 1844, and found it in a sad condition. . . . It was at that time embarrassed with a debt of seventeen thousand dollars. I thank God that the parish has been able and willing to liquidate a large portion of this debt. My trust is that before winter the amount of our indebtedness may not exceed five thousand dollars."

As early as 1847 measures were taken in the convention to relieve the bishop from a parochial charge,

and in answer to a communication from the standing committee of the diocese it was, on the part of the vestry of Christ Church,

"Resolved, That the vestry of this church will pay for the current year for the support of the Bishop of Missouri the sum of fifty dollars; and the members of this vestry will, as members of Christ Church, use their influence to have the same sum paid annually by this church until sufficient money can be raised by other means for the support of the bishop of this diocese. This resolution to take effect when the bishop ceases to be rector of Christ Church."

It was found, however, in the weak state of the diocese, utterly impossible to raise any sufficient amount for the bishop's support.

In 1867, Bishop Hawks experienced the first shock of the disease which, in the year following, proved fatal. On April 5, 1868, he attended public worship for the last time, and was present in the chancel of Christ Church while Bishop Vail, of Kansas, then on a visit, administered confirmation, but he took no part in the service. His last attack occurred on Saturday evening, April 18th, from which time he was unconscious till he died, at 6.30 P.M. on Sunday, April 19, 1868. On the 23d the remains were taken to Christ Church, where they lay in state until the following day, when the funeral services were held. Bishops Whitehouse, Lee, and Vail officiated, and Bishop Whitehouse pronounced the funeral discourse. The standing committee were present as mourners, and the remaining clergy of the diocese as honorary pallbearers.

In February, 1835, Dr. Hawks married his first wife, a Miss Jones, of Hillsboro', N. C., by whom he had one daughter. This lady died in July, 1855, and her child, Isabel, died in June, 1864. The bishop's second wife was Ada, daughter of Judge Abiel Leonard, of Howard County, who survived him with two children. In 1849, during the cholera scourge in St. Louis, the parishioners of Christ Church, appreciating his self-sacrificing services, presented him with three thousand dollars in money, and afterwards on the same account the property on Paul Street where he lived.

Bishop Hawks was a man of recognized learning and piety, and one of the ablest administrators of his period in the Protestant Episcopal Church. As a preacher he was greatly admired, and in private life was extremely popular. Besides furnishing reviews and contributions to various periodicals, he edited the "Boys and Girls Library" of the Messrs. Harper, of New York, and the "Library for My Young Countrymen," published by Appleton & Co., the latter including "Uncle Phelps' Conversations for the Young," several volumes of which were from his pen, as was

C. J. Robertson

also the little work "Friday Christian, or the First-Born of Pitcairn's Island." In announcing his death the *St. Louis Republican* said,—

"He was counted among the most eloquent divines in a church which has been served by many accomplished pulpit orators. Under his supervision the Episcopal Church in Missouri grew to large proportions in members and wealth. He was a faithful bishop, who imitated the great apostle in taking upon his shoulders the 'care of all the churches.' His devotion to the interests of the Episcopal Church was earnest and laborious. Yet his spirit was altogether catholic, and the prosperity of true religion in all denominations was to him a cause of rejoicing. The clergy of St. Louis of every name always found him fraternal, and a ready co-operator in all works which appealed to general Christian benevolence for support. In personal intercourse, Bishop Hawks was marked by much of amiability and genial sociability. His friendships were numerous and warm, both within and without the limits of his own ecclesiastical connections. The intelligence of his death will be received with sorrowful surprise in many churches and in many households throughout the State, and his memory will be cherished in the Christian Church in Missouri as that of one whose life was filled up with full measures of usefulness, and in earnest efforts to promote the public welfare by the dissemination of the principles of Christian morality and religion."

Right Rev. Charles F. Robertson, D.D., second bishop of the diocese of Missouri, was born in New York City on the 2d of March, 1835. His family had for generations lived in that city. He was educated in private schools, and it was at first intended that he should follow his father in mercantile pursuits, in which in fact for several years he was engaged. He entered Yale College, however, in his twentieth year, with a view to preparing for holy orders in the church, and graduated with honors in 1859. He immediately thereupon entered the General Theological Seminary of the Protestant Episcopal Church in New York, was graduated, and ordained in June, 1862.

He at once assumed the rectorship of St. Mark's Church, Malone, N. Y., which position he retained, although frequently solicited to remove to larger parishes, until Sept. 1, 1868, when he entered upon the rectorship of St. James' Church, Batavia, N. Y. Four days after this he was elected by the convention of the diocese of Missouri to its vacant episcopate.

Dr. Robertson was consecrated Oct. 25, 1868, in Grace Church, New York, and was at that time one of the youngest of the diocesan bishops in the church. With perfect health and strong physical powers, he entered immediately upon a vigorous exercise of his office. He arrived in St. Louis early in November, and preached his first sermon in Christ Church on the 8th of that month. He preached on the afternoon of the same day at Trinity Church, and in the evening at St. George's.

During Bishop Robertson's administration of the diocese of Missouri the growth of the church throughout the State has been very great. While only eighteen clergymen joined in his election, there are now over sixty clergymen connected with the diocese. Over seventy churches have been built. The parishes, which were nearly overwhelmed with hundreds of thousands of dollars of debt ten years ago, are now almost entirely free from incumbrance. The number of communicants has multiplied threefold. In St. Louis, while in 1868 there were only five parishes, now there are fifteen churches and missions where services are steadily held.

He received his doctor's degree from Columbia College, New York. He was married in 1865 to Miss Rebecca Duane, whose great-grandfather was the first mayor of New York after the Revolution, and one of the few lay members of the convention which organized the Episcopal Church in this country in 1784.

Bishop Robertson is connected officially with many general institutions of the church, and is president of the board of trustees of Nashotah Theological Seminary in Wisconsin. He is also a member of the Missouri Historical Society and the Social Science Association, is corresponding secretary for Missouri of the National Conference of Charities and Corrections, and is interested in many other local objects, besides being head of all the educational and charitable institutions of the church in his diocese. His home is at the episcopal residence in St. Louis.

Christ Protestant Episcopal Church is situated at the southeast corner of Thirteenth and Locust Streets. Rev. Montgomery Schuyler, D.D., is the rector. Christ parish is the mother parish of the Protestant Episcopal Church in St. Louis. It was organized Nov. 1, 1819, the forty-three signers of the articles of association being Thomas F. Riddick, F. Dent, Abijah Hull, William Stokes, J. V. Garnier, A. Rutgers, M. Wherry, Henry Von Phul, D. B. Hoffman, Edw. Horrocks, Wilson P. Hunt, Robert Wash, H. L. Hoffman, William T. Hamilton, Joseph Charles, R. Dean, Jr., J. Clemens, Jr., A. J. Bruce, Risdon H. Price, James Kennerley, Robert Jones, S. Hammond, John Stimpson, W. Christy, James Loper, Thompson P. Williams, Clement March, J. R. Ober, Theodore Hunt, William Carr Lane, A. Nelson, William Rector, Robert Bailey, Charles Gulager, Daniel C. Boss, J. McGunnege, A. Brown, Josiah Bright, J. W. Hoyt, Peter Ferguson, Rufus Pettibone, John Nicholson, William H. Ashley. The original document and the original subscription-list are both preserved in the pastor's study as valuable historical

relics. The first vestry, elected Dec. 6, 1819, was composed of Thomas F. Riddick and Wilson P. Hunt, wardens; Samuel Hammond, Henry Von Phul, James Kennerly, James Clemens, Jr., William Stokes, Joseph V. Garnier, A. Rutgers, and Frederick Dent. The first meeting of the vestry was held Jan. 10, 1820, on which occasion Rev. John Ward, of Lexington, Ky., was called to the rectorship at a salary of one thousand dollars per annum, to date from November 1st previous. He remained until April, 1821, and then returned to Lexington, where, with his wife, he conducted a young ladies' seminary with great success. He died at Lexington in his eighty-first year, and was buried May 3, 1860. The infant parish had worshiped in a one-story frame building on the southwest corner of Second and Walnut Streets, which, known as "the long building," had been used for various purposes, among others as a blacksmith-shop, and which it had suitably fitted up; but on being abandoned by its pastor, Mr. Ward, the congregation became disorganized, and on Aug. 21, 1821, formally surrendered its place of meeting, and sold its pulpit, desk, and pews to the Methodist Society. During nearly four years no Protestant Episcopal service was held in St. Louis, save on the occasion of chance visits of clergymen from abroad.

Among those who thus officiated was the Rev. Amos Baldwin, of Western New York. In the fall of 1825, Rev. Thomas Horrell,¹ of Virginia, who had been engaged in missionary work in various parts of Missouri, visited St. Louis, and collected the scattered elements of the parish. A new vestry was elected Dec. 2, 1825, and on Jan. 31, 1826, an arrangement was effected for holding services alternately with the Methodists in their meeting-house, and afterwards occasionally also in the Baptist Church, corner of Third and Market Streets. About this time James Clemens, Jr., at the request of the parishioners, made a journey to the Eastern States with the view of collecting the means for the erection of a church. He called upon Bishop White, in Philadelphia, but the bishop's response to his appeal was so discouraging that he made no further effort. On the 24th of June, 1826, it was decided to purchase a lot for four hundred dollars from Messrs. Lucas & Hunt, on the corner of Third and Chestnut Streets, to contract with

Messrs. Laveille & Meriton for the erection upon it of a church building, and to invite Mr. Horrell to become permanently rector of the parish. The building cost about seven thousand dollars, and was completed in 1829. It is described as having been "a neat little edifice in the centre of the city, but looking more like an academy than a church, having forty-eight pews capable of seating two hundred and fifty persons, with a gallery at one end, in which is a most excellent organ." It is recorded that to the liberality of James Clemens, Jr., and to the pecuniary sacrifices of the rector the erection of the building was mainly due. On the 10th of November, 1829, William H. Ashley, H. L. Hoffmann, and Thomas Biddle, a committee of the vestry, announced that they would "offer for sale on Thursday morning at ten o'clock, on the premises, the pews in the Episcopal Church of St. Louis, at the corner of Chestnut and Third. The church, which is handsomely finished, will be opened on that day, and the terms of sale then made known." This is believed to have been the first Protestant Episcopal Church erected west of the Mississippi.

Mr. Horrell resigned March 22, 1831. Rev. Mr. Davis, a school-teacher, was called April 25, 1831, and served three months. Rev. L. H. Corson, deacon and missionary, served about one year. Up to the expiration of Mr. Corson's term of service there had been no parish register, and no record of baptisms, marriages, or funerals. In a letter of the vestry dated March 3, 1832, to Rev. N. H. Cobb, afterwards Bishop of Alabama, inviting him to the rectorship of the church, it was stated that there were at that time about thirty communicants.

On the 4th of September, 1832, the Rev. William Chaderton,² of Philadelphia, was called to the rectorship. He at once opened a parish register in

² William Chaderton was born in the island of Barbadoes in 1788, was graduated at the University of Edinburgh, Scotland, and was ordained deacon in 1813, and soon after priest. He returned to the West Indies, and held appointments successively in the islands of Antigua and Tortosa, then came to the United States, and was for a time assistant to Bishop White, of Philadelphia. He became rector of Christ Church, St. Louis, in October, 1832, resigned June 8, 1835, went to Northampton, Mass., and towards the close of 1836 was appointed by the Bishop of Montreal to the chaplaincy of St. Peter's in Quebec, where he died July 15, 1847. He was a man of rare zeal and devotion, but also of an equally rare, almost morbid, sensitiveness of conscience. He was obliged to leave the Danish island of Santa Cruz because he refused to accept unworthy persons as sponsors, preferring to wander as a poor missionary in a strange land. He also left Christ Church in St. Louis because he feared his ministrations were not productive of sufficient results, although the vestry were satisfied with him, his parishioners loved him, and he had infused new life into the parish and increased the number of its communicants from thirty to seventy.

¹ Thomas Horrell was born in Calvert County, Md., Sept. 19, 1789, was educated at Charlotte Hall, and entered the ministry at the age of twenty-five years. He served as a minister in Maryland and Virginia, removed to Jackson, Mo., in 1824, and thence to St. Louis in 1825. He removed to Cincinnati, Ohio, in 1831, and afterwards to Columbia, Tenn., returned to St. Louis in 1842, and died there in February, 1850.

proper form, and made suitable records of all his official acts. Mr. Chaderton entered upon the discharge of his duties in October, 1832, and resigned June 8, 1835. The prospects of the parish must have greatly improved under Mr. Chaderton's rectorship, for at a meeting of the vestry in 1833 a proposition was made to enlarge the church, though at the time there was a debt of some three thousand five hundred dollars existing against it. When Mr. Chaderton resigned he left "the State of Missouri with only one organized Protestant Episcopal parish, one church built, and no officiating clergyman,—not a very large result for sixteen years of growth."

Right Rev. Jackson Kemper, D.D., missionary bishop-elect of Missouri and Indiana, was called Sept. 20, 1835, and began his pastorate in December following, with Rev. P. R. Minard as assistant, who began one month before the bishop. In May, 1836, Mr. Minard made the following report to Bishop Kemper :

"Upon my arrival, in November last, I found a church edifice, neat in appearance, but more like an academy than a house of public worship, capable of containing about two hundred and fifty persons. It was well furnished, and contained a small but fine-toned organ. The church had been built for about six thousand dollars, for one of which the vestry are still in debt. On the parish register, which I found in good order, there were forty-five communicants who could be found. There were enrolled as belonging to the congregation in all one hundred and ninety persons. A Sunday-school had been continued until I arrived. The first day it was visited by me it contained eighteen scholars. The average attendance at that time was from twenty to thirty. Our school now has a constant attendance of sixty or seventy. The church now contains forty-eight pews, and it is the opinion of the vestry that fifty more could be let if they had them. For this reason the vestry have determined to build a larger house, and already think they have the means within their control. They intend to build a house about sixty by ninety, with a gallery, in a part of which the negroes can be accommodated."

Mr. Minard resigned in February, 1839, to take temporary charge of Kemper College.

He was assistant in the parish for a period of about three and a half years, and during his ministry the register shows one hundred and thirty-nine baptisms, thirty-nine marriages, fifty-seven burials, and sixty-three confirmations.

The Rev. W. G. Heyer succeeded him, and remained but for a period of about six months, during which time there were twelve baptisms, five marriages, and twenty-three burials.

The Rev. F. F. Peake succeeded the Rev. W. G. Heyer, and for six months officiated in the capacity of assistant, during which time there were twenty-one baptisms, six marriages, twenty-two burials, and twenty-five confirmations.

Bishop Kemper resigned on the 20th of April,

1840, having served the parish as rector for four years and a half, giving to it as much time as his arduous duties as missionary bishop "of two States, two Territories, with a large portion of the Indian country," would allow. On several occasions the vestry gave expression to their gratitude to his "very useful and indefatigable service," and the generous sacrifices made from time to time in their behalf, having refused all remuneration from the parish, and giving to his assistant the full salary pledged to the rector.

Rev. F. F. Peake,¹ who had succeeded Rev. Mr. Minard as assistant to the bishop, was called to the rectorship Aug. 19, 1840. He began his pastorate September 5th following, and resigned Oct. 27, 1842. During his incumbency of the parish there were ten baptisms, thirty-two marriages, thirty-seven burials, and twenty-eight confirmations.

Rev. E. C. Hutchinson, D.D., was called Oct. 31, 1842, but declined, his friends being unwilling that he should leave Kemper College, of which he was president. Bishop Kemper resumed charge until March, 1843, when Rev. Mr. Horrell returned, and served until Jan. 1, 1844, when Rev. Cicero S. Hawks, of Buffalo, N. Y., who had been called to the rectorship Sept. 27, 1843, took charge. Bishop Hawks had as assistants Rev. Charles Tomes, for nearly a year from January, 1848, and Rev. William A. Leach, called in the fall of 1849, and resigned November, 1851, to become rector of St. Paul's. Bishop Hawks resigned the rectorship Nov. 30, 1853, to take effect Feb. 1, 1854, and the parish pledged itself to contribute a sufficient sum annually for five years to secure him a salary of two thousand five hundred dollars. Rev. D. G. Estes next served until Easter, and Rev. Mr. Harrison for a short time after. Then the church and parsonage were closed some months for repairs, and on Oct. 1, 1854, Rev. Montgomery Schuyler, D.D.,² took charge of the parish. He

¹ F. F. Peake graduated at the Protestant Episcopal General Theological Seminary, New York, in 1836, and the same year went as missionary to Boonville, Mo., whence he was called to the rectorship of Christ Church in 1840. From St. Louis he went to Pensacola, Fla., where he built up a flourishing parish and established the West Florida Collegiate Institute. He died of consumption in 1846.

² Montgomery Schuyler was born in New York City, Jan. 9, 1814. He is descended of old Dutch stock, his remote ancestor, Philip Pieterse Van Schuyler, having come from Holland soon after the establishment of the Dutch colony on the Hudson, and settled at where is now the city of Albany. "The Flats," first occupied by him, is still in the possession of the family, one of the oldest homesteads in the country. The present Dr. Schuyler entered Geneva (now Hobart) College, but was graduated at Union College, Schenectady, in 1834, after which he

has had as assistants Rev. D. W. C. Loop, appointed in 1856; Rev. T. I. Holcombe, deacon, from June 28, 1858, till Oct. 1, 1859, when he went as missionary to Springfield, Mo.; and Rev. W. W. Silvester, who still fills the position.

The church, which had been built in 1829, was consecrated May 25, 1834, by Right Rev. B. B. Smith, Bishop of Kentucky, this being the first visit to St. Louis of a bishop of the Protestant Episcopal Church, and the first occasion on which the rite of confirmation was administered by a Protestant Episcopal bishop in Missouri. In May, 1836, the parish (after sixteen years of growth) numbered only one hundred and ninety persons in the congregation, forty communicants, and from sixty to seventy children in the Sunday-school. On the 29th of June of that year it was decided to erect a new and larger building, sixty by ninety feet. A lot at the corner of Fifth and Chestnut Streets, eighty-five by one hundred and thirty-five feet, was purchased for ten thousand two hundred dollars (one hundred and twenty dollars per foot), and the old building and lot were sold to the Baptist Society for twelve thousand dollars, possession to be given in a year's time. The basement of the new building was occupied in March, 1838, and the completed edifice was consecrated by Bishop Kemper on the 17th of February, 1839. Josiah Spalding, on behalf of the wardens and vestry, read and presented to the bishop the instrument of donation. The sentence of consecration was read by the Rev. P. R. Minard. There were present of the clergy, be-

studied law for two years, then turned his attention to theology, and entered the ministry in 1841. He was for three years rector of Trinity Church, Marshall, Mich.; for a year and a half rector of Grace Church, Lyons, N. Y.; for nearly ten years rector of St. John's Church, Buffalo, N. Y.; and has been for over twenty-eight years rector of Christ Church, St. Louis. He has been twice married, first in 1843 and again in 1854, and has a large family. A son, Rev. Louis S. Schuyler, died in 1879, at the age of twenty-seven, a self-devoted victim of yellow fever, in Memphis, whither he had voluntarily hastened in response to the cry for ministerial help, dying as he had lived, a hero in the cause of religion and a martyr to his own zeal. During the civil war Dr. Schuyler promptly espoused the cause of the Union, in the face of unpopularity and the desertion of friends, ministering to the sick and wounded in the military hospitals, when such ministrations were regarded as evidences of antagonism to the South and resented as such by Southern sympathizers; but when Confederate soldiers began to fill the hospitals and prisons and Dr. Schuyler was found to be as zealous in his ministrations to them as to those of the Union armies, the nobility of his character began to be appreciated and the clouds of unpopularity broke away. During his pastorate in St. Louis he has been several times called to other fields and twice back to his old parish in Buffalo, but has always declined to abandon his post. There is probably to-day in St. Louis no pastor more thoroughly venerated or beloved by his congregation.

sides the bishop and his assistants, the Rev. Messrs. Dresser, of Springfield; Darrow, of Collinsville; and Homan, of Kemper College.

The church it had been estimated would not cost more than \$40,000, but when all the claims had been presented the aggregate was swelled to \$70,000, leaving the parish \$20,000 in debt. On the day following that of the consecration (Monday) the pews were sold. The building is described by Rev. Dr. Schuyler as being "a nondescript, of which nothing can be said save that it furnished uncomfortable sittings for about six hundred people."

At the time of the completion of the church the wardens were Wilson P. Hunt and H. L. Hoffman, and the vestrymen were J. P. Doan, Daniel Hough, H. Von Phul, Edward Tracy, Asa Wilgus, R. M. Strother, A. Hamilton, H. S. Coxe, and Josiah Spalding.

In March, 1839, Bishop Kemper announced that a body of Lutherans who had been persecuted by the government of Saxony, and who had arrived in St. Louis about three months before, desired to hold services in the church, and that he had granted their request. This congregation continued to worship in the basement of the church until 1842.

In the autumn of 1839 a burial-ground was purchased for the use of the parish for the sum of three thousand dollars, and steps were taken for laying out and ornamenting the grounds. In the fall of 1848 the church edifice was repaired at a cost of about five thousand dollars, and the church was closed for four months. In September of the same year a handsome marble font was presented to the church by Hon. L. M. Kennett.

On the 9th of May, 1853, a committee was appointed to inquire where a new church lot could be bought, and for what the old could be sold, but no further action was taken until March 12, 1859, when the building and lot on Fifth Street were sold to Messrs. Crow & McCreery for eighty thousand dollars, with the condition that the consecrated walls should never be applied to any secular use, but should be at once torn down. The amount of the original purchase by the parish in 1836 was ten thousand two hundred dollars. On April 10, 1859, the present lot, one hundred and seventy-five feet on Locust Street by one hundred and six feet four inches on Thirteenth Street, was bought of James H. Lucas for forty-three thousand seven hundred and fifty dollars. The plans for the new building furnished by Leopold Eidlitz, of New York, were adopted July 11, 1859, and contracts were given out and work at once begun. The estimated cost was one hundred and twenty-five thousand

dollars. The last service in the old church was held Jan. 22, 1860. During the interval, before the completion of the new church, service was held at Mercantile Library Hall, until April 7, 1861, when the congregation united for worship with that of St. Paul's Church, which was then without a rector.

The corner-stone of the new edifice was laid April 22, 1860. Bishop Hawks conducted the ceremonies, assisted by Rev. Montgomery Schuyler, D.D., rector of Christ Church; Rev. F. J. Clere, of Grace Church; Rev. E. F. Berkley, of St. George's Church; Rev. John Coleman, D.D., of St. John's Church; Rev. R. E. Terry, of St. Paul's Church; and Rev. E. C. Hutchison, of Trinity Church. Among the contents of the corner-stone were those which had been deposited in the corner-stone of the old church. After the usual ceremonies, Bishop Hawks delivered an address. The chapel was completed early in May, 1862, but owing to the delays and embarrassments caused by the civil war the main building was not finished until five years later. The walls had progressed to the height of some ten feet, and it was hoped that they would be ready for the roof by July, 1861, but when the approach of winter necessitated a stoppage of the work, it was found that the funds had been exhausted. On the 4th of December, 1861, a resolution was passed by the vestry directing the building committee to notify the contractors to proceed no further with the main body of the church, and to cancel the contracts, if possible. Towards the close of 1861 it was decided that a strenuous effort should be made to complete the chapel, and mainly through the exertions of Alfred Mackey, secretary of the vestry, this work was accomplished in the spring of 1862. It was estimated that sixty-five thousand dollars would be needed to put the main building in condition for worship, and on the 8th of February, 1864, thirteen thousand dollars of the fifteen thousand dollars required to make up this sum was pledged by members of the congregation. Early in the spring of 1864 work on the walls was resumed. It soon became evident that more money would be required, and in the following autumn a fair was held, which realized the sum of ten thousand and twenty-five dollars. On the 22d of February, 1866, a parish-meeting was held to consult upon the best plan for raising funds to complete the church. According to the estimate of the architect \$40,120.50 would be required. It was agreed by the meeting that the vestry should be empowered to mortgage the property of the church for a sum sufficient to finish and furnish the building. On the 14th of May, 1866, another parish-meeting was held for the purpose of organizing as a religious corpora-

tion under the State Constitution. Articles of association were adopted, and it was agreed to borrow the sum of fifty thousand dollars to complete the church. After several failures the loan was negotiated, and the work went on. The contributions to the building fund on Easter-day, 1867, amounted to twenty-one thousand five hundred and forty-seven dollars, and the construction of the edifice was now pushed more rapidly. In June, 1867, a proposition was made by Davis and Ritchie to erect galleries in the north and south transepts, on the condition that they should receive the proceeds of the sale of these pews and their rental for two years, the rental after that period to revert to the church. The sum of five thousand four hundred and fifty dollars was also realized in the presentation to the church by different individuals of twenty memorial windows. The church was first used for public worship on Christmas-day, 1867. During the interval the congregation had worshiped in the chapel, which was itself a church of moderate dimensions, and had been built as nearly as possible in accordance with the original plans. It was of the Gothic style of architecture, and its interior finish was elegant and beautiful.

In its completed form, Christ Church is undoubtedly one of the noblest edifices of its kind in the country. The architecture is Gothic, of the ornate early English style, and the arrangement is that of a nave and aisles. The nave is one hundred and twenty-six feet long, thirty-six feet wide, and ninety-three feet high, twenty-five feet higher than that of Trinity Church, and only ten feet lower than that of Westminster Abbey. The north and south aisles are each sixty-eight by fourteen feet wide, and the north and south transepts each eighteen by thirty-six feet. The chancel is thirty-five feet deep by thirty-seven and a half feet wide, and is separated from the nave by a handsome arch. The total interior length is one hundred and sixty-one feet. At the north side is a vestry-room, into which a door opens from the chancel, and above the vestry-room there is a rector's study. A gallery is placed across the north and south transepts, and also at the west end of the nave, where the organ is situated. At the northwest corner of the building is the tower, as yet uncompleted. The structure is built in the most substantial manner throughout. All the stone used in the building is the Illinois sandstone. The roof of the nave and chancel is open-timbered, massive in its framing and mouldings, and richly decorated. The uncompleted tower is to be one hundred and fifty feet high without spire, and handsomely ornamented. A stone porch and flying buttresses are also yet to be built. The walls and buttresses, and the mullions and tracery of the win-

dows, are all of stone. The heavy stone arches of the chancel, transepts, and nave rest on four columns four feet in diameter, octagonal in shape and without capitals, a feature which adds to their apparent height and the grace of the arches. The lofty clear-story is supported by octagonal pillars two feet ten inches in diameter. The seating capacity (including the transept galleries) is fifteen hundred. The chapel attached will seat three hundred persons, and has connected with it rooms for Sunday-school, library, ladies' charitable meetings, choir rehearsals, and social gatherings. The windows of the church and chapel are of stained glass, and the pews and interior fittings throughout are of black walnut. The pulpit is octagonal and of handsome design, as are also the altar, chancel rail, stalls, and prayer-desks. The edifice cost two hundred and thirty-five thousand dollars, and is unequalled in the city, and almost in the United States, for the massive grandeur of its interior. The rector reported during 1882 four hundred and thirty-four communicants, and an attendance at Sunday-school of two hundred and thirty-nine scholars.

The congregation of Christ Church celebrated the semi-centennial anniversary of its organization on the 1st of November, 1869. The sermon was preached by the rector, Rev. Dr. Schuyler.

St. Paul's Protestant Episcopal Church was the second Episcopal congregation established in St. Louis. On the 5th of November, 1839, a preliminary meeting was held in the basement of Christ Church, at which Bishop Kemper presided, to take into consideration the expediency of establishing a new parish. It was decided that such action was expedient, and a committee of thirteen of the leading members of Christ Church was appointed to co-operate with the Rev. Mr. Minard in carrying the resolution into effect. The movement was regarded as being of a missionary character, and the church was usually spoken of as the Mission Church. St. Paul's Church was organized, and the first vestry were elected on the 20th of April, 1840. Its first rector was the Rev. Peter R. Minard, previously assistant at Christ Church, whose pastorate lasted from 1840 to 1846. Mr. Minard's successors were William B. Corbyn, 1846-48; David P. Sanford, 1850-51; William A. Leach, 1851-54; D. Gordon Estes, 1854-55; R. E. Terry, 1856-60. During Mr. Terry's pastorate a new church edifice was consecrated. The congregation had worshiped since its organization in a building at the corner of Fifth and Wash Streets, for which five thousand dollars was paid, but in 1856 this property was sold, and in the following year lots were purchased at the southwest corner of Olive and Seventeenth Streets. On this

site a church and rectory were built at a cost of sixty-four thousand dollars, the work of construction having been begun in March, 1857, and the corner-stone laid, Bishop Hawks officiating, May 10, 1857. The church was finished and consecrated on the 19th of June, 1859. Dr. Hawks began the service by reciting the 24th Psalm, and was followed by the Rev. Mr. Clerc, of Grace Church, who read the usual form of request for consecration. The rector, Rev. Mr. Terry, read the sentence of consecration, and Rev. Mr. Weller, of Jefferson City, and Rev. Mr. Dunn, of Hannibal, read the prayers. The lessons were read by the Rev. Mr. Clerc, of Grace Church. Bishop Hawks preached the consecration sermon, after which the communion was celebrated. The location of the church was at that time more westerly than that of any other Protestant Church in the city. It was of Gothic architecture, with a front of sixty feet and a depth of one hundred and twenty feet. The tower rose to a height of eighty feet, and the front elevation was fifty feet from the pavement. An organ "of the workmanship of Messrs. Pilcher & Brother," of St. Louis, was placed in the building.

Rev. R. E. Terry, rector of the church, studied law in the office of Henry S. Geyer, of St. Louis, and practiced his profession for two years in Howard County. He then studied theology, and was ordained a minister of the Protestant Episcopal Church. On assuming the pastorate he found that the number of communicants had dwindled to thirty-five. The congregation soon removed from Fifth and Wash Streets, where it had previously been established, to the hall of the Washington University, and services were held at the latter place until plans could be matured for the erection of the proposed new church. Through Mr. Terry's energetic labors, seconded by those of the congregation, the erection of the new building was pushed rapidly to completion. In 1861 the church had become so heavily encumbered with debt that the congregation was forced to sell the property, and St. Paul's became extinct.

St. Paul's Church (P. E.), Third near Lafayette Street, South St. Louis (Carondelet), Rev. Joseph De Forest, rector, was organized in the summer of 1868, and held its first services August 30th of that year. The service was read by Rev. Charles Stewart, and the sermon was preached by Rev. E. F. Berkley. The congregation worshiped in rented halls until its present church was built. The property cost about five thousand dollars. The rectors have been the Revs. Charles Stewart, 1868-69; W. G. Spencer, D.D., 1869-70; M. S. Woodruff, 1870-72; O. H. Staples, 1873-79; J. P. T. Ingraham, 1879-81; and the present pas-

tor since 1881. The church reports thirty-eight families and seventy-five communicants connected with the congregation, and three teachers with sixty children in the Sunday-school.

St. John's Protestant Episcopal Church.—A meeting of Episcopalians in favor of forming a parish in the southern part of St. Louis was held in Christ Church Oct. 12, 1841. Rev. Mr. Minard was chosen chairman, and J. W. Twitchell acted as secretary. On the 28th of December, 1861, St. John's Church was formally organized and the first vestry elected. At the same time the Rev. Whiting Griswold was chosen rector. Services were held at first on the upper floor of an engine-house, on Second Street south of Plum, it being deemed inexpedient to build a church at that time, owing to the financial embarrassment of the mother parish,—Christ Church. Subsequently a brick edifice was erected on leased ground at the corner of Fifth and Spruce Streets. This was replaced by another brick structure, seating five hundred persons, erected at the southeast corner of Sixth and Spruce Streets, which was consecrated by Bishop Hawks in the latter part of August, 1853. This property was sold in 1871 for fifteen thousand dollars, for the use of the Italian Catholic congregation.

Rev. Whiting Griswold, first rector, died on the 24th of July, 1849, from congestion of the brain, superinduced by overwork during the yellow fever pestilence. At the time of Mr. Griswold's death a lot had been purchased at Eighth and Gratiot Streets and the foundation laid for a new church edifice. After that clergyman's death the vestry were compelled to sell the lot, but in 1852, during the pastorate of the Rev. Francis J. Clerc, they purchased the property at Sixth and Spruce Streets and erected a small church, as previously stated. Over the chancel a mural tablet was placed in memory of Mr. Griswold.

The erection of the present edifice was begun in 1870, and the corner-stone was laid by the Right Rev. C. F. Robertson, bishop of the diocese, on the 1st of August, 1871. The new church, situated at the northeast corner of Hickory and Dolman Streets, was completed in 1872, after designs by F. W. Reader. The building is of brick, and is one of the most beautiful churches in the city. Besides the main structure, it has Sunday-school- and lecture-rooms, rector's study, library, etc. Its rectors have been the Revs. Whiting Griswold, 1841-49; Francis J. Clerc, 1849-57; William R. Johnson, 1858; John Coleman, D.D., 1859-61; William G. Spencer, 1861-68; J. P. T. Ingraham, D.D., 1868-79; and the present pastor, Rev. Joseph T. Wright, since 1880. The communicants reported for 1882 number two hundred and

thirty-seven, and the Sunday-school had nine teachers and an average attendance of one hundred scholars.

Grace Protestant Episcopal Church, Eleventh and Warren Streets, Rev. J. P. T. Ingraham, rector, was organized in May, 1844. Its site was a lot of ground in the Chambers tract, North St. Louis. This property was originally owned by Col. William Chambers, of Kentucky, an officer of the United States army stationed in St. Louis, who purchased it in 1816. Several years later Col. Chambers sold one-third of the tract to Maj. Thomas Wright, and another third to William Christy, father-in-law of Maj. Wright. Soon after the admission of Missouri as a State, Messrs. Chambers, Wright, and Christy united in a plan for the establishment of a town upon their property. A plat of the proposed town was made, and four parcels of land were dedicated to the general use of the city. One of these, designated as "Circle No. 3," was set apart "for the purpose of erecting a house of worship and a burying-ground, to be opened for the interment of all denominations of religious persons." The street around this circle was named Church Street, but was afterwards known as Marion Alley. The circle afterwards became the site of Grace Church and graveyard. It was about three hundred feet in diameter, and contained nearly one and three-quarter acres in area. Subsequently the heirs and assigns of the proprietors disputed the title of Grace Church to the cemetery lot, and litigation followed. Bishop Hawks, in an address to the Diocesan Convention in 1860, gave the following account of the organization of Grace Church:

"Acting by the advice of my friend, that learned member of the bar, Mr. Josiah Spalding, then senior warden of Christ Church, of which I was rector, and with the hearty co-operation of the Rev. P. R. Minard, then rector of St. Paul's Church, St. Louis, and Mr. Calvin Case, a zealous layman in North St. Louis, all of whom are now deceased, I caused a subscription to be raised in North St. Louis, to which two-thirds of the inhabitants subscribed, to build an Episcopal Church upon that ground. Having obtained this, I filed the record and inclosed the ground. Grace Church was then organized, and soon a small church building was erected. Messrs. Cressy, Weller, and Woodward were the successive pastors in this weak enterprise. At length the Rev. Mr. Clerc became the rector, and under him the old edifice was beautifully enlarged, and, thus enlarged, it was my comfort to consecrate it. The property, in the day when it was given, was considered of little value, but with the growth of our city has become very valuable. It is not far, too, from our Orphans' Home, and, from its position alone, has become almost the chapel and the guardian, as spiritual things, of that institution."

The charter of Grace Church recites that, whereas Circle No. 3, "just west of Sixth Street," had been set apart for the erection of a house of worship thereon, and the inhabitants of North St. Louis had organized

an association for worship according to the forms and discipline of the Protestant Episcopal Church, therefore "the undersigned, proprietors and representatives" of the original proprietors, agreed, in consideration of the premises and of one dollar paid to them by Martha T. Christy, of North St. Louis, to relinquish and convey to her all their right and title to the property in question. This instrument was executed on the 31st of May, 1844, and was signed by M. T. Christy, Mary A. Wright, M. N. Taylor, and M. F. Christy. A supplementary agreement was entered into to the effect that, inasmuch as the property for the church edifice had been secured and a vestry organized, the subscribers would pay to Calvin Case, treasurer of the vestry, the sums set opposite their names. The signatures of one hundred and ten persons were subscribed to this document, attached to which was the acknowledgment of Archibald Carr, justice of the peace, that Calvin Case had sworn that the list of subscribers comprised two-thirds of the heads of families residing in North St. Louis on the 9th of April, 1845. The Mrs. Martha T. Christy mentioned in the charter as trustee for the property was the widow of William Christy, and the most active of the persons engaged in the work of organizing the church and establishing the cemetery. Among the members of the first vestry and most of the successive vestries were Dr. Alfred Heacock, Dwight Durkee, Hon. Isaac H. Sturgeon, Thomas L. Sturgeon, Daniel A. Rollins, Benjamin O'Fallon, Joseph Branch, and John Hallsell. Henry Overstolz, afterwards mayor of the city, was a vestryman of this church in 1850, and Hon. Erastus Wells was a member of the vestry in 1854. The cemetery was consecrated by Bishop Hawks, and the erection of the church edifice was begun in 1846. The building was not completed until 1851, but services were held in it without intermission after its construction had been sufficiently far advanced to permit of its use. It was a wooden structure, in the form of a cross, and with a steeple, and stood on elevated ground, the entrance being reached by a long flight of steps. In 1860 the building was enlarged, and on the 15th of April of that year was consecrated by Bishop Hawks, assisted by Rev. Dr. Schuyler, of Christ Church, Rev. Dr. Coleman, of St. John's, Rev. Mr. Terry, of St. Paul's, Rev. Mr. Berkley, of St. George's, Rev. Mr. Clark, of Calvary, and Rev. Mr. Clerc, rector of the parish. The consecration sermon was preached by the Rev. Dr. Coleman. In 1881 the ground, which was twenty feet above the grade of the street, was cut away, and the church, which had faced the east, was let down and turned so as to face the south, and was greatly im-

proved. It will now seat seven hundred persons. The parsonage, which stood a few steps from the church, was erected during the pastorate of the Rev. Mr. Woodward. The renovated church was reconsecrated Sunday, May 28, 1882. As it had once been formally consecrated by the bishop, it was deemed unnecessary to repeat the ceremonies in full, and a consecration prayer merely was therefore offered. The services were conducted by the pastor, Rev. Dr. Ingraham, and his assistant, the Rev. Mr. Phelps. Dr. Ingraham preached the consecration sermon, in the course of which he stated that the amount required to defray the cost of the alterations, payment of the old debt, etc., was ten thousand five hundred dollars. Of this sum five thousand dollars had been given and pledged by Joseph W. Branch, and over five thousand dollars more by the parishioners, leaving an indebtedness still remaining of one thousand three hundred and thirty dollars.

The rectors of St. John's have been the Revs. E. H. Cressy, 1845-48; R. H. Weller, 1850-51; W. H. Woodward, 1851-58; Francis J. Clerc, 1858-60; Bishop C. S. Hawks, D.D., 1863-67; William L. Githens, 1868-73; William N. Webbe, 1873-74; William L. Githens, 1874-77; Abiel Leonard, 1877-78; J. Gierlow, Ph.D., 1878-81; J. P. T. Ingraham, 1881. Dr. Ingraham is still the rector. Rev. Philip McKim and Benjamin O'Fallon were respectively assistant rector and lay reader of the church in its early days. According to the report of the rector for 1882, there were ninety communicants and sixteen teachers and one hundred and sixty children in the Sunday-school.

St. George's Protestant Episcopal Church is situated at the northwest corner of Beaumont and Chestnut Streets, Rev. John Fulton, D.D., rector. The organization of this parish grew out of the loss of Kemper College, which was sold for debt in 1845, while Rev. E. Carter Hutchinson was its president. Some time before Bishop Hawks was invited to become rector of Christ Church, Mr. Hutchinson had received a call from the vestry, but had declined it, his friends wishing him to remain at the head of the college. When the college was sold, many who were attached to him, in order to retain him in the diocese, proposed to organize a parish of which he should be the rector, and under date of March 22, 1845, addressed to Bishop Hawks the following petition:

"The undersigned, being anxious to advance the interests of the Protestant Episcopal Church in this growing city, beg leave to state that the medical faculty of the St. Louis University have generously offered the use of their hall, on Washington Avenue, between Tenth and Eleventh Streets, as a house of religious worship, during the spring, summer, and autumn months. As there
